Oscillation mode selection in gas lasers by thin film absorber in resonator, using standing wave electric fields periodicity

04 p0610 A69-14384

Maximum inversion density and output power of Ne-He laser, given optimal discharge in hollow cathode

04 p0610 A69-14422

Power and time characteristics of He-Ne laser pumped by microwave pulses

04 p0610 A69-14423

Emission amplification coefficients of gas laser using pure carbon dioxide, carbon dioxide/air mixtures and carbon dioxide/air/helium mixtures

04 p0611 A69-14426

Electron radiation temperature measurement in carbon dioxide laser with N and He additions by microwave technique, noting average electron energy and optical gain

04 p0611 A69-14445

Traveling waves interaction effects on emission modes of gas laser with circular resonator

04 p0611 A69-14545

Gas laser generation frequency control by emission absorption saturation effect, inserting neon filled emission absorbing cell into resonator

04 p0611 A69-14550

Nonadjustable Fabry-Perot scanning interferometer for gas laser spectra analysis, using barium titanate piezoceramic elements

04 p0598 A69-14854

Laser holography using colored KBr crystals subjected to hard gamma radiation as photosensitive material

04 p0598 A69-14855

Helium-neon gas laser cavity beam for automatic high speed particle sizing

04 p0611 A69-15023

Scanned laser beam display techniques based on cathode ray tube technology, noting flying spot scanner and beam deflection

04 p0600 A69-15028

Carbon dioxide laser noting output for added gases, efficiency, energy levels, excitation mechanism and tuning to single line and mode

04 p0612 A69-15173

Submillimeter water vapor laser power output for admixtures of H, N, carbon dioxide, methane, He and Ar, noting buffer effect of H

04 p0612 A69-15175

He/Ne ratio effect on performance of He-Ne laser in annular cavity

04 p0612 A69-15176

Colliding waves synchronization and stability in annular gas laser by electronic simulation

05 p0770 A69-15645

Rb 87 vapor laser short term frequency stability independent of vapor concentration, noting use as frequency standard

05 p0770 A69-15656

Relaxation rates of water vapor laser lines obtained with split discharge laser

05 p0771 A69-15810

Hydrogen molecular action in vacuum UV region during high current discharge

05 p0771 A69-15814

Thermal self focusing of argon laser beam passing through lead glass

05 p0771 A69-15819

Gas laser pulse induced attenuated and nonattenuated plasma radiation recording, determining absorption coefficients

05 p0762 A69-15900

Uranium hexafluoride-hydrogen hydrogen fluoride chemical laser, discussing conditions for negligible collisional deactivation and defined rotational temperature determination

05 p0771 A69-15906

Spectroscopy of potassium vapor using laser induced fluorescence, noting laser line coincides with several molecular transitions

05 p0771 A69-15907

Gas lasers involving gas-discharge collisions, selective pumping or chemical reactions to produce necessary inversion, giving theoretical analysis of excitation mechanisms

05 p0772 A69-16226

Gas laser frequency stabilization, considering electromechanical control systems 05 p0773 A69-16230

Thin film thermocouple detector for molecular lasers operating in middle and far IR range 05 p0773 A69-16284

Buildup modes of He-Ne laser in presence of other strongly oscillating modes, noting gain interaction effects 05 p0773 A69-16289

Self locking of three laser modes in He-Ne laser on basis of Lamb theory 05 p0773 A69-16290

High power stable modes of operation of argon laser, observing stable output spectra 05 p0773 A69-16292

Gallium arsenide electro-optic switch measuring signal time response to radiation step of homogeneously broadened carbon dioxide, He and nitrogen laser amplifier 05 p0773 A69-16293

High power continuous and quasi-continuous wave UV generation by ADP and KDP crystals in argon-ion laser cavity [IEEE PAPER B-1] 05 p0773 A69-16308

Relaxation time of carbon dioxide laser levels as function of water vapor, CO and Xe gas pressure measured by afterglow pulse gain technique [IEEE PAPER G-1] 05 p0774 A69-16314

Continuous UV noble gas ion lasers, noting small signal gain and power output limit at various current densities for strong lines [IEEE PAPER L-1] 05 p0775 A69-16321

Brewster angle window degradation of high power ionized argon gas lasers [IEEE PAPER L-4] 05 p0775 A69-16322

Absolute wavelength standard using saturated molecular absorption in methane inside He-Ne laser cavity [IEEE PAPER P-1] 05 p0775 A69-16323

Frequency stabilization and noise suppression in argon FM laser [IEEE PAPER P-7] 05 p0775 A69-16325

Dynamics of laser response in IR detection by means of optical mixing in He-Ne laser, noting bandwidth 05 p0776 A69-16331

Pulsed water vapor laser with single Brewster window for operation between 20 and 120 microns, comparing performance with ordinary laser 05 p0776 A69-16334

Zeeman effect in He-Ne lasers during simultaneous emissions at various gas pressures and currents in magnetic fields 06 p0932 A69-16912

Continuous and pulsed lasing characteristics during discharge in pure oxygen noting ozone formation and removal at tube walls 06 p0932 A69-16923

Carbon dioxide Q switched laser nonlinear amplification characteristics in vibrational-rotational bands 06 p0933 A69-17118

Integrated circuit interconnection patterns computerized design, discussing automatic laser mask-making control 06 p0931 A69-17199

Computer tape controlled pulsed externally excited gas laser mask making machine with micropositioning coordinate table for integrated circuit fabrication 06 p0931 A69-17200

Pulsed laser emission of atomic N in mixture of molecular N and He, noting effects of pressure and frequency and duration of excitation pulses 06 p0933 A69-17258

Gas laser operating on pure O-He-Ne-Ar mixture at liquid N temperatures, noting atomic O transitions, pulsed operation and energy level populations 06 p0933 A69-17259

He-Ne laser gain dependence on temperature noting influence of pumping conditions, discharge tube filling and geometry 06 p0934 A69-17260

Thermodynamic approach to calculation of molecular lasers, determining various population levels of carbon dioxide molecule by measuring amplification factors for rotational vibrational transitions 06 p0934 A69-17465

Electro-optical effect in Cr-doped GaAs single crystals at room temperature, discussing carbon dioxide laser radiation modulation by GaAs 06 p0934 A69-17466

Alternated magnetic field effects on lasing in ionized Ar 06 p0934 A69-17467

Generation process in three stage He-Ne cascade laser with wideband resonance, using simplified energy level scheme 06 p0934 A69-17496

Gas laser operation at high pressures, examining threshold pumping and power output dependence on pressure to optimize parameters 06 p0934 A69-17680

He-Ne laser with small spark gap optimum parameters dependent on active medium and resonator field structure 06 p0935 A69-17683

Coupled cavity carbon dioxide laser interferometer with feedback for measurement of transient plasma density in theta pinch, noting sensitivity 06 p0935 A69-17706

Inductively excited argon ion laser properties in high current regions 06 p0935 A69-17767

Raman spectra of optical phonons in semiconductors, using reflection techniques and Ar laser excitation 06 p0936 A69-17882

Optical Fourier transform applied to structural analysis of catalase crystalline media by gas laser 06 p0928 A69-17890

High power noble gas CW UV ion laser with W disk structure, showing continuous UV output limitation by optical degradation effects 06 p0936 A69-17900

Second order nonlinear coefficient measurement for optical generation of millimeter wave difference frequencies in GaAs waveguide, using carbon dioxide laser 06 p0928 A69-17903

Gas lasers principles of operation, discussing population mechanism, lifetime conditions, excitation processes, electron velocity distribution and types of discharges 06 p0937 A69-18008

Atomic, ionic and molecular gas lasers applications, population reversal conditions and processing technology 07 p1143 A69-18250

Nonlinear interaction effects on frequency and polarization characteristics of dual polarization gas laser, discussing weak cavity anisotropies 07 p1145 A69-18473

He-Ne laser capillary end contamination with consideration of life lengthening, discussing thermal properties of argon ion laser with pyrolytic graphite 07 p1145 A69-18474

Stabilized frequency single mode ionized argon laser, discussing intensity of electric field in cavity and mode selector 07 p1145 A69-18475

Streaming gas effect on carbon dioxide-nitrogen-helium laser power, discussing gas renewal phenomenon and evacuation rate 07 p1145 A69-18476

Helium-neon laser for optical correction and guide beam techniques 07 p1146 A69-18484

Angular velocity of rotation measurement using angular gas laser undergoing axial torsional vibrations 07 p1147 A69-18523

Helium-neon laser output power dependence on spark-gap cross section geometry, analyzing diffusion equation and population inversion 07 p1147 A69-18541

Output polarization rotation sensitivity to axial magnetic field varied by variable angle quartz flat inside He-Ne laser resonator 07 p1198 A69-18646

Helium-neon laser radiation of given spectral compositions, noting relation between spatial coherence and controlled number of frequencies 07 p1148 A69-18803

Measurement of helium-neon laser radiation divergence emitted in TEM sub nm modes 07 p1148 A69-18804

Saturated absorption by Ne inside 6328 A He-Ne laser, discussing selection of Ne isotopes in gain and loss tubes 07 p1149 A69-18898

Single mode output power from 6328 A He-Ne laser through mode coupling induced by added absorption cell containing excited Ne 07 p1149 A69-18901

Pumping power effect on He-Ne laser amplification factor dependence on temperature and discharge currents 07 p1149 A69-18935

Nonpolarized single frequency gas laser radiation produced by interferential effects in complex resonator 07 p1149 A69-18936

He-Ne and He-Xe laser lines in IR tuned by axial magnetic field, observing Stark patterns of organic molecules [IEEE PAPER C-5] 07 p1150 A69-19050

Cyclotron resonance measurements of quantum effects in Ge valence bands by CW molecular gas laser, developing tunable submillimeter maser [IEEE PAPER C-6] 07 p1150 A69-19051

Pulses from Q switched carbon dioxide laser for studying Q switching techniques [IEEE PAPER G-2] 07 p1150 A69-19054

Competition effects between rotational levels of carbon dioxide rotation-vibration band in traveling and standing wave lasers [IEEE PAPER G-6] 07 p1151 A69-19055

Radiative lifetime for nitrous oxide 001-100 transition, laser level absolute population densities and saturation parameter measured in nitrous oxide-nitrogen-He laser [IEEE PAPER G-10] 07 p1151 A69-19057

Single mode single frequency carbon dioxide laser operating on single rotational-vibrational transition [IEEE PAPER G-11] 07 p1151 A69-19058

He-Ne laser self locking of modes and spectrum weeding out at small absorption [IEEE PAPER G-13] 07 p1151 A69-19059

Population inversion of vibrational levels due to molecular collisions in carbon dioxide lasers, calculating transition probabilities, laser parameters and gain profile [IEEE PAPER G-15] 07 p1151 A69-19061

Continuous wave and pulsed IR signals amplification on carbon dioxide laser amplifiers, discussing design, construction and performance of transmitter [IEEE PAPER J-1] 07 p1152 A69-19064

Time resolved spectrum of high current pulsed argon laser discharge, noting primary laser output and afterglow [IEEE PAPER L-12] 07 p1152 A69-19068

Frequency reproducibility of He-Ne laser, using absorption dependence on frequency in strong field standing wave limit to provide stabilization [IEEE PAPER P-4] 07 p1153 A69-19073

Frequency discrimination characteristics of elliptically polarized dual polarization gas laser, discussing intensity crossover phenomenon and frequency stabilization application [IEEE PAPER P-5] 07 p1153 A69-19074

Single mode carbon dioxide laser Lamb dip and vibration rotation lines absorption coefficients [IEEE PAPER P-6] 07 p1153 A69-19075

Phase locking phenomenon of multitransverse longitudinal modes in He-Ne lasers, discussing mechanism of self locking phenomenon [IEEE PAPER Q-1] 07 p1153 A69-19076

Collision broadened spectral line shape obtained in impact approximation using Anderson formulation compared to output of gas lasers [IEEE PAPER T-6] 07 p1154 A69-19083

Mode power spectra observations for ring and normal He-Ne lasers at 6328 A 07 p1155 A69-19087

Gain enhancement effect of CO on carbon dioxide CW laser performance by accelerating relaxation of bending mode 07 p1155 A69-19088

Gas pressure control in xenon lasers, using variable temperature surface partially insulated from liquid nitrogen coolant 07 p1155 A69-19090

Sealed carbon dioxide lasers life and power outputs with Xe and H additives 07 p1155 A69-19091

Output and beat frequency of carbon dioxide laser with various resonator configurations realizing single mode operation 07 p1156 A69-19157

Iodine fluorescence spectra excited by krypton ion laser, analyzing spectral series and vibrational rotational levels 07 p1156 A69-19304

IR beam profiles of carbon dioxide laser permanently recorded on foamed polystyrene 07 p1156 A69-19305

Optical heterodyning with single mode carbon dioxide laser and triglycine sulfate pyroelectric detector, noting detector sensitivity threshold 07 p1156 A69-19332

Helium-Ne laser beat frequencies between neighboring axial modes shifting linearly with inserted cavity loss 07 p1156 A69-19412

Lamb theory of mode self locking in gas lasers approximated to provide criteria for self locking 07 p1156 A69-19413

Single mode intensity measured for 0.6328 micron He-Ne laser as function of cavity Q, using Lamb semiclassical theory

07 p1157 A69-19414

Proportionality between log-amplitude variance and 7/6 power of wavenumber for horizontal propagation from spherical wave transmitter to point detector

07 p1157 A69-19641

Population inversion mechanism based on electron collisional excitation cross sections for molecular vibrational levels in carbon dioxide lasers

07 p1157 A69-19655

Electron collisional excitation cross sections for upper states in Ar ion lasers

07 p1157 A69-19656

Electron energy distribution measurements in carbon dioxide laser discharges noting similarity of distribution for nitrogen

08 p1323 A69-19801

Carbon dioxide laser excitation by fast proton beams, noting generation power increase

08 p1323 A69-19802

Carbon dioxide laser radiation frequency controlled by varying boron trichloride pressure in cell inserted in resonator

08 p1323 A69-19804

Doped crystal and gas lasers, discussing resonant cavities, axial modes, relaxation oscillation, mode locking and Lamb theory

08 p1323 A69-19869

Flow diagnostics for high enthalpy nonequilibrium gas flows in shock tubes using long pulse ionized Ar gas laser

08 p1323 A69-19879

Li niobate crystal emission excited by Ar laser beam, deriving laser action formulas

08 p1323 A69-19941

Amplification curve change of active substance due to saturation by self field of He-Ar laser, discussing axial operation modes instability

08 p1323 A69-19942

Small signal pulsed gas laser amplification limits, discussing time dependency, temperature effects, relaxation rates and energy transfer

08 p1324 A69-20098

Vacuum UV perturbation spectroscopy compatibility with resonance transitions in Ar ion laser

08 p1324 A69-20161

Flowing CO-Ne He laser with power enhancement and high efficiency, noting role of gases

08 p1324 A69-20163

Gas laser modes strong coupling and single moding induced by saturable absorbing medium within cavity resonator

08 p1324 A69-20166

Collision cross sections between monatomic gas impurities and metastable atoms in He-Ne laser from output curve and impurity partial pressure

08 p1325 A69-20278

Mutual influence of two different laser modes corresponding to two transitions with same ground level, using He-Ne DC laser

08 p1325 A69-20284

Molecular beam gas laser operating at transitions between ground state and resonance excited state of inert gas atom, obtaining population inversion

08 p1325 A69-20325

Natural intensity fluctuations spectrum of He-Ne laser, determining modulation coefficient dependence on output

08 p1325 A69-20431

Gas laser emission natural frequency fluctuations spectral density measured by auxiliary heterodyne laser

08 p1326 A69-20540

Nonlinear optical effects in He-Ne and ruby lasers noting laser gain, frequency splitting, frequency differences in coupled lasers and frequency band narrowing

08 p1327 A69-20768

Eutectic anisotropic InSb-NiSb crystals applied to IR detection, noting sensitivity to carbon dioxide lasers

08 p1373 A69-20866

Helium-neon gas laser as coherent light source for holograms of vaporizing fuel films and by Michelson interferometer

08 p1327 A69-20874

Argon laser frequency spectrum instability caused by competing axial oscillations

08 p1327 A69-21023

Carbon dioxide laser with two gas absorption cells in cavity for emission wavelength control and HF pulsed mode of operation

08 p1327 A69-21088

Gas laser frequency stabilization by coupled oppositely circularly polarized components of single cavity mode in axial magnetic field

08 p1327 A69-21090

Pulse velocity in self locked He-Ne laser, noting air turbulence effects prevention

09 p1514 A69-21347

CW helium-neon laser used to detect and measure vibration frequencies of uniform diffuse surfaces

09 p1515 A69-21430

Relaxation times of carbon dioxide laser levels induced by radiation

09 p1515 A69-21488

Optimal conditions for gas discharge in tubes with hollow cathodes in He-Ne mixture for obtaining lasing at Ne line wavelength

09 p1516 A69-21507

Frequency fluctuations in mode coupled gas laser used to determine natural emission line width

09 p1516 A69-21670

Carbon dioxide-nitrogen-helium laser with RF excitation of discharge plasma, noting high power per unit length

09 p1516 A69-21678

Mode locked He-Ne laser pulses compression by multiple reflections from interferometer after application of linear electro-optic frequency sweep

09 p1516 A69-21745

Gain, output power and radiation directivity of He-Ne traveling wave laser with nonresonant feedback

09 p1517 A69-21796

Gas lasers, discussing amplification, resonance, internal and external mirror lasers, outputs, and He-Ne, carbon dioxide and ion lasers

09 p1517 A69-22121

Laser control of French rocket head guidance system, discussing gyroscopic master, stellar or solar detectors, etc

09 p1518 A69-22162

Laser radiation produced by continuous glow discharge within Al hollow cathode, determining laser power in terms of He-Ne mixture pressures

09 p1519 A69-22245

Heat transfer effect on population inversion time variation in pulsed carbon dioxide laser and molecules excitation rates dependence on gas mixture composition

09 p1519 A69-22289

Distance measurements of several hundred feet to resolution of three millionth of inch by applying He-Ne laser interferometer

09 p1519 A69-22475

Gas laser output increase by nonconstricted discharge in aluminum tube cathode with mirror resonator

09 p1520 A69-22681

Intensity distribution in principal mode of TEM oscillations at various gain amplification levels, plotting intensity distribution generated by argon ion CW laser

09 p1520 A69-22685

Linear dependence of saturation parameter on active medium density of He-Ne laser explained by considering exchange collisions of neon atoms

09 p1521 A69-22687

Carbon dioxide laser upper level rotational relaxation rate constant measurement, observing CW gain

10 p1701 A69-22948

Carbon dioxide laser beam deflection and thermal defocusing due to wind in absorbing medium

10 p1701 A69-22949

Carbon dioxide laser combining gas flow with fluid mixing to achieve high gain

10 p1701 A69-22954

Amplitude fluctuations and line width of traveling wave and standing wave He-Ne laser, considering saturation effects

10 p1701 A69-23135

Far IR radiation from water vapor laser, noting monochromaticity and strong linear polarization

10 p1702 A69-23160

Ceramic substrate cutting with carbon dioxide laser by scribing perforation pattern,

10 p1699 A69-23302

Noble gas additives for triggering stability of pulsed argon ion lasers, discussing repetition rate and power loss

10 p1702 A69-23341

IR He-Ne laser frequency response determined with inherently swept frequency modulator based on rotating corner reflector

10 p1702 A69-23347

Excitation of ultrathin Cd/SeS/ platelets with mode locked He-Ne laser for excitons formation, discussing time delay

10 p1703 A69-23512

Q switching combined with pulsed pumping of carbon dioxide laser for observing optimal Q switching instant, noting pulse energy increase

10 p1703 A69-23619

Gas laser with nonlinear absorbing cell in resonator, discussing effective gain dependence on squared field amplitude, hysteresis phenomena and output power

10 p1704 A69-23625

Low voltage He-Ne laser, noting outputs for various pressures and grid anode separations

10 p1704 A69-23652

Quantum phase noise in He-Ne laser, considering amplitude fluctuation, spontaneous emission and oscillator linewidth

10 p1704 A69-23669

Simultaneous action of RF perturbation between Zeeman sublevels of atomic transition sustaining gas laser oscillations, discussing single pi mode laser operation

10 p1704 A69-23808

Mode interactions in argon lasers between two spectral lines noting effect on output

10 p1705 A69-24003

Sulfur dioxide-helium laser pulsed and CW submillimeter outputs

10 p1706 A69-24005

Far IR lasing lines in hydrogen sulfide, sulfur dioxide and OCS, discussing output

10 p1706 A69-24008

Electron concentration and temperature dependence on gas temperature as factor determining He-Ne laser output at 6328 A

10 p1706 A69-24078

Single mode generation and Lamb dip in argon ion gas laser obtained by thin quartz plate inserted near plane mirror of resonator

10 p1706 A69-24080

Vibrational energy transfer computed for processes in carbon dioxide-nitrogen laser based on vibrational relaxation data

10 p1706 A69-24083

High speed photodetector frequency characteristics using multimode gas laser and Kerr cell

10 p1707 A69-24211

Pulsed molecular nitrogen laser positive UV and IR systems interaction under varying gas pressure, applied voltage and tube diameters

11 p1893 A69-24346

He-Ne laser light coherence distortion by atmospheric turbulence

11 p1894 A69-24452

Q switched carbon dioxide laser power increased by placing bleachable /boron tetrachloride/ filter in resonator

11 p1894 A69-24454

Conventional interferometry advances due to gas laser development, discussing basic concepts and methods of interferometers

11 p1881 A69-24599

He-Ne laser radiation frequency spectrum as function of transverse magnetic field determined by photoheterodyne method

11 p1894 A69-24622

Amplification factor of He-Ne traveling wave light amplifier, discussing frequency stability and telescopic wave front broadening for uniform radiation distribution

11 p1894 A69-24623

Molecular carbon dioxide laser radiation emission in tube containing low pressure atmospheric air, using C cathode and Al cold cathode

11 p1895 A69-24625

Perturbation theory applied to emitting density matrix in nonlinear polarization of resonance media, considering gas laser in coaxial magnetic field

11 p1895 A69-24630

Multicolor hologram recording and reconstruction gas lasers, discussing control of ghosts in three dimensional image

11 p1882 A69-24679

Gas lasers coherence properties and availability for holography, discussing continuous power output of He-Ne, Ar and Kr ion lasers

11 p1895 A69-24680

Single frequency Ar ion laser for deep field holography noting thermal compensation, servo stabilization, operating mode, high power and high coherence

11 p1895 A69-24689

Gas laser materials, fabrication and performance, analyzing gas cleanliness, cathode degradation, bore erosion and optical surface contamination effects
11 p1896 A69-24743

Low order transverse modes in Ar ion lasers, analyzing beam divergence, output, mirror alignment and cavity configurations
11 p1896 A69-24841

Turbulence induced depolarization of linearly polarized He-Ne laser beam at 6328 Å traversing atmosphere near ground level
11 p1896 A69-24842

Calorimeter for IR carbon-dioxide laser output power measurement, noting range calibration and accuracy
11 p1885 A69-24903

Coherence phenomena for gas laser transitions coupled by common level, noting coherent superposition
11 p1898 A69-25045

Gas laser transitions and power broadening, analyzing saturation and gain profiles of He-Ne laser by light probe
11 p1898 A69-25046

He-Ne laser output phase fluctuations between adjacent modes during unlocked and self locked condition, noting cavity optical length short term fluctuations influence
11 p1898 A69-25048

High power CW carbon dioxide laser saturation and discharge conditions analyzed by rate equation
11 p1898 A69-25050

Far IR CW gas laser design for maximum output, discussing pulsed operation, wavelength measurement and radiation detection
11 p1898 A69-25051

Carbon dioxide laser for production of high peak power pulse, discussing mw peak power design and oscillation problem in high gain amplifiers
11 p1899 A69-25053

Carbon dioxide-N-He laser amplifier, noting gain time dependence and thermal relaxation rate after gas heating
11 p1899 A69-25054

Gain decrease due to saturation during amplification of pulses from Q switched carbon dioxide laser oscillator, noting rotational sublevels relaxation rate
11 p1899 A69-25055

Ar plasma diagnostics in pinch-discharge laser, determining electron temperature by spectroscopy and measuring plasma conductivity and ion concentration and temperature
11 p1933 A69-25548

Frequency stabilization of He-Ne laser, using external Ne absorption tube in variable magnetic field as frequency standard
11 p1900 A69-25678

Intensity fluctuations of single frequency gas laser at 3.39 microns, discussing fluctuation minimization methods
11 p1900 A69-25750

Two transverse modes locking with multiple longitudinal modes in He-Ne laser, noting separate locking and alternate quenching
12 p2104 A69-25923

Resonant vibrational energy transfer between specific mode of carbon dioxide and N molecules at high temperatures, monitoring IR emission
12 p2131 A69-25984

Pulsed laser emission from carbon dioxide collisionally pumped by vibrationally excited DF produced by reacting fluorine oxide with deuterium
12 p2104 A69-25986

Power output of He-Ne laser as function of transverse magnetic field strength
12 p2104 A69-26023

Absorption characteristics of thin metallic films in standing light wave for mode selection and conversion in lasers
12 p2104 A69-26024

Reabsorption effect of emitted quantum on lifetime of excited levels in gas laser, determining capture factor
12 p2104 A69-26028

Frequency stability of He-Ne laser with nonresonant feedback, noting spectral line width dependence on number of interacting modes
12 p2105 A69-26049

Carbon dioxide rotational constants from CW beat measurement in bulk GaAs mixer between carbon dioxide vibrational-rotational laser lines
12 p2105 A69-26311

Spontaneous emission of carbon dioxide lasers, studying emission in Second Positive System of nitrogen as function of discharge current and laser output power
12 p2105 A69-26316

Disaligning and velocity changing collisions influence on laser light induced saturation peaks or holes in velocity distribution of Ne atoms
12 p2105 A69-26317

Single mode laser oscillations buildup for 0.633 micron transition of He-Ne laser at levels above threshold using fast intracavity chopper
12 p2105 A69-26318

Temperatures and densities of atoms and electrons from spectroscopic methods in gas discharge plasma used for CW ion-argon lasers, evaluating inversion mechanism
12 p2106 A69-26319

Nonlinear crystal generated second harmonic power measured for multimode He-Ne 0.63 micron self locked laser
12 p2106 A69-26321

Water vapor laser, discussing water vapor molecular structure, population inversion mechanism, perturbation model, etc
12 p2106 A69-26325

Argon ion laser with water cooled mercury pool cathode shielded by U-bent section trap, considering advantages as compared to oxide cathodes
12 p2107 A69-26326

Focusing power of hyperbolic gas lens for light beam waveguides, noting temperature distribution measurements and pole separation
12 p2107 A69-26392

Precision optical systems tests, using two beam interferometer and CW gas laser to examine reflected or transmitted wavefront contours
12 p2092 A69-26421

Carbon dioxide dissociation in carbon dioxide laser gas discharge plasma for various flow rates, pressures, discharge current densities and tube diameters
12 p2107 A69-26540

Contrast interference patterns obtained in Michelson interferometer at various path differences, using He-Ne laser as light source
12 p2108 A69-26593

Phase pulsations between normal frequencies and combination tones in CW gas laser output, analyzing observations by scanning interferometer
12 p2108 A69-26635

Population densities, pumping rates, lifetimes, etc, of singly ionized krypton ion laser
12 p2109 A69-26638

Single frequency sealed off carbon dioxide amplifier, giving saturated gain
12 p2109 A69-26640

Incandescent cathode temperature effect on He-Ne laser output, ascertaining mixture parameters, cathode voltage and power dependence on discharge current
12 p2109 A69-26716

Laser Doppler particle sensor to measure velocities in rocket exhausts, using He-Ne laser light source and Fabry-Perot interferometer frequency filter [AIAA PAPER 68-723]
12 p2094 A69-26783

Gas lasers, including stimulated emission in monochromatic field of traveling and standing plane waves, spontaneous emission with stimulated transitions, etc
12 p2109 A69-26906

Carbon dioxide laser as light source in Michelson interferometer for plasma electron density measurement
12 p2100 A69-27177

Anomalous interaction of argon and krypton ion laser lines, considering connecting radiative transitions and cross modulation
13 p2270 A69-27204

Temporal correlations in light field from laser at threshold of oscillation, measuring He-Ne CW gas laser by photoelectron count
13 p2271 A69-27399

Vertical refraction effect on gas laser beam propagation near earth surface under various meteorological conditions, comparing index for diffuse light
13 p2220 A69-27827

Anemometer based on neon helium ring laser with four mirror resonator
13 p2260 A69-27857

Gallium arsenide diode nonequilibrium carriers absorption of He-Ne laser radiation under emission conditions
13 p2272 A69-27893

He-Ne laser transition line shape and gain curve through width, considering spectral frequency characteristics, output power and gas temperature and concentration
13 p2272 A69-28115

Gas ring lasers, discussing optimal parameters, colliding waves interference, nonmutual effect and radiation polarization
13 p2272 A69-28175

Electrooptical ADP modulator design for use with helium-neon laser, considering temperature stability and crystal faces parallelism
13 p2272 A69-28191

Gas laser modulation steady state characteristics with KDP crystal in cavity, noting output power dependence on applied electric field
13 p2273 A69-28432

Laser based on carbon dioxide molecules formed chemically in electrical discharge studied for designing special carbon electrode laser
13 p2274 A69-28585

Passive Q switching of carbon dioxide laser with mixture of sulfur hexafluoride and chlorotrifluoro-ethylene gases within resonator
13 p2274 A69-28659

Gases optical pumping by self radiation laser action, discussing high intensity oscillatory transitional wide bands of molecular gases
14 p2456 A69-28755

Interatomic collisions effect on multimode He-Ne lasers output power and spectral composition
14 p2456 A69-28756

Oscillation mode selection in gas lasers by thin film absorber in resonator, using standing wave electric fields periodicity
14 p2456 A69-28757

Carbon dioxide band vibration-rotation transitions saturation characteristics, stressing role of collisions in molecular gas lasers
14 p2457 A69-28928

Frequency shifts of Lamb dip minimum in helium-neon laser, considering effects of discharge tube parameters and gas pressure
14 p2457 A69-28929

Polarization dependent gain saturation and nonlinearity induced anisotropy in He-Ne laser amplifier
14 p2457 A69-28931

Gas laser design utilizing internal window mirrors deposited with dielectric coating outside resonator
14 p2457 A69-29160

He-Ne laser traveling wave output power, obtaining end mirror reflection coefficient optimal value
14 p2458 A69-29165

Elastic collision effect on gas laser atoms velocity distribution and gain factor determined for strong collision model
14 p2459 A69-29388

He-Ne lasers operation at 6328 Å, discussing optimum design parameters for power, life and stability
14 p2459 A69-29429

Linear polarization achieved in He-Ne laser by applying external transverse magnetic field to plasma discharge
14 p2459 A69-29569

Continuous IR parametric signal amplification in saturable absorber caused by carbon dioxide laser pumping
14 p2459 A69-29601

Nonlinear interactions of linearly polarized carbon dioxide laser signals in sulfur hexafluoride measured as function of angle between polarization planes
14 p2460 A69-29602

Electron energy distribution functions and energy transfer rates to inelastic levels of carbon dioxide and nitrogen in laser
14 p2460 A69-29603

Log amplitude variance calculation methods compared in statistics of optical scintillation by application to measurements with laser
14 p2486 A69-29642

Three level He-Ne laser, showing nonlinear interference effects on gain line shape and use in magnetic field and frequency stabilization
14 p2460 A69-29671

Laser with molecular H and Cl mixture at HCl vibrational transitions
14 p2461 A69-29672

Fabry-Perot interferometer employing gas laser for plasmodic electron concentrations measurement at 3.39 micron wavelength
14 p2451 A69-29778

Undulation in output waveforms of pulsed water vapor laser observed with In-doped Ge detector
14 p2461 A69-29887

High resolution silver halide photoemulsions analyzed by holographic resolvometry using He-Ne laser to obtain interference patterns
15 p2606 A69-30052

Gas lasers output power calculation based on operating transition with mixed contour due to natural and Doppler broadenings
15 p2633 A69-30079

Gas laser secondary modes emission and beat frequency spectrum widths, using results of Lamb lasers theory

15 p2633 A69-30121

Polarization and angular distribution of 6328 Å He-Ne laser light scattered by latex-sphere hydrosols, comparing coherent and incoherent scattering patterns

15 p2595 A69-30223

Nonadjustable Fabry-Perot scanning interferometer for gas laser spectra analysis, using barium titanate piezoceramic elements

15 p2608 A69-30246

Laser holography using colored KBr crystals subjected to hard gamma radiation as photosensitive material

15 p2608 A69-30247

Interferometric technique for studying fracture specimens plastic zone using laser holography

15 p2609 A69-30681

Solid state and gas lasers operational parameters tabulation including pulse durations, powers, energy flux densities, electric and magnetic field strengths, etc

15 p2633 A69-30708

Hydrogen laser operation time reduction attributed to hydrocarbon formation on inner surface of storage flask, promoting atomic hydrogen recombination

15 p2634 A69-30942

Statistical characteristics of Q switched He-Ne laser emission gain fluctuations during transient process from subthreshold to superthreshold value

15 p2634 A69-30960

Optimal parameters of cuvette for use with helium-neon laser as excitation source to record combination light scattering spectra of powdery materials

15 p2635 A69-31105

Mode competition of 5861 and 6470 Å lines in ionized Kr laser attributed to electronic level excitation processes

15 p2635 A69-31106

Frequency selector for gas laser, considering monochromatic emission and multimode oscillation

16 p2795 A69-31608

Gas laser application to magnetospectroscopy of graphite, Bi, As and pyrolytic graphite single crystals

16 p2796 A69-31822

Ruby and gas lasers operation principles, discussing spatial coherence, frequency stability, energy conservation and concentration, Q spoiling, resonators, etc

16 p2797 A69-32377

Colliding waves synchronization and stability in angular gas laser by electronic simulation

16 p2798 A69-32502

Rb 87 vapor laser short term frequency stability independent of vapor concentration, noting use as frequency standard

16 p2798 A69-32513

Cavity linear phase anisotropy and axial magnetic field effect on single mode Zeeman gas laser

16 p2798 A69-32606

HCN laser line width measurement with high resolution spectrum analyzer indicating spectral widths caused by mechanical instability

17 p2979 A69-32850

Multiple mode phase locking of He-Ne laser with fixed cavity length and laser tube fixed position in cavity, generating high speed optical pulses

17 p2980 A69-32957

Mode patterns and far field distribution for gas lasers operated in lowest order Gaussian transverse mode

17 p2981 A69-33090

FM detecting resolution using free running multimode uniphase Ar laser with Doppler broadened bandwidth

17 p2981 A69-33091

Broadband intracavity SHF modulation of He-Ne laser emission in 10 cm band, showing agreement with calculations

17 p2981 A69-33112

Spontaneous gas laser emission from level coupled by spontaneous transition with emitting level, obtaining atoms interaction with laser field velocity distribution and spectral line width

17 p2981 A69-33116

Molecular beam gas laser operating at transitions between ground state and resonance excited state of inert gas atom, obtaining population inversion

17 p2981 A69-33315

He-Ne laser plasma behavior, establishing parameters for electron gas, cross sections of formation and annihilation and excited states lifetimes

17 p2982 A69-33390

Single frequency lasers using thin metal film mode selection filters, discussing film properties and experiments with Ar ion and Nd-YAG lasers

17 p2982 A69-33399

Long path difference vacuum Michelson interferometer application to far IR and IR laser wavelength measurements compared with 6328 Å He-Ne wavelength

17 p3006 A69-33405

Wave interaction in gas ring laser, delineating single mode emission zones as function of pumping, emission frequency position and Q factor differences

17 p2982 A69-33632

Laser action and spontaneous emission at atomic oxygen transition, discussing pulsed emission mode in argon-oxygen laser

17 p2982 A69-33633

Rb 87 vapor laser output power dependence on magnetic field strength and resonator detuning, discussing laser and atomic transition frequency tuning

17 p2983 A69-33694

Gas laser power dip in presence of elastic collisions, using equilibrium equations for particles velocity distribution function

17 p2983 A69-33972

Reliability block diagrams for laser systems, discussing failure modes of solid state, semiconductor and gas lasers

18 p3151 A69-34523

Submillimeter water vapor laser power output for admixtures of H₂, N₂, carbon dioxide, methane, He and Ar, noting buffer effect of H₂

18 p3152 A69-34717

He/Ne ratio effect on performance of He-Ne laser in annular cavity

18 p3152 A69-34718

Statistical model for coherent functions obtained from laser equation, showing amplitude and frequency coupling of radiation fluctuations

18 p3152 A69-34820

High electron density in transient mercury vapor plasma determined using He-Ne laser interferometer measurements

18 p3153 A69-35307

Gas and solid state lasers optical resonance and radiation generation, frequency properties, frequency shift, spectra and Zeeman effect

18 p3154 A69-35408

He-Ne laser light noises due to discharge current fluctuations and random mode beat

19 p3330 A69-35760

Mode coupling effects in CW gas ring lasers, considering excitation density pulsations, traveling waves dispersion, polarization, etc

19 p3334 A69-36046

Lamb theory of Doppler broadened gas laser extended to arbitrary intensities for single mode operation, calculating detuning curves and inversion densities

19 p3335 A69-36048

Coherent radiation generation using gas lasers, analyzing interaction between EM radiation and matter

19 p3335 A69-36067

Internal modulation of HeNe laser in asynchronous regime, evaluating range and efficiency with regard to external modulation

19 p3335 A69-36341

Rb 87 vapor laser pumping, output, spectral line width and emission frequency approximated in three level system

19 p3335 A69-36342

Rb 87 vapor laser output power and spectral line width dependence on optical pumping intensity and atom density in resonator

19 p3336 A69-36343

Light induced shift of Rb 87 vapor laser emission frequency during modulated optical pumping, discussing elimination by filter temperature and tuning

19 p3336 A69-36344

Water vapor laser submillimeter emission spectra, considering rotational and vibrational lasing transitions due to electron impact and molecular interactions

19 p3336 A69-36349

Gas laser oscillation mode selection and self synchronization based on separation in two mirror cavity with nonlinear absorption

19 p3336 A69-36350

Continuous explosion laser study of stationary detonation waves to determine conditions leading to partial population inversion and critical population density

19 p3336 A69-36360

He-Ne laser discharges noise and oscillations classified, investigating interaction between intrinsic oscillations

19 p3338 A69-36605

Inductively coupled RF excited toroidal Ar ion laser, confining current discharge by strong axial magnetic field to reduce wall losses

19 p3338 A69-36690

HCN laser line gain measurements during continuous excitation as function of current and pressure for acetonitrile and water mixtures

19 p3339 A69-36695

Central tuning dip on rotation-vibration transitions of nitrous oxide and carbon dioxide laser with nitrogen, noting frequency discriminator generation

19 p3339 A69-36698

He-Ne laser communication feasibility experiments, discussing modulation, detection, operating parameters, etc

19 p3279 A69-36756

He-Ne laser subnanosecond intracavity coupler consisting of coaxial krytron pulse generator and electrooptic modulator

19 p3339 A69-36823

Spectrum measurement of He-Ne laser by Fabry-Perot interferometer, determining mirrors flatness

20 p3536 A69-36945

AM phase locked states switching behavior of PM He-Ne lasers, considering isotope mixtures effect

20 p3552 A69-36994

Gas mixtures CW gain characteristics at 337 mμ as function of pressure, current, mixture and flow rate, considering HCN laser systems

20 p3552 A69-36995

He-Ne laser temperature condition optimization based on calculation and experiment

20 p3553 A69-37356

He-Ne laser output intensity saturations in presence of axial magnetic field, noting moving and fixed minima

20 p3553 A69-37433

Backscattering intensity measurements by optical elements at 180 degrees to beam propagation direction, using CW He-Ne laser as radiation source

20 p3554 A69-37609

Threshold power, gain, output power and radiation energy during optical pumping of Q switched molecular laser by black body radiation

20 p3554 A69-37722

Single mode He-Ne laser frequency stabilization by Zeeman effect

20 p3554 A69-37729

He-Ne laser emission tuning with thin absorbing metallic film situated near reflecting mirror

20 p3555 A69-37730

Thermodynamic approach to calculation of molecular lasers, determining various population levels of carbon dioxide molecule by measuring amplification factors for rotational vibrational transitions

20 p3555 A69-37948

Electro-optical effect in Cr-doped GaAs single crystals at room temperature, discussing carbon dioxide laser radiation modulation by GaAs

20 p3555 A69-37949

Alternated magnetic field effects on lasing in ionized Ar

20 p3555 A69-37950

Carbon dioxide laser pulsed mode for generating giant pulses, noting applications and electron impact role

20 p3555 A69-38004

He-Ne laser oscillation frequency shifts with variations in DC discharge ascribed to changes in populations of He and Ne levels

20 p3556 A69-38124

Afterglow decay rates of Zn II laser lines in spontaneous emission measured, indicating thermal energy charge exchange excitation and CW oscillation

21 p3735 A69-38598

Helium-neon laser output power dependence on spark-gap cross section geometry, analyzing diffusion equation and population inversion

21 p3735 A69-38693

Helium-neon laser radiation of given spectral compositions, noting relation between spatial coherence and controlled number of frequencies

21 p3736 A69-38948

Measurement of helium-neon laser radiation divergence emitted in TEM sub nm modes

21 p3736 A69-38949

Frequency stabilization in He-Ne three mode laser by stabilizing LF oscillations via automatic adjustment of laser resonator length

21 p3738 A69-39078

Automatic frequency control circuit for stabilizing beat emissions of coupled multifrequency gas lasers

21 p3738 A69-39079

He-Ne laser emission attenuation coefficient relation to water content of artificial fogs for 0.63, 1.15 and 3.39 microns

21 p3738 A69-39118

Molecular hydrogen, oxygen and deuterium additions effect on CW laser operation with ordinary and heavy water as active medium
21 p3738 A69-39131

Multimode He-Ne laser radiation polarization modulation as function of magnetic field, cavity anisotropy and frequency, using Macaluso-Corbino effect
21 p3739 A69-39447

Annular gas laser cavity designs with additional mirrors for longitudinal oscillation mode selection, noting positive results for He-Ne laser
21 p3740 A69-39553

Peak power ranges of Q switched CO-air-He molecular laser, noting recovery time and CO vibrational temperature
21 p3742 A69-39742

Power density and time history of pulsed molecular nitrogen laser, discussing dependence on fill pressure and electric circuit parameters
21 p3742 A69-39779

Output power of CW lasers employing HCN and water vapor active medium
22 p3959 A69-39958

Spatial coherence of He-Ne laser beam studied in Young interference experiment, noting multimode light percentage attributed to weak transverse modes
22 p3960 A69-40018

Strain measurement by interferometer with gas laser source emphasizing long period measurement problem
22 p3960 A69-40189

Gas lasers development and industrial applications, discussing output power, operation modes, etc
22 p3961 A69-40242

Cavity Q dependence of intensity of single mode He-Ne laser above threshold for quantum and semiclassical theories
22 p3961 A69-40415

Single mode high power He-Ne laser with Michelson interferometer in cavity, describing performance determination method
22 p3962 A69-40473

Frequency locking of HCN laser transition at 890 GHz to harmonic of crystal controlled oscillator
22 p3963 A69-40567

Axial mode frequencies, loss coefficients and optimal parameters of three and four mirror resonators of gas lasers, including designs with maximum selectivity
22 p3964 A69-40796

Spatial coherence of He-Ne laser radiation diffused by turbid medium calculated by using diffraction and interference measurements
22 p3964 A69-40798

Pulsed Hg ion-He laser operation, revealing transition in near IR
23 p4171 A69-41393

Electron emitters tested for gas laser operations, discussing nonreactive and reactive gases cases, matrix structures containing BaSrO and barium zirconate cathodes
23 p4172 A69-41394

He-Ne laser heterodyne system for measuring dispersion at 6328 and 6401 Å due to Ne metastable atoms in gas discharge
23 p4172 A69-41397

Xenon laser CW operation on unclassified spectral lines of high ionization states, using laser induced spectroscopy
23 p4172 A69-41399

Far IR gas laser with linearly polarized radiation output obtained by using echelette reflection grating in place of end mirror
23 p4172 A69-41400

Sweep tuning gas laser and output power vs frequency characteristics, demonstrating tuning ability within entire Doppler bandwidth
23 p4174 A69-41635

Absorption coefficient measurement for hydrocarbon gases for He-Ne laser beam at 3.39 microns, tabulating coefficients, noting variations from spectroscopic data
23 p4174 A69-42192

Portable He-Ne laser design featuring positional adjustment for use in aligning optical systems
24 p4327 A69-42924

Amplified radiation of laser used for coherent optical pumping in two level low pressure gas laser
24 p4327 A69-43067

Emission spectrum of nonself locked He-Ne ring laser, deriving phase relations for LF intermode oscillations
24 p4328 A69-43159

Polarization characteristics of He-Ne ring laser emission with circularly anisotropic resonator, analyzing ellipticity as function of half wave cavity plate
24 p4328 A69-43160

Transitions competition in He-Ne laser pulse operating in single mode with nonuniform gain saturation
24 p4328 A69-43165

Angular distribution of He-Ne laser beam scattered by artificial fog from data by light detection devices at various angles
24 p4328 A69-43503

Tilted etalons to obtain tunable single mode emission from gas lasers noting fabrication simplicity, vibration insensitivity and low insertion loss resulting in high efficiency
24 p4329 A69-43752

GAS LIQUEFACTION U CONDENSING

GAS-LIQUID INTERACTIONS

Time dependent interaction of hot gas bubble with chemically reactive liquid stream, detailing thermal boundary layer theory
01 p0058 A69-10162

Fuel films ignition behind shock waves in air and oxygen
02 p0353 A69-12317

Low temperature simulation of hypersonic melting ablation and wave patterns of gas-liquid interface
06 p0907 A69-18064

Acoustic holographic measurement of surface deformation generated by sound waves impinging on gas-liquid interface, discussing acoustic amplitude components
10 p1695 A69-23542

Hydrogen peroxide electrode cathodic polarization studied for liquid oxidant use in methanol fuel cells
11 p1825 A69-24523

Gas-liquid critical flows, considering compressibility, rate of momentum, mass and heat transfer, etc
13 p2376 A69-28144

Quantitative analysis of interaction between spray and ambient atmosphere, discussing atomization of flat sheet and drop behavior relationship to operating conditions
15 p2717 A69-30465

Turbulent viscoseals gas ingestion and fluid inertia analysis using stability of dynamic gas-liquid interface between rotating cylinders
[ASLE FICFS PREPRINT 31]
15 p2621 A69-30496

Two phase flow mixing shocks, obtaining expressions for pressure and entropy changes, discussing shock stability and gas entrapment mechanism
16 p2768 A69-31589

Two phase detonations of fuel in liquid layer on shock tube wall with gaseous oxidizer, presenting one dimensional approximation for film detonation propagation
16 p2879 A69-32151

Undissolved air effects on working fluids elastodynamics in aircraft hydraulic actuators
24 p4255 A69-43076

Turbulence and laminarity effect on vertical waves development rising in thin layer of heavy viscous fluid in contact with vertical gas flow
24 p4302 A69-43480

GAS LUBRICANTS

Self acting gas lubricated bearings design procedures and comparison with oil lubricated bearings
[ASME PAPER 68-LUBS-10]
13 p2265 A69-27267

Herringbone grooved gas lubricated journal bearing static and dynamic characteristics analyzed approximately, noting pressure distribution and vibration amplitudes
[ASME PAPER 68-LUBS-7]
13 p2265 A69-27269

Gas molecular mean free path effect on performance of spiral grooved thrust bearing, discussing slip flow factor and He Knudsen number
[ASME PAPER 68-LUBS-17]
13 p2266 A69-27273

Lubricant compressibility effect on spiral groove gas bearing load carrying capacity
[ASME PAPER 68-LUBS-33]
13 p2266 A69-27274

Design optimization for gas lubricated spiral grooved spool bearing based on narrow groove theory, analyzing static and dynamic characteristics for motion in axial direction
[ASME PAPER 68-LUBS-12]
13 p2266 A69-27276

Externally pressurized gas lubricated journal and thrust bearings designs, citing reference literature
[ASME PAPER 68-LUBS-8]
13 p2267 A69-27282

Heat transfer between surfaces as secondary effect in gas bearing lubrication from analysis taking into account viscosity variation with temperature
[ASME PAPER 68-LUBS-4]
13 p2267 A69-27282

13 p2267 A69-27286
Infinitely long journal bearing using ionized gas lubricant with magnetic field applied axially and electric field applied transversely to fluid film
[ASME PAPER 68-LUBS-30]

13 p2267 A69-27287
Magnetic and electric fields influence on gas lubrication of bearings
[ASME PAPER 68-LUBS-26]

13 p2267 A69-27288
Electromagnetic field pumping effects in electrically conductive gas lubricants, producing gas film between surfaces without external pressurization
15 p2629 A69-31003

Mach numbers effect on pressure distribution and friction moment in nonisothermal layer of gas lubricant, using power series
15 p2629 A69-31021

Analytical method for designing pressure circular bearings verified by experiments concerning loading capacity
16 p2792 A69-31560

High speed rotors with air lubricated foil bearings, studying motion in pressurized and self acting modes
22 p3955 A69-40405

GAS MASERS

Hydrogen maser oscillations with external gain, noting frequency stability
04 p0611 A69-14443

Two cavity large storage box atomic hydrogen maser, obtaining self excited oscillations coupled with high gain amplifier
[IEEE PAPER C-8]
05 p0774 A69-16310

Molecular interactions in ammonia maser beam, discussing influence on oscillation extinction beyond given flow rate
07 p1145 A69-18478

Plasma electron density and collision frequency determination, using CW maser interferometer
08 p1359 A69-19987

Upper and lower frequency stability bounds using hydrogen masers, studying signal power and relaxation rate as function of resonator effective field
08 p1327 A69-20715

Transition probabilities in repetitively Q modulated HCN maser radiation dependent on gas discharge current
09 p1516 A69-21626

Steady state operation of atomic hydrogen maser by analogy with electronic circuits, calculating atomic magnetic susceptibility using density matrix and deriving equivalent circuits
09 p1517 A69-22093

Double focalization in atomic hydrogen maser by hexapolar magnets selecting hyperfine energy transitions
12 p2105 A69-26050

Atomic beam for H maser operation prepared by using nonadiabatically changing magnetic field in transition region
15 p2635 A69-31103

Water vapor absorption at submillimeter wavelengths in atmospheric window regions related to foreign gas pressure, using HCN maser
18 p3152 A69-35241

Transient oscillations in ammonia maser oscillator observation based on switching achieved by signal injection into cavity at molecular resonance frequency
19 p3339 A69-36825

Protostar chemical processes responsibility for population inversion and properties in OH and water masers
22 p4018 A69-40267

Short term frequency fluctuations of CW HCN masers reduced to 10 kHz by improving plasma stability
24 p4327 A69-42614

GAS-METAL INTERACTIONS

Gas content and impurities in aluminum melts, analyzing oxides and hydrogen interactions
01 p0098 A69-10958

Refractory metals interactions with gases in vacuum and inert gas environment, noting temperature and pressure effects on reactions, extent and kinetics
01 p0099 A69-11042

Centrifugal force field influence on heat exchange between gas and blade cascade studied with noncooled blades at low temperatures
03 p0531 A69-12959

Interaction of gas atoms with solid surface, giving mathematical model assumptions
04 p0632 A69-15008

Nickel structure alterations during interaction with high speed air flow at elevated temperatures
05 p0783 A69-16812

- Dissociation of hydrogen on tantalum using modulated molecular beam mass spectrometry
06 p0960 A69-17107
- Static adhesion of metals in hot oxidizing gas environment, considering dry lubrication to prevent adhesion
[IME PAPER 4] 07 p1139 A69-18567
- Interaction of nitrogen oxides and carbon dioxide on nickel crystal surface using low energy electron diffraction and mass spectrometer, discussing work function
08 p1268 A69-20138
- Gas adsorption of molecular oxygen and hydrogen on molybdenum surface using collector section of field emission retarding potential analyzer
08 p1268 A69-20179
- Hydrogen solubility in solid and liquid phases of nickel-molybdenum and nickel-tungsten alloys at high temperatures
08 p1333 A69-20448
- Refractory metals testing at high temperatures in vacuum, discussing equipment modifications, temperature measurement and residual gas problems
10 p1714 A69-23848
- Desorption kinetics of atomic and oxide phases, analyzing composition of surface film formed from W and Mo single crystals interaction with oxygen
12 p2026 A69-26115
- Adsorption of N, H, O and CO on thick vapor deposited Be films at room temperature
13 p2322 A69-28017
- CO adsorption on tungsten, determining work function changes and Fowler-Nordheim preexponentials on field emitter single crystal faces
14 p2409 A69-29093
- Inert gas diffusion of Xe 133 in aluminum and titanium at various temperature ranges, showing effects of recrystallization, plastic deformation and phase transformations
16 p2800 A69-31775
- Laser ignited Zr droplet free fall combustion in oxygen, analyzing metal conservation and luminosity correlation assuming reflux action from fog layer
[WSCI PAPER 69-1] 16 p2830 A69-32342
- Interaction between two phase dynamical and combustion parameters in one dimensional gas-metal combustion system
[AIAA PAPER 69-540] 16 p2880 A69-32742
- Oxygen adsorption on Mo single crystals /100/ surface as function of temperature using low energy electron diffraction
16 p2748 A69-32795
- Secondary electron emission from gas covered metal surfaces, discussing results of neutral beam investigations
17 p3008 A69-33000
- Tunnel junctions with low background currents made by reacting active gas layer adsorbed on Nb film surface with Pb upper film to form barrier
17 p3016 A69-33788
- Gas-surface energy transfer experiment on OGO-F satellite, measuring upper atmosphere kinetic energy flux to determine accommodation and drag coefficients, density, etc
19 p3255 A69-36680
- Elemental fluorine reactions with Ni, Cu, Fe, Ti, Be, Al, Zr and Ag, giving reaction rate constants, activation energies, etc
21 p3670 A69-39706
- Nb-gaseous Nb chlorides equilibrium from transpiration measurements at 800-1400 C, confirming importance of Nb pentachloride, Nb tetrachloride and Nb trichloride
23 p4112 A69-41339
- Desorption of hydrogen and methane from Al, Mg and Mb under room temperature tensile deformation in ultrahigh vacuum
23 p4176 A69-41541
- GAS MIXTURES**
NT DETONABLE GAS MIXTURES
- Diffusional, thermal diffusional and thermal fluxes in multicomponent flames, discussing flame structure and reaction kinetics
01 p0175 A69-10144
- Heat and mass transfer coefficients derived for reacting gas mixtures by applying variational principle
01 p0006 A69-10400
- Sulfur trioxide production in photolysis of sulfur dioxide at 1849 angstroms, noting oxygen addition effect on quantum yield
01 p0024 A69-10619
- Intermolecular collision induced vibration to vibration energy transfer in nitrous oxide in various gas mixtures, measuring fluorescence and relaxation rates
01 p0123 A69-10684
- Multiple velocity dispersion in normal hydrogen and normal hydrogen-helium mixtures at room temperature using ultrasonic interferometer
01 p0121 A69-11284
- Mass velocity of detonation products of hydrogen-oxygen mixtures measured by simultaneously recording internal resistance and induced voltage in ionized medium
02 p0354 A69-12628
- Optimum proportions of gas mixture components in He-Ne laser related to field distribution in cavity
03 p0441 A69-13847
- Monograph on exhaust gases mixing with cold airstream in ducted fanjet engine, noting thrust and efficiency increase
03 p0496 A69-14048
- Scattering data for optical diagnostic measurements on two component suspensions or gases, using random distributions of spheres
04 p0555 A69-14282
- Thermal diffusion coefficient and composition of gas mixtures by measuring gas flow rate in capillary tube as function of viscosity
04 p0688 A69-15410
- Moment equations for general gas mixture from Boltzmann-like equations, evaluating collision integrals
04 p0633 A69-15436
- Thermistor assembly apparatus for measuring coefficient of thermal conductivity of pure and binary mixture of gases
05 p0845 A69-15616
- Laminar flow of isotropic binary gas mixture in circular cylindrical tube with porous walls, determining concentration field variation with wall suction Reynolds number
05 p0744 A69-15618
- Viscosity of compressed nonreacting gas mixtures at high temperatures, discussing conditions for accurate calculation
05 p0845 A69-15895
- Uranium hexafluoride-hydrogen hydrogen fluoride chemical laser, discussing conditions for negligible collisional deactivation and defined rotational temperature determination
05 p0771 A69-15906
- Detonation characteristics of gaseous explosives using equations of state for real gases, noting compressibility effect in mixture of hydrocarbons, O and N
05 p0848 A69-16337
- Diffusion and thermal diffusion in mixture of Maxwellian gases, analyzing Onsager reciprocity relations
05 p0849 A69-16461
- Pulsed laser emission of atomic N in mixture of molecular N and He, noting effects of pressure and frequency and duration of excitation pulses
06 p0933 A69-17258
- Gas laser operating on pure O-He-Ne-Ar mixture at liquid N temperatures, noting atomic O transitions, pulsed operation and energy level populations
06 p0933 A69-17259
- He-Ne laser gain dependence on temperature noting influence of pumping conditions, discharge tube filling and geometry
06 p0934 A69-17260
- Emissivity of high temperature air and carbon dioxide-nitrogen mixtures in two diaphragm shock tube
06 p0911 A69-17348
- Gas mixture separation in supersonic jet, noting results for hydrogen-nitrogen mixture and diffusion flux
06 p0911 A69-17553
- Laminar and turbulent regimes of flame propagation studied by blowing explosive gas mixture through porous wall, determining Reynolds number by hot-wire anemometer
06 p1034 A69-17626
- Combustion in compressible turbulent mixing flows, discussing mixing facility, experimental results and numerical analysis
[WSCI PAPER 68-28] 06 p0969 A69-17794
- Vibrational excitation in diatomic gas mixtures by translation to vibration energy conversion in simple collisions and by vibrational energy exchange between components
06 p0962 A69-17821
- Spherical deflagration and detonation waves in diluted stoichiometric hydrogen-oxygen mixtures in hemispherical combustion chamber
06 p1034 A69-17927
- Heat transfer from unseeded DC augmented propane air flame to water cooled probe placed beyond discharge zone
06 p1035 A69-17934
- Free turbulent mixing, emphasizing flowing gas mixtures with and without chemical reaction
[AIAA PAPER 69-31] 06 p0915 A69-18223
- Adiabatic kinetic calculations of chemical additive effects on ignition delay of hydrogen-oxygen-argon gas mixtures
[WSCI PAPER 68-52] 07 p1239 A69-18316
- Gas dynamics effects of hot spot in explosive gas mixture using kinetic rate equations, discussing composition, enthalpy and time dependence
[WSCI PAPER 68-53] 07 p1240 A69-18322
- Fuel mixing mechanism in diffusion type supersonic combustion, noting influence of combustor configuration and fuel density
[AIAA PAPER 69-32] 07 p1242 A69-19266
- Diffusion coefficients of H atoms in mixtures of He and Ar with hydrogen by catalytic sink technique, discussing rigid sphere collision diameters
07 p1185 A69-19300
- Kinetic theory development of equations for multicomponent gaseous mixtures symmetric diffusion coefficients
07 p1186 A69-19395
- Oxygen-helium cabin atmosphere effect on speech communication analyzed during simulated space mission
07 p1066 A69-19420
- He concentration measurement in transient He-air mixture by spectroscopic analysis of fluorescence excited by high energy electron beam
08 p1312 A69-19860
- Homogeneous turbulent gas flame front location as function of caloric value of mixture and flow velocity
08 p1420 A69-19998
- Fortran 4 program for computation of equilibrium compositions of gas mixtures at high temperatures
08 p1278 A69-20154
- Flowing CO-N-He laser with power enhancement and high efficiency, noting role of gases
08 p1324 A69-20163
- Harmonic generation in microwave gas discharge in pure and air mixed gases, noting rare gases failure in power source applications
08 p1283 A69-20177
- Laminar heat transmission coefficients in combustion zone for particular oxygen and kerosene mixture
08 p1421 A69-20585
- Monograph on shock wave structure in binary gas mixtures covering gas kinetics and shock tube measurements of heavy component density distribution
08 p1304 A69-20711
- Unsteady flow parameters for reaction products behind spherical detonation wave in gas mixtures based on Taylor solution
08 p1421 A69-20765
- Nongray radiation effects on compressible turbulent free jet mixing of nonsimilar gases, using stepwise spectral absorption coefficient and Beer law
08 p1253 A69-20844
- Optimal conditions for gas discharge in tubes with hollow cathodes in He-Ne mixture for obtaining lasing at Ne line wavelength
09 p1516 A69-21507
- Boundary layer at tube wall behind shock wave propagating in gas-vapor mixture, analyzing condensation rate
09 p1480 A69-21591
- Supersonic free jet with real gas effects and chemical reactions calculated by approximation
10 p1631 A69-22898
- Low voltage He-Ne laser, noting outputs for various pressures and grid anode separations
10 p1704 A69-23652
- Pulsed glow discharges in He and He-H mixtures for high current density, noting electric field and wall potential distributions
10 p1739 A69-23660
- High temperature gas mixture plasmas thermodynamical properties, emphasizing Debye electrostatic interactions and electron states
10 p1810 A69-23794
- Spectral measurement of luminous trails produced by injecting high velocity submicron diameter iron particles into gaseous targets compared with meteor spectra
10 p1790 A69-24142
- Chapman-Enskog procedure extension for binary gas mixtures, obtaining diffusion equation from revised relaxation time of component velocities
11 p1921 A69-24308
- Turbulent flame propagation velocity in homogeneous premixed combustible gas, using one dimensional inviscid flame model
11 p1998 A69-24473

Cool flames nonisothermal two-stage ignition of neopentane-oxygen mixtures, discussing chain propagation due to isomerization
11 p1940 A69-24477

Stability of slow combustion in viscous gas mixture, showing viscosity as principal stabilizing factor
11 p1999 A69-24554

Binary gas flow past curved body for stationary problem studied by solving Boltzmann equations in form of matched asymptotic expansions [ONERA-TP-694]
11 p1867 A69-24753

Combustion chemical reactions kinetics of gaseous phase systems, discussing temperature, reaction rates extrapolation, hydrogen and hydrocarbons
11 p2000 A69-25185

Hydrodynamic instability of normal flame and turbulent combustion of gas mixtures, considering surface and volume combustion models
11 p2000 A69-25186

Steady propagation of flame front initiated by local ignitor /spark/ in gas mixture, discussing critical requirements, boundary conditions, etc
11 p2001 A69-25190

Composition and thermodynamic properties of gaseous system reacting at low temperatures with condensed phase formation, discussing iterative process convergence in approximation
11 p2001 A69-25223

Shock wave structure in gas mixtures, discussing velocity and temperature undershoot and overshoot
11 p1874 A69-25356

Enthalpy excess thermodynamic functions of binary gas mixtures based on stationary diffusion thermoeffect in tube
11 p2003 A69-25552

Diffusion coefficients for laminar multicomponent dissociating boundary layer at surfaces of thermally decomposing protective coatings
12 p2190 A69-25890

Ion-molecule reaction kinetics in nitrogen-hydrogen mixtures using ion cyclotron resonance
12 p2131 A69-25985

Freezing of water droplets in thermal equilibrium with gas mixtures, considering droplet shattering and gas volume
12 p2126 A69-26018

Speech intelligibility in air at ground level and in helium-oxygen mixture at 18,000 ft
12 p2019 A69-26548

Heat and mass transfer coefficients derived for reacting gas mixtures by applying variational principle
12 p2062 A69-26668

Particle volume role in normal shockwave structure in gas-particle mixtures, discussing equations of motion formulation
13 p2244 A69-27327

Steel cylinder wall materials effects on flame propagation at constant volume of propane-air mixtures
13 p2379 A69-28363

Thermal ignition of methane-oxygen mixture, observing flame propagation
13 p2380 A69-28459

Passive Q switching of carbon dioxide laser with mixture of sulfur hexafluoride and chlorotrifluoro-ethylene gases within resonator
13 p2274 A69-28659

Laser emission field effect on discharge current in pure carbon dioxide and mixtures with molecular N and He
14 p2458 A69-29161

Partially ionized multicomponent gas mixture kinetics in strong electromagnetic field, determining magnetic field, stress tensors and transfer coefficients
14 p2492 A69-29610

Laser with molecular H and Cl mixture at HCl vibrational transitions
14 p2461 A69-29672

Oscillatory relaxation of multiatomic gases and gas mixtures with quantum exchange between oscillators, noting gasdynamic applications
15 p2654 A69-30109

Supersonic combustible gas mixture flow around circular cone, discussing ignition by shock wave and flow modification by conical flame front
15 p2548 A69-31007

Radiative scattering cross sections of electrons from neutral O and atomic and molecular N using rapid scanning spectrometer for bremsstrahlung intensity
15 p2657 A69-31160

Nonresonant absorption and dispersion of microwaves by gases, studying gaseous mixtures, relaxation parameters, anomalous dispersion and temperature effects
15 p2654 A69-31219

Mixture ratio distribution, injector/chamber performance and nozzle effects on specific impulse of liquid propellant rocket engine using hydrazine and oxygen
16 p2828 A69-31724

Induction period of reactions behind incident shock waves traveling through undiluted high temperature CO and molecular oxygen mixtures, using CO flame spectra
16 p2877 A69-31768

Monograph on ionization of Ar-CH mixtures during Townsend discharge, covering metastable Ar atoms lifetime in various pressure ranges
16 p2814 A69-31841

Gas environment effect on catabolic activities and enzymatic reactions of trachoma and meningopneumonitis agents of genus Chlamydia
16 p2747 A69-31865

Ion momentum transfer through charge exchange in mixture of ion gases and parent neutral gases under thermal nonequilibrium, noting role of Boltzmann equation
16 p2822 A69-32108

Ablative materials in hydrogen/oxygen thrust chamber using expansion nozzle to substitute regenerative thrust chamber assembly [AIAA PAPER 69-442]
16 p2747 A69-32702

Specific impulse deliverable performance of space storable propellant combination fluorine-oxygen/methane and oxygen difluoride/diborane [AIAA PAPER 69-505]
16 p2845 A69-32762

Ultrasonic velocity dispersion in para hydrogen and mixtures with He, Ne and Ar at 300 K, obtaining rotational relaxation times
16 p2815 A69-32791

Monograph on turbulent isothermal swirl-free jets and turbulent swirling flames, studying mixture and propagation in free space
17 p3068 A69-32996

Temperature and pressure effects on flame propagation rates, burning time and combustion zone length in turbulent flows of homogeneous gas mixtures
17 p3069 A69-33140

Boron nitride synthesis by gas phase reaction of boron chloride or diborane with ammonia, determining purity from equilibrium gas mixture components
17 p2992 A69-33432

Gas bath cryostat to study volumetric properties of gaseous mixtures at low temperature and high pressure
17 p2975 A69-33669

Flow rate effect of oxygen-argon mixture on Zr oxidation studied to determine exclusion as factor in Zr weight increase
18 p3154 A69-34272

Shock wave profiles in molecular N-H gas mixtures in shock tube measured by optical electron beam method, noting disagreement with Navier-Stokes calculations
18 p3134 A69-34458

Criteria to predict flow instabilities triggered by exothermic reaction presence in high temperature reaction kinetic shock tube studies
18 p3116 A69-34462

Population inversion in carbon dioxide laser related to pumping frequency, discussing molecular dissociation effect in gas mixture
18 p3151 A69-34620

Turbulent velocity of flame propagation in supersonic stream of hydrogen-air mixture determined by velocity distribution, exchange coefficient and burning time
19 p3448 A69-35854

Flame and pressure /or velocity/ oscillations interaction in unstable combustion regimes, considering tubes with propane-air mixtures
19 p3450 A69-36357

Diverging nozzle flow of gas mixtures containing solid or liquid particles analyzed by one dimensional approximation separately averaging boundary layer and flow core
19 p3298 A69-36389

Ordered sets of Massieu thermodynamic characteristic speeds for reacting gas mixtures relevant to nonequilibrium flow fields compared to Laplacian and Newtonian speeds
19 p3452 A69-36802

Thermal conductivity calculation for chemically reacting multicomponent gas mixture, comparing results from Brokaw method and simplified formula
20 p3483 A69-36974

Gas mixtures CW gain characteristics at 337 mu as function of pressure, current, mixture and flow rate, considering HCN laser systems
20 p3552 A69-36995

Turbulent boundary layer problem of gas mixture motion solved by approximate methods
20 p3513 A69-37090

Turbulent boundary layer gas mixture flow incident to porous plate surface
20 p3513 A69-37093

Pulse height distribution changes of gas filled proportional counters ascribed to deposit accumulation on anode, using X ray fluorescence analysis
20 p3538 A69-37302

Similarity rule in hydrodynamically transcritical regime in ionized multifluid gas
20 p3515 A69-37559

N and H plasmas and N-H plasma mixtures thermodynamic properties calculation, discussing numerical methods and corrections for electrostatic interactions
21 p3847 A69-38421

Thermal conductivity coefficient of gas mixtures at low temperatures obtained using quantum diffusion model and Chapman-Enskog method for Boltzmann equation
21 p3848 A69-38638

Heat loss from cylinders at low Reynolds numbers in N-He and N-Ne binary mixtures
21 p3848 A69-38706

Equilibrium absorption and desorption rates of carbon dioxide-argon mixtures from silica gel measured as function of temperature using gas dynamics method
21 p3848 A69-38707

Propagation characteristics of steady adiabatic one dimensional laminar flames in premixed gases, considering activation energy and Lewis number
21 p3849 A69-38802

Turbulent premixed ammonia-air flame stabilization on flameholders, discussing secondary oxygen injection into circulation zone at blowoff limits
21 p3849 A69-38808

Negative ion influence on electrical conductivity of partially ionized multicomponent gas mixtures, basing analysis on thermodynamic calculations of composition
21 p3774 A69-38867

Spectral transmittance of mixture of carbon monoxide and nitrous oxide for overlapping absorption bands [AIAA PAPER 67-600]
21 p3819 A69-39013

Molecular hydrogen, oxygen and deuterium additions effect on CW laser operation with ordinary and heavy water as active medium
21 p3738 A69-39131

Computer routines for approximations of thermochemical properties of gas mixtures, using JANAF /Joint Army Navy Air Force/ tables of combustion systems
21 p3670 A69-39591

Respiratory gas exchange during workloads, comparing values for ventilation, oxygen uptake and carbon dioxide output measured in air and in helium-oxygen mixture
22 p3891 A69-40221

Gaseous mixtures for hypervelocity applications, studying equilibrium conditions and thermodynamic properties for shock and constant volume heating processes
22 p4049 A69-40266

Carbon dioxide and carbon dioxide mixture mirror Q switched laser peak power generation, using pulsed excitation
22 p3963 A69-40564

Adsorption kinetics in ternary mixture of nitrogen, methane and hydrogen, using concentration-time /breakthrough/ curves measurement on activated coconut shell charcoal [NAS-NRC PAPER H-4]
22 p3981 A69-40629

Kinetic theory for macroscopic transport phenomena in N-component polyatomic gas mixtures with internal degrees of freedom under nonlocal thermodynamic equilibrium
23 p4238 A69-41435

Mass diffusion and heterogeneities in compression chamber gas mixture in shock tube ascribable to pressure and temperature gradients
23 p4146 A69-41547

Binary gas mixtures transport coefficients approximated by self consistent matrix procedure based on Chapman-Cowling expressions
24 p3452 A69-43135

Heat and mass transfer in gas suspension, studying suspended particles effects on heat transfer by irreversible thermodynamics [ASME PAPER 69-HT-34]
24 p4410 A69-43528

GAS PHASES
U VAPOR PHASES

GAS POCKETS

Gas bubble formation in Ti welding associated with gas nuclei in metal, molten dwell time, gas diffusion coefficients, joint edge conditions, etc
11 p1892 A69-25669

GAS PRESSURE

Electric discharge in gas flow with magnetic field, showing varying charged particle density as function of argon-cesium pressure
02 p0285 A69-11570

Plasma stability under anisotropic pressure in axisymmetric magnetic fields determined by quasi-hydrodynamic approximation
02 p0291 A69-12552

Dilatometer for measuring thermal expansion of solid bodies over temperature range at various gas media pressures
03 p0432 A69-14151

Increasing vortex tubes energetic cooling efficiency for cooling aircraft components by using potential energy of gas emitted from tubes
04 p0684 A69-14488

Ion current output vs gas component partial pressure determined to measure ion source efficiency employing electron impact ionization
06 p0960 A69-16919

Gas laser operation at high pressures, examining threshold pumping and power output dependence on pressure to optimize parameters
06 p0934 A69-17680

Ion laser emission cessation with increasing pressure, magnetic field and current strength due to lower transition level lifetime increase
06 p0934 A69-17682

Dense gas effects in free piston hypersonic wind tunnel, discussing Longshot facility, free piston cycle, reservoir conditions decay and hypersonic nozzle flow [AIAA PAPER 69-169]
06 p0907 A69-18188

Gas pressure control in xenon lasers, using variable temperature surface partially insulated from liquid nitrogen coolant
07 p1155 A69-19090

Electron acceleration in microtron through injection from low pressure gas discharge plasma
08 p1279 A69-19803

Monograph on heat transfer coefficients of polystyrene foams noting contribution of gas conduction, convection and radiation to total heat transfer
08 p1421 A69-20716

Gas pressure variations behind autonomous stable detonation fronts in propane-O mixtures, noting effect of diameter tubes and initial pressures
08 p1421 A69-20757

Stimulated Mandelstam-Brillouin scattering in compressed N and H as function of pressure, using ruby laser pulses
09 p1516 A69-21562

Neon discharge positive column at medium gas pressures, discussing calculated and experimental data concerning diffusion theory to interpret parameters
10 p1740 A69-23723

Nitrogen, oxygen and air luminescence spectra excited by fast electrons at low gas pressures in IR spectral region compared with polar auroral spectra
10 p1687 A69-23916

Gases effect on electrical conductivity of vacuum deposited thin films of Cr, Be, Ni, Au and Ge at different thickness and low pressure
12 p2143 A69-26460

Flow models for externally pressurized gas bearings, discussing pressure distributions, load capacity and flow rate [ASME PAPER 68-LUBS-2]
13 p2267 A69-27285

Copper and aluminum fatigue in vacuum and ultrahigh vacuum, discussing effects of hydrogen, nitrogen and oxygen pressures
13 p2280 A69-28088

Constant density heating upstream and constant pressure cooling downstream formulas for radiating shock waves
13 p2249 A69-28240

Electromagnetic field induced plasma oscillation amplitude dependence on field frequency as function of field amplitude and discharge current at low N pressures
13 p2313 A69-28332

Frequency shifts of Lamb dip minimum in helium-neon laser, considering effects of discharge tube parameters and gas pressure
14 p2457 A69-28929

Gas compressibility influence on laminar to turbulent boundary layer transition determined using Taylor hydrodynamic finite perturbation model
14 p2389 A69-28974

Neutral gas pressure in positive column plasma between two coaxial insulated cylinders as function of cylinders radii
14 p2490 A69-29036

Work function changes of tungsten single crystals as function of oxygen and CO gas pressure at high temperatures, using emission microscope
14 p2506 A69-29272

Plasma stability under anisotropic pressure in axisymmetric magnetic fields determined by quasi-hydrodynamic approximation
15 p2658 A69-30249

Gas barrier seal design producing varying unit loading on conventional contact seal faces, including geometric stability and test results [ASLE FICFS PREPRINT 26]
15 p2621 A69-30495

Leakage in mechanical face seals with hydrodynamic films, noting misaligned seal theories for pumping with cavities and two fluids [ASLE FICFS PREPRINT 19]
15 p2621 A69-30497

Pressure and wavelength dependence of molecular O absorption coefficient near 1215 Å, utilizing UV emission from crossed beam atomic collision
15 p2656 A69-31031

Final states of density, velocity and pressure in gas, comparing states reached after transition through single oblique hydromagnetic shock and two successive shocks
15 p2664 A69-31217

Conditions behind incident and reflected shock waves in shock tube calculated from initial pressure, density, temperature and shock speed
15 p2593 A69-31487

Interstellar cloud models, considering gas pressure, cosmic ray flux, magnetic field values, etc
16 p2853 A69-31599

Ammonium perchlorate sublimation models, discussing low temperature decomposition influence on pressure dependence of sublimation rate [WSCF PAPER 69-22]
16 p2832 A69-32360

Hydrogen-oxygen ion exchange membrane fuel cells for sounding balloons, discussing flight duration and power requirements, gas supply pressure effects, etc
16 p2738 A69-32413

Gas pressure differential across multilayer insulation blanket during rapid evacuation predicted, using one dimensional flow theory [AIAA PAPER 69-608]
17 p3072 A69-33275

Quantitative IR spectral emissivity measurements of NO between 300-800 K made in absorption, correlating observed absorbance with optical path length and gas pressure
17 p3009 A69-34156

Electron current flow from metal target in gas due to laser radiation, showing increased dependence on gas pressure
18 p3152 A69-35124

Water vapor absorption at submillimeter wavelengths in atmospheric window regions related to foreign gas pressure, using HCN maser
18 p3152 A69-35241

Two dimensional unsteady motion of medium with pressure as linear function of density, analyzing gas expansion into vacuum
20 p3512 A69-36916

Supersonic molecular beam relative intensity represented as function of nozzle to collimator distance and gas admission pressure
20 p3579 A69-37432

Temperature and pressure relations in power plant with closed gas cycles with radiative heat transfer, noting radiation area reduction influence
20 p3464 A69-37603

Monograph on forces exerted by air during yawing motion of sharp cones in supersonic and hypersonic flows by semilinear method
20 p3460 A69-37919

Nomograph for rapid estimation of pressure drops across orifices in pneumatic systems using real gas data with illustration for nitrogen
20 p3467 A69-38186

Ammonium chloride thermal decomposition by measuring formed noncondensable gas pressure and weight loss in solid state kinetic investigation
21 p3669 A69-38800

Design features comparison and operation principles of gas strain gauges in application to structures, emphasizing independence of temperature variations in pneumatic circuits
21 p3725 A69-39324

Laser induced multiphoton ionization and cascade breakdown in high pressure gases, considering roles of

refractive index, laser nonideal output and beam self focusing
21 p3738 A69-39445

P-V-T surface of fluids in critical region by dielectric measurements, presenting saturation densities of oxygen [NAS-NRC PAPER H-5]
22 p4050 A69-40623

Creep strength as function of oxygen pressure for Ni at 510 and 600 C, dropping creep rupture life to plateau of nearly constant life
23 p4176 A69-41504

Amplified radiation of laser used for coherent optical pumping in two level low pressure gas laser
24 p4327 A69-43067

GAS REACTORS

Adiabatic stirred reactor, discussing steady state nonlinear equations of reactant gases combustion
02 p0352 A69-12316

GAS-SOLID INTERFACES

Spatial and kinetic distributions of molecules reflected by surface in rarefied atmosphere, discussing mathematical model
01 p0122 A69-10041

Cryogenic expansion to pressures below triple point and resulting formation of solid-vapor mixtures, discussing flow and heat transfer characteristics in heated tubes
01 p0176 A69-11146

Interaction of rarefied gas with solid surface, analyzing accommodation coefficients, energy and impulse exchange as function of atomic bulk size
04 p0632 A69-14991

Surface roughness influence on interaction between gas flow and solid surface for case of diffuse and specular reflection, noting role of inclination angle
06 p0910 A69-17342

Gas adsorption on solids, discussing statistical mechanical theory assuming localized adsorption for first adlayer and nonlocalized mobile layer adsorption on top
06 p0980 A69-17387

Concentration changes in binary metal-gas solutions during simultaneous degassing kinetics and metal evaporation
09 p1528 A69-22732

Particle volume role in normal shockwave structure in gas-particle mixtures, discussing equations of motion formulation
13 p2244 A69-27327

Gas-surface interaction for trapping and energy exchange, comparing continuum and discrete lattice models for solids
14 p2409 A69-29092

Transonic ideal gas flow past semiinfinite bodies, determining flow potentials from body perturbations and surface boundary conditions
14 p2390 A69-29476

Chemical reaction between combustible solid fuel surface and oxidizer-containing gas in space capsule
16 p2877 A69-31896

Temperature field in plate heated at one end and situated in solidifying gas, leading to gas layer formation by sublimation
16 p2878 A69-31957

Temperature jumps at gas-solid interface in shock tube calculated by one dimensional approximation of thermal boundary layer behind reflected shock wave
17 p2949 A69-33023

Thermal accommodation coefficients determination, comparing techniques based on free molecule flow heat flux data
18 p3230 A69-35071

Sublimation of various compressed naphthalene wind tunnel models analyzed in supersonic air flow, discussing effects of temperature and model configurations
18 p3231 A69-35121

High energy neutral molecule beam for gas-surface interaction studies generated in electron bombardment ion source
19 p3376 A69-36176

Low and moderate energy gas molecule-solid surface interactions, using molecular beams
19 p3376 A69-36177

Gas molecules scattering by solid surface for monoenergetic and Maxwellian beams, discussing model with different values for magnitude and velocity direction
19 p3377 A69-36181

Autocorrelation function for unsteady temperature and stress fields in bar located in gas stream leaving combustion chamber
19 p3440 A69-36685

Physical state changes, chemical reactions, gaseous diffusion in solids and solid-gas interactions in vacuum, considering saturated vapor pressure, condensation, evaporation, etc

20 p3576 A69-37408

Destructive interaction of refractory carbides and graphite compositions with chemically active high temperature gas streams

21 p3751 A69-38640

Gases effects on UV irradiated thermal control materials spectral reflectance, discussing tests and photolysis mechanisms [AIAA PAPER 69-1025]

22 p3923 A69-40395

GAS SPECTROSCOPY

Successive explosions produced two gas systems observed in six Seyfert galaxy nuclei by spectrophotometry, using diffraction spectrographs

12 p2164 A69-27022

Atmospheric IR spectra determination from transmission functions overlapping effects of atmospheric gases

16 p2814 A69-31792

Shock tube application to transition probability measurements with emphasis on thermodynamic state of radiating gas, noting temperature dependence of level population

18 p3176 A69-34446

Metallic aerosol generator application in shock tube spectrometric measurements of radiation by molecules occurring as solids before decomposition to vapor phase

18 p3099 A69-34461

Spectroscopic measurements of weakly ionized Ar plasma premixed with diatomic N in plenum chamber, demonstrating role of competitive reactions for metastable Ar atom

21 p3779 A69-39794

GAS STREAMS

Laminar mixing of two semiinfinite parallel streams, deriving equations and boundary conditions by applying perturbation technique

05 p0744 A69-15714

Jet perpendicular penetration prediction from holes or tubes, discussing resultant gas stream mixing and temperature profiles [ASME PAPER 68-WA/GT-8]

05 p0750 A69-16143

Approximate solution for turbulent jet expansion in opposing stream, discussing hydraulic drag coefficient formula derivation

07 p1118 A69-18396

Streaming gas effect on carbon dioxide-nitrogen-helium laser power, discussing gas renewal phenomenon and evacuation rate

07 p1145 A69-18476

Heat transfer to wedge in nearly free-molecular hypersonic flow of strongly rarefied gas

07 p1050 A69-18707

Streamer based on model of perfectly conducting plasma produced on boundaries by entering and departing electrons, discussing streamer thickness and propagation velocity

11 p1935 A69-25759

Rotating central disk in galactic plane observed by radio telescope, assessing relation between expanding gas of disk and high velocity stream from center

12 p2163 A69-27018

High gas stream temperature levels and distributions from transient and intermittent probe measurements

15 p2612 A69-31268

Aeroelastic nonlinear panel stability in supersonic gas stream, defining hazardous conditions of critical flutter boundary

15 p2716 A69-31549

Finite difference method for turbulent mixing and combustion of hydrogen injected parallel to supersonic air stream, considering vitiated and unvitiated air [AIAA PAPER 69-539]

16 p2877 A69-31844

Combustion of pure crystalline boron single particles injected into hot oxidizing gases streams at atmospheric pressure [AIAA PAPER 69-562]

16 p2880 A69-32741

High gas stream temperatures determination from short exposure probe based on inferring temperature from transient response of sensor

20 p3536 A69-37005

Rocket nozzle control by side forces produced by secondary gas stream injection observed for relationship with inclination angle to nozzle axis

20 p3457 A69-37065

Gas concentration measurement during injection into laminar boundary layer streaming along porous plate, using quadrupole resonance mass spectrometer

23 p4058 A69-41695

Contraststreaming self gravitating gas streams stability taking into account thermal conduction and radiation effects

24 p4388 A69-43638

GAS TRANSPORT

Heat transfer between concentric cylinders at different temperatures measured for argon, neon and helium

01 p0177 A69-11403

Diatomic dissociating gas free atoms virial coefficient used to study thermodynamic properties and transport coefficients of gases

02 p0283 A69-11574

Diffusion coefficients for oxygen transport in whole blood, discussing effects of intact red cell concentration

02 p0200 A69-12479

Thermodynamic analysis of refractory compounds vapor transport conditions, illustrating integral free energy diagrams

03 p0453 A69-13619

Water and heat removal unit for hydrogen/oxygen fuel cell systems, discussing temperature distribution, heat and liquid transport

05 p0704 A69-15676

Gas kinetics application to various flow problems by solving Boltzmann equation for monoatomic single component gas

08 p1351 A69-20708

Transport coefficient density expansions obtained from time correlation functions in moderately dense gas with short range repulsive intermolecular forces

14 p2540 A69-29469

Atmospheric hydrogen and helium atoms emission in geomagnetic poles and winter hemisphere, comparing thermal dissipation and migration of light atoms

15 p2599 A69-31322

Column method of measuring thermal conductivity of CO and oxygen in 350-1500 degrees K temperature range, discussing error sources and data reliability [AIAA PAPER 69-603]

17 p3073 A69-33298

X ray absorption in surrounding gas sphere as function of continuous absorption, electron scattering and diffuse ionizing radiation, using radiative transfer theory

18 p3186 A69-34296

Transport processes effect in shock wave on hypersonic flow past blunt body in neighborhood of stagnant point, noting heat transfer

18 p3086 A69-34910

Hydrogen bulge above springtime pole indicated by Lyman alpha radiation in earth geocorona, discussing hydrogen horizontal transport and hydrogen compounds dissociation as causes

18 p3129 A69-34956

Chronic hypoxic hypoxia on oxygen-hemoglobin dissociation curve and respiratory gas transport in man, considering altitude residents and heart and lung diseased patients

21 p3650 A69-38383

Decompression research on inert gas transport in body, discussing solubility factors in decompression damage

21 p3655 A69-38913

Kinetic theory for macroscopic transport phenomena in N-component polyatomic gas mixtures with internal degrees of freedom under nonlocal thermodynamic equilibrium

23 p4238 A69-41435

Transport coefficients in neutral gases, discussing fundamental relations of parameters in viscosity, thermal conductivity and self, pressure and thermal diffusion

23 p4193 A69-41514

Oxygen and carbon dioxide transfer in membrane oxygenators, considering liquid dispersion and membrane diffusion limitations

24 p4279 A69-43799

GAS TUNGSTEN ARC WELDING

High strength steel welding with physical properties equal to parent metal, discussing gas tungsten-arc, electron beam and plasma arc techniques

01 p0088 A69-11399

Sheet steel composition effect on gas-tungsten arc welds porosity

04 p0607 A69-15219

Spot weld strength of tungsten inert gas spot welding on Al-Mg-Si sheets greater than resistance welding, noting crack formation during inert gas welding

05 p0769 A69-16538

TIG welding introduced residual stresses amplitude and distribution in Ti sheets, studying effects on mechanical properties [ASM PAPER GG8-6.2]

07 p1169 A69-19674

Roll planishing and thermal treatments effects on gas tungsten arc welded Ti-6Al-4V alloy on residual stresses, tensile, formability and fracture toughness properties

08 p1319 A69-19960

Weldability of precipitation-hardening stainless steels by gas tungsten arc process, discussing microstructure and shrinkage stress cracking

08 p1320 A69-20409

Welding current pulsation techniques for adaptive control of gas tungsten arc welding processes

09 p1508 A69-22334

Covered electrode, submerged arc, electroslag, gas metal arc, gas tungsten arc and plasma arc welding processes application to high strength steels

12 p2100 A69-25828

Microplasma, W inert gas and submerged arc welding processes for fabrication of rocket motor cases and pressure vessels, discussing material requirements and weldability [SBAC PAPER 7]

20 p3550 A69-37449

Porosity and inclusions effects on Al arc weld fatigue properties at ambient and cryogenic temperatures

24 p4331 A69-42940

GAS TURBINE ENGINES

NT BRISTOL-SIDDELEY OLYMPUS 593 ENGINE

NT DUCTED FAN ENGINES

NT J-79 ENGINE

NT J-85 ENGINE

NT T-53 ENGINE

NT TURBOFAN ENGINES

NT TURBOJET ENGINES

NT TURBOPROP ENGINES

Protective coatings for gas turbine engine components in marine environments, considering corrosion of diffuser, impeller, compressor case and turbine blades

01 p0099 A69-11057

Aircraft gas turbine compressor parts erosion tests

01 p0099 A69-11058

Steam ingestion tests on carrier aircraft gas turbine engines, analyzing inlet pressure and temperature distortion in steam-air environment

01 p0143 A69-11062

Pneumatic pressure ratio sensing element and associated high pressure switches and amplifiers for gas turbine engine control systems

02 p0249 A69-12088

Aircraft gas turbine component pressure data storage and scanning

05 p0726 A69-16768

Transpiration air cooled blading to test and design small gas turbine at 2500 F inlet, discussing cascade and full stage component [SAE PAPER 690035]

07 p1203 A69-18310

Control methods and designs for limiting atmospheric pollution emitted by aircraft gas turbine engines [SAE PAPER 680347]

07 p1204 A69-19729

Aircraft gas turbine engines control systems capabilities and future requirements, considering maximum propulsion system performance with minimum fuel consumption [ASME PAPER 68-GT-62]

08 p1376 A69-19846

Flame burnout of atomized hydrocarbon fuel in gas turbine combustion chambers as function of ratio of time to total burnout time

08 p1420 A69-19999

Composite materials and alloys for jet turbine components in 1970s, discussing anticipated temperatures and material properties

09 p1523 A69-22061

Hollow turbine disks for provision of coolant to high performance aircraft gas turbine engines, fabricating disk in two axial halves

09 p1509 A69-22345

Supersonic axial compressor boost stages for small gas turbine engines, using passage flow approach and passage criteria to design airfoils [ASME PAPER 69-GT-44]

09 p1570 A69-22478

Gas turbine engines control and fuel systems integration, considering weight reduction [ASME PAPER 69-GT-49]

09 p1571 A69-22483

Vane type fuel pump designed for small gas turbine engines, describing design analysis and laboratory evaluation [ASME PAPER 69-GT-45]

09 p1513 A69-22485

Transpiration cooling effect on turbine stator blade performance determined by annular cascade tests, using data to establish empirical correlation for loss coefficient [ASME PAPER 69-GT-39]

09 p1432 A69-22487

Potential usage of titanium in cast parts for gas turbine engines, emphasizing alloys development [ASME PAPER 69-GT-24]

09 p1513 A69-22494

Finite difference method computer programs for calculation of velocities and streamlines on blade to blade surface of revolution of turbomachine
[ASME PAPER 69-GT-48] 09 p1432 A69-22495

Fluidic overspeed sensor for small turboshaft power turbine, discussing requirements, circuit and system design, packaging, reliability and maintainability
[ASME PAPER 69-GT-17] 09 p1571 A69-22500

Miniature fluidic oscillator temperature sensors evaluated in gas turbine engine nozzle, discussing temperature control and related signal error compensation and temperature averaging
[ASME PAPER 69-GT-70] 09 p1572 A69-22512

Gas bearings for spool gas generator for aircraft turbine engines, noting rotor bearing stability and LP spool balancing and seal leakage
[ASME PAPER 69-GT-60] 09 p1513 A69-22515

Engine usage indicator to cumulate small gas turbine engine exposure to certain deterioration, presenting circuit logic block diagram
[ASME PAPER 69-GT-69] 09 p1572 A69-22519

Radial inflow gas turbine engine performance testing, discussing instrumentation, recording systems and calibration techniques
[ASME PAPER 69-GT-104] 09 p1501 A69-22522

Compressor to inlet distortion tolerance design techniques for gas turbine compressors, noting rotor matching, blade chord length, blade geometry, etc
[ASME PAPER 69-GT-115] 09 p1572 A69-22525

Rolls Royce Spey engine combustion system development, emphasizing carbon formation, exhaust smoke, fuel injection, increased area interconnector, and overheating
09 p1573 A69-22613

Gas turbine engines smoke emission, considering smoke measurement, flame structure, carbon production, pressure effects fuel-air ratio, etc
09 p1573 A69-22622

Gas turbine engine development data system based on test stands subsystems and central computer
10 p1660 A69-23284

Bearing deposition test for evaluating degradation characteristics of aircraft gas turbine engine lubricants
10 p1700 A69-24070

Onboard gas turbine auxiliary power units for executive jet transport aircraft
[SAE PAPER 690332] 11 p1824 A69-24501

Gas turbine propulsion engines for small single engine helicopters, discussing costs, performance and FAA tests
[SAE PAPER 690310] 11 p1942 A69-24513

Gas turbine disk calculation and plastic flow theory, considering loading conditions and elastoplastic strains due to centrifugal forces and nonuniform heating
11 p1982 A69-24945

Gas turbine fuel and control systems for two and three shaft engines in military and civilian aircraft including helicopters
[IME PAPER 12] 12 p2147 A69-25796

Control methods and designs for limiting atmospheric pollution emitted by aircraft gas turbine engines
12 p2147 A69-26236

Gas turbine engine shaft face seal with self acting lift augmentation preventing rubbing contact, noting disadvantages of labyrinth and conventional seals
[ASLE FICFS PREPRINT 27] 15 p2621 A69-30492

Aircraft gas turbine parts design and fabrication, discussing role of welding techniques
15 p2629 A69-30928

High temperature radial turbine design for small gas turbine engines, discussing aerodynamic, structural and thermal analyses
[AIAA PAPER 69-524] 16 p2838 A69-32662

Scale models of M-1 rocket engine oxygen and hydrogen pump driven two stage turbines used to determine performance and compact inlet manifolds problems
[AIAA PAPER 69-553] 16 p2840 A69-32678

Gas turbine engine compressor system dynamic representation by one dimensional mathematical model
[AIAA PAPER 69-486] 16 p2842 A69-32697

Injection film cooling effect on surface heat transfer downstream of flush nontangential injection holes and slots in turbine applications
[AIAA PAPER 69-523] 16 p2843 A69-32703

High bypass ratio engine influence on short range civil aircraft design, considering performance, noise, engine location, etc
17 p2897 A69-33212

Gas turbine engines smoke reduction, aerated fuel sprays for smoke control on engine design and factors affecting visibility of exhaust plumes
17 p3020 A69-33350

Holography application in gas turbine components stress and vibration analysis, discussing techniques and apparatus usable by nonspecialist and measurement accuracy
17 p2974 A69-33351

Gas turbine components life prediction, using Weibull distribution and Bayes theorem to estimate probability of crack initiation
19 p3394 A69-36004

Aerated fuel spray effect on smoke reduction from high pressure ratio aircraft gas turbine engines, including smoke measurement and visibility
19 p3395 A69-36770

Boron fiber reinforced Al matrix composite material for high performance aircraft gas turbine engine compressor blading
[AIAA PAPER 68-1037] 20 p3586 A69-37153

Airbreathing gas turbines construction materials including composites and Ti and austenitic alloys
[ASME PAPER D8-25.2] 20 p3586 A69-38133

Gas turbine compressor blade buckling during blade fabrication by hydraulic pellet jet technique eliminated by controlling working pressure of jet
21 p3731 A69-38879

Superalloy technology applications to gas turbine engines
21 p3785 A69-38928

Aircraft gas turbine engine lubricant evaluation and systems design from standpoint of effective oil life and lubricant stability requirements
[SAE PAPER 690424] 23 p4200 A69-41648

Dynamic simulation for gas turbine engine components design to assure stable operation and rapid response characteristics
[SAE PAPER 690386] 23 p4200 A69-41655

Large fan blade design, discussing aerodynamic design and rig test program supporting fan definition
[SAE PAPER 690387] 23 p4200 A69-41656

Dynamic hot corrosion rig test for operating environment and alloy composition effect on sulfidation attack during gas turbine fuel combustion
23 p4150 A69-42448

Thermochemical analysis of hot corrosion during sulfidation-oxidation of superalloy gas turbine engine components using Pourbaix method
23 p4178 A69-42449

Blade and vane wall thickness measurements test methods for gas turbine engine using ultrasonic gage and thermoelectric comparator
24 p4312 A69-42753

Gas turbine engine problem causing component failures, considering alternative replacement strategies
24 p4318 A69-42774

GAS TURBINES

Heat transfer in cooled portion of air gas flow area of high temperature gas turbines
03 p0495 A69-12957

Centrifugal force field influence on heat exchange between gas and blade cascade studied with noncooled blades at low temperatures
03 p0531 A69-12959

Gas turbine alloys composition role in high temperature corrosion resistance under high sulfur diesel fuel combustion
03 p0444 A69-13309

Orifice compensated hydrostatic face seal under pressure and thermal loading for aircraft gas turbine
[ASME PAPER 68-WA/LUB-6] 05 p0768 A69-16131

Small aircraft gas turbine regenerators employing heat pipes, noting excessive cost and weight
[ASME PAPER 68-WA/GT-7] 05 p0812 A69-16142

Gas turbine exhaust silencer performance correlated in laboratory and in service
[ASME PAPER 68-WA/GT-9] 05 p0812 A69-16144

Heat transfer performance of porous nozzle blade cascade represented by two dimensional mathematical model
05 p0812 A69-16400

High turbine inlet temperature technology using thermosiphon cooling for gas turbine, possibly doubling specific horsepower of aircraft
[SAE PAPER 690034] 07 p1203 A69-18311

Material design problems in small gas turbines, discussing engine performance sensitivity, thinness of rotor-blade and stator-vane trailing edges, dimensional tolerances, etc
[ASM PAPER D8-16.2] 07 p1204 A69-19668

Fluidic devices for closed loop control of gas turbines
[AGARDOGRAPH-118] 08 p1258 A69-20956

Deformation processing of superalloy gas turbine components, studying ingot characteristics, alloy segregation effect and thermomechanical properties
[SAE PAPER 690101] 09 p1503 A69-21557

Noncontacting torque meters using magnetoelastic properties of steel shafts, discussing gas turbine and industrial applications
[ASME PAPER 69-GT-64] 09 p1500 A69-22480

High temperature sensors for gas turbines, discussing thermocouples and radiation pyrometer to sense turbine hardware
[ASME PAPER 69-GT-30] 09 p1501 A69-22492

Gas turbine blade materials after long term service, analyzing tensile, impact and stress rupture properties and microstructure
[ASME PAPER 69-GT-12] 09 p1527 A69-22503

Nickel base superalloys for aircraft gas turbines, considering strengthening mechanisms for creep resistance
[ASME PAPER 69-GT-7] 09 p1527 A69-22506

Titanium-boron composites for gas turbines, mechanical properties and service life in high temperature environment
[ASME PAPER 69-GT-1] 09 p1527 A69-22510

Combustion in advanced gas turbine systems - Conference, Cranfield, Bedfordshire, England, April 1967
09 p1624 A69-22611

Combustion chamber design for advanced gas turbines, noting influence of fuel air mixing and air flow distribution
09 p1573 A69-22612

Gas turbine combustion control at high pressure, considering mixing, fuel evaporation, spray penetration and cone angle
09 p1625 A69-22620

Digital computer programs for aerodynamics of subsonic gas turbine combustion systems applicable to incompressible flow with specified flow boundaries, noting vortices distribution
09 p1573 A69-22621

Film cooling injection slots number and position over flame tube and minimum cooling airflow in aircraft gas turbines
09 p1625 A69-22623

Off design performance prediction method for radial inflow turbines compared with experimental results for small turbine and Brayton space power plant
10 p1754 A69-23891

Gas turbine blade vibrations, discussing excitation causes and damping techniques
[ASME PAPER 69-VIBR-59] 10 p1805 A69-24155

Thermodynamic cycle analysis of various gas turbines and air breathing propulsion systems noting regenerators, heat exchangers and pulsejet engine
11 p1943 A69-25584

Aerodynamic design of axial flow compressors and turbines, using aerothermodynamic equations for compressible flow analysis
11 p1821 A69-25585

Control technology advancement effects on gas turbine design and application, integrating control scheme, modularization and commonality, system design and energy input and load control
12 p2146 A69-25786

Radial gas turbine design and performance including nozzle and rotor loss, mechanical and thermal stresses and manufacturing methods and materials
[IME PAPER 7] 12 p2146 A69-25787

Gas turbine combustion chamber design factors including combustion volume, burning zone, dilution zone, pressure drop, fuel preparation, injection and ignition, exhaust smoke, etc
[IME PAPER 3] 12 p2146 A69-25789

Gas turbine centrifugal compressor design considerations for impellers and diffusers, including blade loading and pressure gradients determination and aerodynamics
[IME PAPER 1] 12 p2146 A69-25790

Fabricable materials with low plastic deformation for gas turbine components, noting strength vs temperature for alloys, fiber composites and ceramics
[IME PAPER 8] 12 p2147 A69-25791

Tubular gas turbine combustion chamber design for optimum mixing performance using flow and mixing data of cold air injection into hot gas stream
[IME PAPER 15] 12 p2147 A69-25793

Small gas turbine Brayton cycle analysis treating component efficiencies as dependent variables in examining single stage radial compressor and turbine aerodynamic configuration
[IME PAPER 5] 12 p2147 A69-25794

GAS VALVES

Cast high temperature alloys for gas turbine components, discussing production, temperature capability, composition, oxidation, hot corrosion and weldability [IME PAPER 10] 12 p2147 A69-25795

Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance 13 p2275 A69-27344

Temperature measurement for aircraft gas-turbine engine development 14 p2509 A69-28886

Error analysis in efficiency measurement of gas turbines, considering thermodynamics and power output 14 p2509 A69-29509

Bladed disk assemblies vibrational properties, discussing dynamic characteristics of system with pairs of close natural frequency modes under forced vibration 15 p2704 A69-30304

Airborne particle size influence on gas turbine parts erosion, with attempts to relate to filtration and engine life 16 p2794 A69-32026

Axial gas turbine efficiency and work functions, discussing turbine using isothermal high velocity combustor 16 p2837 A69-32064

High temperature radial turbine design for small gas turbine engines, discussing aerodynamic, structural and thermal analyses [AIAA PAPER 69-524] 16 p2838 A69-32662

Combustion and exhaust losses in gas turbines, recommending pulsating combustion for increased useful energy 17 p3021 A69-33360

Optimum efficiency of turbines with small volumetric flow rate, determining height of air-gas flow, partial admittance and flow angle in clearance 18 p3184 A69-34983

Working fluid flow parameters compensation by expelled cooling air in air-gas flow area of turbine stage 18 p3184 A69-34985

Gas turbine areas calculation of through flow cross sections for temperature deformations and blades elongation 18 p3184 A69-34987

Steady state thermal problem of gas turbine hyperbolic profile disk equipped with bandaged blades, solving thermal balance equations 18 p3184 A69-34992

Co base alloy for gas turbines, discussing microstructure, creep, oxidation resistance and hot corrosion properties 18 p3158 A69-35421

Soviet monograph on turbines and jet nozzles for two phase flows covering gas-particle velocity and temperature differences, turbine design, etc 20 p3586 A69-38209

Monograph on control dynamics of gas turbines with adjustable guide vanes, using methods of control theory and applied mathematics 21 p3784 A69-38449

Film vaporizing gas turbine combustor design including performance tests and combustion physics 21 p3784 A69-38607

Cooling air from blades discharged into flow-through part of gas turbine, examining gas mixing with air from blade and effect on turbine efficiency 21 p3785 A69-39090

Natural convective heat transfer to gas turbine rotor blade and thermal resistance of cooling system using centrifugal pump 21 p3785 A69-39103

Holography applied to stress and vibration analysis of gas turbine blades, disks and small components 22 p4040 A69-39960

Computerized design of potassium vapor turbine with supersaturation effects compared with equilibrium flow turbine design 23 p4187 A69-42251

GAS VALVES

Two way pyrotechnic high pressure gas valve for D2 satellite, noting resistance to leakage due to nearly monolithic construction 10 p1635 A69-23033

Controllable sonic flow orifice, discussing mass flow rate, area and upstream stagnation pressure 10 p1693 A69-23343

Protective filter for inspiration valve of oxygen masks in high performance aircraft, reducing respiratory volume exchange with given pressure amplitude 17 p2916 A69-33773

Valving concepts and functional approaches for inert gas attitude control thruster systems providing redundancy safeguards at minimum weight, volume and power costs [AIAA PAPER 69-843] 21 p3786 A69-39373

GAS VISCOSITY

Vertical propagation of acoustic waves in atmosphere without gravitational waves and with height varying atmospheric shear viscosity 02 p0274 A69-11440

Axissymmetric hypersonic flow of model gas over slender bodies with strong viscous interaction and shock wave extended to power law viscosity variation 05 p0744 A69-15720

Viscosity of compressed nonreacting gas mixtures at high temperatures, discussing conditions for accurate calculation 05 p0845 A69-15895

Law of corresponding states applied to temperature dependence of viscosity of rarefied gases 06 p0957 A69-16918

Magnetic field generation in nonuniformly rotating plasma by current density from electron drift relative to positive ion gases due to viscous forces 06 p1009 A69-17966

Viscosity coefficients approximation for chemical compositions in chromosphere and coronal gas 09 p1602 A69-22217

Stability of slow combustion in viscous gas mixture, showing viscosity as principal stabilizing factor 11 p1999 A69-24554

Hydrogen viscosity temperature dependence at constant density below room temperature 11 p2003 A69-25704

Simple fluids viscosity dependence on density analyzed by molecular theory, exemplifying with liquid argon 13 p2299 A69-28036

Gas visco seals performance analyzed for continuum flow regime, noting coefficient agreement with laminar flow analysis [ASLE FICFS PREPRINT 34] 15 p2621 A69-30494

Viscosity, thermal conductivity and diffusion predicted for dilute nonpolar, polar and mixed gases, discussing methods for rotational relaxation collision numbers and resonant correction 21 p3850 A69-38951

GAS WELDING

NT BRAZING

NT LOW TEMPERATURE BRAZING

Narrow gap gas metal arc welding process in spray transfer range for narrow welds in thick plates, discussing equipment and applications 11 p1891 A69-24930

Rare earths additives effects on arc instability and weld puddle fluidity of stainless steel bare wire electrodes 12 p2103 A69-26623

GASEOUS CAVITATION

U CAVITATION FLOW

U GAS FLOW

GASEOUS DIFFUSION

Diffusional, thermal diffusional and thermal fluxes in multicomponent flames, discussing flame structure and reaction kinetics 01 p0175 A69-10144

Boron diffusion in silicon, using nitrogen carrier and boron trichloride diffusant at high temperature for determination of critical oxygen flow rate 02 p0297 A69-11994

Chemical reaction scheme effect on hot zone structure of hydrogen-oxygen diffusion flame, considering influence of hydroxyl radical 03 p0531 A69-12895

Ultrasonic sounding for controlling dispersed gas phase in liquid pipelines under laboratory and practical conditions 04 p0596 A69-14489

Mathematical analysis of oxygen diffusion to coal grains during coal dust combustion, evaluating kinetic constants by burning time 04 p0687 A69-15167

Porous gas diffusion electrodes design for electrochemical energy converters, noting contribution of theory of electrode kinetics 04 p0551 A69-15309

Hemoglobin diffusion influence on oxygen uptake and release by red cells solved by calculus of finite differences 05 p0707 A69-15677

Diffusion and thermal diffusion in mixture of Maxwellian gases, analyzing Onsager reciprocity relations 05 p0849 A69-16461

Tantalum diffusion layer on refractory cobalt and nickel base alloys analyzed by electron microprobe [ONERA-TP-665] 06 p0941 A69-17097

Oxygen diffusion parameters in beta-titanium measured by successive layer removal, noting lattice constant dependence on temperature 07 p1163 A69-18783

Ellipsoidal gas bubble dissolution in low viscosity fluid, discussing rate of steady motion, deformation degree and diffusion rate 07 p1120 A69-18990

Kinetic theory development of equations for multicomponent gaseous mixtures symmetric diffusion coefficients 07 p1186 A69-19395

Electrochemical characteristics of lateral diffusion gas electrodes for fuel cells, noting electrodes fabrication by pulverizing on nickel sheet 08 p1260 A69-21044

Fuel cell system using double skeleton catalyst gas diffusion electrodes, discussing design, mode of operation and performance 08 p1261 A69-21047

Deuterium escape in Venus upper atmosphere to explain anomalous Lyman-alpha glow observed by Mariner 5 [SRCC-91] 09 p1594 A69-21696

Rarefied gases back diffusion between parallel plates used for studying diffusion in capillaries, deriving volume flow equation valid for any density 10 p1677 A69-22903

Annealing effects on titanium oxidation kinetics, indicating no relation between oxide formation and diffusion anisotropy of oxygen 12 p2112 A69-26039

Ammonia gas diffusion from line source in turbulent boundary layer, discussing concentration profile discrepancy due to eddy diffusivity and plume shear 13 p2250 A69-28343

Diffusion equation unsteady solution for flasks of equal volumes connected by capillary, considering end effect and transient processes 13 p2251 A69-28561

Ionic diffusion in topside ionosphere analyzed using multiple gas mixture diffusion formula, noting Coulomb ionic collision role 14 p2441 A69-29381

Inert gas diffusion of Xe 133 in aluminum and titanium at various temperature ranges, showing effects of recrystallization, plastic deformation and phase transformations 16 p2800 A69-31775

Airstream parameters /temperature and velocity/ of turbulence intensity in jet core at tube exit and behind grids measured by He diffusion method 16 p2771 A69-31959

Turbulent heat and mass diffusion in catalytic reactors for hydrazine decomposition, developing computer program to calculate temperature and reactant concentration distributions [AIAA PAPER 69-421] 16 p2846 A69-32768

Gaseous diffusion coefficients during argon, krypton, oxygen and nitrogen diffusion into helium measured by gas chromatography 18 p3099 A69-34280

Diffusion processes during formation of coatings by condensation 20 p3549 A69-37365

Diffusion processes, composition and structure of vapor deposited Ni coatings on Nb substrate, plotting intermetallic compounds growth against temperature 20 p3560 A69-37366

Physical state changes, chemical reactions, gaseous diffusion in solids and solid-gas interactions in vacuum, considering saturated vapor pressure, condensation, evaporation, etc 20 p3576 A69-37408

Viscosity, thermal conductivity and diffusion predicted for dilute nonpolar, polar and mixed gases, discussing methods for rotational relaxation collision numbers and resonant correction 21 p3850 A69-38951

Turbulent Schmidt number as function of ratio between turbulent and molecular kinematic viscosities for He, carbon dioxide and normal octane eddy diffusivities 21 p3852 A69-39432

Diffusion in biological systems by random walks with emphasis on gaseous diffusion in lung, noting probabilistic tree model 22 p3885 A69-40978

Hydrogen permeability in Pd alpha phase measured, coupling with grain size measurements for grain boundary to bulk diffusivity ratio 23 p4175 A69-41502

Transport coefficients in neutral gases, discussing fundamental relations of parameters in viscosity, thermal conductivity and self, pressure and thermal diffusion

23 p4193 A69-41514

Mass diffusion and heterogeneities in compression chamber gas mixture in shock tube ascribable to pressure and temperature gradients

23 p4146 A69-41547

Steady state and time dependent concentration gradients in and around cells due to oxygen diffusion and depletion in radiobiology

23 p4090 A69-41966

Oxygen steady state transfer across thin layers of centrifuged erythrocytes at 37 degrees C before and after hemoglobin saturation with CO

23 p4093 A69-42064

GASEOUS FISSION REACTORS

Cavity reactor consisting of dilute fuel core surrounded by moderating reflector to attain very high temperatures in gaseous cores

07 p1179 A69-18954

Gaseous reactor fluid mechanics for nuclear rocket engines, discussing experiments on geometries used in open cycle engine for acceptable uranium loss rate [AIAA PAPER 69-477]

16 p2811 A69-32728

Plasma-dynamic forces used to suppress fuel-propellant interface turbulence in coaxial jet gas core reactors

24 p3439 A69-43679

GASEOUS ROCKET PROPELLANTS

High thrust fluorine engines and propellants

03 p0494 A69-12889

Thermal-chemical rocket based on thermal heating by energy input from nuclear fission process

03 p0496 A69-13666

Initiation of HF combustion oscillation in premixed gas rocket

[ISAS-430] 06 p1029 A69-17025

Sustained combustion initiation in subatmospheric gaseous fuel-oxidant mixtures by UV radiation at room temperature, measuring parameters as function of mixture pressure

[AIAA PAPER 69-88] 06 p0983 A69-18118

Rocket propulsion with gaseous bipropellant systems and attitude control

08 p1376 A69-20870

Gaseous reactor fluid mechanics for nuclear rocket engines, discussing experiments on geometries used in open cycle engine for acceptable uranium loss rate [AIAA PAPER 69-477]

16 p2811 A69-32728

GASES

NT ARGON
NT ARGON ISOTOPES
NT COLD GAS
NT COSMIC GASES
NT DIATOMIC GASES
NT EXHAUST GASES
NT FLAMMABLE GASES
NT GAS DISSOCIATION
NT GAS MIXTURES
NT GAS STREAMS
NT GRAY GAS
NT HELIUM
NT HELIUM ATOMS
NT HELIUM ISOTOPES
NT HIGH TEMPERATURE AIR
NT HIGH TEMPERATURE GASES
NT HYDROGEN
NT HYDROGEN PLASMA
NT IDEAL GAS
NT INTERPLANETARY GAS
NT INTERSTELLAR GAS
NT IONIZED GASES
NT LIQUEFIED GASES
NT LIQUID AMMONIA
NT LIQUID HELIUM
NT LIQUID HYDROGEN
NT LIQUID NITROGEN
NT LIQUID OXYGEN

NT NONPOLAR GASES
NT POLAR GASES
NT POLYATOMIC GASES
NT RADON
NT RARE GASES
NT RAREFIED GASES
NT REAL GASES
NT RESIDUAL GAS
NT SOLIDIFIED GASES
NT XENON

Characteristic waves in gas-dielectric beamguides, calculating attenuation dependence on frequency

05 p0736 A69-16783

Thermal radiation properties of gases in thermodynamic equilibrium, discussing radiation resulting from electronic, atomic and molecular state transitions

11 p1998 A69-24460

Thermal conductivity relationship to heat transport coefficients for gases and liquids with charged or uncharged particles

23 p4237 A69-41324

GASKETS

Corrosion problems associated with electromagnetic shielding gaskets noting galvanic corrosion, corrosion prevention and insulation of gasket from mating surface

05 p0779 A69-15979

EMI-RFI knitted wire mesh gasket for corrosion prevention, noting use of moisture tight seal

09 p1523 A69-21895

GASTROINTESTINAL SYSTEM

NT INTESTINES
NT RECTUM
NT STOMACH

Space biomedical research trends, noting gastroenterology and lack of research on disease processes during space travel and overemphasis on space physiology

03 p0369 A69-12859

Transverse accelerations effect on dogs gastrointestinal tract secretory activity, noting central nervous system role

10 p1645 A69-23498

Gastric perfusion rate in restrained animals determined by Rb 86 clearance technique

17 p2908 A69-33170

Positive effect of shielding and cystamin administration on tonic and evacuator functions of rats gastrointestinal tract after gamma irradiation

22 p3877 A69-40285

EEG, ocular movements, gastric mobility and pH during human sleep from data transmitted by swallowed radio transmitter

23 p4093 A69-42063

Food-born diseases prevention in civil aviation, reporting gastroenteritis cases during flight

24 p4278 A69-43392

GATES [CIRCUITS]

NT THRESHOLD GATES

Gate current measurement of p-n junction during ultralow current operation of junction field effect transistor (JFET)

01 p0038 A69-10122

Space charge limited operation of insulated gate field effect transistors, discussing maximum transconductance and minimum parasitic capacitances

01 p0042 A69-10322

Universal NOR element design with resistors, determining permissible combinations for static mode of operation by computer method

01 p0037 A69-10746

Silicon nitride gate insulator in metal-insulator-silicon (MIS) devices, noting sandwich structures with thermally grown oxides removes limitations

02 p0299 A69-12244

Insulated gate tetrode with high drain breakdown potential and low Miller feedback capacitance, noting V-I characteristics

05 p0733 A69-16556

Junction gate field effect transistor design covering geometries and impurity profiles

06 p0893 A69-17197

Common source and common gate FET connections showing equivalent noise figures

13 p2227 A69-27237

Tunnel diode slideback sampling gate circuits, discussing response characteristics and operational specifications

13 p2236 A69-28538

Charge flow injection into MOS substrate attributed to gate pulses, correlating charge magnitude with pulse frequency

15 p2573 A69-30033

Linear high resolution gate function in blocking out analog signals or reproducing signal amplitudes at output, noting semiconductor elements utilization

15 p2581 A69-31523

Absolute value type of early-late gate bit synchronizer phase noise performance determined by Fokker-Planck method, comparing results with different circuits performance

19 p3270 A69-36246

PCM bit synchronizer models, discussing phase errors gate and differentiating devices

19 p3271 A69-36249

Current mode gates and flip-flops with subnanosecond propagation delay for integrated logic circuits, discussing memories dimensions, LSI arrays, etc

20 p3505 A69-37342

GAUGE INVARIANCE

Total energy-momentum interaction of system with mass defect in Wheeler-Feynman theory of electromagnetic interaction, demonstrating existence of gauge invariance

11 p1915 A69-24326

GAUSS EQUATION

Einstein equations solution in Gaussian coordinates describing particles gravitational fields including point particles

07 p1180 A69-18507

Discrete predicting filter optimal synthesis in terms of rms error by solving normal Gaussian equations

09 p1473 A69-21858

GAUSS-MARKOV THEOREM

Digital computer simulation of multidimensional stationary or nonstationary Gauss-Markov random processes with specified autocorrelation function, discussing time step choice

12 p2122 A69-26523

GAUSSIAN DISTRIBUTIONS

U NORMAL DENSITY FUNCTIONS

GAUSSIAN NOISE

U RANDOM NOISE

GAUSSMETERS

U MAGNETOMETERS

GAUZE

Two dimensional flow through nonuniform gauze by computerized analysis based on linearized theory

13 p2248 A69-28174

GC-130 AIRCRAFT

U C-130 AIRCRAFT

GCR [REACTORS]

U GAS COOLED REACTORS

GEAR TEETH

Failure causes for planetary reduction gear tooth for adjustment of radio telescopic antennas, studying fracture characteristics, working conditions and loading moments

08 p1321 A69-20853

Fatigue strength of highly loaded gears and stress measurements by strain gauges

[AHS PAPER 371] 17 p3060 A69-33517

GEARS

Differential gearing of aileron movements to reduce control forces in aircraft

03 p0367 A69-13786

Miniature ball and jewel bearings and gear lubrication in ultrahigh vacuum tests for space environment operation

[IME PAPER 6] 07 p1138 A69-18562

Three dimensional reinforcement composites for gear and bearing applications with improved interlaminar shear strength, thermal and wear properties

08 p1340 A69-20509

Fatigue strength of gears with integrally forged, cut and ground teeth, discussing pancake forgings

[SAE PAPER 680632] 08 p1321 A69-20732

Axial vibration effects on frictional losses in gear systems under dry friction or boundary lubrication conditions

[ASME PAPER 69-VIBR-15] 10 p1701 A69-24169

Heat treatable low alloy steels weldability for lightweight ultrahigh strength pressure vessels, gear and shaft fabrication in aerospace applications

12 p2100 A69-25827

Nondeformable closed contour spatial gear kinematics using matrix tensor method suitable for computer programming

15 p2713 A69-31020

Polyphenyl ether lubricants and self lubricating materials compared for antifriction ball bearings in thrust reversing actuator gear box

[SAWE PAPER 68-LC-1] 18 p3148 A69-35003

Controllable process for forming Ti-Ni intermetallic wear resistant coating on Ti alloys, discussing techniques, weight saving advantage, gear tests, etc

19 p3323 A69-35582

Dynamic stability of dual wheel gears for aircraft applications, discussing shimmy, tire characteristics, velocity effects, etc

[AIAA PAPER 69-769] 19 p3245 A69-35654

Minimum radius of three dimensional cam gears calculated from driven element motion and pressure angle

23 p4168 A69-41413

GEGENSCHEIN

Gegenschein measurements for determining upper limit on asteroidal debris spatial density

02 p0324 A69-12545

GEIGER COUNTERS

Photographic investigation of gegenschein and cloud satellites at L sub 5 earth-moon libration point, noting gegenschein intensity peak
07 p1212 A69-18602

GEIGER COUNTERS

Geiger-Muller counter telescopes in conjunction with core selectors for studying geomagnetic effect of extensive air showers
03 p0430 A69-13303

Auroral electron flux from particle fluxes measured with shielded Geiger-Muller telescopes mounted in rocket launched into diffuse aurora
09 p1576 A69-21663

Saturated signals of GM counter from solar radiation monitoring satellite, showing Van Allen belt high energy particle origin
14 p2514 A69-29383

GEIGER-MUELLER TUBES

U GEIGER COUNTERS

GELLED ROCKET PROPELLANTS

Slush H and N gels preparation and characteristics, including measurements of weight bearing capacity of gel as function of percent mass silica gelant
22 p3998 A69-40632

GELS

NT DOUBLE BASE ROCKET PROPELLANTS

Dispersion in gel permeation chromatograph, noting contributions of injection and detection systems to peak broadening and retention time
04 p0555 A69-14884

Gel permeation chromatography of nominally linear aliphatic polyesters, using tetrahydrofuran solvent at 37 degrees C
21 p3670 A69-39806

GEMINI FLIGHTS

Earth orbital satellites for geologic applications, discussing Gemini photograph qualities and influence on Earth Resources Observational Satellite program [UN PAPER 68-95441]
01 p0065 A69-10509

Weightlessness effects on fertilized frog egg development on board Gemini 8 and 12 manned orbital flights, discussing cell division, differentiation and embryogenesis
01 p0017 A69-11084

Space photography for natural resource inventory, describing Gemini photographs role in assessing vegetation, geological, metal and soil resources in Western Hemisphere
12 p2097 A69-26987

Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept [AIAA-PAPER-69-366]
13 p2213 A69-28298

Micrometeoroid collections, describing Gemini satellite and Aerobee rocket-borne equipment and experimental results
15 p2700 A69-31440

Pre and postflight leukocyte chromosome aberration analyses of Gemini astronauts
17 p2908 A69-33173

Spacecraft pitch and yaw angles measurement using environmental positive ion probes, discussing Gemini flight tests and attitude control systems
24 p4315 A69-43241

GEMINI PROJECT

Satellite photography applications to geography and cartography based on Gemini 7 photographs [UN PAPER 68-95401]
01 p0178 A69-10489

Stellar UV objective prism spectra from Gemini 11 and 12 manned flights
01 p0153 A69-10870

Gemini and Mercury space flights medical results, summarizing physiological effects noted on body systems
01 p0017 A69-11074

Terrestrial microorganism survival in space aboard Gemini satellite, discussing lethal effects of solar radiation
01 p0018 A69-11087

Systems engineering activities in manned space flight involving design, development, manufacture, test and operation of Mercury, Gemini and Apollo flight systems
06 p1016 A69-17602

Gemini program for geologic orbital photography, discussing equipment used
18 p3131 A69-35274

GEMINI SPACECRAFT

Guidance and control concepts and hardware for atmospheric entry of Mercury, Gemini and Apollo spacecraft
11 p1914 A69-25724

Manned spacecraft fuel cell selection and design, discussing Gemini ion exchange membrane and Apollo Bacon cell systems
16 p2737 A69-32406

Hyperaltitude photographs from Gemini spacecraft for geological mapping
18 p3132 A69-35276

Hyperaltitude photographs for geological mapping from Gemini spacecraft, noting remote sensing imagery
22 p3935 A69-40040

GEMINI 11 FLIGHT

Radiation effects on microorganisms and plants during space flight on Biosatellite 2 and Gemini 11 missions
20 p3476 A69-37617

Primary cosmic ray nuclei studies during Gemini 2 flight by nuclear emulsion detector with time resolution capability, describing experiment design and equipment operation
21 p3787 A69-38350

GENERAL AVIATION AIRCRAFT

Listen-in feature, allowing general aviation aircraft equipment to receive airborne SSR reply signals, provides air to air proximity warning
03 p0464 A69-13247

Business jet aircraft use for air transport pilot training instead of simulating devices, noting pilot cabins
03 p0366 A69-13643

Aeronautics - Conference, Beverly Hills, September 1968
06 p0866 A69-17658

General aviation flight testing philosophy and origin
06 p1043 A69-17667

LR-1 prototype design criteria and flight testing, discussing Model 99 airliners for commuter airlines
06 p0867 A69-17668

Anti-icing system for business jets, noting activation prior to encountering visible moisture
06 p0868 A69-17669

Tilt wing executive transport aircraft designed by postgraduates at College of Aeronautics of UK, discussing costs, construction and marketability
11 p1821 A69-24321

Business aircraft injury protection and impact survival design considerations, stressing upper torso restraint installations [SAE PAPER 690335]
11 p1829 A69-24493

Onboard gas turbine auxiliary power units for executive jet transport aircraft [SAE PAPER 690332]
11 p1824 A69-24501

On-off multiple tank fuel systems for single and twin engine light aircraft, noting fail-safe design [SAE PAPER 690334]
11 p1825 A69-24502

Pressurized Navajo aircraft environmental system, discussing ventilation, pressurization, heating and air cooling systems [SAE PAPER 690330]
11 p1829 A69-24504

Thrust reversers for business jet aircraft, discussing federal aircraft regulation requirements for ground and in-flight qualification [SAE PAPER 690311]
11 p1941 A69-24512

Aviation pathology in aircraft accident investigation of accident survivability features and accident precipitation factors, noting cockpit structures and protective equipment
12 p2021 A69-25841

Low cost inertial measurement unit /IMU/ for commercial and private aircraft, evaluating components and system [SAE PAPER 690337]
15 p2606 A69-30092

Annual general aviation aircraft accident rate variation related to annual variations in pilot flight training activity
19 p3262 A69-36448

Cockpit noise intensity during normal cruising operations at various altitudes for 15 different single engine general aviation light aircraft
23 p4102 A69-41676

Annual general aviation accident rate prediction from annual flight training variations
23 p4062 A69-41793

GENERAL DYNAMICS AIRCRAFT

U CL-84 AIRCRAFT
U CV-990 AIRCRAFT
U F-106 AIRCRAFT
U F-111 AIRCRAFT

GENERAL DYNAMICS MILITARY AIRCRAFT

U MILITARY AIRCRAFT

GENERATORS

Synchronization of generators of finite dimensional forces, discussing mechanism of almost conservative dynamic objects on basis of influence matrix
05 p0793 A69-15779

Synchronization of generators of finite dimensional forces, discussing mechanism of almost conservative dynamic objects on basis of influence matrix
18 p3173 A69-35031

GENETICS

NT MUTATIONS

Cosmic radiation genetic, cytological and histological changes, particularly of pathological nature, on ecological systems employed in long duration Soviet manned flights
01 p0016 A69-10948

Genetic effects in yeast induced by heavy ion radiation, studying lethality, mitotic segregation, allelic recombination and reverse mutation
03 p0373 A69-13491

Circadian rhythm effect between individuals of separate twin pairs, noting application to physiological research in medical genetics and human biometeorology
04 p0553 A69-15152

Fatty acids in blue-green algae related to phylogenetic position
05 p0707 A69-15751

Insect gametes response to space flight and radiation in reduced gravity including plants and microorganisms
23 p4091 A69-42050

GENITOURINARY SYSTEM

U BLADDER

GEOASTROPHYSICS

U ASTROPHYSICS

U GEOPHYSICS

GEOCENTRIC COORDINATES

Rectangular space coordinates for points on earth determined from observations of directions and distances to and from satellites [UN PAPER 68-95265]
06 p0917 A69-17064

Geocentric orientation of quasi-geocentric coordinate network determined from simultaneous photographic satellite observations, using gravity force values
12 p2158 A69-26429

Computer method for solution of Banachiewicz graph analytic equivalent for parabolic orbits determination, noting geocentric distances variation
13 p2336 A69-27448

Spatial geodesy results from European data, discussing accuracy of geodetical European network and geocentric coordinate computation
15 p2601 A69-31369

Photographic observations of Neptune occultation of BD-17 degree 4388, Zodiac Catalog number 2232 in April 1968, noting geocentric separation and planet radius
23 p4221 A69-42388

GEOCHEMISTRY

Geochemistry and cosmology - Conference, Prague, August 1968
07 p1212 A69-18546

Avalanche detector radioisotope X ray fluorescence analyzer development for XRF analysis of potassium and calcium, noting precision [IEEE PAPER 3B-9]
07 p1135 A69-19201

Origin and distribution of elements - Conference, Paris, May 1967
08 p1398 A69-20892

Geochemistry and element abundances for Henbury impact glass, Darwin glass and australites, noting evidence for meteorite impact on sandstone
08 p1407 A69-20937

Trace element geochemistry of calc-alkaline andesites, discussing crustal composition models and trace elements distribution
08 p1309 A69-20940

Continental diabases and oceanic tholeiites in light of rare earth and barium abundances and partition coefficients indicating fusion process
08 p1310 A69-20945

Electron impact field ionization source for mass measurement of molecular ions, noting organic geochemistry applications
15 p2608 A69-30428

Gas chromatographic and mass spectrometric analyses of alicyclic hydrocarbons from Carboniferous organic materials, noting alkane distribution and evolutionary histories
17 p2917 A69-34184

Handbook on geochemistry, Volume 2/1, covering geophysics, cosmochemistry, etc
22 p3897 A69-40890

Handbook on geochemistry, Volume 1, covering meteorite composition, cosmic abundances, earth geophysical structure and composition, data evaluation, etc
22 p3897 A69-40980

- Geophysical aspects of earth chemical composition, structure and energy balance
22 p4032 A69-40983
- Geochemistry of tektites - Conference, Corning, New York, April 1969
23 p4209 A69-41340
- Geochemical synthesis of branched chain acyclic polymers from irradiated isoprene
24 p4269 A69-43750

GEOCHRONOLOGY

- Electronic charge variations with cosmic time determined from geochronological data
06 p1003 A69-17323
- Carbon dioxide pressure in earth atmosphere through geologic time determined by carbon input rate and transfer efficiency to crust
08 p1310 A69-20946
- Microstructure of Proterozoic nanofossils bracketed by dated granitic events compared with living Eucapsis of blue green Chroococcaceae algal family
22 p3936 A69-40059
- Paleogeographical evolution in support of earth expansion, discussing polar wandering, global continental drift and final complete disruption
22 p3936 A69-40181
- Precambrian crustal geotectonic evidence of earth radius expansion based on dated orogenic fold belts distribution
22 p3936 A69-40182

GEOCORONAL EMISSIONS

- Solar hydrogen Lyman alpha line profile measurement by rocket-borne spectrophotograph, obtaining flux available for scattering by atomic hydrogen in geocorona
05 p0815 A69-16254
- Solar Lyman alpha radiation scattering into antisolar geocorona, noting inaccessibility of region to solar wind
09 p1583 A69-22760
- Atomic hydrogen vertical profiles with increased high-low altitude ratio for interpreting observations of thermospheric and exospheric hydrogen abundance
14 p2440 A69-29130
- Solar wind and solar breeze theories distinguished, discussing applications to geocoronal hydrogen emission and solar corona expansion
15 p2676 A69-30858
- Geocoronal Lyman alpha short term and 27-day variations observed by OGO 4 spacecraft attributed to flux variability at solar emission line center
15 p2699 A69-31404
- Balmer alpha and Lyman beta intensities for multiple scattering calculated for hydrogen geocorona models by radiative transfer equations, discussing radiation transport through earth hydrogen atoms
18 p3128 A69-34943
- Hydrogen bulge above springtime pole indicated by Lyman alpha radiation in earth geocorona, discussing hydrogen horizontal transport and hydrogen compounds dissociation as causes
18 p3129 A69-34956

GEODESY

- Gravitational field and earth shape determination by calculating perturbing potential at earth surface and in outer space, using Green functions
01 p0063 A69-10360
- Earth oblateness, discussing geometric interpretation and direct measurement
01 p0064 A69-10447
- Earth surface shape determinations by geodetic networks connecting ground observation points and satellite positions
[UN PAPER 68-95377] 01 p0065 A69-10528
- Satellite geodetic literature in U.S.S.R., discussing space triangulation geometric method and dynamic method for earth parameters and gravitational field
01 p0067 A69-10951
- Equatorial geodesic motion of rotating source in gravitational field, using exact empty space solutions of Einstein equations
01 p0157 A69-11289
- Magnetotelluric method for investigating earth vertical structure with allowance for sphericity
02 p0240 A69-11699
- French geodetic work with aid of artificial satellites, describing equipment, mounting, observation technique and laser telemetry experiments
02 p0228 A69-11913
- International cooperation results in field of optical tracking of satellites for solving problems of atmospheric physics, geophysics and geodesy
06 p1042 A69-17050

- French program of space geodesy, discussing spatial triangulation, telemetry, dynamic geodesy, Diapason and Diademe experiments
[UN PAPER 68-95834] 06 p0917 A69-17071
- Anna 1-B geodetic satellite design, instruments and data acquisition
[UN PAPER 68-96195] 06 p0917 A69-17082
- Royal Belgian Observatory studies on time, meridian, seismological and gravimetric services, latitude variation due to polar motion, terrestrial tides and geodetic satellites
08 p1306 A69-19992
- Earth ellipsoid fundamental parameters for calculation of earth flattening and normal acceleration due to gravity
09 p1487 A69-21633
- Magnetotelluric method for investigating earth vertical structure with allowance for sphericity
13 p2258 A69-28730
- Artificial earth satellites positional observations by graphical smoothing on azimuth and altitude, discussing advantages for space geodesy
15 p2594 A69-30029
- Spacecraft radar altimetry with application to geodesy, discussing orbital and tracking errors
15 p2609 A69-30460
- Geometric conditions selection in directions determination in satellite and rocket aided triangulation, deriving formulas for chords directions of earth ellipsoid
15 p2689 A69-30572
- Classical and relativistic gravitation theories using harmonic coordinate system, interpreting Einstein equations for insular distribution of masses and applications in geodesy
15 p2596 A69-30573
- Laser measurements for DIADEME satellites tracking to reconstruct actual trajectory in semidynamic geodesy
15 p2600 A69-31365
- Spatial geodesy results from European data, discussing accuracy of geodetical European network and geocentric coordinate computation
15 p2601 A69-31369
- Doppler measurements in semidynamical geodesy, processing data from Transit satellites collected at various Mediterranean ground stations
15 p2602 A69-31382
- Earth figure parameters from satellite orbit dynamics, including potential on geoidal surface and scale factor for lengths
15 p2602 A69-31387
- Monograph on photogrammetry in satellite geodesy including photogrammetric measurement of satellite positions, German observation stations and work done in U.S., U.S.S.R. and France
16 p2790 A69-32202
- French space geodesy since Space Age, detailing Diapason and Diademe satellites program, techniques and results
17 p2961 A69-33382
- Figure of earth and refraction - Conference, Vienna, March 1967
18 p3131 A69-35194
- Earth ellipsoid determination by satellite observations, noting accuracy of polar flattening measurement on basis of perturbation or perigee argument
18 p3131 A69-35195
- Scale determination in spatial direction networks, using polygonal transverse measured along continental surfaces and Secor method over water surfaces
18 p3131 A69-35196
- Molodenskii boundary value problem exact solution by successive approximations for determination of earth figure, noting quasi-geoid surface
21 p3716 A69-39248
- Earth shape and areas of anomalous gravity from satellite orbital perturbations, tabulating results from various experimenters
21 p3718 A69-39734
- Observations indicating slow earth expansion
22 p4018 A69-40179
- Earth sphericity and earth-ionosphere waveguide effects on terrestrial atmospherics, deriving form by computer
23 p4157 A69-41860
- Geodetic and geophysical random uncertainties as fundamental limitations on terrestrial inertial navigation accuracy
[AIAA PAPER 68-847] 24 p4348 A69-43240

GEODETIC COORDINATES

- Earth pole coordinates calculated from latitude variations at Pulkovo, Greenwich and Washington, giving components of earth motion
03 p0420 A69-13094

- Coupling geodetic systems of coordinates linked to reference ellipsoids from determination of angle of inclination relative to earth rotation axis and equatorial plane
12 p2068 A69-26426
- Coupled geodetic triangular grids obtained using satellite observations for azimuths
12 p2069 A69-26433
- Earth pole coordinates calculated from latitude variations at Pulkovo, Greenwich and Washington, giving components of earth motion
14 p2433 A69-28776
- Satellite space navigation system providing three component position in geodetic coordinates instantly and accurately on or near earth
15 p2650 A69-30088
- Equations derived for radar image coordinate transition to geodetic coordinates in aerial surveying by side-looking airborne radar
15 p2596 A69-30574
- Comparisons and combinations of geodetic parameters from dynamic and geometric satellite solutions and Mariner flights
15 p2600 A69-31362
- Tesseral harmonics of geopotential and station coordinates based on combined Baker-Nunn, laser and range and rate satellite data
15 p2601 A69-31372
- Doppler geodetic measurements, emphasizing relative orientation between station and orbit influence on coordinates determination accuracy, presenting electromagnetic wave propagation theory
15 p2601 A69-31375
- Neglected gravity coefficients influence on computed satellite orbits and geodetic parameters
22 p4023 A69-40556

GEODETIC SATELLITES

- NT ANNA SATELLITES
NT GEOS 2 SATELLITE
- Earth orbital satellites for geologic applications, discussing Gemini photograph qualities and influence on Earth Resources Observational Satellite program
[UN PAPER 68-95441] 01 p0065 A69-10509
- Earth surveying methods by artificial satellites, discussing applications to undeveloped regions
[UN PAPER 68-95793] 01 p0065 A69-10523
- Diapason satellite geodetic results concerning measurement accuracy, terrestrial potential models and station synchronization
01 p0065 A69-10543
- Satellite geodetic literature in U.S.S.R., discussing space triangulation geometric method and dynamic method for earth parameters and gravitational field
01 p0067 A69-10951
- Earth resource information from spacecraft including landmapping, geological photographs, hydrological and oceanographic data, etc
06 p0916 A69-16855
- French geodetic satellites tracking operations, on-board equipment and ground stations
[UN PAPER 68-95835] 06 p1013 A69-17065
- GEOS 2 attitude stabilization by means of gravity gradient principle and passive energy dissipator, noting effects of orbit eccentricity, thermal distortion, radiation, etc
07 p1229 A69-18349
- Ballistics room of Royal Belgian Observatory for observation of geodetic satellites
08 p1272 A69-19993
- Photogrammetry for three dimensional geodesy, discussing satellite triangular methods, refraction anomalies, error corrections, etc
10 p1682 A69-23390
- Earth gravitational field representation by separating geopotential into normal and disturbing potential for solving geodetic boundary value problem for satellite geodesy
12 p2076 A69-27089
- First order Doppler shift in ionosphere and horizontal gradients influence, discussing total electron content determination method made from geodetic satellites using two coherent frequencies
16 p2755 A69-32614
- French space geodesy since Space Age, detailing Diapason and Diademe satellites program, techniques and results
17 p2961 A69-33382
- Geodetic satellite measurements employing curve fitting approach using least squares analysis to resolve atmospheric refraction and shimmer problem
18 p3104 A69-35202
- Australia spatial triangulation and trilateration using geometric satellite geodesy, including station position accuracy tests
18 p3132 A69-35499

Geodetic satellites transfer between low ellipticity orbits by microthrust
21 p3793 A69-38338

GEODETIC SURVEYS

Satellite triangulation simultaneous and trailing methods, discussing timing devices design
[UN PAPER 68-95285] 01 p0064 A69-10475

Earth surveying methods by artificial satellites, discussing applications to undeveloped regions
[UN PAPER 68-95793] 01 p0065 A69-10523

Earth surface shape determinations by geodetic networks connecting ground observation points and satellite positions
[UN PAPER 68-95377] 01 p0065 A69-10528

Economic and scientific reasons for using artificial satellites to establish continental geodetic network, noting continental displacements and terrestrial pole motion observations
[UN PAPER 68-07445] 06 p0917 A69-17069

Side looking radar for earth resources sensing, discussing geological and hydrographical mapping, oceanography, agricultural and biological phenomena
06 p0923 A69-17119

Survey of six year period of satellite observed tropical Pacific cloud mapping
17 p2996 A69-33001

Gemini program for geologic orbital photography, discussing equipment used
18 p3131 A69-35274

Hyperaltitude photographs from Gemini spacecraft for geological mapping
18 p3132 A69-35276

Errors in sighting and identifying geodetic contour points on aerial photographs, considering stereocomparators parallaxes effect
21 p3719 A69-38404

Satellite phase and aberration corrections in processing photographic observations for geodetic purposes
21 p3720 A69-38606

GEOELECTRICITY

NT TELLURIC CURRENTS

Geoelectric field over polar cap based on proton flux detection
04 p0648 A69-14682

Air-earth current density variations with universal time, noting hemispherical dependence of storm activity effects
10 p1682 A69-23415

GEOGRAPHY

NT OROGRAPHY

Satellite photography applications to geography and cartography based on Gemini 7 photographs
[UN PAPER 68-95401] 01 p0178 A69-10489

Aerial chronophotography of Southern Hemisphere conducted on around world polar flight analyzed for meteorological and geographical aspects and compared with satellite data
09 p1534 A69-21405

GEIDS

Earth oblateness, discussing geometric interpretation and direct measurement
01 p0064 A69-10447

Mass functions of real earth derived from satellite orbital perturbations
[UN PAPER 68-95385] 01 p0064 A69-10460

Boundary value problem solved for free air geoid, developing expressions for height anomaly from free air anomalies
07 p1129 A69-19396

Earth ellipsoid fundamental parameters for calculation of earth flattening and normal acceleration due to gravity
09 p1487 A69-21633

Earth figure parameters from satellite orbit dynamics, including potential on geoidal surface and scale factor for lengths
15 p2602 A69-31387

Moldenskii boundary value problem exact solution by successive approximations for determination of earth figure, noting quasi-geoid surface
21 p3716 A69-39248

Conjugate points along lightlike geodesics in general theory of relativity, deriving existence from vector field matrix properties and Ricci curvature
23 p4213 A69-41724

GEOLOGICAL FAULTS

Velocity distribution in lower mantle, showing second major discontinuity in P wave travel time curve at 24 degrees
07 p1129 A69-19502

Volcano-Tectonic origin of lunar mare terrain from Apollo 8 photograph showing faulting pattern identical with uppermost Pleistocene-Holocene faulting
20 p3604 A69-37570

GEOLOGY

NT GEOCHRONOLOGY

NT GEOMORPHOLOGY

NT GLACIOLOGY

NT LITHOLOGY

NT LUNAR GEOLOGY

NT OROGRAPHY

NT PETROGRAPHY

NT PETROLOGY

NT PHOTOGEOLOGY

NT TECTONICS

NT VOLCANOLOGY

Earth orbital satellites for geologic applications, discussing Gemini photograph qualities and influence on Earth Resources Observational Satellite program
[UN PAPER 68-95441] 01 p0065 A69-10509

X Ray fluorescence of rock samples as applied to geological problems, noting standard deviations for element distribution
01 p0082 A69-10890

Space systems use for planetary geology and geophysics - Conference, Boston, May 1967
03 p0509 A69-13390

Space photography to provide synoptic sedimentary environmental data analysis, discussing orbital sensing advantages
05 p0753 A69-15993

Origin of life in terms of polymers synthesis under thermodynamic and geological conditions
12 p2017 A69-25764

Passive remote sensing at microwave frequencies for meteorology, oceanography and geology, reviewing physics of wave interactions, mathematics of data interpretation, etc
14 p2414 A69-29514

Geological radar in regional and detail studies, discussing area side scanning imagery and lithology changes detection
20 p3491 A69-37652

Atmospheric and hydrospheric evolution on primitive earth from geological point of view
21 p3806 A69-39290

Hyperaltitude photographs for geological mapping from Gemini spacecraft, noting remote sensing imagery
22 p3935 A69-40040

Paleontological evidence to verify varying G constant hypothesis for expanding earth theory, discussing uncertainties of geological dating
22 p4017 A69-40177

Multispectral processing of Apollo 6 earth photograph, evaluating geologic, vegetative and cultural features from red, green and blue portions of visible spectrum
22 p3941 A69-40987

Bulk, selective particulate and hard rock samplers for landed extraterrestrial geological and biological instruments performing on-site analysis
23 p4146 A69-41620

GEOMAGNETIC ANOMALIES

U MAGNETIC ANOMALIES

GEOMAGNETIC CROTCHETS

U SUDDEN IONOSPHERIC DISTURBANCES

GEOMAGNETIC EFFECTS

U MAGNETIC EFFECTS

GEOMAGNETIC EQUATOR

U MAGNETIC EQUATOR

GEOMAGNETIC FIELD

U GEOMAGNETISM

GEOMAGNETIC HOLLOW

Statistical method for calculating upper bound heights of sources responsible for magnetic anomalies
12 p2071 A69-26696

GEOMAGNETIC LATITUDE

Differential Faraday technique to determine electron content latitude dependence in Northern Hemisphere during magnetically disturbed periods in March 1966
01 p0146 A69-11128

Earth pole coordinates calculated from latitude variations at Pulkovo, Greenwich and Washington, giving components of earth motion
03 p0420 A69-13094

Latitude variation of time of occurrence of maximum F height and maximum spread F probability
03 p0420 A69-13305

F 2 layer critical frequencies variation coefficients, analyzing variation and root-mean-square deviations in terms of geomagnetic latitude and Wolf number
03 p0422 A69-13514

F 2 layer equatorial anomaly at local noon, discussing position of trough center in latitudinal distribution of ionization
03 p0422 A69-13515

Diurnal variations of low latitude VLF emissions observed at Hiraiso, Japan
03 p0398 A69-13900

Latitude dependence of 6300 A / O II twilight airglow enhancement attributable to conjugate photoelectrons
05 p0756 A69-16280

Low energy photon spectrum at balloon altitudes, noting small geomagnetic latitude dependence
06 p0992 A69-17313

Pc5 geomagnetic pulsations spatial characteristics, showing localized excitation in space and dependence on geomagnetic latitude
06 p0921 A69-17736

Statistical frequency analysis of power spectrum of geomagnetic pulsations, discussing time and latitude dependence
07 p1122 A69-18297

Time and latitude variations of blanketing sporadic E using wind shear theory, predicting ionization layer formation in ionospheric E layer
07 p1125 A69-18840

Average geomagnetic storm ranges as function of latitude, noting disturbances caused by ring and ionospheric currents
09 p1489 A69-21715

Microstructure of pc 3 and pc 4 geomagnetic pulsations, investigating polarization direction, period duration and latitude dependence
12 p2063 A69-25782

Earth pole coordinates calculated from latitude variations at Pulkovo, Greenwich and Washington, giving components of earth motion
14 p2433 A69-28776

Aurora electron and proton excitation patterns determined spectroscopically, discussing ground based observations of emission geomagnetic latitude-time distribution
15 p2593 A69-30017

Geomagnetic field latitudinal variation effect on cut-off frequencies of proton whistlers, discussing LF electromagnetic wave propagation in cold multicomponent plasma
18 p3100 A69-34253

Electron density distribution in northern and southern polar regions ionosphere based on 1958 and 1959 observations at high geomagnetic relatively low geographic latitudes
20 p3526 A69-37664

F 2 layer midlatitude positive disturbances observed during IGY on quiet and disturbed days, noting positive to negative transition latitudes
20 p3527 A69-37674

Explorer 32 atmospheric density measurements revealing neutral thermosphere latitudinal variations during geomagnetically undisturbed times
20 p3535 A69-38100

Critical frequency variations of F 2 layer and M/3000F 2 with sunspot number for 19th solar cycle, noting dependence on geomagnetic latitude
21 p3715 A69-38560

Latitude variation of radio satellite scintillation related to small scale ionospheric irregularities
22 p3899 A69-39972

Pulsating aurora diurnal variations and dependence on latitude and magnetic activity, photometric observations
24 p4308 A69-43004

GEOMAGNETIC MICROPULSATIONS

Quasi-periodic VLF emissions associated with geomagnetic micropulsation activity in terms of comparable periodicity
01 p0063 A69-10274

Micropulsations at magnetoconjugate points in Arctic and Antarctic, noting diurnal and seasonal variations and latitude dependence
01 p0068 A69-11112

Magnetospheric plasma distribution determination based on analysis of structured elements in micropulsations
01 p0076 A69-11229

Relation between solar activity and cyclic variation of pearl pulsations excitation frequency during sunspot cycle
02 p0239 A69-11696

Dispersion measurements and spectrum variations analysis to study pearl micropulsations frequency variation during sudden deformation of magnetosphere by magnetic storms
02 p0240 A69-11697

Subsolar magnetosphere dimensions from ground observations of geomagnetic micropulsation period changes during magnetosphere deformations caused by solar wind inhomogeneities

02 p0244 A69-12356

Geomagnetic micropulsations mechanism, discussing hydromagnetic waves transmission generated by interface instability between solar wind and magnetosphere, noting transmission path role

02 p0244 A69-12395

Geomagnetic micropulsation theory, discussing mechanisms responsible for amplitude spectrum at earth surface and power spectral density

02 p0244 A69-12396

Pc 1 micropulsation and magnetospheric amplification of hydromagnetic waves

05 p0754 A69-16263

Earth electromagnetic field micropulsations associated with proton flare, evaluating data from polar caps, auroral zones and midlatitudes

06 p0996 A69-17754

Nighttime equatorial Pi 2 micropulsations, noting seasonal and diurnal distributions and dependence on three hour index of magnetic activity

07 p1125 A69-18841

Ground propagation of regular Pc 1 and irregular Pi 1 geomagnetic micropulsations demonstrated by precise time measurement

07 p1127 A69-19338

Geomagnetic field irregular pulsations relationship with polar aurora and ULF radiation pulsations, stressing choruses appearance

09 p1485 A69-21536

Earth currents and magnetic field variations recording in period range 10-200 sec, computing power density spectra on analog computer

10 p1682 A69-23593

F 2 layer drift relation to current systems of dynamo region confirmed at middle and high latitudes

10 p1682 A69-23611

Earth electromagnetic micropulsations in connection with July 7 1966 proton flare, discussing peculiarities in occurrence of pearls before and after flare

10 p1683 A69-23779

Geomagnetic micropulsations fluctuations during solar activity cycle showing changes in excitation frequency with change in corpuscular fluxes parameters

10 p1687 A69-23919

Microstructure of pc 3 and pc 4 geomagnetic pulsations, investigating polarization direction, period duration and latitude dependence

12 p2063 A69-25782

Pi 2 micropulsations at African low latitude stations, considering damping effect on ionospheric micropulsation transmission signal dispersion and SNR

12 p2074 A69-26959

Relation between solar activity and cyclic variation of polar pulsations excitation frequency during sunspot cycle

13 p2258 A69-28727

Dispersion measurements and spectrum variations analysis to study pearl micropulsations frequency variation during sudden deformation of magnetosphere by magnetic storms

13 p2258 A69-28728

Oscillations intervals with diminishing period observed during magnetic storms, noting relationship to midlatitude disturbances in F region

14 p2436 A69-29060

Pc 2-4 geomagnetic pulsations abrupt disappearance on global scale ascribed to magnetosphere boundary stabilization, noting interplanetary magnetic field role

14 p2438 A69-29080

Daytime ionospheric screening effect on low latitude geomagnetic micropulsations estimated using ionosphere model

14 p2441 A69-29380

CNA and geomagnetic pulsations observed by ground based instruments in southern auroral region occurring near geomagnetic noon, noting electron precipitation role

15 p2597 A69-30697

Micropulsation records for full moon effect on hydromagnetic emission activity of magnetosphere, noting W and Kp indices

16 p2774 A69-31979

Geomagnetic field irregular pulsations relationship with polar aurora and ULF radiation pulsations, stressing choruses appearance

16 p2783 A69-32531

Relationship between micropulsation periods and size of magnetosphere expressed in power law form and interpreted with wave propagation

18 p3131 A69-35193

Plasma density in magnetosphere by measuring geomagnetic pi 2 micropulsations in direction related to polar aurora oval southern boundary, determining period of pi 2 oscillations

19 p3303 A69-36205

Geomagnetic field micropulsation observations by U.S.S.R. and possible applications to diagnostics of magnetosphere

19 p3304 A69-36642

Doppler observations of ionospheric motions associated with magnetic micropulsations, noting hydromagnetic and neutral gas waves

20 p3535 A69-38194

Pearl type geomagnetic micropulsation development by studying Alfvén waves cyclotron instability in plasma with hot protons anisotropic distribution

23 p4206 A69-41850

Concurrent geomagnetic micropulsations at equatorial and high latitude stations, discussing magnetospheric sources of Pi and Pc types

23 p4161 A69-42439

Pi 2 micropulsation waveform variation with time from simultaneous observations at low latitude stations, estimating phase velocity of higher frequency component

23 p4161 A69-42440

Diurnal variation of Pc type geomagnetic pulsations correlation with F 2 layers critical frequency diurnal variations

23 p4161 A69-42441

GEOMAGNETIC PULSATIONS

Geomagnetic response asymmetry related to solar direction of polarity in interplanetary magnetic field

01 p0077 A69-11236

Hydromagnetic emissions observed at Antarctic auroral zone, discussing relation to sudden storm commencement

02 p0241 A69-11726

Large amplitude Pc 1 events at College, Alaska, noting more ionospheric cosmic noise absorption accompanying large events

02 p0244 A69-12397

Geomagnetic field topology of nighttime magnetosphere, showing pi 2 pulsations excitation mechanism in terms of Alfvén waves resonance in external cavity

03 p0423 A69-13524

Frequency time displays of geomagnetic pulsations at Kiruna revealing Pc 1 pulsations accompanied by cosmic noise absorption /CNA/ and X ray enhancements

03 p0425 A69-14024

Pc5 geomagnetic pulsations spatial characteristics, showing localized excitation in space and dependence on geomagnetic latitude

06 p0921 A69-17736

Resonance in fundamental harmonic identified with Pc4 and in second harmonic with Pc3 geomagnetic pulsations

06 p0921 A69-17737

Statistical frequency analysis of power spectrum of geomagnetic pulsations, discussing time and latitude dependence

07 p1122 A69-18297

Lunar daily geomagnetic periodicities by periodogram or spectral analysis, comparing amplitudes obtained by spectral analysis to those by harmonic analysis

07 p1123 A69-18817

Transverse LF oscillations in geomagnetic field observed during January 1967, noting possibility of being second harmonic of magnetospheric standing Alfvén waves

07 p1124 A69-18835

Particle dynamics measured by ATS satellite synchronous orbit, discussing flux time variations during geomagnetic disturbances

07 p1209 A69-19371

Geomagnetic field quiet solar variations variability explained by model, noting agreement with observations at various stations

09 p1486 A69-21549

Eleven year cyclicity of geomagnetic activity from Sverdllovsk Observatory data, noting possible relation with structural features of solar activity cycles

09 p1486 A69-21552

Geomagnetic pulsations recorded in equatorial regions of Africa found continuous and not pearl modulated

09 p1491 A69-22051

Toroidal magnetic fields in ionosphere associated with solar quiet daily variations producing electric current and equatorial auroral electrojets

10 p1681 A69-22805

Geomagnetic fluctuations positive and negative correlations at conjugate pair stations Syowa base and Reykjavik

10 p1681 A69-22806

Geomagnetic crochet of July 7, 1966, discussing pulsations, recombination coefficient and electron density of ionospheric D region

10 p1683 A69-23757

Electrical phenomena in upper atmosphere and solar wind may control geomagnetic disturbances and aurorae

10 p1686 A69-23903

Geomagnetic field pulsations frequency changes in relation to geomagnetic and solar activity level

10 p1689 A69-23939

Geomagnetic field Pc 3 and Pc 4 pulsation generation mechanism explained by resonance of MHD waves in force tubes adjoining radiation belt maximum

10 p1689 A69-24206

Stable geomagnetic pulsations related to plasma density shock position in magnetosphere and to magnitude of diurnal variations

13 p2253 A69-27692

Geomagnetic pulsations and hydromagnetic wave propagation in magnetosphere, using geometric optics approximation

13 p2254 A69-28176

Large amplitude pulsations in magnetic field magnitude and proton fluxes observed by satellite during magnetic storm compared with various models

14 p2434 A69-28947

Geomagnetic variability relations to interplanetary magnetic field transverse fluctuations, discussing data from Mariner flights

14 p2510 A69-28948

Geomagnetic field secular variations relation to variations of magnetic field of optimum dipoles, noting earth core role

14 p2436 A69-29061

Amplitude and frequency spectra for Ipc pulsations during geomagnetic storms

14 p2441 A69-29417

Statistical analysis of data for 18-19 June 1936, estimating expressions involving external and internal components of geomagnetic field at storm time disturbances

14 p2444 A69-29883

Interplanetary magnetic fields from Explorer 33 magnetometer relationship to surface geomagnetic variations emphasizing unified view

16 p2862 A69-32309

Geomagnetic field quiet solar variations variability explained by model, noting agreement with observations at various stations

16 p2784 A69-32544

Eleven year cyclicity of geomagnetic activity from Sverdllovsk Observatory data, noting possible relation with structural features of solar activity cycles

16 p2784 A69-32547

Electromagnetic /ULF, VLF/ and light emissions development during magnetic substorms, discussing varied pulsations present in development phases

16 p2788 A69-32648

Polar auroras pulsation attributed to background brightness fluctuations, discussing intensity diurnal variation

17 p2963 A69-33954

Frequency spectra of Pi2 geomagnetic field pulsations, noting effects of auroral zone location, configuration and structure

20 p3520 A69-37038

PPi bursts interpreted as proton beams cyclotron instability in geomagnetic field

20 p3521 A69-37039

Plasma concentration in nondipole magnetosphere model from pc 5 pulsations periods for high geomagnetic latitudes, noting solar winds effect

20 p3521 A69-37043

Geomagnetic pulsations with intensity maximum at midlatitudes, noting north to south decreasing trend

20 p3522 A69-37059

Vertically moving ionospheric disturbances altitude estimated from geomagnetic pulsations in earth electromagnetic field

20 p3528 A69-37686

Optical pulsations in aurora, studying relations to pulsations in geomagnetism, telluric currents, X rays from aurora and variations in primary particles flux

21 p3708 A69-38492

Auroral zone geomagnetic pulsations on nightside and dayside of earth related to magnetospheric substorm and particle precipitation

21 p3708 A69-38497

Book on worldwide occurrence of type pc 4 geomagnetic pulsations covering simultaneous recordings, D/H relations, dependence on geomagnetic latitude, etc
22 p3937 A69-40422

Book on geomagnetic quadrupole field temporal changes and effects on earth rotation, covering physical parameters in earth interior and earth conductivity model correlations
22 p3937 A69-40423

Magnetic fluctuations in various frequency ranges, associated with earth bow shock, detected with search coil magnetometer on OGO 3
22 p3938 A69-40501

GEOMAGNETIC STORMS

U MAGNETIC STORMS

GEOMAGNETIC TAIL

September 14, 1966 magnetic storm observation by Explorer 33 in geomagnetic tail and by polar stations, studying relation in magnetosphere and on earth
14 p2438 A69-29078

Solar energetic proton penetration into magnetotail from proton data collected by Vela 4 energetic particle telescopes, comparing proton fluxes inside and outside magnetotail
16 p2847 A69-31966

Auroral absorption occurrence patterns mappable onto magnetotail developed as function of magnetic activity, discussing magnetotail neutral sheet source width changes
16 p2848 A69-31968

Stochastic heating of protons by random magnetosonic wave propagating normal to magnetic field to explain proton energy excess in magnetotail plasma sheet
16 p2848 A69-31969

Numerical analysis of charged particles radial distribution in radiation belts extended to geomagnetic tail for low energy auroral electrons
16 p2850 A69-32102

Electromagnetic noise in current sheet in geomagnetic tail, discussing effects on distribution function [AFCL-69-0395]
16 p2781 A69-32317

Wave damping in current sheet in geomagnetic tail by radiating energy from sheet sides by electrostatic waves [AFCL-69-0396]
16 p2781 A69-32318

Chapman-Ferraro approximation for magnetic interior field line configuration in plasma flow around two dimensional dipole, allowing for tail formation and neutral sheet
18 p3129 A69-34955

Topology of interplanetary field lines in magnetotail, using solar electrons as tracers with moon as absorber
20 p3609 A69-38078

Particle precipitation into auroral zone and plasma-energetic particle relationship in geomagnetic tail, discussing plasma sheet extent, energetic electron fluxes, etc
21 p3711 A69-38510

Equatorial plasma sheet role in magnetotail assessed from Vela satellite data, noting diurnal density variations
21 p3711 A69-38512

Low energy plasma escape flow from polar region/polar wind, examining H, He and O ions participation in expansion
21 p3713 A69-38528

Long time scale magnetodynamic noise in geomagnetic tail, discussing hourly ranges of fluctuations measured by IMP 1 satellite and planetary K index correlation
22 p3935 A69-39967

Plasma pause form in equatorial plane in presence of magnetospheric tail subsonic potential convective flow
22 p3942 A69-41103

Equilibrium plasma configurations in magnetic field of two dimensional dipole analyzed under similar conditions to magnetospheric tail formation with neutral hot plasma layer
23 p4205 A69-41835

GEOMAGNETICALLY TRAPPED PARTICLES

U RADIATION BELTS

GEOMAGNETISM

Low latitude m arcs in 6300 angstrom emission during intense geomagnetic storm related to auroral red oxygen emission peak
01 p0062 A69-10136

Geomagnetic disturbance activity forecasting method using solar coronal streams, noting reliability of test forecasts
01 p0150 A69-10372

26-month periodicity in quiet day range of geomagnetic field horizontal force, noting similar periodicity in

sunspot number and 16-month oscillation in both phenomena
01 p0063 A69-10427

Topside ionosphere average height distributions of electron density and geomagnetic field intensity from Alouette 2 data over Japan, noting ionic composition
01 p0065 A69-10548

Earth and lunar magnetic field studies in U.S.S.R., discussing Soviet earth satellite and lunar probe data
01 p0066 A69-10943

Equatorial enhancement of storm sudden commencements and sudden impulses in horizontal component in American Zone during IGY/IGC
01 p0068 A69-11116

Magnetic field behavior at synchronous orbit during magnetospheric substorms, interpreting satellite observed data in terms of partial ring currents
01 p0075 A69-11225

Sudden magnetic field increase associated with July 8, 1966 sudden commencement observed by OGO 3 satellite in magnetotail
01 p0075 A69-11226

Solar plasma observations during magnetic storms, emphasizing shocks and tangential discontinuities, geomagnetic variations and He
01 p0076 A69-11234

Secular change examination in cislunar geomagnetic tail field gradient during summers of 1966 and 1967, using Explorer 33 and 35 results
01 p0077 A69-11237

Upper atmosphere oxygen emission and heating during geomagnetic disturbances
02 p0235 A69-11421

Relation between north-south asymmetry of F 2 region critical frequencies and geomagnetic axis inclination angle, establishing increase in asymmetry during increased solar activity
02 p0237 A69-11662

Perturbed geomagnetic field structure during magnetic storm recovery phase calculated by magnetosphere magnetic field model, accounting for various external field sources
02 p0237 A69-11666

Methodological problems in studying ionosphere by phase measurements without taking into account geomagnetic field, noting value of main results
02 p0237 A69-11668

Whistler dynamic spectra variation studies, emphasizing distorted magnetospheric geomagnetic field structure effect
02 p0238 A69-11671

Relationship between polar geomagnetic disturbances and DR variations value of geomagnetic field
02 p0238 A69-11672

Dipole models of geomagnetism at earth surface used to calculate magnetic field in outer space
02 p0238 A69-11673

Geomagnetic field components measurements from moving object, investigating astronomical orientation applicability for three component magnetometer
02 p0277 A69-11674

Geomagnetic field H and Z components measured by proton magnetometer, applying supplementary field method for error correction
02 p0238 A69-11675

Analytical model of geomagnetic field constructed from Cosmos 49 data using spherical analysis
02 p0240 A69-11698

Vertical and horizontal components of geomagnetic storm main phase magnetic variations applied to vertical electromagnetic soundings of earth
02 p0240 A69-11700

Polar geomagnetic disturbance development and decay during solar quiet and moderately disturbed periods
02 p0240 A69-11724

Parameters of solar wind responsible for geomagnetic activity, relating magnetic storm features to physical structure of interplanetary space and solar wind bubbles
02 p0240 A69-11725

Solar eclipse effect on geomagnetic field at and near dip equator observed at Huancayo Observatory, Peru
02 p0241 A69-11727

Solar eclipse effects on ionospheric conductivity and geomagnetic field at and near dip equator observed at Huancayo, Peru
02 p0241 A69-11728

Geomagnetic and interplanetary field variation measurements from Mariners 2, 4 and 5, noting correlation between solar phenomena and geomagnetic storms
02 p0241 A69-11737

Magnetotopometer for measuring torque/proportional to magnetic dipole moment/exerted on object by earth magnetic field
02 p0248 A69-11768

Magnetic paleointensity studies in basalts from Flagstaff, Arizona, noting oxidation effect on magnetic strength after heating
02 p0244 A69-12018

Algorithm computing spherical harmonic coefficients for eccentric geomagnetic dipole potential
02 p0245 A69-12735

World maps highlighting differences in geomagnetic field at conjugate localities
02 p0245 A69-12737

Diurnal variation in horizontal magnetic component of South American stations close to electrojet during IGY
02 p0246 A69-12771

Aurora displays distribution over earth, analyzing magnetosphere dependence on astronomical orientation of geomagnetic field in relation to solar wind
02 p0247 A69-12772

Earth magnetic field variations, discussing source of field, dynamo theory and paleomagnetic evidence for polarity reversals
03 p0420 A69-12935

Geiger-Muller counter telescopes in conjunction with core selectors for studying geomagnetic effect of extensive air showers
03 p0430 A69-13303

Earth ionosphere resonator natural frequencies, considering diurnal variation and geomagnetic field eccentricity
03 p0422 A69-13512

Geomagnetic field quiet day solar variations current system calculated, using 2000 LT as zero level basis
03 p0424 A69-13541

Mathematical dipole model for geomagnetic field to provide main magnetic field source distribution within earth
03 p0424 A69-13543

Dipole model of geomagnetic field in terms of spatial distribution of vertical component, discussing computer program for calculating rectangular components
03 p0424 A69-13544

High latitude electrons boundary dependent on geomagnetic axis orientation, noting role of coupling between solar wind and magnetosphere
03 p0502 A69-14003

Outer magnetosphere average magnetic field configuration between 5 and 18 earth radii, noting various maps in equatorial plane
03 p0425 A69-14012

Energetic electron fluxes measured at 2000 km over auroral and polar regions and at 17 earth radii in magnetotail plasma sheet
03 p0503 A69-14013

Earth magnetic field measurements, attributing field origin to random mechanism
03 p0426 A69-14061

Charged particle motion in time dependent external magnetic field
03 p0504 A69-14235

Cosmic ray time variation and anisotropies near earth, discussing galactic and solar cosmic rays, trajectories in geomagnetic field, etc
03 p0504 A69-14236

Aeromagnetic profiles across Reykjanes ridge southwest of Iceland, noting magnetic anomalies symmetry and ocean floor spreading since Mesozoic
04 p0592 A69-14660

Atmospheric, geomagnetic and interplanetary effects on cosmic ray flow, noting anisotropy and diurnal variation phase and amplitude averages
04 p0649 A69-14683

Error distribution maps for measurements of parameters epsilon, F and E of geomagnetic potential in Northern and Southern Hemispheres
04 p0627 A69-15031

Reversals of earth magnetic field, discussing lavas, deep sea sediments, ocean floor magnetic pattern and dynamo theory
04 p0593 A69-15075

Spatial and temporal conjugacy of visual auroras during magnetically quiet periods
05 p0753 A69-16247

Neutral sheet structure and orientation in geomagnetic tail, computing field lines on basis of Explorer 14 magnetic field measurements
05 p0753 A69-16256

Particle and field environment of earth, discussing solar wind, bow shock, magnetosheath, magnetopause, magnetosphere and particle population
06 p1001 A69-17158

- Cosmic ray daily variations relationship to geomagnetic activity, sector structure of interplanetary magnetic field and unspotted activity
06 p0990 A69-17291
- Soviet and French coordinated geophysical studies at magnetically conjugate points in northern U.S.S.R. and Indian Ocean
06 p0918 A69-17391
- Simulation of solar wind interaction with earth magnetic field, discussing selection of dimensionless parameters
06 p0919 A69-17550
- Cyclotron instability of outer radiation belt protons, taking into account data on spatial distribution and ion composition of exospheric plasma
06 p0919 A69-17721
- Vertically moving ionized formations relation to solar and magnetic activity
06 p0920 A69-17730
- Global geomagnetic anomalies influence on longitudinal pattern of solar quiet day variations and in phases of second harmonics of components
06 p0920 A69-17734
- Magnetic activity dependence of VLF emission properties at magnetically conjugate points
06 p0920 A69-17735
- Spatial structure of residual anomalous magnetic field, determining parameters of eccentric horizontal dipole as main source of geomagnetic field
06 p0922 A69-17755
- Magnetospheric ring current effect on main phase of geomagnetic storms, calculating diurnal storm-time portion of perturbation field
07 p1122 A69-18296
- Magnetic sample-and-hold damping using geomagnetic field for libration damping of gravity gradient stabilized satellite in near synchronous equatorial orbit
07 p1227 A69-18337
- Charged particle environment in synchronous orbit region, discussing electrons and protons under influence of geomagnetic field
07 p1204 A69-18340
- Transverse LF oscillations in geomagnetic field observed during January 1967, noting possibility of being second harmonic of magnetospheric standing Alfvén waves
07 p1124 A69-18835
- Computational techniques for determining magnetic field geometry for backscatter reflections
07 p1125 A69-18850
- Earth dipole magnetic field effect on bearing deviation in HF transionospheric propagation analyzed by computer ray tracing
07 p1086 A69-19224
- Geomagnetic field line stretching outward due to energy entry in form of large number of charged particles or increase in particle temperature/inflation/
07 p1127 A69-19357
- Structure, temporal behavior, shape and length of earth magnetic tail via satellite mapping
07 p1208 A69-19363
- Geomagnetic tail topology, reconnection and interaction with moon from Explorer 33 satellite data
07 p1128 A69-19365
- Bow shock and magnetopause boundary observations with IMP 2 plasma detector
07 p1129 A69-19372
- Angular intensity distribution of corpuscular radiation in time independent geomagnetic field characterized by particle velocity distribution
07 p1210 A69-19619
- Equatorial counter-electrojet and inverse quiet day solar diurnal variation current layers, noting regular diurnal variation horizontal component and latitude effect
08 p1306 A69-19884
- Earth internal magnetic field effects on cosmic ray measurements, dipole approximation and effect of external sources
08 p1378 A69-20219
- Geomagnetic field strength in early Precambrian, discussing thermoremanent normal remnant and saturation inverse remnant magnetization studies of Botswana Modipe gabbro
08 p1309 A69-20580
- Atmospheric humidity effect on efficiency of geomagnetic field scales with taut-strip suspension and temperature fluctuation
09 p1494 A69-21518
- Captured particles magnetic drift envelopes in magnetosphere calculated by model considering perpendicular geomagnetic dipole to solar wind
09 p1574 A69-21521
- Geomagnetic secular variations calculated by comparison of satellite, oceanic and aeromagnetic surveys
09 p1485 A69-21534
- Separation of normal geomagnetic field component from limited length measurements by moving averages, considering error and inhomogeneity of anomalous field
09 p1486 A69-21537
- Magnetic declination from moving objects measured by geomagnetic vector projection in solar direction
09 p1486 A69-21538
- Geomagnetic field quiet solar variations variability explained by model, noting agreement with observations at various stations
09 p1486 A69-21549
- Geomagnetic field mean hourly values continuous smoothing from recordings at drifting arctic stations for determining time variations
09 p1487 A69-21553
- Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle
09 p1487 A69-21554
- Solar wind-magnetosphere pressure balance and proton density of solar wind
09 p1577 A69-21711
- Real configuration effect of magnetic field in moderately perturbed magnetosphere on whistlers dynamic spectra, stressing geomagnetic perturbation detection
09 p1490 A69-21766
- Geomagnetic activity correlation to cosmic ray solar daily variation underground, observing primary cosmic ray flux with meson telescopes
09 p1583 A69-22755
- VLF polar chorus emission and geomagnetic variations caused by compressions or expansions of magnetosphere
10 p1681 A69-22803
- Auroral electrojet precursors and geomagnetic variations before onset of bays, noting satellite observations
10 p1681 A69-22804
- Daily observational results of solar phenomena, cosmic rays, geomagnetic variations, ionosphere, radio wave propagation and airglow arranged according to solar rotation number
10 p1771 A69-22808
- Charged particles motion in geomagnetic field from analyzing spatial distribution within framework of two dipole magnetosphere model
10 p1756 A69-22818
- Cosmic ray intensity variations by spectrographic method, noting geomagnetic effects
10 p1759 A69-22836
- Electron production rates variations in lower ionosphere cosmic layer related to meteorological, geomagnetic and cosmic conditions
10 p1759 A69-22839
- Geomagnetic field variations in middle and high latitudes during proton flare event, discussing UV radiation and period and energy spectra
10 p1683 A69-23780
- Low energy particles during solar proton flare and effects on magnetosphere, cosmic ray intensity, ionosphere and geomagnetic activity
10 p1768 A69-23786
- Mariner 2 measurements of geomagnetic field and interplanetary plasma parameters for analyzing interaction between interplanetary medium and magnetosphere during decreased solar activity
10 p1769 A69-23900
- Magnetosphere boundary configuration calculated with allowance for geomagnetic dipole inclination to geographic axis and nondipole section of geomagnetic field
10 p1686 A69-23902
- Interplanetary magnetic field sectoral structure effect on diurnal cosmic ray intensity and geomagnetic field, noting field direction influence
10 p1769 A69-23905
- Lunar diurnal variation parameters at Irkutsk determined from IGY data concerning geomagnetic field components
10 p1687 A69-23918
- Secular variations distribution on earth surface, plotting isopore charts from mean annual values of magnetic elements/1960-1965/
10 p1687 A69-23920
- Polar geomagnetic disturbances global current systems representation by prototypes of equivalent current systems
10 p1688 A69-23937
- Harmonic analysis of magnetic storms initial phases having steep leading edges and distinct steady portions, showing homogeneity in first approximation
10 p1688 A69-23938
- Geomagnetic field pulsations frequency changes in relation to geomagnetic and solar activity level
10 p1689 A69-23939
- Stable particle trapping zone in magnetosphere, discussing results of adiabatic theory application to charged particle motion in earth magnetic field
11 p1948 A69-24858
- Satellite measurements of suprathermal electrons at conjugate sunrise, indicating photoelectron escape from production level and movement along geomagnetic lines into conjugate ionosphere
11 p1950 A69-25144
- Magnetic anomalies off Cape Hatteras explained as possible edge effect, discussing ocean and continental magnetic crusts and igneous and magnetic rocks
11 p1879 A69-25405
- Recurrent geophysical disturbances associated with solar active regions and low latitude background field pattern on solar surface magnetic fields
11 p1964 A69-25415
- Geomagnetic field vertical and horizontal intensities measured using proton magnetometer with coil theodolite
11 p1889 A69-25435
- Solar and lunar/solar harmonics determination, noting effects of moon on values of horizontal magnetic component
11 p1965 A69-25555
- Upper atmosphere density variations investigation using Eurobs system, correlating density to geomagnetic activity and 10.7 cm solar radio emission
12 p2069 A69-26437
- Cylindrical satellite drag rotating about transverse axis in earth magnetic field, including aerodynamic and magnetic moments
12 p2174 A69-26443
- Solar wind interaction with geomagnetic field simulation practically unrealizable, discussing partial simulation covering neutral magnetic layer formation on night side
12 p2149 A69-26681
- Geomagnetic field dipole model by extrapolating vertical Z component for 1955 to heights between 500 and 25,000 km
12 p2071 A69-26695
- Cosmic radiation recorder designed for use onboard satellite to measure intensity space-time distribution under geomagnetic effect
12 p2094 A69-26697
- Solar wind interaction with geomagnetic field, considering bow shock, field confinement in magnetosphere and stretching out of lines of force
12 p2072 A69-26735
- Solar plasma flow around magnetosphere, discussing plasma velocity, density and temperature and magnetic field space and time variations
12 p2150 A69-26736
- Laboratory models for solar wind and magnetosphere interactions with similarity laws of Vlasov theory as reference system
12 p2150 A69-26737
- Satellite observations of geomagnetic tail in magnetosphere near midnight meridian plane, discussing formation, shape, plasma sheet and models
12 p2072 A69-26739
- Particle fluxes in outer radiation belt and unstable radiation zone of outer geomagnetic field, discussing electron diffusion into magnetosphere and magnetic disturbances
12 p2150 A69-26744
- Low energy plasma fluxes in magnetosphere, discussing plasmapause position dependence on geomagnetic activity
12 p2150 A69-26747
- Solar wind plasma observations in geomagnetospheric wake compared at 1000 and 500 earth radii, considering ion energy spectra and geomagnetic tail
12 p2151 A69-26943
- Model for self consistent time independent ring current of charged particle distribution under combined field of earth dipole and particle motion current
12 p2151 A69-26948
- Southern radio auroral zone observation with rhombic antennas, noting diffuse and discrete zones associated with proton and electron precipitation
12 p2033 A69-26950
- Sea tides and ionospheric effects on lunar variation of geomagnetic field vertical component
12 p2161 A69-26957
- Computer program for worldwide analysis of mean hourly values of field components into constituent fields and associated ionospheric current systems
12 p2074 A69-26958
- Magnetosphere model for plasma pressure by solar wind, discussing plasma drift from neutral sheet into geomagnetic tail
12 p2076 A69-27106

Electron motion effects along magnetic field lines on axisymmetric torsional hydromagnetic oscillations in inhomogeneous low beta plasma, discussing resonance trapping
12 p2076 A69-27107

Model for perturbations in earth rotation and geomagnetic core-mantle coupling, discussing electromagnetic restoring torque
12 p2077 A69-27110

Drift velocity of earth magnetic field based on spherical harmonic analysis of geomagnetic secular variation
12 p2077 A69-27111

Geomagnetic field daily variations, discussing observational techniques, observation analysis, S-field seasonal changes, equatorial electrojet, solar wind effects, dynamo theory, etc
12 p2077 A69-27143

Soviet satellite and probe studies of earth, moon, Venus and Mars magnetic fields, noting automatic magnetometer
13 p2336 A69-27352

Equatorial electrojet role in electromagnetic induction at magnetic dip equator, applying Price theory for space gradients
13 p2252 A69-27519

Magnetospheric field configuration in midnight meridian, considering cavity boundary surface and trapping region currents and tail sheet current
13 p2252 A69-27532

Relation between north-south asymmetry of F 2 region critical frequencies and geomagnetic axis inclination angle, establishing increase in asymmetry during increased solar activity
13 p2256 A69-28693

Perturbed geomagnetic field structure during magnetic storm recovery phase calculated by magnetosphere magnetic field model, accounting for various external field sources
13 p2257 A69-28697

Methodological problems in studying ionosphere by phase measurements without taking into account geomagnetic field, noting value of main results
13 p2257 A69-28699

Whistler dynamic spectra variation studies, emphasizing distorted magnetospheric geomagnetic field structure effect
13 p2257 A69-28702

Relationship between polar geomagnetic disturbances and DR variations value of geomagnetic field
13 p2257 A69-28703

Dipole models of geomagnetism at earth surface used to calculate magnetic field in outer space
13 p2257 A69-28704

Geomagnetic field components measurements from moving object, investigating astronomical orientation applicability for three component magnetometer
13 p2257 A69-28705

Geomagnetic field H and Z components measured by proton magnetometer, applying supplementary field method for error correction
13 p2257 A69-28706

Analytical model of geomagnetic field constructed from Cosmos 49 data using spherical analysis
13 p2258 A69-28729

Vertical and horizontal components of geomagnetic storm main phase magnetic variations applied to vertical electromagnetic soundings of earth
13 p2258 A69-28731

Power spectrum analysis and linear filtering for 27 day variation amplitude of geomagnetic disturbance subject to semiannual amplitude modulation
14 p2434 A69-28955

Low energy charged particle motion parallel with magnetic force lines analyzed in magnetosphere model with constant electric field
14 p2512 A69-29040

Polar auroral region displacement ascribed to distant magnetic field disturbances, proposing calculation method
14 p2436 A69-29059

Statistical description of geomagnetic field as random vector field, presenting correlation functions from empirical estimates from geomagnetic charts
14 p2437 A69-29062

Geomagnetic normal fields determination using spherical harmonic analysis, including extension to local fields
14 p2437 A69-29063

Magnetic damping of homogeneous cylindrical satellite rotation about transverse axis
14 p2530 A69-29065

Geomagnetic cut-off influence on charged particle dynamics in geomagnetic field, applying charged particle motion theories to magnetosphere fields
14 p2513 A69-29099

Satellite 40 mc signal scintillations near sunspot minimum, noting scintillation index dependence on angle between radio ray and magnetic field
14 p2439 A69-29114

Geomagnetic storms caused by plasma streams impinging on earth related to preceding cosmic flares, discussing polar cap absorption and ground level effects
14 p2514 A69-29416

Remanent magnetization properties in alkaalic igneous complexes at Magnet Cove and Potash Suphur Spring, Ark., calculating paleomagnetic pole during Cretaceous
14 p2445 A69-29884

Absorption coefficient in three microwave lines of O with different rotational quantum numbers calculated, examining Zeeman effect in geomagnetic field
15 p2597 A69-30941

Geomagnetic ring current study, giving exact kinetic description based on Vlasov equation of plasma ring current in dipolar field
15 p2598 A69-31218

Exospheric temperature variations by Thomson scattering related to solar and geomagnetic activity, discussing seasonal effect on thermospheric variables
15 p2604 A69-31409

Atmospheric density dependence on solar and geomagnetic activity at low latitudes, discussing atmospheric expansion
15 p2605 A69-31441

Radar thomson scatter from nonthermal steady state level of plasma waves in ionosphere measured, studying role of angle between wave vector and magnetic field
16 p2818 A69-31678

Book on ionospheric radio waves covering geomagnetism and sun, whistler propagation, oblique propagation, satellite sounding, etc
16 p2749 A69-31715

Worldwide changes in geomagnetic field, determining causes by examining magnetic field and plasma data for solar wind and classifying as SSC or SI
16 p2847 A69-31963

Geomagnetic field westward drift related to earth core rotation from calculating drift at earth surface and at core
16 p2774 A69-31983

Self consistent ring current of radiation belt under combined influence of earth dipole field and field due to currents of particle motions
16 p2776 A69-32096

Geomagnetic normal field of vertical component for Central Europe, discussing influence of local factors on observational data
16 p2782 A69-32461

Magnetized minerals studied to investigate space-time structure and reversal of main geomagnetic field
16 p2782 A69-32462

Captured particles magnetic drift envelopes in magnetosphere calculated by model, considering perpendicular geomagnetic dipole to solar wind
16 p2851 A69-32516

Geomagnetic secular variations calculated by comparison of satellite, oceanic and aeromagnetic surveys
16 p2783 A69-32529

Separation of normal geomagnetic field component from limited length measurements by moving averages, considering error and inhomogeneity of anomalous field
16 p2783 A69-32532

Magnetic declination from moving objects measured by geomagnetic vector projection in solar direction
16 p2783 A69-32533

Geomagnetic field quiet solar variations variability explained by model, noting agreement with observations at various stations
16 p2784 A69-32544

Geomagnetic field mean hourly values continuous smoothing from recordings at drifting arctic stations for determining time variations
16 p2784 A69-32548

Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle
16 p2784 A69-32549

Polar substorms resulting from interaction between magnetized plasma stream and geomagnetic field in magnetosphere
16 p2852 A69-32620

Solar and terrestrial phenomena correlated for March 1966 events
16 p2852 A69-32621

Magnetic analysis by successive double heat treatment of miocene lava cooled during geomagnetic polarity reversal for determining field intensity
16 p2788 A69-32646

Earth core conductivity effects on ionospheric shielding against geomagnetic changes from external sources, noting earth-ionosphere coupling
17 p2959 A69-32925

Earth-ionosphere waveguide excitation by lightning discharges and geomagnetic field influence on ELF noise spectrum
17 p2928 A69-33865

U shaped polar auroras development, examining relation with magnetic activity and current system configuration in lower ionosphere
17 p2963 A69-33952

Time distribution of commencements of substantial intensity increases of geomagnetic and aeromagnetic phenomena
17 p2964 A69-33958

High latitude geomagnetic field quiet solar diurnal variations during magnetically quiet IGY winter days, relating type and amplitude at low and midlatitudes
17 p2964 A69-33960

Geomagnetic disturbances intensity spatiotemporal distribution at Northern Hemisphere high latitudes during IGY and IQSY
17 p2965 A69-33966

Cosmic radio emission absorption during IQSY at 24.6 MHz, relating diurnal variation of absorption and geomagnetic index F scatter occurrence
17 p2968 A69-33992

Cosmic ray diurnal anisotropy variations, correlating component annual means with magnetic activity
18 p3186 A69-34934

Stream structure in interplanetary magnetic field during 1966, analyzing geomagnetic activity and solar particles and Forbush decrease anisotropy
18 p3199 A69-34938

RF synchrotron emission from electrons trapped in earth magnetic field observed by satellite, using magnetospheric environment model
18 p3128 A69-34948

Antarctic VLF emissions polarization and direction determination, using combination of antennas with planes lying in geomagnetic E-W and N-S directions
18 p3102 A69-34965

Solar microwave emission heliographic distribution during pronounced geomagnetic recurrence, noting brightness temperature nonuniformity due to coronal depression through polytropic models for solar wind
18 p3188 A69-35396

Solar cycle line in horizontal force of earth magnetic field resolved by power spectrum analysis suggesting 80 year cycle
18 p3205 A69-35414

Attitude stabilized rocket-released magnetometer for detection of earth field magnitude and direction changes
19 p3309 A69-35994

Electrically charged earth satellite motion under action of Lorentz force produced by geomagnetic field interaction, relating field trajectories to acceleration
19 p3431 A69-36615

Nighttime F 2 region temperature distribution under geomagnetically calm and disturbed conditions calculated from Alouette 1 satellite data
19 p3304 A69-36623

OGO triaxial search coil magnetometer for measuring earth magnetic fluctuations, discussing design rationale and observation results
19 p3284 A69-36675

Reversal rate of earth magnetic field deduced from observed and theoretical polarity interval length using hydraulic transmission line theory
19 p3304 A69-36869

Lower ionosphere geomagnetic field local gradients determination by partial reflection method
20 p3522 A69-37055

Terrestrial electrical conductivity measurement from electromagnetic field variations determination by geomagnetic sounding
20 p3522 A69-37058

Geomagnetic field lines coordinates calculation based on coefficients obtained in spherical harmonic analysis
20 p3522 A69-37060

Geomagnetic field total vector modulus secular variations from airborne measurements
20 p3522 A69-37061

Geomagnetic field model /POGO/ to confirm eccentric dipole westward velocity secular decrease predicted by day length changes
20 p3523 A69-37490

Solar and geomagnetic activity persistence by variance spectrum analysis, noting sunspot numbers and radiation flux autocorrelation functions
20 p3601 A69-37508

Solar microwave emission relationship to geomagnetic activity, analyzing statistically source intensity and model of coronal condensation associated with sunspots based on electron densities
20 p3589 A69-37557

Seasonal anomaly of F 2 layer critical frequency in Northern and Southern Hemispheres during high and low solar activity, discussing geomagnetic effect
20 p3526 A69-37667

Residual nighttime radio wave absorption in ionosphere, noting absorption-magnetic activity relation existence
20 p3528 A69-37678

High latitude limit of closed geomagnetic field lines indicated by high latitude electron boundary in outer radiation zone during Alouette satellite energy particle experiment
20 p3531 A69-37875

Model equatorial electrojet with meridional current system constructed by spherical harmonic expansion for geomagnetic field, noting current loops
20 p3533 A69-38084

Diffraction pattern of satellite signal field-aligned amplitude scintillation during quiet geomagnetic conditions
20 p3497 A69-38108

Geomagnetic field horizontal component daily variations in relation to solar wind, noting effects of ambient field night side decrease
21 p3714 A69-38549

Radio pulse emission from ionized disk of cosmic ray extensive air showers, noting importance of charge separation in geomagnetic field and selective positron absorption
21 p3792 A69-39614

Satellite stabilization by earth magnetic field through conservative magnetic moments application
21 p3830 A69-39834

Herzenberg geomagnetic dynamo model extensions including rigid rotors calculus, laminated rotors, induction problem and fluid rotors in rigid conductor
22 p3989 A69-40193

Bullard-Gellman dynamo, discussing magnetic field development as series expansion, truncation levels and convergence
22 p4018 A69-40194

MHD dynamo construction with emphasis on fluid motion effect on magnetic field, considering spatially periodic dynamo derivation from kinematic considerations
22 p3989 A69-40196

North Pole trajectories and geomagnetic fields assuming motion of earth mantle and interior
22 p3942 A69-41120

Short lived Forbush decreases, discussing phase differences between stations due to asymptotic directions changed by geomagnetic field and spatial anisotropy
23 p4204 A69-41480

Geomagnetic field spherical analysis from angular data and extrapolated values of time variable field coefficient
23 p4157 A69-41866

Low noise nuclear precession magnetometer noise rejection optimization design specifications for measuring geomagnetic field components
23 p4165 A69-41868

Quartz compasses designed for orientation of electronic devices with respect to magnetic meridians at low horizontal component values
23 p4166 A69-41869

Noncyclic daily solar quiet variation in mean hourly geomagnetic field by including noncyclic variation term in regression model
23 p4158 A69-42170

Geomagnetic multipole parameters changes using spherical harmonic coefficients of geomagnetic potential, relating to secular variation field
23 p4158 A69-42171

Single dipole field approximation of geomagnetic field, minimizing sum of squares of differences between dipole field and geomagnetic field
23 p4158 A69-42173

Two and three dipole approximation of main geomagnetic field based on minimization of sum of squares of differences between dipole and geomagnetic fields
23 p4158 A69-42174

Solar quiet and lunar electric current systems deduced from geomagnetic data, discussing electrical conductivities and wind models in dynamo region
23 p4160 A69-42427

Magnetic dip equator position at E layer and gradient with time and altitude, using geomagnetic field models
23 p4160 A69-42428

Solar wind kinetic energy density using geomagnetic field horizontal component daily variation, treating earth as plasma probe
24 p4308 A69-42968

Geomagnetic zenith calculation at given point based on magnetic field model, using polynomial development
24 p4311 A69-43505

Mirror photogrammetry geometric principles, studying photo pairs, mirror reflection and reduction methods
01 p0077 A69-10025

Photomultiplier geometry without use of light pipes for uniform response from large area single and double sheet plastic scintillation detectors
03 p0428 A69-13107

Geometrical and thermomechanical effects on pressure and forces in deformation of thin Ti alloy blanks
03 p0452 A69-14123

Computer programming language for three dimensional geometry at symbolic level, noting use for placement problems
05 p0724 A69-16382

Geometry changes influence on rigid plastic circular plate behavior under two independent distributed pressures
06 p1023 A69-17508

Performance prediction for planar and cylindrical electrode geometry fixed spacing thermionic converters
09 p1438 A69-21814

Single mirror scanning geometry and kinematics, analyzing spatial motion of objects plane mirror image
12 p2091 A69-26367

Unified geometric description of gravitational and electromagnetic fields, determining electromagnetic field influence on geometry from dimensional constant
13 p2300 A69-28450

Liquid sloshing in vessel of complex geometry reduced to boundary value problem
14 p2428 A69-28969

Gas discharge tube graphite hollow cathode geometry leading to abnormal discharge operation under certain pressure conditions
16 p2814 A69-31838

Radiative heat transfer in nonisothermal scattering media of plane, spherical and cylindrical geometries separated by particle cloud
16 p2878 A69-31925

Fracture processes in high strength materials, considering effect of stored elastic energy, component geometry, fracture toughness and environment
17 p2988 A69-33553

Measurement errors and geometry effects on navigational accuracy, determining maximum allowable error for measuring devices employed
17 p3002 A69-34098

Syphon geometry influence on rigidity and strength determined using integrating Meissner type differential equations with finite difference schemes
19 p3358 A69-35849

Geometry effects on stresses in discontinuous composite materials, studying fiber spacing, failure and discontinuities size and nature
20 p3565 A69-36942

Theory for describing rotating fluid planets external geometry in state of hydrostatic equilibrium, noting role of equipotential surfaces
20 p3594 A69-37077

Solar activity effect on F 2 layer geometrical parameters, plotting prognostic maps using nomographic methods
20 p3526 A69-37663

Lunar spherical astronomy, discussing coordinate transformations, precessional and nutational motions, etc
21 p3798 A69-38605

Computerized crewstation geometry evaluation and design optimization using 23-pin-joint man-model [AIAA PAPER 69-977]
22 p3892 A69-40357

GEO MORPHOLOGY
Sand ridge origin and dynamical setting, discussing morphology-tidal current system equilibrium indicated by theory and field measurements
15 p2596 A69-30443

Aerial photography in geomorphological interpretations, noting advantages over conventional maps in slope microreliefs, soil erosion network and karst, glacial, aeolian and shore features
20 p3539 A69-37512

Auroral displays photographed by all-sky cameras at magnetically conjugate stations, morphological similarities and electron precipitation role
20 p3535 A69-38187

GEON [TRADEMARK]
U POLYVINYL CHLORIDE

GEO PHYSICAL OBSERVATORIES
NT OGO
NT OGO-D
NT OGO-E
NT OGO-F

Geophysical investigations on manned orbital space laboratories, discussing space photography, spectrophotometry, terrain pictures and aerosol layers
05 p0759 A69-16633

Multiple ground based geophysical sensors for detecting ionospheric phenomena, discussing continuous magnetic tape data recording, common time base and station operation
14 p2448 A69-29526

GEO PHYSICAL SATELLITES
NT OGO
NT OGO-D
NT OGO-E
NT OGO-F

Imaging radar systems for employment on small spacecraft, fabricating small lightweight radar systems packages with integrated circuit techniques
11 p1835 A69-24695

Soviet rocket and satellite studies of upper atmosphere and ionosphere
13 p2251 A69-27347

Soviet meteorological and geophysical rockets, satellites and techniques in cloud studies and weather forecasting, noting Cosmos results
13 p2290 A69-27348

Satellite radio observation for ionospheric parameters, utilizing Doppler and Faraday phenomena, signals fluctuations and sporadic phenomena
15 p2594 A69-30028

- Spacecraft and boosters for earth resources surveys, discussing design, payloads, orbits, etc
21 p3799 A69-38629
- GEOPHYSICS**
- Solar and geophysical activity during February 1965 and March 1966 indicating geomagnetic activity on 27-day recurrence diagram
01 p0068 A69-11118
- Geophysical effects observed in Northern Hemisphere during low solar activity, discussing polar auroral intensities and positions
02 p0239 A69-11694
- Meteorological instrumentation in India for surface and upper air observation
02 p0248 A69-11817
- Geophysical theory and computers - Conference, University of Trieste, September 1967
02 p0242 A69-12005
- Book containing 1960-1965 /including IQSY/ chronological tables of solar and geophysical events, discussing solar activity, geomagnetic, ionospheric, auroral and cosmic ray research
02 p0321 A69-12165
- Slide wire aircraft vertical velocity meter for application during aerogravimetric mapping, discussing calibration and gravitational force measurement accuracy
03 p0429 A69-13261
- Space systems use for planetary geology and geophysics - Conference, Boston, May 1967
03 p0509 A69-13390
- Detection of electric field turbulence in earth bow shock, noting wave amplitude correlation with magnetic field structure
04 p0592 A69-14681
- International cooperation results in field of optical tracking of satellites for solving problems of atmospheric physics, geophysics and geodesy
06 p1042 A69-17050
- Dynamics and instability of multilayered systems models in field of gravity, noting isostatic adjustment of layered globe
08 p1309 A69-20578
- Conversion of Woollard theory coefficients of tidal irregularity of earth rotation to new system of constants
09 p1484 A69-21383
- Statistical regularization for obtaining a priori probability distribution information on mathematically incorrect inverse geophysical problems, deriving algorithm
10 p1689 A69-23968
- Geophysics - Conference, Naples, May 1967
13 p2255 A69-28646
- Geophysical effects observed in Northern Hemisphere during low solar activity, discussing polar auroral intensities and positions
13 p2258 A69-28725
- Solar-terrestrial physics, Solar aspects - IQSY/COSPAR Conference, London, July 1967, Part 1
15 p2672 A69-30005
- Cosmology and geophysics relationships using initial and boundary conditions concept
16 p2864 A69-32451
- Astronomical and geophysical observations, selecting degree of smoothing via Whittaker method for curve construction
17 p3028 A69-32877
- Conversion of Woollard theory coefficients of tidal irregularity of earth rotation to new system of constants
18 p3127 A69-34771
- Geophysics international dictionary, Volume 1 /A-J/ covering seismology, geomagnetism, aeronomy, oceanography, geodesy, gravity, marine geophysics, meteorology, earth origin and evolution
19 p3303 A69-36511
- Geophysics international dictionary, Volume 2 /K-Z/ covering seismology, geomagnetism, aeronomy, oceanography, geodesy, gravity, marine geophysics, meteorology, earth origin and evolution
19 p3304 A69-36512
- Solar proton flare June 1968 analysis, discussing geophysical effects and possible polar cap absorption
20 p3587 A69-37332
- Radar geoscience application, discussing radar return relation to illuminated terrain in detecting buried river channels
20 p3491 A69-37651
- Soviet book on synoptic climatological and heliogeophysical long term weather forecasts, discussing monthly and seasonal anomalies, sun-earth interrelations, solar corpuscular elements, etc
21 p3759 A69-39523

- Statistical regularization for obtaining a priori probability distribution information on mathematically incorrect inverse geophysical problems, deriving algorithm
21 p3680 A69-39654
- Advances in geophysics, Volume 13, covering airborne geophysical methods, ball lightning structure, lidar, middle atmosphere energetics, etc
22 p3940 A69-40534
- Handbook on geochemistry, Volume 2/1, covering geophysics, cosmochemistry, etc
22 p3897 A69-40890
- Handbook on geochemistry, Volume 1, covering meteorite composition, cosmic abundances, earth geophysical structure and composition, data evaluation, etc
22 p3897 A69-40980
- Geophysical aspects of earth chemical composition, structure and energy balance
22 p4032 A69-40983
- Book on geophysics covering lithosphere, hydrosphere, atmosphere, earth motion and tremors, geomagnetism, water mass circulations, radioactivity, atmospheric electricity, measurement techniques and equipment
23 p4154 A69-41367
- Meteorology and geophysics - Conference, Hamburg, April 1968
24 p4344 A69-43144
- Geodetic and geophysical random uncertainties as fundamental limitations on terrestrial inertial navigation accuracy [AIAA PAPER 68-847]
24 p4348 A69-43240
- Interplanetary and geophysical conditions forecasting based on repetitions of low latitude photospheric background magnetic field patterns during solar activity cycles
24 p4387 A69-43626
- GEOPOTENTIAL**
- Gravitational field and earth shape determination by calculating perturbing potential at earth surface and in outer space, using Green functions
01 p0063 A69-10360
- Diapason satellite geodetic results concerning measurement accuracy, terrestrial potential models and station synchronization
01 p0065 A69-10543
- Six level model for numerical geopotential forecast allowing for quasi-static and quasi-geostrophic approximations
02 p0273 A69-11434
- Interpolation of deflections of vertical from horizontal gravity gradients, discussing potential applications to photogrammetry
02 p0243 A69-12012
- Anomalous gravitational geopotential as function of mass, discussing density anomalies in spherical shells for harmonics as obtained from satellite observations
02 p0244 A69-12178
- Satellite orbit selection for determining geopotential and spherical and tesseral harmonic coefficients, discussing propulsion systems and satellite observation cost feasibility
02 p0331 A69-12807
- Geopotential resonant orbital perturbations of existing satellites, noting high inclination role
03 p0521 A69-13777
- Error distribution maps for measurements of parameters epsilon, F and E of geomagnetic potential in Northern and Southern Hemispheres
04 p0627 A69-15031
- Perturbations of stationary orbital vehicles of arbitrary latitude due to earth triaxiality, noting control by low thrust rocket engine
05 p0823 A69-16037
- Canonical correlations used to analyze relations between values of geopotential field
05 p0789 A69-16637
- Earth ellipsoid fundamental parameters for calculation of earth flattening and normal acceleration due to gravity
09 p1487 A69-21633
- Earth equipotential surface shape determination from satellite orbit dynamics, obtaining triaxial ellipsoid
09 p1487 A69-21635
- Optimum coordination between homogeneous isotropic geopotential field and derivatives, estimating efficiency of geopotential and wind fields simultaneous analysis
12 p2126 A69-26580
- Stratosphere and troposphere processes analyzed, indicating feasibility of forecasting geopotential and wind fields between 12 and 24 km
12 p2126 A69-26581

- Earth gravitational field representation by separating geopotential into normal and disturbing potential for solving geodetic boundary value problem for satellite geodesy
12 p2076 A69-27089
- Gravity perturbations in earth external field, treating anomalous potential using Green integral formula and spherical harmonics
12 p2077 A69-27139
- Regression coefficients obtained from satellite cloud observations applicability in constructing geopotential fields, tabulating coefficients obtained from ground stations
13 p2292 A69-27731
- Satellite and aerological ground station data combined to determine geopotential fields and wind velocity fields for inadequately serviced areas
13 p2292 A69-27732
- Wind velocity, geopotential and atmospheric layer temperature fields constructed from Tiros 9 satellite cloud data using least squares method and trigonometric polynomials
13 p2292 A69-27733
- Geopotential and wind prediction by integration of prognostic equations of single level atmosphere
13 p2294 A69-27852
- Canonical correlations used to analyze relations between values of geopotential field
14 p2472 A69-28793
- Odd zonal harmonics coefficients in earth gravitational potential from analysis of satellite orbital eccentricity variations
14 p2439 A69-29118
- Temperatures and geopotentials of isobaric surfaces in Northern and Southern Hemispheres compared for summer and winter seasons
14 p2473 A69-29724
- Spatial correlation function of Northern Hemisphere geopotential, using model based on random distribution of potential vortex fluctuations for atmospheric circulation
14 p2476 A69-29822
- Normalized correlation functions of dispersion values for pressure fields and geopotential obtained by low latitude stations, noting wind field features
14 p2478 A69-29833
- Earth orography influence on climatological distribution of wind and geopotential fields, stressing central asiatic mountains role in atmospheric circulation
14 p2478 A69-29835
- Geopotential determination from gravity force measurements at known surface and error assessment for earth model with aid of spherical harmonic expansion
15 p2689 A69-30567
- Geopotential represented in ellipsoidal harmonics, discussing Lamé functions generation and rectangular-ellipsoidal coordinates relation and orbital elements perturbations
15 p2599 A69-31333
- Coefficients of zonal spherical harmonics to 21st order in expression for earth gravitational potential
15 p2600 A69-31358
- Tesseral harmonics of geopotential and station coordinates based on combined Baker-Nunn, laser and range and rate satellite data
15 p2601 A69-31372
- Earth figure parameters from satellite orbit dynamics, including potential on geoidal surface and scale factor for lengths
15 p2602 A69-31387
- Satellite orbit evolution data applied to refinement of geophysical parameters, including upper atmosphere parameters and zonal harmonic coefficients in gravitational potential expansion
15 p2604 A69-31417
- Satellite orbital resonances due to geopotential analyzed by asymptotic expansion for nearly circular or equatorial orbits
16 p2863 A69-32401
- Geopotential field forecast for 500 mb surface, comparing results from quasi-solenoidal and quasi-geostrophic models
21 p3758 A69-39110
- Impedance of inhomogeneous earth from magnetic and electric fields and geomagnetic potential measurements
23 p4157 A69-41867
- GEOPOTENTIAL HEIGHT**
- Regression generated radiometric and contour height fields of North American Continent using Nimbus 2 IR equivalent black body temperature and geopotential data
24 p4343 A69-42896

GEOS 2 SATELLITE

Heat pipe system performance of GEOS 2 satellite, noting transponders temperature differences
23 p4224 A69-42082

GEOSTROPHIC WIND

Geostrophic adjustment for neutral and lapse conditions, discussing similarity arguments based on appropriate length and velocity scales
02 p0276 A69-12699

Factors producing wind deviations from geostrophic pattern under various atmospheric conditions
03 p0458 A69-13267

Statistical analysis of data concerning difference between real wind velocity and velocity of gradient wind for winds of various velocities
03 p0458 A69-13268

Geostrophic wind direct computation from grid point analysis of observed winds, using balance equation
04 p0626 A69-14913

Energy integral of equations used in studying atmospheric motions in quasi-geostrophic approximation
05 p0759 A69-16641

Geostrophic trajectories of horizontal diffusivity estimated in midlatitude troposphere and lower stratosphere
08 p1308 A69-20310

Two level quasi-geostrophic model to probe atmospheric general circulation, noting functional dependence of zonal momentum meridional flux
08 p1346 A69-20314

Atmospheric boundary layer mean turbulence and vertical velocity calculations, tabulating layer characteristics for various turbulent heat flux and geostrophic wind velocity values
12 p2126 A69-26578

Automatic processing and error analysis of horizontal, vertical, static and geostrophic wind data by U.S.S.R. Hydrometeorological Service
13 p2292 A69-27839

Energy integral of equations used in studying atmospheric motions in quasi-geostrophic approximation
14 p2433 A69-28797

Horizontal shear flow effect on linear geostrophic adjustment in unbounded barotropic fluid, discussing gravity waves, vorticity equations, available energy, etc
15 p2648 A69-30217

Friction and wind relationships expressing actual and geostrophic wind as complex numbers or by corresponding vectors in Gauss-Argand diagram
16 p2808 A69-32455

Jet stream blocking process simulation using geostrophic system of equations, considering effects of orography and contrast heating due to land-sea distribution
16 p2809 A69-32602

Semidiurnal oscillation in thermalgeostrophic atmosphere examined using atmospheric model for tidal oscillations response study
17 p2959 A69-33148

Thermal wind instability by numerical integration of equations of motion, noting convective cells tilt
17 p2998 A69-33734

Steady state solution of quasi-geostrophic perturbation equations for atmospheric forced response to parametrized heating as global monsoon theory
19 p3362 A69-36405

Atmospheric zonal circulation compatible with meridional obtained from model based on dynamic and heat flux equations and Williams and Davis hypothesis
23 p4183 A69-41522

GEOTROPISM

Gravity effects on plant growth, discussing horizontal clinostat experiments and auxin transport mechanism
15 p2555 A69-30470

Gravity independence of life processes in terrestrial organisms concluded from zero gravity experiments with algae, hatched larvae, etc
18 p3095 A69-34692

Geotropic response reciprocity in oat seedlings grown in two axis clinostat compared with acceleration constraints of biosatellites, considering imposition of centrifugal force
20 p3477 A69-37620

GEP TELESCOPES

U PARTICLE TELESCOPES

GERDIEN ARC HEATERS

U ARC HEATING

U HEATING EQUIPMENT

GERDIEN CONDENSERS

Ion density, electrical conductivity and weighted mean mobility deduced from Gardien capacitor I-V characteristics used in balloon sounding of stratosphere
18 p3130 A69-34970

GERMANIDES

Praseodymium germanides resistivity and thermal EMF temperature dependence determined, discussing Hall effect, thermal expansion coefficient, melting point microhardness, etc
23 p4199 A69-42467

GERMANIUM

Bulk effect germanium hot-carrier microwave modulator for Q band, reducing required applied voltages by using short length semiconductor ships
01 p0043 A69-10563

Ionization losses of Ge 72 atoms stopping in Ge, noting no cut-off indicative of energy gap effects
01 p0140 A69-11245

Planar technology application to germanium electronic components and integrated circuits
02 p0214 A69-11597

Vacancy diffusion in Ge, relation to precipitation of Cu impurities from supersaturated solid solution and determination of monovacancy migration energy
02 p0295 A69-11780

Low field helicon wave transmission through n-type Ge at liquid He temperature, noting cyclotron resonance damping
02 p0295 A69-11787

Acoustic paramagnetic resonance in arsenic doped germanium, measuring spin-lattice relaxation
02 p0296 A69-11835

Stacking faults in Ge epitaxial layers revealed by etching reagents and X ray diffraction with photographic recording
02 p0297 A69-11880

Step voltage transient behavior of electron-hole plasma injected into Ge, noting current time dependence
02 p0301 A69-12651

Electrical properties of edge and screw type dislocations in germanium, using bilateral microscopy
03 p0488 A69-13761

Dislocation effects on intensity jumps near K edge of absorption, using interferential transmission of X rays in Ge
03 p0490 A69-13944

Fermi level in n- and p-type Ge after irradiation by 50 Mev electrons determined by temperature dependence of carrier concentration
04 p0640 A69-14444

Current and voltage dependence of negative differential resistance segment of current-voltage characteristic on nature of m-p contact in germanium p-n-p-m structures
04 p0642 A69-14793

Direct reading instrument using four point probe and two analog computing circuits for Si and Ge resistivity measurements
04 p0599 A69-15019

Photon emission in germanium at high injection levels during uniaxial compression
04 p0643 A69-15255

Hydrothermal investigation of Ge trace quantity distribution between metal, silicate and sulfide phases at controlled oxygen partial pressure by oxygen buffer techniques
05 p0819 A69-15624

Electron beam modulation of germanium reflectance
05 p0807 A69-15816

Electrical conductivity anisotropy in isotropic germanium and silicon semiconductors, noting effect of metallic contact insertion
05 p0808 A69-16216

Double diffused planar Ge n-p-n and p-n-p transistors with high switching speed, noting fabrication and performance
05 p0809 A69-16557

Radiation defects stability in semiconductors, noting low temperature electron irradiation of Ge and effects of annealing
06 p0974 A69-16863

Electron irradiation annealing and modification of 35 and 65 K defects in n-type Ge induced by 1 Mev electrons at low temperature
06 p0980 A69-17757

Lattice location of dopant elements implanted into Ge determined by carbon ion backscattering, noting substitutional concentrations above thermal equilibrium solubilities
07 p1199 A69-18903

Instability in pyrolytic silicon dioxide films on Ge substrate under bias at room temperature consisting of positively charged ion motion
07 p1200 A69-19010

Cyclotron resonance measurements of quantum effects in Ge valence bands by CW molecular gas laser, developing tunable submillimeter maser [IEEE PAPER C-6]
07 p1150 A69-19051

Distribution and carrier type in germanium bar in electric field, relating distribution obtained by using Hall effect to avalanche phenomenon
08 p1372 A69-20277

Germanium solid state triode controlling electron currents of space charge limited regime by means of gate conductors in solid state diode
09 p1462 A69-21353

Transitions between heavy hole and spin orbit split bands in uniaxially stressed Ge and GaAs, noting spectra for various temperatures and valence band parameters
10 p1745 A69-23359

Hetero-epitaxial germanium films on GaAs by germanium condensation from molecular beams in vacuum, obtaining p-type conductivity
11 p1938 A69-25033

Solid state IR imaging using monolithic Ge mosaics of isolated sensor elements, discussing design, structure, fabrication, system readout and operation
11 p1938 A69-25307

Metallic impurities effect on Ge surface charge and recombination properties, noting fast and slow electron density changes by forbidden band penetration
11 p1939 A69-25703

Lattice defects in development of recombination centers on Ge semiconductor surfaces, discussing photoconductivity and field effect
12 p2142 A69-25978

Germanium surface IR radiation absorption in vacuum at low temperatures, obtaining modulated interval reflection spectra
13 p2317 A69-27879

Phase diagram for physicochemical study of CdSb-Ge cross section of Cd-Sb-Ge ternary system, discussing exo-endothermal fusion effects, microstructure, etc
14 p2503 A69-28975

Electrical and photoelectrical properties of semiconductor heterojunctions prepared by Ge epitaxy on gallium arsenide bases, showing dependence on base surface treatment
15 p2667 A69-30078

Optical constants changes in germanium determined by modulation method of measuring light reflected at different angles
18 p3173 A69-35014

Transient calibrations for Ge surface thermocouple heat flux sensors used in hypervelocity impulse tunnel
19 p3292 A69-35725

Transducer with single crystal Ge for high heat flux measurement, noting calibration by direct conduction
19 p3307 A69-35748

Reactive scattering from solid surfaces, discussing atom beam reaction of O with heated Ge and Si single crystals
19 p3377 A69-36178

Transport mechanism in amorphous Ge films deposited on glass substrates studied by measuring piezoresistance as function of temperature during pure nitrogen immersion
19 p3391 A69-36559

Electrical conductivity anisotropy in isotropic germanium and silicon semiconductors, noting effect of metallic contact insertion
20 p3584 A69-37786

Fast neutron irradiation effect in Ge crystals, using X ray diffraction and volumetric measurements
20 p3584 A69-38125

Radiative recombination in GaAs p-n structures having region with concentrations of Ge atoms
21 p3780 A69-39044

Germanium single crystals etching with water vapor and hydrogen sulfide in hydrogen flow system, studying concentration, pressure and temperature effects on surface reactions
22 p3970 A69-40737

Ge films formation by evaporation technique, discussing background O pressure effect
24 p4361 A69-43345

GERMANIUM ALLOYS

Electroreflectance spectra of Ge-Si alloys, noting concentration dependence and band structure of Si and Ge
02 p0295 A69-11784

V phase structure and V and E phase lattice constants for ternary systems /Ti, Zr, Nb or Ta/-Ni, Co or Fe/-Si or Ge/
10 p1708 A69-22992

GERMANIUM COMPOUNDS

NT GERMANIDES

Tunnel junctions of narrow gap GeTe and wide gap GaAs, noting current voltage characteristics similar to those in Schottky barrier
06 p0980 A69-17770

Band structure for narrow energy gaps of GeTe and SnTe by perturbation model, noting constant free path and relaxation time
19 p3385 A69-36516

Electronic properties changes in amorphous CdGeAs caused by long range order loss studied by measuring optical and transport properties
19 p3390 A69-36557

GERMANIUM DIODES

Germanium tunnel diode current-voltage characteristics, proposing expression for approximation of differential conductivity as function of voltage
02 p0214 A69-11613

Germanium tunnel diode capacitance as function of bias voltage and HF signal magnitude, considering circuit design
02 p0214 A69-11614

Conduction mechanism in unstable range of Au doped double injection Ge diode at 77 K
02 p0222 A69-12686

Diffusion current detection method applied to reverse biased volt-ampere characteristics of Ge diodes, noting surface leakage role
07 p1105 A69-19007

Noise generator design employing diffused Ge avalanche transit time diode
07 p1107 A69-19156

Germanium tunnel diode current-voltage characteristics, proposing expression for approximation of differential conductivity as function of voltage
11 p1847 A69-24721

Germanium tunnel diode capacitance as function of bias voltage and HF signal magnitude, considering circuit design
11 p1847 A69-24722

Ultra lowpass filter circuit with two point contact Ge diodes and capacitor
12 p2039 A69-26379

Germanium microwave backward diodes optimum design and performance prediction through computer calculation for important parameters
22 p3916 A69-41224

GERMANIUM OXIDES

Voltage drop measurement across plasma anodized germanium film to determine anodization constant
10 p1742 A69-24004

Dissociation energy and ionization potential measured for gaseous SiO and GeO
22 p3896 A69-40725

GERMANY

Rocket guidance, discussing foreign systems with emphasis on German range miss/gradient orientation scheme used on World War II V-2 rockets
02 p0279 A69-12362

Electric space propulsion systems and auxiliary power sources development in West Germany, noting solar cells, isotope generators and reactors with conversion systems
03 p0496 A69-13996

MPD plasma acceleration in West Germany, discussing Hall acceleration, electrodeless plasma acceleration by electromagnetic waves and space charge neutralized Hall ion thruster
[AIAA PAPER 69-279]
09 p1564 A69-21238

Cartographic representation methods in climatological regional charts, discussing topographical elements, scale, screen patterns and area color
12 p2124 A69-25893

Satellite tracking cameras developed in East Germany, discussing optical systems
13 p2262 A69-27958

German solar and space probe Hera, discussing payload and propellant
13 p2357 A69-28638

Solar telescope in Berlin observatory for prominences and other solar phenomena observations by public
15 p2611 A69-30881

Report on East German space activities to COSPAR covering ionospheric research, geomagnetism, solar activity, solar radio astronomy and international cooperation
15 p2724 A69-31453

German space research organizations, rocket ascents and programs including meteorology, aeronomy, ionospheric physics, magnetosphere, solar radiation and solar wind, astronomy, etc
15 p2725 A69-31467

German VFW 614 short haul commercial jet aircraft design, marketing, etc
16 p2734 A69-31805

German ground station commercial receiving system for satellite broadcast reception
16 p2766 A69-31855

Airport planning, discussing air transportation and city planning problems for Hannover air terminal
16 p2882 A69-32329

German VTOL aircraft development excluding helicopters, discussing technical problems, safety and economy in civil application
17 p2899 A69-33381

GERMICIDES

U BACTERICIDES

GERMINATION

Wheat seedling germination and growth processes in absence of gravitational force onboard Biosatellite 2
01 p0015 A69-10932

GETTERS

Gettering effect in silicon of phosphosilicate glass surface layer and underlying phosphorus layer on gold and copper
03 p0487 A69-13640

Vacuum restoration by laser evaporation of active media /getters/ and vapor condensation on cold substrate applicable to nonmetallic active media /titanium-magnesium oxide/
21 p3735 A69-38590

GIANT STARS

Nonlinear adiabatic pulsations of sequence of massive stars of open clusters, allowing for radiation pressure variations
01 p0149 A69-10266

Electron conductivity in low mass red giant core
02 p0327 A69-12709

Red giants limiting helium core mass dependence on total stellar mass and initial composition from stellar evolutionary models
02 p0327 A69-12710

Kinematic parameters of giant stars and stellar evolution, discussing variations as function of zone position in HR diagram
03 p0517 A69-14095

Open clusters age determination method to study giant star distribution as function of age
08 p1388 A69-20237

Color magnitude distribution as function of age for giant stars of open clusters, discussing error sources
08 p1388 A69-20238

Mass loss in Red Giant stage from statistical analysis of H-R diagrams of galactic clusters
08 p1396 A69-20642

Nucleosynthesis in dynamics of massive star cores, noting element synthesis by neutron capture in supernova explosions
08 p1401 A69-20898

High dispersion classification of early K2-M6 giants of high and low velocity, using titanium oxide band strengths criteria tested by atomic lines estimation
13 p2338 A69-27556

Optical depths of convection related to metal deficiency for main sequence and giant stars
14 p2527 A69-29946

Giant galaxy classified in terms of stellar population, discussing Orion, intermediate amorphous and combination categories
16 p2862 A69-32395

Photoelectric observations of color and titanium oxide in M7 giants in nuclear bulge of Galaxy compared with late giants near sun
16 p2863 A69-32396

Evolutionary tracks along horizontal branch of models for Population II stars in postred giant phase
17 p3030 A69-33071

Fluxes and luminous efficiencies tabulated for main sequence and subgiant stars within reflection effect problem in eclipsing binaries and Chandrasekhar non-gray atmospheric models
20 p3600 A69-37479

Giant stars UVB reddening line slopes determined from photometric data
20 p3608 A69-38047

Interstellar grains formation and composition, suggesting mixture of graphite particles in carbon stars and silicates in oxygen-rich giants
20 p3615 A69-38260

Differential curve-of-growth analysis of late type giant stars yielding chemical compositions, discussing nature and size of uncertainties in estimates
21 p3800 A69-38700

Space density of giant M stars as function of distance at galactic anticenter
22 p4014 A69-40125

C, N and O abundances in K giants alpha Boo, beta Gem and epsilon Peg, noting stellar nuclear burning and evolution
22 p4026 A69-40653

M giant star possible evolution into S star, using high dispersion spectrograms
24 p4387 A69-43349

GIMBALLESS INERTIAL NAVIGATION

Miniature floated ball gimballess inertial platform construction, functions, readout, digital computer coupling, etc
[AIAA PAPER 69-835]
21 p3761 A69-39366

Strapdown gimballess inertial measurement unit with general purpose computer, describing hardware, software and test results
[AIAA PAPER 69-850]
21 p3765 A69-39426

GIMBALS

Gyroscope error due to axial play of inner gimbal or Cardan mounting during base circular vibrations, noting axial clearance reduction
09 p1498 A69-22110

Four gimbal Cardan suspension gyroscope kinematics for nonperpendicular arrangement
09 p1502 A69-22705

Fourth angle driving law for different four gimbal systems used for simulation display and inertial platform isolation
12 p2055 A69-26265

Steady motion stability of satellite with gimbal suspended gyroscope in central gravitational field, showing no effect of satellite perturbations on gyrostatic stability
14 p2530 A69-29481

Gimbal torquing as function of gimbal structure response resulting in free gyro erection system, using any angular momentum at any initial starting angle
16 p2792 A69-32553

Boundary layer theory application to dynamics of gyroscope in gimbal suspension, defining nutational and precessional motion
18 p3135 A69-34559

Dynamic performance accuracy of astatic gyroscope with three degrees of freedom improved by inner gimbal mass increase
19 p3308 A69-35825

Triaxial static gyrostatic drifts, assuming perturbing moment steady centered random force applied along stabilizing gimbal axis
19 p3311 A69-36195

Torqued two axis gimbaled boom actuator satellite attitude control
[AIAA PAPER 68-857]
24 p4348 A69-43245

GIRDERS

Forced harmonic oscillations of one dimensional mechanical girder systems allowing for nonlinear resisting forces calculated by boundary value problem reduction to Cauchy problem
17 p3064 A69-33917

Buckling stresses in thin walled box girder under bending determined using stationary potential energy criterion
18 p3224 A69-35344

Thin walled rods for girder and frame systems designed by matrix method, solving differential equations for tension, compression, bending and torsion
23 p4230 A69-42005

Three dimensional welded structure of thin walled girders with stability loss, discussing welding strain gage measurements and simplified computational procedure
23 p4169 A69-42007

GLACIOLOGY

Earth surface temperature change quantitatively determination due to Milankovitch insolation variations
03 p0426 A69-14232

Various glacial periods mechanism ascribed to combination of long term solar activity cycle and polar migration
11 p1877 A69-24409

GLANDS [ANATOMY]

U ADRENAL GLAND

U PINEAL GLAND

U PITUITARY GLAND

U THYROID GLAND

GLANDS [SEALS]

Glass fiber filled polytetrafluoroethylene materials for piston seals in high pressure oil-free reciprocating air compressors, discussing manufacturing and non-destructive tests
19 p3323 A69-35579

GLASS

NT BOROSILICATE GLASS

NT PYROCERAM [TRADEMARK]

NT S GLASS

NT SILICA GLASS

Dynamic current-voltage characteristics of thin film diodes on chalcogenide glass base
02 p0223 A69-12834

Optical materials behavior after irradiation by high energy electrons, gamma rays or protons
03 p0493 A69-14190

Engineering glass manufacturing, properties and applications in buildings, vehicles, lamp and electronic devices, etc
04 p0619 A69-14585

Transitions in glasses at low temperatures, noting molecular relaxation dependence on copolymer composition
04 p0621 A69-15308

Glass lasers, discussing neodymium properties in glass, flexibility of glass in size, shape and optical excellence, temperature coefficient of index of refraction, etc
05 p0772 A69-16227

Fracture propagation in organic glasses, considering density of hyperbolic markings in polymethyl methacrylate and Dugdale model
05 p0784 A69-16429

Polymer glasses low temperature transitions, relating structure and transition temperature
05 p0717 A69-16493

Semiconductor glasses use for electronic devices
06 p0980 A69-17714

Mechanism for laser surface damage of glasses working through optical absorption, fluorescence, chemical reaction by quenching and breakdown
06 p0935 A69-17771

Halide salts, semiconductors and nonoxide glasses as materials for high power laser windows
07 p1144 A69-18401

Nonlinear amplification of powerful light pulses in Nd glass
08 p1323 A69-19946

Near IR transparent aluminocalcium glasses with improved spectral properties
08 p1336 A69-20386

Geochemistry and element abundances for Henbury impact glass, Darwin glass and australites, noting evidence for meteorite impact on sandstone
08 p1407 A69-20937

Glass science and technology noting optical, electrical and mechanical properties, forming techniques, structure, ionic properties, high pressure effects and glass ceramics
08 p1341 A69-21126

Pulsed and CW lasers glass crystals temperature fields determination, including tangential and axial thermal stresses
10 p1702 A69-23428

Nonlinear susceptibility tensor components and refractive index variations of liquids and glasses in high intensity ruby laser field, using interference methods
10 p1703 A69-23622

Nd glass laser for emission of high radiance diffraction limited pulses, noting long path air breakdown and second harmonic generation
10 p1704 A69-23654

Self focusing of CW argon laser beam due to absorptive heating in crown glass, emphasizing time dependence of beam diameter as function of distance
10 p1706 A69-24009

Surface-active additives effect on crystallization kinetics of silicate type glasses, discussing surface tension
11 p1907 A69-25032

Glass lasers with trivalent rare earth ions noting properties, characteristics and recent developments
11 p1898 A69-25043

Quantitative interferometric analysis of shock induced wavelength variations in glass and polished steel plates using Q switched ruby laser light source
12 p2089 A69-26185

Laser beam damage in glass blocks, noting high speed photographic study and absorption of light by inclusions
12 p2117 A69-26193

Fracture surfaces of thermally toughened glass plates using Cranz-Schardin spark camera, confirming internal front lead over front in surface layers
12 p2118 A69-26194

Spectral transmission curves in near UV for optical glasses
12 p2130 A69-26599

Tempered glass plates strength nondestructive testing by scattered light photoelastic method, discussing application to aircraft windshield sandwich structures [AIAA PAPER 68-323]
12 p2118 A69-26768

Mechanical properties of glass, discussing volume flow, hardness, strength and scratchability
12 p2119 A69-26831

Energy exchange of rare earth ions in uranyl phosphate liquids and glasses, studying sensitized luminescence origin
14 p2485 A69-29034

IR spectral transmittance and physicochemical properties of tellurite glasses with vanadium and cerium oxides, showing polymer chains in structure
14 p2468 A69-29329

Energy exchange between active centers in silicate and phosphate glass, comparing luminescent and lasing properties
15 p2632 A69-30053

Tensile, bending and impact strengths of materials produced by metal porous blank impregnation with molten glass, noting metal density and sintering effects
15 p2643 A69-31188

Electrical switching in thin film arsenic selenium telluride semiconducting glass diodes, observing formation of liquid phase and conducting filaments
16 p2760 A69-32017

Laser effect in neodymium glass, estimating efficiency of light energy output vs electric energy input
17 p2979 A69-32828

Polarized emission from Nd activated glass, establishing S and P polarization component energy dependence on pumping energy
17 p2984 A69-33974

Refractive indices for various glasses obtained as function of wavelengths and temperature, using spectrometer as collimator
17 p3007 A69-34158

Shock tube with cylindrical explosive to implode glass wall and produce high velocity glass particle jet, studying jet velocity and behavior and test gas pressure effects
18 p3116 A69-34460

Hypervelocity micrometeor impact sites identification on aluminized glass, using conchoidal pattern as criterion in analysis
18 p3199 A69-34952

Thermal coefficient of optical glasses refractive index determined by interferometry, noting relation to glass chemical composition
18 p3172 A69-35013

Optimum solar cell cover glass systems selected by studying interplanetary space environment effects of proton impact, temperature and concurrent illumination on radiation damage
19 p3253 A69-35702

Optical and electrical properties of thin amorphous films of glass-forming oxide, using X ray diffraction and electron microscopy for structural features
19 p3391 A69-36561

Glassy semiconductors from metallic alloy binary and ternary systems of sulfide, selenide and telluride noting properties
19 p3392 A69-36641

Active center chemical bond alteration influences on luminescence characteristics of phosphate glasses, noting quick energy transfer via ions
20 p3552 A69-37017

Glass lasers development, operation, composition, applications, etc
21 p3734 A69-38407

Absorption and fluorescent spectra, relaxation times and quantum efficiencies measured for glasses doped with trivalent erbium, reviewing spectroscopic parameters involved with laser effect
22 p3962 A69-40476

Glass filter systems for aerial color photography developed from spectral studies of sunlight, skylight and airlight in Rayleigh atmosphere
22 p3948 A69-40986

Darwin and Macedon impact glasses related to Far Eastern tektites through age determination by fission track technique
23 p4210 A69-41344

Fission track ages of tektites, australites and related glasses, considering errors due to annealing and etch pits
23 p4210 A69-41345

Black magnetite bearing spherules extracted from tektites, and magnetic fractions of impact glasses, determined by reflecting microscope and electron microprobe
23 p4210 A69-41349

Mechanical properties of glass and glass-ceramics products improvement through prestressing
24 p4335 A69-43034

GLASS COATINGS

Glass ceramic coated and bonded silicon semiconductor material in integrated circuits devices fabrication, noting matched thermal expansion
15 p2669 A69-31040

Glass encased electronic components with conformal coatings, considering glass breakage at low temperature
19 p3281 A69-35547

GLASS ELECTRODES

Glass pleats and cold cathodes in laser discharging tube, discussing angular displacements
03 p0435 A69-12981

GLASS FIBERS

Creep and stress rupture strength of unidirectional glass fiber reinforced plastics, using tensile tests
01 p0101 A69-10080

Reinforcing glass fiber fillers in thermoplastic commercial products, noting applicability to high speed fabrication by injection molding processes
02 p0269 A69-11794

Fatigue properties and failure mechanisms of glass reinforced plastics based on chopped strand mat-polyester resin laminates
02 p0269 A69-11795

Fiberglass reinforced plastic laminates failure under biaxial compression due to layer separation with strain energy as endurance criterion
02 p0270 A69-12142

Glass fiber reinforced plastics - Conferences, Freudenstadt, West Germany, October 1968
03 p0453 A69-13819

Knee in stress-strain diagram and crack formation in glass fiber reinforced plastics, discussing effect on construction load capacity
03 p0453 A69-13820

Glass fiber reinforced plastic in aircraft construction, considering cellular weight and economy
03 p0454 A69-13821

Light passenger aircraft of glass fiber reinforced plastic, using hose construction technique
03 p0454 A69-13822

Glass fiber reinforced plastics aging behavior under heat and weathering influence
03 p0454 A69-13823

Damping properties of glass fiber reinforced plastics measured by flexural vibrations
03 p0454 A69-13824

Helicopter rigid rotor system with blades of glass fiber reinforced plastic
04 p0548 A69-14817

Shear strengths of polyimide and polybenzimidazole resin/fiberglass reinforced honeycomb materials compared to previous high temperature materials, noting lightweight sandwich aircraft structures
04 p0620 A69-14844

Piezooptical method applied to anisotropic bodies and reinforced plastics, deriving relation between dielectric tensors and stresses and strains
05 p0837 A69-16038

Cryogenic mechanical properties of epoxy resins and glass/epoxy composites
05 p0785 A69-16491

Stress direction and mean stress effects on fatigue properties of fiberglass reinforced plastics
06 p0945 A69-17124

High transmittance long fiber optics, presenting data on special transmission as function of temperature
06 p0958 A69-17677

Resin bonded glass cloth for large airframe structures rectification
06 p0931 A69-17713

Anisotropic glass fiber reinforced epoxy resin composite under biaxial and uniaxial loads, noting isochromatics and isoclines in photoelastic analysis
07 p1170 A69-18715

Hingeless fiberglass rotary wings dynamics, discussing effects of in-plane bending to flapping frequency ratio [AIAA PAPER 69-204]
07 p1054 A69-19548

Fiberglass reinforced plastics modulus of elasticity and Poisson ratio determined by strain gauges and frequency and resistivity measurements
08 p1335 A69-20330

Structural parameters influence on fiberglass reinforced plastics strength studied for optimal structure selection
08 p1335 A69-20332

Structural residual stresses determination in oriented fiberglass reinforced plastics by models taking into account mutual influence of fibers
08 p1335 A69-20333

Fiberglass reinforced plastic plates strength coupled to elastic base with allowance for tangential shearing stresses
08 p1412 A69-20334

Tensile stress and energy-to-break values compared for glass-fortified thermoplastic resins, discussing notched and unnotched Izod impact
08 p1337 A69-20480

Silane coupling effect on composite properties of glass fiber filled injection molded polypropylene, noting interface phenomenon

08 p1337 A69-20482

Tensile strength of glass-fiber reinforced epoxy resin laminates subjected to fluctuating tension, discussing crack density dependence on fatigue stress cycles

08 p1338 A69-20494

Matrix properties related to torsional fatigue life of fiberglass reinforced NOL rings, using polyester and epoxy resins as model systems

08 p1339 A69-20495

Shop-ready high modulus carbon and fiberglass composite reinforcement system, stressing effect of modulus fibers amount in laminate

08 p1340 A69-20508

Halocarbon solvent for application of chlorosilane finish to heat cleaned glass fabric for reinforcement of plastic, noting relative humidity effect

08 p1341 A69-20513

Direct chemical bonding effect on flexural strength and flexural modulus of glass fiber reinforced plastics, noting degradation reactions

08 p1341 A69-20514

Radial and tangential stresses in double glass fiber assuming different Poisson coefficients, determining conditions for axial stress redistribution prevention

09 p1614 A69-21741

Failure modes in fiberglass reinforced epoxy laminates subjected to compression loadings, discussing cracks formation and delamination at glass-resin interface

09 p1529 A69-22305

Glass fibers size, finish and surface treatment identification by pyrolysis attenuated total reflectance IR spectroscopy

09 p1448 A69-22315

Prepreg based on S glass with HTS finish and B staged epoxy resin, discussing tensile strength and moisture exposure

09 p1530 A69-22327

Polyimide glass fabric laminates with nonflammable characteristics for high O concentration spacecraft environments applications

09 p1531 A69-22366

Strength of laminated glass filament reinforced plastic material in biaxial loading, discussing strength theories

10 p1794 A69-22943

Chemical composition effect on glass fibers strength, discussing reasons for increased surface layer strength

10 p1717 A69-24045

Glass reinforced plastic molding compounds for OV-10A airplane structural components, noting cost savings

[SAE PAPER 690342] 11 p1890 A69-24497

Single and clad glass fibers radii and refractive indices measurements on basis of laser light scattering

11 p1918 A69-25044

Glass fiber reinforced plastics tensile strength at low and high temperatures

11 p1907 A69-25181

Birefringent coatings application to plane stress in orthotropic glass-fiber reinforced plastic materials noting stress-strain relations

11 p1995 A69-25647

Glass fiber reinforced plastics shells stability under external hydrostatic pressure, discussing compression and axial tests for normal elastic modulus, shear modulus and Poisson coefficient

11 p1995 A69-25681

Fracture mechanics of polymers and fiberglass reinforced plastics, indicating microcracking under static and cyclic loading due to resin phase brittleness and low strength

12 p2120 A69-26849

Glass reinforced plastics for Hovermarine HM.2 sidewall hovercraft designed for ferry routes

13 p2201 A69-27542

Short fiber composites flow orientation in system of high volume glass fibers in epoxy resin measured by glass rheometer

13 p2287 A69-28670

Glass finish and glass resin chemical bond adhesion roles in filament wound structures response, failure and filament strength

14 p2468 A69-29345

Tissue-type fiberglass reinforced material properties as prototype of continuous anisotropic hereditary elastic media

15 p2642 A69-30584

Stress concentration on circular holes and notches in anisotropic oriented glass fiber reinforced plastics determined by using photoelastic birefringent coatings

15 p2713 A69-31053

Flexible glass fiber optics, discussing total internal reflection, light and image transmission, digit display and waveguide for laser communication

16 p2789 A69-31933

Composition effect on tensile and flexural moduli of composites containing randomly distributed fibrous strands, establishing strength-composition relationships

17 p2991 A69-32960

Shear modulus of fiberglass reinforced plastics determined from torsional tests on squared beam of orthotropic material, evaluating influence of end conditions

17 p3058 A69-33204

Heat transfer suppression techniques in high temperature low density fiberglass insulation for flight vehicles

[AIAA PAPER 69-606] 17 p3072 A69-33279

Fiberglass reinforced plastics internal heat shielding for isopropyl nitrate rocket combustion chamber, considering lining resistance and safety during repeated firing /Ludion motor/

17 p3019 A69-33343

Wire wound glass fibers for rocket motors, discussing rupture strength

17 p3021 A69-33357

Nondestructive tests for glass filament wound composites void content, considering test methods and mechanical properties prediction role

17 p2979 A69-33656

Energy dissipation in fiberglass reinforced plastics subjected to axially induced sinusoidal stresses, noting absorption coefficient and hysteresis heating

17 p2993 A69-33937

Phenolic resin and silica cloth laminates transparency to IR radiation, noting experimental results

18 p1336 A69-34640

Axissymmetric deformation of cylindrical wound fiberglass reinforced plastic shell analyzed by methods of rigid normals and nonlinearly elastic fiber system

18 p3222 A69-34974

Nonlinear axisymmetric oscillations and motion stability of cylindrical wound elastic glassfiber shell under time dependent uniform internal pressure

18 p3222 A69-34975

Fiberglass reinforced plastics short and long term strength anisotropy, correlating stress and logarithm of time to rupture under tension along different directions

18 p1362 A69-35352

Fiber distribution in oriented fiberglass reinforced plastics, noting statistically isotropical distribution and use for regular structure model

18 p1362 A69-35355

Optimal structure model of fiberglass reinforced materials with polymer matrix, obtaining strength utilization coefficient dependence on length/ diameter ratio

18 p1362 A69-35356

Oriented glassfiber reinforced plastics elastic moduli and tensile strength along anisotropic axes determined nondestructively, considering component content and material porosity

18 p1362 A69-35359

Statistical description of microstructural elements /fibers and fillers/ in unidirectional fiberglass reinforced plastics determined in lattice nodes

18 p1363 A69-35363

Linearity range of viscoelastic properties of fiberglass reinforced plastics, calculating stress-strain state

18 p1363 A69-35364

Longitudinal modulus of interlaminar slip during creep of fiberglass reinforced plastic determined by bending tests of beams under concentrated force

18 p1363 A69-35365

Fiberglass-reinforced plastics longitudinal and transverse strain relations at various temperatures

18 p1363 A69-35366

Phenomenological creep theory for woven fiberglass reinforced plastic under moderate loads

18 p3226 A69-35373

Polyimide resin system for glass reinforced laminates, noting processing characteristics and curing

19 p3353 A69-35505

Military storage and environment effects on strength of filament wound glass reinforced epoxy structures, tested on plastic motor case and pressure vessels

19 p3321 A69-35567

Ultrasonic nondestructive testing technique for fatigue induced damage location and criticality in filament wound fiberglass cylinders, correlating damage to residual life

19 p3322 A69-35577

Glass fiber filled polytetrafluoroethylene materials for piston seals in high pressure oil-free reciprocating

air compressors, discussing manufacturing and non-destructive tests

19 p3323 A69-35579

Creep strength of fiberglass reinforced polyester resins measured on structural components in long term tests under torsion

19 p3358 A69-35830

Design and fabrication of plane and trapezoidal fiberglass wings with laminar plastic profiles for aerodynamic tests, including wing rigging and slotted wing

19 p3324 A69-35831

Glass fiber with epoxy resins compared to polyester resins, discussing chemical reactions, bonding and strength relations

19 p3358 A69-35902

Glass fiber laminates based on epoxy organosilicon resins, discussing various hardeners effects on strength, etc

19 p3358 A69-35903

Storage and loss moduli measurement for laminated glass fiber reinforced epoxy composite beams, discussing moduli prediction

20 p3627 A69-37763

Polarizable ions effect on glass fibers strength retention, noting fatigue tests for hydrolytic stress corrosion

20 p3567 A69-37769

Radial and tangential stresses in double glass fiber assuming different Poisson coefficients, determining conditions for axial stress redistribution prevention

20 p3630 A69-38217

Silico-organic liquid water repellent coatings for increasing binder adhesion to glass fiber in glass fiber reinforced plastic materials of aircraft components

21 p3752 A69-38876

Tensile strength of glass and graphite fibers for fiber reinforced plastics (FRP) tested with modified balance type and strain gage type tensile testers

21 p3753 A69-39799

Residual stress effect on strength of oriented glass fiber reinforced plastics under transverse and longitudinal tension

22 p3973 A69-40745

Stress analysis during solidification of binders in glass fiber reinforced plastic materials, using resin coated glass film simulation

22 p3973 A69-40746

Porosity and composition effects on thermal conductivity of glass fiber reinforced plastics, noting tests of multilayer textolite sheets

22 p3973 A69-40747

Summation methods for multiple damages caused by static fatigue in glass fiber reinforced plastics under stepwise loads

22 p3974 A69-40748

Initial stress dependence on tensile load in glass fiber reinforced plastic rings during winding

22 p4045 A69-40749

Glass fibers strength in relation to surface defects, comparing behavior of flawless and commercial fibers

22 p3974 A69-41039

HF data transmission system unaffected by high energy electromagnetic fields using GaAs IR emitting diode, glass fiber optic light guide and photomultiplier tube

23 p4121 A69-41768

Temperature influence on mechanical properties and creep curves of fiberglass reinforced textolites compared with data from elasticity theory

23 p4179 A69-41993

Mechanical properties of fiberglass reinforced textolite at normal temperature, noting applicability of elasticity formulas

23 p4179 A69-41994

Vacuum cured glass-reinforced polyimide laminate tests for use at elevated temperatures on F-111 aircraft

24 p4335 A69-42933

GLASSWARE

Glass vacuum systems grease free assembly method using heat shrinkable polyolefin sleeve tubing connector for compression of O ring joints

08 p1320 A69-20529

GLAUCOMA

Glaucoma in commercial airline pilots noting value and safety of routine tonometry

03 p0376 A69-14078

Indentation tonometry for occult pathology and glaucoma in commercial pilots

23 p4088 A69-41805

GLAUERT COEFFICIENT

U AERODYNAMIC FORCES

U MACH NUMBER

GLAZES

Apollo 11 observations of lunar surface glazing, considering radiation heating due to solar outbursts, rocket exhaust effects, shock heating or volcanism, erosion, etc 23 p4216 A69-42202

GLIDE LANDINGS

Subsonic glide landing approach guidance for unpowered lifting vehicles, using perturbation feedback and approximation of heading and position coordinates [AIAA PAPER 69-865] 21 p3763 A69-39391

GLIDE PATHS

Hypervelocity glide vehicle optimum maneuvers, finding lift optimal control law for maximization of final velocity or altitude 17 p3025 A69-32836

Vertical path guidance computer, noting applications to feeder airlines and air taxi services operating from airports with VOR/TACAN/only 17 p3003 A69-34104

On-course monitoring for instrument landing system glide path operating with far field samples 17 p3003 A69-34105

Mathematical model of fields reradiated by Huygen sources in front of array for glide path site analysis 17 p3003 A69-34107

Wind shear effects on jet aircraft approach, discussing airspeed and glide path position maintenance requirements [AIAA PAPER 69-796] 19 p3367 A69-35634

Ground based guidance for land-landing manned spacecraft with low velocity descent systems, discussing high and low altitude glide path intercept and spiral [AIAA PAPER 69-864] 21 p3762 A69-39390

GLIDERS
NT FLEXIBLE WINGS
NT HL-10 REENTRY VEHICLE
NT HYPERSONIC GLIDERS
NT PARAGLIDERS

Frequencies and natural oscillation modes in sporting gliders, demonstrating horizontal oscillation induced aileron suspension brackets destruction 04 p0549 A69-15416

Testing techniques and graphical presentation of test results to determine resonant frequencies and oscillation modes in sporting gliders 04 p0549 A69-15420

Open class type glider design, discussing structural materials, dimensions and control 05 p0702 A69-16027

Integrated shrouded propeller as glider thrust source permitting powered takeoffs and updraft independence 05 p0702 A69-16379

Wind tunnel measurements on integrated shrouded propeller model proposed for power gliders 07 p1052 A69-19633

Lateral stability of glider towed by cable in steady rectilinear horizontal flight, deriving motion equations as ordinary differential equations 09 p1433 A69-21498

Schleicher glider AS-W15 prototype tests, discussing balsa sandwich structure and flight characteristics 10 p1633 A69-22872

Approximation formula for calculating descent speed and lift-drag ratio 10 p1633 A69-22873

Monograph on optimal design of free-running drag turbines for boundary layer suction in aircraft, emphasizing gliders performance 12 p2011 A69-26117

Spectral model used for analysis of atmospheric turbulence as related to loads on gliders 12 p2127 A69-26931

Sailplanes design, discussing structural flexibility, deformations, aeroelastic effects and plastics and man-made fibers 15 p2551 A69-30899

Optimum overestimate to obtain bound permitting use as convergence criterion for iterative process in orbital glider reentry trajectory optimization [ONERA-TP-628] 16 p2805 A69-32332

Maximum trajectory for glider entering earth atmosphere at supercircular velocity, subject to maximum altitude constraint 19 p3399 A69-35667

Wakkel engine development in Poland for powered military gliders at 18 hp and 5500 rpm 22 p3999 A69-40006

Glider pilots fatigue attributed to nutritional habits 23 p4106 A69-41796

Long term fatigue tests of wooden gliders, discussing structural materials fatigue strength and glider strain spectra 24 p4398 A69-42912

Flight range and fuel consumption formulas of power gliders used for transportation compared with automobiles 24 p4253 A69-43142

GLIDING

Flight dynamics problems, determining extremum of functional by graph-analytical method and with aid of Pontryagin maximum principle 11 p1823 A69-25343

GLINT

Tracking radar glint analysis model using diffraction theory to evaluate parameters of fields received from scattering centers on target aircraft 01 p0033 A69-11007

GLOBAL TRACKING NETWORK

CNES worldwide network of tracking stations, describing equipment, location, organization and center of operations 02 p0228 A69-11922

International 28-station global instrumentation ground support network for space tracking and data acquisition [UN PAPER 68-95912] 06 p1043 A69-17059

Space communication, discussing global network of Intelsat satellites ground facilities, regional switching, RF channels, etc 06 p0890 A69-17860

Pivotal computer operations in Apollo NASA Communication Network, describing UNIVAC computers in use and design considerations 18 p3100 A69-34267

GLOBULES

Ionized gas flow from globule containing atomic H in interstellar space, noting surrounding H II region and radiation at ionization front 10 p1782 A69-23682

GLOBULINS

U GAMMA GLOBULIN

GLOSSARIES

U DICTIONARIES

GLOTRAC [TRACKING NETWORK]

U GLOBAL TRACKING NETWORK

GLOVES

Finger dexterity in JMG-1 pressure gloves with regard to efficiency associated with fine adjustments 06 p0884 A69-18032

Control operation time found dependent on gloves, physical characteristics of control and type of required operation 10 p1648 A69-23180

Glove characteristics effects on manipulability, finding operation time differences between gloved and barehanded operation dependent on type of required control operation 10 p1648 A69-23181

GLOW

U LUMINESCENCE

GLOW DISCHARGES

Time dependent functions integration by glow discharge tube and oscillator, discussing device for voltage measurement and applications in meteorology and geophysics 02 p0251 A69-12773

Frequency conversion in sheath capacitance of glow discharge plasma contained within metallic coaxial cylinders 04 p0634 A69-14456

Hydrazine decomposition in glow discharge, analyzing emission spectra and threshold level of decomposition by gas chromatography 04 p0646 A69-14860

Electron beam welding using glow discharge as source of electrons, noting hollow anode gun design and electrode geometry influence on beam shape 04 p0608 A69-15480

Oxygen ions motion in oxygen, measuring drift velocities in glow discharge 05 p0795 A69-15662

Equivalent circuit diagrams for impedance of plasma column in low current low pressure glow discharge 05 p0800 A69-15742

Mass spectrometric technique applied to positive column of hydrogen glow discharge for plasma properties, including relative densities of various hydrogen ions 05 p0802 A69-15913

Glow discharge technique for dielectric layer deposition between metal interconnection patterns in mul-

tilayer integrated circuits, noting adhesion and feedthrough problems 06 p0931 A69-17201

Spectroscopic analysis of hydrogen spark plasma discharge parameters at small PD values, discussing shock wave initiation accounting for transition to quasi-stable phases 08 p1360 A69-20100

Striation formation during steady state glow discharge, noting origin in cathode interfacial positive ions 09 p1545 A69-21343

Faraday dark space geometries in glow discharge, using superposition principle to divide electric field for transition visualization 09 p1540 A69-22099

Laser radiation produced by continuous glow discharge within Al hollow cathode, determining laser power in terms of He-Ne mixture pressures 09 p1519 A69-22245

Cathode material effects on temperature coefficients for glow discharge tubes, noting running voltage pressure characteristics 09 p1468 A69-22602

Pulsed glow discharges in He and He-H mixtures for high current density, noting electric field and wall potential distributions 10 p1739 A69-23660

Charge transport in high pressure RF glow discharge in air at atmospheric pressure based on model plasma 10 p1740 A69-23662

Field effect on positive column plasma of glow discharge in air, analyzing near wall potential and conductivity 10 p1741 A69-23946

Fresnel dragging effect on 3 cm microwaves by electron gas drift in low pressure glow discharge, noting electron density and excitation modes 12 p2133 A69-25766

Electromagnetic field induced plasma oscillation amplitude dependence on field frequency as function of field amplitude and discharge current at low N pressures 13 p2313 A69-28332

Screw instability in glowing discharge plasma column in longitudinal magnetic field generalized to instabilities in low pressure arc, Penning and high current discharges 13 p2315 A69-28526

Carbon dioxide dissociation by electron impact, determining reaction rate in positive column of DC glow discharge 14 p2488 A69-29095

Magnitude and type of wall losses from small opening in discharge tube for positive plasma column of low pressure glow discharge in hydrogen 14 p2493 A69-29691

Langmuir probe measurements leading to electron groups composition of electron velocity distribution function in negative glow light 14 p2493 A69-29694

Disturbance currents from penetration of acoustic waves in weakly ionized gas, analyzing wave interaction with DC glow discharge 15 p2665 A69-31547

Correlation coefficient of light fluctuations measured in Ar plasma in positive column of glow discharge, noting ionization wave appearance at critical gas pressure 16 p2822 A69-32039

Light sources in 0.15-20 micron spectral range from published literature, unpublished reports, light source manufacturers and individuals 23 p4191 A69-42190

Mechanism for pink afterglow accompanying microwave discharge in pure nitrogen, emphasizing gas kinetic temperature role 24 p4353 A69-43749

GLUCOSE

Blood glucose measured before, during and after high performance aircraft flight for occurrence of fasting hypoglycemia 09 p1445 A69-22555

Glucose disappearance rate from dogs blood at simulated 27,000 ft altitude compared with tolerance at ground level, discussing chlorpromazine administration effect 14 p2408 A69-29305

Enzymatic processes of glucose metabolism in immature rats lymphatic tissues during exercise-induced elevated corticosteroid secretion 23 p4080 A69-41405

GLUES

GLUES

Glued metal joints under cyclic loading evaluated by change in short term strength as function of time at stress levels

04 p0605 A69-14540

F-111 sandwich structure adhesive joints glueclines, describing thickness measurement techniques and acceptance criteria

24 p4403 A69-43461

GLUTAMIC ACID

Glutamic acid metabolism compartmentation in brain cortex demonstrated in vitro, using isotopic labeling

18 p3096 A69-35172

GLYCERINS

U GLYCEROLS

GLYCEROLS

Raman effect in liquid glycerol obtained with 4880 A ionized argon laser, determining valence vibrational frequencies

03 p0440 A69-13366

Physical and psychic stress effects on phosphatidyl glycerol and related phospholipids concentration in human and rat blood plasma

23 p4088 A69-41815

GLYCINE

Pyroelectric crystals transparent at laser output wavelength used for recording transmitted radiation, noting response of triglycine sulfate crystal

03 p0438 A69-13050

GLYCOLS

Heat transfer principles analyzed in development of new quenchants for aluminum, noting properties of inversely water soluble polyalkalene glycols

01 p0087 A69-10900

Aluminum corrosion and inhibition mechanisms in ethylene glycol/water solutions, using controlled powder immersion tests

02 p0265 A69-11895

Mass spectral fragmentation of substituted aliphatic glycols and hydroxylated carbon-carbon bond

09 p1448 A69-22551

Polydiethylene glycol-bis-allyl carbonate /PBAC/ Hugoniot equation of state, reporting shock data, discussing applications to propellant testing

16 p2879 A69-32179

Ignition hazards in electrical circuits contaminated by glycol fluids, describing hazard detection by RF methods, decontamination procedures, safety checks, etc

19 p3359 A69-36028

Beta-thiodiglycol effect on hardening of epoxy resin with stoichiometric amounts of maleic anhydride and methyltetrahydrophthalic anhydride

22 p3973 A69-40677

GLYCOLYSIS

Glycolysis rate role in regulation of substrate inhibition of dehydrogenases

01 p0015 A69-10931

Glycolysis rate and lactic acid content in rats myocardium during adaptation to hypoxia, using pressure chamber

10 p1645 A69-23501

Glycolysis control by respiration in human leukocytes with and without Pasteur effect conditions

15 p2555 A69-30413

GODDARD EXPERIMENT PACKAGE TELESCOPE

U PARTICLE TELESCOPES

GOLD

Electrical resistance temperature dependence below room temperature for polycrystalline epitaxially grown Au and Ag films, noting effects of alpha irradiation

03 p0486 A69-13582

Gold and iridium concentrations in meteoritic and terrestrial materials by neutron activation, discussing chondrules, meteoritic troilite and metallic spherules

08 p1404 A69-20918

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects

09 p1555 A69-21470

Effects of cold electron and light emission centers from dispersed Au films in electric field, as universal qualities characterizing dispersed metal films

14 p2504 A69-28992

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects

15 p2669 A69-30715

Electromigration role in material accumulation and depletion forming regions in Au film conductors, discussing regions origin from and correlation with thermal gradients along conductor

17 p2936 A69-32896

Gold donor level impurity photovoltaic effect in silicon, noting solar cell efficiency reduction due to minority carrier recombination

19 p3381 A69-35679

Mean adsorption lifetimes and activation energies of Ag and Au on polycrystalline tungsten substrate in ultrahigh vacuum system free of hydrocarbon contamination

23 p4198 A69-41542

GOLD ALLOYS

Treatment and testing of thin platinum and gold alloy wires used in thermoelements for studying liquid fuel vaporization in combustion chambers

07 p1130 A69-18258

Fe-Fe interactions influence on increase in thermoelectric power with applied magnetic field at low temperatures for dilute alloys of Fe in Au

10 p1639 A69-23861

GOLD COATINGS

Surface layer effects on conductivity of vacuum deposited gold films, studying resistance variations with film thickness

02 p0300 A69-12625

Scale effect on gold films electrical conductivity, analyzing film thickness and electron parameters of mean free path, concentration and surface reflection

12 p2143 A69-26459

Gold-underlayer film combinations adhesion to oxide substrates, describing adhesion changes as function of Au and underlayer film thickness, time, environment, etc

13 p2321 A69-28007

Spray deposition of low emittance gold thermal control coatings on aerospace structures

15 p2618 A69-30310

Activation energy of annealing of lattice defects in Au films deposited under irradiation with Au ions

18 p3182 A69-34349

Gold/polycrystalline cadmium selenide film contact found ohmic in darkness and barrier in light, noting potential distribution, electron concentration and energy gap

19 p3384 A69-36480

Corrosion of Ni through porous Au plate in humid sulfur dioxide atmospheric environments, analyzing product deposits and contact properties

23 p4176 A69-41534

GONDOLAS

Stabilization system design for stratospheric balloon gondolas, discussing optimal system with flywheel and weight combination

17 p2898 A69-33242

Stratospheric balloon vertical oscillations and gondola attitude during long flights

19 p3248 A69-36689

Balloon-borne gondola azimuth stabilization using lunar tracker

20 p3538 A69-37300

GONIOMETERS

Directional properties of electro-optical goniometric system based on known design parameters

14 p2420 A69-29332

Transistorized VOR system using electronic goniometer and fixed antennas, describing power supply, transmitter, goniometer, antenna and design

16 p2827 A69-31938

Ruby laser goniometric and telemetric echoes by photographing Geos satellites

21 p3671 A69-38335

GOSS (SUPPORT SYSTEM)

U GROUND OPERATIONAL SUPPORT SYSTEM

GOVERNMENTS

Federal government contracting, discussing legality of NASA service contracts

05 p0850 A69-15987

V/STOL aircraft future, discussing Federal Government policies, economics, airport planning, engineering problems, etc

10 p1811 A69-23221

Government flight recorder regulations, detailing approved systems

10 p1691 A69-23246

Flight data recorders history and regulations, discussing parameters and design of systems

10 p1691 A69-23247

Potential hazards of government sponsored technology, examining SST and fluoridation projects and weather problems

10 p1811 A69-23392

Federal, state and municipal jurisdictional aspects for heliport establishment, detailing regulations

13 p2381 A69-27433

Urban noise control over transportation systems including aircraft and highway traffic operating beyond local noise ordinance purview

14 p2541 A69-29157

Equipment testing, discussing collaboration between government agencies and independent environmental testing laboratories

15 p2720 A69-30398

Flying offenses committed by private and professional pilots in Great Britain, discussing role of authorities involved

17 p3077 A69-34202

Reliability management simulation exercise training technique for government personnel, discussing decision making in development, production, testing and field usage of systems

18 p3117 A69-34487

In-house research on R and D management in government agencies, discussing manning, training, center programs, case studies, etc

20 p3640 A69-38022

Planning for safety of future supersonic air traffic including financing and coordination activity of government and industry

22 p4054 A69-41131

GOVERNORS

U SPEED REGULATORS

GRADE

Runway grade relation to jet aircraft takeoff length

19 p3296 A69-36874

GRADIENTS

NT ELECTRON DENSITY PROFILES

NT POTENTIAL GRADIENTS

NT PRESSURE GRADIENTS

NT TEMPERATURE GRADIENTS

Conjugated gradient components of optimization criterion in automatic control determined by applying sensitivity method to computation

11 p1857 A69-24367

Branched trajectory optimization for split rocket vehicles using projected gradient or steepest descent method

[AIAA PAPER 69-917] 21 p3808 A69-39346

GRADIOMETERS

U MAGNETOMETERS

GRADUATION

U CALIBRATING

GRAIN BOUNDARIES

Slip band continuity across grain boundaries in aluminum bicrystals reexamined for geometrical criteria

01 p0095 A69-10607

Grain boundary gas bubbles growth in chemically vapor deposited tungsten as function of annealing time, temperature and fluorine content

01 p0097 A69-10646

Light austenitic grain boundaries in heat treated Cr-Mo-W-V alloy steels

01 p0100 A69-11295

Magnified image of Al-Mg specimen microanalyzed during examination by electron microscope, studying segregation and initial precipitation at grain boundaries

03 p0442 A69-12894

Mechanical effects of grain boundaries, considering hardening associated with vacancies and vacancy-solute interactions

03 p0449 A69-13875

Interfaces role in Ni-base superalloy, discussing grain boundaries and coherent/incoherent phase boundaries

03 p0449 A69-13878

Grain boundary interaction energy with inclusion of second phase, describing equilibrium and boundary shape

03 p0449 A69-13880

Grain boundary sliding influence on gross mechanical behavior and stress distributions, emphasizing creep behavior

03 p0450 A69-13882

Long term creep behavior of nickel-chromium-molybdenum alloy, noting temperature effect on grain boundaries

05 p0781 A69-16500

Grain strain measurements use in studies of high temperature creep

06 p0943 A69-17231

Grain size dependence of yield, flow and fracture stresses of Fe-Co-V alloy for 77-298 K

07 p1166 A69-19264

Grain boundaries structure in tungsten wire using auto ion microscope, showing misorientation corresponds to high density coincidence site lattices

08 p1329 A69-19943

Grain-size refinement of beryllium castings and extrusions after compression in pressure chamber, determining effect on ductility

08 p1330 A69-20013

Grain morphology and preferred orientation effects on direction and propagation of stress corrosion cracking of aluminum alloy plate

09 p1521 A69-21399

Structure transitions in iron meteorites from Widmanstätten to granular pattern to study Barringer crater and Canon diablo meteorites formation

09 p1597 A69-22154

Thin sections of ringwoodite natural spinel in Tenham meteorite shower, observing various rounded purple isotropic grains

09 p1597 A69-22155

Stress corrosion of nonage-hardenable Al-Mg-Cr alloy investigated for failure in absence of grain boundary precipitate, using notched specimens

10 p1709 A69-23055

Carbide precipitation in stainless steels using metal foil and extraction replicas, discussing grain boundaries corrosion relation

10 p1713 A69-23820

Brittle fracture at high temperatures in titanium alloys using scanning electron beam microanalysis, noting reaction diffusion with atmosphere and grain boundaries destruction

10 p1713 A69-23823

Near boundary zones in VT15 Ti alloy not involved in beta phase decomposition during aging below 500 C attributed to vacancy concentration decrease

11 p1902 A69-24275

Structural imperfections of CdSb single crystals undoped and doped with tellurium and indium noting etching techniques, grain boundaries and impurities

11 p1938 A69-25030

Solid titanium surface energy determination, taking into account grain boundaries effect on accuracy

12 p2113 A69-26045

Grain size effect on room temperature tensile strength of alpha-titanium analyzed by tensile testing and electron transmission

13 p2280 A69-27766

W shear moduli at high temperatures measured by forced torsional vibration in wide frequency ranges, discussing grain boundary effects

14 p2465 A69-29651

Thermal stability of Hastelloy Alloy C-276 determined from time and temperature tests for corrosion and grain boundary precipitation

16 p2799 A69-31719

Grain boundaries contribution to creep deformation, discussing ratio of grain boundary slip strain to total creep strain

17 p2985 A69-32905

Creep behavior of oriented Al bicrystals, emphasizing intergranular creep types and crystal orientation

17 p2985 A69-32906

Creep experiments on Mg alloys, discussing dispersed phases influence on creep cavitation and grain boundaries mobility

17 p2985 A69-32907

Polygonization and strengthening effects simultaneous action at grain boundaries increased thermal stability of thermomechanically treated Ni-Cr alloy

17 p2991 A69-33940

Aluminum oxide relative grain boundary energy and surface diffusion coefficient, considering thermal grooving of bicrystals with symmetrical tilt boundaries

17 p2993 A69-34191

Secondary recrystallization in cold rolled molybdenum foil as function of temperature using electron microscopy and diffraction

18 p3157 A69-35253

Annealing temperature effect on Ni-Ti alloys internal friction, noting peak connected with solid solution grain boundaries

18 p3158 A69-35443

Liquid sodium penetration into stainless steel grain boundaries, using laser microprobe

18 p3154 A69-35473

Aluminum 7 percent Mg alloys stress corrosion cracking, presenting aging kinetics and depletion zone dislocations at grain boundaries

19 p3350 A69-36896

Grain boundary grooving kinetics for Cr, W and Mo in Ar and vacuum, determining interface free energies and surface self diffusion coefficients

21 p3744 A69-38740

Al discontinuous deformation noting role of intergranular boundary surface at low temperatures

21 p3750 A69-39789

Spherulite boundaries and interspherulite breakdown in polyethylene, considering structure control by varying macromolecular microstructure

22 p3973 A69-40740

Hydrogen permeability in Pd alpha phase measured, coupling with grain size measurements for grain boundary to bulk diffusivity ratio

23 p4175 A69-41502

GRAINS

Photographic emulsion layers depth dependence of darkening curve, modulation transfer function and granularity, determining properties by enzymatic and electrolytic treatments

12 p2089 A69-26196

Grains with high defect concentration in circumstellar and interstellar space from energetic particles and photons bombardment, discussing lifetime and optical properties

22 p4023 A69-40472

GRAINS [FOOD]

Wheat seedling germination and growth processes in absence of gravitational force onboard Biosatellite 2

01 p0015 A69-10932

Weightlessness and vibration effects on soft red winter wheat seedlings

15 p2557 A69-31368

GRAMMARS

Algorithm for programming language grammars conversion into pushdown store automata translators

21 p3679 A69-39607

GRANITE

Granite compressional wave velocity and electrical resistivity variations with depth, explaining discrepancy between in situ and laboratory measurements on dry samples

02 p0241 A69-11806

GRANTS

NASA university program, discussing participation in space and aeronautics development based on project oriented research grants and Sustaining University grants

[UN PAPER 68-95413] 01 p0179 A69-10506

GRANULAR MATERIALS

Detonation generation in granular explosive subject to different shock wave intensities due to variable impact velocity

02 p0349 A69-11527

Shock initiation and sensitivity of granular explosives, noting heterogeneity effect in ammonium perchlorate

10 p1751 A69-23016

Interstellar grain model consisting of elongated dielectric particles represented by infinite circular cylinders reproducing observed interstellar extinction in IF far UV spectra

10 p1781 A69-23674

Circumstellar grain compositions of stars with various O to C abundance ratios, calculating molecular equilibrium of condensates and gaseous compounds in stellar atmospheres

10 p1786 A69-24103

Micropolar elasticity theory for materials exhibiting granular structure and microstructure, discussing deformation geometry and measurement, strain kinematics, microstrains, thermodynamics, etc

11 p1975 A69-24674

Bulk weld filler metals, discussing granular compositions, electrodes and iron, nickel and cobalt base deposits

11 p1891 A69-24931

Pressure calcining process in production of fine grained ceramics at low temperatures

12 p2119 A69-26832

Matrix grain size relation to dispersed particle size distribution and Zener-McLean equation description of microduplex structure in superalloy Ni-Fe-Cr alloy

13 p2278 A69-27411

Friction resistance between steel and ground basalt in ultrahigh vacuum, showing increase by adhesion

13 p2298 A69-28014

Focal plane observation of granulation phenomena on scattering surface illuminated by coherent light from gas laser

21 p3741 A69-39575

Laser granularity effects on brightness discrimination

[AAS PAPER 69-464] 24 p4272 A69-42843

Lunar surface material mechanical properties from Surveyor observations, analyzing grain size, rock density, internal friction, cohesion and bulk density compared to Luna observations

24 p4383 A69-42962

GRAPHIC ARTS

Multilevel modeling structure for interactive computer graphic design, discussing conversational display manipulation program and interconnection with analysis program

05 p0724 A69-16381

Three dimensional computer graphic modeling program, discussing SIGHT and LEGER programs

05 p0724 A69-16383

Graphic electronic visualization equipment for computerized design

10 p1660 A69-23795

Computer processed pictures including transformation of graphical material, picture generation from data or abstract rules, discussing procedures, instrumentation, color and applications

11 p1842 A69-24588

Computer driven graphical techniques for aerospace design and analysis

[ASME PAPER 69-DE-27] 14 p2454 A69-28854

Book on Smith chart electronic applications in waveguide, circuit and component analysis and synthesis

22 p3915 A69-40780

GRAPHITE

NT PYROLYTIC GRAPHITE

Chemical vapor deposition of iridium coatings on graphite for high temperature oxidation protection, discussing parameters for iridium compounds and optimum depositing conditions

01 p0097 A69-10643

Hydrocarbon formation mechanisms under conditions resulting from graphite filament explosions in hydrogen atmospheres, emphasizing stepwise radical formation and methane role

01 p0120 A69-10675

Highly oriented graphite crystallites in pyrographites and composite materials, discussing preparation and anisotropy ratios in physical properties

01 p0102 A69-10978

Graphite specific heat temperature dependence at low temperatures, noting Wigner effect for neutron irradiation

02 p0269 A69-11782

Alloy elements effect on spreading of liquid titanium and zirconium alloys on graphite

03 p0446 A69-13573

IR radiation of NML Cygnus with O/C ratio close to unity ascribed to circumstellar shell of graphite particles

03 p0513 A69-13775

Graphite ablation in high pressure environments, extending existing analysis of thermochemical and thermomechanical behavior to include allotropic features

[AIAA PAPER 68-1153] 04 p0686 A69-14873

High temperature physical, mechanical and thermal properties of polycrystalline graphites, relating properties to manufacturing techniques and processing

[AIAA PAPER 68-297] 04 p0621 A69-15329

X ray emission from powdered graphite, diamond and titanium carbides

06 p0946 A69-17545

Graphite ablation in air, N, Ar and He assuming chemical equilibrium, equal diffusion coefficients and steady state ablation

[AIAA PAPER 69-148] 06 p0947 A69-18155

Electron momentum density in diamond, graphite and carbon black from Compton profile measurement by X ray scattering vector

06 p0982 A69-18233

Chemical bond nature and properties in cyclic compounds of carbon and graphite, presenting bond energy computation method

07 p1171 A69-18932

Susceptibility of high modulus graphite and boron fiber epoxy composites to lightning damage, noting degradation by pulse current

08 p1338 A69-20486

Filament winding process variables effect on carbon or fiberglass reinforced composites, determining mechanical properties

08 p1338 A69-20489

Matched metal molding of short graphite fiber composites

08 p1339 A69-20502

Whiskerizing technique for growing small beta SiC single crystals on graphite filament surfaces, noting changes in interface geometry and chemistry

08 p1341 A69-20511

Apparatus for depositing protective coatings on graphite by vacuum method in refractory metal carbonyl and halides mixtures and in molten metals

09 p1528 A69-21850

Boron and graphite fibers role in composites cost feasibility in 1970s

09 p1524 A69-22067

Tensile strengths and elasticity moduli of graphite fibers produced from textile organic thread, discussing application to composites, ablative and fiber reinforced materials

09 p1529 A69-22071

Subscale aircraft fuselage section fabricated with lightweight graphite fiber/epoxy resin composite material

09 p1509 A69-22341

Whiskerized graphite fiber in resin matrix composites, analyzing interstitial growth characteristics, resin infiltration, layup and compaction

09 p1511 A69-22360

Graphite fiber electroplating with nickel on continuous basis for ribbon like continuous flexible twist free yarn

09 p1512 A69-22362

Static and dynamic strength tests and modulus data for graphite fiber/epoxy composite yarn, noting ply winding and dimensions
[ASME PAPER 69-GT-114]

09 p1531 A69-22520

Graphite particle formation in atmosphere of C type Mira variables, calculating particle size distribution by nucleation and coagulation theory

10 p1782 A69-23681

Fiber content by weight of reinforced plastics measured by pyrolysis

10 p1716 A69-23695

Graphite improvement for high temperature applications by computerized properties analysis, failure criterion and improved testing for defective billets

12 p2115 A69-26845

High energy nuclear interactions in graphite block at high altitude, recording gamma quanta produced

13 p2330 A69-28377

Monograph on interstellar extinction computations covering theoretical curves for spherical metal and graphite particles, albedo, optical constants, normalization, temperature dependence, etc

14 p2516 A69-28901

Graphites wear rates and structural changes in machine parts under dynamic stresses in air or vacuum, noting pressure role

14 p2467 A69-28912

Late type stars with emission peak wavelength approximating graphite Debye frequency induced by graphite impurity atoms

14 p2521 A69-29586

Extinction efficiency of graphite core interstellar grains with solid hydrogen and ice mantles, using theoretical models

14 p2486 A69-29587

Interlaminar shear strength development for utilization of unidirectional strength and stiffness of graphite fibers, discussing epoxy resin-fiber interface improvement

15 p2642 A69-30312

Niobium deposition on graphite from vapor-gas phase assuming heterogeneous process

15 p2629 A69-30992

Erosion wear of graphitic and mica-ceramic materials used for sealing turbine compressors at high temperatures, including test installation

15 p2643 A69-31186

Gas discharge tube graphite hollow cathode geometry leading to abnormal discharge operation under certain pressure conditions

16 p2814 A69-31838

Biaxial stress strain properties of graphite base refractory composites noting fracture strength predictions

[AIAA PAPER 68-337]

16 p2803 A69-32150

Load capacities of graphite lined journal bearings, discussing factors affecting wear rates

[SAWE PAPER 68-LC-9]

18 p3148 A69-35002

High modulus graphite epoxy composite material laminates fabricated and tested, correlating filament strength variation effect with composite tensile strength

19 p3354 A69-35518

Fiber reinforced carbon and graphite with application to reentry and propulsion systems and high temperature gas turbines, noting three dimensional woven quartz

19 p3354 A69-35519

Measuring elastic modulus and tensile strength of high modulus graphite fibers including comparative data, error sources and full strand test

19 p3355 A69-35520

Graphite fiber NOL rings and biaxial wound pressurized cylinders tested at ambient and cryogenic temperatures for tensile and cyclic fatigue properties

19 p3355 A69-35521

Niobium carbide formation on graphite from gaseous niobium pentachloride and Ar mixtures, discussing parameters affecting layer growth rate

20 p3566 A69-37367

Silicon carbide compact coatings deposition on graphite by silicon tetrachloride, H and benzene gaseous mixture, relating layer thickness to temperature and process duration

20 p3566 A69-37368

Niobium carbide deposition from gaseous halogen compounds on graphite particles in pseudoliquidified state, noting stoichiometric coatings

20 p3566 A69-37369

Carbide coatings formation on graphite in molten media, determining diffusion coefficient of carbon in molten Zr

20 p3566 A69-37372

Solid para hydrogen coated graphite particles expulsion into interstellar medium from star formation regions, considering mantles stability and particles extinction efficiency, albedo and phase function

20 p3601 A69-37492

Interstellar grains formation and composition, suggesting mixture of graphite particles in carbon stars and silicates in oxygen-rich giants

20 p3615 A69-38260

Diffusion welding and soldering of metallic wire with graphite and graphitized viscose applied to chromel, copel, chromel-alumel, Mo, W and W-Re

21 p3728 A69-38617

High performance graphite fiber reinforced plastic composites development and characterization, discussing fiber property data

[ASM PAPER W9-16.1]

21 p3728 A69-38655

Graphite fiber reinforced graphite composites fabrication, discussing spray forming and physical and mechanical properties

[ASM PAPER W9-20.4]

21 p3730 A69-38671

Chemical bond nature and properties in cyclic compounds of carbon and graphite, presenting bond energy computation method

21 p3752 A69-39153

Tensile strength of glass and graphite fibers for fiber reinforced plastics (FRP) tested with modified balance type and strain gage type tensile testers

21 p3753 A69-39799

Lamellar solids abrasiveness, effects of particle share in graphite and molybdenite samples

22 p3966 A69-39877

Aromatic and nonaromatic hydrocarbon fractions in terrestrial graphite, discussing classification and analysis by chromatography and mass spectrometry

22 p3934 A69-39890

Cations desorption from O, H and N films adsorbed at graphite surface under electron bombardment, studying desorption cross sections discrepancies

22 p3972 A69-39957

Thermodynamic properties of exchange reaction of Ti, Nb, Mo and W disilicides with graphite and pyrographite systems

22 p3970 A69-40638

Graphite rocket engine nozzles chemical erosion at various temperatures, comparing reaction and diffusion rates

23 p4180 A69-42156

Temperature dependence of equilibrium solid solubility of C in Au, Cu and Ag foils with respect to graphite

24 p4334 A69-43413

Postcured low void content graphite fiber reinforced polyimide resin composites fabrication including shear, flexural and tensile strength data

24 p4337 A69-43446

High modulus graphite/asbestos reinforced laminates, noting improved transverse strength and thermal properties

24 p4337 A69-43447

GRAPHITIZATION

Stress graphitizing and boron codeposition effect on dynamic mechanical properties of pyrolytic carbon, noting increase in internal friction and dynamic modulus

10 p1716 A69-23036

Carbon fibers fine structure graphitized at high temperatures studied by X ray diffraction and electron microscopy

16 p2803 A69-32572

GRAPHS [CHARTS]

NT PATTERSON MAP

Graphical and analytical interpolation methods for representing initial compositions in equilibrium thermodynamic systems

01 p0176 A69-10403

Schematic chart prepared for shock wave geometry of Tungusk meteorite, discussing tree felling

01 p0159 A69-11379

Equations, tables and charts for shock drag parameter in determination of shock wave drag of body in supersonic free stream of ideal gas

02 p0188 A69-11862

Charts of horizontal cross sections of radio echo focus for radio echo reflections from cumulonimbus clouds

03 p0459 A69-13281

Graphical representation of stress distributions and forces on dislocations

03 p0529 A69-13973

Self dual graphs and diagraphs enumeration and properties

06 p0947 A69-17410

IR solar spectrum tables and graphs covering 10,657-12,857 Å

06 p1008 A69-17809

Naval Research Laboratory experience with two and three axis gravity gradient satellites stabilization systems

07 p1228 A69-18344

Finding and representing graphically intersections of double curvature surfaces with planes within scope of digital computer design

08 p1278 A69-19921

Integrated charged particle energy spectra from gridded electrostatic analyzers, relating retarding potential curve to particle floating potential, kinetic temperature, etc

08 p1364 A69-20521

Optimal length conditions of liquid rocket combustion chambers, considering propellants, injection conditions, etc, noting graphs and differential equations solutions

08 p1376 A69-20606

Approximate nomography problem solution based on application of graph theory

08 p1343 A69-20663

Brightness curves of eclipsing systems under monotonicity of unknown functions, using stable algorithm

09 p1588 A69-21363

Limb darkening nonlinearity effects on solutions for brightness curves of eclipsing binaries

09 p1588 A69-21364

Graphical methods for photoelastic effect behind system with stresses rotating about direction of light propagation, discussing j circle technique

09 p1617 A69-22011

Optimum selection of modulation indices for multitone phase modulation by graphical method, noting tolerance insensitivity

09 p1457 A69-22463

Graphs of ionospheric measurements by vertical incidence sounding during Antarctic expedition, describing instrumentation and sounding techniques

10 p1681 A69-23315

Graphical method for plotting electrophysiological observations, showing hodographs application in biopotential studies of cortical reactions

11 p1829 A69-24540

Flight dynamics problems, determining extremum of functional by graph-analytical method and with aid of Pontryagin maximum principle

11 p1823 A69-25343

Statistical reliability tools and methods, graphs and charts, estimations, prediction techniques and demonstrations

12 p2101 A69-25847

Automatic plotting devices for graphic readouts in analog and digital computers

12 p2091 A69-26303

Multiinput sine comparators graphical analysis and design considerations, emphasizing semiconductor circuit providing quadrilateral polar characteristic on impedance plane

12 p2039 A69-26350

Graphs determining interference levels for optimum shielding, suppression, signal parameters and waveforms for pulses, step functions, CW signals and for military technology

12 p2030 A69-26471

Photographic magnitudes of galactic nuclei, presenting plots for stellar magnitude distribution of galactic nuclei

12 p2165 A69-27029

Graphical method for plotting contours of Rice distribution function as rocket-borne radar reflection data, determining leakage factor
14 p2416 A69-29536

Algorithm for enumerating all circuits of linear graph, noting suitability for computerization without large computer memory
14 p2421 A69-29541

Observations of 123 southern radio sources made with two element variable spacing interferometer, tabulating and graphing results
15 p2696 A69-31166

Popov type graphic criterion for determining absolute stability of modulation systems
16 p2764 A69-32440

Popov and Sandberg graphic methods for determining absolute stability of nonautonomous systems, noting role of single nonzero eigenvalue in matrix
16 p2765 A69-32441

Brightness curves of eclipsing systems under monotonicity of unknown functions, using stable algorithm
18 p3197 A69-34753

Limb darkening nonlinearity effects on solutions for brightness curves of eclipsing binaries
18 p3197 A69-34754

Tail tip-evacuation limits, calculating aircraft balance effect of passenger relocations by graphical method [SAWE PAPER 765]
18 p3091 A69-34877

Graphical representation of friction stresses produced on mechanical parts surface layers, using mathematical model based on Poisson ratio and friction coefficient
19 p3329 A69-36723

Book on Smith chart electronic applications in waveguide, circuit and component analysis and synthesis
22 p3915 A69-40780

Plane-truss joints displacements determined by graph-analytic method, discussing representation of fictitious forces and moments
23 p4225 A69-41420

Pulmonary emphysema effect on expiratory flow limitation from static pressure-volume and flow volume curves during natural and forced deflation of hamster lungs
23 p4082 A69-41442

Graphical method for two dimensional supersonic expansion flow with subsonic reaction front around corner compared to existing iteration method
23 p4061 A69-42411

Intercity travel demands simulation by linear graph model applied to Windsor-Montreal corridor [AAS PAPER 69-382]
24 p4417 A69-42805

Equal velocity contour diagrams for interstellar matter emission and absorption study in Cassiopeia-Perseus region
24 p4384 A69-43050

Graph analytical method for calculating heat transfer in diathermic exchangers during boiling together with critical thermal loads
24 p4408 A69-43080

Image reconstruction by graphical method for equal wavelengths of recording and reconstructing radiation and equal scales of hologram
24 p4315 A69-43166

Demand curves for VTOL intercity transportation, discussing conventional helicopters, compound helicopters, tilt rotor, tilt wing, stored rotor and fan or jet lift
24 p4254 A69-43721

GRASHOF NUMBER

Natural convection boundary layer stability on heated isothermal vertical plane wall, discussing Grashof number as laminar to turbulent flow transition criterion
02 p0188 A69-12038

Simultaneous equations for natural convection from horizontal cylinder at moderate Grashof numbers, using iteration digital computer method for boundary values
21 p3851 A69-38975

GRASSMANN ALGEBRA
U VECTOR SPACES

GRATINGS

Grating size effect on threshold of grating pattern for various colors of illumination and target orientations
22 p3879 A69-40840

GRATINGS [SPECTRA]

Intracavity laser diffraction gratings for single wavelength output
01 p0092 A69-10897

Submillimeter wave oscillator /orotron/ involving open resonator with mirror having reflection grating period less than wavelength
02 p0250 A69-12248

Pulse compression by optical correlation techniques, discussing laser beam control by diffraction grating in ultrasonic delay line
03 p0397 A69-13732

Bleaching of absorption hologram diffraction gratings for improved light efficiency, discussing bleaching materials results
04 p0596 A69-14284

Diffraction of plane electromagnetic waves obliquely incident on conducting rotated periodically tapered grating structure formed of infinite metal strips
05 p0723 A69-16788

Instrument profile of grating spectrograph determined by applying He-Ne laser mode separated in Fabry-Perot interferometer
07 p1131 A69-18405

Optical modulation through Doppler frequency shift obtained by rotating radial diffraction grating [AOLR-69-1]
11 p1889 A69-25394

Integral equation for diffraction from infinitely extended grating as mixed boundary problem of electromagnetic field, discussing single anomaly
15 p2568 A69-30795

Plane wave scattering by multimode corrugated structure with H mode incidence, revealing theoretically scattering resonance as P type Wood anomalies
17 p2925 A69-33844

Amplitude and intensity distributions of plane periodic Fresnel diffraction grating calculated by Fraunhofer theory, noting applicability to spectrometric and meteorological instruments
19 p3372 A69-35906

Modified residue-calculus technique combined with scattering matrix multiple reflection techniques for boundary value problems in waveguide phased arrays, diffraction gratings, etc
20 p3505 A69-37298

Auroral spectroscopy for high resolution coverage at maximum wavelength range, discussing plane diffraction grating
21 p3707 A69-38486

Grating spectrometer for far IR, discussing light source, reflection gratings, filters, etc
21 p3726 A69-39682

Optical ultrashort pulse compression with paired diffraction gratings in terms of phase shift frequency dependence and Fresnel diffraction analogy
23 p4171 A69-41392

Design and performance of microwave open resonators with diffraction grating in mirror, describing Q factor calculation
23 p4139 A69-42045

GRAVIMETERS

Errors in amplitudes and phases recorded by earth tide recording equipment determined, using special multiflex galvanometer
04 p0601 A69-15305

Gyroplatform to stabilize gravimetric equipment on aircraft, noting channel stabilization by electrohydraulic servomechanism
21 p3723 A69-38885

GRAVIMETRY

Slide wire aircraft vertical velocity meter for application during aerogravimetric mapping, discussing calibration and gravitational force measurement accuracy
03 p0429 A69-13261

Connecting duct influence on slide wire vertical airspeed indicator operating on barometric principle during aerial gravimetric surveying
13 p2260 A69-27828

Monograph on gravity covering gravimetric boundary value problem, iterative solutions, error analysis, gravity reduction, integral equations, etc
13 p2254 A69-27929

Lunar gravimetric data reprocessed to present in usable and readable form, plotting acceleration on Mercator projection of lunar surface
18 p3194 A69-34413

Book on gravimetry covering gravity measurement on land and in ocean, gravity anomalies, isostasy, geodetic applications, Eotvosian measurements and terrestrial tides
21 p3715 A69-39000

Tectonic classification of earth gravitational field based on mean gravity anomalies, correlating positive anomalies with Quaternary volcanism
23 p4154 A69-41318

Three channel inertial ship or aircraft navigator for determining gravity vector, using earth gravity field model
23 p4162 A69-41320

Gravitational constant G determination, describing accuracy enhancement
24 p4350 A69-42944

GRAVIRECEPTORS
NT OTOLITH ORGANS

Motor and tonic reactions in animals during weightlessness, discussing interaction between gravity receptors and visual analyzer
20 p3470 A69-37247

GRAVITATION

NT ARTIFICIAL GRAVITY
NT HIGH GRAVITY ENVIRONMENTS
NT LUNAR GRAVITATION
NT LUNAR GRAVITATIONAL EFFECTS
NT PLANETARY GRAVITATION
NT REDUCED GRAVITY
NT SOLAR GRAVITATION

Secularly stable figures of equilibrium of rotating heterogeneous fluids of planetary size, noting dependence on laws of inertia and gravitation
03 p0513 A69-13780

Coordinate transformations eliminating singularities in gravitational radius of Schwarzschild metric, noting local Lorentz transformations
08 p1351 A69-19952

Geocentric orientation of quasi-geocentric coordinate network determined from simultaneous photographic satellite observations, using gravity force values
12 p2158 A69-26429

Monograph on gravity covering gravimetric boundary value problem, iterative solutions, error analysis, gravity reduction, integral equations, etc
13 p2254 A69-27929

Geopotential determination from gravity force measurements at known surface and error assessment for earth model with aid of spherical harmonic expansion
15 p2689 A69-30567

Surface gravity and temperature model atmospheres for O-type stars with UV line blanketing
15 p2693 A69-30778

GRAVITATION THEORY

Gravitation theory similar to special relativity and Newtonian theories, noting gravitational potential, metric and Newtonian charts
01 p0115 A69-10340

Radiation problem in general theory of relativity investigated by momentum energy tensor, formulating criterion for gravitational radiation
01 p0116 A69-10435

Field theory of gravitation, discussing consequence of universality of gravitation /space-time geometry determination/
01 p0116 A69-10443

Mach principle in scalar-tensor gravitation theory, discussing self energy calculations in canonical formalism for solitary neutral and charged point particles
01 p0120 A69-10858

Conservation laws of energy and linear momentum in general relativity formulated, noting application to radiating gravitational systems
01 p0121 A69-11286

Tensor character of fictitious potential function introduced to approximate locally tangent actual potential function, discussing planetary gravitational anomaly observation from orbiting vehicles [AAS PAPER 68-198]
02 p0312 A69-11476

Electromagnetic field interaction with polarizable elastic medium in gravitation theory resolves definition of electromagnetic energy in matter
02 p0279 A69-11537

Gravitational fields in Hamiltonian formulation of relativistic theory of gravitation, noting geometrical aspects and equivalence to Einstein theory
02 p0280 A69-11715

Lorentz invariant theories of gravitation compared with Einstein general relativity tests with respect to one body motion observations
02 p0318 A69-12094

General covariant quantization of gravitation and cosmology
02 p0326 A69-12640

Invariant theory of gravitational radiation, using impulse energy tensor
02 p0332 A69-12835

Plane front gravitational waves analyzed on basis of gravitational radiation theory, discussing Einstein equations
02 p0332 A69-12836

Gravitational field representation based on linear spin-two field without direct self interaction, using divergence free nonlocal projection of matter stress tensor
03 p0466 A69-13388

Static locally flat solutions of Einstein vacuum field equation with line singularities and global space curvature, noting analogy to electromagnetic fields
03 p0466 A69-13389

First order equations for gravitational field quantized by methods developed for relativistic wave equations, describing elementary particles
03 p0466 A69-13422

General theory of relativity equations for homogeneous anisotropic three dimensional space with matter, deriving ultrarelativistic equation of state
03 p0466 A69-13423

Kerr family of solutions of Einstein and Einstein-Maxwell equations for gravitational field of rotating body, noting global structure and causality
03 p0466 A69-13473

Electromagnetic theory of gravitational forces unifying electromagnetic, meson and gravitational fields
03 p0469 A69-14096

General relativity confirmation, discussing mass equivalence and classical and new experiments such as gravitational shift, rotation effect on perihelion and precession test
04 p0661 A69-15165

Perturbation method determination of gravitational induction for quasi-static axisymmetric systems
04 p0661 A69-15190

Static formations in general theory of relativity and plankions
05 p0793 A69-15776

Lunar laser ranging for testing Einstein and Brans-Dicke gravitational theories, discussing pulse transit time and dominant nonNewtonian correction
05 p0825 A69-16362

Soviet book on theoretical astronomy covering evolution from Ptolemy to Einstein, universal gravitation and principles of celestial mechanics
07 p1211 A69-18544

Gravitational and inertial field equations of Maxwellian form leading to gravitation theory consistent with special relativity
07 p1182 A69-19408

Gravitational field in static spherical shell of matter in vacuum, deducing exact junction conditions for thin shell
07 p1182 A69-19453

Self gravitating medium in quasi-static equilibrium, using phenomenological equilibrium theory and zero time fluctuations
07 p1222 A69-19622

Forces generated by vortex gravitational field coupled to Newtonian field, motion of fluid mass in two gravitational fields and gravitational wave propagation
08 p1382 A69-19881

Interlocking systems within Galaxy, deducing gravitational theory accounting for galactic spiral patterns
08 p1387 A69-20136

Two gravitational fields theory of gravitation in general relativity for flat universe, discussing gravitational wave propagation
08 p1390 A69-20276

Linear approximation of Moller condition for reference frames interpretable as linear approximation of field equation in tetrad theory of gravitation
08 p1351 A69-20287

Early evolution of universe related to present upper bound of primordial black body gravitational radiation temperature
09 p1601 A69-22210

Variable gravitational number kappa, discussing effects on cosmology
09 p1603 A69-22270

Brans-Dicke gravitation theory effects on solar evolution and neutrino flux, discussing solar luminosity
09 p1605 A69-22415

Gravitational analog of Mariot-Robinson theorem, obtaining two related theorems with Newman-Penrose spinor formalism
11 p1919 A69-25097

Gravitational recoil due to gravitational emission of source analyzed in terms of Einstein equations
12 p1310 A69-26338

Quasars and radio-quiet objects numbers and properties, discussing red shifts interpretation by cosmological, gravitational and Doppler theories
12 p2161 A69-26937

Relativistic version of generalized gravitation theory, establishing models to describe gravitars having large gravitational mass defect and red shift
13 p2351 A69-27864

Polytropic gas spheres static models integral characteristics by nonrelativistic generalized gravitation theory, noting central densities dependence on critical values
13 p2352 A69-27872

Philosophical problems of Einstein theory of gravitation and relativistic cosmology - Conference, Kiev, June 1966
14 p2482 A69-28856

Observed values concept applied to general relativity theory, considering gravitational energy problem
14 p2483 A69-28858

Rigid space concept in gravitation theory, discussing reference systems with nonrigid and rigid background
14 p2484 A69-28863

Gravitational recoil, showing integration of Einstein equations in axisymmetric case reduced to integration of equations for Fourier coefficients
14 p2485 A69-29358

Inertial and gravitational mass equality reexamined, considering Galileo, Newton and Eotvos experiments
14 p2486 A69-29647

Density perturbation mode in Lifshitz relativistic theory for expanding universe gravitational instability, adopting Lagrangian coordinate condition to eliminate physically meaningless solution
15 p2652 A69-30203

Classical and relativistic gravitation theories using harmonic coordinate system, interpreting Einstein equations for insular distribution of masses and applications in geodesy
15 p2596 A69-30573

Newtonian invariant mechanics, giving inertial interpretation of gravitation and Hubble expansion of universe
15 p2654 A69-31214

Hall current effect on thermal instability explaining nonself gravitating astronomical objects, discussing current effects on propagation modes
16 p2854 A69-31649

Far field energy radiated by two body system using approximation method in general relativity and Minkowski gravitation theory
16 p2812 A69-31836

Simplified method for derivation of universal gravitation law from Kepler law of planetary orbits
16 p2813 A69-32481

Generalized Newtonian theory of gravitation, stressing internal solutions of gravitational field equations and incompressible fluid configuration in state of equilibrium
16 p2865 A69-32599

Spherically symmetric vacuum solution of Treder gravitational theory with emphasis on gravitational collapse
17 p3029 A69-33011

Hard cosmic radiation hypothesis for Newton gravitation law for neighboring bodies, obtaining gravitational energy quanta and propagation velocity relationship
18 p3172 A69-34627

Physical singularity reduced to imaginary by introducing arbitrary function in form of perturbation into gravitational equations general solution
18 p3173 A69-35018

Static formations in general theory of relativity and plankions
18 p3173 A69-35029

Spiral disk galaxies stability analysis assuming centrifugal force balancing self gravitation, transforming linearized equations of motion into eigenvalue equations
18 p3200 A69-35131

Einstein gravitational field equations series expansion in powers of gravity constant by Bondi method for gravitational waves
18 p3173 A69-35146

Bjerhammer gravity reduction method applied to gravity in space, analyzing two test models with mass focused between topographical and reference surface
18 p3173 A69-35197

Hydrogen atom excess charge creating universal repulsive force in analyzing cosmological gravitational contraction in terms of Newtonian mechanics
18 p3206 A69-35469

Relativistic tensor theories of gravitation in flat space with Neumann and Newton forms of gravitational potential, deriving expressions to estimate differences perceived by observer
19 p3373 A69-36204

Numerical integration of lunar motion equations to investigate lunar theory for high precision applications and to examine motion departures from gravitational theory
20 p3603 A69-37560

Statistical analysis of galactic structures subject to Newton gravitation covering globular clusters and spiral disk and rotating bar galaxies
21 p3803 A69-38924

Linear field gravitation theories, discussing spin dynamics
22 p3979 A69-39976

Variable gravitational constant hypothesis, theories of gravity and gravity laws for earth interior, solar motion, cosmological problem and earth orbit
22 p4017 A69-40174

Dirac hypothesis on varying G constant considered in formulating earth expansion theory without resorting to Ramsey hypothesis
22 p4018 A69-40178

Lagrange formulation of gravitation finite range theory compared with Einstein theory
22 p4027 A69-40656

Stellar evolutionary ages and gravitational theory relations based on initial abundance ratio U 235/U 238 and present interstellar medium heavy element content
23 p4219 A69-42329

Field theories of gravitation and experimental survey of general relativity theory, discussing red shift, Mercury orbit rotation, light deflection, solar oblateness, etc
23 p4192 A69-42330

Einstein general theory of relativity and apparatus for gravitational radiation detection, discussing Dicke experiments and Riemann tensor measurement
23 p4192 A69-42331

GRAVITATIONAL COLLAPSE

Light fluctuations rise time, electron density, emission temperature and peak luminosity estimated for quasars powered by local gravitational collapse events
02 p0325 A69-12590

Relativity and stellar model stability, discussing energetics of quasars and gravitational collapse of supermassive stars
06 p1002 A69-17315

White dwarf general relativistic instability toward dynamic collapse and Type I supernovae
06 p1010 A69-17975

Dynamical stability in premain sequence stars, discussing adiabatic models for pure hydrogen composition and collapse initiation by low opacity
07 p1220 A69-19388

Galactic angular momentum of rotation, applying rotation theory to gravitational instability model of galactic formation
08 p1383 A69-20050

Three color photoelectric observations of stars near Orion Nebula, discussing gravitational contraction stars and color magnitude diagram
08 p1384 A69-20055

Metagalaxy stationary model in terms of relativity theory, investigating radiation pressure balancing of gravitation as imaginary situation
08 p1389 A69-20263

Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions
09 p1587 A69-21359

Motion and dispersion of peculiar velocities of stars in gravitational condensing interstellar gas
09 p1589 A69-21371

Poincare recurrence theorem applicable to collapsing gravitational system with particles velocity dispersion other than zero
09 p1593 A69-21567

Energy release in quasars through nonmassive gravitational collapse compared with local objects, noting cosmological luminosities
10 p1785 A69-24091

Theoretical models corresponding to initial phases in thermal-gravitational collapse of spherical clouds from interstellar gas for stellar formation
11 p1963 A69-25261

Angular momentum-gravitational field coupling in collapsing star, applying rotational perturbation to spherically symmetric time dependent interior solution of Einstein field equation
14 p2520 A69-29374

Protostars collapse and flare up computations, including radiative and convective energy flow terms in hydrodynamic equations of motion
15 p2680 A69-30206

Relativity theorems applied to collapsing stars and expanding universe noting limitations of general relativity from prediction of singularities
15 p2694 A69-30854

Energy release efficiency in gravitational collapse, estimating rest energy fraction from energy conservation, neutron star stability and spherically symmetrical systems collapse considerations

16 p2853 A69-31594

Spherically symmetric vacuum solution of Treder gravitational theory with emphasis on gravitational collapse

17 p3029 A69-33011

Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions

18 p3197 A69-34749

Motion and dispersion of peculiar velocities of stars in gravitational condensing interstellar gas

18 p3198 A69-34760

Quarkian core substance in superstars of great masses, discussing existence as primordial state forming baryon and nuclei and origin in stellar gravitational contraction

19 p3401 A69-35912

NonJeans gravitational instability of stars and interstellar gas in Galaxy due to wave interaction with stars having velocity near wave phase velocity

20 p3607 A69-38037

Stellar mass loss in gravitational contraction and variation of rotation law during transition to main sequence

20 p3607 A69-38041

Ferromagnetism stable state in degenerate electron gas and magnetic fields in gravitationally collapsed bodies based on total microscopic magnetic moments associated with Landau level electrons

21 p3798 A69-38600

Quasars observations interpretation, discussing red shift origin, gravitational collapse, lifetime, distribution, cosmological aspects, etc

21 p3802 A69-38825

Physics of massive starlike objects, discussing high entropy requirement, eventual nonrelativistic collapse and gravitational fields produced by low entropy equilibrium

21 p3811 A69-39516

Relativistic star clusters, discussing existence and quasi-static evolution before collapse through gravitational radius

21 p3814 A69-39570

Galactic nuclei as collapsed old quasars from dynamics of gas cloud collection in galactic nucleus, discussing cosmic radiation emission from synchrotron mechanism

21 p3815 A69-39610

Spherically rotating symmetric body gravitational collapse within Schwarzschild radius, presenting trapped surface concept for asymmetrical cases and generalization of space-time singularities

23 p4219 A69-42333

Magnetic field implications in stellar formation mechanism including gravitational collapse, magnetic gas cloud fragmentation and stellar winds magnetic braking

24 p4378 A69-42699

GRAVITATIONAL CONSTANT

Laser beams self focussing interpreted as photon contraction due to equivalent gravitational attraction with gravitational constant proportional to nonlinear refractive index

08 p1324 A69-20085

Surrounding masses gravitational field effect on gravitational constant determination by torsional oscillations method, considering oscillation amplitude stability to eliminate errors

19 p3374 A69-36468

Newton gravitational constant determination from measured acceleration and known magnitude of masses, describing control system

20 p3537 A69-37140

Five dimensional theory applied to Einstein generalized gravity equations for spherically symmetrical gravitational waves, yielding gravity constant variation from Newton approximation

21 p3802 A69-38842

Gravitational constant secular change from considering relativistic cosmology and galactic structure, deriving equations of Newtonian cosmology

22 p4017 A69-40173

Variable gravitational constant hypothesis, theories of gravity and gravity laws for earth interior, solar motion, cosmological problem and earth orbit

22 p4017 A69-40174

Paleontological evidence to verify varying G constant hypothesis for expanding earth theory, discussing uncertainties of geological dating

22 p4017 A69-40177

Dirac hypothesis on varying G constant considered in formulating earth expansion theory without resorting to Ramsey hypothesis

22 p4018 A69-40178

Laser range measurement from earth to lunar retroreflector to study earth tipping and gravitational constant secular decrease

22 p3960 A69-40190

Gravitational constant G determination, describing accuracy enhancement

24 p4350 A69-42944

GRAVITATIONAL EFFECTS

NT LUNAR GRAVITATIONAL EFFECTS

NT SOLAR GRAVITATION

Self gravitating pulsating cylindrical and ring shaped cosmic masses from group theory standpoint compared with oscillating stars

01 p0148 A69-10124

Space biology, discussing U.S. research program, emphasizing gravity/organism reactions, biochronology and exobiology

[UN PAPER 68-95345] 01 p0014 A69-10486

Extraterrestrial vestibular research, discussing human otolith apparatus regulation subjected to change from geocentric to heliocentric orientation

[UN PAPER 68-95389] 01 p0014 A69-10508

General theory of relativity tests with aid of satellites, considering gravitational red shift measurements, light deflection in solar field, etc

01 p0152 A69-10751

Meteorite scattering in geogravitational field and influence on lunar meteorite precipitation distribution

01 p0153 A69-10756

Wheat seedling germination and growth processes in absence of gravitational force onboard Biosatellite 2

01 p0015 A69-10932

Gravitational force measurement on electrons and positrons in free fall through vertical metal tubes at low temperatures

01 p0125 A69-10979

Near circular satellite orbits evolution taking into account gravitational fields zonal harmonics effect on motion

01 p0157 A69-11304

Spacecraft maneuvering by changing spacecraft geometry and utilizing different gravitational forces acting on finitely extended bodies

01 p0158 A69-11318

Mass points substitution for mass of earth, giving gravitational effect equal to observed gravity values corrected for centrifugal acceleration

02 p0243 A69-12008

N body gravitational problem - Conference, Paris, August 1967

02 p0322 A69-12267

Numerical regularization of single binary collision in n body gravitational problem

02 p0322 A69-12268

Numerical solution on UNIVAC 1107 for model describing symmetrical gravitational collision of two four body systems

02 p0322 A69-12269

Collisionless computer model performing gravitational experiments with two dimensional galaxy

02 p0322 A69-12271

Computer study of collisionless self gravitating system using two dimensional model, obtaining gravitational field by solving Poisson equation

02 p0322 A69-12272

Statistical mechanics and thermodynamics for molecular systems applied to gravitational systems, discussing collisionless Boltzmann equation and Chandrasekhar binary collision model

02 p0323 A69-12273

Collective stability of collisionless gravitating systems based on variational principles resembling energy principle

02 p0323 A69-12275

Constant thrust deceleration formula for gravity turn soft landing maneuvers expressed in elementary and trigonometric functions of initial conditions for descent

02 p0335 A69-12531

Stability of elliptical Venus orbits with solar gravitational perturbations, using equation accuracy and influence on mission planning

02 p0331 A69-12819

Interplanetary transportation network involving numerous spacecraft on various planetary flyby trajectories, discussing integration of gravity thrust, braking and scramjet concept

03 p0511 A69-13402

Soviet collection of articles on dynamics of fluid-containing bodies under weightlessness conditions

03 p0417 A69-13808

Light and radial velocity changes in close binary systems, including limb and gravity darkening of distorted stars in analysis of spectroscopic effects

04 p0653 A69-14612

Low degree earth gravity harmonics effect on 12 and 24 hour orbits of high altitude communications satellites

04 p0592 A69-14661

Navier-Stokes equations for self gravitating viscous fluid, discussing generalization based on irreversible thermodynamics

04 p0588 A69-14699

Saturn ring formation by satellite spiral into Roche limit and disintegration

04 p0660 A69-15128

Taurus A 21 cm absorption line frequency decrease during optical path approach to sun, discussing gravitational and electromagnetic origin

04 p0661 A69-15148

Cosmology, experiments on gravitation, space-time theory and model of universal history

04 p0661 A69-15157

Iterative guidance mode /IGM/ applied to effective gravity vector prediction, acceleration measurement of noise sensitivity and energy limitations

[AIAA PAPER 67-620] 04 p0629 A69-15501

Center of gravity of two dimensional gravitating bodies by gravitational anomaly technique, based on conformal mapping of bilinear function

05 p0792 A69-15696

Gravitational instability of rotating anisotropic plasma for longitudinal wave propagation mode, obtaining dispersion by using modified Chew-Goldberger-Low equation

05 p0827 A69-16596

Quasars, stressing local Doppler and gravitational hypotheses for observed red shifts

06 p0998 A69-16968

Biological systems response to inertial environment, escape from earth gravity, planetary gravity and artificial gravity

06 p0872 A69-17011

Weightlessness simulation, discussing mechanics of biological effects, simulation of specific anticipated effects and concept of mechanical acceleration and gravity equivalent effects

06 p0879 A69-17012

Renal excretion response to blood fluid volume shift resulting from altered orientation within gravity or from absence of gravity

06 p0873 A69-17015

Differential equations of rotational motion of systems of rigid bodies in gravitational field derived with Lagrange equation

06 p0957 A69-17130

Large paraboloid radio antennas structural setting for minimizing effects on performance due to deformation of surface by gravitational forces

06 p1023 A69-17372

Blood circulation in brain during acceleration analyzed by tensometric sensors and electrophysiology, noting intracranial sensitivity to gravitational changes

06 p0874 A69-17646

Increased gravitational stress effects on esophageal sphincter pressures and gastroesophageal reflux in rhesus monkeys, noting cardia competence

06 p0874 A69-17838

Complex distribution of quasar red shift interpreted as due to two simple distributions of cosmological and gravitational red shift

06 p1009 A69-17968

Gravitational effects during physiological functions formation of human organism, noting myogenic tonus rearrangement as primary response

07 p1060 A69-18572

Otolith and cupular apparatus interaction in human vestibular analyzer during gravitational changes

07 p1062 A69-18589

Sensory and motor activity of human subjects exposed to reduced gravitation during aircraft motions along parabolic trajectories

07 p1062 A69-18592

Human postural muscle activity, motor reactions and dexterity during gravitational changes

07 p1063 A69-18593

Stability of motion of spherically symmetric mass of compressible gas with constant space density in absence of gravitational field

07 p1215 A69-18706

Nondimensional Jeffreys number as ratio of Reynolds to Froude number for gravitational motion of viscous masses, with application to lunar maria and plastic ice

07 p1218 A69-19262

Combined effect of short wavelengths associated Kelvin-Helmholtz instability and long wavelengths associated gravitational instability on self gravitating fluid layer, discussing kinetic energy

07 p1182 A69-19276

Stars of higher multiplicity, discussing numerical membership and gravitational binding of star clusters and binary stars

07 p1219 A69-19295

Stellar galactic orbit perturbation by irregularities in distribution of gas cloud for motion inclined to galactic plane

07 p1223 A69-19634

Plumb line fluctuations /M sub 2 tide, 1961/ at 135 degree azimuth by Voit method, discussing residual ellipse for Borowiec

08 p1306 A69-19824

General relativistic gravitational red shift effect on frequency transmitted from satellite orbits, noting possibility of measurement

08 p1383 A69-19901

Otolith apparatus response threshold under weightlessness conditions simulated by aircraft flight, measuring galvanic current threshold for banking

08 p1263 A69-19934

Trajectories minimizing missile velocity losses due to gravity by setting boundary conditions and trend of thrust in time

08 p1409 A69-20587

Rotation effect on homogeneous gravitating systems stability, noting lack of unity in approaches to cosmogony by various authors

09 p1589 A69-21372

Uniform gravity load effect on buckling of beam continuously supported by soft foundation and subjected to uniform lateral load

09 p1615 A69-21927

Rotating plasma gravitational instability during discharge as function of centrifugal acceleration, noting Coriolis and Larmor effects

09 p1552 A69-22043

Quasar red shifts due to cosmological and gravitational factors, assuming correlation of QSO intrinsic luminosity with gravitational red shift values

09 p1597 A69-22151

General solution of Liouville equation for collisionless system of gravitationally interacting particles, with distribution function locally isotropic in momentum space

09 p1605 A69-22412

Satellite altitude stabilization by gravity gradient capture in earth elliptical orbit, showing effect of increase in damping

10 p1791 A69-22926

Total planet interaction energy of comets passing through solar system, showing non-Gaussian shape of distribution

10 p1774 A69-22970

Photometric over dynamical ellipticity excess attributed to gravitational darkening in eclipsing binaries of W Ursae Majoris type

10 p1776 A69-23217

Earth gravitational field effect on satellite orbits, noting elliptical motion in central force field, energy criteria and rotational ratios

10 p1776 A69-23295

Finite Larmor radius, finite conductivity, rotation and Hall current effects on Jeans criterion for gravitational instability of plasma

10 p1729 A69-23408

Radial motion of uniform spheres in general relativity, finding conditions for initially inward motion to reverse/bounce/

10 p1779 A69-23607

Simulated weightlessness used in determining ontogenesis of otolith organ in tadpoles and eggs as function of acceleration forces [DVL-855]

10 p1647 A69-24021

Ellipsoidal satellite translational rotational motion under spherical planet and point source sun gravitational fields influence, obtaining approximate solution for three body problem

11 p1956 A69-24399

Gravitational effects on thermodynamic variable equilibrium composition of liquid-vapor binary mixtures near critical point, discussing changes in phase with altitude

11 p1999 A69-24914

Charge bunching approach for gravitational hydrodynamic instability of infinite uniform self gravitating system in translational motion, using conservation laws

11 p1961 A69-25105

Gravitational stability of spheroidal expansions of rotating gas masses in astronomy, noting mechanism for fragmentation in cosmology

11 p1962 A69-25112

Blind goldfish behavioral responses to short lowered gravitational force cycles during vertical flight classified as vestibular reflexes resulting from otolith displacement

11 p1828 A69-25464

Solid body motions containing cavity filled with viscous fluid under influence of gravity, formulating motion equations for fluid and body

12 p2061 A69-25884

Satellite motion short period perturbations by earth gravitational field tesseral and sectoral harmonics

12 p2069 A69-26431

Finite ion Larmor radius effect on gravitational instability of two superposed fluids in uniform rotation, analyzing interchange perturbations and vortex sheet

12 p2062 A69-26461

Weightlessness and higher g values effects on caloric and rotational nystagmus

12 p2020 A69-26551

Friction damping properties of deployed structures vibrating in weightless state compared to damping in space for true determination

12 p2183 A69-26792

Gasdynamic phenomena during subsonic or supersonic motion of isothermal gas under action of gravitational forces in flatten axisymmetric galaxy containing spiral density waves

12 p2170 A69-27065

Self adjusting digital computer method for two dimensional gravitational anomalies

12 p2076 A69-27088

Quasar applications as gravitational lenses within Hoyle-Fowler quasar model

13 p2340 A69-27575

Hydromagnetic stability of spiral arm embedded in gravitating medium from analysis of instability of self gravitating incompressible cylinder

13 p2346 A69-27705

Finite Larmor radius and collision with neutral atoms simultaneous effects on plasma gravitational instability

13 p2346 A69-27708

Lunar astronauts psychological problems, discussing isolation from outside world, gravitational and extreme light effects, protective space suits, etc

13 p2210 A69-27905

Gravity preference tests on rats subjected to simulated Aerobee 150 A rocket launching and flight in ground based spiral centrifuge

13 p2213 A69-28090

Optimal stochastic controller synthesis theory applied to stabilizing and controlling orientation of rotating bodies in central gravitational fields

13 p2300 A69-28326

Satellite motion relative to center of mass and resonances by approximate solutions to motion equations, applying asymptotic methods

13 p2357 A69-28502

Hypokinesia and nutrition deficiency effect on blood coagulation, noting combination with accelerations may lead to hypocoagulation

13 p2212 A69-28625

Dynamics of gyroscope having flexible axis under gravitational force and elastic coupling reactions, deriving motion equations, precessions angular velocities, etc

14 p2445 A69-28798

Density distribution in axisymmetrical gravitating systems with ellipsoidal velocity distribution function, using integral equation of state for effective radii of cylindrical configurations

14 p2486 A69-29465

First order secular and aperiodic perturbations in Keplerian orbital elements of synchronous satellite due to earth gravitational field eccentricity

14 p2521 A69-29466

Gravity effects on plant growth, discussing horizontal clinostat experiments and auxin transport mechanism

15 p2555 A69-30470

Pulsar clock mechanisms on basis of relativistic gravitational effects, considering white dwarfs and neutron stars

15 p2694 A69-30855

Simulated gravitational lens made of Plexiglass for demonstrating stellar gravitational lens phenomena, presenting partial cross section

15 p2653 A69-31163

Satellite motion about center of mass, discussing satellite stabilization and libratory motion in gravitational force field, planet resonances, etc

15 p2703 A69-31411

Gravitational effect of electromagnetic radiation evaluated on test particle using Einstein field equations

16 p2812 A69-32049

Gravitational and magnetic torque effect on rotational motion of triaxial rigid body in regressing orbit about oblate primary mass

16 p2861 A69-32240

Turbulence dissipation rate in clouds and precipitation determined from rms width of vertical sounding radar signal fluctuation spectra, distinguishing gravity and turbulence effects

16 p2807 A69-32273

Motion of two rigid spheroids with mutual gravitational attraction based on Hamilton-Jacobi theory applicable to binary stars

16 p2863 A69-32402

Fluid transfer in orbit under low or zero g, stressing orientation [AIAA PAPER 69-565]

16 p2865 A69-32770

Ground state energy inequalities for N particle non-relativistic quantum mechanical system, showing non-saturating gravitational forces and increasing binding energy per particle

17 p3028 A69-32900

Human motion coordination under acceleration followed by weightlessness during jet flights along Keplerian orbits, discussing initial disturbance and subsequent subsiding

17 p2907 A69-32938

Pulmonary ventilation and perfusion in normal supine subjects before and during exposure to lower body negative pressure measured using Xe-133

17 p2909 A69-33180

Liquid draining motion from transversely moving cylindrical tank in time varying gravity field with outlet pipe at bottom, discussing flow rate and free surface [AIAA PAPER 69-679]

17 p2953 A69-33440

General relativity theory test using earth orbital motion and solar gravitational field effects on pulsars frequency stability

17 p3037 A69-33646

Microwave background anisotropy induced by gravitational effects interpreted using spatially flat Friedmann model for substratum

18 p3190 A69-34286

Gravity independence of life processes in terrestrial organisms concluded from zero gravity experiments with algae, hatched larvae, etc

18 p3095 A69-34692

Rotation effect on homogeneous gravitating systems stability, noting lack of unity in approaches to cosmogony by various authors

18 p3198 A69-34761

Materials processing in space, suggesting electronic single crystals preparation, materials melting and utilization of low g earth orbit environment

19 p3324 A69-35589

Perturbation technique application to stability criterion for rectilinear missile flight with arbitrary inclination, noting mass reduction and flow and gravity effect

19 p3429 A69-35779

Attitude stabilization of symmetrical nonrotating earth satellite using earth-pointing rotor as gravitational anchor

19 p3429 A69-35914

Gravity torque influence on axisymmetric dual spin satellites in fixed attitudes, using attitude stability studies of spinning single rigid bodies

19 p3429 A69-35917

Gas motion behind cylindrical shock wave created by piston motion in gravitating medium

19 p3298 A69-36386

Rats locomotion in centrifugally generated gravity fields determined for in-space behavioral studies of earth organisms gravity requirements

19 p3263 A69-36457

Surrounding masses gravitational field effect on gravitational constant determination by torsional oscillations method, considering oscillation amplitude stability to eliminate errors

19 p3374 A69-36468

Gravitational stability of infinite conducting fluid cylinder in axial magnetic field and surrounded by fluid of different density

19 p3380 A69-36483

Atmospheric entry-capsule dynamics, considering angle of attack motion under gravity forces influence and aerodynamic normal force stability relations

20 p3617 A69-37197

Moon possible origin, discussing spin off from earth, accretion from same dust cloud or formed elsewhere and captured

20 p3603 A69-37559

Hot star photogravitational acceleration determined from difference between apex and antiapex brightness, noting constant magnitude and direction of principal component of apex force

20 p3608 A69-38046

Periodic orbits of Poincare and Schwarzschild types in motion of artificial satellite in disturbed gravitational field of axisymmetric oblate spheroid

21 p3795 A69-38441

Statistical mechanics applied to mechanical properties and thermodynamics studies of rapidly expanding or collapsing self gravitating systems

21 p3801 A69-38702

Two dimensional gravity assisted trajectories for solar probe missions in ecliptic plane, discussing Venus and Jupiter assist missions

21 p3804 A69-39022

Squirrel monkeys escape behavior under centrifuge simulated gravity in excess of earth gravity

21 p3665 A69-39174

Motion sickness susceptibility during parabolic flight, comparing weightlessness and hypergravity effects on normal and labyrinthine-defective subjects

21 p3660 A69-39176

Electrocardiographic changes during gravitational stress

21 p3660 A69-39178

Spacecraft guidance analysis of multiple outer planet mission utilizing gravity assist swingbys to achieve planetary flybys with single spacecraft [AAS PAPER 68-109]

21 p3761 A69-39205

Acceleration effects on solid propellant rocket motors combustion characteristics [AIAA PAPER 68-530]

21 p3786 A69-39217

Exploration capabilities provided by Jupiter gravity assisted trajectories compared to direct ballistic flight trajectories [AAS PAPER 68-116]

21 p3805 A69-39224

Gravitational fields and atmospheric pressure effects on soils subjected to static and dynamic loading, using aircraft parabolic gravity simulation [AIAA PAPER 69-1009]

22 p3921 A69-40382

Responsiveness of cortex and visual pathway during transient hypotension induced by increased gravitational stress, discussing intraocular pressure of cat

22 p3878 A69-40779

Kinetic beam instability development in homogeneous dust /gas/ cylinder rotating in hot invariable medium under arbitrary perturbations

22 p4032 A69-41017

MHD of ideal charged gravitating fluid by variational principle, considering Einstein general relativity theory

22 p3992 A69-41056

Autometric gyro for satellite general relativity experiments, particularly earth orbit measurement of Lense-Thirring precession

23 p4162 A69-41543

Terrestrial type planetary evolution from early history and present internal configuration of earth, discussing gravitational energy associated with earth formation

23 p4212 A69-41613

Hydrodynamic stability of conducting fluid in external magnetic field subject to attraction of external spherically symmetric gravitational field

23 p4213 A69-41717

Spheroidal disturbances theoretical seismograms on surface of gravitating elastic sphere with homogeneous mantle and liquid core, considering gravity and polar radial stress effects

23 p4158 A69-42020

Tiltable conventional radio telescopes possibilities of passing gravitational limit for diameter and shortest wavelength, discussing dead load

23 p4231 A69-42138

Gravitational field structure effects on Alfvén waves propagation in inhomogeneous medium

23 p4223 A69-42478

Gravitational stress effect on heart and venous system, discussing digital computer model simulating pressure changes under head-up and down tilt

24 p4271 A69-42783

Urine osmolality of centrifurged rats compared with ad libitum or pair-fed control animals, indicating enhanced free water excretion and antidiuretic hormone involvement

24 p4262 A69-42904

Quasi-optimum control law for minimum-time bounded acceleration rendezvous in central force field using Friedland technique, with application to lunar flight

24 p4349 A69-43313

Stillbirth and neonatal death in stressed rats exposed to mild and acute gravitational loads in automobile ride and aircraft flight

24 p4266 A69-43381

Contraststreaming self gravitating gas streams stability taking into account thermal conduction and radiation effects

24 p4388 A69-43638

Ellipsoidal satellite translational rotational motion under spherical planet and point source sun gravitational fields influence, obtaining approximate solution for three body problem

24 p4390 A69-43789

GRAVITATIONAL FIELDS

Killing fields applied to nonsymmetric spaces specify coordinate lines with slowest possible metric tensor variation and gravitational radiation

01 p0115 A69-10018

Gravitation theory similar to special relativity and Newtonian theories, noting gravitational potential, metric and Newtonian charts

01 p0115 A69-10340

Stability of gravitating fluid layer of infinite extent but finite thickness including Hall effect

01 p0128 A69-10342

Gravitational field and earth shape determination by calculating perturbing potential at earth surface and in outer space, using Green functions

01 p0063 A69-10360

First approximation stability of single rotation of artificial earth satellite about center of mass in Newtonian gravitational force field

01 p0161 A69-10585

Particle moving in circular orbit perpendicular to axis of cylindrically symmetric magnetic field

01 p0120 A69-10816

Three body problem, discussing impossibility of libration points of gravitating ellipsoid

01 p0155 A69-10957

Equatorial geodesic motion of rotating source in gravitational field, using exact empty space solutions of Einstein equations

01 p0157 A69-11289

Spacecraft maneuvering by changing spacecraft geometry and utilizing different gravitational forces acting on finitely extended bodies

01 p0158 A69-11318

Tensor character of fictitious potential function introduced to approximate locally tangent actual potential function, discussing planetary gravitational anomaly observation from orbiting vehicles

02 p0312 A69-11476

Schuler gyroscopic pendulum, noting magnitude requirement for gravitational field used in inertial navigation

02 p0248 A69-11593

Gravitational fields in Hamiltonian formulation of relativistic theory of gravitation, noting geometrical aspects and equivalence to Einstein theory

02 p0280 A69-11715

Anomalous gravitational geopotential as function of mass, discussing density anomalies in spherical shells for harmonics as obtained from satellite observations

02 p0244 A69-12178

General covariant quantization of gravitation and cosmology

02 p0326 A69-12640

Light tachyons, tachyon velocity and relation to gravitational quanta

02 p0282 A69-12746

Satellite orbit selection for determining geopotential and spherical and tesseral harmonic coefficients, discussing propulsion systems and satellite observation cost feasibility

02 p0331 A69-12807

Invariant theory of gravitational radiation, using impulse energy tensor

02 p0332 A69-12835

Plane front gravitational waves analyzed on basis of gravitational radiation theory, discussing Einstein equations

02 p0332 A69-12836

Saturn ring gravitational field perturbations of space vehicle orbit on flyby mission solved by particle motion perturbation theory

03 p0508 A69-13260

Gravitational field representation based on linear spin-two field without direct self interaction, using divergence free nonlocal projection of matter stress tensor

03 p0466 A69-13388

Static locally flat solutions of Einstein vacuum field equation with line singularities and global space curvature, noting analogy to electromagnetic fields

03 p0466 A69-13389

First order equations for gravitational field quantized by methods developed for relativistic wave equations, describing elementary particles

03 p0466 A69-13422

Kerr family of solutions of Einstein and Einstein-Maxwell equations for gravitational field of rotating body, noting global structure and causality

03 p0466 A69-13473

Electromagnetic and gravitational tensor fields in Riemannian space, generalizing Maxwell and Bel-Robinson tensors

03 p0467 A69-13755

Plasma gravitational stability problem with Hall effect, noting relevance to astrophysical systems

03 p0478 A69-13803

Equilibrium problem for fluid subjected to gravitational forces and surface tension, proposing algorithm for numerical solution

03 p0417 A69-13810

Primary frequency of oscillations of ideal liquid in cylindrical vessel with axially directed weak gravitational field

03 p0418 A69-13812

Electromagnetic theory of gravitational forces unifying electromagnetic, meson and gravitational fields

03 p0469 A69-14096

Approximate method for finding solution of weak free convection in partially filled vessel in gravitational field

04 p0685 A69-14619

Idealized point mass motion in axisymmetric gravitational field, discussing orbital stability about oblate planet

04 p0658 A69-14887

Canonical equations for Lagrangian form of gravitational field equations in empty space

04 p0658 A69-14899

Capture of electrically charged micrometeorites and corpuscles in magnetic field of gravitating dipole, noting necessary condition on particle motion

04 p0659 A69-14962

Soviet book on artificial satellite motion in noncentral gravitational field, discussing celestial axisymmetric planetary orbits, stationary centers, three body problem, etc

04 p0659 A69-15027

Center of gravity of two dimensional gravitating bodies by gravitational anomaly technique, based on conformal mapping of bilinear function

05 p0792 A69-15696

Unsteady motion of ideally conducting gas flow in transverse magnetic field with allowance for gravitational forces

05 p0802 A69-15789

Lagrange multipliers of variational problem of point motion and isochronal derivatives in field of attraction of axisymmetric planet

05 p0823 A69-16015

Perturbations of stationary orbital vehicles of arbitrary latitude due to earth triaxiality, noting control by low thrust rocket engine

05 p0823 A69-16037

Velocity increments for orbital transfer in satellite rendezvous in central Newtonian gravitational field by two impulse ballistic transfer method

05 p0789 A69-16046

Parallel rendezvous of space vehicles in central gravitational field, discussing relative motion of space vehicle and supplementary force required

05 p0789 A69-16047

Feynman rules for gravitational field from coordinate independent field theoretic formalism, expressing path dependent Green functions in path independent functions

05 p0794 A69-16364

Equivalence principle application to gyroscope motion in uniform gravitational field to obtain precessional angular velocity

05 p0764 A69-16367

Satellite relative equilibrium stability under action of gravitational and aerodynamic moments

05 p0830 A69-16503

Motion stability of gyroscope in universal suspension with spring restraints and damper in gravitational field extended to include Newtonian central force field

05 p0765 A69-16684

Alfvén waves observed propagating along lines of force in inhomogeneous plasma in presence of homogeneous gravitational field

05 p0805 A69-16706

Moment equations of Vlasov plasma used for pressure effects on gravitational flute instability of nonuniform plasma

06 p0965 A69-17515

- Ballistic reentry trajectories, considering point mass motion in central force field under tangential thrust action and spherical atmospheric density distribution
06 p1006 A69-17564
- Spherical and single axis passive oscillation energy dampers for gravity gradient oriented satellites, utilizing earth gravity field or solar pressure
07 p1229 A69-18347
- Einstein equations solution in Gaussian coordinates describing particles gravitational fields including point particles
07 p1180 A69-18507
- Viscous gravitating sphere oscillations and velocity field, noting oscillations of Maxwell sphere
07 p1123 A69-18806
- Petrov classification of cylindrically symmetric space-time, giving Weyl conformal curvature tensor and surviving Ricci tensor components
07 p1182 A69-19409
- Ideal fluid interaction with gravitational field, assuming internal energy as function of natural pressure and density
07 p1182 A69-19419
- Steady state motions stability of gyroscope mounted on satellite in gravitational orbit
07 p1137 A69-19679
- Forces generated by vortex gravitational field coupled to Newtonian field, motion of fluid mass in two gravitational fields and gravitational wave propagation
08 p1382 A69-19881
- Landau damping of long wavelength ion acoustic waves in collision-free one dimensional plasma with gravity field
08 p1359 A69-19983
- Two gravitational fields theory of gravitation in general relativity for flat universe, discussing gravitational wave propagation
08 p1390 A69-20276
- Dynamics and instability of multilayered systems models in field of gravity, noting isostatic adjustment of layered globe
08 p1309 A69-20578
- Gravitational wave solution of Einstein field equations, deriving Ricci and Riemann tensors for Einstein space
08 p1352 A69-20755
- Cosmic microwave background variations produced by nonthermal gravitational radiation, imposing limits on equivalent mass density
08 p1398 A69-20773
- Velocity and temperature fields in Newtonian fluid in motion past stationary obstacle in gravitational field, noting similarity parameters reduction
09 p1429 A69-21686
- Compressible gas flow problem in point body gravitational field solved with reference to sun and interstellar gas
09 p1577 A69-21769
- Geometrized theory of combined gravitational and electromagnetic fields, using metric tensor of four dimensional Riemannian continuum to describe both fields
09 p1540 A69-22134
- Early evolution of universe related to present upper bound of primordial black body gravitational radiation temperature
09 p1601 A69-22210
- Gravitational potential of circular rings used to investigate motion stability of Saturn rings
10 p1771 A69-22855
- Generalized gravitational field equations derived on basis of principle of least action, noting vector potential of electromagnetic field
10 p1725 A69-23714
- Quasi-integral operator applicability to analytical continuation of potential field into complex region arising during gravitational and magnetic anomalies interpretation
10 p1689 A69-24082
- Two fixed centers with force function approximating earth gravitational potential, deducing formula for gravity distribution at level surface
11 p1952 A69-24254
- Stability of spherically symmetrical nonrotating mass systems moving in self consistent gravitational Einstein field, considering quasar applicability
11 p1956 A69-24394
- Shock wave propagation in gravitational field with pressure and density gradients, considering nonlinear equations of fluid flow
11 p1961 A69-25106
- Einstein field equations solutions for homogeneous cosmological models, assuming perfect fluid gravitation source and existence of simply transitive surface motions
11 p1919 A69-25245
- Gyrostabilized satellite steady state motions in Newtonian force field having displaced satellite center of mass orbital plane relative to center of attraction
12 p2173 A69-25885
- Density stratified model of troposphere and constant gravity field for ground level pressure perturbations in mesoscale region
12 p2126 A69-26016
- Gravitational recoil due to gravitational emission of source analyzed in terms of Einstein equations
12 p2130 A69-26338
- Pitch angle distribution function of thermal protons in magnetosphere taking into account earth gravitational field
12 p2067 A69-26354
- Relativistic hydrodynamic equations for charged particles interacting in external scalar and gravitational fields, considering particle motion and scalar plasma dispersion
12 p2130 A69-26462
- Nonrelativistic theory of rotating configurations in terms of gravitational potential, center mass density and variable angular velocity
12 p2159 A69-26662
- Spiral arms as wakes of gravitational shock waves arising at galactic nucleus boundary and propagating outward through interstellar gas
12 p2170 A69-27066
- Earth gravitational field representation by separating geopotential into normal and disturbing potential for solving geodetic boundary value problem for satellite geodesy
12 p2076 A69-27089
- Gravity perturbations in earth external field, treating anomalous potential using Green integral formula and spherical harmonics
12 p2077 A69-27139
- Surface gravities and detection of metallic line early A stars from spectral classification using equivalent line widths
12 p2171 A69-27151
- Gravitational parameters of highly condensed objects, considering white dwarf evolutionary stages, density and upper mass limit
13 p2334 A69-27190
- Spacecraft horizontal maneuvers in homogeneous gravitational field to achieve soft landing on planetary surface, including optimal liftoff and orbital transfer
13 p2356 A69-27685
- Finite Larmor radius effects on gravitational instability of rotating anisotropic plasma for transverse wave propagation mode
13 p2346 A69-27704
- Conformally plane solutions to Einstein equations derived with energy momentum tensor characteristic of pulverized material representing gravitational fields
13 p2298 A69-27796
- Internal solution of Einstein equations for steady axisymmetric gravitational fields by integrating differential equations with initial conditions
13 p2351 A69-27863
- Unified geometric description of gravitational and electromagnetic fields, determining electromagnetic field influence on geometry from dimensional constant
13 p2300 A69-28450
- Increases of Newtonian potential, gradient and second derivative on gravitating body, considering positive and negative masses
13 p2300 A69-28545
- Odd zonal harmonics coefficients in earth gravitational potential from analysis of satellite orbital eccentricity variations
14 p2439 A69-29118
- Energy momentum tensor in Einstein field equations derived from covariant field equations for vector meson
14 p2486 A69-29452
- Steady motion stability of satellite with gimbal suspended gyroscope in central gravitational field, showing no effect of satellite perturbations on gyrostaticity
14 p2530 A69-29481
- Asymptotic expansions for Einstein-Maxwell field representing gravitational and electromagnetic radiation from finite source of matter and charge
14 p2486 A69-29635
- Successive approximations method applied to system of independent equations describing electromagnetic wave propagation in space with gravitational wave metric
14 p2487 A69-29669
- Mass point system moving in gravitational field, discussing statistical mechanics, relaxation time and evolution of stellar systems
14 p2530 A69-29987
- Elastic and inelastic evolution of concentrated gravitational systems, discussing stellar diffusion, evaporation, halos and rotating systems
15 p2687 A69-30548
- First approximation stability of single rotation of artificial earth satellite about center of mass in Newtonian gravitational force field
15 p2702 A69-30755
- Simulated gravitational lens made of Plexiglass for demonstrating stellar gravitational lens phenomena, presenting partial cross section
15 p2653 A69-31163
- Weakly damped transverse and thermal waves development and propagation in viscous heat conducting incompressible fluid under temperature and gravitational fields
15 p2718 A69-31168
- Lunar mass and gravitational field determined from lunar satellite dynamics, using potential function in terms of spherical harmonics
15 p2699 A69-31405
- Satellite orbit evolution data applied to refinement of geophysical parameters, including upper atmosphere parameters and zonal harmonic coefficients in gravitational potential expansion
15 p2604 A69-31417
- Electromagnetic cavity resonances in rotationally induced gravitational field by relativistic approach
16 p2812 A69-32048
- Gravitational radiation indicated by coincidences of detector observations over 1000 km, eliminating seismic and electromagnetic effects
16 p2784 A69-32565
- Einstein equations for empty space applied to degenerate gravitational fields with twisting rays, admitting shear-free twisting congruence of null geodesics
17 p3004 A69-32832
- Ground state energy inequalities for N particle non-relativistic quantum mechanical system, showing non-saturating gravitational forces and increasing binding energy per particle
17 p3028 A69-32900
- Particle production by gravitational fields in universe via quantum field theory, considering cosmological models
17 p3008 A69-33003
- Minimum time single axis capture of satellite spinning about pitch axis by low thrust jets, considering gravity gradient phenomenon
17 p3048 A69-33237
- Effective temperature and gravity values for Mn Ap stars by comparing spectrum scans and H line profiles with predictions from atmospheric models
17 p3038 A69-33724
- Earth-moon and moon-earth trajectory parameters related to lunar orbit conditions for synthesizing lunar orbit trajectory
18 p3196 A69-34704
- Capture of electrically charged micrometeorites and corpuscles in magnetic field of gravitating dipole, noting necessary condition on particle motion
18 p3197 A69-34725
- Unsteady motion of ideally conducting gas flow in transverse magnetic field with allowance for gravitational forces
18 p3181 A69-35040
- Einstein gravitational field equations series expansion in powers of gravity constant by Bondi method for gravitational waves
18 p3173 A69-35146
- Polar coordinates in Euclidean space applied to theory of satellite moving in gravitational field of spherically symmetrical body, introducing equipotential surfaces
19 p3397 A69-35610
- Relativistic tensor theories of gravitation in flat space with Neumann and Newton forms of gravitational potential, deriving expressions to estimate differences perceived by observer
19 p3373 A69-36204
- Newtonian and general relativistic orbits of point mass in inverse square law force field, noting radar determination of spacecraft orbits
20 p3595 A69-37176
- Satellite representations of earth gravity field portraying consistent pattern of mass anomalies due to density differences in layers
20 p3523 A69-37566

Velocity increments for orbital transfer in satellite rendezvous in central Newtonian gravitational field by two impulse ballistic transfer method 20 p3574 A69-37955

Parallel rendezvous of space vehicles in central gravitational field, discussing relative motion of space vehicle and supplementary force required 20 p3574 A69-37956

Satellite orbit determination method allowing geogravitational field determination and correction of station coordinates 21 p3793 A69-38337

Infinitesimal mass trajectories and possible double collision in gravitational field of two finite and unequal masses in plane elliptic restricted three body problem 21 p3795 A69-38443

Five dimensional theory applied to Einstein generalized gravity equations for spherically symmetrical gravitational waves, yielding gravity constant variation from Newton approximation 21 p3802 A69-38842

Gravity gradient phenomena in orbiting vehicle used to explore planetary gravity [AIAA PAPER 68-851] 21 p3804 A69-39024

Near equatorial near synchronous satellite orbits determined by supplementing spherical harmonics representation of earth gravitational field with polynomial force model representation [AAS PAPER 68-141] 21 p3806 A69-39234

Isotropic ideal bidimensional filter in interpretation of anomalous gravity fields, especially for separating local and regional effects 21 p3724 A69-39246

Statistical characteristics of linear transformations of gravity field anomalies by linear operators, noting computation of covariance function 21 p3716 A69-39247

Time-similar and isotropic geodetic curves simulating paths of test bodies in Riemann space corresponding to gravitational field 21 p3772 A69-39621

Earth shape and areas of anomalous gravity from satellite orbital perturbations, tabulating results from various experimenters 21 p3718 A69-39734

Variations in gravity, plotting results for U.S., with tables for Alaska, Mexico, India, Africa, etc 21 p3718 A69-39735

Earth gravitational potential energy changes in examining expanding earth theory 22 p3936 A69-40180

Gravitational fields and atmospheric pressure effects on soils subjected to static and dynamic loading, using aircraft parabolic gravity simulation [AIAA PAPER 69-1009] 22 p3921 A69-40382

Dimensionless coupling constants predicted from causal relationship among strong, electromagnetic, weak and gravitational interactions in fluid region of universe 22 p3981 A69-40416

Neglected gravity coefficients influence on computed satellite orbits and geodetic parameters 22 p4023 A69-40556

Nonexistence of second order clustering of galaxies and relationship to gravitational cut-off, relativistic cosmologies and red shifted light by exponential decay of photon energy 22 p4024 A69-40579

Model atmospheres of late type stars with solar abundances, effective temperatures between 2000-4000 K and gravities corresponding to dwarf, giant and supergiant stars 22 p4027 A69-40654

Schwarzschild metric properties in synchronous reference system, using succession of Schwarzschild interval holonomic transformations as function of gravitational radius 22 p3982 A69-41063

Optimal pulsed orbital transfer between close nearly circular orbits in central field of gravity realized by geometrical solution 22 p4033 A69-41085

Tectonic classification of earth gravitational field based on mean gravity anomalies, correlating positive anomalies with Quaternary volcanism 23 p4154 A69-41318

Ionospheric perturbations generation by time variable alternating electrical currents at polar latitudes, constructing radiation patterns for gravitational waves 23 p4155 A69-41842

Einstein general theory of relativity and apparatus for gravitational radiation detection, discussing Dicke experiments and Riemann tensor measurement 23 p4192 A69-42331

Gravitational field quantization according to Einstein theory using classical Hamiltonian dynamics and quantum rules for constraints 23 p4192 A69-42332

Optimal thrust control for plane curvilinear motion of variable mass point in gravitational field 23 p4192 A69-42340

Fluctuations in 3K radiation, considering scattering effect on gravitational fields of galactic clusters and large coherence or wavelength scattering by gravitational radiation 23 p4222 A69-42401

Gravitational field structure effects on Alfvén waves propagation in inhomogeneous medium 23 p4223 A69-42478

Stationary equilibrium of two dimensional plasmas with motion perpendicular to uniform magnetic field and gravitational field, considering resistive diffusion role 24 p4356 A69-43365

Stellar system differential rotation effect on gravitational instability with distribution propagating in rotation axis direction 24 p4388 A69-43639

General relativity uniqueness established by postulating derivability of equations of motion from gravitational field equations [AIAA PAPER 67-481] 24 p4365 A69-43668

Stability of spherically symmetrical nonrotating mass systems moving in self consistent gravitational Einstein field, considering quasar applicability 24 p4390 A69-43784

GRAVITY

U GRAVITATION

GRAVITY GRADIENT SATELLITES

NT APPLICATIONS TECHNOLOGY SATELLITES

NT ORBITAL SATELLITE

Attitude control system for gravity gradient stabilized satellite in synchronous and near synchronous equatorial orbits, discussing libration damping methods 03 p0504 A69-12857

Boom flutter effects on attitude dynamics of OV-10 satellite, noting introduction of angular momentum by tip mass elliptical vibration 04 p0666 A69-15520

Thermoelastic effects on gravity gradient stabilization of artificial satellites, including role of solar activity 06 p1025 A69-17613

ORBIT-CAL designed to achieve three axis orientation to local vertical and velocity vector in eccentric orbit by gravity gradient stabilization 07 p1226 A69-18323

Thermal flutter effect on gravity gradient stabilized spacecraft, noting dependence on sunlight and time 07 p1226 A69-18325

Semipassive attitude control system providing one degree pointing accuracies in all axes 07 p1226 A69-18326

Storable tubular extendible member /STEM/ booms for gravity gradient applications, emphasizing reflective coatings to minimize deflection by solar radiation 07 p1226 A69-18327

RAE-A satellite design, simulation and flight performance, discussing gravity gradient stabilization 07 p1226 A69-18328

Three axis gravity gradient stabilization system to minimize stray magnetic fields 07 p1226 A69-18329

Three axis gravity gradient stabilization systems for OV-1 spacecraft design 07 p1227 A69-18330

Damping boom flutter and magnetic dipoles effects on attitude stability of gravity gradient satellites with three axis stabilization 07 p1227 A69-18332

Semiactive gravity gradient stabilization system design for low altitude earth oriented spacecraft attitude control, using active reaction wheel scanner 07 p1227 A69-18334

Hybrid simulation study of satellite attitude control system to replace momentum wheels and gas jets by commandable gravity gradient boom 07 p1227 A69-18335

Magnetic sample-and-hold damping using geomagnetic field for libration damping of gravity gradient stabilized satellite in near synchronous equatorial orbit 07 p1227 A69-18337

System designs for manned spacecraft gravity gradient stabilization of Saturn S-4B stage at 400 km and lunar module at synchronous altitude 07 p1228 A69-18338

Eddy current damping systems for gravity gradient stabilized satellites, discussing electromagnetic torque and various parametric relationships 07 p1228 A69-18341

Semiactive gravity gradient stabilization system /SAGS/ for active pitch control and semipassive roll/yaw control 07 p1228 A69-18342

Naval Research Laboratory experience with two and three axis gravity gradient satellites stabilization systems 07 p1228 A69-18344

Long life gravity gradient stabilization system using Vee configured control moment gyros to semipassively damp vehicle librations 07 p1228 A69-18345

RAE satellite boom deployment to achieve gravity gradient capture 07 p1228 A69-18346

Spherical and single axis passive oscillation energy dampers for gravity gradient oriented satellites, utilizing earth gravity field or solar pressure 07 p1229 A69-18347

Gravity gradient stabilization role in space missions in 1970s and 1980s 07 p1229 A69-18348

GEOS 2 attitude stabilization by means of gravity gradient principle and passive energy dissipator, noting effects of orbit eccentricity, thermal distortion, radiation, etc 07 p1229 A69-18349

Wire screen deployable boom concept for avoiding thermal bending of slender tubes problem in application to gravity gradient stabilization and antennas of spacecraft 07 p1229 A69-18350

Vertistat H gravity gradient configuration prevents elastic deformation, permitting high pointing accuracy at synchronous altitudes 07 p1229 A69-18351

Digital program containing Eulerian formalism for multiple interconnected rigid members applied to gravity gradient stabilized satellite with flexible booms 11 p1989 A69-25502

Magnetic attitude detection and control system for Radio Astronomy Explorer satellite [AIAA PAPER 68-855] 12 p2174 A69-26779

Satellite gravitational stabilization system with maximum damping rate, discussing orbital plane oscillations 16 p2867 A69-31738

Damping of gravity gradient stabilized satellites by hysteresis of materials, friction of viscous fluids, magnetic hysteresis and Foucault currents 17 p3047 A69-33230

Gravity gradient satellite stabilization and magnetic hysteresis damping systems, outlining energy dissipation device involving torques 17 p3047 A69-33231

Rotor hazards in rotational behavior of gravity stabilized satellites, describing gyrostat applications 17 p3048 A69-33233

Gravity gradient stabilized satellite achieving best theoretical performance through Foucault current and magnetic hysteresis articulations 17 p3048 A69-33234

Quadratic approximation at matrix level of dynamic equations for rotating bodies applied to gravity gradient satellite exhibiting nonlinear resonances 18 p3174 A69-35298

Asymptotic stability of null solution of matrix differential equation, considering linearized equations of rotational motion for hinged two body gravity gradient satellite orbit 20 p3575 A69-37212

Gravity gradient phenomena in orbiting vehicle used to explore planetary gravity [AIAA PAPER 68-851] 21 p3804 A69-39024

Three dimensional coupled flexural and attitude dynamics of libration-damped cruciform gravity gradient satellite, discussing effects of orbital eccentricity, solar radiation pressure, etc [AAS PAPER 68-126] 21 p3819 A69-39211

Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle [AIAA PAPER 69-920] 21 p3821 A69-39350

Capture and gravity gradient stabilization of LIDOS satellite in eccentric orbit [AIAA PAPER 69-921] 21 p3821 A69-39351

Gravity gradient perturbing torque cast in terms of perturbing Hamiltonian, deriving long term changes in

GRAVITY WAVES

rotational motion of tumbling triaxial satellite in elliptical orbit
[AIAA PAPER 69-922] 21 p3821 A69-39353

Aerodynamic and gravitational torque effects on orbiting satellites attitude stability, applying Liapunov direct method in case of conservative aerodynamic torque
[AIAA PAPER 69-832] 21 p3821 A69-39363

Dynamics of relay gas jet preliminary vibration damping system of gravity gradient stabilized satellite, allowing for sensor limitations and stabilizer flexural vibrations 21 p3826 A69-39638

Periodic solutions for gravity-gradient stabilized satellite librating in orbital plane, using elliptic sine function and harmonic balance method 23 p4224 A69-41876

Torqued two axis gimbaled boom actuator satellite attitude control
[AIAA PAPER 68-857] 24 p4348 A69-43245

Stability analysis of periodic solutions associated with planar librations of gravity oriented satellite using linear perturbation analysis 24 p4388 A69-43649

GRAVITY WAVES

NT BAROCLINIC WAVES

Gravity waves train propagation in cylindrical channel, discussing derivation by three dimensional flow analysis method 01 p0059 A69-10382

Indeformable gravity waves in horizontal cylindrical channel, using first and second order approximations for nearly uniform flow equations solutions 01 p0060 A69-10392

Solitary mesoscale waves from air mass motion in troposphere, neglecting Coriolis force and turbulence 02 p0274 A69-11445

Dispersion relation of internal acoustic gravity wave motion in compressible nonviscous and nonheatconducting atmosphere 02 p0242 A69-11868

Viscous damping of internal waves on rotating earth, analyzing spatial propagation attenuation in two layer system 02 p0247 A69-12775

Invariant theory of gravitational radiation, using impulse energy tensor 02 p0332 A69-12835

Plane front gravitational waves analyzed on basis of gravitational radiation theory, discussing Einstein equations 02 p0332 A69-12836

Quasi-biennial oscillation in tropical stratosphere as result of long period gravity waves interaction with zonal wind 03 p0461 A69-13342

Reflectivity of low Richardson number critical levels for internal gravity waves propagating in stably stratified fluids with shear, studying stability numerically 03 p0424 A69-13953

Gravity wave contribution to atmospheric wind motion at 100 km 03 p0426 A69-14031

Irrrotational almost uniform plane flow of two immiscible inviscid liquids on horizontal bottom in channel, noting permanent gravity waves 04 p0590 A69-15055

Long distance propagation of acoustic gravity waves ducted in thermosphere, noting effect of seasonal variations in polar region 04 p0595 A69-15437

Internal gravity waves propagation in shear flow, detailing interaction stress in incompressible stratified Boussinesq liquid, conservation energy exchange and radiation stress 05 p0788 A69-15721

Atmospheric density variation measurements by density gages on Explorer 32 satellite confirm wave propagation in neutral thermosphere as free internal gravity waves 05 p0754 A69-16261

Gravity waves observed by ionospheric temperature measurements in F region 05 p0754 A69-16262

Internal atmospheric gravity waves in F region observed with electron density profiles deduced from vertical incidence ionograms, obtaining phase velocities 05 p0756 A69-16402

Spatial distribution of vertically moving ionized formations in ionosphere suggests acoustic gravity waves excited in polar regions as cause 06 p0922 A69-17749

Brans-Dicke scalar-tensor theory, showing radiative Riemann tensor existence in absence of usual spin-2 gravitational waves 07 p1216 A69-18894

Mass displacement in light path due to interaction with gravitational wave accompanying light pulse, discussing general relativity tests for time delay and starlight bending 09 p1540 A69-22081

Gravitational waves emitted by relativistic, nonrotating, nonradially pulsating stellar model, discussing polarization and energy and momentum transport 09 p1605 A69-22417

Magnetoionic formulas similarity in ionospheric radio propagation and atmospheric acoustic gravity wave propagation above electron gyrofrequency 10 p1655 A69-23419

Data requirements and acquisition for detection and description of tides and gravity waves in upper atmosphere 10 p1685 A69-23833

Dispersion relation for internal gravity wave propagation across exponentially decreasing magnetic field in conducting fluid, noting atmospheric wave propagation in ionosphere 11 p1877 A69-24564

Boundary value problem for gravity induced wave motion of ideal fluid in axisymmetric vessel with annular ribs, noting application to bodies of revolution 11 p1868 A69-24769

Full wave calculation of gravity waves for thermospheric model, describing wave type reflection, transmission, conversion and coupling by scattering matrix elements 11 p1878 A69-25150

Joule heating role in generating internal gravity wave energy in auroral electrojet region, using linear model 12 p2064 A69-26010

Ray tracing techniques applied to internal gravity waves in fluid with spatially varying mean flows 12 p2067 A69-26345

Variational method for weak second order resonant interactions among waves with position and time varying amplitudes and phase angles 13 p2297 A69-27634

Ion drag effects on acoustic gravity waves propagation in isothermal F region, discussing indicated wave damping 14 p2434 A69-28944

Linearized perturbation for photochemical and dynamical effects in internal atmospheric gravity wave production of E region ionospheric irregularities 14 p2440 A69-29128

Nonlinear internal gravity waves in stratified atmosphere of unbounded inviscid incompressible fluid, noting wave amplitude inverse proportion to atmospheric density 14 p2441 A69-29574

Horizontal shear flow effect on linear geostrophic adjustment in unbounded barotropic fluid, discussing gravity waves, vorticity equations, available energy, etc 15 p2648 A69-30217

Internal gravity waves suggested as possible cause for anomalous mesospheric temperatures 15 p2601 A69-31376

Gravity waves in thermospheric heating during magnetic storm, discussing electron density and temperature and ion velocity variations 15 p2605 A69-31435

Strong vertical wind in low ionosphere due to short period reflected gravity waves, obtaining standing wave system 15 p2606 A69-31449

Discrete layers criterion for multilayer approximation to real atmosphere in acoustic gravity wave propagation 16 p2774 A69-31980

Ionization density, velocity and temperatures oscillations revealed by Thomson scatter observations of gravity waves in F regions 16 p2779 A69-32198

Subsonic thermal convection or internal gravity waves from formal scale analysis of equations of motion in plane parallel atmosphere 17 p2960 A69-33155

Lee waves and orographic wind phenomena in Rocky Mountains near Boulder, noting stratospheric standing gravity waves and turbulence sampled by HI-CAT U-2 17 p2999 A69-33738

Traveling ionospheric disturbances in form of large scale electron concentration discontinuities created by propagating internal gravitational waves 17 p2996 A69-33980

Models for pulsars periodicity and period range due to nonradial gravity wave in almost adiabatic matter of degenerate neutron stars 18 p3196 A69-34645

Dispersion relation for gravity waves propagating in atmosphere with horizontal background wind variable with altitude 18 p3128 A69-34801

Acoustic gravity waves generated in isothermal atmosphere by ground energy source calculated using stationary phase method and kinematic theory 18 p3129 A69-34953

Convective momentum exchange in mesoscale gravity wave 20 p3522 A69-37350

Eddy diffusion coefficients due to instabilities in internal gravity waves near mesopause 20 p3534 A69-38090

Atmospheric gravity waves amplitude generated in equatorial electrojets and polar regions 20 p3593 A69-38107

Lunar maria structure and evolution as homologous transient gravity wave systems from impact craters on crust 21 p3803 A69-38982

Small amplitude acoustic waves propagating in compressible fluid with parallel shear flow and within constant gravitational field 21 p3772 A69-39241

Universe expansion model, integrating Einstein gravitation equations with cosmological constant lambda to interpret Hubble effect 22 p4029 A69-40756

Acoustic gravity waves propagation over spherical earth with isothermal windless atmosphere, determining pressure perturbations 23 p4158 A69-42175

Wavelike structure observed near tropopause with sensitive radar system, suggesting clear air turbulence as cause of breakdown of gravitational wave 24 p4342 A69-42893

GRAY GAS

Radiant heat transfer in optically thick gray gas situated between parallel black diffusively emitting walls, using matched asymptotic expansion method 01 p0178 A69-11411

Radiative-convective heat transfer in gray gas plane layer blown into turbulent flow past permeable plate 07 p1242 A69-18991

Radiative transfer iteration for gray medium between concentric spheres and for constant heat generating spherical region imbedded in gray medium 08 p1420 A69-20152

Radiative-conductive heat transfer in plane layer of gray heat conducting medium, solving energy equation 09 p1621 A69-21433

Thermal radiation effects on laminar free convection boundary layer of vertical flat plate, studying absorbing and nonabsorbing gases [ASME PAPER 68-HT-43] 13 p2373 A69-27772

Differential approximation for radiative transfer between concentric spheres enclosing gray gas [ASME PAPER 68-HT-21] 13 p2373 A69-27774

Radiative transfer between two concentric gray opaque spheres separated by radiating gray gas, employing Fredholm equations 13 p2377 A69-28149

Radiating gray gas laminar jet in thermodynamic equilibrium ejected from plane nozzle into wake analyzed using boundary layer, divergence and transfer equations 14 p2432 A69-29612

Substitute kernel approximation for acoustic waves radiative transfer equations for nongray gas near equilibrium 15 p2717 A69-30791

Thermal radiation effects on subsonic flow of ideal gray gas, calculating streamwise variations of flow properties 15 p2717 A69-30908

Nonuniform wall radiation production of radiative equilibrium temperature and flux distributions in gray medium, discussing various approximation methods of solution [AIAA PAPER 69-633] 17 p3072 A69-33294

Atmospheric structure, greenhouse effect and convective instability in window gray and nongray planetary atmospheres 20 p3615 A69-38257

Total band absorptance of nonisothermal IR radiating gas, using wideband formulation of Curtis-Godson approximation and series expansion formulation 22 p3983 A69-40101

Quasi-isotropic semigray radiative transfer prediction using nongray model in bounded plane-parallel geometries for gas with spectrum from free-free processes
24 p4415 A69-43673

GREASES

Ball bearing test apparatus for evaluation of greases and solid lubricants at high temperatures [ASLE PREPRINT 68AM 7C-2]
01 p0087 A69-10912

Thermal silicone grease type filler materials for heat transfer across bolted or clamped sheet metal surfaces in electronic equipment for space applications
16 p2794 A69-32560

GREAT BRITAIN

Weathering tests on wrought aluminum alloys exposed at U.S. sites compared to British industrial atmospheric exposure results
01 p0101 A69-11354

Space science and technology - Conference, London, February 1968
06 p0997 A69-16852

Suborbital probes, discussing UK sounding rockets Skylark, Petrel and Skua configurations, capabilities and performances
06 p1012 A69-16859

Fluidics in UK, discussing digital control elements and systems and transmission lines in alternating flow hydraulics [AGARDOGRAPH-118]
08 p1257 A69-20952

Airport evolution in London, discussing transportation, safety, international trade, economics, aircraft types and noise spectra
09 p1479 A69-22582

Engineering assessment and flight testing of aircraft systems in UK, discussing operational reliability, etc
13 p2201 A69-27539

Synchronous satellite TV broadcasting systems in UK, discussing equipment, transmission problems and economic factors
13 p2220 A69-27830

Vertical takeoff aircraft role in British Government air industry program, noting applications to intercity passenger service
13 p2203 A69-28355

Short takeoff aircraft characteristics, discussing aircraft certification and airfield regulation in Great Britain
13 p2203 A69-28356

British and Soviet D region electron density distributions from same VLF and LF propagation data
14 p2439 A69-29112

Meteorite entering earth atmosphere on 25 April 1969 over England, describing path, size and recovered fragments
15 p2701 A69-31528

Flying offenses committed by private and professional pilots in Great Britain, discussing role of authorities involved
17 p3077 A69-34202

Edwards Inquiry Report into British Civil Air Transport based on cost effective economic study, involving airlines and regulatory system
18 p3231 A69-34311

Visibility changes in fog at London airport determined by transmissometer records
18 p3167 A69-35266

European cooperation in aircraft industry and application to Anglo-French helicopter program
19 p3456 A69-36849

Airport requirements in England, considering various sites, noise nuisance and integration into total transport system
22 p3926 A69-40432

GREAT CIRCLES

Great circle route determination based on celestial spherical triangulation
02 p0278 A69-12360

GREAT POLAR CAPS

U POLAR CAPS

GREEN FUNCTION

Upper and lower bounds for static or geometric field in two and three dimensional elasticity theory, using Green functions
01 p0167 A69-10328

Gravitational field and earth shape determination by calculating perturbing potential at earth surface and in outer space, using Green functions
01 p0063 A69-10360

Multiphoton ionization cross section of atom via perturbed Green function, considering light wave electromagnetic field perturbing effects on atomic levels
02 p0283 A69-11539

Green function for linear antennas in warm plasma fed by coaxial air filled transmission line, computing current distribution and input admittance
02 p0215 A69-11942

Green functions associated with electromagnetic radiation in moving medium, finding time dependent and harmonic Green functions
03 p0466 A69-13352

Second order elliptical operator for m-dimensional Euclidian space with open region bounded by closed surface
03 p0456 A69-13604

Displacement correlations and frequency spectra for mass disordered lattices, deriving cluster expansion for phonon Green function
03 p0493 A69-14241

Book on boundary value problems of mathematical physics emphasizing solutions, Green functions, transforms and variational methods
04 p0625 A69-15233

Green function for computation of stress intensity factors for edge cracks in rectangular plates with arbitrary loadings [ASME PAPER 68-WA/MET-18]
05 p0839 A69-16156

Feynman rules for gravitational field from coordinate independent field theoretic formalism, expressing path dependent Green functions in path independent functions
05 p0794 A69-16364

Convergence of Grammel and Galerkin methods allows use of modified Green function
06 p1020 A69-17132

Dielectric constant of liquid metals emphasizing Green function techniques for Wick theorem, Feynman diagrams, Dyson equation and diagrams in impulse space
07 p1196 A69-18298

Green function applied to isotropic scattering of radiation in three dimensional homogeneous space
07 p1241 A69-18808

Green function method for atomic line broadening in plasma radiation, including electron correlations and quantum effects
08 p1361 A69-20147

Green function in closed form for energy transport equation solution in axisymmetric Oseen flow
08 p1305 A69-20850

Influence function for vertical wind profile from pressure gradient field
09 p1536 A69-21867

Green function type solutions of shell equations by small parameter technique for case of free terms consisting of Dirac delta function
09 p1614 A69-21886

Micropolar elasticity using Green functions to solve wave equations in unbounded medium, noting effects of concentrated force and body couples
09 p1618 A69-22261

Micropolar thermoelasticity using Green functions to solve wave equations in unbounded medium and study displacement, rotation and temperature fields
09 p1618 A69-22262

Diffraction problem on cylindrical bodies of arbitrary shape reduced to integral equations by using Green functions for free spaces
09 p1459 A69-22634

Incompressible fluid nonlinear oscillations in rectangular basin analyzed by Green function for mixed problem, calculating velocity potential and free surface approximations
09 p1483 A69-22711

Generalized solutions of elliptic boundary value problems by applying Green functions
10 p1718 A69-23207

Green function solution to Maxwell equations for interplanetary and coronal magnetic fields above photosphere, considering field at source surface
11 p1958 A69-24429

Green tensor construction for systems of linear differential equations with constant coefficients
11 p1996 A69-25730

Steady state solution of periodically excited circuit, constructing Green function for use in convolution integral
12 p2036 A69-25918

Elliptic boundary value problem for differential equation and pseudodifferential boundary conditions, obtaining Green formula from formulated conjugate problem
12 p2121 A69-26200

Homeomorphism theorem for Petrovskii and homogeneous elliptic systems applied to boundary value problems and Green formula
13 p2287 A69-27515

Nonnegative solutions of second order linear divergence structure parabolic differential equations, discussing Cauchy problem solution, Green function, etc
13 p2290 A69-28539

Green function for boundary value problems of heat conduction equation constructed by heat potentials method
13 p2380 A69-28548

Radiation field from sources on conical surface using Green functions
13 p2223 A69-28569

General formulas, reciprocity theorem and modified Green formula derived from variational principles for mixed problem of wave equation
14 p2485 A69-29354

Integral formulation of scattering theory extended to Coulomb interactions by expanding Green function and treating kernel singularities
14 p2489 A69-29995

Green function construction for boundary value problems of heat conduction on rectilinear segment with dynamic boundaries, using integral equations
15 p2716 A69-30075

Rayleigh assumption validity for wave scattering by analytic periodic surface predicated on solutions analytic continuation across boundary, discussing Green function role
15 p2652 A69-30673

Time dependent Green function method for premature saturation due to parametric amplification of nonuniform spin wave modes by one and two magnon processes
15 p2668 A69-30685

Green functions for Laplace, Poisson and transient heat diffusion equations solved by matrix multiplication
15 p2710 A69-30870

Linear aerospace structures vibrations in randomly distributed pressure field forecasted by applying Green function [ONERA-TP-703]
17 p3054 A69-33064

Electromagnetic fields theory simultaneously determining vector electric and magnetic field aspects in terms of operator Green functions
17 p2924 A69-33833

Electromagnetic waves radiation in general time invariant linear media with general boundary conditions, using Green function
17 p2924 A69-33834

Wave propagation and scattering in anisotropic media, obtaining asymptotic expression for dyadic Green function for infinite space
17 p2924 A69-33835

Dyadic Green function technique extended to problems of electromagnetic scattering in inhomogeneous media with spherical symmetry
17 p2924 A69-33837

Wave scattering from nonplanar periodic structures using periodicity method, including Green function and Mellin transform
17 p2929 A69-33880

Green functions for displacement and rotation fields of infinite homogeneous isotropic centrosymmetric micropolar elastic body subjected to time dependent mass forces and momenta
18 p3226 A69-35459

Motion equations of holonomic system of elastic bodies subjected to scleronomic, ideal and statically determinate constraints, using Green tensor
19 p3374 A69-36584

Generalized solutions of elliptic boundary value problems by applying Green functions
21 p3756 A69-39148

Nonresonant Green functions of auxiliary boundary value problems for deriving integral equations for Dirichlet and Neumann diffractions at open screens
22 p3901 A69-40949

Green matrix for operator M governing steady state wave propagation in inhomogeneous anisotropic media obtained as solution of integral equations system
23 p4180 A69-41368

Green formula and fundamental solution for determining displacements and stresses in contour integral form for plate bending problems
23 p4230 A69-42002

Real space-time Green functions applied to turbulence induced infinite thin elastic plate vibration, analyzing mechanical dissipation effects
24 p4395 A69-42597

GREENHOUSE EFFECT

Greenhouse effect in Venusian atmosphere, discussing cause of vertical temperature distribution established by Venera 4 probe
13 p2345 A69-27690

GRIDS

Nongray greenhouse model of Venus atmosphere possessing IR opacity due to carbon dioxide, water and diatomic N compatible with Mariner 5 and Venera 4 results

20 p3615 A69-38259

Saturn surface spectrum near ring shadow examined for water vapor content in ring and greenhouse effect on surface

20 p3616 A69-38305

Fredholm integral equation for source function of Greenhouse effect and finite atmospheres solved by computational algorithm

23 p4239 A69-41607

GRIDS

Grid method of strain determination, discussing print, record, analysis and application

18 p3134 A69-34423

Finite difference scheme for primitive equation model, emphasizing two grid internal noise suppression to improve gradient force expression accuracy

19 p3364 A69-36507

Numerical integration of atmospheric motion equations in global domain using hexagonal grid, including sphericity corrections and Coriolis term

19 p3364 A69-36509

Energy spectra measurements of turbulent velocities behind grids of different geometries noting relation to deviation from isotropy

21 p3693 A69-38704

Computer program for satellite APT geographical grid production, discussing latitude-longitude intersections transformation to Cartesian coordinates

21 p3718 A69-39749

Grids applied to plastic samples for strain measurement using moire fringe method, comparing tensile test results with Linley extensometer

22 p4042 A69-40312

Gridding technique for satellite APT pictures taken with camera axis perpendicular to earth surface

24 p4314 A69-42992

Angular grid spacing resolution near poles effect tests in global prediction model for geophysical fluid dynamics, investigating forecast height and wind fields

24 p4344 A69-43066

GRIFFITH CRACK

Griffith biaxial fracture criterion for porous brittle materials based on continuum model with random infinitely sharp cracks

[ASME PAPER 68-WA/MET-12]

05 p0838 A69-16152

Simulated crack experiment illustrating Griffith energy balance fracture criterion

05 p0842 A69-16438

Griffith crack in brittle material, discussing validity for rock-like material with nonlinear stress-strain relationship

06 p1020 A69-17128

Quasi-brittle fracture of plastic materials based on Griffith theory and crack propagation, analyzing real surface energy and work of plastic strain

09 p1614 A69-21883

Integral transform solutions for Griffith cracks in brittle fracture theory, discussing disk and penny shaped cracks in cylinders and thick plates

10 p1801 A69-23688

Mathematical theory of equilibrium cracks in stressed bodies with minimum loading for crack extension, analyzing crack tip zone and force transmission

11 p1974 A69-24668

Ceramics strength and fracture behavior in terms of modified Griffith equation, discussing effective surface energy and initial crack size

11 p1907 A69-25238

Metallographic aspects of fracture, analyzing very brittle solids, Griffith cracks, ductile solids and ductile to brittle transition

13 p2274 A69-27225

Stress intensity for Griffith crack with asymmetrical distribution of surface tractions

13 p2369 A69-28352

Griffith crack in thin plate opened by uniform tension at infinity, discussing effect of ties on stress intensity factor

15 p2710 A69-30809

GRINDING [COMMINUTION]

Powdering temperature effect on mesh size, structure and mechanical properties of pressed semifinished sintered Al-Cr and Al-Fe alloys

03 p0452 A69-14119

Thermochemically synthesized high melting micropowders grinding by vibrational method and classification for polishing and finishing applications

12 p2113 A69-26256

GRINDING [MATERIAL REMOVAL]

NT METAL GRINDING

Low temperature grinding technique for IR spectra of propellants and binders in potassium bromide disks

01 p0082 A69-10892

Parallel and coplanar Brewster angle grinding of maser tube ends

03 p0440 A69-13302

Stainless steel biaxial residual surface stresses from grinding and finish machining determined by dissection technique

[ASME PAPER 68-WA/MET-9]

14 p2455 A69-29437

GRINDING MILLS

H release, pressure and oxide layer formed by reaction during ball milling Cr in water

21 p3728 A69-38567

GROOVES

NT V GROOVES

Numerical solutions of elastic problems by conformal mapping and finite difference method applied to circumferentially grooved shafts in torsion

02 p0346 A69-12419

Numerical solutions elastoplastic torsion of circumferentially grooved shafts based on flow and deformation type theories

02 p0346 A69-12420

Elastohydrodynamic solution for ball torque spinning without rolling in nonconforming groove, showing increase in torque with stress and spinning and decreasing conformity

[ASME PAPER 69-LUBS-11]

18 p3140 A69-34381

Keyway stresses in shafts under tension, bending and torsion, using frozen stress photoelastic technique

19 p3445 A69-36827

Tension tests of polycarbonate plates grooved at various angles, demonstrating necking dependence on mechanical instability

21 p3753 A69-39809

GROOVING

Grooved commercial Ti and Ti alloys mechanical properties under uniaxial static tension at low temperatures

03 p0443 A69-13028

Runways slipperiness and grooving, discussing influence of wetness, tire form and speed on friction coefficient

10 p1674 A69-23707

Runway grooving to improve aircraft tire traction in adverse weather tested by F-4D and Convair 990A under wet conditions

[AIAA PAPER 69-773]

19 p3244 A69-35649

Grain boundary grooving kinetics for Cr, W and Mb in Ar and vacuum, determining interface free energies and surface self diffusion coefficients

21 p3744 A69-38740

GROUND-AIR-GROUND COMMUNICATIONS

Optimum modulation technique determination for single channel voice communication under severe noise conditions

[UN PAPER 68-95851]

01 p0029 A69-10526

Ground-air-ground communications system using pseudonoise through satellite and central ground based control facility, discussing system advantages, SNR and modulation schemes

01 p0033 A69-11009

Digital communications between aircraft and flow control computers on ground to avoid runway saturation and automating routing functions

05 p0721 A69-16722

Ground station electronic environment, telemetry encoding and radio links for spacecraft communications and tracking

06 p0886 A69-16860

Satellite communication channel number and distribution optimization, obtaining malfunction probability for telephone service communication system

[UN PAPER 68-95772]

06 p0886 A69-17030

Economic planning of satellite earth station equipment in relation to expected traffic demand, emphasizing specifications for communication via Intelsat 2 and 3 satellites

07 p1117 A69-19347

Design aspects of 20 ft air transportable satellite earth station

08 p1272 A69-19926

Self focusing aerial antenna arrays with full angular coverage for two way airborne communications

08 p1289 A69-20971

RF selection for interspacecraft or earth-spacecraft communication

09 p1449 A69-21270

Propagation and noise effects on frequency choice for communication satellite service to aircraft and

ships, noting tropospheric and ionospheric attenuation considerations

09 p1451 A69-21288

Maintenance telemetering, tracking and telecommand for developmental and operational satellites, discussing possibilities of frequency sharing between satellites and terrestrial services

09 p1451 A69-21290

Technical characteristics of spacecraft telemetering, tracking and telecommand systems, stressing links between earth stations and spacecraft

09 p1451 A69-21291

Orbiting Data Relay Network communications system provides continuous wideband communication between ground and earth orbiting spacecraft via synchronous satellite repeaters

[AIAA PAPER 68-432]

09 p1455 A69-21989

Time function multiplex system for simultaneous communication via satellite between number of stations, considering transmission capacity decrease due to hard limiting amplifier

17 p2919 A69-33320

Frequency hopping technique applied to multiple access air-to-air/ground communication for tactical fighters, noting additive recognition

17 p2931 A69-34117

Pictorial display area navigation system for air traffic control in terms of cockpit utilization, interface with ground navigation aids, parallel multiple routes, etc

[AIAA PAPER 69-798]

19 p3367 A69-35632

Legal principles observed for international telecommunication systems establishment by means of artificial satellites regarding states interests and rights

20 p3638 A69-37124

Daily communication link geometry between spacecraft in elliptical orbit and landed capsule, establishing spacecraft visibility contours for landing site latitude

[AAS PAPER 68-110]

21 p3805 A69-39223

Worldwide communication system via synchronous satellites for aeronautical, maritime and land mobile services

23 p4114 A69-41355

GROUND BASED CONTROL

NT AIR TRAFFIC CONTROL

NT RADAR APPROACH CONTROL

Ground based control system via cockpit PPI display on transponder equipped aircraft broadcast with digital coding

03 p0464 A69-13244

FAA coded broadcasting to transponder equipped aircraft for air traffic control, navigation, collision avoidance and airfield approach

04 p0629 A69-15478

Real time performance, ground control and data processing of Surveyor spacecraft during maneuvers

[AIAA PAPER 67-644]

04 p0586 A69-15502

Digital computer motion pictures generation for ground controlled intercept simulation

06 p0906 A69-17397

Flight deck equipment guidelines in aircraft, discussing pilots natural senses, visual information, displays, logic and memory capable computers and ground controller

08 p1266 A69-20450

Automatic ground traffic control of aircraft on airport taxiway without visual detection, noting induction loop detection in surface traffic control system /STRACS/

11 p1913 A69-24267

Ground controlled remote manipulator spacecraft system to perform unmanned satellite orbital maintenance, discussing refurbishment, laboratory simulation, system cost effectiveness and feasibility

19 p3430 A69-36001

Airborne collision avoidance system based on time-frequency techniques for use within ground based control systems, showing air/ground synchronization and collision geometry

19 p3371 A69-36735

Electron density profiles from topside ionograms compared to ground based sounding results, discussing error corrections

20 p3495 A69-37865

Ground based guidance for land-landing manned spacecraft with low velocity descent systems, discussing high and low altitude glide path intercept and spiral

[AIAA PAPER 69-864]

21 p3762 A69-39390

ELDO radio guidance station at Gove, discussing propulsion stage tracking and instruction transmitted to vehicle

22 p3919 A69-39920

Onboard processor servicing spacecraft sensors, programmable from ground, discussing functions and applications
22 p3903 A69-39921

Mars landing site topography reconstructed via stereoscopic pictures returned by surface-based imaging systems
23 p4164 A69-41618

GROUND CREWS

Psychiatric morbidity as absenteeism cause among ground and flight personnel in civil aviation, recommending psychotherapy and chemotherapy
24 p4266 A69-43378

GROUND EFFECT

Ground effects influence on VTOL aircraft secondary forces during hovering and transitional flight, discussing component dynamic coefficients in wind tunnel [DVL-851]
04 p0547 A69-14813

Testing station design for VTOL aircraft ground effects investigations
08 p1302 A69-20880

Rotor downwash in ground effect in presence of step, using two dimensional analysis for flow field calculation [AIAA PAPER 69-225]
08 p1253 A69-21032

Thin jet-flapped airfoil flow analysis in ground proximity at small angle of incidence, assuming inviscid incompressible flow
09 p1431 A69-22275

Horizontal VLF cylindrical transmission antenna current distribution calculated with allowance for ground reaction, showing exponential decrease with distance
09 p1467 A69-22581

Numerical solutions of thick cambered jet flap in ground effect for flat plate and diamond shaped airfoil [AIAA PAPER 69-738]
18 p3083 A69-34404

Schweikhard method for measuring changes in lift, drag and pitching moment of fixed wing aircraft as function of distance from ground
20 p3462 A69-37423

Thin jet flapped airfoil analysis with wake fully developed from leading edge and jet flow reflected from ground
22 p3861 A69-41184

Solar energetic particle effects during polar cap absorption observed in earth upper atmosphere and at ground level
24 p4373 A69-43618

GROUND EFFECT MACHINES
NT HOVERCRAFT GROUND EFFECT
MACHINES

Ram recovery of flush intake for air cushion vehicles noting influence of intake geometry, placement and incidence angle
01 p0005 A69-10026

Survival analysis based on probability theory for design of air cushion vehicle to determine height for operating over open sea
01 p0008 A69-10027

Hovercraft handling characteristics, seakeeping and maneuverability during English Channel operation
02 p0277 A69-11592

Air cushion landing gear in civil air transport, discussing system concept, advantages and LA 4 aircraft experimental application
02 p0193 A69-12690

Legal problems in hovercraft classification, discussing problems in adapting existing transport legislation to hovercraft operation
04 p0689 A69-14942

Unified design approach for second generation air cushion craft based on existing first generation craft
05 p0701 A69-15567

UK hovercraft research covering internal/external dynamics, propulsion systems and full scale tests
05 p0702 A69-16393

Fixed point support properties of quasi-vertical peripheral jet hovercraft with two pressure stages
06 p0857 A69-16820

Mountbatten class hovercraft for truly amphibious craft
06 p0867 A69-17664

Water jet propulsion for air cushion vehicles, emphasizing inlet shape effect on performance and potential flow theory application to inlet design
08 p1254 A69-20115

French air cushion vehicle technology for water and land, outlining principles of lift, propulsion and control and specifications of several craft
08 p1254 A69-20198

U.S. policy for commercial surface effects ships regulation, discussing operational, construction and design requirements
08 p1254 A69-20199

Monograph on air cushion vehicles /ACV/ in Scandinavian water transport, covering state of the art, technical and economic competitiveness, etc
09 p1434 A69-22075

Skirts on hovercraft, noting rough water drag, plough in and overturning, and skirt oscillation and wear problems
10 p1634 A69-23629

Book on hovercraft design and construction covering aerostatic and aerodynamic craft, cushion performance, ducting, fans, compressors, drag, propulsion, control, stability, economics
12 p2013 A69-26633

Integrated lift, propulsion and control in Aeromobile air cushion vehicle, considering ram wing and gimbal fan plenum chamber vehicles
13 p2201 A69-27543

Canadian air cushion vehicle industry, considering materials, design, production, tests, components and quality control
13 p2381 A69-27544

Multicell air cushion vehicle technology based on 1/4 scale and full scale tests, noting comparison with plenum systems and costs
13 p2202 A69-27547

Flexible skirt design for air cushion vehicle consisting of semicylindrical elements and permitting horse power and cost reductions
13 p2203 A69-28179

Air cushion vehicles tests for public transportation facilities noting operation costs
15 p2550 A69-30409

Mountbatten /SR.N4/ hovercraft development, seakeeping, skirt design and service introduction
15 p2550 A69-30479

Performance potential of high speed ocean-going air cushion vehicles with aircraft nuclear power plants [AIAA PAPER 69-416]
15 p2550 A69-30480

Air cushion vehicle research and development laboratory testing, plans, support equipment, monitoring by TV, etc
15 p2589 A69-30865

Hover and forward speed aerodynamic characteristics of tracked air cushion vehicle /TACV/ models, discussing wind tunnel tests [AIAA PAPER 69-750]
18 p3084 A69-34410

Nuclear powered surface effects machine performance estimates, calculating reactor power and payload fraction for various clearance heights, gross weights and velocities
18 p3171 A69-35180

Air cushion vehicle legal status and cargo and passenger liability
19 p3455 A69-36330

Recirculation concept for air cushion vehicle air curtain evaluated by two dimensional and circular models, discussing optimum cushion area/jet exit area ratio
22 p3866 A69-40816

Base pressure of peripheral jet ground effect machines in heaving motion, discussing flow patterns
22 p3866 A69-40817

Pitching characteristics of three dimensional peripheral jet ground effect machines with compartment partition along pitch axis, considering longitudinal static stability and dynamic pitching motion
22 p3866 A69-40818

GROUND HANDLING

Environmental tests of space vehicles, determining parameter effects on ground storage and transportation, launching and orbital life
02 p0228 A69-11918

Airport facilities planning for conventional jet, STOL and SST aircraft ground handling, stressing facilities economy and transportation subsystems [AIAA PAPER 69-808]
19 p3289 A69-35623

STOL aircraft characteristics emphasizing ground and air space operations requirements and noise levels
22 p3863 A69-40430

Handling and processing function in air freight transportation, discussing system design approaches, cargo terminals, materials handling systems and containerization
22 p4053 A69-40483

Air space saturation, urban surface transport network enlargement necessity and expeditious passenger processing and baggage handling
24 p4296 A69-42567

General aviation airport application as freight consolidation terminals to reduce ground handling costs, circumvent air and ground traffic problems, etc
24 p4419 A69-43047

GROUND OPERATIONAL SUPPORT SYSTEM

Conversion from VHF to UHF at White Sands Missile Range, discussing telemetry acquisition, tracking and receiving systems
07 p1077 A69-18828

Ground data operations system for large astronomical satellite comprising UHF telemetry, PCM telecommand and processing and display equipment
18 p3117 A69-34794

Air travel and population growth requiring larger structures for office buildings, airport passenger terminals and aircraft servicing facilities [AIAA PAPER 69-809]
19 p3289 A69-35622

GROUND RESONANCE

U RESONANCE

GROUND RUN-UP

U ENGINE TESTS

GROUND SQUIRRELS

Specific antibody formation to influenza A virus vaccine /strain PR sub s/ in hibernating ground squirrels /Citellus tridecemlineatus/
08 p1263 A69-20173

GROUND STATE

Ground state population modulation in trivalent rare earth doped single crystals by means of optical double resonance, noting applications
01 p0134 A69-10013

Ground state energies of HeH divalent ion, comparing perturbation calculation values with variation-perturbation technique
01 p0123 A69-10547

Nonequilibrium nitrogen plasma spectral line intensities calculated assuming optically thin plasma
01 p0124 A69-10960

Electron impact ionization cross sections and rate coefficients from ground state given for free atoms and ions from hydrogen to calcium
01 p0125 A69-10992

Thorium and La-compounds retained superconductivity to Pr and Tm concentrations due to crystal field splitting effect producing nonmagnetic singlet ground state
02 p0295 A69-11778

High current electron bombardment ion source for production of low energy ion beams without metastable contamination
03 p0428 A69-13106

Ground state energy for single magnetic impurity dissolved in nonmagnetic metal, applying cluster variation method to s-d interaction Hamiltonian
03 p0485 A69-13298

Dissociation energy and vibrational terms of ground state hydrogen
05 p0796 A69-15908

LCAO-MO-SCF wave functions determined for ground and excited states of nitrogen dioxide at five different ONO angles
06 p0960 A69-17109

Natural orbital expansion coefficients of LCAO-MO-SCF-CI wave functions for ground state of H molecule
06 p0960 A69-17112

Ground state energy of Anderson Hamiltonian calculated by cluster variation for cases of infinite d-d correlation energy
06 p0958 A69-17712

Orientation of diamagnetic ground state Pb 207 atoms with nonzero orbital angular momentum by means of optical pumping and determination of nuclear moment
07 p1156 A69-19399

Interaction between semiconductor excitons, obtaining formulas for exciton concentrations ground state energy and dispersion, noting association with Pauli statistics
08 p1371 A69-19955

Molecular beam gas laser operating at transitions between ground state and resonance excited state of inert gas atom, obtaining population inversion
08 p1325 A69-20325

Electron states at deep levels in InSb by deriving equations for Bloch wave functions of conduction and valence bands
09 p1556 A69-21508

Direct Coulomb interaction matrix elements between hydrogen atoms in ground states calculated, presenting interaction potential
11 p1921 A69-24416

Ca XV spectrum in vacuum UV under laboratory conditions, discussing fine structure of ground level of Ca XV and coronal lines
15 p2688 A69-30553

Lifetime of ground state oxygen molecular ions in sunlight from photodetachment rate by free electron production measurement from ions in buffer gas
16 p2848 A69-31973

Ground state energy inequalities for N particle non-relativistic quantum mechanical system, showing non-saturating gravitational forces and increasing binding energy per particle
17 p3028 A69-32900

Molecular beam gas laser operating at transitions between ground state and resonance excited state of inert gas atom, obtaining population inversion
17 p2981 A69-33315

Perturbation procedures applied to energy computation for ground and first excited state of hydrogen molecule at large separation
17 p3009 A69-34170

Self consistent field molecular orbital method in LCAO (linear combination of atomic orbitals) approximation applied to LiH ground state for potential energy curve
22 p3985 A69-40721

Impact parameter versions of two state and Born approximations to calculate single excitation cross sections of H atoms ground state collisions
22 p3987 A69-41006

Metastable atom detection system for ground state atom beams, measuring Ar beam density five orders lower than background gas density
22 p3950 A69-41230

Shape resonances in low energy elastic scattering of electrons by C, N and O, discussing ground state configurations and close coupling equations corrections
23 p4193 A69-41452

Ultrasonic paramagnetic resonance investigations of Pr ions ground state energy levels in calcium fluoride
24 p4360 A69-42790

GROUND STATIONS

NT DEEP SPACE INSTRUMENTATION FACILITY
NT STADAN [SATELLITE TRACKING NETWORK]

Broadband parametric amplifier used as front amplifier in satellite communication systems ground station receiver, noting cryogenic operation capability
01 p0041 A69-10243

Small earth stations in future communication satellite systems, discussing applications, characteristics and equipment
[UN PAPER 68-95751] 01 p0028 A69-10492

Fucino earth station operation with Early Bird and Intelsat 2-F3 satellites receiving equipment and transmission system
[UN PAPER 68-95455] 01 p0028 A69-10493

British contributions to communication satellite earth station technology covering antennas, low noise amplifiers, traveling wave tubes and threshold extension demodulators
[UN PAPER 68-95843] 01 p0054 A69-10507

Automatic picture transmission station equipment including antenna, cavity filters, tape recorder, oscilloscope, facsimile system and kinescope
[UN PAPER 68-95450] 01 p0054 A69-10522

Ground-air-ground communications system using pseudonoise through satellite and central ground based control facility, discussing system advantages, SNR and modulation schemes
01 p0033 A69-11009

Magnetic field data fromOGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetosphere inflation and detection of polar ionospheric currents
01 p0069 A69-11125

Radio links between earth and deep space probes, summarizing bistatic radar astronomy results
[AAS PAPER 68-182] 02 p0311 A69-11467

Space observations of solar intermediate corona, discussing balloon and rocket experiments and limitation of ground based observations
[AAS PAPER 68-217] 02 p0313 A69-11483

Monopulse ground station antenna configuration for improvement of sidelobe level in satellite transmission [DVL-856]
02 p0214 A69-11599

Subsolar magnetosphere dimensions from ground observations of geomagnetic micropulsation period changes during magnetosphere deformations caused by solar wind inhomogeneities
02 p0244 A69-12356

Lake Kickapoo Space Surveillance Transmitting Station in Texas, discussing surroundings, equipment, operating range, VHF transmission, etc
03 p0411 A69-13209

Mutual RF interference between satellite and terrestrial telecommunications microwave relay system at shared frequencies
03 p0392 A69-13242

Low noise broadband parametric amplifier for communication satellite ground stations
03 p0406 A69-13733

AN/TSC-54 military satellite communications terminal for contingency deployment, discussing design, system tradeoffs and performance
[AIAA PAPER 68-439] 04 p0579 A69-15367

Earth station system for ground based communications with Intelsats 2 and 3 noting antennas, receivers, transmitters and power supplies
05 p0741 A69-15667

Low noise shaped beam Cassegrain antenna design for space communications earth station service, noting gain/noise temperature figure and antenna construction
05 p0728 A69-15669

UV solar spectra observation, discussing coordination of ground based and satellite programs
05 p0822 A69-15861

Hard solar X ray bursts characteristics and coordination of ground and space observations
05 p0814 A69-15862

On-line ground flight test data processing system
05 p0725 A69-16757

Ground station electronic environment, telemetry encoding and radio links for spacecraft communications and tracking
06 p0886 A69-16860

Earth resource satellites, discussing world ground station network for data reception and information dissemination and training and research center
[UN PAPER 68-95529] 06 p0917 A69-17067

Power traveling wave tubes in ground stations for INTLSAT 3 direction finding system
07 p1094 A69-18426

Satellite communications antenna system at Fucino earth station, describing transmitting and receiving equipment, facilities, power supply, etc
07 p1075 A69-18493

Sensitivity problems in receiving microwave signals from communications satellite at deep space distances, considering noise factors
07 p1077 A69-18669

Economic planning of satellite earth station equipment in relation to expected traffic demand, emphasizing specifications for communication via Intelsat 2 and 3 satellites
07 p1117 A69-19347

Soil resistivity survey at earth telecommunication installation site to determine optimal grounding or electrode system
07 p1117 A69-19348

Measurement bases in general, discussing theoretical data justifying ground level base and measurements results
07 p1136 A69-19516

Water effect on air supported radome of ground station for satellite communication
07 p1111 A69-19533

Design aspects of 20 ft air transportable satellite earth station
08 p1272 A69-19926

Large aperture low noise aerial design for satellite communication earth stations, discussing expected performance of 85-ft antenna at 4 GHz
08 p1279 A69-19956

Reliability effect on operating costs of satellite communications system ground stations, calculating annual cost of channel with continuous time carry-over
08 p1276 A69-20586

Signal interference criteria in considering frequency sharing between communication satellite systems and terrestrial radio services
09 p1449 A69-21273

Multiple access in communication satellite systems for achieving maximum flexibility of interconnection between earth stations
09 p1450 A69-21276

Maximum horizontally radiated power of earth stations in any 4-kHz band for multichannel telephony and TV using satellites
09 p1450 A69-21278

Earth station antennas for communication satellite service, discussing design, fabrication, main lobe gain, side and back lobe suppression and noise performance
09 p1461 A69-21281

Earth station antenna radiation patterns for studying mutual interference effects between radio relay stations and communication satellite earth stations
09 p1461 A69-21282

Antenna noise temperature at earth station due to rain on radomes, solar and cosmic noise, noting SNR degradation
09 p1461 A69-21283

Sensitivity of microwave earth stations for analog and digital communications
09 p1453 A69-21409

Commercial communication satellite earth station at Australia, noting antenna, autotracking capability, preamplifiers, and computer for control and monitoring functions
09 p1458 A69-22469

Low noise wideband amplifier system for commercial satellite communication ground terminal receiver, noting cryogenically cooled parametric amplifier
09 p1458 A69-22470

Geomagnetic fluctuations positive and negative correlations at conjugate pair stations Syowa base and Reykjavik
10 p1681 A69-22804

Power requirements for tracking, telecommand and telemetry of spacecraft over interplanetary distances considering transmission problems, equipment weight and reliability
10 p1652 A69-22984

Ground station integrated flight test data system with interactive data input terminals, on-line assembly and responsive program development
10 p1633 A69-23271

Ground station receiving antenna design and size for indirect distribution of TV programs by geostatic satellites
10 p1654 A69-23389

Ground level solar proton event recorded by neutron monitors
10 p1766 A69-23761

Spatial direction determination from simultaneous photographs of Echo 2 at Nikolaev and Helwan stations, using circle of simultaneity
12 p2068 A69-26427

Budapest University satellite radio observation APT station design, equipment and methods
12 p2059 A69-26449

Number 2 ground communications antenna system on Goonhilly Downs for British Post Office earth station
12 p2044 A69-26923

Ground station network and facilities for control of and acquisition and processing data from ESO 1 satellite
13 p2220 A69-27751

September 14, 1966 magnetic storm observation by Explorer 33 in geomagnetic tail and by polar stations, studying relation in magnetosphere and on earth
14 p2438 A69-29078

Multiple ground based geophysical sensors for detecting ionospheric phenomena, discussing continuous magnetic tape data recording, common time base and station operation
14 p2448 A69-29526

Cosmic ray observations on synoptic scale, discussing equipment and programs of IQSY world array of monitor stations
15 p2673 A69-30012

Airglow research, discussing emission features, observation methods and instruments, ground station network, etc
15 p2594 A69-30020

Satellite triangulation by least squares method based on conditions relating to observing stations coordinates, concerning synchronous observations of directions and distances
15 p2594 A69-30030

Doppler measurements in semidynamical geodesy, processing data from Transit satellites collected at various Mediterranean ground stations
15 p2602 A69-31382

Global satellite communication networks design by computer simulation, discussing politotechnical interface problems, ground stations, atmospheric factors, system optimization, etc
16 p2750 A69-31852

German ground station commercial receiving system for satellite broadcast reception
16 p2766 A69-31855

Ground station command transmission equipment for German AZUR satellite, describing components based on NASA Tone Digital Command System
16 p2759 A69-31856

PDM command coder meeting NASA Tone Digital Command Standard for German central ground station
16 p2755 A69-31859

Long distance FM radar signal relaying to central station image processing, showing wideband sum signal especially suitable for transmission
16 p2750 A69-31862

LF ground based absorption results compared with rocket measured D region electron density profiles
16 p2778 A69-32188

Atmospheric sources automatic location by direction finding network based on triangulation network principle
18 p3102 A69-34961

- Satellites and ground stations system providing transoceanic civil, air and marine traffic control in North Atlantic, discussing position determination, communication and navigation, etc
18 p3170 A69-35065
- Parametric amplifier developed for unattended satellite communication ground stations, featuring low noise broadband characteristics
19 p3270 A69-36240
- Commercial satellite communication ground station at Arvi, India, discussing system design, operation and international standards
19 p3275 A69-36412
- Gokhberg magnetovariational sounding method for single location analysis of magnetic storms early phases, comparing ground station network observations
20 p3521 A69-37040
- Positive and negative correlations in F2 layer perturbations observed by network of paired conjugate ionospheric stations at low latitude
20 p3521 A69-37050
- Short radio wave damping of earth satellite transmitter due to ionospheric diffraction resulting from increasing satellite-ground station distance
20 p3491 A69-37689
- Ground station equipment for studying motions and structure of ionospheric inhomogeneities by combined space-frequency diversity reception, noting altitude dependence of ionospheric parameters
20 p3510 A69-37693
- Near-polar circular orbiting satellite for calibrating and evaluating ground-based radars observing space objects
20 p3617 A69-37714
- Monte Cardiga telemetry station associated with sounding rocket range at Salto di Quirra, Sardinia, describing equipment, telemetry system capabilities and flexibility
20 p3512 A69-38280
- D1A satellite Doppler observations, noting effect of observation grouping on ground stations mutual position
21 p3701 A69-38336
- Image intensifiers and orthicons, plumbicons, vidicons as photoelectric devices in TV auroral observation from ground stations and jet aircraft
21 p3706 A69-38484
- Simultaneous ground and Alouette 2 satellite measurements of enhanced electromagnetic band emission in 500-1000 Hz range
21 p3708 A69-38496
- German ground station radio communications via Intelsat satellites, discussing transmitting facilities, TV picture and sound signals, etc
22 p3902 A69-41249
- Carpitron locked oscillator with wide electronic tuning range, describing CW operation characteristics and application to ground station microwave transmitters
23 p4135 A69-41302
- Cosmic ray diurnal phase and amplitude variations determined using superimposed records of cosmic ray stations inside limited rigidity region
23 p4204 A69-41481
- Traveling wave tubes in satellite earth stations, discussing single carrier tubes and multiple carrier technique
23 p4143 A69-42420
- Envelope characteristics of earth station Cassegrain antenna sidelobes, deriving formulas for central and spar blocking and forward feed spillover
23 p4143 A69-42517
- GROUND SUPPORT EQUIPMENT**
- Airport warm fog dispersal, discussing full scale aircraft seeding of polyelectrolyte materials, noting ground dispenser
01 p0054 A69-10149
- CNES worldwide network of tracking stations, describing equipment, location, organization and center of operations
02 p0228 A69-11922
- Short wave bands for earth-space communications, considering propagation anomalies compensated systems and frequency bands availability
03 p0397 A69-13721
- Tactical airfield/aircraft system effectiveness in terms of ground support resources, aircraft reliability and maximum potential sorties
05 p0743 A69-16238
- Spacecraft onboard checkout systems and design of ground support equipment and software, noting adaptive dynamic analysis and maintenance (ADAM) concept
09 p1478 A69-22382
- General purpose space vehicle ground support equipment adapted from special purpose systems, discussing checkout, launch control and data monitoring requirements
09 p1479 A69-22385
- Transpondersondes for atmospheric measurements, considering ground tracking, radiosondes, rocket-sondes and flight results
10 p1692 A69-23257
- Fueling procedures for Boeing 747 aircraft, discussing design and operation of large capacity fuel trucks
10 p1674 A69-23631
- Fueling procedures for Boeing 747 aircraft, discussing design of high rate mobile fuel dispensers
10 p1674 A69-23633
- Foam carpet and airport equipment to prevent fires and explosions from retracted gear landings
10 p1674 A69-23708
- Ground military equipment hardening against nuclear environment, selecting worst case levels from isodamage curves
15 p2651 A69-30380
- Air traffic control ground equipment developments including radio direction finders, surveillance radar, interconsole marking, etc
18 p3168 A69-34806
- Reliability study of launch support equipment, presenting failure data for mechanical and electromechanical components
19 p3295 A69-36023
- Crawler-Transporter at Kennedy Space Center for moving ground support equipment, Apollo/Saturn space vehicle and mobile launcher, describing design and components
21 p3690 A69-38754
- General purpose space vehicle ground support equipment adapted from special purpose systems, discussing checkout, launch control and data monitoring requirements
22 p3927 A69-40552
- Tracking and data relay satellite system (TDRSS)/compared to ground based mission support, considering altitude coverage capability, economy and communication requirements
23 p4120 A69-41756
- GROUND SUPPORT SYSTEMS**
- International 28-station global instrumentation ground support network for space tracking and data acquisition
06 p1043 A69-17059
- Ground based guidance systems for supplementing onboard guidance of manned space vehicles
06 p0955 A69-17580
- Ground station network and facilities for control of and acquisition and processing data from ESRO 1 satellite
13 p2220 A69-27751
- Space vehicle checkout, launch control and data monitoring by general purpose ground system providing flexible stimuli generation, measurement acquisition, computation and information display
18 p3118 A69-35064
- Real time multiprocessing telemetry ground support integrated system design with expanded definition of hardware/software decision tradeoffs
22 p3907 A69-40351
- Radio astronomy Explorer A attitude determination via disk-oriented programming ground support system for reducing and calibrating telemetry data, attitude prediction and command, etc
22 p3907 A69-40363
- Cape Kennedy Space Center mobile launchers and auxiliary equipment for Saturn vehicles, discussing functions, design and systems
24 p4297 A69-43036
- GROUND TESTS**
- NT COLD FLOW TESTS
- NT PRELAUNCH TESTS
- NT STATIC FIRING
- Concorde structural tests, discussing ground test program for simulating flight temperature and stress conditions at 2.6/2.7 station of wing-fuselage section
02 p0193 A69-11892
- Ground vibration testing of flight and space vehicles, noting structural damping asymmetries and nonlinearities
04 p0585 A69-14833
- Communication satellite ground test programs, discussing structural, electrical integration, thermal control and antenna pattern models for simulation tests
08 p1409 A69-19962
- Vacuum engineering problems during booster rocket engine ground tests, simulating flight environment
09 p1570 A69-22300
- Real time real temperature exhaust gas reingestion and structural heating test facility for jet lift V/STOL configurations
09 p1479 A69-22388
- Air backflow in nuclear exhaust system duct for ground testing of NERVA engines, noting overpressure effect
09 p1479 A69-22390
- Computer controlled flight line tester performing automatic real time testing of aircraft avionics systems on flight line or hanger
11 p1864 A69-25060
- Vitiated air contamination effects on combustion and hypersonic air breathing engine ground tests
13 p2325 A69-28274
- Ground testing method to evaluate inertial navigation systems dynamic errors by programmed platform drift rates, position output comparisons and error source identification
14 p2479 A69-29490
- Multiple shaker ground vibration test system for confidence in helicopter designs before flight testing and evaluation of force balancers
15 p2585 A69-30357
- Saturn 5 boost phase environment simulation on Apollo stages, discussing fixtures, load devices, instrumentation and ground test
15 p2588 A69-30405
- Static structure ground test for Saturn-Apollo vehicle short stack, describing air pressure simulation, data acquisition and readout systems
15 p2589 A69-31079
- Apollo spacecraft equipment qualification program for margin assurance, discussing ground and flight tests
19 p3430 A69-36015
- Vitiated contamination effect on airbreathing engine ground testing, considering equilibrium, vibrational and chemical relaxation, condensation, combustion, mixing and engine performance
19 p3448 A69-36333
- Lifting body stability augmentation systems design, development, ground tests and flight data including frequency response, limit cycle and structural resonance
21 p3647 A69-39413
- Mission simulation testing in thermal vacuum environment for Apollo Lunar Module, noting conformal skin heaters
22 p3920 A69-40369
- Digital computer program for determining flight vehicle telemetry antenna performance from ground test readings
23 p4133 A69-41754
- Diamond shaped surface ablation patterns development mechanism for several ablation materials of ground test and recovered flight vehicles
23 p4059 A69-41891
- Training missions and military exercises to field test weapons system models
24 p4296 A69-42884
- GROUND-TO-AIR MISSILES**
- U SURFACE TO AIR MISSILES
- GROUND TRACKS**
- Representation for computer storage of contour map data for searching problem involving determination of aircraft ground track
01 p0036 A69-10704
- Generalized techniques for contour maps problem solution applied to problem of locating ground track of aircraft from elevation readings obtained during flight
09 p1461 A69-22599
- GROUND WAVE PROPAGATION**
- Terrain influence in ground wave propagation evaluated by two dimensional diffraction and scattering problems, using Airy type wave functions
01 p0033 A69-10970
- Ground wave excited by dipole in conducting half space, discussing lateral wave character and optimum radiation angle
02 p0209 A69-12347
- Ionospheric radio signal reflection measurements based on ground to rocket pulse propagation
02 p0245 A69-12736
- Ground propagation of regular Pc 1 and irregular Pi 1 geomagnetic micropulsations demonstrated by precise time measurement
07 p1127 A69-19338
- VLF electromagnetic wave propagation in earth-ionosphere waveguide with reflections from ionosphere, noting TE and TM mode coupling and mode conversion
09 p1460 A69-22699

GROUP DYNAMICS

- Ground wave propagation attainment of electron plasma resonance of F region, stressing need of wave vector orientation toward magnetic north
10 p1684 A69-23828
- Slow waves contribution to image radiation from array of line sources above ground plane, determining optimum height of lowest element of array
11 p1837 A69-25002
- Saddle point analysis of electromagnetic ground wave propagation in source excited field in waveguide formed by two parallel plate dielectrics
12 p2028 A69-25898
- Ground conductivity effects on MF sky wave transmission strength, discussing transmission over open sea
17 p2918 A69-33029
- Ionosphere reflected radio waves field strength measurements, obtaining formula for ground wave discrimination
23 p4123 A69-41861

GROUP DYNAMICS

- Large scale information displays for group sharing in air traffic control, military operations and organization management
02 p0250 A69-12159
- Book on groups under stress covering psychological research in SEALAB 2, emphasizing planning of data collection and experimental results
04 p0552 A69-14533
- Environmental crowding effect on individual and group behavior in rat colony, using implanted passive resonant circuits for identification and passage information
19 p3257 A69-36243
- Group leadership attempting behavior dependence on situational and perceptual variables
23 p4110 A69-42015
- Risk taking under uncertainty in individual and group decisions, analyzing gambling and group discussion situations
23 p4091 A69-42016
- Group interaction finite Markov chain model, analyzing changes in interpersonal relationships based on balanced dyadic states
23 p4110 A69-42017

GROUP THEORY

- Self gravitating pulsating cylindrical and ring shaped cosmic masses from group theory standpoint compared with oscillating stars
01 p0148 A69-10124
- Lie groups for equations of motion in quantum mechanics or field theory determined by operator analysis
02 p0282 A69-12840
- Lie algebra of second order linear differential equations
02 p0273 A69-12841
- Independent variables reduction in nonlinear partial differential equations, detailing group theory method
03 p0456 A69-13740
- Stored energy function of hyperelastic material by Lie group extension of Truesdell theorem on symmetry groups
04 p0680 A69-14945
- Group classification of solutions to Hopf equation according to type of viscosity coefficient
07 p1118 A69-18700
- Group analysis of MHD equations, determining group properties of motion equations of compressible fluid, obtaining invariant solutions
07 p1191 A69-18994
- Group theory application to multidimensional symmetrical linear dynamic control systems optimization, considering natural vibrations of three material points
12 p2129 A69-26071
- Lower bound for time required for group multiplication by logic circuits, using modified Winograd model for Abelian group
12 p2034 A69-26752
- Nonsingular matrices inversion method by group partitioning applied to noise covariance matrix used in optimal prediction and control
12 p2123 A69-26754
- Systematic formalism specialization of group theory techniques for similarity analysis applied to three dimensional incompressible boundary layer flows
16 p2773 A69-32379
- Received radar signal power maximizing problems in planetary exploration, analyzing abelian group real line and circle problems
17 p2993 A69-32831
- Group properties of adiabatic motion equations of medium in relativistic hydrodynamics, including solu-

- tions of subgroups applicable to multiple particle production
19 p3301 A69-36843
- Generalized Clifford matrix algebra applications, noting relation to generators of special unitary group
20 p3568 A69-37072
- Two dimensional gas dynamics differential equations for simple waves, discussing invariant solutions and conditions for group solutions
22 p3933 A69-41030
- Nondiscrete locally compact group having noncontinuous irreducible representations, proving theorem
23 p4183 A69-42022
- Compact semigroups continuous characters, noting character extension possibilities
24 p4340 A69-42891
- Density matrices of symmetry projected single determinant wave functions for finite groups, considering many particle system
24 p4351 A69-43810

GROUP VELOCITY

- Numerical method for determining group velocity of waves in homogeneous anisotropic medium, using implicit function from dispersion relation
01 p0131 A69-11117
- Anomalous infrasonic signals observed during launching of space vehicles with thrust greater than 200,000 lb, noting supersonic and subsonic group velocity spreads
07 p1078 A69-18853
- Chebyshev filter with flat group delay obtaining transfer function, noting cascade synthesis and extended bisection theorem
08 p1299 A69-21169
- Backward plasma waves in region of anomalous dispersion indicated by opposite directions of RF wave phase and group velocities
11 p1927 A69-25116
- Plasma electron density measurement from phase shifts of electromagnetic wave groups propagation
14 p2497 A69-29796
- Group delay time for dispersive wave propagation velocity determined using correlation method
15 p2562 A69-30094
- Wave propagation at different group velocities along parametric line in traveling wave parametric amplifier
16 p2805 A69-32254
- Surface wave study techniques, discussing digital moving window analysis of group and phase velocity and use of time variable filters
16 p2784 A69-32576
- Superluminal group velocities in relation to causality axion, considering sound propagation in ultradense matter and particles of imaginary mass /tachyons/
21 p3769 A69-38543
- High pass filters reflection group delay compared with low pass filters transmission group delay with Butterworth, Chebyshev and elliptic responses
21 p3686 A69-39139
- ELF atmospheric propagation, determining slow-tail atmospheric group velocity, relating characteristics to spectral characteristics of lightning
23 p4114 A69-41362

GROUP 3A COMPOUNDS

- Collection of papers on III-V compound semiconductors and semimetals covering physical properties, solid solutions and electric field, pressure, radiation and impurity effects
04 p0641 A69-14501
- Diffusion in compounds of elements of groups III-V
04 p0641 A69-14502
- Radiation effects on III-V compounds, considering damage in solar cells and luminescence, light emitting and Esaki diodes
04 p0641 A69-14504
- Phenomena in III-V compounds and III-V compound-other compound solid solutions, examining equilibrium phase diagrams
04 p0641 A69-14505

GROUP 3B COMPOUNDS

- Collection of papers on III-V compound semiconductors and semimetals covering physical properties, solid solutions and electric field, pressure, radiation and impurity effects
04 p0641 A69-14501

GROUP 4A COMPOUNDS

- Group 4A carbides and nitrides formation in Mo by arc melting, determining threshold solute metal-interstitial atom ratios
12 p2117 A69-27136

GROUP 5A COMPOUNDS

- Collection of papers on III-V compound semiconductors and semimetals covering physical properties, solid solutions and electric field, pressure, radiation and impurity effects
04 p0641 A69-14501
- Diffusion in compounds of elements of groups III-V
04 p0641 A69-14502
- Radiation effects on III-V compounds, considering damage in solar cells and luminescence, light emitting and Esaki diodes
04 p0641 A69-14504
- Phenomena in III-V compounds and III-V compound-other compound solid solutions, examining equilibrium phase diagrams
04 p0641 A69-14505

GROUP 5B COMPOUNDS

- Collection of papers on III-V compound semiconductors and semimetals covering physical properties, solid solutions and electric field, pressure, radiation and impurity effects
04 p0641 A69-14501

GROUP 6A COMPOUNDS

- Tungsten replacement by chromium or molybdenum in heavy metals shown possible for binding material of group 6A metals
05 p0780 A69-15991

GROUP 7A COMPOUNDS

U HALOGEN COMPOUNDS

GROUP 8 COMPOUNDS

- Group 7A and group 8 elements alloying effect on Cr dislocation structure and mechanical properties, discussing ductile-brittle transition temperature and electronic theory
18 p3160 A69-35452

GROWTH

- NT CRYSTAL GROWTH
NT CZOCHRALSKI METHOD
NT EPITAXY
NT HYDROTHERMAL CRYSTAL GROWTH
- Vertical vibration stimulation of growth of onion bulbs and mice body weights
01 p0014 A69-10584
- Photoinhibition of cell division and growth in Euglenoid flagellates by fluorescent and incandescent visible light
01 p0014 A69-10903
- Identity between growth hormone degrading activity of pituitary gland and plasmin
06 p0873 A69-17105
- Plants growth from seeds exposed to space environment onboard Cosmos 110 biological satellite compared with control plants
07 p1064 A69-18972
- Vertical vibration stimulation of growth of onion bulbs and mice body weights
15 p2555 A69-30754
- Plants growth from seeds exposed to space environment onboard Cosmos 110 biological satellite compared with control plants
20 p3479 A69-38220
- Organism growth physiology based on decisive enzyme reactions, considering synthesis of biological proteins from DNA and molecular life processes
21 p3652 A69-38787
- Erythroblasts fractionating method based on size, density and resistance of immature erythroblasts which change during maturation
22 p3877 A69-40761
- Compensatory hypertrophy effects on adrenal phenylethanolamine n-methyl transferase /PNMT/ activity in rats
23 p4080 A69-41404

GRUMMAN AIRCRAFT

- U A-6 AIRCRAFT
U E-2 AIRCRAFT
U F-111 AIRCRAFT

GRUMMAN MILITARY AIRCRAFT

U MILITARY AIRCRAFT

GRUNEISEN CONSTANT

- Consistency of high temperature equation of state of solids, considering Gruneisen parameter and lattice dynamics
08 p1419 A69-19814

GUIDANCE [MOTION]

- NT AIRCRAFT GUIDANCE
NT COMMAND GUIDANCE
NT INERTIAL GUIDANCE
NT INJECTION GUIDANCE
NT MAP MATCHING GUIDANCE
NT MIDCOURSE GUIDANCE
NT REENTRY GUIDANCE
NT RENDEZVOUS GUIDANCE
NT SATELLITE GUIDANCE

NT SPACECRAFT GUIDANCE
 NT STRAPDOWN INERTIAL GUIDANCE
 NT TERMINAL GUIDANCE

Nozzle separation for thrust vector control with applications to guidance problems
 01 p0161 A69-10412

Iterative guidance mode /IGM/ applied to effective gravity vector prediction, acceleration measurement of noise sensitivity and energy limitations
 [AIAA PAPER 67-620] 04 p0629 A69-15501

Successive approximation for iterative construction of near optimum guidance
 06 p0954 A69-17573

Diffraction limited telescope fine guidance experiment to improve pointing stability in space, noting attitude control system and nonmechanical suspension
 08 p1317 A69-21072

Guidance law for autoguided system trajectory to impact target, noting kinematic study
 10 p1723 A69-23701

Dynamic vibration effects on guidance and control systems performance determined from spectral densities, cross spectral densities and vibratory environment amplitude distributions
 15 p2608 A69-30367

Lift and drag determination for moving rectangular coils over infinite plane sheet for magnetic suspension and guidance for rocket sleds
 17 p2946 A69-33789

General purpose /GP/, differential digital analyzer /DDA/ and CORDIC /coordinate rotation digital computer/ computers for navigation system computations
 17 p3003 A69-34100

Polynomial approximations in perturbational navigation and guidance schemes including Chebyshev and least square approximations
 19 p3368 A69-35664

GUIDANCE SENSORS

Sensor suspension, damping and signal readout through use of fluids with applications to rate and acceleration sensors
 [AGARDOGRAPH-118] 08 p1257 A69-20949

Satellite attitude control, discussing mission requirements, typical guidance sensors, actuating torque, systems reliability, etc
 09 p1609 A69-21617

Flight test evaluation program for airborne multisensor electro-optical display systems performance in TV mode under variety of optical conditions
 [AIAA PAPER 69-317] 09 p1500 A69-22387

Inertial navigation system sensors including one and two axis, laser, vibratory, gyroflex and free rotor gyros
 12 p2078 A69-25874

Earth sensor for spin stabilized spacecraft to maintain specific orientation with earth, discussing use of blue and red filters
 15 p2609 A69-30593

Tacite rocket probe to study space IR radiation, using passive stellar sensor for recording reference stars positions to recalibrate gyroscope kinetic motion for attitude restoration
 [ONERA-TP-731] 17 p3001 A69-33220

Casing bearings dry friction force moment effect on double rotor gyrocompass sensor motion, showing diminished device accuracy at high latitudes
 18 p3135 A69-34560

Induced-emission oscillator navigation sensor with performance limitations, noting ring laser and nuclear maser gyro and laser accelerometer
 19 p3369 A69-35795

Strapdown redundant experimental sensor inertial navigation package containing gyros and accelerometers, discussing signal real time processing by digital computer
 [AIAA PAPER 69-851] 21 p3762 A69-39379

GUIDANCE STABILITY
 U CONTROL STABILITY

GUIDE VANES
 NT JET VANES

Missile control during propulsion period, emphasizing vane deflection required for lateral wind compensation
 01 p0163 A69-11297

Jet engine inlet noise control by modification of inlet guide vanes
 05 p0811 A69-15622

Flow through turbine stage with inclined guide vanes at moderate Mach numbers, discussing exit blade angle formula for swept cascades
 15 p2547 A69-30570

Blade length effects on performance of flow straightener vanes influenced by secondary flow, noting high deflection and low aspect ratio
 17 p2896 A69-33606

Potential flow interaction effects between blade rows in axial flow compressor stage, emphasizing inlet guide vane-rotor interaction
 21 p3643 A69-38439

Monograph on control dynamics of gas turbines with adjustable guide vanes, using methods of control theory and applied mathematics
 21 p3784 A69-38449

GUIDED MISSILES
 U MISSILES

GUINEA PIGS

1.5 g angular acceleration effects on acetylcholine metabolism in guinea pig brains and hearts
 02 p0198 A69-11505

Acoustical vestibular stimulation in guinea pig, showing activation of receptors
 03 p0376 A69-14076

Histological and histochemical studies of dephosphorylating enzyme distribution in muscle spindle capsule of guinea pig thigh muscles and cat calf muscles
 15 p2554 A69-30406

Decompression sickness prevention in guinea pigs by heparin and papaverine combination nebulized in carbon, discussing nitrogen elimination enhancement
 21 p3655 A69-38917

Cholesterol-protein metabolism in muscles, liver and cerebrum of lethal X ray exposed guinea pigs compared with unexposed group
 21 p3657 A69-39052

Local stress effect on immunocompetent cells differentiation in guinea pigs lymphatic ganglia, showing antibody producing cells number increase
 22 p3877 A69-40277

Albino guinea pigs respiration rates and ear skin histology after exposures to coherent ruby laser light
 24 p4270 A69-42578

GUM VULCANIZATES
 U VULCANIZED ELASTOMERS

GUMBEL THEORY
 U RANGE [EXTREMES]

GUN LAUNCHERS

Ruggedized ballistic range telemetry system survivability and in-flight stability after gun launching, presenting temperature, strain and stagnation point pressure measurements
 10 p1654 A69-23281

GUN PROPELLANTS

Relaxation induced self oscillations during combustion of gunpowder in semiclosed volume, noting combustion instability
 04 p0686 A69-14987

Heat conduction equation for convective flow applied to gunpowder combustion under harmonic pressure variation
 07 p1241 A69-18708

Combustion mechanism of condensed inflammable systems such as gunpowder and other explosives, discussing combustion stability
 11 p2000 A69-25187

Unsteady combustion wave passage through inert obstacle in gunpowder in N filled pressure vessel
 22 p4051 A69-41119

GUN TURRETS

Onboard hybrid computer for helicopter fire control system, generating turret pointing angles and corrections
 17 p2934 A69-34074

GUNN EFFECT

Small signal impedance of subcritically doped gallium arsenide Gunn diodes, using drift velocity vs electric field relationship
 01 p0038 A69-10121

Gunn generator efficiency dependence on diode and regime parameters using computer model
 01 p0042 A69-10319

YIG single crystal resonator tuning of Gunn diode in coaxial line circuit
 01 p0042 A69-10320

Gunn effect application in fast logic circuit devices including comparators, adder and shift register circuits
 01 p0042 A69-10438

Output power of Gunn effect microwave diode using equal area analysis and Fourier transforms
 01 p0049 A69-11195

Gunn domains reduction in sheet type GaAs oscillators by spreading of field lines out of active region
 02 p0215 A69-11933

GaAs Gunn diode oscillators operating at Q band frequencies
 02 p0297 A69-11944

Domain operating point application to Gunn domain buildup including trajectory graphs
 02 p0297 A69-11948

Optical modulation near intrinsic edge in n-type bulk GaAs due to Franz-Keldysh effect, noting carrier production by photon initiated excitation
 02 p0300 A69-12650

Magnetic field effect on amplitude, frequency and form of LF oscillations in Gunn diodes
 02 p0222 A69-12684

Microwave energy generation with solid state equipment, noting Gunn effect diodes, avalanche diodes and limited space charge accumulation /LSA/ devices
 03 p0402 A69-12971

Gunn effect in bulk GaAs, noting microwave oscillator applications
 03 p0484 A69-13292

Gunn effect and resulting electron transfer mechanism in semiconductor devices
 03 p0486 A69-13610

Stray fields and domain dynamics in Gunn effect semiconductors covered with dielectric sheets
 03 p0491 A69-13988

Small transverse dimensions effect and domain formation criterion for surface oriented Gunn diodes prepared on thin epitaxial GaAs layers
 04 p0639 A69-14335

Hybrid Gunn domain and LSA mode operation in oversized bulk and epitaxially grown GaAs, noting large signal impedance data
 04 p0639 A69-14339

Computer simulations defining conditions to produce series operation of Gunn effect diodes
 04 p0573 A69-14340

Similarity between characteristics of T layers in oxygen discharge positive column and Gunn instabilities in GaAs, noting role of negative O ions
 05 p0800 A69-15739

Gunn effect theory, discussing dynamic characteristics and domain propagation for inhomogeneous transmission line profile
 05 p0807 A69-15821

Bibliography on Gunn effect theory, experimental results and applications
 05 p0810 A69-16565

X-band swept frequency oscillator using Gunn diode and ferrite phase shifter
 05 p0734 A69-16573

Low power RF signal triggering of self sustaining Gunn oscillations in GaAs samples
 05 p0734 A69-16575

Electron temperature relation to population ratio in Gunn effect
 05 p0810 A69-16576

Gunn effect verification using n-type semiconductor single crystals in DC field, noting microwave field polarization plane rotation
 06 p0978 A69-16902

Intervalley scattering model for Gunn domain dynamics, noting effects comparable to diffusion
 06 p0893 A69-16937

Gunn effect pulse generator for antenna arrays operating at decimeter wavelengths with external power source
 06 p0895 A69-17459

External impedance controlled nucleation of Gunn effect domains studied theoretically by Nyquist criterion
 06 p0981 A69-18217

Gunn effect diodes application to ultrafast pulse electronic circuitry for computer logic
 07 p1089 A69-18244

Oversized GaAs Gunn effect diodes operated in L and S bands at harmonics of fundamental transit time frequency with high power and efficiency
 07 p1196 A69-18444

High peak power Gunn effect oscillators for low gigahertz frequencies in transit and nontransit time limited modes
 07 p1097 A69-18447

Computer model of Gunn diode, discussing operations under pulse bias voltage and in resonator
 07 p1097 A69-18449

Conditions for existence of stationary high field domain in Gunn diode
 07 p1097 A69-18450

Solution regrowth method to prepare epitaxial GaAs for Gunn effect devices
 07 p1197 A69-18451

Gunn effect pulse devices with resistive loading, discussing logic, circuits and low power consumption
 07 p1097 A69-18453

Absorption edge broadening by electric field in Gunn domain of N-GaAs crystals
 07 p1197 A69-18454

Mechanically and electronically tunable resonator for driving IMPATT and Gunn diodes
 07 p1097 A69-18455

GUNPOWDER

Gunn effect for cathode contacts with interface resistance, developing control characteristic boundary condition concept for explaining cathode fall and other phenomena

07 p1199 A69-18649

Injection locking method for reducing FM noise in Gunn effect oscillators

07 p1102 A69-18862

Degenerate parametric amplifier using self pumping action of oscillating domain capacitance in Gunn effect

07 p1107 A69-19450

Gunn effect memory loop in pulse diodes consisting of two Gunn diodes connected in series

08 p1279 A69-19912

High field domains in Gunn effect diode in transit time mode of operation probed with stroboscopic electron beam in scanning electron microscope

08 p1283 A69-20162

Series operation of Gunn devices with differing threshold currents at SHF

09 p1463 A69-21684

Gunn effect domains propagation calculated for nonuniform diodes of annular geometry, obtaining frequency variation

09 p1464 A69-22159

Gunn diode operating to VHF range with coaxial line to generate rectangular waves and to function as memory element

09 p1467 A69-22587

Pulsed J band Gunn effect oscillators performance, noting hybrid domain mode due to high bias fields

09 p1468 A69-22594

Gunn effect cavity controlled generator oscillations, noting phase trajectory closing conditions dependence on resonant mode parameters

09 p1468 A69-22596

Gunn diode reliability improvement by using device structures preventing high field domains from reaching anode

09 p1470 A69-22788

Gunn diode field distribution with distributed capacitance electrode analyzed with one dimensional computer simulation

09 p1470 A69-22789

Small signal HF conductivity of GaAs calculated for arbitrary frequency and DC field, considering subcritical Gunn devices

10 p1747 A69-23694

Frequency noises suppression in Gunn diode oscillators by frequency stabilization, using high Q external cavity

11 p1853 A69-25608

Resonant load impedance effects on Gunn diode oscillators output fluctuations, noting maximum power conditions

11 p1853 A69-25609

Gunn oscillators synchronizing by injecting HF external signal, discussing oscillator fabrication techniques, phase synchronization, etc

11 p1856 A69-25636

High CW power K-band Gunn oscillators attained through control over doping level, profile and GaAs epitaxial layer thickness

12 p2036 A69-25907

Microstripline circuit for stabilizing oscillating frequency of Gunn diodes prepared with GaAs slices

12 p2036 A69-25924

LF negative resistance of X band Gunn diodes with lumped components, using coaxial circuit

12 p2039 A69-26387

Bias circuit LF oscillations in short Gunn devices, analyzing sinusoidal and relaxation oscillations and stable bias in terms of terminal I-V characteristics

12 p2041 A69-26628

Harmonic generation, using nonlinear current-voltage characteristics of Gunn diodes at 9500 MHz frequency

13 p2226 A69-27235

Relaxation oscillations in field ionized epitaxial n-GaAs Gunn oscillators on seminsulating substrates, discussing recombination of excess electrons and holes

13 p2227 A69-27236

Frequency memory in cavity controlled Gunn oscillators, discussing loop gain and bandwidth dependence on oscillation mode and bias voltage

13 p2229 A69-27677

SHF solid state phased array radar with Gunn effect modular microwave IC design, discussing air and ground applications

14 p2420 A69-29435

Boltzmann equation for hot electron distribution functions in GaAs and threshold field in Gunn effect

15 p2665 A69-30025

Gunn effect GaAs oscillators with p-n junctions, studying electrical characteristics, threshold voltages and currents during breakdown and p-n junctions injection

15 p2666 A69-30065

Waveguide below cut-off resonators for active microwave circuits, describing experiments with avalanche and Gunn diodes

15 p2577 A69-30613

Frequency effects on Gunn oscillator modulation sensitivity, discussing microwave-frequency deviation and diode impedance

15 p2577 A69-30614

Plasma modes, critical fluctuations and optical properties electric field dependence in two valley model of Gunn instability semiconductors

15 p2581 A69-31240

Gunn effect theory and applications, discussing field domains in semiconductors, excited oscillations measurement, oscillators design, computer elements, etc

18 p3183 A69-35160

Gunn effect and devices effective use for specific purposes and as components of microwave systems

18 p3183 A69-35263

Magnetic field effect on Gunn diode vibrations and LF oscillations, noting increase in threshold field and decrease in threshold current

18 p3183 A69-35267

Gunn effect applied to digital electronics, discussing diode characteristics, microwave amplifier design, pattern recognition, analog-numerical conversion, etc

19 p3285 A69-36708

Gunn effect pulse generator for antenna arrays operating at decimeter wavelengths with external power source

20 p3508 A69-37942

Gunn device performance for various oscillator types, discussing cavity oscillator characteristics variation

21 p3681 A69-38394

Gunn oscillators protection from catastrophic breakdown phenomena, using carrier velocity saturation in n-type Ge

21 p3682 A69-38777

GUNPOWDER

U GUN PROPELLANTS

GUNS [ORDNANCE]

Gun projectiles assisted by solid propellant motor to increase range, discussing construction, performance and free-wheeling rotation band use

15 p2702 A69-30592

GUST ALLEVIATORS

Aircraft gust alleviation system for minimizing weighted sum of normal acceleration and pitch rate response by limiting control surface deflections

09 p1434 A69-22279

Gust absorber system configuration flight tests and analysis, emphasizing application to delta wing aircraft [ONERA-TP-698]

20 p3462 A69-37753

GUST LOADS

Low altitude atmospheric turbulence model evaluated from analysis of A-6A aircraft gust load data, comparing model estimates with aircraft response characteristics

01 p0056 A69-11053

Lift fluctuation on airfoil due to transverse and chordwise gusts applied to rotating fan and compressor blade design [ASME PAPER 68-FE-28]

05 p0697 A69-16070

Wing penetration into zone of sharply localized gust, deriving equations for forces and moments acting on wing

07 p1050 A69-18742

Atmospheric gust effect on aircraft flying at Mach one calculated for subsonic and supersonic regions, finding difficulties for transonic calculations

10 p1632 A69-22918

Gust load predictions for aircraft design by treating aircraft load history as linear response to stationary Gaussian process excitation

11 p1823 A69-25504

Turbulence and SST, discussing subsonic accidents, probability of encountering gust induced accelerations, turbulence at cruise altitudes, radar storm return and mountain waves

16 p2808 A69-32368

Random gust design requirement and gust load covariances to define boundaries of gust-loading region for airframes

20 p3621 A69-37167

FAA power spectral gust methods for computing design limit loads on commercial aircraft, noting British investigation

24 p4253 A69-43111

GUSTATORY PERCEPTION
U TASTE

GUSTS

Numerical filtering procedures for gust spectrum analyses compared for gain and phase lag frequency response characteristics, discussing gust acceleration spectra

01 p0084 A69-11052

Pressure oscillation production in wind tunnel by hinged plates in test section walls to test jet engine inlets under controlled conditions

02 p0229 A69-12537

Wind gust simulation procedures, discussing high altitude clear air turbulence and simulation of air perturbations

03 p0461 A69-13647

Gust probes in model of low altitude atmospheric turbulence during USAF research program L.O.-LOCAT, plotting relationship between peak count distribution curves

17 p2999 A69-33737

GYMNASTICS

U EXERCISE [PHYSIOLOGY]

GYNECOLOGY

Jet flying effects on air hostess menstrual function, considering cycle length, duration, regularity, dysmenorrhea and flow severity

23 p4103 A69-41689

GYRATION

NT AUTOROTATION
NT EARTH ROTATION
NT LARMOR PRECESSION
NT MOLECULAR ROTATION
NT PRECESSION
NT ROTATION
NT SATELLITE ROTATION
NT SOLAR ROTATION
NT STELLAR ROTATION

Differential equations for normal propagation of plane electromagnetic waves in isotropic stratified inhomogeneous gyration medium, discussing boundary conditions and reflection properties

08 p1353 A69-21000

GYRATORS

NT MICROWAVE FILTERS

Impedance and gain approximation in transistor configurations, noting gyrator circuit

02 p0213 A69-11532

Stability of linear passive time variable circuits, discussing validity of circuit elements replacement by gyrator equivalents

05 p0739 A69-16348

Controllable gyrator use in nonlinear network synthesis

05 p0735 A69-16620

Frequency and noise characteristics of gyrator circuits, analyzing Q factor, stability and oscillation sensitivity

05 p0735 A69-16621

3-terminal gyrator circuits using operational amplifiers, noting exact cancellation of negative by positive resistance and unattainability of LF unstable modes

06 p0893 A69-16936

Gyrator stability and frequency behavior obtained by controlled sources selection

19 p3287 A69-36739

GYROCOMPASSES

Book on magnetic compasses and magnetometers covering pivoted needle instruments, surveying, transmitting and gyromagnetic compasses, inductor instruments and compass testing

08 p1315 A69-20444

Two rotor gyrocompass oscillations stability during finite time interval, deriving differential equation by suitable quadratic functions

11 p1886 A69-25089

Land gyrocompass on torsional suspensions in liquid filled chamber, considering design and operation in terms of precession theory

13 p2259 A69-27431

Natural oscillation frequency of gyrocompass mounted in torsional suspension, taking into account moments of inertia of sensitive element

16 p2791 A69-32282

Gyrocompass differential equations of motion reduced to Volterra integral equation, proposing solution algorithm

17 p2995 A69-33617

Gyrocompassing precision problems related to gyro drift, input axis deviation and base motion compensation, describing inertial navigation platform alignment to true north

17 p2977 A69-34081

- Casing bearings dry friction force moment effect on double rotor gyrocompass sensor motion, showing diminished device accuracy at high latitudes
18 p3135 A69-34560
- Accuracy improvement of method of averages applied to equations of small motions and disturbances of two rotor gyrocompass on ship performing circular maneuvers
18 p3139 A69-35378
- Precision azimuth reference accuracy standards with confidence limits for gyrocompass evaluation, emphasizing astro and transfer angle repeatability [AIAA PAPER 69-859]
21 p3725 A69-39387
- GYROFREQUENCY**
- Incoherent synchrotron radiation by relativistic electrons gyrating in cold magnetoactive plasma rederived, correcting errors
10 p1741 A69-23858
- Banded chorus, VLF discrete emissions in magnetosphere in single variable frequency band with frequency depending on equatorial electron gyrofrequency
16 p2774 A69-31981
- Natural gyrofrequencies of rigid rotor during slowing/stopping at high forward speed, using simple approximation
17 p2899 A69-33507
- Ionospheric VLF electrostatic noise observed by sounding rocket, noting proton gyrofrequency harmonics effects within emission attenuation bands
21 p3714 A69-38550
- Resonant perturbation response of Vlasov magnetoplasma to source below electron gyrofrequency, explaining fractional resonances in Alouette 2 topside data
22 p4023 A69-40516
- GYROINTERACTION**
U MAGNETIC RIGIDITY
- GYROMAGNETISM**
NT GYROFREQUENCY
- Upper hybrid and modified plasma resonance on basis of rocket-borne gyroplasma probe data
10 p1726 A69-22807
- GYROPLANES**
U HELICOPTERS
- GYROS**
U GYROSCOPES
- GYROSCOPE FLUIDS**
- Sensor suspension, damping and signal readout through use of fluids with applications to rate and acceleration sensors
[AGARDGRAPH-118]
08 p1257 A69-20949
- Operational errors of floating gyroscopes with hydrostatic unloading of bearings, establishing eccentricity tolerances, axes misalignment and temperature field nonuniformity
09 p1497 A69-22103
- GYROSCOPES**
NT ATTITUDE GYROS
NT ELECTROSTATIC GYROSCOPES
NT FLUID ROTOR GYROSCOPES
NT GYROCOMPASSES
NT GYROSCOPIC PENDULUMS
NT GYROSTABILIZERS
NT ROTARY GYROSCOPES
- Gyroscope with rotational symmetry subjected to random input torques analyzed by Euler equation of motion
01 p0079 A69-10236
- Optimal stabilization of free gyrostats using duration of transient processes and functionals of fuel and power requirements as criteria
01 p0079 A69-10261
- Sequential probability ratio test for detecting changes in Gauss-Markov process characteristics, noting application to fault detection in gyro navigational system
01 p0083 A69-11002
- Gyrovibrator /angular rate measuring device/, discussing output signal and natural frequency dependence on moments of inertia
01 p0083 A69-11004
- Laser gyro applications including guidance, navigation and control problems
02 p0248 A69-11741
- Laser gyro in future inertial navigation systems for Category 1 landing without position updating
03 p0463 A69-13210
- Nonorthogonal multisensor strapdown inertial reference unit providing redundant capabilities and optimal performance
03 p0429 A69-13211
- Equilibrium orientations of orbiting gyrostats, giving spectrum of solutions for bodies of varied shape and internal rotor angular momentum
03 p0522 A69-14246
- Invariance of stabilized coordinates in power gyrostabilizers, using matrix equivalent of gyroscopic moments acting on platform
04 p0597 A69-14602
- Dry friction stabilizing effect on motion of astatic gyroscope with quasi-elastic compensation
04 p0597 A69-14605
- Strapdown gyros in back to back connection for reduction of component cross coupling errors
04 p0603 A69-15473
- Equivalence principle application to gyroscope motion in uniform gravitational field to obtain precessional angular velocity
05 p0764 A69-16367
- Integrability of equations of motion of gyrostat about fixed point inertial moments varying identically in time
05 p0764 A69-16504
- Spherical gyroscope servosystem probabilistic synthesis ensuring minimum dispersion of random drift
05 p0764 A69-16669
- Motion of gyroscopic integrator of linear accelerations, analyzing nutational vibrations imposed on precession
06 p0927 A69-17688
- Equilibria of orbiting gyrostat satellite with internal angular momenta along principal axes
07 p1227 A69-18336
- Steady state motions stability of gyroscope mounted on satellite in gravitational orbit
07 p1137 A69-19679
- Collection of papers on designing components of gyroscopic systems covering moment sensors, floating devices, bearings, etc
09 p1497 A69-22101
- Magnetic masses of differentiating or integrating floating gyroscope effect on gyro moment sensor performance, examining utilization of multipole permanent magnet
09 p1497 A69-22102
- Operational errors of floating gyroscopes with hydrostatic unloading of bearings, establishing eccentricity tolerances, axes misalignment and temperature field nonuniformity
09 p1497 A69-22103
- Centering force and initial rigidity of magnetically suspended bearings of integrating floating gyroscope with allowance for mutual inductance of exciting coils
09 p1497 A69-22104
- Rational shape selection for magnetoconductors of centering elements of magnetically suspended bearings, studying effects on initial rigidity
09 p1497 A69-22105
- Earth rotation and aircraft speed effects on vertical gyroscopes during banking, obtaining formulas for gyro errors
09 p1498 A69-22107
- Kinematics of vertical gyroscope mounted in additional servo frame, determining kinematic errors due to rotor axis deviation
09 p1498 A69-22108
- High sensitivity gyroscopic HF angular acceleration sensor using special differentiator, obtaining motion equations and dynamic response
09 p1498 A69-22109
- Drift rate of gyroscopic devices in space based on kinematic theorem, stressing free gyroscope subjected to harmonically varying moment
09 p1498 A69-22111
- Biaxial gyrostabilizers mounting on rocking base, deriving expressions for constant components of stabilizer precession rate
09 p1498 A69-22112
- Stabilized gyroscope platform internal dynamics analysis, outlining optimal orientation for full compensation of cross couplings
09 p1499 A69-22240
- Vibrating momentum exchange device /VMED/ in single axis configuration as competitor for inertia wheel or twin gyro
09 p1538 A69-22435
- Azimuthal drift of rotor axis of directional gyroscope mounted on sloping base, showing vertical component responsibility via truncated equations of motion
09 p1502 A69-22702
- Gyrorotor center axial displacements due to axial load, noting equal load distribution between bearings with resilient cover plates
09 p1502 A69-22703
- Gyromotor flanges axial rigidity measuring methods based on axial deflection of flange or natural frequency of oscillating system
09 p1513 A69-22704
- Tumbling motion for testing gyroscopic devices quality
10 p1689 A69-22927
- Synchronous vibration absorbers using gyroscopic systems, noting antiresonance with Perissogyro [ASME PAPER 69-VIBR-39]
10 p1807 A69-24177
- Dynamics of gyroscopic synchronous servo system intended for remote measurement of spatial orientation coordinates of sensor moving element
11 p1881 A69-24558
- Directional gyroscope accuracy increased by self adaptive systems, based on precession theory and drift amplitude dependence
11 p1881 A69-24559
- Gyroscopes orientation influence on dynamic drift of triaxial power gyrostabilizer on rocking platform, noting optimum orientations
11 p1881 A69-24560
- Constant velocity moving object influence on indications of vertical gyroscope having electromagnetic compensation with residual imbalance of sensor element
11 p1881 A69-24561
- Image motion trajectory in rotating angular mirror having converging reflections from two surfaces, using precession theory of gyroscopes
11 p1881 A69-24562
- Stability of uniform rotations of gyrostat with fixed point in potential force field, considering Routh rule
11 p1918 A69-24786
- Motion of heavy body with gyroscope, using coordinate system to reduce problem to linear second order differential equation
11 p1920 A69-25746
- Inertial navigation system sensors including one and two axis, laser, vibratory, gyroflex and free rotor gyros
12 p2078 A69-25874
- Directional gyroscope with interframe correlation, discussing errors during object pitching and banking
14 p2446 A69-28923
- Inertial navigation system theory that uses increased numbers of newtonometers/force measuring devices/ in place of gyroscopic sensitive elements
16 p2791 A69-32283
- Rotor hazards in rotational behavior of gravity stabilized satellites, describing gyrostat applications
17 p3048 A69-33233
- Gyroscopic apparent rate meters generating steering moments in inertial navigation systems for determining moving object position and course
18 p3134 A69-34556
- Drift of two connected gyroscopes, discussing equations of motion assuming unperturbed rotation and weightlessness
18 p3135 A69-34561
- Dynamic performance accuracy of astatic gyroscope with three degrees of freedom improved by inner gimbal mass increase
19 p3308 A69-35825
- Mathematical basis for inertial vertical gyro development, considering Schuler conditions fulfillment with integral position correction
19 p3311 A69-36193
- Gyroscopic system behavior analyzed for steady state operation following transient period
21 p3723 A69-38832
- Envelope plotting of nutational vibrations of astatic gyroscope under influence of dissipative forces, noting quasi-elastic model
21 p3723 A69-38889
- Hydrodynamic conical and spherical spiral grooved grease bearings replacement of gyro ball bearings for extended space missions [AIAA PAPER 69-836]
21 p3732 A69-39367
- Gyro drift rate mathematical modeling based on stationary and nonstationary time series analysis techniques with random process reduction to white noise residuals [AIAA PAPER 69-838]
21 p3761 A69-39369
- Single degree of freedom gyroscope design factors applicable to strapdown guidance system, discussing torque-to-balance loop, multiple pulse bursting and error sources [AIAA PAPER 69-848]
21 p3762 A69-39378
- Mathematical formulation and error analysis of two rotor gyroorbit used in plotting orbital system of satellite coordinates
21 p3765 A69-39636
- Probability characteristics of total error in vertical gyroscope evaluated from component errors along suspension axes
22 p3946 A69-40251
- HF vibrations effect on motion of gyroscopic linear acceleration integrator, showing additional error in flight vehicle acceleration measurements
22 p3946 A69-40253

GYROSCOPIC COUPLING

Autometric gyro for satellite general relativity experiments, particularly earth orbit measurement of Lense-Thirring precession 23 p4162 A69-41543

Astatic gyro motion with horizontal rotor axis, defining suspension error with allowance for external force moments 24 p4317 A69-43707

GYROSCOPIC COUPLING

Gyrostatic moments effects on critical angular velocities of varying and constant cross section rigidly and elastically supported hinged rotors 09 p1567 A69-21384

Dynamics of gyroscope having flexible axis under gravitational force and elastic coupling reactions, deriving motion equations, precessions angular velocities, etc 14 p2445 A69-28798

Coupled gyroscopic systems two parameter stabilization problem analyzed for steady state characteristics by iterative method 21 p3723 A69-38829

Harmonic linearization for analyzing dry friction effect on gyroscope stability with free play in mechanical couplings, showing effective damping of natural oscillations 23 p4163 A69-41554

GYROSCOPIC DRIFT

U GYROSCOPES

GYROSCOPIC PENDULUMS

Schuler gyroscopic pendulum, noting magnitude requirement for gravitational field used in inertial navigation 02 p0248 A69-11593

Ballistic deviations of gyropendulum vertical damped by astatic gyroscope 06 p0927 A69-17687

Hydropendulum bearing linear horizontal vibration effect on vertex vibration, analyzing zero initial phase using precession theory 10 p1697 A69-24086

Vibrarotor gyroscope operated as rate gyro for simultaneously indicating two components of angular velocity by amplitude and phase of periodic output signal 18 p3139 A69-35299

Motion analysis of symmetrical physical pendulum having mobile fulcrum for geocentric vertical indicator possibility 21 p3727 A69-39830

GYROSCOPIC STABILITY

Optimal stabilization of free gyrostats using duration of transient processes and functionals of fuel and power requirements as criteria 01 p0079 A69-10261

Dynamically symmetric gyrostat steady motion stability in relation to satellite motion 01 p0163 A69-11301

Error reduction in initial azimuth alignment and azimuth and level axis gyro drifts in long range air transport gyro accelerometer inertial systems 02 p0278 A69-12361

Gyroscopically induced vibrational response of rectangular plates and membranes, determining spin and precession effects on natural frequencies 02 p0347 A69-12519

Mathematical modeling of gyro drift rate in inertial navigation based on stationary and nonstationary time series analysis 03 p0463 A69-13213

Equilibrium orientations of orbiting gyrostats, giving spectrum of solutions for bodies of varied shape and internal rotor angular momentum 03 p0522 A69-14246

Invariance of stabilized coordinates in power gyro stabilizers, using matrix equivalent of gyroscopic moments acting on platform 04 p0597 A69-14602

Optimal compensating loop in stabilization circuit of uniaxial gyro stabilizer 04 p0597 A69-14604

Dry friction stabilizing effect on motion of astatic gyroscope with quasi-elastic compensation 04 p0597 A69-14605

Asymptotic stability of gyroscopic systems equilibria with partial dissipation used for motion stability analysis 04 p0631 A69-15537

Equivalence principle application to gyroscope motion in uniform gravitational field to obtain precessional angular velocity 05 p0764 A69-16367

Spherical gyroscope servosystem probabilistic synthesis ensuring minimum dispersion of random drift 05 p0764 A69-16669

Motion stability of gyroscope in universal suspension with spring restraints and damper in gravitational field extended to include Newtonian central force field 05 p0765 A69-16684

Effect of small periodic moment applied to axis of inner gimbal on gyro drift when gyro is mounted on base fluctuating about two mutually perpendicular axes 06 p0924 A69-17183

Ballistic deviations of gyropendulum vertical damped by astatic gyroscope 06 p0927 A69-17687

Special and general relativity theories following Newtonian mechanics and gravitation theories, discussing metric tensor, sun oblateness and experiments with gyroscope spin axis precession 07 p1181 A69-18928

Magnetic masses of differentiating or integrating floating gyroscope effect on gyro moment sensor performance, examining utilization of multiple permanent magnet 09 p1497 A69-22102

Gyroscope error due to axial play of inner gimbal of Cardan mounting during base circular vibrations, noting axial clearance reduction 09 p1498 A69-22110

Drift rate of gyroscopic devices in space based on kinematic theorem, stressing free gyroscope subjected to harmonically varying moment 09 p1498 A69-22111

Single axis gyro stabilizer stability analysis allowing for dry friction in precession axis, noting asymptotic tendency of motions toward steady rotation 09 p1502 A69-22701

Azimuthal drift of rotor axis of directional gyroscope mounted on sloping base, showing vertical component responsibility via truncated equations of motion 09 p1502 A69-22702

Gyrorotor center axial displacements due to axial load, noting equal load distribution between bearings with resilient cover plates 09 p1502 A69-22703

Four gimbal Cardan suspension gyroscope kinematics for nonperpendicular arrangement 09 p1502 A69-22705

Optimization of autonomous system parameters, exemplifying by disturbed motion of gyroscope system 11 p1858 A69-24557

Rotational dynamics equations in linearized matrix form applied to satellite librations in circular orbit and gyroscope motion 11 p1970 A69-24608

Slender elastic rod stability under spatial finite deflection, analyzing critical load by using Kirchhoff analogy and gyroscope motion 11 p1970 A69-24609

Two rotor gyrocompass oscillations stability during finite time interval, deriving differential equation by suitable quadratic functions 11 p1886 A69-25089

Stability of stationary motion, analyzing gyroscopically unstabilizable systems and extension to continuous spectrum case 11 p1919 A69-25437

Dynamics of triaxial gyro stabilizer with additional rotor mounted on base, showing systematic drift 13 p2259 A69-27428

Gyroscope motion with unbalanced rotor in run-down mode, integrating equations for small oscillations 13 p2259 A69-27429

Triaxial gyro stabilizer systematic drifts during rocking at large platform displacement angles, analyzing drift direction and rate dependence 13 p2259 A69-27430

Nonstatic gyroscope nonlinear oscillations caused by swaying of synchronous gyromotor rotor 13 p2264 A69-28438

Instantaneous rotational impulse imparting steady motion of disk determined for coupled gyroscope 13 p2264 A69-28527

Dynamics of gyroscope having flexible axis under gravitational force and elastic coupling reactions, deriving motion equations, precessions angular velocities, etc 14 p2445 A69-28798

Ballistic deviations limits for aircraft vertical gyroscope taking into account aircraft vertical movements, using compensation in system 14 p2445 A69-28899

Dry friction effects on stability of single axis gyro stabilizer 14 p2445 A69-28922

Steady motion stability of satellite with gimbal suspended gyroscope in central gravitational field, showing no effect of satellite perturbations on gyro stability 14 p2530 A69-29481

Modeling nonstationary random processes using linear time-invariant difference equation, with applications to Kalman filtering and gyro drift 14 p2479 A69-29486

Gimbal torquing as function of gimbal structure response resulting in free gyro erection system, using any angular momentum at any initial starting angle 16 p2792 A69-32553

Earth quadrupole moment effects on precession of gyroscope in satellite in equatorial orbit 17 p2972 A69-33072

Cosmos 149 satellite stabilization system, discussing three axis orientation and pitch, yaw and roll stabilizations by aerodynamic and/or gyroscopic moments 17 p3047 A69-33226

Rotational equations of motion for two body spacecraft on common spin axis required for simulated gravity environment or gyroscopic stability augmentation 17 p3047 A69-33227

Gyro controlled rigid rotor dynamic stability studied for stoppable rotor operation, developing analytical expressions for determining stability boundary of constant and rotor speed gyros [AHS PAPER 343] 17 p2899 A69-33508

Gyrocompassing precision problems related to gyro drift, input axis deviation and base motion compensation, describing inertial navigation platform alignment to true north 17 p2977 A69-34081

Rotary motion stability of axisymmetric solid body or gyroscope suspended on string and containing ellipsoidal cavity filled with liquid 18 p3135 A69-34558

Boundary layer theory application to dynamics of gyroscope in gimbal suspension, defining nutational and precessional motion 18 p3135 A69-34559

Casing bearings dry friction force moment effect on double rotor gyrocompass sensor motion, showing diminished device accuracy at high latitudes 18 p3135 A69-34560

Drift of two connected gyroscopes, discussing equations of motion assuming unperturbed rotation and weightlessness 18 p3135 A69-34561

Steady motion stability of satellite gyroscope in Cardan suspension traveling along circular orbit in Newtonian central force field 18 p3135 A69-34585

Mean drift rates of single and two rotor gyroscopic linear acceleration integrators mounted on irregularly rocking base 18 p3135 A69-34586

Optimal asymptotic stabilization of gyrostat relative equilibrium, determining norm constraints for application to global gyrostat attitude control 18 p3210 A69-35145

Accuracy improvement of method of averages applied to equations of small motions and disturbances of two rotor gyrocompass on ship performing circular maneuvers 18 p3139 A69-35378

Asynchronous gyrostat postimpact drift direction found orthogonal with respect to initial impulse by averaging method 19 p3311 A69-36192

Airborne astatic vertical gyro motion found dependent on aircraft motion along trajectory 19 p3311 A69-36194

Triaxial static gyro stabilizer drifts, assuming perturbing moment steady centered random force applied along stabilizing gimbal axis 19 p3311 A69-36195

Gyrostat satellite equilibrium positions in circular equatorial orbit under action of gravitational magnetic and aerodynamic moments based on gyro stabilized satellite equations of motion 19 p3432 A69-36620

Gyroscopic platforms automatic stability relative to inertial reference system, considering functional equations and error computation 21 p3760 A69-38734

Coupled gyroscopic systems two parameter stabilization problem analyzed for steady state characteristics by iterative method 21 p3723 A69-38829

Steady motions stability of gyroscope in Cardan suspension, deriving equations of motions with rectangular coordinate system 21 p3723 A69-38851

Gyro drift rate mathematical modeling based on stationary and nonstationary time series analysis techniques with random process reduction to white noise residuals
[AIAA PAPER 69-838] 21 p3761 A69-39369

Spacecraft attitude acquisition/reorientation and stabilization controller design implemented by control moment gyro, proposing control algorithm using control actuator nonlinearity
21 p3826 A69-39641

Attitude stability of orbiting vehicle containing gyrost, discussing asymptotic stability
22 p4037 A69-40555

Gyroscopic motion with center of mass displaced along suspension axes and kinetic moment varying as power law under linear accelerations
23 p4163 A69-41552

Accelerated motion influence on onboard vertical gyro with design based on free astatic gyro with electromagnetic compensation
23 p4163 A69-41553

Harmonic linearization for analyzing dry friction effect on gyroscope stability with free play in mechanical couplings, showing effective damping of natural oscillations
23 p4163 A69-41554

Optimal control parameters for gyroscopic devices with constrained phase coordinates obtained on analog computer by introducing equivalent phase coordinates system
24 p4317 A69-43708

GYROSTABILIZERS

Invariance principle application in gyrostabilizer systems, noting effect of external disturbances and system noise
04 p0597 A69-14603

Optimal compensating loop in stabilization circuit of uniaxial gyrostabilizer
04 p0597 A69-14604

Biaxial gyrostabilizers mounting on rocking base, deriving expressions for constant components of stabilizer precession rate
09 p1498 A69-22112

Single axis gyrostabilizer stability analysis allowing for dry friction in precession axis, noting asymptotic tendency of motions toward steady rotation
09 p1502 A69-22701

Gyroscopes orientation influence on dynamic drift of triaxial power gyrostabilizer on rocking platform, noting optimum orientations
11 p1881 A69-24560

Gyrostabilized satellite steady state motions in Newtonian force field having displaced satellite center of mass orbital plane relative to center of attraction
12 p2173 A69-25885

Dynamics of triaxial gyrostabilizer with additional rotor mounted on base, showing systematic drift
13 p2259 A69-27428

Triaxial gyrostabilizer systematic drifts during rocking at large platform displacement angles, analyzing drift direction and rate dependence
13 p2259 A69-27430

Spacecraft attitude control and stabilization by three degree of freedom control moment gyro with controllable gyro spin angular velocity
13 p2355 A69-27445

Dry friction effects on stability of single axis gyrostabilizer
14 p2445 A69-28922

Power gyrostabilizer kinematic structure synthesis, applying matrix methods to design variables
14 p2446 A69-28924

Soviet monograph on liquid rocket as controlled plant covering rocket bodies, liquids motion stabilization and gyrosystem positioning
18 p3206 A69-34333

Momentum control system for satellite maneuvering and pointing in pitch and roll developed by modifying existing libration damping gyrostabilizer
18 p3207 A69-34684

Triaxial static gyrostabilizer drifts, assuming perturbing moment steady centered random force applied along stabilizing gimbal axis
19 p3311 A69-36195

Gyrostabilized satellite equilibrium positions in circular equatorial orbit under action of gravitational magnetic and aerodynamic moments based on gyrostabilized satellite equations of motion
19 p3432 A69-36620

Gyroplatform to stabilize gravimetric equipment on aircraft, noting channel stabilization by electrohydraulic servomechanism
21 p3723 A69-38885

Harmonic linearization for analyzing dry friction effect on gyroscope stability with free play in mechanical

couplings, showing effective damping of natural oscillations
23 p4163 A69-41554

GYROSTATS
U GYROSCOPES

GYROTROPISM

Light wave propagation in gyrotropic crystals, examining laser frequency shift circularly polarized by modulating field
03 p0436 A69-13037

Electromagnetic wave passage through plane gyrotropic layer of magnetized plasma, analyzing polarization and energy transfer
03 p0397 A69-13709

Gyrotropically filled waveguides propagation parameters calculation by variational method
05 p0718 A69-15648

Excitation of plane plasma layer in magnetic field perpendicular to wave vector of excitation wave in gyrotropic waveguide
11 p1927 A69-24916

Thermal radiation polarization in anisotropic and gyrotropic media described by Hermitian permittivity tensor, noting linearity
15 p2653 A69-30940

Gyrotropically filled waveguides propagation parameters calculation by variational method
16 p2754 A69-32505

Radio wave propagation in homogeneous turbulent gyrotropic medium, presenting solution for fluctuations in direction of wave scattering by geometrical optics approximation
17 p2927 A69-33861

Biquadratic plane wave dispersion relation for gyrotropic waveguides with dielectric and magnetic properties, discussing associated quartic equation for refractivity
21 p3675 A69-39285

LF hydromagnetic waves propagation along geomagnetic field lines in gyrotropic ionosphere model taking Hall effect into account
23 p4157 A69-41864

H

H ALPHA LINE

H alpha emission symmetrical spatial distribution of night airglow observed with high transmission diffraction spectrographs
01 p0062 A69-10128

Hydrogen alpha line strength in 951 O, B and early A stars from narrow band photoelectric measurements for stellar luminosity
03 p0511 A69-13435

Dynamic H alpha phenomena in projection on solar disk for simultaneously appearing flare and eruptive prominence on January 29, 1968
03 p0516 A69-14043

Instrument profile of birefringent Lyot filter for H alpha line determined from photographic spectra with grating spectrograph
04 p0664 A69-15524

Bright streaks in H alpha disk chromosphere, noting predominantly horizontal loop structures
04 p0664 A69-15525

High resolution H alpha line photographs of solar chromosphere, showing superpenumbra-like dark fibrils around isolated sunspots
04 p0664 A69-15526

Radio bursts at 3.3 mm and H alpha emission during flares, proposing thermal enhancement
04 p0650 A69-15527

Spectrographic H alpha observations indicating effects of rotary mass motion in flares and prominences
06 p0994 A69-17434

Solar moustaches H alpha profiles spectroscopic studies indicating near symmetry
06 p0994 A69-17435

Solar prominence structures observed in H alpha emission, determining radial velocities as function of distance from limb
06 p0994 A69-17436

Jovian limb H alpha line due to auroral emission obtained from high dispersion spectra with long light path through upper atmosphere
07 p1214 A69-18614

Absolute isophotometry of hydrogen alpha photographs of bright galactic H II regions, attributing difference between theoretical and observed ratio to in-

terstellar absorption
07 p1217 A69-19231

Chromospheric velocity field temporal characteristics in quiet region of sun, determining power spectra of Doppler shifts of H alpha spectra
07 p1217 A69-19240

Three dimensional information pictures of chromospheric alpha H line using special camera attached to solar telescope diffraction grating spectrograph
07 p1217 A69-19241

M82 galaxy as Seyfert-like galaxy seen edge-on, using radio and optical data showing H alpha emission collisionally excited, discussing circular polarization
08 p1383 A69-20051

Galactic H 56 alpha recombination radio line observation in Omega Nebula in millimeter band with radio telescope, obtaining electron temperature
08 p1397 A69-20771

Electron temperature of Orion Nebula at 6750 K from intensities of hydrogen n alpha lines, discussing Stark broadening
08 p1398 A69-20776

Spectrophotometry of relics of supernovae, determining H alpha and N II lines intensities radial velocities and velocity dispersion
09 p1587 A69-21357

H alpha emission line in nucleus of Virgo A radio galaxy observed on spectrograph, estimating gas electron density and mass
09 p1588 A69-21360

Luminescence spectra of molecular gases excited by fast electrons in infrared spectral region, noting H alpha line
09 p1590 A69-21382

Hydrogen alpha emission nebulae catalog in western half of Cygnus X region, obtaining interstellar absorption from nebular distances determination
09 p1596 A69-22053

Solar X ray bursts observed by proportional counter on IMP-F satellite to correlate optical H alpha flares and radio bursts
09 p1582 A69-22746

Solid hydrogen mantle condensation accounting for lack of detectable alpha hydrogen in star clusters and OB associations
10 p1776 A69-23214

Alpha hydrogen plage 20934/McMath no. 8362/ associated with July 1966 proton flare development and configuration along sunspot group axis
10 p1762 A69-23728

H alpha, H beta and D sub 3 /helium/ emission photographs of active prominence of July 9, 1966 using monochromatic filters for characteristic emissions from hydrogen and helium
10 p1764 A69-23738

Solar west limb activity observations in H alpha line, noting July 9, 1966 loop system and July 11, 1966 twisted eruptive prominence
10 p1764 A69-23741

H alpha line photograph in M 82 spectra, giving equivalent radiating area and total ionized hydrogen mass
12 p2171 A69-27067

Ionized hydrogen regions in NGC 4449 from H alpha photography through narrow band interference filter, obtaining radial velocities
13 p2347 A69-27714

H II alpha and beta radio recombination lines strengths predicted, noting role of calculations of hydrogen energy levels non-LTE populations
14 p2517 A69-29088

H alpha line emission preceding auroral breakup by data analysis of Antarctica Meinel-type patrol spectrograph, noting magnetic activity role
14 p2441 A69-29386

Solar rotation measured as function of latitude using Doppler compensator with magnetograph, noting daily rotation rate difference in H alpha and metallic lines
14 p2528 A69-29974

Excitation sources distribution in chromosphere from observed H alpha line contour, considering resonant scattering and internal excitation
15 p2683 A69-30509

Filamentary nebula IC 443 observation by Fabry-Perot etalon with image converter, determining radial, expansion velocities and H alpha line half width
15 p2686 A69-30538

Pure hydrogen stellar atmosphere nonLTE models, calculating surface temperature rise due to H alpha line effect on continuum energy balance
15 p2693 A69-30777

Magellanic-like galaxy NGC 4631 observed in H

H BETA LINE

alpha light through narrow band interference filter, detecting and cataloging 88 H II regions
16 p2854 A69-31647

Balmer line H alpha emission and absorption coefficients measured with hydrogen plasma generated in high current low voltage free burning arc
16 p2822 A69-32040

H alpha/D3 intensity ratio variations in peripheral regions of prominences may be due to dynamic conditions of material emitting radiations
17 p3029 A69-33051

Spectrophotometry of relics of supernovae, determining H alpha and N II lines intensities radial velocities and velocity dispersion
18 p3197 A69-34747

H alpha emission line in nucleus of Virgo A radio galaxy observed on spectrograph, estimating gas electron density and mass
18 p3197 A69-34750

Luminescence spectra of molecular gases excited by fast electrons in IR spectral region, noting H alpha line
18 p3176 A69-34770

Balmer alpha and Lyman beta intensities for multiple scattering calculated for hydrogen geocorona models by radiative transfer equations, discussing radiation transport through earth hydrogen atoms
18 p3128 A69-34943

Resonance effects between H levels by induced electric dipole transitions, using spatially periodic potential barriers
18 p3179 A69-35488

Proton and electron auroral ovals, deriving H alpha intensity and frequency distributions as function of geomagnetic latitude and time from patrol spectrograms in Canada
19 p3302 A69-35993

M8 electron temperature and internal kinematics from photoelectric Fabry-Perot spectrometric recording of H alpha line profiles and N II
19 p3424 A69-36334

H alpha auroral activity on Jupiter isolated by using Fabry-Perot etalons, showing photograph reproductions
20 p3598 A69-37414

H alpha filtergrams and spectra of solar corona arch filament systems indicating downward and upward motions produced by magnetic field
20 p3588 A69-37543

H alpha line for emission nebulae analyzed by Fabry-Perot etalon, noting Doppler profile
20 p3607 A69-38039

Upper atmospheric H and He observations, showing Lyman alpha, H alpha measurements and H abundance values relative to Kockarts-Nicolet model
21 p3714 A69-38529

Core profiles of H alpha, H beta, H and K from spectrograms of plagues
22 p4010 A69-39993

Mean intensity profiles of photospheric H alpha radiation illuminating solar prominences moving at different heights
22 p4011 A69-39995

Optical and mechanical systems of Wrocław Observatory Lyot type coronagraph for prominence observations in H alpha line
22 p3943 A69-39999

Sunspot position in H alpha core relative to continuum, discussing height differences between H alpha core and continuum levels
22 p4019 A69-40291

Total solar eclipse of 5 February 1962 observed for spectrophotometry of flash spectrum, finding abnormal intensity gradients of H alpha and D3 lines
24 p4388 A69-43636

H BETA LINE

Hydrogen line profiles in various early stars compared with profiles predicted from model atmosphere calculations for rotating and nonrotating early stars
01 p0154 A69-10876

Hydrogen beta emission profiles for pole-on type Be stars, measuring stellar rotational velocity by Huug-Struve method
09 p1596 A69-22052

H alpha, H beta and D sub 3 /helium/ emission photographs of active prominence of July 9, 1966 using monochromatic filters for characteristic emissions from hydrogen and helium
10 p1764 A69-23738

Auroral H beta intensities determined from photographs by image intensifier, describing equipment and data reduction method
10 p1684 A69-23824

H beta emission line in night sky spectrum measured with gas pressure scanned Fabry-Perot interferometer in Italian alps
12 p2074 A69-26963

H II alpha and beta radio recombination lines strengths predicted, noting role of calculations of hydrogen energy levels non-LTE populations
14 p2517 A69-29088

Polychromator measurement of hydrogen plasma electron density produced by normal ionizing shock wave, using Stark broadening study of H beta line
14 p2494 A69-29767

H beta line for measuring radial temperature distribution in cylindrical hydrogen arc at one atm and to 150 A current in high temperature range
15 p2671 A69-31101

Photometric rocket measurements in hydrogen auroras, finding vertical H beta emission profile estimate of proton energy spectrum for H beta production cross section
15 p2598 A69-31307

Four color and H beta photometry of stars in Coma and Ursa Major clusters compared to standard relations for Hyades Cluster
16 p2860 A69-32234

Westward traveling auroral surge associated with electron flux during absence of H beta emission
18 p3130 A69-35189

Core profiles of H alpha, H beta, H and K from spectrograms of plagues
22 p4010 A69-39993

H beta production in hydrogen aurora measured during rocket flight, obtaining proton energy spectrum
24 p4309 A69-43170

H GAMMA LINE

Stark broadened H gamma profile, considering effect of strong collisions in electron perturbation and electron impact broadening of lower levels
20 p3579 A69-37305

Stark broadening of H-gamma for electron density measurement in plasma, noting temperature range
22 p3985 A69-40664

H LINES

Paschen series line contours for hydrogen in solar spectrum plotted from IR spectrophotometric data
01 p0148 A69-10126

Galactic neutral hydrogen structure in region of Cygnus observed with parabolic antenna and frequency-switched radiometer
08 p1388 A69-20243

Stark broadening of Balmer H alpha, H beta, H gamma and H delta lines in plasma region in strong magnetic fields
09 p1542 A69-22248

Degeneracy of hydrogenic states to sum S-matrix in Stark broadening calculations
09 p1543 A69-22405

Hydrogen balmer lines broadening by Stark and Doppler effects, finding prominences and chromosphere electron concentrations
11 p1955 A69-24389

Ionized gas cloud eruption from galactic nucleus deduced from observed hydrogen line at 5.1 cm
12 p2171 A69-27068

Hydrogen to He ratio effect on stellar atmospheric structure, considering flux relations, UVB color indices, H line profiles, electron and gas pressures
13 p2339 A69-27562

Radio emission from high level transitions in hydrogen calculated by superposing emission lines on background continuum, using Gaunt factor for free-free emission
13 p2327 A69-27596

Hydrogen content in Ia supergiant spectra of type B, noting lack of Stark wings of Balmer lines
13 p2348 A69-27722

Magnetic A star HD 152107 anomalous intensification of Balmer series H lines observed by spectrograms
13 p2352 A69-27873

Excited hydrogen RF spectral lines from nebula NGC 6618, calculating frequency for transitions by Balmer formula
13 p2353 A69-28433

Interstellar gas radio and optical spectral lines of neutral H compared with Ca and neutral Na, discussing critically low velocity gas distribution
14 p2519 A69-29135

21 cm line emission surveyed for spatial distribution of random velocities of neutral hydrogen in solar neighborhood
14 p2520 A69-29371

Excited hydrogen radio lines observations, analyzing neutral and excited hydrogen distribution in galaxies
15 p2682 A69-30502

Radio source W 43 distance determined from analyzing neutral H line profile and radial velocity in excited H line 104 alpha
15 p2687 A69-30543

Photometric calibration correction for B-V/ and U-B/ colors taking into account hydrogen line blocking
15 p2694 A69-30786

Spectroscopic observations of HD 4174 star by superimposition of emission and M-I absorption spectra, revealing intensity and radial velocity variations
16 p2858 A69-32214

He I/1.083 mu/ and O I/5577 A/ absolute brightness measured in sunlit aurora for various shadow heights of solar radiation, considering primary electron precipitation
16 p2780 A69-32311

Hydrogen line profiles, equivalent widths and electron densities for peculiar alpha 2 CVn and gamma Lyr stars
16 p2864 A69-32594

Ca 2 resonance line profiles in large disk flares and in surrounding plage, discussing H and K line behavior
17 p3023 A69-33054

Effective temperature and gravity values for Mn Ap stars by comparing spectrum scans and H line profiles with predictions from atmospheric models
17 p3038 A69-33724

Balmer line spectrum formation in extended atmospheres of Be and shell stars, noting influence of angle of inclination to observer
18 p3204 A69-35349

Photodestruction rate of H molecules by absorption of Lyman or Weber band radiation in interstellar space calculated at various distances from early stars
18 p3204 A69-35351

Chromospheric inhomogeneities rapid changing properties observable in H and K lines above sunspot umbrae
18 p3204 A69-35389

High velocity interstellar gas in H I and H II regions, emphasizing observations of neutral atomic hydrogen in and far from galactic plane
19 p3402 A69-35962

Monochromatic energy flux measurement in H and forbidden lines of planetary nebulae indicating ionization level and optical depth
19 p3423 A69-36223

H II regions radial velocities ellipsoidal distribution in M 33 explained as distribution with minor axis in direction of rotation
21 p3797 A69-38538

Atomic hydrogen departures from LTE computed for models of B star atmospheres, assuming detailed balance in hydrogen lines
24 p4376 A69-42665

Milky Way hydrogen line survey with Parkes telescope, giving velocity-longitude control maps and tabulated data covering galactic equator
24 p4383 A69-42961

Galactic X ray flux from H I region low energy cosmic ray nuclei, studying electron capture effects on line intensities
24 p4367 A69-43048

Hydrogen balmer lines broadening by Stark and Doppler effects, finding prominences and chromosphere electron concentrations
24 p4390 A69-43779

H WAVES

Metal flanges position effect on radiation patterns of H-plane sectoral horn radiators
08 p1285 A69-20554

Wave-mode converter with feed for omnidirectional antenna excitation, discussing H to E wave conversion, waveguides, emitter, etc
11 p1854 A69-25616

Wave reflections due to rotationally symmetrical jump in circular waveguide cross section, using orthogonal expansion to solve resulting boundary value problem
11 p1855 A69-25622

Waveguide cross connection of right-angled waveguides to determine reflection and transmission factors for incidence of H waves
11 p1855 A69-25623

Multiple strip H guide field distribution and low loss wave mode analysis, obtaining approximate thin layer equations
22 p3917 A69-41254

Average total losses of H waves transmitted over waveguide communication lines by nanosecond pulse sequences
23 p4123 A69-41949

H- 34 HELICOPTER

U CH- 34 HELICOPTER

H- 51 HELICOPTER

U XH-51 HELICOPTER

H- 56 HELICOPTER

AH-56A Cheyenne integrated avionics, armament and fire control system for precise weapons delivery and navigation
[AHS PAPER 312] 17 p2903 A69-33542

AH-56A helicopter manual and automatic terrain following and manual terrain avoidance systems, discussing nap-of-earth flight, design and simulation
[AHS PAPER 311] 17 p3002 A69-33544

C-5A transport aircraft airframes manufacture, discussing Lockheed profits, contract disputes and Cheyenne helicopter contract cancellation
20 p3640 A69-37355

HABITABILITY

Human habitation conditions on moon from viewpoint of solar and lunar radiation, vacuum and gravitation effects including solar energy utilization
23 p4111 A69-42213

HABITUATION [LEARNING]

Stability and habituation of nonspecific galvanic skin responses during light and sound stimulation periods in medical students
03 p0380 A69-13462

HADRONS

Three dimensional Monte Carlo calculations for hadronic component of extensive air showers using semiempirical model high energy nuclear interactions
15 p2678 A69-31482

HAFNium

Lanthanum and hafnium effect on transition and recrystallization temperatures of tungsten and tungsten base alloys
05 p0782 A69-16797

Hafnium microstructure and impurity concentrations before and after electron beam melting
23 p4178 A69-42361

HAFNium ALLOYS

Hard metals and materials containing NbC and HfC, noting X ray studies of pseudoternary and pseudoternary systems
14 p2464 A69-29323

Binary Nb-Hf system phase diagram below solidus line noting lattice parameters and oxygen and nitrogen effects on phase equilibrium boundaries
18 p3157 A69-35247

Ti sub 3, Rh sub 5 and Hf sub 3, Rh sub 5 existence and isomorphism confirmed by crystallographic and X ray methods
19 p3343 A69-35920

HAFNium CARBIDES

Hard metals and materials containing NbC and HfC, noting X ray studies of pseudoternary and pseudoternary systems
14 p2464 A69-29323

Integral normal emissivity of Ta and Hf carbides at temperatures from 1300 to 3000 K measured by radiation method in vacuum
15 p2640 A69-30984

HAIl

Origin and mineralogical composition of stones associated with 1824 stone hail near Sterlitamak
01 p0160 A69-11387

HAIlSTONES

U HAIl

HAIf CONES

Transonic dynamic stability of free flight half angle cones in wind tunnel for high drag planetary entry vehicles, discussing Mars entry trajectories
[AIAA PAPER 69-105] 06 p01019 A69-18209

Free flight sharp cone drag measurements in rarefied hypersonic flow
13 p2199 A69-28244

Aerodynamic problems posed by hypersonic flight from Mach 3 to 20, considering relationship to half cone with flat base
16 p2867 A69-31761

HAIf LIFE

Excited atomic H state radiative mean life measurements using beam-foil excitation method
03 p0469 A69-12920

Mean life of D energy level in N IV, discussing Be I isoelectronic sequence
17 p3009 A69-34187

Mean lives of 1s super 2 2p super 2 super 1D level in F VI and O V measured by beam foil technique
17 p3009 A69-34188

Be 7 stability in galactic cosmic radiation, noting lifetime dependence on electron density around nucleus
18 p3189 A69-35482

Exponential decay and mean lives of lowest P levels in N V measured with beam foil source, noting agreement with theories taking configuration interaction into account
21 p3774 A69-38760

HAIf PLANES

Vertical, horizontal and rocking vibrations of body on surface of otherwise unloaded elastic half plane, estimating stiffness for coupled vibrations
[ASME PAPER 68-WA/APM-12] 04 p0668 A69-14393

Load diffusion from transverse tension bar into semiinfinite elastic sheet, considering line and area contact methods of stringer attachment
[ASME PAPER 68-WA/APM-15] 04 p0669 A69-14396

Ground influence on Helmholtz flow in presence of plate perpendicular to stream, reducing problem to mixed Volterra problem in complex half plane
04 p0590 A69-15221

Basic equations describing stress-strain state of anisotropic half planes and anisotropic planes with cuts
06 p1020 A69-16827

Electrical impedance of semiconductor supporting two waves contains entire complex transcendental function with complex parameter and infinity of zeros in left half z plane
07 p1196 A69-18268

Inhomogeneous half planes equilibrium bonded by elastic layer, noting tangential stresses at interfaces
09 p1611 A69-21482

Elastic isotropic half plane weakened by circular hole with concentrated force applied along hole contour, considering stress distribution
11 p1972 A69-24653

Stresses and displacements in half plane with edge crack given as eigenfunction expansions using Wiener-Hopf technique
11 p1987 A69-25438

Stresses in elastic half plane with bonded disk of same elastic properties, describing stress production by expansion of disk
13 p2363 A69-28132

Contact problem for half plane with elastic stiffener reduced to Prandtl integrodifferential equation, determining contact stresses
14 p2531 A69-28804

Stress-strain problem of piecewise-homogeneous plane with cut normal to interface line reduced to Wiener Hopf equation, obtaining solution for arbitrary boundary conditions
14 p2531 A69-28805

Electromagnetic wave diffraction in three dimensional space divided by dielectric orthogonal half planes/wedges/, using contact boundary value problem
21 p3673 A69-39012

Numerical solution by approximation of Wiener-Hopf-Fock equation for diffractions at finite or infinite number of equidistant half planes applied to open-end waveguides
22 p3901 A69-40950

HAIf SPACES

Steady state problem of convective heat transfer in half space with boundary conditions of third kind
01 p0174 A69-10103

Torsional oscillations of elastic half space set up by rigid circular disk examined by integral equation method
01 p0169 A69-10809

Small metallic sphere detection by electromagnetic induction method, emphasizing masking effect of resistive half space below scatterer
01 p0047 A69-10974

Electric field in plasma half space determined by longitudinal wave normal mode analysis, using BKG particle conserving collision model
01 p0134 A69-11287

Thermoviscoelasticity equation solution for class of dynamic problems, giving problem solution for half space with arbitrary temperature field boundary condition
02 p0336 A69-11554

Ground wave excited by dipole in conducting half space, discussing lateral wave character and optimum radiation angle
02 p0209 A69-12347

Cylindrical sound pulse propagation in homogeneous layer under inhomogeneous half space
04 p0630 A69-14531

Viscoelasticity effect on tensile stress in absorption layer for free surface uniaxial motion
04 p0676 A69-14705

Plane shear pressure wave propagation in elastic-plastic half space for various combined normal and shearing loadings
05 p0835 A69-15798

Axially symmetric torsion of finite elastic cylindrical rod partially bonded to elastic half space, discussing coupling between dual Dini series and integral equations
07 p1236 A69-19474

Charged body moving at subsonic velocity normally through stratified elastic half space composed of film on homogeneous half space
08 p1417 A69-20753

Reflection of plane waves from stress free flat surface of micropolar elastic half space, presenting reflection laws and amplitude ratios
15 p2714 A69-31147

Viscoelastic half space properties effect on self excited vibration boundaries determination
16 p2873 A69-32063

Half space applications regarding equation of transfer for planetary atmosphere
18 p3191 A69-34306

Plane wave propagation due to combined compressive and shear stresses in half space, assuming elastoplastic material
[ASME PAPER 69-APM-12] 18 p3213 A69-34388

Heat conduction in thin layer near boundary surface of solid by approximating one dimensional conduction in half space with allowance for curvature
20 p3633 A69-38213

Self similar solution to one dimensional isothermal ionized gas outflow from ionization front in half space filled with neutral gas exposed to quanta flux
21 p3771 A69-38997

Constant surface heating of half space with temperature dependent thermal conductivity
21 p3851 A69-39292

Wave propagation in dynamical theory of thermoelasticity, considering half space subject to step time strain, temperature and stress distributed over free surface
23 p4235 A69-42464

Sphere set in motion at constant velocity by impulsive force submerged in incompressible fluid in half space
24 p4298 A69-42585

HAIlIDES

NT ALKALI HALIDES
NT ALUMINUM CHLORIDES
NT AMMONIUM CHLORIDES
NT BERYLLIUM FLUORIDES
NT BORON CHLORIDES
NT BORON FLUORIDES

NT POTASSIUM BROMIDES
NT POTASSIUM CHLORIDES
NT SILVER HALIDES
NT SILVER IODIDES
NT SODIUM CHLORIDES
NT SULFUR FLUORIDES
NT TITANIUM CHLORIDES
NT URANIUM FLUORIDES

Thermionic converters with chloride and fluoride vapor deposited tungsten emitters, comparing performance characteristics and stability
09 p1438 A69-21819

Titanium alloys stress corrosion cracking in presence of chloride, bromide and iodide under potentiostatic conditions, postulating electrochemical kinetic and mass transport model
19 p3351 A69-36901

HAIlITES

Black magnetite spherules electromagnetically separated from residue of Permian rock salt, determining content and properties of extraterrestrial material
12 p2154 A69-25821

HALL ACCELERATORS

- Coaxial Hall plasma accelerator, noting interaction between radial applied magnetic field and axial applied electric field 05 p0806 A69-16734
- Cusp magnetic field stabilizing superimposition on toroidal plasma discharge in polytron machine, noting role of Hall acceleration mechanism 06 p0965 A69-17514
- Low density Hall ion thruster with application to Van Allen probe and orbit-to-orbit transfer [AIAA PAPER 69-281] 09 p1562 A69-21229
- Coaxial electrodes with electric and magnetic fields to study instability in MPD arcs [AIAA PAPER 69-230] 09 p1563 A69-21231
- MPD plasma acceleration in West Germany, discussing Hall acceleration, electrodeless plasma acceleration by electromagnetic waves and space charge neutralized Hall ion thruster [AIAA PAPER 69-279] 09 p1564 A69-21238
- Hall type electromagnetic plasma accelerator, with thrust affected only by Lorentz forces in external magnetic field, compared to pure Hall accelerator 11 p1866 A69-25214
- HALL CURRENTS**
- U ELECTRIC CURRENT**
- HALL EFFECT**
- Hall effect in ferrites, determining classical and spontaneous Hall coefficients, electrical resistance, temperature effects and current carrier properties 01 p0135 A69-10185
- Stability of gravitating fluid layer of infinite extent but finite thickness including Hall effect 01 p0128 A69-10342
- Hall effect in unperturbed flow of fluids near thin profiles at infinity 01 p0132 A69-11133
- Many valley n-type Ge and Si semiconductors dissipative current breakdown effects, noting dependence on symmetry of valleys and phonon scattering pattern 02 p0298 A69-12098
- Characteristic time on motion of magnetic lines of force in medium with Hall effect 02 p0290 A69-12399
- Hall effect in semiconductors with polarons as majority carriers, noting variation with temperature of magnetic field dependence on Lorentz force 03 p0484 A69-13281
- Plasma gravitational stability problem with Hall effect, noting relevance to astrophysical systems 03 p0478 A69-13803
- Hall effect destabilization influence in Kelvin-Helmholtz problem for ideal plasma, noting instability growth rate 03 p0478 A69-13804
- CdS Hall coefficient, Hall mobility and magnetoresistance coefficient dependence on electric field, magnetic field and scattering mechanisms 03 p0490 A69-13945
- Hall mobility of photoelectrons in cadmium sulfide layers 03 p0491 A69-14055
- MHD generator two dimensional analysis for studying edge effect, taking into account Hall effect 03 p0480 A69-14099
- Resistivity and Hall mobility periodic change effect on probe measurements in semiconductors 04 p0642 A69-14534
- MHD channel flow temperature distributions with Hall effect, using formulation for momentum and energy equations 04 p0635 A69-14746
- Hydromagnetic analogs calculated for Rayleigh-Taylor problem with Hall effect, confirming introduction of plasma instabilities 04 p0637 A69-15050
- Evolutionarity of equations of MHD with Hall effect allowance for nondissipative plasma two dimensional flow 05 p0801 A69-15788
- Hall effect current influence on conductance of high current arcs 05 p0803 A69-15999
- Electrical properties of n-type Cd tin arsenide single crystals with impurity concentrations at various temperatures 05 p0809 A69-16375
- P-n junctions and device structures formed by ion implantation, using Hall effect and channeling techniques to evaluate implanted layer nature 06 p0974 A69-16862
- Neutron irradiation produced defects in p-type Si at 76 K, measuring Hall effect and electrical conductivity 06 p0975 A69-16868

Hall effect and magnetoresistance for compensated n-InP samples, discussing dependence on magnetic field 06 p0978 A69-16987

Hall effect and resistivity of n-type gallium arsenide phosphides doped with Te and Se 06 p0978 A69-16988

Temperature dependence of n-InSb Hall coefficient and resistivity, noting increase in conductivity with degree of compensation associated with electrical breakdown 06 p0978 A69-16990

Electrical resistance and Hall coefficient measurement in InAs-GaAs solid solutions system, giving temperature dependence of electron mobility 07 p1199 A69-18689

Impurity atoms effects on Cu diffusion and solubility in GaAs, determining Hall coefficient temperature dependence and conductivity 07 p1199 A69-19009

Magnetoelectric characteristics of inversion layers below gate region in transistors, noting Hall mobility 08 p1372 A69-20460

Hall current influence on plasma jet interaction with space periodic magnetic field created by system of coaxial coils with alternating current directions 08 p1370 A69-21017

Vapor deposition of high purity epitaxial layers of n-type gallium arsenide, noting resistivity and Hall coefficient measurements [ECS PAPER 62] 08 p1373 A69-21067

Hall effect and mass flow influence on MPD arc jet radial pressure profile calculated as function of pressure and magnetic field [AIAA PAPER 69-246] 09 p1562 A69-21226

Plasma acceleration by induced Hall currents, discussing Hall-to-current ratio maximum at critical magnetic field [AIAA PAPER 69-280] 09 p1562 A69-21228

N type surface layer in p type sample noting effect on Hall constant and relationship to temperature 09 p1555 A69-21472

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes 09 p1555 A69-21475

Nonlinearity of Hall voltage induced in plasma by external magnetic field under various assumptions 09 p1548 A69-21683

Electrical conductivity and Hall effect in thin evaporated bismuth films under vacuum using three point method in variable temperature cryostat 09 p1557 A69-21692

Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region [AIAA PAPER 69-381] 09 p1568 A69-21731

Carbides and silicides temperature coefficient of electrical resistivity and Hall constant plotted as function of metal carbides solid solutions concentration 09 p1523 A69-21740

Hall effect theory and devices, noting application to measurement of several physical quantities and sources of errors in devices 09 p1541 A69-22698

MHD flows in MHD generator channel under magnetic field, analyzing steady laminar flow during entry and Hall effect on conductivity temperature dependence 10 p1734 A69-23455

Turbulent plasma near stability limit in MHD generator with constant load coefficients, noting effective conductivity and effects of gas temperature 10 p1735 A69-23460

Linear nonequilibrium MHD generator operating at Mach 2 and Hall parameter of 3 using cesium seeded helium as working fluid 10 p1636 A69-23471

Large disk MHD generator operating at high Hall coefficient and driven by cesium seeded argon or molecular gases 10 p1637 A69-23473

MHD generators with segmented electrodes at high Hall parameters, noting electron density, conductivity and Hall field reduction factor 10 p1637 A69-23476

InAs thin film sensors using Hall effect to measure magnetic fields at cryogenic temperatures 10 p1696 A69-23717

Geomagnetic field directed hydromagnetic waves propagation in lower ionosphere, noting inhomogeneous conductivity, Hall effect and lines of forces role 10 p1687 A69-23926

Boundary layers influence on external electrical characteristics of MHD generator 11 p1824 A69-24221

Heat transfer in MHD parallel plate channel flow in entrance regions analyzed by Galerkin method, noting Hall current effect 11 p1923 A69-24290

Sb addition effect on electrical conductivity and Hall effect in PbTe single crystals over temperature range 11 p1939 A69-25706

Se activation energy dependence on crystals composition and Se concentration, based on Hall coefficient temperature dependence in gallium arsenic phosphides 13 p2317 A69-27875

Supplementary absorption and Hall effect temperature dependence in solid solutions of gallium arsenic phosphide 13 p2318 A69-27894

MOS transistor Hall voltage, mobility and constant verified by magnetoelectric measurements of Si p-inversion layer 13 p2323 A69-28331

N-type InSb single crystals with high dislocation density, investigating anisotropy of mobility, Hall effect and transverse and longitudinal magnetoresistance 14 p2503 A69-28734

Hall effect in semiconductors with polarons as majority carriers, noting variation with temperature of magnetic field dependence on Lorentz force 14 p2508 A69-29654

P-type zinc-tin-antimonide crystals electric conductivity, Hall coefficient and thermal EMF found similar to p-type diamond-like semiconductors properties 15 p2667 A69-30197

N type surface layer in p type sample noting effect on Hall constant and relationship to temperature 15 p2669 A69-30717

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes 15 p2669 A69-30720

Current distribution and Hall voltage in crossed fields discharge with split electrodes in nonequilibrium Ar and Cs plasmas 15 p2663 A69-30980

Hall current effect on thermal instability explaining oneself gravitating astronomical objects, discussing current effects on propagation modes 16 p2854 A69-31649

Hall effect and transverse voltages in type II superconductors in mixed state, considering cold rolled Nb-Zr alloys 16 p2827 A69-31827

Diagonal conducting wall /DCW/ MHD generator channel flows in formulation including Hall effect, electrode drop and electrode wall angle 16 p2736 A69-32172

InSb thin films prepared by flash evaporation, discussing Hall measurements at various temperatures and electron mobility dependence on film thickness 18 p3182 A69-34348

Evolutionarity of equations of MHD with Hall effect allowance for nondissipative plasma two dimensional flow 18 p3181 A69-35039

Hall mobility of photoelectrons in cadmium sulfide layers 18 p3182 A69-35048

Hot electron behavior in n-type InSb under magnetic fields at 4.2 and 1.7 K, plotting current-voltage and current-Hall voltage characteristics, etc 19 p3388 A69-36544

InSb instabilities and time dependence of transverse breakdown, performing Hall effect measurements on n-type InSb at 77 K 19 p3389 A69-36546

Conducting gas flow parameters in coaxial duct, considering magnetic nonuniformity, Hall currents and fields distortion near electrodes 19 p3381 A69-36772

Melting points, electrical conductivity, Hall constants, magnetic susceptibility, density, bending strength, microhardness and elastic modulus of zirconium nitride in homogeneity range 20 p3558 A69-37014

Hall coefficient and conductivity measured as function of temperature for liquid Au, Cu and Ag tellurides and liquid alloy systems Bi-Te and Ti-Te 20 p3584 A69-38024

Carbides and silicides temperature coefficient of electrical resistivity and Hall constant plotted as function of metal carbides solid solutions concentration 20 p3585 A69-38216

Semiconductor properties of indium telluride alloys, conductivity and Hall effect 21 p3779 A69-38580

S doped GaSb single crystals prepared by Crochral-ski method studied for temperature dependence of resistivity and Hall coefficient

21 p3781 A69-39048

Se activation energy dependence on crystals composition and Se concentration, based on Hall coefficient temperature dependence in gallium arsenic phosphides

21 p3782 A69-39141

Plasma instabilities in closed cycle MHD generator with gaseous working fluids, discussing effective Hall parameters

21 p3777 A69-39481

HF ion engine RIT 10, Kaufman ion engine ESKA, Hall effect ion engine HIT and MPD engine compared for state of development

[DGLR-69-021] 23 p4202 A69-41928

HALL GENERATORS

Book on Hall generators /magnetically controllable semiconductor elements/, discussing principles of operation, design, manufacture and applications

03 p0406 A69-13954

One dimensional analysis of stationary argon flow in linear Hall generator from continuity, momentum and energy equations, discussing electron heating and nonequilibrium ionization

10 p1736 A69-23465

Hall generator electrical characteristics, discussing plasma homogeneity, stability and shock tube priming

15 p2658 A69-30298

Hall generator for measuring mechanical displacements and vibrations of 10 A, describing operating principles and arrangements

17 p2971 A69-33022

Hall ion thruster prime propulsion system, considering low and high voltage mode in plasma source I-V characteristics

17 p3019 A69-33338

Hall generator DC brushless motors for aerospace use, discussing speed control and motor design

18 p3094 A69-35074

NT SODIUM CHLORIDES
NT SULFUR FLUORIDES
NT TITANIUM CHLORIDES
NT URANIUM FLUORIDES

Hydrogen bromide, HI and HCl effects on hydrogen-air mixtures flammability, discussing flame propagation inhibition efficiency

02 p0304 A69-12315

Halocarbon solvent for application of chlorosilane finish to heat cleaned glass fabric for reinforcement of plastic, noting relative humidity effect

08 p1341 A69-20513

Group 7A and group 8 elements alloying effect on Cr dislocation structure and mechanical properties, discussing ductile-brittle transition temperature and electronic theory

18 p3160 A69-35452

HALOGENATION

NT FLUORINATION

Flame inhibition with electron attachment observed using halogenated hydrocarbons

06 p1034 A69-17926

HALOGENS

NT BROMINE
NT CHLORINE
NT FLUORINE
NT IODINE
NT IODINE ISOTOPES

High repetition rate pulsed illuminator using electrodeless halogen discharge for rapid light extinction

04 p0599 A69-15021

Halogen concentrations in basaltic achondritic meteorites, discussing applications to rare gas and lunar surface studies

24 p4382 A69-42929

HALOPHILES

Cation concentration requirement of halophilic NADH dehydrogenase for stability and maximum activity

10 p1651 A69-23127

Salts and organic solvents effect on halophile Halobacterium cutirubrum catalase, noting enzyme activity inhibition by cation and anion

18 p3096 A69-35291

Flavoprotein/cytochrome b/559/ role as branch of Halobacterium electron transport in DPNH oxidase determined by salt dependence of reduced DPNH

20 p3484 A69-37101

HALOS

Element synthesis in stars of galactic halo as possible explanation for heavy elements presence in supermassive objects

07 p1219 A69-19296

Galactic halo chronology determination by positron component flux measurement in primary cosmic rays

08 p1386 A69-20084

Elastic and inelastic evolution of concentrated gravitational systems, discussing stellar diffusion, evaporation, halos and rotating systems

15 p2687 A69-30548

Quasar multiple absorption red shift lines caused by gas in extended galaxy halos, assuming broadened galactic cross section area

15 p2695 A69-30884

HAMILTON-JACOBI EQUATION

Gravitational fields in Hamiltonian formulation of relativistic theory of gravitation, noting geometrical aspects and equivalence to Einstein theory

02 p0280 A69-11715

Spacecraft optimum low thrust trajectory analyzed by Hamilton-Jacobi perturbation theory, obtaining canonic constants of motion

06 p1007 A69-17574

Hamilton-Jacobi equations of motion for classical electron in presence of traveling pulse of electromagnetic radiation, solving radiation pulse shape orbits

08 p1377 A69-19790

Particular solutions relative to system of invariant relationships in involution

09 p1596 A69-22049

Hamilton-Jacobi equation integrated for Hamiltonians, extending method to more than two variables case

11 p1910 A69-25747

Canonical transformation and Hamilton-Jacobi theories applied to space vehicle trajectory analysis, discussing elliptical coast arc and optimal low thrust problems

13 p2353 A69-28202

HAMILTONIAN FUNCTIONS

Transverse plasma mode excitation by nonlinear interaction analyzed by Hamiltonian function

01 p0127 A69-10280

Matrizants construction for Keplerian motions, discussing Hamiltonian character of variational equations for planar two body problem

03 p0513 A69-13779

Higher dimensional Dirac Hamiltonians from L-matrix hierarchy using dimensional eigenvector

04 p0625 A69-15275

Energy integral for holonomic system of points of variable mass, transforming Lagrangian form via Hamiltonian function

05 p0794 A69-16685

Unperturbed Hamiltonian transformation applied to existing perturbation theories for exchange forces between atoms to obtain correct long range behavior

07 p1184 A69-18288

Maximum index of exponential growth of solution of linear Hamiltonian equation with periodic operator coefficient encountered in dynamic stability of elastic systems

07 p1231 A69-18501

Superconductors with overlapping energy bands studied by nuclear magnetic resonance method

07 p1198 A69-18513

Analytic autonomous Hamiltonian differential equations with two degrees of freedom admitting unstable equilibrium point

07 p1215 A69-18732

Relativistic systems and relativistic Hamiltonian systems defined by second order equation, discussing canonical transformations conserving vector field Hamiltonian character

07 p1182 A69-19331

Final motions of Hamiltonian conservative systems, analyzing Liouville type, homogeneous and similar systems

09 p1540 A69-21882

Particular solutions relative to system of invariant relationships in involution

09 p1596 A69-22049

Canonical invariance of Hamiltonians noting nature of solutions of differential equations, existence of periodic solutions and application to three body problem

10 p1721 A69-23987

Hamilton principle for inviscid compressible fluid in Euler coordinates, analyzing shortcomings found in variational principles and model in Lagrangian coordinates

11 p1875 A69-25483

Hamilton-Jacobi equation integrated for Hamiltonians, extending method to more than two variables case

11 p1910 A69-25747

Autonomous two degrees of freedom Hamiltonian system triangular libration points found stable for all mass ratios in circular restricted three body problem

12 p2155 A69-25883

Eigenvalues of finite matrix Hamiltonian, considering convergence radius of perturbation series, limits and renormalization

14 p2470 A69-29451

Hamiltonian variational principle for stationary bounded MHD flows, choosing suitable functions and rigid conducting boundary location

15 p2660 A69-30910

Langevin equation for interacting molecule system derived by Fourier transformation of Hamiltonian, noting physical correspondence to equation for shear viscosity in monatomic liquids

16 p2815 A69-32370

Hyperfine spectrum analysis of NaCl at low field using molecular beam electric resonance method, discussing Hamiltonian function representation

16 p2815 A69-32794

Differential equations as Hamiltonian function for signal path, travel time and frequency variation in anisotropic nonpermanent absorbing medium

17 p2924 A69-33836

Variational method using Hamilton principle and calculus of variations to determine elastic curve and internal forces in static or dynamic loaded beam

22 p4043 A69-40459

Gravitational field quantization according to Einstein theory using classical Hamiltonian dynamics and quantum rules for constraints

23 p4192 A69-42332

Spin-phonon systems thermal noise, based on combined lattice and spin lattice Hamiltonian densities, applied to acoustic noise field measurements

24 p4350 A69-43061

HAMSTERS

Cultured Chinese hamster cells responses to UV light of different wavelengths indicating photon absorbing molecules inhibition of colony development

07 p1068 A69-19492

Synergistic effects of prolonged heat exposure and whole body irradiation with ionizing radiation on survival time in hamsters

08 p1263 A69-20174

Hamsters responses to helium-oxygen and nitrogen-oxygen at ambient temperatures, comparing respiration rates, weights and body temperatures
10 p1646 A69-23564

Postirradiation growth of cultured Chinese hamster cells exposed to UV light, including comparison with X irradiation
19 p3257 A69-35975

Pulmonary emphysema effect on expiratory flow limitation from static pressure-volume and flow volume curves during natural and forced deflation of hamster lungs
23 p4082 A69-41442

Body weight and organ sizes in hibernating cold and warmth adapted golden hamsters, discussing lungs, heart, kidney, pancreas and liver weight increases
23 p4084 A69-41462

Neodymium laser radiation effect on electrical and histomorphological properties of liver in rats and hamsters
23 p4111 A69-42344

HAND [ANATOMY]

Hand movements in water environment, weightlessness and normal gravity conditions, discussing inner coordinative structure and muscular efforts
17 p2915 A69-33385

Hand and thumb exercise effects on acquisition tracking task performance
23 p4101 A69-41453

HANDBOOKS

Handbook on Soviet space science research covering rockets, satellites, space probes, biomedical investigations, atmospheric composition
01 p0154 A69-10935

Handbook on metabolism and nutrition containing tables, charts and diagrams on food composition, material incorporation into organism, energy exchange and end products
04 p0553 A69-14908

Flammability handbook for plastics noting characteristics, behavior under fire conditions and various fire hazard reduction mechanisms, tables, drawings, manufacturers, suppliers, etc
04 p0620 A69-14952

Soviet handbook on stress analysis of anisotropic three layer reinforced plates and shells and of thick walled cylinders, Volume 2
04 p0683 A69-15500

Handbook of techniques in high pressure research and engineering, discussing construction materials, design and construction methods, measuring techniques, etc
07 p1137 A69-18412

HANDEDNESS

Operator handedness effect on control display movement stereotypes
02 p0203 A69-12212

HANDLING

U MATERIALS HANDLING

HANDLING QUALITIES

U CONTROLLABILITY

HANDWRITING

Manual performance of aircraft pilots under sustained acceleration using measurements of handwriting pressure
06 p0884 A69-18030

HANGARS

Aircraft engine noise reduction in test runs by sound insulating hangar
01 p0054 A69-10033

HANKEL FUNCTIONS

Hankel functions and vibration equations solutions, discussing asymptotic behavior and monotonic properties in neighborhood of ellipses
08 p1416 A69-20714

HANSEN LUNAR THEORY

Hansen planetary theory basic function, discussing perturbations expansion into trigonometric series
03 p0514 A69-13781

Satellite position perturbation due to earth oblateness using Hansen method [AIAA PAPER 69-909]
21 p3807 A69-39341

HARDENERS

Glass fiber laminates based on epoxy organosilicon resins, discussing various hardeners effects on strength, etc
19 p3358 A69-35903

Beta-thiodiglycol effect on hardening of epoxy resin with stoichiometric amounts of maleic anhydride and methyltetrahydrophthalic anhydride
22 p3973 A69-40677

HARDENING [MATERIALS]

NT CARBURIZING

NT HOT PRESSING

NT NITRIDING

NT PRECIPITATION HARDENING

NT PULSE HEATING

NT SHOT PEENING

NT SILICONIZING

NT STRAIN HARDENING

NT WORK HARDENING

Cycle dependent fatigue hardening and softening of metals in terms of crystal structure and stress amplitude
01 p0165 A69-10133

Mechanical effects of grain boundaries, considering hardening associated with vacancies and vacancy-solute interactions
03 p0449 A69-13875

Hardenability of ShKh-15 steel, establishing relationship of porosity to sintering method
04 p0619 A69-15390

Yield to ultimate tensile strength ratio of titanium alloys subjected to thermomechanical treatment
11 p1906 A69-25683

Shock hardening in Ni at high pressure observed by electron microscopy showing dominating thermal effects on microstructure
15 p2637 A69-30225

TiNi compound alloying with Al and Fe, considering effect on hot hardness at various temperatures
18 p3157 A69-35249

Titanium alloys case hardened by diffusion of various metals at high temperatures, measuring increase in wear resistance
19 p3344 A69-36153

Texture hardening combined with age hardening for biaxial strength improvement of Ti-Al-V alloy, discussing applications to spherical pressure vessels
21 p3729 A69-38662

Plastic deformation in hardened Ti alloys with thermally unstable beta phase under static compression and tensile loads by electron microscope
21 p3746 A69-39161

Creep theory with anisotropic hardening during early creep stages based on analogy with plastic flow theory
21 p3839 A69-39196

Small parameter method applied to axisymmetric problems of elastoplastic nearly spherical bodies undergoing exponential hardening process, deriving linearized expressions for boundary conditions
21 p3839 A69-39198

Enlargement of circular hole in disk with kinematic hardening and Tresca yield function compared with isotropic hardening
21 p3840 A69-39297

Bifurcation and hardening rate of rigid-plastic bodies presented on buckling of rectangular plate with lateral restraint
21 p3840 A69-39299

Strain induced creep equation for hardened materials for fixed temperature and stresses range, noting application to steel and Al alloys
22 p3971 A69-41033

Niobium solution hardening by nitrogen and oxygen, noting grain size effects in electron beam refining
23 p4178 A69-42362

HARDNESS

NT MICROHARDNESS

Al/Zn/Mg alloys preprecipitation, discussing Guinier-Preston and critical zone sizes and reversible vacancy trap
03 p0447 A69-13613

Hardness reference data for metals and nonmetals, using hardness test results for data reliability
04 p0617 A69-15033

Diamond pyramid hardness dependence on grain size of recrystallized alpha titanium
06 p0943 A69-17235

Surface finish and hardness effects on wear life of inorganic solid lubricant film [ASLE PREPRINT 68AM 7C-3]
07 p1139 A69-18623

Hard metals and materials containing NbC and HfC, noting X ray studies of pseudoternary and pseudoternary systems
14 p2464 A69-29323

Electrical conductivity, hardness, ultimate tensile strength and yield strength correlations of age hardenable Al alloys by eddy current methods
15 p2641 A69-31513

Elastomer hardness criteria ensuring maximum life and performance of rotary shaft seals
16 p2794 A69-32432

Extrusion variables influence on microstructure and hardness level of Ti-Al-Sn compared with recrystallization behavior after cold swaging [ASM PAPER W9-8.2]
21 p3729 A69-38660

HARDNESS TESTS

Structural transformations of quenched Fe-Ni-Nb austenitic alloy from X ray diffraction microstructure examination and hardness measurements
01 p0095 A69-10603

Silica glass hardness relationship to pressure induced densification at low temperatures
03 p0453 A69-13616

Hardness reference data for metals and nonmetals, using hardness test results for data reliability
04 p0617 A69-15033

Impact hardness of materials determined by Droz method of static hardness determination, noting tests on steel
10 p1801 A69-23850

Electrical conductivity measurements combined with indentation hardness measurements for non-destructive evaluation of commercial precipitation hardenable aluminum alloys
12 p2114 A69-26307

Mechanical properties of glass, discussing volume flow, hardness, strength and scratchability
12 p2119 A69-26831

Ni-Ti maraging steel hardness impact strength and thermal EMF changes during quenching
19 p3345 A69-36154

Titanium alloys hardness indirect measurement by determining electrochemical potential
23 p4177 A69-41598

HARDWARE

Low thrust mission simulation dependence on hardware definition, discussing power plant characteristics, jet velocity and thruster efficiency
09 p1584 A69-21204

Hardware and software as single entity in small scale programs, describing English language oriented program code of Controller/Programmer/Evaluator
11 p1864 A69-25062

Electronic module testing with integrated hardware/software system, noting module test console and manual capabilities
11 p1864 A69-25065

Hardware-software interface defined for design of computer controlled test system, discussing criteria for designing economical systems
11 p1842 A69-25071

Hardware limitations on communications, instrumentation and data handling for manned deep space missions
13 p2219 A69-27666

Avionic subsystems warranty costs estimates, considering reliability prediction and hardware recycling
18 p3232 A69-34506

Environmental testing of space hardware, discussing failure detection by thermal vacuum tests and mechanical signature analysis
19 p3430 A69-36009

Computer memory reduction through Fortran higher level language, discussing tradeoff between costs saved and additional logic hardware [AIAA PAPER 69-963]
22 p3905 A69-40344

Software/hardware interface testing of real time system, including possible improvements to computer program management flow
22 p3908 A69-40364

HARMONIC ANALYSIS

NT TESSERAL HARMONICS

NT ZONAL HARMONICS

Algorithm computing spherical harmonic coefficients for eccentric geomagnetic dipole potential
02 p0245 A69-12735

Matrix-harmonic method for vibration study of mechanisms and machines
03 p0468 A69-13860

Matrix-harmonic method of vibration study extended to include autonomous vibrations of single degree of freedom machines
03 p0468 A69-13861

Fourier transform method to measure two point correlations in grid generated turbulence
03 p0419 A69-13950

Harmonic balance method to investigate phase locked oscillator stationary modes
04 p0559 A69-15138

Harmonic analysis of magnetic storms initial phases having steep leading edges and distinct steady portions, showing homogeneity in first approximation
10 p1688 A69-23938

Nonpolar LF latitude variations based on spectroscopic and harmonic analysis of zenith telescope and prismatic astrolabe observations
11 p1956 A69-24401

Resonance circuit application to harmonic analysis of periodic functions on analog computer, considering transient period and sequential order
12 p2123 A69-26718

Linear closed loop control systems with periodically varying parameters analyzed by harmonics method using Fourier transforms
12 p2054 A69-26720

Drift velocity of earth magnetic field based on spherical harmonic analysis of geomagnetic secular variation
12 p2077 A69-27111

Lunar topography harmonic analysis, noting sample point density and evenness variations effects on estimated coefficients
13 p2344 A69-27647

Three dimensional harmonic dispersion analysis of incremental waves in uniaxially prestressed plastic and viscoplastic bars, plates and unbounded media
13 p2363 A69-28125

Spatial harmonic spectrum and tangential field distributions in microwave devices showing separation of higher harmonics through delay structure
13 p2236 A69-28576

Atmospheric pressure variation coefficients computation based on harmonic analysis of wave behavior
13 p2295 A69-28648

Geomagnetic normal fields determination using spherical harmonic analysis, including extension to local fields
14 p2437 A69-29063

Moon figure determined by DOD-66 Selenodetic Control System compared with second surface harmonic using computer analysis
14 p2527 A69-29942

Sinusoidal perturbation extremal control system stability, using harmonic balance principle to obtain periodic solutions of system differential equations
15 p2582 A69-30616

Harmonic analysis for computing diffusing matter with periodically varying surface concentration applied to electrical insulants degradation by atmospheric moisture
15 p2592 A69-31057

Geopotential represented in ellipsoidal harmonics, discussing Lamé functions generation and rectangular-ellipsoidal coordinates relation and orbital elements perturbations
15 p2599 A69-31333

Solar quiet day geomagnetic variations harmonic analysis with respect to time intervals centered around noon, defining parameters responsible for modulated Sq
16 p2781 A69-32452

Higher harmonic pitch angle inputs to eliminate oscillatory helicopter blade root shear determined through teetering rotor model
18 p3089 A69-35233

First harmonic approximation method reformulated to interpret nonlinear characteristic directly, discussing oscillation stability of servosystems
19 p3287 A69-36709

Geomagnetic field lines coordinates calculation based on coefficients obtained in spherical harmonic analysis
20 p3522 A69-37060

Self excited oscillations in systems with one linearity symmetrical with origin determined by harmonic balance method
21 p3685 A69-38463

Diurnal variations of cosmic ray neutrons corrected for barometric and temperature effects by harmonic analysis
21 p3791 A69-38840

Rectangular dielectric waveguide propagation modes, describing computer analysis based on electromagnetic field expansion in circular harmonics series terms
24 p4288 A69-43330

Nonpolar LF latitude variations based on spectroscopic and harmonic analysis of zenith telescope and prismatic astrolabe observations
24 p4391 A69-43791

HARMONIC EXCITATION

High efficiency punch-through avalanche transit time diode for generating microwaves over three octaves
07 p1098 A69-18457

Forced vibrations of elastic beam covered by viscoelastic layer subjected to transverse harmonic excitation
10 p1800 A69-23241

Nonstationary vibrations of mechanical systems subjected to harmonic or external limited energy source excitations
11 p1975 A69-24739

Linear automatic control system floating response to harmonic effects achieved by coinciding open loop system transfer function poles with disturbance pattern poles
12 p2045 A69-25967

Emission from solutions of organic luminophores excited by harmonics of Q switched neodymium laser
12 p2104 A69-26030

Infinite isotropic elastic plate vibration under vertical harmonic load, deriving vertical displacement at center of loaded area
17 p3058 A69-33408

Nonlinear flexural vibrations excitation in cylindrical shell by longitudinal harmonic load, discussing solution of partial differential equations of motion
17 p3064 A69-33920

Single freedom vibratory system response to imposed displacement harmonic excitation, analyzing response in terms of constrained system modes
17 p3067 A69-34139

DYDRA data logger for dynamic measurements of pressure distributions on harmonically excited wind tunnel models, noting use as general transfer function analyzer
19 p3293 A69-35746

Numerical method for solution of nonlinear systems applied to damped and undamped motion with symmetrical and asymmetrical elasticity under harmonic excitation
22 p4040 A69-39937

Three layered circular plate under harmonic excitation, analyzing forced vibrational characteristics by variational principle and Ritz method
23 p4236 A69-42495

HARMONIC FUNCTIONS

Two dimensional elasticity problem for two zero tangential stresses, expressing stress-strain states by biharmonic and harmonic functions
02 p0341 A69-12198

Green functions associated with electromagnetic radiation in moving medium, finding time dependent and harmonic Green functions
03 p0466 A69-13352

Approximation for discretization error of discrete analog of Bergman harmonic kernel, discussing discretization error in Dirichlet and Neumann problems for Laplace equation
03 p0456 A69-13555

Statistical dynamics of turbulent incompressible fluid, discussing harmonic function in Navier-Stokes equation
08 p1303 A69-20323

Partial derivatives of harmonic and biharmonic functions at surface of cylinder for three dimensional problem in elasticity theory, considering displacement vector
11 p1976 A69-24777

Conservative system /with two degrees of freedom/ motion in plane harmonic force field with potential satisfying Laplace equation, discussing graphic trajectory construction
11 p1920 A69-25745

Cauchy problem for initial functionals, determining spherical limiting harmonic function for solution stabilization
13 p2375 A69-27795

Polyharmonic Gq functions derivation and applicability to three dimensional elasticity theory equations solutions
13 p2369 A69-28522

Statistical dynamics of turbulent incompressible fluid, discussing harmonic function in Navier-Stokes equation
17 p2952 A69-33313

Linearized dispersion equation for isotropic electron plasma without external fields solved by harmonic function model
21 p3775 A69-38564

Electron plasma velocity distribution function determined from dispersion equation by harmonic function analog
21 p3776 A69-38565

HARMONIC GENERATIONS

Optimum coupling for intracavity second harmonic generation in multilevel lasers
01 p0089 A69-10181

Microwave second harmonic, sum and difference frequencies generation for two different microwaves normally incident on low temperature semiconductor slab in DC field
01 p0137 A69-10334

Efficient conversion of Q switched neodymium-glass laser output into second harmonic obtained for low output levels at fundamental frequency
03 p0437 A69-13046

Q switched neodymium-glass laser output conversion into second optical harmonic by passing beam through double Galilean telescope with adjustable focus
03 p0438 A69-13048

Aperture effects in nonlinear optical processes associated with second harmonic and parametric generation of light
03 p0439 A69-13056

Second optical harmonic generation in uniaxial negative potassium dihydrogen phosphate, noting influence of generating process on angular structure and output power
03 p0439 A69-13057

Second harmonic generation in ternary semiconductor compounds
03 p0489 A69-13894

Nonlinear optics noting harmonic generation of light, optical modulation, parametric oscillators, stimulated scattering, self focusing of light and resonance phenomena
05 p0770 A69-15704

Harmonic generation of S band signal inside plasma column at resonance
06 p0965 A69-17488

Emission of Nd giant pulse laser with high repetition rate and peak power to generate second harmonic radiation in lithium niobate single crystals
07 p1144 A69-18469

Phase matched optical harmonic generation by anomalous dispersion in liquid media, using dye fuchsin red
07 p1155 A69-19086

Frequency modulation of CW mm-wave IMPATT diode oscillator with wide band tunability and related harmonic generation effects
07 p1106 A69-19146

Impacting oscillatory devices for use as mechanical frequency dividers
07 p1136 A69-19458

Second harmonic generation in laser crystals by Gaussian beams of finite aperture
07 p1158 A69-19756

Harmonic generation in microwave gas discharge in pure and air mixed gases, noting rare gases failure in power source applications
08 p1283 A69-20177

Second harmonic generation conversion efficiencies at 5300 A with KDP and lithium niobate crystals, using Nd-glass laser of high radiance and narrow bandwidth
09 p1514 A69-21333

Nonlinear control theory for constant temperature hot-wire anemometers with large velocity fluctuations, noting second harmonic generation
09 p1493 A69-21421

Picosecond structure of low power laser signals using calcite beam splitter and potassium diphosphate second harmonic generator
09 p1516 A69-21742

Laser pulse picosecond substructure measurements, using pulse compression and second harmonic generation techniques
10 p1703 A69-23514

Second harmonic generation in ternary semiconductor compounds
11 p1939 A69-25695

Microwave harmonic generation in plasma capacitor, considering power resonances dependence on electron temperature and density
12 p2037 A69-25939

Second harmonic conversion of giant pulse Nd laser emission related to beam divergence and space-time distribution of radiation, noting energy relationship
12 p2104 A69-26022

Cyclotron harmonic waves /CHW/ nonlinear decay instability and parametric amplification, considering applicability to practical amplifiers
12 p2135 A69-26314

Nonlinear crystal generated second harmonic power measured for multimode He-Ne 0.63 micron self locked laser
12 p2106 A69-26321

Harmonic generation, using nonlinear current-voltage characteristics of Gunn diodes at 9500 MHz frequency
13 p2226 A69-27235

Nonlinear generation of sum and difference frequencies in ionized plasma current densities by nonuniform microwave fields noting electron scattering
14 p2507 A69-29350

Laser-nonlinear crystal dynamical interactions, studying saturation and coherence properties of second harmonic wave generated inside laser cavity
15 p2632 A69-30026

TR tubes spurious harmonic power generation investigated for intersystem interference reduction and design criteria, discussing effects of incident power, gas pressure and tube geometry

15 p2573 A69-30032

Capacitive parametric modulator transient processes and second harmonic effect analysis, obtaining transient response and recovery time

15 p2574 A69-30125

Mesa-structure varactors /p-n junction generating harmonics by nonlinear capacity variation/reliability, determining selection criterion and optimal test duration period

15 p2627 A69-30839

Microwave field-plasma slab nonlinear interaction in rectangular waveguide, analyzing current and electron density and second harmonic TE and TM power

16 p2749 A69-31703

Linearized Boltzmann equation in kinetic theory for weakly ionized plasma electrons under alternating electric and circularly polarized magnetic field, noting higher harmonics generation

16 p2820 A69-31752

Cosmic ray second harmonic daily variations explainable by symmetrical gradient rising away from solar equatorial plane

16 p2850 A69-32304

Nonlinear Maxwell equations applied to non-monochromatic emission for nonlinear crystal situated in resonator, examining generation of second optical harmonic

19 p3332 A69-35869

Second harmonic generation in media with center of inversion following deformation by laser beam or static pressure

19 p3332 A69-35872

Optical mixing and harmonic generation in semiconductors, discussing magnetoconductivity tensors and magneto-optical phenomena due to free carriers

19 p3385 A69-36519

Second harmonic radiation generation in nonlinear dielectric by broadband short pulse optical signals

19 p3278 A69-36693

Second harmonic emission in KDP crystal using ruby rod as active material, discussing difficulties encountered by diffused reflector

20 p3552 A69-36970

Nonmonochromatic laser emission frequency characteristics, studying second harmonic generation in nonlinear KDP crystal

20 p3554 A69-37727

Simultaneous mode locking of Nd YAG laser and intracavity second harmonic generation in high temperature Li niobate or BaNa niobate

20 p3555 A69-37731

Time characteristics and second harmonic of radiation of Nd laser containing lens systems, producing second harmonic in KDP crystal

21 p3740 A69-39544

Second harmonic influence on traveling wave amplifier operation employing distributed nonlinear active medium

22 p3916 A69-40963

Beam divergence and multimode laser visible emission influence on power and angular structure of second optical harmonic generated in KDP crystals

24 p4328 A69-43161

Ruby laser second harmonic generation statistical characteristics with dielectric surface scatterer, showing variety of modes and high cross sectional stability

24 p4328 A69-43164

HARMONIC GENERATORS

Second harmonic generation by electromagnetic wave incident on inhomogeneous plasma, determining power output

10 p1653 A69-23133

Synchronized microwave harmonic energy generation by filtering using DC step source feeding modified pulse forming network

12 p2041 A69-26630

Far IR radiation generation, considering incoherent sources, harmonic generators, electron tubes, relativistic electrons and quantum oscillators

22 p3982 A69-40669

Frequency discrimination in optical harmonic generators, discussing spectral width of wideband laser for supershort pulses and spectral device, using frequency dependence of mode locking direction

22 p3965 A69-40964

HARMONIC MOTION

NT SIMPLE HARMONIC MOTION

Three dimensional periodic boundary layer on ellipsoid in harmonic motion at given angle of attack, using successive approximations

15 p2548 A69-31008

Wave propagation in rectangular guides, determining dispersion curves by continued fractions method allowing for infinite set of time-space harmonics

17 p2925 A69-33843

Reflection and transmission coefficients for harmonic electromagnetic wave incident at parabolic layer of stratified isotropic plasma

22 p3901 A69-41020

HARMONIC OSCILLATION

Self sustained oscillations of piston type valving system with conduit line at upstream and capacity at downstream

01 p0012 A69-10310

Single frequency oscillations in stochastic quasilinear differential equations with delay

01 p0170 A69-10825

Superposition of discrete number of collinear amplitude modulated harmonic oscillations

02 p0281 A69-12252

Statistical characteristics of random phase quasi-harmonic process investigated for application of mathematical representation

02 p0208 A69-12263

Pulsar hypothesis based on oscillating white dwarf surrounded by hot rarefied corona to explain radio emission

03 p0505 A69-13077

Time harmonic vibrations and wave propagation in laminated plate, using elasticity theory equations and continuum theory for layered medium

04 p0675 A69-14685

Blade oscillations in cascade flow of axial turbomachinery calculated as function of pitch ratio, stagger angle, angle of attack and camber [ASME PAPER 68-FE-7]

05 p0837 A69-16069

Ion plasma oscillations harmonics in helium plasma produced by back diffusion source, relating harmonics amplitude to electron density

05 p0804 A69-16459

Harmonic oscillations for systems of two differential equations, analyzing relative and global boundedness for solutions

05 p0788 A69-16479

Harmonic oscillations in tunnel diode circuits for three intersection points of loadline with characteristic curve, discussing larger total positive circuit resistance case

06 p0898 A69-17801

Frequency doubling due to nonlinear response from Zeeman levels of ruby, discussing output and paramagnetic resonance

07 p1144 A69-18471

Nonstationary aerodynamic load for harmonically oscillating body in fluid flow with constant mean velocity measured, determining errors as functions of system parameters

07 p1050 A69-18752

Space harmonics effect on helical TWT design, discussing operating voltage, beam radius, perveance and maximum allowable gain

07 p1105 A69-18950

Diurnal thermal wave form driven by harmonically oscillating ground temperature in nongray atmosphere, calculating results for terrestrial and Martian atmospheres

07 p1126 A69-19036

Anharmonic lattice vibrations, specific heats and coefficient of linear expansion of solids at high temperatures, noting interatomic spacing

10 p1809 A69-23653

Tracking filter steady state oscillation amplitude and phase distributions determined from Fokker-Planck equation for high and low noise levels

11 p1844 A69-24441

Solar atmosphere five minute oscillations observed by Frazer divided into two harmonic atmospheric model for studying oscillation region height and mean temperature

13 p2343 A69-27627

Minimum weight design of structures excited to harmonic vibrations by given single load, with intensity dependent on time

13 p2369 A69-28350

Spatial harmonics of harmonic frequency instabilities of cyclotron half frequency in system of two symmetrical electron beams confined by magnetic field

13 p2314 A69-28364

Current harmonics in triode klystron for frequency multipliers, noting modulation voltage

13 p2234 A69-28510

Pulsar hypothesis based on oscillating white dwarf surrounded by hot rarefied corona to explain radio emission

14 p2515 A69-28759

Inelastic scattering cross sections calculated, comparing results for various nuclear states expressed as Wood-Saxon radial and harmonic oscillator functions

14 p2504 A69-29001

Oscillation spectrum with harmonic phase frequency modulation, analyzing structural dependence on initial phase

14 p2412 A69-29421

Plasma surface HF harmonic oscillations amplitude determined by comparing side frequencies intensities of reflected microwave signal

14 p2497 A69-29770

Circular curved foil steady oscillations near screen in sem infinite space filled with incompressible fluid transformed into equivalent linearized problem

15 p2547 A69-30577

Calculation of natural twisting and bending vibrations of beam with characteristics varying along length

16 p2873 A69-32131

Aerodynamic forces acting on harmonically oscillating thin profile in stalled plane parallel flow of ideal incompressible fluid

16 p2732 A69-32141

Aircraft and missile dynamic characteristics for heavy loads and large heat flux, noting small harmonic vibrations of heated structures in plastic domain [ICAS PAPER 68-38]

17 p3061 A69-33588

Forced harmonic oscillations of one dimensional mechanical girder systems allowing for nonlinear resisting forces calculated by boundary value problem reduction to Cauchy problem

17 p3064 A69-33917

Higher harmonic pitch angle inputs to eliminate oscillatory helicopter blade root shear determined through teetering rotor model

18 p3089 A69-35233

Plane LF oscillations of eccentric cylinder under harmonic pressure applied to lateral surfaces, noting natural oscillations

18 p3226 A69-35388

Electrohydraulic servomechanism harmonic response showing nonlinear behavior, including jump resonance, analyzed by mathematical model and analog simulation

20 p3464 A69-36999

Slender profile oscillations in subsonic flow near solid boundary, calculating pressure gradients by dipole method

23 p4058 A69-41717

HARMONIC OSCILLATORS

Quasi-sinusoidal tunnel diode oscillator studied for frequency and amplitude of harmonic voltage components

01 p0038 A69-10076

Transition probabilities for collinear collision of particle with harmonic oscillator, noting reasons for discrepancy in Jackson and Mott form

01 p0124 A69-10681

Nonisothermal space charge wave analysis of transit time mode oscillations in bulk GaAs, studying device reactance at given negative resistance

02 p0299 A69-12240

Unsteady hydromagnetic flow of viscous electrically conducting incompressible liquid over infinite conducting harmonically oscillating plate

04 p0638 A69-15091

Synchronization problem for quasi-harmonic oscillator with nonlinearity in form of cubic parabola discussing existence and stability of periodic solutions

04 p0578 A69-15131

Temperature sensitivity of frequency of integrated oscillators, giving design method for achieving temperature compensation

07 p1103 A69-18888

Gunn effect cavity controlled generator oscillations noting phase trajectory closing conditions dependence on resonant mode parameters

09 p1468 A69-22559

Tunnel diode harmonic mode mixer having IF oscillator with single and double resonant circuit

14 p2424 A69-29766

Computer model for avalanche transit time diode oscillator with single and double resonant circuit

15 p2577 A69-30611

Nonlinear differential equations for nonequilibrium gases with internal degrees of freedom, considering spatially homogeneous gas and oscillatory relaxation in harmonic oscillators

18 p3122 A69-34911

Stochastic motion in linear lattice of coupled harmonic oscillators analyzed by Schroedinger coordinates and Bessel functions for time behavior, energy flow and impurity effect

19 p3374 A69-36757

Condensation dynamics of atom by solid body model consisting of one dimensional chain of harmonic oscillators
21 p3775 A69-39557

HARMONIC RADIATION

Electron cyclotron harmonic waves in magnetoplasma irradiated by external microwaves
01 p0127 A69-10335

Laser based on xanthene series dyes and excited by neodymium laser second harmonic radiation, noting radiation spectra
06 p0932 A69-16914

Harmonic ion cyclotron waves shown to possess stop and passband characteristics, supporting quasi-static ion cyclotron mode theory
06 p0970 A69-17953

Epithermal microwave radiation from plasma produced by PIG Reflex in magnetic field with mirror geometry, discussing radiation at harmonics of electron cyclotron frequency
08 p1370 A69-21019

Nd-doped glass pulsed laser with selected second harmonic radiation and KDP crystal frequency converter operating T 12Hz and 530 nm
12 p2108 A69-26594

Angular structure of second optical harmonic for cylindrical lens focusing of ND laser beam into negative KDP crystal
17 p2981 A69-33110

ELF noise band observed by Alouette 2 receiver interpreted in terms of electrostatic proton cyclotron harmonic waves, using digital power spectrum techniques
20 p3497 A69-38079

Layer model of random discrete inhomogeneities used to derive harmonic wave one dimensional scattering field and mean square of field
21 p3673 A69-38993

Mutual impedances of radiators in periodic and doubly periodic rod antenna arrays with orthogonal harmonics current distribution, noting diffraction theory applications
21 p3682 A69-39126

HARMONICS

NT HARMONIC EXCITATION
NT HARMONIC GENERATIONS
NT HARMONIC OSCILLATION
NT SIMPLE HARMONIC MOTION
NT SPHERICAL HARMONICS
NT SUPERHARMONICS
NT TESSERAL HARMONICS
NT ZONAL HARMONICS

Second harmonic cosmic ray daily variation, discussing density gradient model with particle diffusion along field direction
02 p0305 A69-11422

Uniaxial loading effect determination by change of harmonics amplitude of inductive pickup signal
05 p0763 A69-15995

Resonance in fundamental harmonic identified with Pc4 and in second harmonic with Pc3 geomagnetic pulsations
06 p0921 A69-17737

Base pressure fluctuations behind cone in supersonic gas flow, noting complicated superposition of harmonics associated with various factors
09 p1431 A69-22237

Solar and lunar/solar harmonics determination, noting effects of moon on values of horizontal magnetic component
11 p1965 A69-25555

Laser harmonic frequency measurement application to absolute frequency determination of 84 micron heavy water laser
17 p2982 A69-33406

Ionospheric VLF electrostatic noise observed by sounding rocket, noting proton gyrofrequency harmonics effects within emission attenuation bands
21 p3714 A69-38550

Modulation envelopes, tables of profiles and harmonic components for modulated waves in electrical and communications problems
21 p3673 A69-38778

HARTMANN FLOW

Axisymmetric MHD flow in turbulence chamber at large Hartmann numbers studied for flow boundary layer effects
01 p0130 A69-10772

Axial magnetic field effect on steady linear Ekman boundary layer
03 p0474 A69-13141

Prigogine evolution criterion extended to MHD, considering Hartmann flow
07 p1188 A69-18267

Effective Ohm law for inhomogeneous weakly ionized gas and Hartmann flow analysis, noting electron density fluctuation effect on conductivity
10 p1735 A69-23462

Hartmann problem for motion of electroconductive fluid in homogeneous porous medium, modifying classical MHD equations by introduction of velocity of filtration
11 p1925 A69-24324

Steady state flow of viscous conducting liquid in inlet of channel with or without transverse magnetic field, emphasizing approach to Hartmann- Poiseuille patterns downstream
12 p2138 A69-26626

Laminar-turbulent transition in MHD channel in transverse and longitudinal magnetic fields, discussing Reynolds equation for large Hartmann numbers
13 p2307 A69-27500

Turbulent Hartmann flow between planes in perpendicular magnetic field including flow velocity profile measurements
14 p2500 A69-29908

Temperature distributions and heat transfer in thermal entrance region for Hartmann liquid flows under constant pressure gradient between parallel electrically conducting walls at rest
21 p3847 A69-38442

Turbulent Hartmann flow between rough walls in transverse magnetic field, determining field influence on resistance coefficient
22 p3989 A69-40255

HARTREE-APPLETON APPROXIMATION
U HARTREE APPROXIMATION

HARTREE APPROXIMATION
Dipole shielding factor in coupled Hartree-Fock approximation for atomic S state
02 p0281 A69-12179

Approximation formulas of Appleton-Hartree equations for nighttime medium wave frequency absorption in E region of ionosphere, discussing electron density
07 p1122 A69-18295

Hartree-Fock calculations of coronal forbidden transition lines in Ar I isoelectronic sequence, obtaining wavelengths, magnetic dipole and electric quadrupole transition probabilities
08 p1385 A69-20071

Polarized Hartree-Fock model computing photoionization cross sections for Li isoelectronic sequence, listing phase shifts for partial waves of scattered electrons
11 p1922 A69-25260

Upper bounds for electromagnetic transition rates for Ne 20 determined using Hartree-Fock wave functions
18 p3177 A69-35166

Hartree-Fock calculations for wavelengths of K alpha X ray transitions, tabulating configuration and term energies, dipole integrals and relative multiplet strengths
22 p3984 A69-40156

Variational principle for stability of galaxies models, developing perturbation potential in terms of operator similar to Hartree-Fock exchange operator
22 p4022 A69-40468

Approximate expressions derived from Appleton-Hartree magnetospheric formula tested for validity in computation of radio wave absorption in model ionospheric layers
23 p4126 A69-42354

HARTREE-FOCK APPROXIMATION
U HARTREE APPROXIMATION

HASTELLOY (TRADEMARK)
Time and temperature effects on corrosion and structure of Hastelloy alloy C-276
14 p2466 A69-29930

Thermal stability of Hastelloy Alloy C-276 determined from time and temperature tests for corrosion and grain boundary precipitation
16 p2799 A69-31719

Minor elements effect on cracking sensitivity of weld heat affected zone in Hastelloy alloy X, noting hot tearing and midrange cracking
22 p3967 A69-39881

HAWAII
Seismic refraction study of internal structure of volcanic cinder cone
02 p0236 A69-11465

HAWKER HUNTER AIRCRAFT
U F-2 AIRCRAFT

HAWKER P-1127 AIRCRAFT
U P-1127 AIRCRAFT

HAWKER SIDDELEY AIRCRAFT
NT BUCCANEER AIRCRAFT
NT DH 121 AIRCRAFT

NT F-2 AIRCRAFT
NT P-1127 AIRCRAFT

Nimrod maritime reconnaissance aircraft, discussing high speed high altitude transit flights
05 p0702 A69-15885

HAWKEYE AIRCRAFT
U E-2 AIRCRAFT

HAZARDS
NT AIRCRAFT HAZARDS
NT FLIGHT HAZARDS
NT METEOROID HAZARDS
NT OPERATIONAL HAZARDS
NT RADIATION HAZARDS
NT TOXIC HAZARDS

Emergency oxygen supply systems for aircraft, discussing simplicity, standardization, safety, reliability and maintenance
01 p0013 A69-11025

Deficiencies in two hazard classification system for detonating and fire producing materials from analysis of chemical industry accident fatality statistics
04 p0645 A69-14471

Wedge shaped charge technique for evaluation of detonation hazards of liquid explosives
04 p0646 A69-14479

Tires tested for road hazards, noting correlation to population density and rainfall
09 p1480 A69-22735

Qualitative and quantitative hazards analysis of potential accidents/incidents in Post Boost Propulsion System with hypergolic propellants, considering recovery
10 p1753 A69-22972

Safety requirements of test ranges, considering RF hazards to electroexplosive devices
10 p1751 A69-23019

Noise as public health hazard - Conference, Washington, D.C., June 1968
14 p2541 A69-29149

Noise measurement and scales in studying psychological and nonauditory physiological effects on human functioning
14 p2485 A69-29150

Physical and physiological hazards of cryogenic liquids, emphasizing fire and explosion problems associated with storage and handling
17 p3017 A69-33684

Accelerated temperature tests, calculating temperature behavior of hazard rates and activation energy from failure data using computer simulation
18 p3117 A69-34509

HAZE
Atmospheric haze effect on Umkehr measurements, considering computation from direct sounding of vertical ozone distribution and from model atmospheres
08 p1308 A69-20316

Radiation attenuation in hazy lower atmosphere, calculating attenuation coefficients and using spherical model of haze particles and empirical formula for haze spectra
11 p1913 A69-25571

Multiple light scattering solutions accuracy by diffraction peak omission from cloud and haze analytic phase functions compared for optically thick and thin planetary atmospheres
17 p3032 A69-33159

HC-1 HELICOPTER
U CH-47 HELICOPTER

HD-1 GROUND EFFECT MACHINES
U HOVERCRAFT GROUND EFFECT MACHINES

HEAD (ANATOMY)
NT CRANIUM
NT OCCIPITAL LOBES
NT SKULL

Head injury clinical and laboratory long term follow-up data, discussing conscious state alterations, focal neurological deficit, EEG abnormalities, etc
01 p0022 A69-11346

Head injuries evaluation in aircraft, noting motor cycle accidents
10 p1649 A69-23378

Civil pilots medical certification after head trauma, evaluating current methods efficiency
23 p4086 A69-41687

HEAD (FLUID MECHANICS)
Jet pump head rise deterioration parameter for prediction of cavitation
05 p0745 A69-15791

HEAD (PRESSURE)
U PRESSURE HEADS

HEAD FLOW

HEAD FLOW

Streak photographs by differential interferometer to study head wave standoff in shock tubes as function of time
18 p3085 A69-34473

HEAD MOVEMENT

Head movements controlled for rapid vestibular adaptation in slow rotation room (SRR), preventing motion sickness
17 p2908 A69-33178

Spacecraft rotation and astronaut head and body motion as stimuli for vestibular analyzer function study during weightlessness
20 p3473 A69-37275

Hearing movement affecting visual and kinesthetic localization accuracy, discussing free and fixed head conditions
24 p4275 A69-43118

HEALTH

NT MENTAL HEALTH

Aeronautical health service problems relating to efficiency of military and civil aviation personnel of all nations
12 p2023 A69-26490

Physical activity programs in industry for selected employees as routine component of occupational health programs
21 p3663 A69-38919

HEARING

NT ACOUSTIC FATIGUE

Hearing errors in voice communication with radio telephone, noting effects of mean syllable number and consonants per syllable in pilots and controllers
06 p0891 A69-18034

Auditory analyzer functional changes due to prolonged slow rotation
20 p3470 A69-37251

Hearing at LF, comparing noise and tone thresholds
21 p3664 A69-38986

Human hearing and vision mathematical simulation, relating signal perception parameters to corresponding adaptation processes
23 p4109 A69-41979

Dynamic reactions of mathematical model representing vision and hearing process adaptation
23 p4110 A69-41984

Hearing adaptation measurements after aircraft noise stresses for estimation of induced noise damage
23 p4110 A69-42051

Stimulus correlated with neuronal discharge periodicities in colliculus inferior, deriving structure models, discussing acoustic channel below geniculum mediale
23 p4096 A69-42089

Sound evoked DC changes on intact skull of adult humans using data from AgCl electrodes, investigating intensity function, analyzing data by computer
23 p4098 A69-42101

Flight personnel hearing tests per ICAO recommendations and flight safety requirements, using tonal audiogram and vocal audiometric test
24 p4277 A69-43377

HEARING LOSS

U AUDITORY DEFECTS

HEART

NT CARDIAC AURICLES

NT CARDIAC VENTRICLES

NT MYOCARDIUM

Phosphodiesterase activity of anterior pituitary, median eminence, heart and cerebral cortex of rat, studying effects of caffeine, theophylline and hydrocortisone
02 p0199 A69-11885

Analytic model resembling thick walled ellipsoid of revolution incorporating three dimensional shape of human left ventricle and ventricular wall thickness effects
12 p2022 A69-26235

EKG during electrical defibrillation of heart in immobilized dogs
19 p3257 A69-36168

Hypoxia tolerances in nitrogen dilution chamber of chickens at sea level and high altitudes, discussing role of hematocrit and heart mass
22 p3874 A69-40214

Physical exercise effect on adolescent males, comparing oxygen uptake, heart volume and height in training and nontraining groups
23 p4077 A69-41312

Critical oxygen pressure dependence on buffer in diluted heart muscle sarcosome suspensions and effect of hemoglobin or myoglobin
23 p4080 A69-41427

Noradrenalin release from hearts of open chest dogs given artificial respiration upon occlusion of left descending coronary artery
23 p4092 A69-42053

Gravitational stress effect on heart and venous system, discussing digital computer model simulating pressure changes under head-up and down tilt
24 p4271 A69-42783

Pneumatic driving system for heart assist or total replacement pumps, discussing design features and performance characteristics
24 p4273 A69-42983

HEART DISEASES

Cardiovascular disease incidence among airline flight deck personnel in relation to increase in average age of personnel
06 p0875 A69-17848

Airline pilot incapacitation by death or terminal collapse due to organic causes while on duty, noting incidence and resulting accidents
06 p0883 A69-17849

EKG signal transmission to hospital during cardiac patient transportation by emergency vehicle, noting prototype system construction and tests
19 p3262 A69-36271

Increased tolerance of orthostatic stress in heart failure patients
19 p3258 A69-36374

Coronary angiography for evaluating cardiac problems of aircrew, giving case histories and clinical and laboratory findings
19 p3263 A69-36461

Clinical data on ambulant airmen with complete left bundle branch block discovered on electrocardiogram, finding majority with evidence of organic heart disease
19 p3263 A69-36463

Cardiovascular illnesses incidence among airline flight personnel, discussing coronary insufficiency detection
21 p3661 A69-39271

Chronic congestive heart failure in dogs compared to pulmonary system, discussing effect on cardiac lymphatics
23 p4078 A69-41364

Reflex activity of single preganglionic sympathetic fibers during coronary occlusion in cats, discussing left third thoracic /T3/ ramus communicans
23 p4084 A69-41460

Serial ECG change from normal conduction to right bundle branch block in 59 patients without overt cardiac disease
23 p4085 A69-41677

Cardiac myosin characteristics obtained from dogs with naturally occurring heart failure, showing reduced adenosinetriphosphatase activity as compared with normal dogs
24 p4258 A69-42630

Blood viscosity as possible key factor in physiology and pathology of circulation, suggesting causes of myocardial infarction and coronary occlusion
24 p4261 A69-42725

Abnormally slow ultrasound diastolic slope detected by mitral valve motion study in patients with clinically pure mitral insufficiency
24 p4261 A69-42727

Risk factors in coronary diseases modified to provide base for estimating achievable mortality magnitude reduction
24 p4262 A69-43059

Airline pilots simulated incapacitation involving myocardial infarction or cerebrovascular accident, discussing effect on crew behavior during flight task performance
24 p4277 A69-43386

Heart murmurs frequency analysis on patients to improve detection of aortic insufficiency in presence of mitral stenosis
24 p4279 A69-43800

HEART FUNCTION

Left ventricle rapid filling period measurement from rapid filling wave of apexcardiogram, noting possible influences of age and sex
03 p0376 A69-14081

Bloodless heart flow measurement methods, noting simultaneous external recording of carotid and femoral pulses and impedance plethysmography
09 p1448 A69-22730

Psychic stress effect on physiological parameters of helicopter pilots during critical flight situations, considering biotelemetric examination of heart and circulatory systems
11 p1829 A69-24347

Myocardial changes in rabbits after general chronic ionizing irradiation attributed to lower cardiac activity, hypotrophy and dystrophy
17 p2906 A69-32929

Heart electrical activity time sequence estimation based on multiple dipole binary model, deriving algorithm
21 p3668 A69-39865

Rebreathing method for determining mixed venous oxygen pressure and cardiac output during rest and exercise in trained athletes
23 p4078 A69-41316

Cat papillary muscle length-tension curves before and after inotropic intervention, noting optimal length changes
23 p4084 A69-41461

Nonsurgical methods of cardiac output measurement in aerospace medicine, considering simultaneous recording of carotid and femoral pulses and impedance plethysmography
23 p4088 A69-41813

Acceleration effect on greyhound cardiac output and regional blood flow from Sapienstein radioisotope uptake technique, studying blood, skin, skeletal muscle, etc
23 p4089 A69-41823

Cat hearts ventricular pressure curves dv/dt and dp/dt correlated with left heart ventricle mechanical performance
23 p4095 A69-42076

Myocardium protein metabolism and heart physiology and pathophysiology, examining contractile function and energy transformation in hyperfunction, hypertrophy and heart failure
24 p4259 A69-42637

Errors in estimating cardiac function from aortic and peripheral pulses, using cadaver experiments
24 p4262 A69-42728

HEART RATE

NT ARRHYTHMIA

NT BRADYCARDIA

NT SYSTOLE

NT TACHYCARDIA

Cerebral circulation under longitudinal acceleration, discussing rheoplethysmographic measurements of heart rate
05 p0710 A69-16625

Pulmonary mouth pressure and heart rate in Flack test for flight personnel by simultaneous double recordings
05 p0710 A69-16626

Autonomic nervous system in control of heart rate in acceleratively stressed monkeys, discussing sympathetic, parasympathetic and bradycardiac influence
06 p0875 A69-17844

Abrupt deceleration effects on monkey heart rate, noting occurrence of relative bradycardia
06 p0876 A69-18031

Astronauts increased heart beat, respiration rates and higher blood pressure subsides during repeated weightlessness tests
07 p1061 A69-18582

Pneumograms and EKG used to determine heart beat, respiration rates and systolic index of cosmonauts during Voskhod 2 flight
07 p1062 A69-18585

Telemetering aortic blood pressure and heart rate from dogs under various physical activities and emotional stress
07 p1071 A69-19133

Tilt-table and acceleration tolerance of athletes and inactive students, comparing cardiovascular responses, heart rate and blackout level [DVL-834]
09 p1444 A69-21304

Physiological effects of breathing cool dehumidified air in hot humid environment, tabulating tolerance time, heart rate, temperature changes and sweat loss
09 p1446 A69-22543

Dogs orthostatic tolerance and resistance to transverse acceleration after 14-day hypodynamia, studying tachycardia and arterial pressure
10 p1645 A69-23499

Bed rest effect on orthostatic tolerance of patients with acute myocardial infarction and without heart failure
10 p1648 A69-24189

Heart rate and bodily fluid changes in acclimating desert anurans, discussing weight loss and metabolism reduction
11 p1827 A69-24923

Heart rate and respiratory response correlations in men during surface and underwater work, showing reasonable approximations of workload in surface-equivalent terms
14 p2406 A69-29293

Telemetry techniques, based on pulse rate measurements, permitting continuous examination of humans under natural working conditions

15 p2559 A69-31228

Psychophysical method of studying heart rate as indication of physiological fatigue

17 p2911 A69-34013

Electrocardiographic and heart rate data recording of crew members during transatlantic helicopter flight and normal daily routine

19 p3263 A69-36451

Noise influence on heart rate and oxygen consumption of young male subjects under simultaneous physical stress

21 p3654 A69-38908

Seasonal effects on energy expenditure during rest and exercise at controlled ambient temperatures, noting effects on heart rate

22 p3890 A69-40211

Regression relations for energy expenditure in work predicted from heart rate and pulmonary ventilation in volunteers carrying loads upstairs

22 p3891 A69-40220

Oxygen uptake and circulatory response in human male subjects during maximal treadmill and bicycle exercise

22 p3874 A69-40226

Real time metabolic rate analysis of suited astronaut using heart rate and O methods during thermal vacuum and extravehicular mobility tests [AIAA PAPER 69-993]

22 p3893 A69-40371

Heart beat rate, arterial pressure, blood volume and peripheral blood pressure increase observed in dogs running 7 min at 10 km/hr

22 p3885 A69-40966

Heart rate respiratory control model with inclusion of pressoreceptor feedback, considering posture effect in transient envelope alteration

22 p3894 A69-41202

Arterial pressure and heart rate responses to increased intrapulmonary pressure in anesthetized dogs via simulated Valsalva tests

23 p4078 A69-41365

Telemetered heart rate response to progressively increased distance swimming competition compared with equidistance running events for change patterns, magnitude and recovery

23 p4100 A69-41444

Pulmonary capillary blood flow, stroke volume and heart rate measured in tilted and supine subjects during respiration, discussing tourniquets and intravenous atropine effects

23 p4082 A69-41445

Physiological response to steady state hypoxia from exposure to 12 percent oxygen atmosphere, noting minimal heart rate and blood pressure changes

23 p4085 A69-41673

Heart rate responses and corresponding tolerance tests in trained athletes and nonathletes during simulated environmental extremes

23 p4102 A69-41683

Arterial oxygen partial pressures and heart beat rates measured in humans during acute hypoxia after altitude and ergometer training, noting sensorimotor performance

23 p4086 A69-41788

Aortic pressure effect on left ventricular function, emphasizing effect of heart rate hematocrit and oxygen consumption

23 p4092 A69-42061

Diurnal rhythms of heart rate and blood pressure reactions to posture changes on tilt table, finding orthostatic lability maxima

23 p4094 A69-42072

Human heart rate changes resulting from diving and breath holding exercises

23 p4095 A69-42083

Venous tone, peripheral venous pressure, skin and muscle blood flow, alterations of heart rate and respiration in men during leg exercise

23 p4096 A69-42090

Isolated pacemaker tissue from rabbit heart under dynamic and static stretching, discussing spontaneous frequency phenomena

23 p4096 A69-42092

Respiration effects on heart rhythm emphasizing direct mechanical influences

23 p4097 A69-42093

Oxygen consumption, ventilation and cardiac frequency relationship to body weight during submaximal exercise in normal human beings

23 p4099 A69-42169

Refractory period adaptation to sudden heart rate changes in dogs

24 p4257 A69-42628

Contraction frequency increment effects on myocardial oxygen consumption in dogs determined for various heart rate levels, using isovolumic left ventricular preparation

24 p4258 A69-42634

Circadian rhythm phase relationships between photoperiodism and heart rate, locomotor activity and deep body temperature /DBT/ in unrestrained monkeys

24 p4260 A69-42706

Frequency analysis of second heart sound splitting in patients with coronary artery disease assessed clinically and by phonocardiography

24 p4261 A69-42726

HEARTHS

Direct bead sampling by aspiration of molten metal in open hearth furnaces and converters

07 p1141 A69-19341

HEAT

U DRY HEAT

U NUCLEAR HEAT

HEAT ACCLIMATIZATION

U ACCLIMATIZATION

HEAT BALANCE

Operational and integral heat balance method to obtain exact and approximate solution for monotonic heating of two layer unbounded plate

01 p0174 A69-10097

Posistors heat capacity investigated as temperature function, showing maximum heat balance corresponds to Curie temperature

01 p0038 A69-10098

Oxygen electron cooling effect on ionospheric electron temperatures, noting discrepancy removal throughout day at all altitudes

02 p0245 A69-12739

Mean and eddy terms contribution to momentum and heat balance of troposphere and lower stratosphere at solstices, describing zonal wind equations

08 p1308 A69-20318

Thermal balance of intergalactic gas, discussing plasma energy losses due to He emission and reverse Compton electron scattering and rapid cooling effect

11 p1954 A69-24381

Particle, momentum and heat balance of static and rotating magnetized plasmas in terms of macroscopic equations

11 p1928 A69-25248

Steady state thermal problem of gas turbine hyperbolic profile disk equipped with banded blades, solving thermal balance equations

18 p3184 A69-34992

Ariel 3 satellite shape and systems including heat balance, data storage and compatibility problems

21 p3820 A69-39256

Radiative heat input to artificial satellite in orbit due to solar and earth radiations calculated and presented in graphs for satellite temperature calculation

22 p4006 A69-40589

Nighttime protonosphere thermal balance from Alouette 2 electrostatic probe measurements of electron temperature and concentration in magnetosphere

24 p4310 A69-43181

Thermal balance of intergalactic gas, discussing plasma energy losses due to He emission and reverse Compton electron scattering and rapid cooling effect

24 p4389 A69-43771

HEAT BUDGET

NT ATMOSPHERIC HEAT BUDGET

Equation for calculating meteor shielded tubular panel heat radiators emissivity and weight optimization, considering surface thermal balance and temperature distribution

05 p0846 A69-15897

HEAT CAPACITY

U SPECIFIC HEAT

HEAT CONDUCTION

U CONDUCTIVE HEAT TRANSFER

HEAT CONTENT

U ENTHALPY

HEAT DISSIPATION

U COOLING

HEAT DISSIPATION CHILLING

U COOLING

HEAT EFFECTS

U TEMPERATURE EFFECTS

HEAT ENGINES

U ENGINES

HEAT EQUATIONS

U THERMODYNAMICS

HEAT EXCHANGERS

NT TUBE HEAT EXCHANGERS

Finned tube radiators optimum design for waste heat removal from space power plants

02 p0354 A69-12664

Heat exchangers in cryogenic fluids in free and forced convection, discussing measurements in liquid H, D, Ne and N

08 p1420 A69-19914

Flow rates characteristic of trapezoidal geometries encountered after schematization of noncylindrical ducts involving irrotational flow, leakage, heat exchanges and electrical conduction phenomena

08 p1303 A69-20270

Roll diffusion bonding technique for permitting complex design of coldplates and radiators of spacecraft electronic equipment

09 p1504 A69-22066

Cryogenic heat exchanger design and application including vaporizers, recuperators, regenerators, reversing exchangers, nonsteady state flow and thermoelectric techniques

17 p3074 A69-33681

Electric models optimization for heat exchange systems based on mathematical similarity between equations describing temperature and electrical potential fields

19 p3256 A69-36717

Book on mathematical model for heat and material exchange in bubbles covering bubble formation, transition period and quasi-stationary bubble rise

21 p3847 A69-38448

Heat flow in belt-type heat transport device allowing for conductive and mass transport effects, deriving expression for heat transfer capability

22 p4050 A69-40554

Graph analytical method for calculating heat transfer in diathermic exchangers during boiling together with critical thermal loads

24 p4408 A69-43080

Heat pipe coupled to air cooled heat exchanger to cool high power airborne radio component by dissipating thermal load into ambient air [ASME PAPER 69-HT-16]

24 p4413 A69-43552

HEAT FLUX

Diffusional, thermal diffusional and thermal fluxes in multicomponent flames, discussing flame structure and reaction kinetics

01 p0175 A69-10144

Free convection from partially uniformly heated and partially insulated vertical flat plate, discussing dimensionless velocity, temperature, heat flux and axial length parameters

01 p0175 A69-10331

Flow nonuniformity measured in shock tubes by determining heat transfer rate to fine wire probes

01 p0062 A69-11219

Electric potential effects on heat transfer from plasma to solid wall, measuring heat input rates

02 p0290 A69-12423

Downstream radiation flux distribution calculated for blunt entry bodies, considering self absorption effects

02 p0354 A69-12547

Relationships derived by dimensional arguments connecting vertical heat fluxes and horizontal momentum in constant flux layer with other relevant variables

02 p0275 A69-12692

Stress and heat flux cospectra estimation using Busch-Panofsky observations

02 p0276 A69-12698

Surface temperature thermal fluxmeters used in measurements of shock tubes [ONERA-TP-648]

03 p0427 A69-12876

Vertical wind velocity structure and turbulent heat flux temperature measurements over steppe and sea, noting underlying surface influence

03 p0458 A69-13270

Long wave radiative heat flux in boundary layers of cloud during solid overcast, discussing dependence on various cloud and atmospheric parameters

03 p0458 A69-13271

Stationary and nonstationary weak discontinuity surfaces propagation for ideal and viscous compressible conductive atmosphere with regard to heat flux, using Hadamard method

03 p0422 A69-13511

Theory of heat conduction with finite wave speeds for materials with memory

03 p0533 A69-13956

Free convective heat transfer in liquid filled spherical volume with constant thermal flux density at boundary

04 p0686 A69-14992

HEAT GAIN

Covariances of temperature and meridional wind component and relation to northward flux of sensible heat due to transient eddies in stratosphere
04 p0627 A69-15084

Thin foil heat flux sensor for radiative and convective heating rates over wide range and dynamic response, noting error mechanisms, calibration and accuracy
04 p0602 A69-15426

Fast response thin skinned calorimeters for high heat flux profiles of arc jet flows
04 p0602 A69-15427

Nucleate pool boiling heat transfer data extended to relate effect of heating surface characteristics [ASME PAPER 68-WA/HT-22]
05 p0847 A69-16125

Plane reaction cell unit for use in differential flux calorimeters and devices for differential enthalpy analysis
05 p0764 A69-16607

Sensible heat exchange from Gemini and Apollo space suits determined in environmental test facilities, presenting data for heat flux distributions
06 p0880 A69-17089

Prigogine evolution criterion extended to MHD, considering Hartmann flow
07 p1188 A69-18267

Solid body surface temperature relation to heat flux during cooling by fluid flow solved on computer
07 p1241 A69-18923

Bulk aerodynamic method for heat and water vapor fluxes from data obtained at Chiba /1966/, introducing modified integral diffusivity
07 p1176 A69-18965

Fabrication welding with maraging steels with emphasis on minimizing heat input
08 p1320 A69-20407

Plasma sheath-boundary interactions, analyzing emission, reflection and surface ionization effects on current densities and heat fluxes for cesium and argon
08 p1369 A69-20818

Heat flux effect on laminar boundary layer separation in supersonic flow stressing free interaction zone
09 p1429 A69-21690

Emissivity of screened tube in presence of heat conducting connecting pieces between tube and screen
11 p1997 A69-24229

Heat flux toward electrodes measured under high current discharge, showing conductive heat transfer and erosion effect
11 p1928 A69-25227

Temperature variation effects on heat transfer in laminar tube flow, taking into account constant wall temperature and heat flow density
12 p2189 A69-25762

Temperature variation and heat transfer in fins and relations between heat-flux-density and temperature difference
12 p2190 A69-25763

Atmospheric energy budget of latent and sensible heat and potential energy between equator and 60 degree N
12 p2066 A69-26132

Heat flux in two dimensional laminar separation zone in supersonic flow, measuring convection coefficient and wall pressure
12 p2011 A69-26289

Radiation measurements by Cosmos 122 satellite over various regions, determining radiation temperature, long wave heat flux and albedo
13 p2291 A69-27726

Heat transfer coefficient deterioration between fluid and tube wall at supercritical pressure and high heat fluxes
[ASME PAPER 68-HT-39] 13 p2373 A69-27771

Unsteady temperature distribution in solid sphere with variable internal heat source and surface subjected to variable heat flux
13 p2373 A69-27773

Optical constants of soot applied to heat flux calculations, discussing soot particles concentration determination in hydrocarbon combustion products [ASME PAPER 68-HT-13] 13 p2374 A69-27777

Conducting liquid boundary layer flow and heat flux on electrodes of MHD generator, including one dimensional flow outside boundary layer
13 p2309 A69-28028

Functionality between heat flux and imposed operating conditions during nucleate pool boiling
13 p2376 A69-28142

Relative variations of wall friction and thermal flux for laminar incompressible flow of constant volume mass
13 p2250 A69-28357

Vertical wind velocity structure and turbulent heat flux temperature measurements over steppe and sea, noting underlying surface influence
14 p2471 A69-28778

Long wave radiative heat flux in boundary layers of cloud during solid overcast, discussing dependence on various cloud and atmospheric parameters
14 p2471 A69-28779

Materials compatibility and maximum heat flux capability of heat pipes emphasizing thermionic conversion
14 p2538 A69-29202

Pressure balance and maximum power density at evaporation from heat pipe experiments, deriving maximum heat flux densities
14 p2538 A69-29204

Radiation method for temperature and heat flux measurement, discussing transducer with thermopile as sensor
15 p2607 A69-30154

Surface temperature measurements to deduce surface heat fluxes, noting dependence on environment and sensor characteristics
15 p2716 A69-30379

Periodic radial heat flux in infinite cylinder with varying heat sources, assuming time variable heat exchange on surface
15 p2717 A69-30575

Turbulent heat and momentum fluxes spectra measured in atmospheric ground layer, describing changes as function of height and stratification conditions
15 p2649 A69-30648

Atmospheric radiative balance measurement on board Cosmos 149, describing design and operation of device
15 p2597 A69-30652

Heat release rate during gas combustion products recombination in supersonic nozzle, using graphic interpolation of flow parameters
15 p2717 A69-30987

Nucleate boiling burnout heat flux data for ethane, ethylene and ethane-ethylene mixtures at various pressures, discussing applicability of Noyes equations
15 p2671 A69-31118

Wall pressure and heat flux distribution in hypersonic flow on delta wings at variable angle of attack for low Reynolds numbers
16 p2731 A69-31605

Compressible turbulent accelerating boundary layer flow model for convective heat transfer from rocket combustion gases, noting heat flux
16 p2878 A69-32000

Linear heat flux in thin composite plate with internal point source, assuming no heat transfer at surface and neglectable temperature changes
17 p3068 A69-33126

Nonuniform wall radiation production of radiative equilibrium temperature and flux distributions in gray medium, discussing various approximation methods of solution
[AIAA PAPER 69-633] 17 p3072 A69-33294

Radiative heat transfer in nonisothermal media composed of spherical particles with complex refractive index emitting absorbing and scattering energy anisotropically, considering various geometries
[AIAA PAPER 69-626] 17 p3073 A69-33297

Heat transfer in evacuated multilayer insulation by radiation and conduction, considering optically thin media separating reflective layers
[AIAA PAPER 69-607] 17 p3073 A69-33300

Tropical circulation long term mean values of wind and temperature fields, momentum and heat fluxes from weather stations data, noting consistent pattern and energy source
18 p3165 A69-34418

Convective heat flux from nonisothermal surface by temperature superimposition method with Spalding function as turbulent heat transfer coefficient, noting wall temperature
18 p3229 A69-34836

Transient calibrations for Ge surface thermocouple heat flux sensors used in hypervelocity impulse tunnel
19 p3292 A69-35725

Transducer with single crystal Ge for high heat flux measurement, noting calibration by direct conduction
19 p3307 A69-35748

Heat flux densities and Reynolds potentials in turbulent boundary layer on heated flat plate with wall suction
19 p3452 A69-36722

Homogeneous heat flux effect on limit load of isotropic plate with rectilinear through crack, noting conditions for crack propagation
19 p3441 A69-36744

Flat surfaces downstream of heated section and porous strip, determining film cooling effectiveness and heat flux from heat transfer coefficients ratios
20 p3631 A69-37096

Polytetrafluoroethylene ablation in high temperature argon, nitrogen, air and oxygen jets, discussing electric heater and heat flux measurement
20 p3632 A69-37522

Heat influx equation coupling in the thermoviscoelasticity, considering internal forces dissipation and stress-strain operators
22 p4044 A69-40741

Forced convection heat transfer coefficient for fully developed turbulent flow in circular tube with time-varying circumferential heat flux
22 p4051 A69-40921

Micromodule unsteady thermal behavior reduced to calculating linear heat flux for boundary conditions containing temporal and spatial derivatives
23 p4136 A69-41558

Heat flux applied to infinite plate contacting semiinfinite body determined from plate unsteady temperature, allowing for calorimeter heat losses
24 p4407 A69-42589

Li-F-H tripropellant study, discussing injection method variations and thrust chamber configuration effects on characteristic velocity efficiency and heat flux measurement
24 p4362 A69-43128

Induced convection effect on peak pool-boiling heat flux under variable gravity, pressure and size conditions and various boiled liquids
24 p4409 A69-43516

Heat transfer during nitrogen tetroxide nucleate boiling at various pressures and heat fluxes [ASME PAPER 69-HT-58] 24 p4411 A69-43536

Wick capillary pressure, permeability and burnout heat flux measurements to provide data for heat pipe design [ASME PAPER 69-HT-18] 24 p4412 A69-43548

Rotating wickless hollow shaft heat pipe utilizing centrifugal acceleration for return pumping of condensate and transferring high heat fluxes [ASME PAPER 69-HT-19] 24 p4413 A69-43550

Heat finite propagation velocity effects on temperature distribution and heat flux for step temperature change at semiinfinite body surface [ASME PAPER 69-HT-1] 24 p4414 A69-43564

Solid propellant flame zone radiant energy flux emitted through side port of internal burning cylindrical rocket motor related to total heat flux at burning surface
24 p4415 A69-43595

HEAT GAIN

U HEATING

HEAT GENERATION

Procedure accounting for variable thermal conductivity and internal heat generation in temperature distribution prediction for waveguide ferrite slabs
02 p0215 A69-11877

Plastic deformation wave propagation and heat generated near yield point of annealed aluminum
02 p0342 A69-12280

Heat production rate equivalence to heat removal rate during ignition of ballistite powder by incandescent wires
02 p0354 A69-12668

Burning ability and inflammability of mixtures of powdered Mg, Al, Mg alloys or Al alloys and C-H-O organic compounds
02 p0355 A69-12669

Steady state temperature distribution in heat generating fluid in plug flow in circular tube with arbitrary inlet and wall temperature distribution
03 p0530 A69-12862

Variational technique for determination of temperature fields due to nonuniform heat transfer over surface of heat producing body
03 p0531 A69-12864

Heating effects produced by periodic stresses in viscoelastic bodies with resonance dispersion, considering torsional oscillations of viscoelastic cylinders
06 p1019 A69-16826

Transient heat evolution response to reapplied stress of alloys plastically predeformed at 4.2 K attributed to thermally softened defect structures
07 p1165 A69-18906

Heat generation effects by plastic deformations at tip of propagating crack in quasi-brittle materials, considering elastic stress field and crack velocity
08 p1412 A69-20144

Radiative transfer iteration for gray medium between concentric spheres and for constant heat generating spherical region imbedded in gray medium
08 p1420 A69-20152

Liquid crystal coatings for determining fracture initiation flaws in material structures, considering stress concentration and hysteresis heating
10 p1699 A69-23053

Equation for one dimensional heat conduction with nonlinear heat generation transformed from boundary to initial value problem
10 p1809 A69-23689

Heat generation in thin viscoelastic cylindrical shell with relaxation and resonance dispersion during torsional vibration
11 p2000 A69-25168

Seal selection criteria based on maintaining fluid film between faces, discussing facial heat generation and dissipation, speed and size effects, etc
[ASLE FICFS PREPRINT 25]
15 p2620 A69-30488

Uncoupled dynamic thermal stresses and displacements by heat generation in infinite flat plates, using classical thermoelasticity theory for infinitesimal displacements
15 p2709 A69-30669

Calorimetric methods for battery and cells testing, discussing heat generation data correlation
18 p3093 A69-34780

Fatigue fracture due to heat generation in polycarbonate subjected to pulsating tensile load, presenting temperature change per unit stress increase
18 p3163 A69-35498

Heat generation in meteorites by radioactive isotopes generated by early solar proton irradiation prior to solar system solidification
19 p3411 A69-36098

Earth temperature distribution using various models, noting excess of total heat production in interior vs heat flow during planet history
21 p3718 A69-39732

HEAT MEASUREMENT

Surface temperature thermal fluxmeters used in measurements of shock tubes
[ONERA-TP-648]
03 p0427 A69-12876

Twin differential calorimeter for measuring heat dissipation by wire specimen under fatigue tests, using semiconductor thermopiles
04 p0618 A69-15205

Plane reaction cell unit for use in differential flux calorimeters and devices for differential enthalpy analysis
05 p0764 A69-16607

Homogeneous turbulent gas flame front location as function of caloric value of mixture and flow velocity
08 p1420 A69-19998

Segmented anode current and heat distribution in MPD engine measured with current shunts and calorimetric methods
[AIAA PAPER 69-244]
09 p1566 A69-21260

Pyroelectric thermometry for measurements at low temperatures with emphasis on calorimetry, discussing pyroelectric coefficients, dielectric constants and resistivities
09 p1493 A69-21423

Local enthalpy measurements in atmospheric argon arc plasma jet at various arc currents, comparing calorimetric and spectrometric methods
09 p1547 A69-21602

Calorimetric measurement of electron temperature in collisionless shock wave propagating in plasma column, discussing role of H beta line Stark broadening
15 p2657 A69-30104

Radiation method for temperature and heat flux measurement, discussing transducer with thermopile as sensor
15 p2607 A69-30154

Calorimetric measurement of source and broadband spectral absorptances of spacecraft thermal control coatings during exposure to UV in vacuum environment
16 p2789 A69-31815

Composite solid propellant combustion using differential scanning calorimeter and mechanical model of steady state combustion
[AIAA PAPER 69-504]
16 p2833 A69-32679

Solid W enthalpy from 2800 K to melting point measured with drop calorimeter, tabulating heat capacity, entropy and free energy function
17 p2987 A69-33075

Total gasification heat measurement during pyrolysis of polymethyl methacrylate and paraformaldehyde, discussing method and calorimetric equipment
17 p3069 A69-33133

Guarded disk type emissometer for hemispherical emittance measurements of sample materials in 88 to 420 K range based on steady state calorimetry
[AIAA PAPER 69-600]
17 p2973 A69-33280

Earth surface heat flow pattern measurement and distribution techniques, considering relation to surface features and tectonic movements of crust
[AIAA PAPER 69-589]
17 p2961 A69-33284

Steady state performance of multistrand superconducting compound conductors in current sharing state, using heat measurement from metal surface to He bath
17 p3016 A69-33786

Ti thermal diffusivity and conductivity at high temperatures measured from heat wave phase shift
18 p3156 A69-34699

Calorimetric methods for battery and cells testing, discussing heat generation data correlation
18 p3093 A69-34780

Heats of adsorption of carbon dioxide on silver /I/ oxide and copper /II/ oxide by gas chromatography
20 p3485 A69-38277

Calorimetry-thermometry discrepancy during prolonged exercise in hot dry environment, measuring rectal temperature with increasing exposure time
23 p4098 A69-42104

Heat flux applied to infinite plate contacting semi-infinite body determined from plate unsteady temperature, allowing for calorimeter heat losses
24 p4407 A69-42589

HEAT OF COMBUSTION

Combustion products temperature and composition in chamber or at nozzle exit calculated for fuels containing excess oxidizer ratios greater than unity
04 p0684 A69-14486

Thermodynamic computations for combustion product temperature and flow rate as function of pressure in burner and excess air ratio
04 p0684 A69-14487

Heat release in combustion chambers of propulsion and lift engines considering various parameters of materials and design problems
09 p1625 A69-22619

Solution of confluence in three dimensional shock and detonation polars for spinning detonation
11 p2002 A69-25353

HEAT OF FORMATION

Formation energy of heat vacancies in molybdenum and temperature dependence of concentration determined on basis of enthalpy data
02 p0266 A69-12184

Photoionization curves and threshold energies for fluorocarbon and trifluoromethyl halide molecules and ions, calculating ionic heats of formation and bond dissociation energies
02 p0205 A69-12464

Relative heats of formation and reduced melting temperatures of lanthanide compounds correlated to lanthanide contraction
07 p1168 A69-19597

High pressure combustion of ortho-barenes /carboranes/, determining formation heat and amounts of boric acid and carbon dioxide
21 p3670 A69-39625

Beryllium fluoride heat of formation from heat of combustion of Be-polytetrafluoroethylene mixture in fluorine
21 p3853 A69-39703

Major ions in chemi-ionization of hydrocarbon flames determined for heats of formation by photoionization mass spectrometer
22 p3896 A69-40727

HEAT OF SOLUTION

Heat of solution and diffusivity of nitrogen in molybdenum analyzed by quenching technique and resistivity measurements at liquid helium temperature
02 p0267 A69-12188

Heats of solution of Ag and Cu in dilute Ag-Cu-Sn alloys at 720 K, using liquid metal-solution calorimeter
13 p2279 A69-27759

Heats of solution of Au and Cu in dilute Au-Cu-Sn alloys determined using liquid metal solution calorimeter, calculating self interaction coefficients
17 p2987 A69-33077

HEAT OF VAPORIZATION

Vaporization waves in metals, discussing thermodynamic function of carrying liquid metal through successive states on liquidus line in two phase region
01 p0117 A69-10655

Gas film protection of quartz tube wall transparency loss due to hot plasma contact used to study UV emission during high power pulse discharges
11 p1926 A69-24616

Heats of condensation and vaporization of W, Re and Mo cathodes of thermoelectric converter with Cs arc for various output powers and Cs vapor pressure
12 p2017 A69-26544

Vaporizer temperature and collision efficiency correlation data for magnesium oxide-argon dilute diffusion flames studied for determining inverse temperature dependence
13 p2380 A69-28461

Total gasification heat measurement during pyrolysis of polymethyl methacrylate and paraformaldehyde, discussing method and calorimetric equipment
17 p3069 A69-33133

Latent heat of condensation related to atmospheric dynamics in cloud formation processes with allowance for moisture exchange
17 p2997 A69-33188

HEAT PIPES

Out-of-core thermionic space power generators using heat pipes, discussing feasibility in geometry, heat pipes, reactor, shield, heat exchanger and radiator
08 p1256 A69-19856

Lithium vapor fueled applied field MPD arc jet performance using open end heat pipe vaporizer and hollow cathode
[AIAA PAPER 69-241]
09 p1561 A69-21222

Heat pipes for thermionic converters, wicks development, high temperature life testing and performance
09 p1440 A69-21833

Out-of-core thermionic reactor power increase by using central heat pipe in coaxial cavity
09 p1441 A69-21836

TWT heat pipe cooled depressed collector designed as compact heat transfer device and electrical insulator
11 p1847 A69-24746

High power TWT tube cooling in space vehicle, discussing thermal control system based on heat pipe radiator
11 p1847 A69-24747

Vacuum tube with cathode heated directly by external radioisotope source, noting heat pipe providing isothermal heat transfer
11 p1848 A69-24748

Out-of-core thermionic reactor concept for space power supply using lithium heat pipes in crossed layers
14 p2480 A69-29187

Out-of-core thermionic systems with heat pipes usable in space applications, meeting advanced auxiliary power and nuclear propulsion requirements
14 p2480 A69-29188

European heat pipe research emphasizing transportable heat quantities, heating rate and life duration
14 p2538 A69-29201

Materials compatibility and maximum heat flux capability of heat pipes emphasizing thermionic conversion
14 p2538 A69-29202

Corrosion mechanism in high temperature Nb-Zr/Li and Ta/Li heat pipes and heat transfer measurements, noting oxygen content of wall material
14 p2462 A69-29203

Pressure balance and maximum power density at evaporation from heat pipe experiments, deriving maximum heat flux densities
14 p2538 A69-29204

Limiting heat power transported by sodium heat pipes dependent on capillary network geometry, inclination angle and operating temperature
14 p2538 A69-29205

Dimensionless approach to maximum flow in heat pipes and optimization of capillary structure
14 p2539 A69-29206

Liquid-vapor interaction in loop plates with different heat pipe capillary geometries using water as heat transporting medium
14 p2539 A69-29207

Heat pipes for heating emitters of thermionic converters at high temperatures, noting capillary optimization and thermal resistance values
14 p2539 A69-29208

Cell current and calorimetric measurements of electrical power and heat generation with heat pipe thermionic converter
14 p2402 A69-29238

Heat pipes design for rocket engines cooling, discussing connections to space radiator and to heat rejection device and heat transfer capability
[AIAA PAPER 69-582]
16 p2839 A69-32668

Constant temperature heat pipe for thermal control of spacecraft components by direct coupling to external radiator
[AIAA PAPER 69-632]
17 p3070 A69-33262

Two component heat pipe operating characteristics on basis of thermodynamic phase equilibrium for binary mixtures
[AIAA PAPER 69-631]
17 p3071 A69-33268

- Heat pipe application to thermal equalization around ATS-E solar cell mounting panels, comparing predicted and actual performance [AIAA PAPER 69-630] 17 p3072 A69-33277
- Heat pipe devices applied to radiative body heat transfer in space suit temperature control [AIAA PAPER 69-619] 17 p2914 A69-33293
- Heat pipes for isothermal and adaptable energy transfer for space applications, discussing temperature control by fluid choice 21 p3852 A69-39475
- Electronic equipment thermal control, describing design and use of heat pipes 22 p4049 A69-39944
- Sonic vapor flow heat transfer limitations in heat pipes for Na, K and Cs, showing strong influence of temperature and working fluid 23 p4239 A69-41719
- Heat pipe system performance of GEOS 2 satellite, noting transponders temperature differences 23 p4224 A69-42082
- Heat pipe thermionic converters, discussing heat transport, heating rate, pipe lifetime, etc 23 p4074 A69-42295
- Heat pipe development and fabrication in various sizes and shapes for operation over range of temperatures and power levels, noting applications 23 p4074 A69-42296
- Li, Na and K heat pipes for high temperature emitter and low temperature collector thermionic applications 23 p4074 A69-42297
- Pumping pore size and permeability of wicks as part of heat pipes design 23 p4074 A69-42298
- Space radiator system with hybrid, water heat pipes to transport waste heat from radioisotopic thermoelectric generator 23 p4190 A69-42304
- Heat pipes design for avionic applications, using wicking bench tests 23 p4075 A69-42305
- Two fluid heat pipe performance, measuring temperatures and condenser end vapor pressures for two thermal power input conditions 23 p4240 A69-42306
- Temperature control by heat pipe using noncondensing gas with methanol to vary thermal resistance and mathematical model to describe heat source temperature variations 23 p4240 A69-42307
- Heat pipe design for electron tubes cooling at various temperatures, including dielectric heat pipes and traveling wave tubes [ASME PAPER 69-HT-25] 24 p4412 A69-43543
- Nucleate boiling effect on operation of low temperature heat pipes, using everted stainless steel to permit visualization of wick structure and bubble nucleation [ASME PAPER 69-HT-24] 24 p4412 A69-43544
- Temperature distributions in heat pipe wicks as function of liquid thermal conductivity [ASME PAPER 69-HT-23] 24 p4412 A69-43545
- Gas phase self induced pressure field and laminar velocity distribution of working fluid within closed heat pipe channels analyzed by momentum integral method [ASME PAPER 69-HT-22] 24 p4412 A69-43546
- Heat transfer capability and startup behavior of sodium heat pipes, studying heat transfer limit due to vapor velocity at evaporator end [ASME PAPER 69-HT-21] 24 p4412 A69-43547
- Wick capillary pressure, permeability and burnout heat flux measurements to provide data for heat pipe design [ASME PAPER 69-HT-18] 24 p4412 A69-43548
- Wick-limited heat pipe performance, discussing maximum, steady heat transfer rate and transient response [ASME PAPER 69-HT-20] 24 p4413 A69-43549
- Rotating wickless hollow shaft heat pipe utilizing centrifugal acceleration for return pumping of condensate and transferring high heat fluxes [ASME PAPER 69-HT-19] 24 p4413 A69-43550
- Heat pipe wick materials liquid transport properties analysis, using water and Freon 113 as working fluids [ASME PAPER 69-HT-17] 24 p4413 A69-43551
- Heat pipe coupled to air cooled heat exchanger to cool high power airborne radio component by dissipating thermal load into ambient air [ASME PAPER 69-HT-16] 24 p4413 A69-43552
- Performance curves of cylindrical water heat pipe for performance map, observing free hydrogen accumulation [ASME PAPER 69-HT-15] 24 p4413 A69-43554

HEAT PUMPS

- Thermodynamic analysis of engines and heat pumps operating within negative absolute temperatures, noting work increase by throttling 09 p1623 A69-22219
- Cascade thermoelectric heat pump reducing temperature gradient in legs of element near cold junction and reducing Joule heating in cold junction area 22 p3869 A69-40133

HEAT RADIATORS

NT SPACECRAFT RADIATORS

- Space radiators for heat rejection from nuclear powered spacecraft doubling as primary structures to save weight, discussing conical or cylindrical configurations 01 p0160 A69-10151
- Equation for calculating meteor shielded tubular panel heat radiators emissivity and weight optimization, considering surface thermal balance and temperature distribution 05 p0846 A69-15897
- Optimized radiative heat transfer systems performance, comparing tubular radiators with various fin geometries and systems with belt radiator 06 p1033 A69-17600
- Optimizing radiating system consisting of radially diverging conical heat removing projections attached to cooled isothermal sphere 06 p1033 A69-17603
- Constant temperature heat pipe for thermal control of spacecraft components by direct coupling to external radiator [AIAA PAPER 69-632] 17 p3070 A69-33262
- Finned tube radiators with constant longitudinal specific heat flow, determining thermal efficiency and optimal thermal and structural parameters 20 p3631 A69-36978
- Absorptivity of nonuniformly heated thin walled cylindrical radiator with central radiating hole, calculated by forward-reverse and integral methods 23 p4238 A69-41332

HEAT REGULATION

HEAT RESISTANCE

U THERMAL RESISTANCE

HEAT RESISTANT ALLOYS

- NT MOLYBDENUM ALLOYS
- NT NIMONIC ALLOYS
- NT NIOBIUM ALLOYS
- NT REFRACTORY METAL ALLOYS
- NT RHENIUM ALLOYS
- NT TANTALUM ALLOYS
- NT TUNGSTEN ALLOYS
- NT WASPALOY
- Dendrite formation and solidification relationship in highly alloyed materials from quantitative determination of controlling factors for segregation 01 p0098 A69-10899
- Permissible JP-5 fuel sulfur content effect on hot corrosion of protective coated Ni-base superalloys in marine environment, noting atmospheric sea salt role 01 p0141 A69-11059
- Temperature dependence of thermal conductivity coefficient and specific heat of sublimating heat proof materials 02 p0350 A69-11580
- Gas turbine alloys composition role in high temperature corrosion resistance under high sulfur diesel fuel combustion 03 p0444 A69-13309
- Interfaces role in Ni-base superalloy, discussing grain boundaries and coherent/incoherent phase boundaries 03 p0449 A69-13878
- Structural stability of cobalt base superalloy at high temperature prolonged exposure under stress 05 p0781 A69-16448
- Sigma formation effects on cast nickel-based superalloys properties, discussing sigma occurrence prevention for longer service life of gas turbines 06 p0942 A69-17223
- Ti-Al-V alloys phase diagrams for isothermal cross sections and polythermal cross sections with constant Al/V ratios 07 p1161 A69-18768
- Ti rich Ti-Al-Mo-Zr alloys phase diagrams at high temperatures, noting presence of solid solutions 07 p1161 A69-18769
- Heat resistance of Ti-Al-Mo-Zr alloys analyzed by bend tests, discussing phase diagrams 07 p1163 A69-18779
- Chemical composition relationship to heat resistance of titanium alloys, using diagrams for establishing composition of new multicomponent alloys 07 p1163 A69-18780

- Columbium alloys properties, discussing creep strength, oxidation resistance, costs, production, etc 07 p1164 A69-18797
- Czechoslovakian heat resistant iron-carbon-aluminum alloy Pyroferal, properties and applications 07 p1168 A69-19388
- Elevated temperature mechanical properties data for commercially produced super-strength alloys supplemented by product description tables 08 p1328 A69-19919
- Ductility as principal cause of postweld heat treatment stress relaxation cracking in nickel based Waspaloy alloy 718 08 p1318 A69-19994
- Statistical techniques to develop nickel base superalloy with high temperature capabilities for jet engine turbine bucket applications 08 p1329 A69-20001
- Monograph on precipitation hardening and mechanical properties of various heat resistant alloys with Co contents to 35 percent 08 p1334 A69-20765
- Sulfidation attack and structural stability of nickel base superalloy [SAE PAPER 690103] 09 p1522 A69-21550
- Deformation processing of superalloy gas turbine components, studying ingot characteristics, alloy segregation effect and thermomechanical properties [SAE PAPER 690101] 09 p1503 A69-21550
- Wrought superalloys fusion welding behavior discussing hot cracking, hot microfissuring and strain age cracking [SAE PAPER 690102] 09 p1503 A69-21550
- Heat resistant nickel alloys for castings, tabulating chemical composition, mechanical properties, heat treatment, weldability, etc 09 p1522 A69-21604
- Heat resistant nickel alloys static and dynamic properties at high temperature, creep-fatigue interactions etc 09 p1523 A69-21604
- Soviet collection of articles on physicochemical studies of heat resistant alloys 09 p1524 A69-22133
- Vacuum melting effect on O concentration in heat resistant alloys, outlining conditions for nitrides formation in equilibrium with melt 09 p1524 A69-22133
- Heat resistant materials based on high melting point metals, summarizing achievements of chemical technology and vacuum metallurgy 09 p1524 A69-22133
- Structure and properties of high heat resistant alloys based on high melting point metals with bcc lattice explained by electron theory 09 p1525 A69-22139
- Heat resistance preservation in heat resistant alloys by inhibiting dislocation motion during operation at high temperatures 09 p1525 A69-22144
- Heat resistant alloying of niobium with group 4A, 5A and 6A elements, studying elements diffusion mobility dependence on melting point 09 p1525 A69-22144
- Heat resistant alloys plastic deformation, studying stress/strain systems, strain divisibility, strain rate and temperature effects, etc 09 p1504 A69-22144
- Mechanical properties of welds of niobium and Ni-base heat resistant alloys and susceptibility to crack formation at high temperatures 09 p1504 A69-22144
- Nickel base superalloys for aircraft gas turbines, considering strengthening mechanisms for creep resistance [ASME PAPER 69-GT-7] 09 p1527 A69-22506
- Heat release in combustion chambers of propulsion and lift engines considering various parameters of materials and design problems 09 p1625 A69-22619
- Oxidation effects on creep and fatigue properties of metals noting time and temperature roles 10 p1708 A69-22998
- Chemical composition of chromium steels for optimum heat resistance properties, noting effects of nickel, nitrogen and ferrite and austenite-forming elements 10 p1708 A69-23000
- High temperature effect on fatigue deformation and fracture of nickel base superalloy in single crystal and columnar grained forms 10 p1709 A69-23073
- Beryllium cermet compositions, discussing beryllium oxide content, mechanical strength and elastic and shear moduli 10 p1711 A69-23334

Solid propellant motors nozzle design, analyzing structural and material problems, high temperature exhaust gases effects, thermal insulation, etc
10 p1716 A69-23403

Nickel base wrought and cast superalloys examined to determine minor phases and microstructure thermal stability in high temperature heat treated condition
10 p1714 A69-23977

Cobalt base high chromium carbide strengthened superalloy, evaluating physical and mechanical properties
11 p1901 A69-24259

Weld cracking sensitivity of Inconel 713C investigated for determining aluminum content effect on weldability of nickel base heat resistant alloys
11 p1906 A69-25577

Fabricable materials with low plastic deformation for gas turbine components, noting strength vs temperature for alloys, fiber composites and ceramics
[IME PAPER 8] 12 p2147 A69-25791

Cast high temperature alloys for gas turbine components, discussing production, temperature capability, composition, oxidation, hot corrosion and weldability
[IME PAPER 10] 12 p2147 A69-25795

Book on hard alloy properties, discussing bending and compression properties, tensile, torsional and impact strength, wear resistance and thermal shock resistance
12 p2111 A69-25902

Soviet monograph on nuclear radiation effect on structure and properties of metals and alloys covering electron, gamma and neutron radiation
12 p2114 A69-26469

Crystal microstructure and mechanical properties of unidirectionally solidified Ni-Ni-Nb intermetallic eutectic alloy at high temperature, examining deformation and fracture modes
13 p2276 A69-27402

Nickel base superalloys long time carbide and intermetallic phases stability at high temperatures
13 p2277 A69-27405

Microstructural stability Fe-Ni base heat resistant alloy Pyromet 860 during long time creep-rupture testing
13 p2279 A69-27764

Spacecraft construction materials and strength problems including stress-strain determination, thin shell structural stability, dynamic loads, heat resistance, fiber-reinforced composites, ablation materials, etc
13 p2362 A69-27920

Ni alloys phase precipitation and Fe substitution effects on heat resistant alloys
13 p2283 A69-28488

Thoria strengthened Ni-Cr alloys high temperature stability, noting thoria particle size influence
14 p2465 A69-29682

High temperature properties relationship to microstructure of Co base superalloys and strengthening methods
14 p2465 A69-29891

Casting variables of Co base superalloys, discussing variables effects on ultimate mechanical properties, investment casting, etc
14 p2456 A69-29893

VM-1 alloy investigated for creep mechanisms and ultimate strength for applications in reactors, rockets and aircraft construction
15 p2638 A69-30284

Heat resistant Fe and Cu alloys creep index affected by temperature, testing time and specimen grain size
15 p2639 A69-30569

Heat resistant fiber composites produced by oriented eutectic crystallization in Co and Ni quaternary alloys [ONERA-TP-710] 16 p2799 A69-31765

Carbidothemic process for high melting metals and alloys production stressing Ti alloys
16 p2800 A69-31777

Precipitation processes and effect on properties of Cr-Ni-W-Ti heat resistant austenitic steel, using electron diffraction and transmission electron microscopy
17 p2984 A69-32833

Machine for testing high temperature creep under variable tensile-compressive stress while maintaining specimen stability, noting discrepancy between creep strains in heat resistant alloy
17 p3054 A69-33044

Welding research program at Polish Institute of Aviation concerning electron beam, AR shielded arc, resistance welding and soldering of heat resistant alloys
17 p2979 A69-33688

Static tensile stresses effect on energy dissipation in alloys used in compressor blades found dependent on composition and heat treatment
17 p2991 A69-33934

Polygonization and strengthening effects simultaneous action at grain boundaries increased thermal stability of thermomechanically treated Ni-Cr alloy
17 p2991 A69-33940

Electrical discharge machining effect on heat resistant alloys surface finish, noting volt-ampere characteristics
18 p3147 A69-34547

Co base alloy for gas turbines, discussing microstructure, creep, oxidation resistance and hot corrosion properties
18 p3158 A69-35421

Full circle Be brake disks in C-5 aircraft, discussing properties at elevated temperature and fastening of friction lining
18 p3095 A69-35424

Soviet collection of papers on strength and plasticity of Ni and Ti and alloys covering high temperature internal friction, deformation and creep characteristics
18 p3158 A69-35442

Tensile and stress rupture strengths of diffusion bonded Ni superalloys, using spin tests of simulated hollow turbine disks
19 p3320 A69-35559

Stress relaxation of heat-resistant steels as function of equal stress during different elevated temperatures, applying results to time residual stress prediction
19 p3342 A69-35778

Nickel base superalloy high temperature fatigue properties, comparing crack initiation and propagation in directionally solidified and conventionally cast forms
19 p3342 A69-35919

Ni base superalloy stacking fault energy, studying effects of various solute additions
19 p3343 A69-35925

Al effect on B and Cr diffusion in protective coating on Cr-Ni heat resistant alloy, noting thermochemical kinetics for homogeneous layers
19 p3345 A69-36157

Book on high temperature materials covering creep phenomena, design considerations, load and temperature effects, various steels, superalloys, refractory metals, etc
20 p3559 A69-37148

Repair welding methods for trailing edge cracks in nickel base superalloy used in turbine vanes, emphasizing plasma arc fusion welding
[ASM PAPER D8-16.3] 20 p3551 A69-38137

Heat resistance and strength properties of porous Ni-base cermet materials with mica additions under high temperature oxidation
21 p3751 A69-38615

Slip band etching procedure revealing Ni-base superalloy plastic deformation, accentuating slip bands and subgrain boundaries by electropolishing
21 p3744 A69-38741

Superalloy technology applications to gas turbine engines
21 p3785 A69-38928

Powder metallurgy all inert processing method for producing nickel base superalloys forgings, discussing microstructure, reproducibility, mechanical properties, etc
[ASM PAPER GG-8-3.3] 21 p3745 A69-38929

Phase softening transformations heat resisting alloys during cyclic heating, using X ray and electron microscope analyses
21 p3746 A69-38957

Minor element influence on high temperature weldability of high Ni alloys and weld quality
22 p3967 A69-39879

C and B influence on heat affected zone hot cracking and postweld heat treatment on Ni base superalloys
22 p3967 A69-39880

Minor elements effect on weld-metal cracking resistance of wrought Ni-base heat resistant alloy by Circular Patch Test
22 p3967 A69-39882

Short period creep and relaxation in various heat resistant alloys under heat treatments and loads, determining temperature dependence of cyclic thermal instability
22 p3969 A69-40071

Titanium alloys for strength and weight saving in aircraft fasteners operating at cryogenic or elevated temperatures, discussing corrosion and notch sensitivity
22 p3956 A69-40824

Ce, Zr, Nb and B effect on heat resistance and structure of low alloy CrMoWV steels (type CSN 41 5335/
22 p3972 A69-41079

Ni based superalloy mechanical properties, determining chromium carbide discontinuous precipitation effects at various temperatures
23 p4176 A69-41507

Structural aircraft design requirements for high flight speeds stressing aerodynamic heating, heat resistant materials, weight and geometry problems
23 p4233 A69-42164

Thermochemical analysis of hot corrosion during sulfidation-oxidation of superalloy gas turbine engine components using Pourbaix method
23 p4178 A69-42449

Cobalt-base superalloys analysis for temperature stability, corrosion resistance, creep, fatigue and strength in aircraft structures and parts applications
24 p4334 A69-43427

Protective coatings on Ni base superalloys for gas turbine engine blade and vane components for hot corrosion and oxidation resistance
[SAE PAPER 690480] 24 p4335 A69-43515

HEAT SHIELDING NT REENTRY SHIELDING

Ablative heat shield materials for Mars and Venus atmospheric entries
02 p0333 A69-11750

Rapidly heated ablative reinforced plastics strength and stress-strain properties, considering heat shield designs
02 p0347 A69-12512

Porous ceramic heat shields for lifting reentry vehicles, noting crack propagation resistance and load redistribution
[SAE PAPER 680643] 03 p0453 A69-13457

Blunt and conical body optimum heat shield shapes for Jupiter atmospheric entry, noting shallow flight path
[AIAA PAPER 68-1150] 03 p0520 A69-13565

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments
[AIAA PAPER 68-1154] 03 p0533 A69-13669

Atmospheric gas composition effects on shock layer radiative heat transfer and heat shield response in Venus entry simulated by earth reentry
[AIAA PAPER 68-1148] 03 p0412 A69-13672

Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles
04 p0602 A69-15428

Inflatable solar shields for thermal protection of space vehicles utilizing cryogen propellants
06 p1017 A69-17609

Charring phenolic nylon ablator material pyrolysis and surface recession for cyclic and constant combined convective and radiative heating
[AIAA PAPER 69-151] 06 p1036 A69-18055

Ablative and insulative performance of reference heat shield materials under transient heating simulating ballistic vehicle reentry trajectory, using plasma jet facility
[AIAA PAPER 69-150] 06 p0907 A69-18110

Thermochemical and mechanical ablation mechanisms for Apollo heat shield material, comparing surface thermochemistry computer program and arc plasma tunnel data
[AIAA PAPER 69-98] 06 p1038 A69-18149

Microwave techniques for bondline defects and thickness of reentry elastomeric heat shield material bonded to titanium alloy
09 p1499 A69-22306

Initial nonuniformity effect of temperature distribution in main stream on efficiency of cooling by air injection through slit or porous collar
11 p2002 A69-25338

Ablation cooling application to aerodynamic heat shielding, discussing various materials, sublimation, rocket probe ascents, satellites and experimental aircraft
12 p2011 A69-25854

Ablation characteristics of heat shield materials measured in arc heated wind tunnels, considering influence of model scale, heating rate and pressure level
12 p2119 A69-26813

Time and temperature dependence of plastic properties of fiber reinforced phenolic heat shield materials
12 p2119 A69-26825

Dynamic response of distended carbon materials to shock loading defined by measuring equation of state, unloading behavior and spallation strength
12 p2119 A69-26847

Heating facility for testing ablative heat shield material models in combined convective and radiative heating environment with constant or transient heating conditions
[AIAA PAPER 69-342] 13 p2243 A69-28278

Thermal shielding effectiveness of flat wall behind tangential blowing slit, considering case of quasi-isothermal homogeneous turbulent boundary layer
14 p2537 A69-28971

Static, transient and in-space environmental tests at satellite structures and heat shield test facilities in Italy
16 p2765 A69-31750

Temperature determination of thick flat plate rotating in space in solar flux with one surface insulated compared with Apollo heat shield results
[AIAA PAPER 69-614] 17 p3071 A69-33266

Heat transfer suppression techniques in high temperature low density fiberglass insulation for flight vehicles
[AIAA PAPER 69-606] 17 p3072 A69-33279

Lunar module multilayer radiation insulation for thermal control, testing aluminum coated Mylar and Kapton sheets
[AIAA PAPER 69-609] 17 p3073 A69-33304

Fiberglass reinforced plastics internal heat shielding for isopropyl nitrate rocket combustion chamber, considering lining resistance and safety during repeated firing /Ludion motor/
17 p3019 A69-33343

Ablation heat shields, emphasizing dielectric low cost fabrication and application to entry vehicles
19 p3318 A69-35538

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments
[AIAA PAPER 68-39016] 21 p3851 A69-39016

Line source technique for ablative heat shield materials thermal conductivity measurements, comparing vacuum and atmospheric test results
[AIAA PAPER 69-1013] 22 p3922 A69-40386

Low density polybenzimidazole composites as ablative heat shields, discussing arc-heated wind tunnel tests of linear and crosslinked structures
23 p4179 A69-41715

Atmospheric gas composition effects on shock layer radiative heat transfer and heat shield response in Venus entry simulated by earth reentry
[AIAA PAPER 68-1148] 24 p4394 A69-43248

Negative Poisson ratio of isotropic heat shield material pyrolytic graphite, noting thermodynamic validity
24 p4338 A69-43599

HEAT SINKS

Atmospheric heat sources and heat sinks distribution based on Cosmos satellite data
06 p0949 A69-17048

Space environment simulation for vacuum, solar radiation, heat sink and orbital motion, discussing oil contamination of optical surfaces
13 p2241 A69-28079

Transistor temperature and power limitations and thermal resistance calculation, discussing heat sink surface optimum design for power losses
16 p2760 A69-32047

HEAT SOURCES

Numerical analysis of temperature variation of spherical spinning satellite with and without radiatively coupled inner shell containing heat source
01 p0162 A69-10761

Axissymmetric model of unsteady convective cumulus cloud produced by time dependent heat source in unsteady atmosphere
02 p0274 A69-11436

DC arc plasma torch as heat source in plasma tunnel, discussing nonuniformity of plasma flame
02 p0291 A69-12424

Heat diffusion in cylinder with heat sources creating axisymmetric temperature distribution, using Gauss hypergeometric function and Meijer G-function
04 p0687 A69-15188

Atmospheric heat sources and heat sinks distribution based on Cosmos satellite data
06 p0949 A69-17048

One dimensional integral solution for cylindrical source generated transient temperature field and relation to thermal diffusivity of brain tissue
06 p0879 A69-17085

Constant thickness fin with arbitrarily distributed heat sources optimized using approximate physical model and closed form solution of field equation
[SAE PAPER 690198] 07 p1239 A69-18302

Temperature and displacement fields in unbounded elastic space due to instantaneous point heat source action
09 p1621 A69-21495

Heat sources in E region from electron temperature data analysis recorded by rockets during eclipses in July 1963
09 p1490 A69-21771

Unsteady free convection in incompressible viscous fluid having internal thermal source contained in bounded volume
09 p1621 A69-21792

Large scale heat sources influence on formation and dynamics of ultralong waves in atmosphere, using linear time dependent quasi-geostrophic model
09 p1491 A69-22164

Vacuum tube with cathode heated directly by external radioisotope source, noting heat pipe providing isothermal heat transfer
11 p1848 A69-24748

Ignition critical conditions based on reactions in condensed phase, discussing initiation from pulsed and continuous external heat sources, heat release by chemical reactions of ignition, etc
11 p2001 A69-25191

Unsteady heating of fuel mixture in vertical cylindrical container with Arrhenius heat source, discussing heat conduction equations and wall temperature effects
11 p2001 A69-25192

Acoustic frequency of longitudinal self oscillations during vibrational fuel combustion in afterburner, taking into account nonlinear properties of heat supply zone
11 p2002 A69-25339

Model, assuming electron thermal conductivity contribution, applied to studying solar plasma discharge characteristics in presence of three dimensional thermal sources in solar corona
12 p2149 A69-26680

Thermal stability of power transistor plates calculation using equivalent body with equivalent heat source at upper surface
12 p2042 A69-26881

Thermal stability of complex transistorized structures determined by extending method of single heat source equivalence to several interacting sources
12 p2042 A69-26882

Unsteady temperature distribution in solid sphere with variable internal heat source and surface subjected to variable heat flux
13 p2373 A69-27773

Temperature measurement associated with bubbles leaving heat source in subcooled pool boiling carbon tetrachloride analyzed, using high speed motion pictures by schlieren optical system
[ASME PAPER 68-HT-47] 13 p2374 A69-27779

Cellular convection suppression by parallel vertical thermally conducting walls inserted into bottom-heated fluid, analyzing effect on critical Rayleigh number
13 p2374 A69-27782

Stresses in infinite solid elastic circular cylinder due to rotating line source of heat
13 p2364 A69-28206

SNAP 13 generator designs to develop technology for isotope heated thermionic converters, describing tests, efficiencies, power outputs and life times
14 p2481 A69-29191

Heat pipes for heating emitters of thermionic converters at high temperatures, noting capillary optimization and thermal resistance values
14 p2539 A69-29208

Periodic radial heat flux in infinite cylinder with varying heat sources, assuming time variable heat exchange on surface
15 p2717 A69-30575

Thermoelastic stresses in isotropic circular cylinder with surface locally heated by external Newtonian heat source, considering various heat transfer conditions
15 p2714 A69-31178

Thermal conductivity of semiinfinite rod with insulated surface and constant internal heat source, considering finite heat propagation rate
15 p2719 A69-31181

Temperature field, strains and stresses induced in thin circular disk by unsteady heat source, noting time effect and resonant vibrations
17 p3054 A69-33021

Solar wind model for studying long wavelength turbulence as heat source for alpha particles and protons in solar plasma
18 p3186 A69-34299

Reflected shock front interaction with heated thin gaseous filament studied in shock tube by spark interferometric and schlieren technique
18 p3228 A69-34468

Asymptotic solution of supersonic linearized nonisotropic flow of viscous and heat conducting gas with internal heat sources past cylindrical shell, deriving surface pressure
18 p3089 A69-35460

Regenerative life support systems, discussing water reclamation, carbon dioxide removal, onboard oxygen generation and radio isotope thermal energy sources
19 p3262 A69-36318

Cascaded thermoelectric module for spacecraft power conversion via module integration with radio isotope heat source, bonding SiGe and PbTe stages
20 p3465 A69-37706

Circulation near turbopause effect on lower thermosphere composition changes, noting heat source for warmth over winter polar region
21 p3704 A69-38366

Thermal stress distribution induced in wedge by apex heat source analyzed using elasticity theory, considering lateral surface heat transfer
21 p3833 A69-38644

Co 60 kernel heat source for multikilowatt space power supplies, stressing design for maximum safety
23 p4187 A69-42257

ISOTEC thermoelectric generators for space power, describing design features, operation, power output and radioisotope heat source
23 p4189 A69-42270

Solid state chemical heat sources aboard unmanned planetary landing vehicles to maintain batteries and experiments operability during cold planetary nights
23 p4070 A69-42275

Brayton-B generator for 2-10 kwe production, describing design, heat source/rejection, efficiencies and preliminary test data analysis
23 p4071 A69-42278

HEAT STORAGE

Volatile liquid pressurization, discussing pressurants, heat sources and system design
[AIAA PAPER 68-630] 02 p0232 A69-12382

Molten salts thermal diffusivity measurement method at temperatures above melting point
[ASME PAPER 68-WA/ENER-5] 05 p0848 A69-16161

Heat storage cells for satellite solar power plants based on latent heat of fusion and single phase heat carrying agent
06 p0870 A69-17604

HEAT TESTS

U HIGH TEMPERATURE TESTS

HEAT TOLERANCE

Manual performance relationship to men exposed to cold, thermal neutral and hot environments, discussing finger dexterity and motor coordination tests
03 p0381 A69-14074

High temperature effects on physiological functions of man noting cardiovascular system and heart performance, body heat exchange and blood and urine composition
05 p0710 A69-16523

Mental and physical human performance characteristics under thermal loads noting admissible temperatures and endurance limits
08 p1263 A69-19940

Synergistic effects of prolonged heat exposure and whole body irradiation with ionizing radiation on survival time in hamsters
08 p1263 A69-20174

Brief intense thermal stresses effects on cardiovascular system of man, noting criticality of effective blood volume for circulatory competence
08 p1264 A69-20668

Skin temperature and cutaneous pain during warm water immersion, refuting subcutaneous thermal gradient hypothesis for stimulation of heat pain
08 p1267 A69-20683

Heat susceptibility and tolerance in astronauts obtained by plot of skin and oral temperatures for subject under thermal stress
10 p1644 A69-23376

Heat and humidity endurance limits in man
10 p1645 A69-23494

Artificial heat acclimatization effect on orthostatic tolerance in man exposed to stresses of heat, exercise and dehydration
16 p2746 A69-32810

High temperature effects on physiological functions of man noting cardiovascular system and heart performance, body heat exchange and blood and urine composition
18 p3096 A69-34742

Time required for acclimatization to work in high temperatures, noting rectal temperature and heart rate changes
21 p3654 A69-38905

Strenuous physical training effects on human tolerance for work in heat, measuring rectal and mean skin temperatures and heart rates
22 p3890 A69-40199

Severe heat stress effects on respiratory frequency, rectal temperature, blood gases and pH of conscious dog
23 p4081 A69-41432

Heat tolerance in case of SST aircraft air conditioning failure, discussing physiological and psychomotor reactions and time curves for metabolic activity levels
24 p4277 A69-43382

HEAT TRANSFER

NT AERODYNAMIC HEAT TRANSFER
NT CONDUCTIVE HEAT TRANSFER
NT CONVECTIVE HEAT TRANSFER
NT HYPERSONIC HEAT TRANSFER
NT LAMINAR HEAT TRANSFER
NT RADIATIVE HEAT TRANSFER
NT SUPERSONIC HEAT TRANSFER
NT TURBULENT HEAT TRANSFER

Heat transfer between arc column and discharge chamber wall of vortex linear plasmatron, using approximate similitude method
01 p0125 A69-10091

Heat exchange and hydraulic resistance in turbulent heat exchangers in longitudinal air flow calculated by criteria equations
01 p0173 A69-10092

Impulse and kinetic energy transfer in rarefied gases analyzed on basis of kinetic theory, considering surface curvature effect
01 p0173 A69-10093

Relationship between cooled surface temperature and pressure self oscillation frequency during heat transfer to turbulent fluid flow, showing temperature variations
01 p0173 A69-10094

Schlieren method for studying rotating sphere heat transfer during natural convection
01 p0174 A69-10095

Simple and shock waves in nonlinear unsteady heat and mass transfer, discussing conditions for transforming simple waves into shock waves
01 p0174 A69-10096

Mach-Zehnder interferometer for studying temperature distribution and heat transfer in turbulent jets, noting temperature dependence on jet thickness at different angles of attack
01 p0005 A69-10101

Linear partial differential equations for nonlinear intensive heat and mass transfer, discussing analogy between transfer processes and electromagnetic waves distribution
01 p0174 A69-10104

Thermographic phosphor technique to provide transient temperature measurements in impulse wind tunnel
01 p0078 A69-10152

Laser cone calorimeters calibration to determine heat capacity
01 p0079 A69-10220

Heat transfer situations in plasma flow indicates very high heat fluxes per unit area on surfaces with electric current
[ASME PAPER 68-HT-38] 01 p0175 A69-10314

Heat transfer principles analyzed in development of new quenchants for aluminum, noting properties of inversely water soluble polyalkylene glycols
01 p0087 A69-10900

Cryogenic expansion to pressures below triple point and resulting formation of solid-vapor mixtures, discussing flow and heat transfer characteristics in heated tubes
01 p0176 A69-11146

Flow nonuniformity measured in shock tubes by determining heat transfer rate to fine wire probes
01 p0062 A69-11219

Transformation laws for thermodynamic quantities confirming conventional formulation by mechanical model of heat
01 p0122 A69-11288

Heat transfer procedure and equipment during boiling under short term weightlessness
01 p0177 A69-11313

Time history of unsteady heat transfer in laminar boundary layer over semiinfinite flat plate due to step change in wall temperature or wall flow
01 p0177 A69-11401

Turbulent fluid transport properties predicted by simple model for fluid behavior, obtaining mass, momentum and energy diffusivities
01 p0177 A69-11402

Heat transfer between concentric cylinders at different temperatures measured for argon, neon and helium
01 p0177 A69-11403

Nonlinear diffusion of heat in semiinfinite wall having thermophysical characteristics dependent on temperature, showing dissymmetry between heating and cooling
01 p0177 A69-11404

Accommodation coefficient effect on linearized heat transfer in rarefied gas between parallel plates and concentric cylinders
01 p0177 A69-11405

Heat transfer dependence on direction of heat flow in stainless steel/aluminum interfaces, showing surface roughness and flatness influence
01 p0177 A69-11406

Frictional and heat transfer characteristics of laminar flow in porous tubes, using numerical solutions to flow and energy equations
01 p0177 A69-11408

Pressure to density ratio to analyze one dimensional high temperature gas flows with heat transfer, considering motion equations
02 p0350 A69-11576

Venus microwave phase effect analyzed assuming dry massive Venus atmospheric model, discussing heat transfer processes
02 p0319 A69-12108

Liquid nitrogen dispersed flow film boiling data accounting for droplet breakup by vapor acceleration, drag coefficient and heat transfer from wall
[ASME PAPER 68-HT-44] 02 p0351 A69-12203

Nucleate pool boiling heat transfer of liquid nitrogen from circular disks with different surface conditions including copper and nickel mirror finishes, roughness and coatings
02 p0352 A69-12207

Relativistic heat transfer formula and pressure definition in relativistic thermodynamics
02 p0352 A69-12253

Uniqueness and existence theorem concerning stability of solutions of mixed nonlinear boundary value problem, discussing generalized heat transfer phenomena
02 p0352 A69-12255

Electrically controlled heat transfer between flat parallel flow hydrocarbon diffusion flame and walls of combustion chamber
02 p0353 A69-12324

Heat transfer in pyrolytic graphite analyzed by hybrid computer simulation
02 p0353 A69-12387

Electric potential effects on heat transfer from plasma to solid wall, measuring heat input rates
02 p0290 A69-12423

Determining influence of blowing various gases into boundary layer on friction and heat and mass transfer when external flow velocity varies according to power law
02 p0234 A69-12581

Heat production rate equivalence to heat removal rate during ignition of ballistite powder by incandescent wires
02 p0354 A69-12668

Variational technique for determination of temperature fields due to nonuniform heat transfer over surface of heat producing body
03 p0531 A69-12864

Heat transfer in cooled portion of air gas flow area of high temperature gas turbines
03 p0495 A69-12957

Centrifugal force field influence on heat exchange between gas and blade cascade studied with noncooled blades at low temperatures
03 p0531 A69-12959

Diathermal regenerative cooling of combustion chambers and engine nozzles with supercritical heat transfer mode
03 p0495 A69-12970

Gas dynamic choking limitation on heat transfer capacity of heat pipe operating at low vapor pressures from comparison of theory and experiment
03 p0531 A69-12989

Heat transfer in crossed field MHD Couette flow for incompressible fluid, assuming linear wall temperature in flow direction
03 p0476 A69-13306

Heat input influence on hypersonic flows past sphere and circular cylinder
[DVL-844] 03 p0364 A69-13663

Heat transfer covering heat conduction, channel flow, boundary layer flow, separated flow, etc
04 p0684 A69-14354

Dynamic processes of heat and mass transfer in transpiration cooling of gas flow
04 p0684 A69-14355

Heat transfer through turbulent boundary layer on porous plate with blowing and suction, determining Stanton numbers
04 p0586 A69-14356

Average energy dissipation in MHD duct flow of arbitrary cross sectional shape, evaluating bulk temperature, net wall heat flux and pressure gradient
04 p0635 A69-14724

Mean temperature distribution through inner and outer regions of turbulent boundary layer with injection through heated porous wall
04 p0685 A69-14729

Heat transfer, suction and injection in plane Couette flow analyzed for Rivlin-Ericksen fluid, using perturbation method
04 p0589 A69-14970

Nondestructive testing of quality of electroexplosive devices based on determination of heat flow between bridge wire and surroundings
04 p0607 A69-14973

Magnetic field effects on heat transfer between Ar plasma flow and channel wall, noting effects of temperature and Reynolds number
04 p0636 A69-14989

Approximate hydrodynamic equations applied to analysis of heat transfer in real gas flow in tube, taking into account energy transfer by radiation
04 p0686 A69-14993

Heat release during boiling of downward flowing liquid oxygen film
04 p0687 A69-15161

Heat transfer between body and gas flow near stagnation point
04 p0544 A69-15412

Telemetry technique utilizing thermocouple sensors for base heating determinations on free flight blunt cone in shock tunnels, noting electrical noise reduction
[AIAA PAPER 68-407] 04 p0604 A69-15514

Turbulent flow transfers from applications point of view, noting example of cooling of heated wall
05 p0743 A69-15558

Partial differential equations solution using analog, digital and hybrid computers, discussing heat transfer in parallel flow exchanger
05 p0723 A69-15705

Flow and heat transfer on nonNewtonian fluid about disk rotating with time dependent velocity, using Runge-Kutta-Gill technique for numerical integration
05 p0745 A69-15793

Quantitative analysis of nonsteady temperature field in long cylinder for sudden heating of semiinfinite axisymmetric lateral surface
05 p0845 A69-15797

Tangential stress distribution and heat transfer in circular cylinder with attached wall jet
05 p0746 A69-16022

Heat transfer, temperature and velocity profiles in circular free jet can be described by heat conduction type equations
05 p0747 A69-16032

Pool boiling heat transfer from stainless steel coated with Teflon to produce nonwetted surfaces
[ASME PAPER 68-WA/HT-12] 05 p0847 A69-16119

Heat transfer in accelerated turbulent boundary layer between converging planes with varying wall temperature and decreasing Stanton number
[ASME PAPER 68-WA/HT-13] 05 p0847 A69-16120

Binary mixture condensation on cooled vertical plate, formulating predictive theory based on conservation laws and other physical principles
[ASME PAPER 68-WA/HT-21] 05 p0847 A69-16124

Uniform hot fluid injection effect on heat transfer in constant property turbulent boundary layer
[ASME PAPER 68-WA/HT-24] 05 p0847 A69-16126

Heat transfer characteristics of single lines of circular air jets impinging on concave cylindrical surfaces, discussing nozzle target spacing effect
[ASME PAPER 68-WA/GT-1] 05 p0848 A69-16137

Nuclear radiation influence on pool boiling heat transfer to liquid helium, using irradiated copper as boiling surface
[ASME PAPER 68-WA/PID-3] 05 p0791 A69-16164

Quasi-method of characteristics with application to fluid lines with frequency dependent wall shear and heat transfer
[ASME PAPER 68-WA/AUT-7] 05 p0750 A69-16181

Heat transfer performance of porous nozzle blade cascade represented by two dimensional mathematical model
05 p0812 A69-16400

Injection or suction at disk surface, noting effects on heat and mass transfer in laminar flow about rotating disk

06 p1029 A69-17002

Heat and mass transfer by catalytic effect at wall, noting interaction of laminar boundary layer on flat plate

06 p1030 A69-17115

Heat pipe for thermal control of terrestrial and aerospace energy conversion systems

06 p1030 A69-17189

Heat transfer and IC, discussing semiconductors thermal and electrical analogs and thermal properties

06 p0894 A69-17216

Heat transfer bibliography covering boundary layer, phase flow, conduction, liquid metals, low density, measurement techniques, natural convection, radiation, thermodynamic and transport properties, etc

06 p1033 A69-17558

Approximate expression for temperature distribution during heat transient in infinite solids of plane, cylindrical and spherical geometry

06 p1025 A69-17779

Blade to rotor heat transfer in turbines determined from temperature distribution of rod in medium with nonuniform temperature

06 p1034 A69-17870

Heat transfer from unseeded DC augmented propane air flame to water cooled probe placed beyond discharge zone

06 p1035 A69-17934

Fluid flow longitudinal temperature profiles for inclusion in heat transfer computer program [AIAA PAPER 69-30]

06 p1038 A69-18174

Computer program for predicting temperature distribution and heat transfer through coated and uncoated window systems of aerospace vehicles [AIAA PAPER 69-28]

06 p1038 A69-18178

Scaled models for spacecraft thermal control, considering radiation-conduction-convection heat transfer [SAE PAPER 690196]

07 p1116 A69-18304

Igniter design guidelines, types and characteristics of igniter materials [WSCIPAPER 68-32]

07 p1202 A69-18361

Heat transfer to wedge in nearly free-molecular hypersonic flow of strongly rarefied gas

07 p1050 A69-18707

Solid body surface temperature relation to heat flux during cooling by fluid flow solved on computer

07 p1241 A69-18923

Heat and mass transfer - Conference, Minsk, May 1968

07 p1243 A69-19732

Heat transfer in horizontal and vertical tubes with viscous gravity flow with boundary conditions

07 p1243 A69-19733

Turbulent flow effect on heat transfer in supersonic jet with plane infinite obstacle perpendicular to jet axis

07 p1243 A69-19738

Aluminum effect on ammonium percholate/polyformaldehyde mixtures combustion properties noting heat transfer decrease into k phase

08 p1375 A69-20338

Von Karman flow changes due to unsteady heat transfer from rotating disks impulsively changing temperatures, particularly steady state and response time

08 p1422 A69-20996

Heat transfer mechanism in solid body, deriving integrodifferential equation with classical equation and hyperbolic equation of heat propagation as special case

09 p1621 A69-21587

Homogeneous parabolic differential equation for heat transfer of two finite bodies in thermal contact solved by power series

09 p1532 A69-21628

Stagnation point heat transfer sensitivity to free stream turbulence attributed to external vorticity, noting correlation with Prandtl number

09 p1622 A69-21905

Transition of hypersonic boundary layers on conical body using shock tunnel, obtaining surface heat transfer distributions [AIAA PAPER 68-39]

09 p1482 A69-21943

Heat transfer effect on population inversion time variation in pulsed carbon dioxide laser and molecules excitation rates dependence on gas mixture composition

09 p1519 A69-22289

Thermal approach to pulsating combustion, determining temperature-time variation, frequency and pressure from mathematical model

09 p1625 A69-22694

Flame propagation normal velocity evaluated with heat transfer equation at flame front taking into account temperature, pressure and inert gas percentage

09 p1625 A69-22695

MHD flow and heat transfer between coaxial rotating disks under axial magnetic field, using powers expansion of Reynolds number

10 p1728 A69-23234

Equilibrium dissociating gas laminar flow in circular tube calculated for heat transfer and hydraulic resistance, using boundary layer equations

10 p1679 A69-23426

Heat and mass transfer between cryogenic fluid and superheated wall, analyzing experimental data

11 p1996 A69-24228

Heat transfer in single phase medium at near critical state parameters

11 p1997 A69-24230

Heat transfer in MHD parallel plate channel flow in entrance regions analyzed by Galerkin method, noting Hall current effect

11 p1923 A69-24290

Advances in heat transfer, Volume 5, covering Monte Carlo method, film and transition boiling, convective heat transfer, etc

11 p1997 A69-24456

Monte Carlo method application to heat transfer analysis including radiation, rarefied gas energy transfer and conduction

11 p1997 A69-24457

Film and transition boiling as functions of critical temperature, discussing role of heat transfer and vapor production

11 p1997 A69-24458

TWT heat pipe cooled depressed collector designed as compact heat transfer device and electrical insulator

11 p1847 A69-24746

Laminar Newtonian flow heat transfer to fluids with variable physical properties in vertical tubes with constant wall heat flux, considering viscosity and density

11 p2000 A69-25164

Ignition of condensed homogeneous combustible materials in presence of phase transition in heated layer, discussing temperature distribution and ignition delay time in ammonium perchlorate

11 p2000 A69-25189

Ignition critical conditions based on reactions in condensed phase, discussing initiation from pulsed and continuous external heat sources, heat release by chemical reactions of ignition, etc

11 p2001 A69-25191

Flame front propagation over solid fuel surface with hot igniting material injected into end-to-end cavity, discussing heat transfer by convection and radiation

11 p2001 A69-25193

Thermal conductivity of polycrystalline beryllium oxide as function of temperature and pressure in argon or helium atmosphere, discussing heat transfer mechanism

11 p1906 A69-25225

Differential catalytic thin film heat gage for measuring surface temperature variations and ionized flow heat transfer, noting insulating boundary layer thickness

11 p2002 A69-25231

Buoyancy effect on boundary layer flow over semi-infinite vertical plate heated to constant temperature in uniform free stream

11 p1874 A69-25352

Numerical integration of equations for three dimensional laminar boundary layer on sharp elliptical cones in supersonic flow of ideal gas, discussing heat exchange

11 p1821 A69-25477

Lumped element construction technique involving crossed coils to reduce ferrite produced heat in resonance isolators, using substituted YIG

11 p1856 A69-25632

Heat and mass transfer in laminar boundary layer on porous flat plate with variable suction or injection velocity and constant wall temperature

12 p2061 A69-25947

Unsteady temperature field and thermal stresses for anisotropic and orthotropic plates heated by heat sources and having Newton law heat transfer

12 p2177 A69-25992

Finite difference method for heat transfer for developing laminar flow at inlet of circular uniformly heated and isothermal tube, determining Nusselt number

12 p2062 A69-26242

Heat removal from laser ruby rod by Cu prism connected to cooling system, discussing limiting factors in heat transfer area size

12 p2108 A69-26592

Pressure and heating rate correlations for rocket exhausts impinging on flat plates and curved panels, generating axisymmetric real gas exhaust plumes

12 p2190 A69-26781

Internal flows of compressible fluids with heat transfer in accelerating nozzles and constant area ducts, simplifying equations by assuming one dimensional flow

12 p2012 A69-26790

X-15 research aircraft program piloting problems, ground facilities, heat transfer, space flight and steep reentry

12 p2014 A69-26872

Soviet book on liquid fuel rocket engines design covering gas expansion in nozzles, mixture formation, heat transfer, injectors and supply systems

12 p2148 A69-27078

Theoretical model describing electrodynamic plasma properties of HF flame discharge in air, heating discharge envelopes by heat diffusion from discharge channel surface

12 p2140 A69-27125

Thermographic phosphor coatings to obtain optical quantitative heat transfer distribution on wind tunnel models

12 p2099 A69-27150

Heat transfer between surfaces as secondary effect in gas bearing lubrication from analysis taking into account viscosity variation with temperature [ASME PAPER 68-LUBS-4]

13 p2267 A69-27286

Electric arc and hydrogen flow interaction at high pressure, showing radiation role in heat exchange

13 p2305 A69-27387

Velocity, enthalpy and mass flux radial distributions in laminar boundary layer from calorimetry of argon subsonic flow [ASME PAPER 68-HT-16]

13 p2374 A69-27776

Heat and mass transfer conditions in ablation of shear thinning and thickening fluids at stagnation point [ASME PAPER 67-HT-78]

13 p2374 A69-27778

Thermal emission from metal in contact with dielectric for cryogenic insulation applications

13 p2374 A69-27783

Heat transfer for incompressible inviscid fluid flow in cone, expressing solution in terms of dimensionless numbers

13 p2375 A69-27788

Transient heat transfer in formation of steady crossed fields MHD plane Couette flow for walls, giving momentum, induction and energy equations

13 p2375 A69-27791

Velocity and temperature profiles in gaseous turbulent boundary layer above liquid surface used to study liquid film cooling heat transfer

13 p2375 A69-27792

Collection of papers on heat transfer covering convective and radiative transfer, numerical methods, nucleate boiling, dropwise condensation, two phase flow, etc

13 p2375 A69-28138

Numerical methods for solving steady state and transient heat transfer problems suitable for high speed digital computer

13 p2376 A69-28141

Dropwise condensation, analyzing nucleation sites, growth, vapor capture, heat transfer rates and surface texture

13 p2376 A69-28143

Heat and mass transfer in two dimensional turbulent free shear flows including separated and reattached flows

13 p2377 A69-28145

Chemically reacting flow field and solid surfaces, formulating nonequilibrium laminar boundary layer equations for two dimensional and axisymmetric flows

13 p2377 A69-28147

Internal and external heat transfer instrumentation and equipment bioengineering, listing thermal conductivity and diffusivity of biological materials

13 p2213 A69-28150

Heat transfer involving particulate suspension, discussing characteristics of flowing suspension, inertia effects, impingement, deposition, radiation and electric charges

13 p2377 A69-28151

Heat flow resistance between solid bodies in contact in vacuum

13 p2378 A69-28338

Bibliography of books and periodicals concerning heat transfer classified under applications, boundary layer, channel flow, conduction, liquid metals, MHD, etc

13 p2379 A69-28341

Similarity theory similar to Nusselt and Stanton numbers obtained by triple analogy for heat, mass and momentum transfer

13 p2380 A69-28560

Finite thickness plate heat equation using Legendre polynomials

14 p2537 A69-28970

Coupled heat and mass transfer with zero order reactions in two phase systems consisting of drops, bubbles or solid particles

14 p2537 A69-29012

European heat pipe research emphasizing transportable heat quantities, heating rate and life duration

14 p2538 A69-29201

Corrosion mechanism in high temperature Nb-Zr/Li and Ta/Li heat pipes and heat transfer measurements, noting oxygen content of wall material

14 p2462 A69-29203

Multifoil thermal insulation using oxide particle layer separation, discussing insulation heat transfer characteristics as function of source temperature and oxide particle size

14 p2539 A69-29213

Heat transfer at gas flow stagnation point past blunt body under radiation from air layer in shock wave wake, using gray gas model

14 p2390 A69-29614

Bibliography of Soviet books and articles on heat and mass transfer covering thermodynamics, heat conduction, convection and radiation, etc

14 p2540 A69-29900

Magnetic field effect on heat and mass transfer in incompressible fluid MHD flow

14 p2500 A69-29901

Weak shock waves relaxation time and amplitude and acoustic velocity as functions of thermorelaxing media

15 p2590 A69-30103

Selectively pumped thermal vacuum test chamber for orbital heat transfer and environment simulation for flight vehicle performance prediction

15 p2587 A69-30392

Heat and mass transfer interaction at wall for laminar boundary layer on flat plate, considering catalytic effect of wall in atomic nitrogen recombination

15 p2716 A69-30415

Monograph on Prandtl number effect on heat transfer and pressure loss in artificially roughened channels

15 p2717 A69-30934

Injected gas flow nonisothermicity and transversity effects on friction, heat transfer and flow parameters at cylindrical tube inlet

15 p2592 A69-30986

Heat transfer - AICHE/ASME Conference, Philadelphia, August 1968

15 p2718 A69-31114

Heat and mass transfer in porous medium with bulk flow in thin adjacent channel, applying Green function analysis to hydrogen-oxygen fuel cell

15 p2552 A69-31115

Creeping flow model of Leidenfrost boiling with moving surface, discussing vaporization time for equivalent drop film boiling on stationary surface [AIChE PAPER 20]

15 p2718 A69-31116

Temperature distributions in layer with internal heat source and turbulent fluid flow cooling, deriving differential heat transfer equations

15 p2718 A69-31169

Wind tunnel investigation of turbulent gas flow heat transfer and hydrodynamic drag in variable pressure gradient field of divergent-convergent channel

15 p2548 A69-31173

Thermoelastic stresses in isotropic circular cylinder with surface locally heated by external Newtonian heat source, considering various heat transfer conditions

15 p2714 A69-31178

Plane Cauchy problem solution for differential equations in heat and mass transfer theory, applying contour integral method in matrix construction

15 p2719 A69-31262

Heat transfer in rarefied gas plane Couette flow determined by BGK model and moments method of half range distribution functions

16 p2876 A69-31688

Near free molecule heat transfer and density distribution between concentric spheres using BGK model equation and Knudsen iteration technique

16 p2877 A69-31921

Analytical expressions validity for skin friction in compressible turbulent boundary layer over wide range of Reynolds numbers and heat transfer conditions

16 p2771 A69-31926

Reacting gas ignition by sudden contact with heated noncatalytic surface, deriving heating time and transferred heat amount by Blasius perturbation method

16 p2878 A69-31955

Soviet bibliography of heat and mass transfer covering thermodynamics, aerohydrodynamics, MHD, transfer processes in various media, etc

16 p2878 A69-31960

Hybrid rockets combustion mechanism, discussing turbulent boundary layer with heat and mass transfer, chemical reactions, etc

16 p2879 A69-32002

Monograph on engineering calculations of momentum, heat and mass transfer through laminar boundaries having arbitrary pressure distribution and constant physical properties

16 p2879 A69-32203

Medium temperature fuel cells advantages including improved electrochemical reaction kinetics, water and heat removal

16 p2739 A69-32417

Injection film cooling effect on surface heat transfer downstream of flush nontangential injection holes and slots in turbine applications [AIAA PAPER 69-523]

16 p2843 A69-32703

Inlet thermal boundary layer thickness effect on conical nozzle heat transfer and boundary layer determined by operating nozzle with cooled/uncooled inlet [AIAA PAPER 69-474]

16 p2881 A69-32780

Linear heat flux in thin composite plate with internal point source, assuming no heat transfer at surface and neglectable temperature changes

17 p3068 A69-33126

Constant temperature heat pipe for thermal control of spacecraft components by direct coupling to external radiator [AIAA PAPER 69-632]

17 p3070 A69-33262

Optimal design for improving thermal performance of existing spacecraft thermally actuated louver system by increasing open-to-closed emittance ratio [AIAA PAPER 69-627]

17 p3071 A69-33269

Heat transfer suppression techniques in high temperature low density fiberglass insulation for flight vehicles [AIAA PAPER 69-606]

17 p3072 A69-33279

Shock layer properties, radiative and convective heat transfer about two hypersonic blunt bodies at zero angle of attack in assumed Martian atmosphere [AIAA PAPER 69-634]

17 p2891 A69-33281

Electron heat transfer and spherical probe characteristics in moving nonequilibrium plasma analyzed at stagnation region as function of solid surface potential [AIAA PAPER 69-699]

17 p3011 A69-33475

Transverse magnetic field effect on shear turbulence structure of magneto-fluid-mechanic pipe flow with and without heat transfer [AIAA PAPER 69-723]

17 p3012 A69-33497

Clear air turbulence uninfluenced by mesoscale disturbances or terrain, discussing relationship between density profile curvature and heat and momentum transfer

17 p2998 A69-33733

Heat transfer from cylindrical copper surface to liquid helium at 4 degrees K, discussing temperature fluctuations in nucleate boiling region

17 p3074 A69-33780

Terminal characteristics of composite superconductor, taking into account heat transfer to coolant, interface thermal contact resistance and superconductor size

17 p3007 A69-33792

Optimum ballast resistance of thin film heat transfer gage producing shock arrival time, thickness and structure data of low pressure shock tube

18 p3117 A69-34470

Heat transfer from molybdenum tube at high temperature to argon flow inside, using circulation principle

18 p3229 A69-34712

Transport processes effect in shock wave on hypersonic flow past blunt body in neighborhood of stagnant point, noting heat transfer

18 p3086 A69-34910

Thermal accommodation coefficients determination, comparing techniques based on free molecule flow heat flux data

18 p3230 A69-35071

Fluctuating heat transfer and flow measurements for circular cylinder in crossflow with simultaneously imposed transverse standing sound field

18 p3124 A69-35384

Calibration of inertial and surface temperature heat transfer transducers for hotshot and shock tube measurements developed and tested at ONERA [ONERA-TP-683]

19 p3305 A69-35726

Ferroelectric transducer for heat transfer rates and flow measurement in gaseous systems with autostabilized temperature, noting film coefficient

19 p3307 A69-35749

Supersonic transport aviation fuel thermal stability measurement data correlated with data deduced from heat transfer measurements

19 p3393 A69-36210

Applied mechanics - Conference, Waterloo, Ontario, Canada, May 1969

19 p3374 A69-36655

Heat transfer problem involving temperature determination of body and ambient medium, deriving existence and uniqueness theorems for boundary value problems in curvilinear regions

20 p3631 A69-36991

Unsteady heat transfer between gas flow and solid surface during melting

20 p3631 A69-37088

Reynolds analogy factor approximate calculation for turbulent boundary layer with pressure gradient

20 p3514 A69-37183

He and Ar arc-heated flows into reservoir and expansion in converging-diverging supersonic nozzles, considering flow equilibrium effect on heat transfer and enthalpy

20 p3631 A69-37198

Isotherms location in simple nonconstant area/diverging/ tube configuration investigated for heat transfer

20 p3632 A69-37219

Book on heat transfer from horizontal heating surfaces to stationary boiling liquids, heating surface roughness effect and bubble formation

20 p3633 A69-37917

Heat transfer to compressible laminar jet flowing along flat wall, obtaining distributions of temperature, wall shearing stress, heat transfer rates and jet thicknesses [ASME PAPER 69-FLCS-30]

20 p3516 A69-37979

Heat transfer in radial flow between two parallel plates, calculating Nusselt number for laminar and turbulent flows

20 p3633 A69-38176

Unsteady boundary layer flows of compressible fluid over semiinfinite flat plate, discussing heat transfer rate

20 p3518 A69-38318

Book on heat and mass transfer in recirculating flows, presenting elliptic differential equations and numerical solutions by computer

21 p3691 A69-38333

Heat transfer and hydrodynamic resistance for turbulent gas flow in longitudinal positive and negative pressure gradients analyzed using Reynolds number data

21 p3848 A69-38635

Thermal stress distribution induced in wedge by apex heat source analyzed using elasticity theory, considering lateral surface heat transfer

21 p3833 A69-38644

Heat loss from cylinders at low Reynolds numbers in N-He and N-Ne binary mixtures

21 p3848 A69-38706

Optimal boundary layer control ensuring minimum heat transfer to porous plate from incompressible flow of hot gas of cooling system

21 p3849 A69-38846

Gas heat transfer on turbine interblade channel surfaces and working blade end surfaces at operating Reynolds and Mach numbers

21 p3849 A69-38858

Heat transfer in curved channel as function of inlet configurations, obtaining Nusselt number equations for thermal and mixed convection and laminar flow

21 p3850 A69-38866

Velocity decay and heat transfer rates measurement in cylindrical wall jet formed by jet emerging through convergent nozzle

21 p3695 A69-38972

Transient heat transfer single blow temperature response functions characterized by first moment of downstream-upstream fluid temperature difference, showing curve matching applications

21 p3851 A69-39291

Instantaneous frozen layer thickness and temperature profile in solidified layer obtained by iteration technique

21 p3852 A69-39433

Heat pipes for isothermal and adaptable energy transfer for space applications, discussing temperature control by fluid choice

21 p3852 A69-39475

Time-optimal nuclear rocket propellant start-up with thermal stress constraints based on distributed parameter model, deriving algorithm for flow rate increase
21 p3768 A69-39632

Finite-difference grid procedure for predicting friction heat and mass transfer in two dimensional boundary layers
22 p3932 A69-40939

Heat transfer and surface thermal conduction characteristics of contact of two solid bodies, discussing pressure effect, measurement and analytical techniques
23 p4237 A69-41327

Sonic vapor flow heat transfer limitations in heat pipes for Na, K and Cs, showing strong influence of temperature and working fluid
23 p4239 A69-41719

Thermal isolation characteristics of low conductance interstitial materials determined, using test apparatus of axially loaded radiation shielded cylindrical column in vacuum
[AIAA PAPER 68-31] 23 p4239 A69-41889

Hypersonic turbulent flow heat transfer and pressure data for flat plate containing steps and cavities obtained in hypersonic wind tunnel
[AIAA PAPER 68-673] 23 p4060 A69-41902

Organic Rankine cycle system using heat absorption from turbine exhaust to provide increased electrical output and to power air conditioning
23 p4070 A69-42267

Prandtl number influence on heat transfer and pressure drop characteristics of roughened channels, determining friction factor
24 p4407 A69-42915

Graph analytical method for calculating heat transfer in diathermic exchangers during boiling together with critical thermal loads
24 p4408 A69-43080

Monte Carlo method applied to heat transfer in rarefied gas flow between parallel plates involving temperature jump in Knudsen layer
24 p4246 A69-43490

Heat exchange at stagnation point during interaction between underexpanded axisymmetric supersonic jet and flat obstruction, using method of characteristics
24 p4246 A69-43493

Intense heat exchange narrow zones on blunted semicone surfaces in hypersonic gas flows ascribed to large Reynolds numbers
24 p4246 A69-43494

Heat transfer to highly accelerated turbulent boundary layer with and without mass addition, presenting data in terms of Stanton number vs Reynolds number
[ASME PAPER 69-HT-53] 24 p4409 A69-43518

Heat and mass transfer in gas suspension, studying suspended particles effects on heat transfer by irreversible thermodynamics
[ASME PAPER 69-HT-34] 24 p4410 A69-43528

Heat transfer and fluid friction of hydrogen and helium gas flows undergoing turbulent to laminar flow transition in heated pipe
[ASME PAPER 69-HT-54] 24 p4303 A69-43539

Hydrodynamic inlet conditions effect on film boiling and near critical hydrogen heat transfer, using data from electrically heated various geometry test sections
[ASME PAPER 69-HT-27] 24 p4412 A69-43541

Heat transfer capability and startup behavior of sodium heat pipes, studying heat transfer limit due to vapor velocity at evaporator end
[ASME PAPER 69-HT-21] 24 p4412 A69-43547

Wick-limited heat pipe performance, discussing maximum, steady heat transfer rate and transient response
[ASME PAPER 69-HT-20] 24 p4413 A69-43549

Rotating wickless hollow shaft heat pipe utilizing centrifugal acceleration for return pumping of condensate and transferring high heat fluxes
[ASME PAPER 69-HT-19] 24 p4413 A69-43550

Luminescent turbulent boundary layer prediction using mixing length model modified for viscous sublayer structural changes near wall compared with heat transfer data
[ASME PAPER 69-HT-13] 24 p4303 A69-43556

Laminar, transition and turbulent boundary layer heat transfer measurements along wall in thermal entrance region of high temperature turbulent airflow through cooled tube
[ASME PAPER 69-HT-8] 24 p4414 A69-43560

Boundary layer equations with heat transfer for laminar and turbulent incompressible flows about two dimensional and axisymmetric flows, using finite difference method
[ASME PAPER 69-HT-7] 24 p4304 A69-43561

Taylor Goertler vortex formation effect on heat transfer through boundary layer on concave wall
[ASME PAPER 69-HT-3] 24 p4414 A69-43563

Heat finite propagation velocity effects on temperature distribution and heat flux for step temperature change at semiinfinite body surface
[ASME PAPER 69-HT-1] 24 p4414 A69-43564

Superimposed free vortex swirl effect on flow and heat transfer in three dimensional axisymmetric laminar boundary layer
24 p4304 A69-43584

Stagnation region heat transfer with nongray gas subjected to external radiation using two step continuum absorption coefficient model
24 p4415 A69-43590

Laminar sublayer thickness in compressible turbulent boundary layers with and without heat transfer
24 p4306 A69-43724

HEAT TRANSFER COEFFICIENTS

Polycrystalline corundum thermal conductivity coefficients determination, describing measuring procedures at low temperatures
01 p0101 A69-10108

Heat and mass transfer coefficients derived for reacting gas mixtures by applying variational principle
01 p0006 A69-10400

Alternating direction implicit (ADI) methods for solving parabolic heat conduction equation with variable coefficients in two and three space dimensions
01 p0106 A69-10987

Heat transfer coefficient for spherical protuberance on plate with turbulent boundary layer
[ASME PAPER 68-HT-2] 02 p0351 A69-12204

Heat transfer near stagnation point in axisymmetric turbulent jet impinging on circular disk
02 p0354 A69-12491

Minimum drag configurations with low heat transfer for hypersonic bodies of revolution, noting performance at supersonic speeds
02 p0191 A69-12578

Experimental apparatus for measuring heat transfer coefficients into boiling K in tubes, investigating vapor-liquid mixtures hydrodynamic and electrical properties
03 p0534 A69-14150

Cone tip blunting effect on cone local laminar heat transfer rate noting cone configuration, semivertex cone angle and Mach number
04 p0542 A69-14721

Forced convection heat transfer coefficient invariance to flow reversal in Stokes and potential streaming flows past isothermal particles of arbitrary shape
04 p0590 A69-15274

Hydrogen arc in axially parallel magnetic field produces higher plasma temperatures by reduced thermal conductivity coefficient
07 p1189 A69-18489

Heat convection coefficient for wires enclosed in cylindrical tubes filled with water or ethanol, showing dependence on inclination angle
07 p1242 A69-18926

Shear stress at wall, averaged velocity field and turbulent heat transfer coefficients in straight smooth non-circular channels used to compute temperature fields
07 p1243 A69-19734

Laminar heat transmission coefficients in combustion zone for particular oxygen and kerosene mixture
08 p1421 A69-20585

Convective heat exchange coefficients for human organism in aircraft surroundings under homogeneous temperature conditions, deriving acclimatization equations
[AGARDOGRAPH-111] 08 p1266 A69-20673

Monograph on heat transfer coefficients of polystyrene foams noting contribution of gas conduction, convection and radiation to total heat transfer
08 p1421 A69-20716

Zero sensitivity integrated RC filter circuits design, exploiting capacitors and resistors property of having same temperature coefficient
08 p1300 A69-21174

Temperature profiles and heat transfer coefficients in two phase liquid-liquid stratified laminar flow of variable immiscible film thickness with surface evaporation
09 p1622 A69-21904

Local heat transfer coefficients in oscillating turbulent boundary layer over flat plate
[ASME PAPER 69-GT-34] 09 p1623 A69-22490

Surface heat transfer coefficients under perforated plate of multiple square array round impinging air jets
[ASME PAPER 69-GT-4] 09 p1624 A69-22508

Heat transfer coefficients for free convection from single horizontal cylinder to fluids computed from empirical correlation
09 p1625 A69-22693

Flow and heat transfer measurements for heated air in subsonic flow through contraction section connecting tube to conical section
[JPL-TR-32-1348] 10 p1809 A69-23194

Heat transfer rates for water, acetone and alcohol droplets splattering from heated plate, noting effect of impact angle and velocity
10 p1809 A69-23196

Heat transfer at plate in hydrodynamically stabilized turbulent boundary layer region, obtaining formulas for calculating transfer coefficients
10 p1809 A69-23427

Temperature field calculation in infinite plate with heat transfer coefficient and ambient temperature arbitrary functions of time
10 p1809 A69-23430

Horizontal surface heat transfer coefficient under simultaneous free and forced convection calculated as function of temperature head, air flow velocity and area
10 p1810 A69-24085

LF measurements with positive or negative temperature coefficient resistors based on current-voltage characteristics
11 p1845 A69-24522

Temperature variation effects on heat transfer in laminar tube flow, taking into account constant wall temperature and heat flow density
12 p2189 A69-25762

Heat and mass transfer coefficients derived for reacting gas mixtures by applying variational principle
12 p2062 A69-26668

Heat transfer coefficients for carbon dioxide near thermodynamic critical point for flow through electrically heated duct, noting turbulent forced convection as mechanism
[ASME PAPER 68-HT-32] 13 p2373 A69-27769

Local film heat transfer coefficients variations effect on longitudinal constant area fin surface under turbulent flow
[ASME PAPER 68-HT-20] 13 p2373 A69-27770

Heat transfer coefficient deterioration between fluid and tube wall at supercritical pressure and high heat fluxes
[ASME PAPER 68-HT-39] 13 p2373 A69-27771

Combined conduction and radiation transfer equations solutions for absorbing-emitting gas, obtaining slip coefficient for diffusion solution correct boundary condition
13 p2374 A69-27784

Heat transfer coefficients for supersonic open cavity flow recompression steps noting influence of step and flow shapes
13 p2375 A69-27786

Triangular profile circular fins efficiency determined from differential equations solution governing temperature distribution
13 p2375 A69-27790

NOL hypervelocity launcher heat transfer and erosion analysis by experiment and computer simulation
[AIAA PAPER 69-336] 13 p2242 A69-28272

Heat and mass transfer coefficients in binary laminar boundary layer during natural convection, taking into account enthalpy and thermal diffusion effects
13 p2378 A69-28312

Turbulent heat exchange coefficient radiation absorption and diurnal vertical variations effects on temperature field in surface layer of sea and atmospheric boundary layer
14 p2472 A69-29462

Partially ionized multicomponent gas mixture kinetics in strong electromagnetic field, determining magnetic field, stress tensors and transfer coefficients
14 p2492 A69-29610

Thermal conductivity coefficients in solar corona and chromosphere computed and tabulated for H plasma
15 p2694 A69-30788

Ceramic heat transfer gage for supersonic wind tunnel investigation of blunt swept wing leading edges aerodynamic heating
15 p2613 A69-31272

Effective heat transfer coefficient lambda for microscopic Fe particles traversing rarefied air, oxygen and Ar target gases
16 p2769 A69-31870

Heat transfer in laminar separated flows with flat plate segment connections, indicating correlation between local heat transfer rates for successive regions
16 p2879 A69-32169

Internal heat transfer coefficients for impingement cooling of gas turbine airfoil leading edge
[AIAA PAPER 68-564] 17 p3022 A69-34021

Nonuniform heating rates during laminar boundary layer transition on slender cone at hypersonic speeds
18 p3085 A69-34435

Heat transfer coefficient approximation under thermal instability conditions complicated by radiant heat exchange at plate surface, noting aircraft design applications
18 p3230 A69-34984

Channel heat transfer determination based on thermal conductivity coefficients as functions of temperature gradients in channel wall materials
18 p3230 A69-34988

Seam welded U-type fin efficiency and effectiveness, studying effects of fin height, heat transfer coefficient and thermal resistance
19 p3452 A69-36371

Local heat transfer coefficients determined from temperature distribution on porous walls, deriving mathematical expressions for various surface geometries and transfer modes
20 p3630 A69-36977

Flat surfaces downstream of heated section and porous strip, determining film cooling effectiveness and heat flux from heat transfer coefficients ratios
20 p3631 A69-37096

Heat transfer coefficient and flow patterns of horizontal circular plate for various Rayleigh numbers, noting surface temperature
20 p3632 A69-37523

Heat and mass transfer coefficients in binary laminar boundary layer during natural convection obtained with integral equations and Karman-Polhausen method
21 p3848 A69-38633

Heat transfer coefficients, boundary layer thicknesses and temperature and velocity distributions in free convection boundary layer in closed axisymmetric volumes
21 p3848 A69-38634

Thermal conductivity coefficient of gas mixtures at low temperatures obtained using quantum diffusion model and Chapman-Enskog method for Boltzmann equation
21 p3848 A69-38638

Asymptotic method applied to nonlinear equations, determining thermal conductivity coefficient for temperature distribution in moving anisotropic media
21 p3848 A69-38642

Heat transfer coefficients evaluated from gas to rotating turbine blades in unsteady operation, using unsteady thermal conductivity and gradient methods
21 p3850 A69-38864

Heat transfer characteristics in evaporative, transpiration cooled porous systems
21 p3851 A69-39037

Constant surface heating of half space with temperature dependent thermal conductivity
21 p3851 A69-39292

Ablation effect on heat transfer coefficient of carbon, silica and ceramic cloths impregnated with phenolic resin subjected to torch testing and motor firing
21 p3753 A69-39800

Heat transfer from spheres in free finite width flow, determining heat transfer coefficient distribution as function of flow width and Reynolds number
21 p3855 A69-39849

Forced convection heat transfer coefficient for fully developed turbulent flow in circular tube with time-varying circumferential heat flux
22 p4051 A69-40921

Heat transfer coefficient of turbulent air flow found independent of temperature head during cooling
22 p4051 A69-41026

Thermal conductivity relationship to heat transport coefficients for gases and liquids with charged or uncharged particles
23 p4237 A69-41324

Rectangular fins arrangement on horizontal surfaces for optimum free convection heat transfer coefficient, considering fin weight, height and spacing effects
[ASME PAPER 69-HT-44] 24 p4409 A69-43517

Heat transfer during nitrogen tetroxide nucleate boiling at various pressures and heat fluxes
[ASME PAPER 69-HT-58] 24 p4411 A69-43536

Air flow laminarizing turbulent boundary layer, determining velocity, turbulence intensity, temperature profiles and local heat transfer coefficients
[ASME PAPER 69-HT-10] 24 p4413 A69-43558

Turbulent pipe flow with wall suction, calculating friction factor, pressure gradient, heat and mass transfer coefficients, velocity and temperature profiles
[ASME PAPER 69-HT-4] 24 p4414 A69-43562

HEAT TRANSMISSION

NT AERODYNAMIC HEAT TRANSFER

NT CONDUCTIVE HEAT TRANSFER

NT CONVECTIVE HEAT TRANSFER

NT HYPERSONIC HEAT TRANSFER

NT LAMINAR HEAT TRANSFER

NT RADIATIVE HEAT TRANSFER

NT SUPERSONIC HEAT TRANSFER

NT TURBULENT HEAT TRANSFER

Unsteady heat flow in finite composite hollow circular cylinder using inverse method of eigenfunction expansion / method of finite integral transformation/
01 p0175 A69-10230

Thermal stresses near spherical inclusion in elastic matrix with uniform heat flow
01 p0171 A69-11264

Heat flow measurement from moon interior planned for Apollo missions to determine temperature increase rate with depth during lunar year
[AAS PAPER 68-207] 02 p0313 A69-11482

Dynamics of moving gas bubble injected in quiescent liquid, considering velocity, heat flow and mass transfer
[ASME PAPER 67-WA/HT-30] 02 p0351 A69-12201

Sensible and latent heat meridional transport associated with standing eddies computed from climatic mean data
04 p0627 A69-15085

Water and heat removal unit for hydrogen/oxygen fuel cell systems, discussing temperature distribution, heat and liquid transport
05 p0704 A69-15676

Variational methods applied to unsteady heat flow, describing approximate method for unsteady temperature field in heat conducting body
05 p0845 A69-15794

Stress concentration at thermally insulated holes in elastic material created by disturbance of uniform heat flow at holes
06 p1021 A69-17184

Weightlessness effect on critical heat flow during forced motion of water in different kinds of channels
07 p1243 A69-19616

Vibrational relaxation effects on laminar boundary layer velocity profiles and temperature and on layer thicknesses and wall heat flow downstream of shock wave
08 p1303 A69-20269

Displacement effect due to subsonic reaction heat front behind shock wave in two dimensional supersonic flows
08 p1252 A69-20691

Electroconvective instability produced by uniform electric field in poorly conducting fluid under stabilizing vertical temperature gradient, noting heat flow increase
08 p1352 A69-20791

Thermal stress field under uniform heat flow due to elliptical elastic inclusion for anisotropic case
08 p1418 A69-21003

Transient heat flow in isotropic solids by electrical analog modeling in orthogonal curvilinear coordinate system
09 p1477 A69-22241

Steady laminar boundary layer flow calculations extended to temperature boundary layer for given heat flow or temperature distribution at wall
10 p1808 A69-22915

Heat propagation in discharge plasma heated by magnetosonic wave, constructing transverse temperature profile
10 p1741 A69-23896

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants
11 p1956 A69-24398

Steady heat flow in cylindrical bodies with curvilinear rectangular cross sections, solving equation in form of Fourier series according to trigonometric functions
11 p2000 A69-24974

Shrinkage and heat release of polyglycol malinate binder during gamma radiation consolidation compared with thermochemical consolidation
12 p2117 A69-25991

Limiting heat power transported by sodium heat pipes dependent on capillary network geometry, inclination angle and operating temperature
14 p2538 A69-29205

Dimensionless approach to maximum flow in heat pipes and optimization of capillary structure
14 p2539 A69-29206

Liquid-vapor interaction in loop plates with different heat pipe capillary geometries using water as heat transporting medium
14 p2539 A69-29207

Thermal conductivity of semiinfinite rod with insulated surface and constant internal heat source, considering finite heat propagation rate
15 p2719 A69-31181

Second breakdown and other thermal instabilities analyzed by heat flow equation, obtaining stability criteria predicting reduced power dissipation for transistor at low currents
16 p2758 A69-31618

Relativistic exceptional wave propagating heat, computing speeds in direction orthogonal to heat vector
16 p2827 A69-32042

Earth surface heat flow pattern measurement and distribution techniques, considering relation to surface features and tectonic movements of crust
[AIAA PAPER 69-589] 17 p2961 A69-33284

Heat flow through ocean floor by measuring temperature gradient and thermal conductivity in ocean sediment
21 p3718 A69-39733

Heat flow in belt-type heat transport device allowing for conductive and mass transport effects, deriving expression for heat transfer capability
22 p4050 A69-40554

Thermal diffusivity measurement by nonsteady state methods, discussing time and temperature variables in heat flow differential equation
23 p4237 A69-41326

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants
24 p4390 A69-43788

HEAT TREATMENT

NT ANNEALING

NT NITRIDING

NT PULSE HEATING

NT STRESS RELIEVING

NT TEMPERING

Beta titanium alloys mechanical properties improvement, discussing effects of alloying elements, heat treatment and high temperature deformation
01 p0093 A69-10213

Charge materials purity found to increase beta-Ti alloys properties
01 p0094 A69-10216

Chemical vapor deposited W and W-Re alloys investigated for deposition variables and heat treatment effects on mechanical properties
01 p0097 A69-10648

Maraging steels ductile and strength characteristics with increased Co and Mo as function of Ni content, tempering method and aging
01 p0098 A69-10731

Soviet book on structure of thin metal films covering electron microscopic and electronographic studies, crystallization and heat treatment effects
01 p0140 A69-11106

Light austenitic grain boundaries in heat treated Cr-Mo-W-V alloy steels
01 p0100 A69-11295

Steel selection for heat treated parts, discussing strength and hardness, service conditions, carbon content, quenching, cost, etc
01 p0101 A69-11397

Heat treatment and shot peening effects on Al alloy fatigue strength and fine crystallographic structure
04 p0614 A69-14576

Low temperature aging prior to higher temperature artificial aging increases Al alloys strength
04 p0614 A69-14634

Thermal strengthening effect in aluminum due to temperature fluctuations
04 p0615 A69-14638

Overheated maraging steel mechanical properties improvement by heat treatment
04 p0615 A69-14646

Alpha to gamma transformation kinetics in maraging steel during heating, studying alloying elements redistribution
04 p0616 A69-14648

Maraging steel with reduced Co, establishing optimal temperature range for short aging
04 p0616 A69-14650

Heat treatment effects on stress corrosion cracking resistance of Al-Zn-Mg alloys, using cantilever loading in aqueous solution
04 p0617 A69-14933

Hot working temperature effects on Rene 63 mechanical properties and microstructures, using tensile and stress rupture tests, electron microscopy and X ray diffraction analysis

05 p0781 A69-16446

Film processing effects on cryogenic mechanical properties of polyethylene terephthalate

05 p0785 A69-16490

Two stage thermal treatment inhibiting influence on swelling and porosity linked to Kirkendall effect during sintering of Fe-Ni powder mixtures

05 p0782 A69-16616

Electron microscopy of titanium alloys noting preparation, heat treatment of samples, crystallographic structure, etc

05 p0782 A69-16807

Electron microscopic and microdiffraction study of structure of quenched and annealed titanium alloy foils at high temperatures

05 p0783 A69-16810

Plastic deformation, aging, heat treatment and machining effect on structure of thin films of AMg11 alloy

05 p0783 A69-16814

Cadmium ionization energy in InAs using heat treatment in hydrogen to eliminate anomalies

06 p0979 A69-16998

Structure and critical superconductivity current of titanium niobium alloy as function of heat treatment and deformation

07 p1158 A69-18532

Nimonic alloys recovery analyzed by X rays and electrolytic phase separation, showing precipitated gamma phase effect

07 p1159 A69-18533

Ti alloys thermomechanical treatment effect on strength and plasticity characteristics, noting single and double phase alloys and rupture

07 p1161 A69-18766

Tin and zirconium addition effect on transformations of titanium alloys during heat treatment

07 p1162 A69-18775

Ti alloy beta phase variations in quantity, composition and dispersion during quenching, thermomechanical treatment and aging

07 p1163 A69-18777

Ductility as principal cause of postweld heat treated stress relaxation cracking in nickel based Waspaloy and alloy 718

08 p1318 A69-19964

Roll planishing and thermal treatments effects on gas tungsten arc welded Ti-6Al-4V alloy on residual stresses, tensile, formability and fracture toughness properties

08 p1319 A69-19966

Metallographic and X ray study of cellular decomposition and precipitation in superconducting niobium zirconium alloy, noting heat treatment effect on current carrying properties

08 p1331 A69-20192

Organic quenchant additive for distortion free heat treatment of dip-brazed aluminum parts

09 p1504 A69-22065

Titanium alloy castings fatigue behavior at room and elevated temperatures in annealed and heat treated conditions

09 p1619 A69-22497

Slow recombination centers parameters in CdSe single crystals during heat treatment in vacuum or hydrogen atmosphere

09 p1560 A69-22664

Heat treatments in inert gas atmosphere improve elastic foam polyurethane by reducing capability of toxic outgassing

10 p1716 A69-23503

Audio frequencies internal friction measurement of austenitic stainless steels subjected to heat treatment and corrosion, discussing time dependence and carbide precipitates morphology

10 p1713 A69-23819

Thermomechanical treatment effect on VT15 Ti alloy properties and welds after deformation, attaining high tensile strength and plastic properties

11 p1889 A69-24277

Aluminum alloy weld tensile strength increased by heat treatment, discussing weld porosity due to surface film of absorbed hydrogen

11 p1891 A69-24896

Heat treatment effect on Ti-Mn alloy microstructure, discussing fcc martensite transformation into alpha, beta and intermediate phases as function of aging

11 p1906 A69-25578

Residual stresses and strains in wound reinforced plastic fiber cylinders subjected to polymerization by heat treating

11 p1907 A69-25679

Yield to ultimate tensile strength ratio of titanium alloys subjected to thermomechanical treatment

11 p1906 A69-25683

Steels classification for welded construction according to heat treatment and metallurgical structures

12 p2111 A69-25826

Heat treatable low alloy steels weldability for lightweight ultrahigh strength pressure vessels, gear and shaft fabrication in aerospace applications

12 p2100 A69-25827

Ti-Nb alloy structure in heat treatment states analyzed by diffuse scattering of X ray lines and by electron microscope

12 p2112 A69-26036

Heat treatment effects on molybdenum-rhenium alloy field emission and surface structure in alpha and sigma phase regions

12 p2113 A69-26041

Eutectoid pearlite growth by pure iron-carbon specimen heat treatment

13 p2281 A69-28158

Aluminum alloys precipitation hardening types requiring solution heat treatment, quenching and artificial aging, noting advantages in strength and weldability

13 p2282 A69-28180

Induced stressing method for complex castings by controlled cooling during heat treatment applied to front frame of J-79 turbojet engine

13 p2269 A69-28184

Oil quench vacuum furnace with graphite cloth heating elements

14 p2456 A69-29894

Beta titanium alloys mechanical properties improvement, discussing effects of alloying elements heat treatment and high temperature deformation

15 p2637 A69-30269

Charge materials purity found to increase beta-Ti alloys properties

15 p2638 A69-30272

Heat treatment and shot peening effects on Al alloy fatigue strength and fine crystallographic structure

15 p2638 A69-30278

Discontinuous yielding characteristics of 2024 Al alloy determined for different conditions of solution, heat treatment and age hardening

15 p2639 A69-30598

Heat treatment effects on Te-doped GaAs, using photoluminescence and carrier concentration measurements to study defects formed

16 p2825 A69-31708

X ray diffractometer stress analysis of WC-Co cermets, discussing surface preparation and heat treatment

16 p2802 A69-32339

Microstructural factors role in metal fracture toughness, considering effects of deformation processing and heat treatment, grain size, structural refinement, fibering, etc

17 p2988 A69-33552

Heat treatment effect on stress corrosion cracking of ternary Al-Zn-Mg alloys noting aging strength, solution temperature, quenching rate and alloy content

17 p2990 A69-33676

Damping, fatigue and optimal heat treatment of Cr-Ni steel for compressor blades operating at temperatures up to 500 K

17 p2990 A69-33933

Forming and heat treatment process for stainless steel pressure containers using liquid N, discussing austenite-martensite transformation role

18 p3161 A69-34605

Al cryogenic quenching using liquid N for slow and uniform heat removal to eliminate distortion

18 p3150 A69-35419

Nickel maraging steel weld metal impact strength and fracture toughness improved by heat treatment

18 p3151 A69-35430

Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys

19 p3344 A69-36151

Pyrolyzed tetrathoxysilane for carburizing steels and Ti alloys at 850-1050 C

19 p3328 A69-36161

Heat treatment effect on superconducting properties of deformed Nb-Ta alloys, noting critical current density

19 p3345 A69-36303

Welding processes providing low hydrogen welds for high strength steels, discussing heat treatment, maraging steels, fracture toughness, fatigue and static strength

20 p3549 A69-37447

[SBAC PAPER 8]

Polycrystalline nickel foil microstructure after explosive shock loading and heat treatments, using transmission electron microscopy

20 p3563 A69-38126

Vacuum heat treating and joining process for various ferrous and nonferrous metals and alloys, discussing advantages, applications and economics

[ASM PAPER D8-22.3]

20 p3551 A69-38132

Ti-Al-V fasteners heat treated in beta field, showing superior mechanical properties to samples treated in alpha plus beta field

21 p3729 A69-38661

Creep resistance increase of Ni refractory alloy by thermovibrational treatment under stress relaxation conditions

21 p3744 A69-38869

Ti-Al-V forgings macro /prior beta/ grain size and in-process thermal treatment effects on fatigue life

[AIME PAPER S69-2]

21 p3732 A69-39470

Soviet book on heat treatment of Ti alloys emphasizing structural and phase composition changes

21 p3749 A69-39526

C and B influence on heat affected zone hot cracking and postweld heat treatment on Ni base superalloys

22 p3967 A69-39880

Composition and thermal treatment effects on weldability of precipitation hardened Ni base alloy, analyzing heat affected zone cracking sensitivity

22 p3968 A69-39885

Short period creep and relaxation in various heat resistant alloys under heat treatments and loads, determining temperature dependence of cyclic thermal instability

22 p3969 A69-40071

Multicomponent Nb alloy creep and rupture strength under loads after heat treatment, determining creep rates dependence on temperature

22 p3969 A69-40073

Heat treated Ti-Al-Fe alloys thermal, microstructural and X ray analyses of phase transformations in Ti-rich corner

22 p3969 A69-40074

Engineering alloys electrical resistivities measurement at various temperatures, noting temperature and heat treatment effects

[NAS-NRC PAPER D-5]

22 p3970 A69-40633

High temperature vacuum treatment of thick stainless steel sheets reducing hydrogen content and outgassing

23 p3958 A69-41217

Ingot dendrite arm spacing and thermomechanical treatment effects on fracture behavior and mechanical properties of Al alloy, finding ultimate and yield strengths

23 p4176 A69-41506

Plane strain fracture toughness of S-200 grade Be for 77-533 K temperature range, noting effects of loading, heat treatment and neutron irradiation

23 p4178 A69-42450

Single run reheated weld wrought steel H cracking tested by constant load rupture /static fatigue/ technique

24 p4320 A69-42943

Operational and integral heat balance method to obtain exact and approximate solution for monotonic heating of two layer unbounded plate

01 p0174 A69-10097

Vacuum heating and thermal cycling influence on mechanical and structural properties of aluminum sheets fabricated from sintered powder

02 p0266 A69-12126

Tubular light beam waveguide properties, studying changes related to heating and ionization of medium

02 p0258 A69-12644

Temperature distribution and vaporization rate boundary conditions on metal particle surface during preignition heating in oxygen containing medium
02 p0355 A69-12670

Thermodynamic cycle and optimum conditions of electric power source of MHD generator in combination with thermocompressor
09 p1435 A69-21592

Energy conversion with liquid metal working fluids in MHD generators, discussing single stage fully Car-notized process
13 p2372 A69-27482

Liquid metal multistage injection efficiency with sodium and potassium working fluids, noting preheating
13 p2372 A69-27483

Multirecompression heater for pure airflow tests of ballistic vehicles and hypersonic aircraft [AIAA PAPER 69-332]
13 p2242 A69-28268

Thermocompression joints strength measured using friction test, centrifuging and microtensile tests
15 p2573 A69-30081

HEATING EQUIPMENT

NT BOILERS

NT EVAPORATORS

NT FURNACES

NT SOLAR FURNACES

NT VACUUM FURNACES

NT VAPORIZERS

IR heating, discussing operation of IR emitters employing glass and quartz envelopes
03 p0411 A69-13548

Heating system providing symmetrical temperature field and specimen self centering for thermal resistance tests
10 p1696 A69-23845

Etching, spray etching and photo-resist methods for producing CrNi steel heating elements for propeller de-icing
12 p2102 A69-26370

Heat pipe boil-off control system for reducing cryogenic boil-off during long term space storage
12 p2191 A69-26793

Oil quench vacuum furnace with graphite cloth heating elements
14 p2456 A69-29894

Electrical failures in aircraft due to static electrification of electrically heated windscreens, noting materials for reducing surface resistivity
19 p3256 A69-36769

Autotransformer with static tap changer to provide varying power levels for controlled gradual heating of aircraft window to avoid thermal shock
22 p3869 A69-40414

Freon boiler designed for Rankine cycle heater fired on hydrocarbons with over 2000 F flame front temperature, considering radiant/convective heat transfer
23 p4068 A69-42239

HEAVY COSMIC RAY PRIMARIES

U PRIMARY COSMIC RAYS

HEAVY ELEMENTS

NT PLUTONIUM ISOTOPES

NT PLUTONIUM 238

Heavy xenon isotopic anomalies in carbonaceous chondrites, rejecting plutonium 244 spontaneous fission decay mechanism
05 p0819 A69-15625

Tungsten replacement by chromium or molybdenum in heavy metals shown possible for binding material of group 6A metals
05 p0780 A69-15991

Element synthesis in stars of galactic halo as possible explanation for heavy elements presence in supermassive objects
07 p1219 A69-19296

Nuclear particle plastic dielectric track detectors to record distribution of fissionable and heavy elements in nature and cosmic radiation
08 p1401 A69-20899

Temporal variation of metal content in galaxy, discussing stellar radiation pressure effects on heavy element abundance of interstellar gas
12 p2160 A69-26854

Heavy element abundances in peculiar A stars, investigating nucleosynthesis during massive stars evolution
14 p2527 A69-29945

Geochemistry of fission Xe component in chondrites, suggesting Xe derivation from superheavy elements with Z 112 to 119
15 p2681 A69-30325

HEAVY IONS

Spectrum and yield of emitted electrons resulting from passage of heavy ions through metal films
03 p0471 A69-13164

Heavy ion track thermal spike model to account for LET and temperature effects in radiation biology and chemistry
03 p0371 A69-13479

Accelerated helium and carbon ions effects on mutation-induction and nuclear inactivation in *Neurospora crassa* compared with X rays, discussing relative biological effectiveness/RBE/
03 p0373 A69-13490

Genetic effects in yeast induced by heavy ion radiation, studying lethality, mitotic segregation, allelic recombination and reverse mutation
03 p0373 A69-13491

Mammalian cell survival, chromosome abnormalities and recovery from heavy ion and X ray irradiation
03 p0373 A69-13492

Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements
11 p1832 A69-25641

Radiation damage in yeast cells irradiated by high energy C 12 ions evaluated from survival rate study
14 p2406 A69-28915

ELF and VLF wave propagation examined for heavy ions and lower ionospheric disturbance effects using numerical integration, noting standing wave field role for interpretation
18 p3125 A69-34254

Biological effects by cosmic ray heavy ions and solar flares, using direct correlation between damages caused and trajectories
23 p4089 A69-41831

HEAVY NUCLEI

Underground search for massive strongly interacting cosmic ray particles, using shower selecting extension array and interaction detecting telescope
02 p0310 A69-12831

Deuteron microbeam for simulating biological effects of ionization by heavy cosmic ray particles
03 p0373 A69-13493

Heavy cosmic ray particles effect in manned space flight, noting results of deuteron microbeam experiment
03 p0373 A69-13494

Mammalian radiobiological studies of effects of heavy particles, discussing therapeutically advantageous characteristics
03 p0374 A69-13499

Biological effects in man due to heavy particles emission during major solar cosmic ray events, noting protective effect of human body
03 p0374 A69-13500

Extraterrestrial background gamma radiation /0.3-2 Mev/ observations used to derive upper limits for cosmic ray protons and CNO nuclei in interstellar space
03 p0501 A69-13934

Heavy nuclei in cosmic rays analyzed in photographic emulsion tracks suggest supernova origin
04 p0649 A69-15422

Chemical composition of nuclear cosmic rays with Z greater than 22, noting etching techniques for utilizing meteoritic minerals as detectors
05 p0816 A69-16355

Energy spectrum and intensities of medium and very heavy nuclei in primary cosmic radiation
05 p0816 A69-16365

Heavy nuclei energy spectrum in primary cosmic rays explained by assuming two component charged nuclei
05 p0816 A69-16366

Interstellar flux of heavy and superheavy nuclei calculated, assuming nuclei injection with source spectrum similar to M nuclei
06 p0988 A69-17273

Heavy nuclei abundances and energy spectra in primary cosmic rays, using blob gap parameter as measure of primary ionization
06 p0988 A69-17274

Cellulose nitrate sheets applicability in detecting cosmic ray relativistic heavy nuclei, considering etchable tracks
06 p0924 A69-17286

Ablation rate of Saint-Severin amphoterite based on heavy primary cosmic ray track densities in surface samples
08 p1406 A69-20933

Satellite data on relative flux and group composition of heavy nuclei in primary cosmic rays
10 p1756 A69-22820

Heavy nuclei origin based on empirical abundance distribution, discussing stellar, galactic and cosmic events for nuclear genesis
17 p3009 A69-34190

Cosmic ray heavy nucleus ends flux by nuclear emulsions for balloon flights at various atmospheric depths
17 p3025 A69-34219

Energy spectrum of Fe group heavy nuclei from fossil track densities depth variation in hypersthene and oligoclase crystals from meteorite Saint-Severin, noting ablation
19 p3410 A69-36095

Densities and angular distributions of fossil tracks in meteorites produced by slowing down heavy primary cosmic ray nuclei
19 p3410 A69-36096

Cosmic protons and high energy heavy nuclei interaction with radiation in expanding universe, including estimates of light radiation influence on cosmic ray spectra
20 p3591 A69-38034

Trans-iron nuclei flux in primary cosmic radiation determined through high altitude balloon exposure of interleaved layers of nuclear photographic emulsion and plastic detectors
21 p3787 A69-38327

HEAVY WATER

Fine structure of vibrational spectra of molecular H and O, water and deuterium oxide, using molecular photoelectron spectrometer
01 p0023 A69-10141

Correlation effects in water and heavy water laser transitions based on cascade effects, discussing lines in resonator arms
09 p1515 A69-21349

Room temperature fatigue crack propagation rates for high strength aluminum alloy in heavy water environment compared with argon and distilled water
13 p2640 A69-30815

Laser harmonic frequency measurement application to absolute frequency determination of 84 micron heavy water laser
17 p2982 A69-33406

Molecular hydrogen, oxygen and deuterium additions effect on CW laser operation with ordinary and heavy water as active medium
21 p3738 A69-39131

HEIGHT

NT SCALE HEIGHT

Ionospheric irregularities height measurement using spaced receivers for recording satellite signals
01 p0064 A69-10428

Photoelectric measurement of chromospheric heights by method requiring neither high telescopic resolution nor best seeing, discussing trials during September 1967
08 p1385 A69-20070

Minimum height of monochromatic radiation ionization in atmosphere assuming spherical earth for space science applications
13 p2256 A69-28653

Tide dependent variations of critical frequencies of ionospheric layers minimal heights and maximum height of F 2 layer reflection
14 p2444 A69-29871

Lunar tidal oscillations in F 2 layer critical frequency and F region minimum virtual height at Huancayo during IGY/IGC to study solar cycle effects
16 p2784 A69-32613

Solar radio sources heights at 1424 and 696 MHz during near minimum solar activity
17 p3040 A69-33808

Absolute phase heights measurements in ionosphere for geometrical optics conditions, noting accuracy
17 p2927 A69-33859

Magnetic activity influence on polar auroras height
17 p2963 A69-33953

Emission intensity ratio change as function of polar auroral height compared to variation in atmospheric concentration ratio of oxygen to nitrogen
17 p2963 A69-33956

Postsunset apparent reflection height and electron density variability in equatorial F 2, discussing singularities of diurnal variation in November-January
17 p2967 A69-33984

Vortex wakes behind high lift wings, considering effects of height above ground and various tunnel heights and widths for STOL operations [AIAA PAPER 69-740]
18 p3083 A69-34405

Relative heights on western moon half computed and compared to values of Schmidt, U.S. Army Map Service and USAF Aeronautical Chart Information Center
18 p3196 A69-34693

Side-looking radar and IR line scanning as method for simultaneous stereo height mapping, using images produced from same vantage point

20 p3536 A69-36929

Ionosphere absolute phase height measurement methods independent of virtual height, using fixed frequency CW emission and pulsed sounding

20 p3520 A69-37032

Pilot balloon observation errors due to inaccurate balloon height determination, relating error determination to wind speed and direction errors

20 p3572 A69-37699

Physical exercise effect on adolescent males, comparing oxygen uptake, heart volume and height in training and nontraining groups

23 p4077 A69-41312

HEISENBERG THEORY

Heisenberg ferromagnet dynamics at low temperatures, calculating spectral weight function and other properties with low density expansion

01 p0135 A69-10016

Linear integrodifferential motion equations for turbulent flow within Heisenberg statistical turbulence theory

02 p0230 A69-11869

Anisotropic Heisenberg antiferromagnetism in spin wave approximation, calculating thermodynamic quantities in terms of elliptic integrals

12 p2144 A69-26500

Partially coherent radiation scattering determined using Heisenberg operator, noting radiation absorption dependence on interfrequency band coherence

16 p2797 A69-32050

HELICAL ANTENNAS

Helical log periodic and log periodic dipole arrays impedance and radiation patterns measurements have similar characteristics

02 p0219 A69-12337

Polarization stability improvement of helical beam antenna by increased turns, smaller pitch angle and decreased transverse electromagnetic mode amplitude

02 p0219 A69-12345

Electromagnetic field of infinite helical sheath, basing calculations on previous helical antenna studies

09 p1463 A69-21682

Helical and log conical helical antenna width reduction by loading of traveling wave antenna elements with isotropic material

11 p1852 A69-25315

Helix antennas for phased arrays for spacecraft, discussing performance and development

13 p2228 A69-27632

Seven helix antenna array components and operation mode at Berlin weather station, including biaxial rotor, preamplifier servoamplifier and VHF telemetry receiver

17 p2946 A69-33768

Antenna design, based on helical beam radiator data, providing checking facility giving automatic alarm

24 p4312 A69-42573

HELICAL FLOW

Inviscid incompressible fluid flow stability against helical disturbances in circular cylinder

06 p0910 A69-17332

Distribution of steady state solutions for equations of helical motion of body in infinite fluid, noting coaxial control surfaces

11 p1868 A69-24782

Helical motions of body bounded by multiply connected surface immersed in infinite ideal incompressible fluid, discussing congruence

11 p1868 A69-24790

Numerical solution to partial differential equations describing helical discharge in Ar with gas injection, discussing initial temperature distribution and radial distribution effects

12 p2141 A69-27131

HELICAL WINDINGS

Spiral trajectory winding rate of asymmetrical light beams in nonlinear media analyzed in geometric optics approximation, noting diffraction influence

13 p2298 A69-27662

Leaky waves propagation characteristics helix waveguide covered with slitted cylinder using transverse network representation, emphasizing small pitch angles, hybrid TE and TM modes, etc

14 p2422 A69-29752

HELICOPTER ATTITUDE INDICATORS

U ATTITUDE INDICATORS

U HELICOPTERS

HELICOPTER CONTROL

Flying qualities considerations in design and development of Huey Cobra for helicopter attack mis-

sion, describing stability and control augmentation systems

[AHS PAPER 217] 07 p1053 A69-18871

Helicopter stabilization systems design using optimal control theory to obtain multivariable feedback controller

12 p2014 A69-26764

Analog computer simulation of helicopter dynamics after main and tail rotor blades partial loss, showing banking and controllability

14 p2393 A69-29744

Integrated trajectory error display /ITED/ for flight path control of helicopters and VTOL, describing principles governing display synthesis

[AHS PAPER 314] 17 p3001 A69-33541

AH-56A helicopter manual and automatic terrain following and manual terrain avoidance systems, discussing nap-of-earth flight, design and simulation

[AHS PAPER 311] 17 p3002 A69-33544

Optimum automatic system for controlling helicopter formation flight, stressing transient response Q factor and transmission ratios

18 p3090 A69-34656

Higher harmonic pitch angle inputs to eliminate oscillatory helicopter blade root shear determined through teetering rotor model

18 p3089 A69-35233

Torsionally flexible blade controllable twist rotor with pitch horn and servoflap control, discussing optimum inputs, airloads and angles of attack contours

18 p3089 A69-35234

Positive pitch-flap coupling for controlling helicopter rotor blade motion stability involving blade in-plane deflections

20 p3463 A69-37808

Helicopter powering and positioning by CW microwave beam, describing antenna and sensor arrays, feasibility experiments, system applications, etc

23 p4063 A69-42534

Fluidic servoactuator controlled by hydraulic vortex valves using mechanical signals for helicopter stability augmentation system

24 p4255 A69-42800

Quadratic optimization applied to helicopter flight control design, assuming constant feedback gains and command step input with zero steady state error

24 p4253 A69-43279

HELICOPTER DESIGN

Elastomeric bearings for support of heavy loads and accommodation of oscillatory motions, considering molded type for helicopter tail rotor

01 p0085 A69-10406

Helicopter structures design for maximum practicable crashworthiness and survivability, comparing load factors and deformations with indicated human impacts tolerance

[AHS PAPER 225] 01 p0009 A69-10408

VTOL aircraft design for noise reduction, discussing localities tolerance, noise sources, operating cost, etc

01 p0009 A69-10421

Analytical design of SH-3 helicopter engine inlet ice deflector shield interior surfaces, defining potential flow pattern and moisture droplet trajectories

01 p0011 A69-11064

Composite main rotor blade for Sud-Aviation SA-330 helicopter consisting of steel spar/epoxy-glass envelope

[SAE PAPER 680693] 03 p0366 A69-13444

Helicopter rigid rotor system with blades of glass fiber reinforced plastic

04 p0548 A69-14817

Helicopter role, development and configurations, noting V/STOL competition impetus

05 p0700 A69-15547

BO-105 helicopter design, testing and characteristics noting four bladed rigid rotor

[AHS PAPER 200] 07 p1052 A69-18869

Flying qualities considerations in design and development of Huey Cobra for helicopter attack mission, describing stability and control augmentation systems

[AHS PAPER 217] 07 p1053 A69-18871

Coaxial multipurpose KA-26 helicopter design, discussing cruising speed, passenger capacity, range, flight ceiling, gross weight and piston engines

07 p1053 A69-18969

Fail-safe design principles and criteria for helicopter structures to prevent operational failure arising from undetected fatigue damage

[AIAA PAPER 69-213] 07 p1054 A69-19549

Sikorsky ABC /advancing blade concept/ helicopter program, discussing advantages and small scale wind tunnel experiments

[AIAA PAPER 69-217] 07 p1055 A69-19558

Compound rotary wing aircraft research, discussing XH-51A maneuverability program and UH-1 high Mach and high advance ratio program

[AIAA PAPER 69-218] 07 p1056 A69-19568

Fail-safe goals, design criteria, analytical methods and test procedures to achieve reliable damage tolerant dynamic rotating parts for V/STOL and helicopter transports

[AIAA PAPER 69-215] 07 p1237 A69-19569

TRAC variable diameter rotor design based on jackscrew mechanism applied to compound helicopter

[AIAA PAPER 69-221] 07 p1056 A69-19572

Helicopter seaworthiness, comparing full scale sea landing and flotation studies with model test results

08 p1255 A69-20653

Helicopters operation from small ships, describing underside harpoon mooring technique for Alouette 2 and 3

08 p1255 A69-20654

Manufacturer-supplier relationship in helicopter industry

09 p1502 A69-21388

Marchetti SV-20A and SV-20C twin turbine helicopters with two bladed rotors and fixed wings, discussing propeller on starboard engine rear of compound version

12 p2013 A69-26466

AH-56A Cheyenne armed compound helicopter designed to operate from unimproved bases with minimum support equipment, noting on-board fueling capacity

[AIAA PAPER 68-560] 12 p2017 A69-26770

Onboard magnetic anomaly detection system for Canadian helicopter, discussing magnetometer location, boom design and testing and equipment installation

[AIAA PAPER 68-487] 12 p2094 A69-26771

Helicopter design, discussing blade deicers, landing gear, vibration absorbers, cargo capacity, etc

13 p2202 A69-27836

High speed shafting design for helicopter power transmission systems, discussing shaft in OH-6A Cayuse light observation helicopter

[ASME PAPER 69-DE-5] 14 p2453 A69-28837

NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed

14 p2393 A69-29702

Multiple shaker ground vibration test system for confidence in helicopter designs before flight testing and evaluation of force balancers

15 p2585 A69-30357

Rotary wing aircraft speed boundary widening without impairing low speed attributes, discussing structural design factors, airframe design and stability, etc

17 p2897 A69-33209

Critical review of paper on tail rotor structural design principles covering sizing, blade frequency and response and aeroelasticity

[AHS PAPER 342A] 17 p3059 A69-33503

OH-6A drive system design for lightweight, low cost high performance helicopter, discussing reliability from RVN combat data

[AHS PAPER 374] 17 p2900 A69-33514

Maximum helicopter level flight speed loads spectrum shape and severity related to rotor component fatigue design strength

[AHS PAPER 372] 17 p3059 A69-33516

Helicopter noise characteristics, discussing effects of noise reduction measures on design and operations

[AHS PAPER 352] 17 p2915 A69-33525

Helicopter power plant and drive and rotor systems influence on design, configuration, weight, payload and performance

[AHS PAPER 334] 17 p2901 A69-33528

Heavy lift helicopter design with 30 ton payload, considering fanjet drive hot cycle and shaft drive propulsion systems

[AHS PAPER 330] 17 p2901 A69-33532

VFW-H3 Sprinter prototype, discussing cost effectiveness, VFW-H2 test vehicle, hovering stability, dynamic takeoff characteristics, vibration level, noise level, reliability and maintenance

[AHS PAPER 303] 17 p2901 A69-33546

Tail rotor aerodynamics, discussing ambient conditions, maximum thrust, precession effects, fin interference, noise reduction, etc

[AHS PAPER 300] 17 p2895 A69-33549

Helicopter rotor vortex noise data analyzed for noise suppression, obtaining sound power equations

17 p2896 A69-34034

Army OH-6A helicopter light weight design, considering effects of WRAP /weight, radius, area, power/ factors on empty weight

[SAWE PAPER 781] 18 p3091 A69-34870

Crane helicopters for heavy lift transport mission, noting weight and size effect on productivity [SAWE PAPER 782] 18 p3091 A69-34905

Helicopter rotor blade construction and developments, discussing mass balance, fatigue life, fail-safe characteristics, cost and weight ceiling and plastic materials 19 p3329 A69-36768

French helicopter industry projected development for existing types, production models or final development and long range design programs 19 p3248 A69-36848

European cooperation in aircraft industry and application to Anglo-French helicopter program 19 p3456 A69-36849

B composite materials in helicopter development, including B and C filament production and B filament applications 22 p3971 A69-40899

Air mass mechanics, local lifting surface element aerodynamic response and aeroelastic blade response problems in lifting rotor technology 23 p4061 A69-41370

Compound helicopter transport for short haul transportation system for Northeast Corridor, discussing terminals near origin and destination, takeoff and landing patterns, etc [SAE PAPER 690419] 23 p4062 A69-41643

Twin engine five seater BO-105 military helicopter design and subsystems and shipboard compatibility evaluation 24 p4252 A69-42937

High speed compound helicopter rotor loads flight test program, discussing measured parametric effects [AIAA PAPER 68-980] 24 p4250 A69-43712

HELICOPTER ENGINES

T63 regenerative helicopter engine program, noting operational performance and engine-aircraft compatibility [AHS PAPER 212] 01 p0143 A69-10410

Turbine powered helicopter engine inlet air filtration system utilizing direct-connect S-bend duct 01 p0143 A69-11054

T-53 engine operation in U.S. Army helicopters noting design problems from compressor blade failure, sand and dust erosion and bearing and lubrication malfunctions [AHS PAPER 215] 07 p1203 A69-18867

Gas turbine propulsion engines for small single engine helicopters, discussing costs, performance and FAA tests [SAE PAPER 690310] 11 p1942 A69-24513

Marchetti SV-20A and SV-20C twin turbine helicopters with two bladed rotors and fixed wings, discussing propeller on starboard engine rear of compound version 12 p2013 A69-26466

American, French and Soviet medium weight helicopters tested in terms of main rotor blades construction, rotor performances and comparative power plant data 13 p2201 A69-27329

Helicopter power plant and drive and rotor systems influence on design, configuration, weight, payload and performance [AHS PAPER 334] 17 p2901 A69-33528

Helicopter engine dynamic analysis, discussing modeling techniques, rotor responses and turbine speed control simulations and transition from mathematical models to hardware components [AHS PAPER 332] 17 p2946 A69-33531

HELICOPTER PERFORMANCE

Navigation techniques for emergency helicopter services in medical evacuation and air/sea rescue missions, discussing displays and search patterns 02 p0279 A69-12363

Helicopter role, development and configurations, noting V/STOL competition impetus 05 p0700 A69-15547

Aerodynamic instrumentation to improve helicopter takeoff and landing piloting performance under high gross weight conditions 05 p0767 A69-16776

Characteristics, employment and tactics of Huey Cobra attack helicopter in Vietnam, discussing three primary weapon configurations 06 p0867 A69-17661

BO-105 helicopter design, testing and characteristics noting four bladed rigid rotor [AHS PAPER 200] 07 p1052 A69-18869

Coaxial multipurpose KA-26 helicopter design, discussing cruising speed, passenger capacity, range, flight ceiling, gross weight and piston engines 07 p1053 A69-18969

Helicopter flight safety as function of service duration, performance limitations and propulsion failure 07 p1054 A69-19313

Helicopter use in military activities noting role in overcoming combined enemy, weather and terrain conditions [AIAA PAPER 69-190] 07 p1244 A69-19547

Sikorsky ABC /advancing blade concept/ helicopter program, discussing advantages and small scale wind tunnel experiments [AIAA PAPER 69-217] 07 p1055 A69-19558

Engineering testing of aerodynamic efficiency of helicopter rotors during hovering with and without ground effect 08 p1254 A69-20169

Helicopter seaworthiness, comparing full scale sea landing and flotation studies with model test results 08 p1255 A69-20653

Multiengine helicopter scheduled passenger service operations in Europe 11 p2004 A69-24378

Helicopter rotors with rigid blades performance from viewpoint of controllability and load distribution 13 p2201 A69-27295

American, French and Soviet medium weight helicopters tested in terms of main rotor blades construction, rotor performances and comparative power plant data 13 p2201 A69-27329

Helicopter design, discussing blade deicers, landing gear, vibration absorbers, cargo capacity, etc 13 p2202 A69-27836

Helicopter airworthiness requirements, discussing need for international cooperation on safety regulations 13 p2202 A69-27837

Helicopter climatic testing, discussing component, systems and field tests and facilities 14 p2427 A69-29505

NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed 14 p2393 A69-29702

Analog computer simulation of helicopter dynamics after main and tail rotor blades partial loss, showing banking and controllability 14 p2393 A69-29744

Rotary wing aircraft speed boundary widening without impairing low speed attributes, discussing structural design factors, airframe design and stability, etc 17 p2897 A69-33209

OH-6A drive system design for lightweight, low cost high performance helicopter, discussing reliability from RVN combat data [AHS PAPER 374] 17 p2900 A69-33514

Fatigue test loading spectra calculation methods, discussing helicopter rotating and nonrotating components tests [AHS PAPER 373] 17 p2945 A69-33515

Mission task performance oriented approach to winged helicopters flying and handling qualities, considering wings and horizontal stabilizers influence [AHS PAPER 360] 17 p2900 A69-33522

Rotary wing aircraft height-velocity testing, analyzing engine-out landing by combining flight tests with mathematical simulation model [AHS PAPER 353] 17 p2900 A69-33524

Vector airspeed measuring system /VAMS/ for helicopters and V/STOL aircraft utilizing gas discharge mass flowmeter to improve takeoff performance [AHS PAPER 350] 17 p2974 A69-33527

Crane helicopters for heavy lift transport mission, noting weight and size effect on productivity [SAWE PAPER 782] 18 p3091 A69-34905

Rotor airfoils design for helicopter performance optimization, noting hovering figure of merit and blade profile characteristics relationship 18 p3087 A69-35220

Combat fielded cargo-carrying CH-54A Flying Crane helicopter industry-government reliability/maintainability field test evaluation 19 p3247 A69-36017

Helicopter rotor blades instabilities during starting and stopping cycles, predicting aerodynamic loads by wind tunnel tests, determining negative/positive angles of attack 20 p3463 A69-37804

Dynamic stall characteristics of high speed symmetrical and cambered helicopter rotor blade airfoils from two dimensional wind tunnel determinations [AHS PAPER 206] 20 p3463 A69-37806

Passive helicopter rotor isolation for alleviating rotor induced vibration, using dynamic antiresonant vibration isolator 20 p3463 A69-37807

Helicopter main rotor noise from square tipped blades determined as function of tip speed, blade area and thrust 22 p3864 A69-40676

High speed compound helicopter rotor loads flight test program, discussing measured parametric effects [AIAA PAPER 68-980] 24 p4250 A69-43712

HELICOPTER PROPELLER DRIVE

High bypass ratio compound fan shaft engine design and performance for convertible rotary wing aircraft [ASME PAPER 69-GT-51] 09 p1572 A69-22511

OH-6A drive system design for lightweight, low cost high performance helicopter, discussing reliability from RVN combat data [AHS PAPER 374] 17 p2900 A69-33514

Helicopter power plant and drive and rotor systems influence on design, configuration, weight, payload and performance [AHS PAPER 334] 17 p2901 A69-33528

VFW-H3 Sprinter prototype, discussing cost effectiveness, VFW-H2 test vehicle, hovering stability, dynamic takeoff characteristics, vibration level, noise level, reliability and maintenance [AHS PAPER 303] 17 p2901 A69-33546

HELICOPTER ROTORS U ROTARY WINGS

HELICOPTER WAKES

Wake deformation for horizontal and vertical cylinders present in wake of hovering rotor, using flow visualization technique [AIAA PAPER 69-228] 07 p1051 A69-19551

Helicopter rotor wake distorted geometry prediction by analytical method, noting experimental results for rotor in forward flight [AIAA PAPER 69-196] 07 p1051 A69-19553

Helicopter hovering performance prediction from wake analysis by iteration, discussing wake interference significance and blade number influence [AHS PAPER 321] 17 p2895 A69-33538

Lifting line theory for hovering propellers deformed wakes based on continuous vortex sheet representation 18 p3087 A69-35217

Rotor static performance calculation with near wake interference effects on rotor inflow distribution, considering strip momentum theory 18 p3088 A69-35221

Helicopter rotors trailing vortices by flow visualization, comparing Euler and Runge-Kutta iterative solutions 23 p4150 A69-41376

HELICOPTERS

NT ALOUETTE HELICOPTERS

NT BO-105 HELICOPTER
NT CH-34 HELICOPTER
NT CH-46 HELICOPTER
NT CH-47 HELICOPTER
NT CH-54 HELICOPTER
NT H-56 HELICOPTER
NT MILITARY HELICOPTERS
NT OH-6 HELICOPTER
NT S-61 HELICOPTER
NT SA-330 HELICOPTER
NT SH-3 HELICOPTER
NT UH-1 HELICOPTER
NT XH-51 HELICOPTER

Soviet MI-8 and MI-4 passenger helicopters noise characteristics with turboprop and piston engines and during landing takeoff and horizontal flight 03 p0366 A69-13417

Helicopter, compounds and composite aircraft design trends 05 p0700 A69-15548

Statistical method to investigate time varying stresses in helicopter structures, considering service life evaluation 05 p0767 A69-16775

Boundary layer discontinuity on helicopter rotor blade in hovering using flow visualization [AIAA PAPER 69-197] 07 p1051 A69-19561

Helicopter rotor noise generation, propagation, reception and reduction, discussing design charts for rotational noise spectra as function of design and flight variables [AIAA PAPER 69-195] 07 p1055 A69-19563

Helicopter instability on ground with propulsion system operating and inoperative, discussing overturning, restoring moments and pilot training 09 p1433 A69-21385

Helicopter all-weather flight control system, using autostabilization and artificial horizon 09 p1435 A69-22778

Operational research applications to management problems, discussing specific airlines operations cases 11 p1822 A69-24377

Light aircraft and helicopter manufacturing methods, design concepts and materials, discussing aluminum airframes, riveting, fiberglass, UV curing, etc [SAE PAPER 690341] 11 p1822 A69-24498

Helicopter weight analysis in preliminary design and proposal field 15 p2550 A69-30463

Helicopter wind tunnel testing, discussing solutions in terms of test procedures and test bed equipment 16 p2735 A69-32075

Fatigue properties and test procedures for glass reinforced plastic rotor blades used in twin engine helicopter [AHS PAPER 370] 17 p3060 A69-33518

Multifunction helicopter rotor blade radar for navigation, IFR approach and fire control, including flight test results [AHS PAPER 315] 17 p2920 A69-33535

Onboard hybrid computer for helicopter fire control system, generating turret pointing angles and corrections 17 p2934 A69-34074

Helicopter rotor rotational and vortex noises prediction methods and trends 18 p3088 A69-35224

Flight surgeon observations of stress and fatigue effects on aircrew of first nonstop transatlantic helicopter flight, discussing fatigue ratings, sleep patterns, etc 19 p3262 A69-36450

Electrocardiographic and heart rate data recording of crew members during transatlantic helicopter flight and normal daily routine 19 p3263 A69-36451

Urinalysis of crew members of first transatlantic helicopter flight indicating interindividual endocrine-metabolic variability and circadian trends modification 19 p3263 A69-36452

Dornier R and D, discussing single and twin engined aircraft, utility aircraft, helicopter, VTOL transport, safety, etc 22 p3862 A69-39931

HELIO AIRCRAFT

Heligyro type takeoff and landing maneuvers, discussing M 211 takeoff jet thrust, pressure ratio, tip speed, etc 04 p0547 A69-14816

Solar sail structural design, discussing application as propulsion system for heligyro interplanetary spacecraft 06 p1015 A69-17591

HELIOCENTRIC ORBITS

U SOLAR ORBITS

HELIOGRAPHS

U SPECTROHELIOGRAPHS

HELIOGRAPHY

U SPECTROHELIOGRAPHS

HELIO-MAGNETISM

U SOLAR MAGNETIC FIELD

HELIO-METERS

Lunar libration constants determination based on Schlueter heliometer observations using Bessel-Wichmann method, allowing for limb irregularities 17 p3028 A69-32875

HELIO-METRY

U HELIO-METERS

HELIO-PORTS

Cost estimating relationships for vertiports and airports, comparing terminal costs per passenger for each facility [AIAA PAPER 69-208] 07 p1245 A69-19564

Federal, state and municipal jurisdictional aspects for heliport establishment, detailing regulations 13 p2381 A69-27433

HELITRONS

Regenerative amplification stability in nonretarded wave helitron and traveling wave mitron type devices 02 p0214 A69-11610

Regenerative amplification stability in nonretarded wave helitron and traveling wave mitron type devices 11 p1847 A69-24717

HELIUM

NT LIQUID HELIUM

Age and initial helium abundance of stars in M15 globular clusters estimated from stellar evolution lifetime ratio 01 p0149 A69-10135

Magnetron ionization gauge in helium for low pressure measurement, discussing striking characteristics and time lags 01 p0012 A69-10606

Solubility of helium in liquid fluorine increases with temperature exhibiting reverse order 01 p0142 A69-11258

Multiple velocity dispersion in normal hydrogen and normal hydrogen-helium mixtures at room temperature using ultrasonic interferometer 01 p0121 A69-11284

Nitrogen and helium as factors affecting human decompression stress severity, using urinary measurements reflecting various endocrine and metabolic changes 01 p0018 A69-11338

Mass spectrometer helium leak testing of cryogenic storage vessels, noting procedures and insulation and evacuation of jacket space 02 p0252 A69-11811

Viscosity and thermal conductivity of helium on basis of Lennard-Jones/6 to 9/ potential [ASME PAPER 67-WA/HT-1] 02 p0351 A69-12205

Elastic scattering cross section for low energy electrons on metastable He atoms, using polarized orbital method 03 p0469 A69-12922

He/Ne ratio effect on performance of He-Ne laser in annular cavity 04 p0612 A69-15176

Helium cryostat designed to operate under overload and vibrations and used for cooling onboard superconducting devices of Cosmos 140 satellite 04 p0585 A69-15407

He refrigerators, noting 4 K design for large scale fixed installations and 20 K small scale design for airborne applications 05 p0704 A69-15671

Corona and breakdown voltage in helium-oxygen atmospheres, analyzing conditions for manned space flight vehicles 05 p0730 A69-16241

Variable He star HZ29, noting unusually wide and shallow He I lines and possible mass and composition 06 p0998 A69-16931

First Born approximation cross sections for He excitation from ground state by proton impact calculated, using wave functions 06 p0960 A69-17027

Ionizing electron collisions with He, determining energies and angular correlation distributions of scattered and ejected electrons 06 p0962 A69-17191

Metastable helium abundance in interstellar and intergalactic space, inferring low energy cosmic ray concentration 06 p1010 A69-17973

Helium flux in lower thermosphere, using diffusion theory for multicomponent gas mixture to determine equation for equilibrium distribution 07 p1125 A69-18848

Atmospheric helium nonthermal escape mechanisms, noting ion loss from polar ionosphere 07 p1125 A69-18946

Tensile strength of alloys under high pressure of hydrogen and helium, discussing embrittlement [ASM PAPER D8-14.2] 07 p1169 A69-19667

Calculated profiles of He I 4471 and 4922 A and forbidden components star spectra, using quasi-static and impact approximations 07 p1224 A69-19713

He concentration measurement in transient He-air mixture by spectroscopic analysis of fluorescence excited by high energy electron beam 08 p1312 A69-19860

Population densities of UV bound resonance lines of neutral helium for 41-level model atom, discussing optical thickness and electron temperature and density 08 p1390 A69-20392

Helium production in Galaxy, assuming homogeneous evolution of some massive stars due to external factors 08 p1401 A69-20895

Radiogenic theory of origin of He in natural gas and absence of Ar from K 40 decay, discussing primordial earth atmosphere composition 08 p1311 A69-20947

Quadrupole mass filter for rocket-borne measurements of thermospheric helium content, discussing turbopause level and winter helium bulge 09 p1489 A69-21712

Helium-like ion resonance satellite lines in laboratory and solar plasmas, noting coincidence between satellite energy and energy level interval 09 p1598 A69-22158

High energy protons, helium and gamma rays observed by particle telescope on board OSO-C, obtaining integral rigidity spectra of proton and helium nuclei 09 p1579 A69-22172

Helium I line profiles including forbidden component, discussing electron and ion Stark broadening and thermal Doppler broadening 09 p1601 A69-22209

Primordial helium and horizontal branch star luminosity, obtaining luminosities in He burning phase for different He and metal abundances from models 09 p1601 A69-22211

Lyman alpha wing opacity effect on temperature scale and helium content in F and G subdwarf atospheres 09 p1607 A69-22431

Momentum transfer cross sections, recombination coefficients and ionization coefficients of working gases for MHD energy converter 10 p1733 A69-23446

Pulsed glow discharges in He and He-H mixtures for high current density, noting electric field and wall potential distributions 10 p1739 A69-23660

He I 10830 A line in beta Lyr shell observed by contact image converter tube, analyzing line structure and phase brightness 11 p1955 A69-24391

Laser light scattering in radiation driven breakdown waves in He, using high resolution streak photography to obtain diagnostic data 11 p1915 A69-24420

B star HD 191980 spectral variations from B-3 to B-8 noting helium to carbon line intensity ratio, interstellar D line strength and radial velocity measurements 11 p1958 A69-24594

Simultaneous photoexcitation and photoionization of He near threshold at 186 A, measuring probability 11 p1921 A69-24926

Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle pogo oscillations by lowering feed system natural frequencies 11 p1967 A69-25498

Stellar evolution model for primeval He abundance in population II stars in globular clusters for big bang confirmation 12 p2156 A69-26228

Average ionization cross sections of atomic and molecular H and He beams ionized by plasma electrons with Maxwellian velocity distribution 12 p2138 A69-26542

Speech intelligibility in air at ground level and in helium-oxygen mixture at 18,000 ft 12 p2019 A69-26548

Hydrogen to He ratio effect on stellar atmospheric structure, considering flux relations, UVB color indices, H line profiles, electron and gas pressures 13 p2339 A69-27562

Electron density, temperature and dimensions of helium breakdown induced by Q switched ruby laser beam as function of space and time 14 p2492 A69-29636

B-type stellar spectra, discussing atmospheres and local thermal equilibrium from considerations of He I and P II lines relative strength 15 p2679 A69-30046

Helium gas shaft seal for spacecraft electrically driven LOX pump, noting advantages of floating carbon face seal type [ASLE FICFS PREPRINT 24] 15 p2621 A69-30498

Temperature and electron number density behind reflected shock in helium gas in T tube, noting Z pinch discharges 15 p2593 A69-31161

Photoionizing effect of hydrogen and helium UV glow in nighttime ionosphere compared with ground based IF ionosonde and sounding rocket observations 15 p2605 A69-31436

Cosmic helium origin, discussing evidence for big bang, galactic synthesis and stellar thermonuclear burning theories 16 p2853 A69-31598

Low temperature method for measuring breakdown threshold parameters of liquid and gaseous He by laser beam, observing stimulated Mandelstam-Brillouin scattering 16 p2796 A69-31799

He I/1.083 mu/ and O I/5577 A/ absolute brightness measured in sunlit aurora for various shadow heights of solar radiation, considering primary electron precipitation 16 p2780 A69-32311

Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr 16 p2791 A69-32326

H alpha/D3 intensity ratio variations in peripheral regions of prominences may be due to dynamic conditions of material emitting radiations

17 p3029 A69-33051

Cross sections threshold behavior for Cs II resonance lines excitation due to Cs ion-He collision

17 p3008 A69-33388

Respiratory gas exchange in exercise during He-O breathing, analyzing effects on O consumption, carbon dioxide production and minute ventilation of human subjects

17 p2910 A69-33751

RF recombination lines measurement of helium for abundance in nebulas, comparing optical and radio values for H II regions

18 p3190 A69-34293

Temperature control below 5.2 K based on servoing He pressure above bath

18 p3136 A69-34641

He/Ne ratio effect on performance of He-Ne laser in annular cavity

18 p3152 A69-34718

HD 30353 He binary star invisible component suggested as KO type supergiant from IR photometric data

18 p3203 A69-35348

Energy dependence of elastic total collision cross section of identical He molecules, using velocity selected primary beams at low target temperature

19 p3378 A69-36186

Rate coefficients for chemiluminescent reactions of excited He with N, O, carbon monoxide and dioxide determined from spatial dependence of visible emission

20 p3483 A69-36936

Solar He abundance limits and discrepancies of CI 37 solar neutrino count experiment

20 p3592 A69-38068

Helium in atmosphere, aurora and solar wind, discussing geophysical problems, interplanetary neutral H, etc

21 p3710 A69-38509

Upper atmospheric H and He observations, showing Lyman alpha, H alpha measurements and H abundance values relative to Kockarts-Nicolet model

21 p3714 A69-38529

Spectroscopic analysis of nebula NGC 6302 for identification as highly excited gaseous nebula, noting He-H ratio

22 p4026 A69-40647

Electron and ion Stark broadening of allowed and forbidden, triplet and singlet transitions in neutral He at low electron densities, noting Doppler broadening

22 p3985 A69-40665

Solar He abundance determined from solar model photospheres line and continuum radiation

22 p4031 A69-40911

Globular cluster star age and initial He abundance from main sequence, horizontal branch and red giant tip models using radiative opacities

22 p4035 A69-41205

Galactic evolution using concept of stellar populations and correlation with metal and He abundances

23 p4218 A69-42323

Homogeneous axisymmetric anisotropic cosmological models, analyzing magnetic fields and initial anisotropies effect on 3K radiation and primordial He production

23 p4222 A69-42402

N or He additions effects on carbon dioxide laser design and power output

24 p4327 A69-42640

Primordial hydrogen and helium concentration in Pesyanoe meteorite measured by gas chromatography, indicating solar wind injection source

24 p4384 A69-43213

He I 10830 A line in beta Lyr shell observed by contact image converter tube, analyzing line structure and phase brightness

24 p4390 A69-43781

Positronium formation in positron-helium scattering, including polarizability in potentials appearing in final equations

24 p4353 A69-43815

Twilight helium emission observed by Fabry-Perot spectrometer, noting consistency with triplet He atom excitation by photoelectron collision with ground state atoms

[AFCL-69-0294]

14 p2440 A69-29124

Collisional equilibrium and nonuniform formation models for spatial gradient development of early afterglow of He plasma molecular excited state densities

16 p2782 A69-32465

Electron beam fluorescence probe and afterglow investigation for hypersonic He flow visualization, observing qualitative structure

19 p3291 A69-35722

HELIUM ATOMS

Metastable positive He molecules and He atoms decay in afterglow, taking into account simultaneous emission at 4650 angstroms during absorption studies

02 p0287 A69-11932

Atmospheric hydrogen and helium atoms emission in geomagnetic poles and winter hemisphere, comparing thermal dissipation and migration of light atoms

15 p2599 A69-31322

Steady state atomic He distribution according to solar atmosphere levels, involving formulation and solution of equilibrium equations for single and triplet levels

20 p3615 A69-38298

LTE departure calculated for He I in hot star model atmospheres for effects on populations of singlet and triplet states

21 p3801 A69-38761

H and He atoms escape from atmosphere under MHD waves action at exosphere boundary

23 p4156 A69-41847

Neutral He lines at 537 A and 584 A obtained by spectroheliometer on OSO 4, studying differences between quiet and active regions

23 p4222 A69-42405

HELIUM IONS

Alpha recombination coefficient of molecular helium ions measured in helium afterglow plasmas as function of electron density and gas temperature

02 p0283 A69-11834

Metastable positive He molecules and He atoms decay in afterglow, taking into account simultaneous emission at 4650 angstroms during absorption studies

02 p0287 A69-11932

Solar Lyman alpha, Lyman beta and Balmer alpha lines of He 2 for electron temperature and density and optical thickness of emitting layer

10 p1772 A69-22859

Hyperfine transition line of He 3 II for abundance in Messier 17 source by radio telescope

10 p1785 A69-24098

Simultaneous photoexcitation and photoionization of He near threshold at 186 A, measuring probability

11 p1921 A69-24926

Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations

11 p1879 A69-25157

Spectrometric characteristics of He, H and molecular H ion recording counters as function of temperature

14 p2452 A69-29811

Transition probabilities of spectral lines in helium-like ions estimated from hydrogen magnetic dipole transitions, discussing single photon decay

15 p2695 A69-30892

Hydrogen and He ion distribution measurements, noting seasonal and local magnetic time variability

15 p2599 A69-31326

Plasmasphere hydrogen and He ion concentration models, using diffusive equilibrium theory for plasmasphere parameters

15 p2677 A69-31447

Two photon decay of metastable levels of hydrogenic and He-like ions in solar corona, depopulating via proton collisional excitation to 2p level

19 p3396 A69-36218

He I 1.083 micron resonance line in evening twilight airglow spectrum, discussing maxima, minima, decay patterns, etc

19 p3303 A69-36484

OGO 5 ion spectrometer for measuring oxygen, He and hydrogen ion concentration, noting functions as energetic particle analyzer and proton energy distribution measurement capability

19 p3314 A69-36679

Helium sequence ions spin forbidden transitions electric dipole oscillator strengths and transition probabilities evaluated by variational procedure

20 p3577 A69-38171

Explorer 34 observations of hydrogen and He ions in solar wind, noting number density variations and tentative association with geomagnetic storms

22 p4004 A69-40305

Off-diagonal matrix elements of Breit interaction between singlet-triplet transitions for helium isoelectronic sequences

22 p3986 A69-40783

Autoionized resonance transitions of He at 206.2-192.2 A using He continuum produced by capillary spark, also producing He II line spectra

23 p4191 A69-42149

Spectral distribution of two photon emission from metastable state of singly ionized He by broadband spectroscopic coincidence counting technique

23 p4220 A69-42378

HELIUM ISOTOPES

Helium isotopes escape mechanism from earth atmosphere related to polar wind ionospheric plasma flow from earth

01 p0077 A69-11240

Differential cross sections for elastic scattering of 600 Mev protons from He 3 between 19 and 45 degrees

03 p0472 A69-13464

Book on properties of liquid and solid helium 3 and 4 physical characteristics, phase behavior and experimental techniques

04 p0630 A69-14688

Experimental measurement of He and C isotope composition of cosmic radiation

05 p0817 A69-16709

Cosmic ray propagation model, considering determination of He interstellar spectrum and amount of matter traversed at low energies

06 p0988 A69-12720

Cosmic ray deuteron and He 3 secondary origin and determination of cosmic ray path length and residual interplanetary field modulation

08 p1378 A69-20066

Ionization and recombination processes in He 3 plasmas produced by neutron irradiation of H 3

10 p1738 A69-23488

Hyperfine transition line of He 3 II for abundance in Messier 17 source by radio telescope

10 p1785 A69-24098

Velocity dependence of temperature waves /second sound/ in liquid He II measured as function of relative velocity for normal and superfluid

13 p2297 A69-27460

He 3 production and loss in atmosphere, discussing precipitation of energetic magnetospheric particles, thermal escape, nonthermal processes, etc

14 p2435 A69-28965

He II excitation spectrum for interparticle potential using pair Hamiltonian with repulsive core and attractive well

17 p3008 A69-33118

Dilute solution of He 3 in He 4 near absolute zero measured for viscosity, showing temperature effect

21 p3772 A69-39582

Primordial He 3 and deuterium production from magnetic effects during nucleosynthesis epoch of big bang cosmologies

22 p4035 A69-41210

HELIUM PLASMA

LF radiation intensity oscillations of pulsed HF discharge in helium plasma, showing time dependence

01 p0128 A69-10347

Recombination reactions during postdischarge in helium plasma produced by laser beam, deriving equation for density evolution

01 p0128 A69-10394

Plasma decay at high pressure in helium and argon with cesium vapor admixture and pure cesium vapor, using Saha equation

03 p0480 A69-14052

Electron cyclotron instability and HF ionization in beam-plasma experiment using electron beam guided by magnetic field through He gas

05 p0798 A69-15612

Langmuir probe to determine helium plasma density effect on electron temperature from relation between spectral line intensities

05 p0804 A69-16376

Ion plasma oscillations harmonics in helium plasma produced by back diffusion source, relating harmonics amplitude to electron density

05 p0804 A69-16459

Velocity distribution of plasma electrons in electron beam generated He plasma using Boltzmann equation, neglecting electron-electron collisions

05 p0805 A69-16705

HELIUM AFTERGLOW

LF radiation intensity oscillations of pulsed HF discharge in helium plasma, showing time dependence

01 p0128 A69-10347

Metastable positive He molecules and He atoms decay in afterglow, taking into account simultaneous emission at 4650 angstroms during absorption studies

02 p0287 A69-11932

Time dependent behavior of atomic light emitted from pulsed helium afterglow, noting absorption measurements and spectrometric system

08 p1356 A69-20743

HELIXES

- Continuum emission and forbidden lines in helium plasma in linear Z-pinch tube, noting plasma electron density
08 p1369 A69-20887
- Shock heated helium plasma temperature measurements by spectroscopy compared to Rankine-Hugoniot calculations including ionization effect
09 p1548 A69-21963
- Ionization and recombination processes in He 3 plasmas produced by neutron irradiation of H 3
10 p1738 A69-23488
- Transport and balance coefficients in ionized neon and helium plasmas in homogeneous electric field, calculating electron mobility, diffusion coefficient, energy and collision parameters
10 p1740 A69-23722
- Ionization-recombination thermodynamic equilibrium upset causing spectral excitation in He arc plasma
10 p1742 A69-24077
- Diffusion and mass flow in steady state magnetically stabilized helium arc plasma effects on spectroscopic determinations of electron temperature, discussing degree of ionization
12 p2141 A69-27146
- Helium plasma electron temperature and concentration measured in arc in magnetic field by laser light scattering at electrons
14 p2496 A69-29780
- Collisional equilibrium and nonuniform formation models for spatial gradient development of early afterglow of He plasma molecular excited state densities
16 p2782 A69-32465
- Plasma decay at high pressure in helium and argon with cesium vapor admixture and pure cesium vapor, using Saha equation
18 p3181 A69-35045
- Laser radiation power and electron concentration in He-Ne plasma measured by microwave diagnostics
22 p3964 A69-40794
- Ionized He and Ar plasmas nonequilibrium nozzle flows, noting temperature difference between electron gas and atom-ion gas, calculating flow parameters
22 p3861 A69-41047
- HELIXES**
U CURVES [GEOMETRY]
- HELMETS**
EEG monitor helmet for aircraft or flight simulator programs, discussing sensing and transmitting system
12 p2023 A69-26553
- Quality assurance impact energy attenuation testing of U.S. Army flyer protective helmet, considering combined interaction of shell, foam liner and plastic pads
15 p2559 A69-30851
- Crash helmet impact protection capability, considering helmet construction
17 p2913 A69-33169
- Protective helmet design effectiveness against concussion and skull fracture as function of dimension, weight, load spreading, etc
17 p2913 A69-33177
- HELMHOLTZ EQUATIONS**
Phenomena satisfying inhomogeneous Helmholtz equation in cylindrical coordinates, inferring equivalent infinite series directly from integral-transform method
04 p0623 A69-14896
- Extension of Helmholtz classical problem of flows with discontinuous surfaces, considering two sources and transverse plane
14 p2433 A69-29683
- HELMHOLTZ VORTICITY EQUATION**
Finite element solution of Helmholtz equation and application to waveguides with complicated boundaries
03 p0404 A69-13598
- Hall effect destabilization influence in Kelvin-Helmholtz problem for ideal plasma, noting instability growth rate
03 p0478 A69-13804
- Ground influence on Helmholtz flow in presence of plate perpendicular to stream, reducing problem to mixed Volterra problem in complex half plane
04 p0590 A69-15221
- Kelvin-Helmholtz instability for interface between two uniform superposed fluids with constant densities and velocities in horizontal motion in oblique magnetic field
07 p1182 A69-19274
- HEMATOCRIT**
Hypoxia tolerances in nitrogen dilution chamber of chickens at sea level and high altitudes, discussing role of hematocrit and heart mass
22 p3874 A69-40214

- Aortic pressure effect on left ventricular function, emphasizing effect of heart rate hematocrit and oxygen consumption
23 p4092 A69-42061
- HEMATOCRIT RATIO**
Repeated blood sampling effect on plasma cholinesterase, acid phosphatase, alkaline phosphatase and hematocrit ratios in domestic chickens
10 p1644 A69-23158
- HEMATOLOGY**
Increased chronic acceleration physiological effects on chickens, comparing hematological observations with exercise capacity, survival and sexual development
10 p1641 A69-23041
- Repeated blood sampling effect on plasma cholinesterase, acid phosphatase, alkaline phosphatase and hematocrit ratios in domestic chickens
10 p1644 A69-23158
- Chronic acceleration effects on erythrocyte number, plasma volume, globulin fractions, erythrocyte size and plasma A/G ratio in chickens
11 p1828 A69-25458
- HEMISPHERE CYLINDER BODIES**
Axisymmetric vibration modes of cylindrical-hemispherical membrane tank partly filled with liquid [AIAA PAPER 67-75]
09 p1482 A69-21940
- HEMISPHERES**
Desinent cavitation on hemispherical nosed bodies in water at various temperatures and velocities, considering isothermal case for surface nuclei [ASME PAPER 69-FE-1]
20 p3516 A69-37986
- Stagnation point Mach number gradient, sonic point location and drag coefficient of hemisphere at zero angle of incidence
23 p4060 A69-41910
- HEMISPHERICAL SHELLS**
Closed form solution of convective heat transfer to yawed concave hemisphere in free molecule flow
02 p0354 A69-12529
- Axisymmetric oscillation modes and frequencies of hemispherical shell partially filled with liquid, using moment theory of shells
04 p0679 A69-14922
- Monopole antenna behavior over grounded metal hemisphere, noting application to spacecraft and broadcasting antennas erected on hill
08 p1282 A69-20040
- Elastoplastic response of intersecting hemispherical/cylindrical shell structures compared with plastic deformation predictions
09 p1615 A69-21922
- Axially symmetric vibrations of thin elastic spherical shell partially filled with liquid, considering shell as joined hemispheres with or without same thickness
16 p2873 A69-32129
- HEMOCYTES**
Human blood viscosity measurement over wide range of shear rates, obtaining rheological data, suggesting osmotic red cell crenation role
23 p4095 A69-42078
- HEMODYNAMIC RESPONSES**
Control mechanisms of hemodynamic shifts from dogs subjected to acceleration under anesthesia
02 p0198 A69-11503
- G suit inflation acute and prolonged effects on cardiovascular dynamics in recumbent and passively tilted individuals
06 p0883 A69-17843
- Cardiovascular responses of baboons and dogs subjected to anoxic near vacuum environment by rapid decompression
06 p0875 A69-17846
- Clinicomorphological changes in rabbit eyes vascular system by exposing transverse accelerations
08 p1262 A69-19832
- Bone marrow distribution in dogs as basis for study of compensatory reactions of hemopoietic organs in response to radiation damage
08 p1262 A69-19835
- Acceleration component in pelvis to head direction found influencing hyperemia of brain at various g forces
13 p2212 A69-28626
- Pubertal puppy and adult dog cardiovascular system during inhalation of various nitrogen-oxygen mixtures, comparing heart beat rates, minute blood volumes, etc
19 p3257 A69-36169
- Heart beat rate, arterial pressure, blood volume and peripheral blood pressure increase observed in dogs running 7 min at 10 km/hr
22 p3885 A69-40966

- Radioisotopic determination of haemodynamic and bioelectric disturbances of rat striated muscles subjected to acceleration and hypokinesia
24 p4268 A69-43409
- HEMODYNAMICS**
Intrarenal capillary hydrostatic pressure effect on hemodynamically induced changes in sodium excretion
07 p1063 A69-18625
- Hemodynamic characteristics of decortication in rabbits, noting upsets of compensatory and adaptive capabilities of cardiovascular system
22 p3888 A69-41271
- Pulsatile flow in coronary arteries simplified model compared with experiment in anesthetized dogs
23 p4098 A69-42105
- Cardiovascular autonomic effects dynamic characteristics under severe arterial hypoxia in unanesthetized rabbit
24 p4258 A69-42632
- HEMOGLOBIN**
NT OXYHEMOGLOBIN
Hemoglobin diffusion influence on oxygen uptake and release by red cells solved by calculus of finite differences
05 p0707 A69-15677
- Thyroid gland role in resistance and myoglobin content of skeletal muscles of flat land and high altitude acclimatized white rats
05 p0709 A69-16517
- Thyroid gland role in resistance and myoglobin content of skeletal muscles of flat land and high altitude acclimatized white rats
18 p3096 A69-34736
- Chronic hypoxic hypoxia on oxygen-hemoglobin dissociation curve and respiratory gas transport in man, considering altitude residents and heart and lung diseased patients
21 p3650 A69-38383
- Monomethylhydrazine absorption through canine skin noting metabolic aftereffects and methemoglobinemia
22 p3887 A69-41191
- Hemoglobin inhomogeneity in rats irradiated with lethal doses of X rays and fast neutrons, using fractions prepared by column chromatography
22 p3888 A69-41274
- Critical oxygen pressure dependence on buffer in diluted heart muscle sarcosome suspensions and effect of hemoglobin or myoglobin
23 p4080 A69-41427
- Oxygen steady state transfer across thin layers of centrifuged erythrocytes at 37 degrees C before and after hemoglobin saturation with CO
23 p4093 A69-42064
- O-hemoglobin dissociation curve shape effect on O affinity of hemoglobin
23 p4095 A69-42086
- Model for human hemoglobin dissociation into subunits taking into account molecular explanation of oxygen dissociation curves
23 p4097 A69-42096
- Hemoglobin O reaction model explaining molecular weight and oxygen dissociation curve dependence on hemoglobin concentration
23 p4097 A69-42097
- HEMOLYSIS**
Hyperoxia exposure and hemolysis in tocopherol deficient mice
06 p0874 A69-17837
- Renal pathology of acute methylhydrazine intoxication in dogs, noting hemolytic anemia and hemoglobinuric nephropathy
06 p0883 A69-17847
- In vivo hemolytic susceptibility to hyperoxia in mice deficient in tocopherol
07 p1066 A69-19422
- Hyperventilation induced hemolysis in dogs measured as function of exposure time, body temperature and blood pH
22 p3887 A69-41192
- Hemolysis rates in various blood flows, considering effects on energy dissipation
23 p4100 A69-42533
- HEMORRHAGES**
Ocular injuries during bailout from Vampire aircraft, noting hemorrhages
10 p1649 A69-23380
- Ultrasound-echo-encephalography in diagnosis of posttraumatic intercranial hemorrhage of skull and brain trauma, noting neuroradiological techniques
21 p3652 A69-38790

Rat dental pulp hemorrhages following acute hypoxia from exposure to decompression chambers, atmospheric pressure variations or high acceleration
21 p3661 A69-39276

Carbon dioxide inhalation and intravenous isoproterenol effects on hemorrhagic consolidation occurring after left pulmonary artery ligation in dogs
23 p4082 A69-41441

Receptor and adrenergic blockade effects on blood loss, tolerated period and metabolic sequelae of hypotension in dogs
23 p4098 A69-42102

HEOS A SATELLITE

Regulated high voltage DC to DC converter with output voltage programmable numerically, noting application on board HEOS A satellite
04 p0602 A69-15400

European highly eccentric orbit satellite /HEOS/ cislunar probe to explore interplanetary space for magnetic fields, cosmic radiation, solar wind and earth shock wave
17 p3050 A69-33397

International organization and project management procedures in design and construction of Heos 1 satellite for measuring charged particles energy distribution outside geomagnetic field
17 p3050 A69-33699

European Space Research Program report on HEOS-A satellite, noting planetary physics research particularly in magnetic fields, cosmic radiation and solar wind
18 p3207 A69-34628

HEOS SATELLITES

TD-1 astrophysical satellite and future ESRO projects, considering HEOS-0A2 and TD-2
17 p3051 A69-34217

HERCULES AIRCRAFT

U C-130 AIRCRAFT

HERCULES NOVA

Cyanogen molecules increase attributed to nova shell compression from analyzing absorption spectrum of DQ Herculis 1934 after brightness maximum
15 p2688 A69-30558

HERMETIC SEALS

Mathematical simulation of temperature and humidity changes in compartments of hermetically sealed space vehicle cabins
02 p0200 A69-11489

Sealed and unsealed relay coils temperature rise at simulated outer space air pressure levels
13 p2231 A69-28048

Aircraft secondary power sources reliability dependence on electric loads, charge control and maintenance, discussing hermetically sealed batteries features
17 p2905 A69-34113

HERMITIAN POLYNOMIAL

General predictor-corrector method for system of m ordinary first order differential equations proved stable if Hermitian forms with coefficients are positive definite
01 p0105 A69-10807

Lehmann-Machly procedure for lower and upper bounds to eigenvalues of Hermitian operators in Hilbert space
06 p1020 A69-17131

Wiener-Hermite expansion extended to include time dependent ideal random functions, discussing application to shear flow turbulence
15 p2644 A69-30201

Convolution property of Hermitian transform for odd integral values of n
15 p2645 A69-30863

Finite elements concept cast in topological framework, presenting generalizations of Lagrange and Hermite interpolation functions
15 p2711 A69-30874

Pulse compression using Hermitian functions, noting minimal rms error requirement in real system
16 p2755 A69-32585

Shock wave structure in single component monatomic gas by expanding Boltzmann equation distribution function in terms of Hermite polynomial
18 p3124 A69-35170

Spatially homogeneous Boltzmann equation containing initial distribution functions expandable into Hermitian polynomials analyzed via ordinary differential equations
19 p3373 A69-36202

HERTZSPRUNG-RUSSELL DIAGRAM

Position of binary stars in photometric diagrams at Geneva observatory, discussing sequence profile of HR diagram
03 p0517 A69-14094

Kinematic parameters of giant stars and stellar evolution, discussing variations as function of zone position in HR diagram
03 p0517 A69-14095

Rapid differential rotation effect on massive main sequence O and B stars, discussing bolometric magnitude deficiencies and shifted position in Hertzsprung-Russell diagram
07 p1220 A69-19390

Mass loss in Red Giant stage from statistical analysis of H-R diagrams of galactic clusters
08 p1396 A69-20642

Russell method application to combined data of both minima of eclipsing binary using electronic computers
08 p1408 A69-21136

Cepheid variable 1 Carinae position in H-R diagram suggested from microturbulent velocity role in pulsational instability
14 p2522 A69-29590

H-R diagrams of globular clusters, discussing evolution models with and without mass loss
14 p2527 A69-29943

Theoretical Hertzsprung-Russell diagram for star cluster NGC 1866, allowing stellar evolution study
17 p3038 A69-33720

Masses of visual binaries above main sequence with published orbits determined as function of position in H-R diagram, using spectroscopic parallaxes
18 p3195 A69-34429

HERZBERG BANDS

Herzberg bands synthetic spectra matched to various spectrograms to determine vibrational populations of molecular O state in nightglow
24 p4310 A69-43186

HETEROCYCLIC COMPOUNDS

NT ADENINES
NT ADENOSINE TRIPHOSPHATE [ATP]
NT ASCORBIC ACID
NT AZINES
NT AZOLES
NT INDOLES
NT PILOCARPINE
NT PYRIDOXINE
NT PYRROLES
NT RDX
NT TETRAZOLES
NT THIAMINE
NT TOCOPHEROL
NT TRYPTOPHAN
NT URIC ACID

Cl 35 nuclear quadrupole resonance spectra of 3,6-dichloropyridazine, tetrachloropyridazine, 2,6-dichloropyrazine and chloropyrazine
01 p0123 A69-10290

Mass spectra of quinoline and isquinoline N-oxides, discussing diagnostic values of fragmentation reactions for heteroaromatic N-oxide function presence
07 p1075 A69-19496

Gas-liquid and thin layer chromatography and nuclear magnetic resonance techniques to steric analysis of diketopiperazines
07 p1075 A69-19498

Electrical properties of tetracyanoquinodimethane /TCNQ/ complexes representing unit segments of non-conjugated and conjugated polymers
11 p1832 A69-25675

Heterocyclic-aromatic organic polymer adhesives used for high temperature structural purposes, discussing processing, testing, formulating and impact on basic research
14 p2469 A69-29346

Biochemical evolution role in porphyrin synthesis forming hemoproteids base, discussing assimilation of carbon dioxide in early earth atmosphere
23 p4088 A69-41814

HETERODYNING

NT OPTICAL HETERODYNING

Hologram heterodyne scanner for production from scanning coherent light beam of electrical signal corresponding to scanned hologram, noting camera tube application
03 p0431 A69-13827

Frequency conversion in microwave crystal mixer with EMF amplitude fluctuations in heterodyne
09 p1469 A69-22644

HETEROGENEITY

Structural microheterogeneities in monophase Ti alpha alloys, using complex phase analysis method
04 p0617 A69-14939

Combustion in heterogeneous systems, considering diffusion flames and fine droplets dispersed into gaseous oxidizer in fog form
06 p1032 A69-17421

Lunar interior chemical heterogeneity determined from model taking into account pressure, temperature and composition effects
19 p3425 A69-36421

HETEROTROPHS

Euglena gracilis grown heterotrophically, investigating respiratory physiology as function of glucose, acetate or ethanol growth supporting carbon source
10 p1647 A69-24186

HEURISTIC METHODS

Heuristic Dendral program to mechanize inductive inference in organic chemistry to determine isomers in chemical compounds
07 p1075 A69-19484

Heuristic methods to determine scientific activities planning emphasizing problem definition, purposes, possibilities of solution and difficulties
13 p2720 A69-30969

Computer-algorithm elements required for engineering design and invention problems including design requirements, selection of spaces for variables using computerized heuristics, etc
19 p3280 A69-36666

Heuristic process for constructing similarity parameters approximation solution of laminar and turbulent boundary layers equations
19 p3301 A69-36799

HEXAGONAL CELLS

Energy function invariants for cubic and hexagonal systems of anisotropic media with coupled stresses
01 p0169 A69-10811

Electronographic determination of ternary alloys of germanium antimony tellurides noting hexagonal laminarity with cell periods
02 p0298 A69-12046

Friction induced plastic deformation of Be-Co-Zn single crystals with HCP structure
02 p0254 A69-12627

Dislocation distributions in cold worked fcc, bcc and hcp metals, discussing dislocation structures in deformed single crystals and work hardening theories
05 p0778 A69-15754

Nodal precipitation and cellular solidification substructure in commercial purity nickel, discussing supercooling, NiO and eutectic composition
08 p1332 A69-20289

Pressure effects on hcp crystalline lattice alloys order-disorder transformations
11 p1937 A69-24704

Filamentary composites elastic constants calculation extended to hexagonal symmetry by long waves method
17 p3061 A69-33666

Hexagonal and nonhexagonal cell phenolic honeycomb design as energy dissipating material noting processing, composite constituents, cell configuration and usage environment
19 p3353 A69-35503

Numerical integration of atmospheric motion equations in global domain using hexagonal grid, including sphericity corrections and Coriolis term
19 p3364 A69-36509

HEXAHEDRITE

Dynamically deformed structures in chondrites and hexahedrites observed to discriminate among theories about origin of chondrules and meteorites
19 p3418 A69-36135

Shock histories of hexahedrites and Ga-Ge group III octahedrites based on metallographic and X ray diffraction analysis, noting meteorites shocked preterrestrially
19 p3418 A69-36136

HEXANITROSTILBENE /HNST/

Nuclear radiation damage vs thermal decomposition of diaminitrobenzene and hexanitrostilbene, analyzing unchanged residual compound
02 p0304 A69-12500

HIBERNATION

Specific antibody formation to influenza A virus vaccine /strain PR sub s/ in hibernating ground squirrels /Citellus tridecemlineatus/
08 p1263 A69-20173

Glucose, lactate, free fatty acids, hepatic glycogen and endocrine activity in fasting hibernating dormouse and rat in deep hypothermia
10 p1642 A69-23118

Hibernation seasonality, protein synthesis during periodic awakenings and importance of awakenings to maintenance and evolution of thyroid activity
10 p1642 A69-23120

Computer analysis of cortical and subcortical activity in yellow bellied marmot during sleep, hibernation and hypothermia
10 p1643 A69-23122

Radiation resistance of animals in hibernation and hypothermia, noting temperature dependence of protective effect

10 p1643 A69-23126

Mineral dynamics during hibernation and disuse atrophy in connection with organismal homeostasis and chronic-term manned space flight, noting skeletal effect of immobility

21 p3660 A69-39175

Body weight and organ sizes in hibernating cold and warmth adapted golden hamsters, discussing lungs, heart, kidney, pancreas and liver weight increases

23 p4084 A69-41462

HIERARCHIES

NT BBGKY HIERARCHY NT DICHOTOMIES

Higher dimensional Dirac Hamiltonians from L-matrix hierarchy using dimensional eigenvector

04 p0625 A69-15275

Buckling of long cylinders with homogeneous random axisymmetric geometric imperfections under axial compression, using truncated hierarchy technique

07 p1236 A69-19473

Compromise control in system with two hierarchy levels interrelated via lower level subsystems optimality criteria found by solving global criterion problem

08 p1297 A69-20415

Control signal interconnection of subsystems at different levels of hierarchical structure systems

12 p2050 A69-26089

Cybernetic approach to memory, proposing model characterized by hierarchical structural order and sequence to study physiological rhythms

23 p4110 A69-41983

HIGH ALTITUDE

Daytime sky radiation measurements by high altitude vehicles with spectrophotometer noting spectral radiance, luminance, polarization, albedo and near IR

08 p1317 A69-21071

Biological effects of cosmic ionizing radiation in supersonic commercial aircraft at high altitudes, showing spatial distribution based on balloon experiments

11 p1830 A69-24865

Topographic mapping by high altitude jet aircraft photography

18 p3134 A69-34339

HIGH ALTITUDE BALLOONS

Inner and outer meteorological balloon assembly for fast rising and high altitude sounding

01 p0010 A69-10541

Balloon flown High Altitude Particle Physics Experiments /HAPPE/ for research on high energy cosmic rays and particle interactions

03 p0499 A69-12943

Balloon-borne SPARMO detector SC 67 used for measuring radiation at high altitudes

05 p0762 A69-15823

Signal strength variations for balloon-borne VHF FM transmitter due to wave interference, noting application to balloon range estimation

06 p0886 A69-16925

High altitude plastic balloon platforms for atmospheric research noting increased capacities in altitude, payload and flight duration

06 p1010 A69-18067

Pressure-altitude transducers for atmospheric pressure measurements on balloon flights including diaphragm, thermoconductivity, radioactive density and hypsometer gauges

07 p1132 A69-18873

Stratospheric balloons launching and nacelles for measurement of cosmic rays, atmosphere high altitude characteristics, discussing French launching center

16 p2734 A69-31759

Stratospheric winds effect on instrument package suspended from high altitude balloon, discussing package displacements, yarn shapes and air drag characteristics

17 p2961 A69-33612

Trans-iron nuclei flux in primary cosmic radiation determined through high altitude balloon exposure of interleaved layers of nuclear photographic emulsion and plastic detectors

21 p3787 A69-38327

High altitude balloon stationkeeping system combining battery powered propeller and drag chute

22 p3866 A69-40941

Causes of ascent failures in high altitude balloons, discussing test methods and specifications revisions

24 p4251 A69-42714

Mathematical model for ascent and descent of high altitude tethered balloon, developing computer program and deriving differential equations of motion

24 p4254 A69-43722

HIGH ALTITUDE BREATHING

High altitude acclimatization effects on cardiovascular system, external respiration, blood composition, optical and vestibular analyzers in human subjected to various stresses

13 p2212 A69-28623

Bird respirator function at simulated high altitude, noting adequate support in case of rapid decompression

14 p2406 A69-29290

HIGH ALTITUDE ENVIRONMENTS

Renal effects of moderate hypoxia exposure in mice as reflected in urine volume and electrolyte excretion patterns during four days at simulated altitude

01 p0015 A69-10921

Blood volume in rats exposed to high altitude and deacclimated at ambient pressure, noting changes and control level restoration

01 p0015 A69-10922

RF voltage breakdown in solid state telemetry transmitters on sounding rocket, noting glow discharge initiated by energetic dissociated electrons

02 p0222 A69-12691

Visual feedback mechanisms in simulated high altitude conditions, discussing physiology of ocular homeostasis adaptation

06 p0882 A69-17647

Oxygen intake and body temperature of basal and sleeping Andean natives at high altitude

06 p0874 A69-17835

Neurological impairment in baboons exposed to prolonged decompression simulating high altitude aircraft cabin structural failure, noting neuropathological examination results

07 p1067 A69-19426

Prolonged hypokinesia effects on white rats resistance to convulsions induced by high altitude simulation

08 p1262 A69-19929

Stability of male cardiovascular, respiratory and motor systems functional conditions after physical activity in pure O medium at high altitude pressure

08 p1262 A69-19931

Monkey behavior in high atmosphere under weightless conditions, discussing problems connected with biological measurements, logic systems and vibration protection

09 p1447 A69-22722

Moisture losses of men wearing partial pressure suit with oxygen mask determined by changes in skin temperature and heat flow

10 p1647 A69-23591

Lubrication and operation of Hamilton Standard propellers in high altitude and low temperature environments

11 p1822 A69-24515

Accelerometer force balance used in measuring forces and moments acting on models in short duration rocket plume tests at simulated high altitude

13 p2264 A69-28285

High altitude environmental effects on adrenal glands and hypothalamic neurosecretion in rats

13 p2211 A69-28615

Glucose disappearance rate from dogs blood at simulated 27,000 ft altitude compared with tolerance at ground level, discussing chlorpromazine administration effect

14 p2408 A69-29305

Life in common by groups of four or five people isolated on high mountain under adverse conditions

21 p3661 A69-39267

Contact lenses hazards during high altitude aircraft piloting analyzed via bubble development

23 p4106 A69-41806

HIGH ALTITUDE PRESSURE

Blood coagulation in animals under acute hypoxia at exposures to pressure corresponding to 5000 m altitude, noting blood morphology

12 p2019 A69-26348

Test programs utilizing pitot probes to map exhaust plumes from liquid bipropellant engines in low ambient pressures conducted to verify calculations

16 p2869 A69-32746

HIGH ALTITUDE TESTS

Structure and mean molecular weight measurement of unknown atmosphere assessed from high altitude tests in earth atmosphere

03 p0512 A69-13699

X ray investigation of repeated simulated exposures to altitude and acceleration on healthy professional flyers

03 p0378 A69-14208

Ionosphere disturbances due to high altitude thermonuclear explosions, discussing experimental proof by Cosmos satellites short wave transmitter radio signal scintillation statistical evaluation

19 p3304 A69-36624

High altitude CAT regions length distribution determined from level flight path sampling data correlation

20 p3570 A69-37168

HIGH ASPECT RATIO

High aspect ratio submicroscopic whiskers of beta-SiC, investigating rheological properties of suspensions in various fluids

01 p0102 A69-11260

Slender wing theory extension to not-so-slender wings approached as singular perturbation problem, using matched asymptotic expansions method

04 p0544 A69-14891

HIGH ASPECT RATIO WINGS

U SLENDER WINGS

HIGH CURRENT

Inductively excited argon ion laser properties in high current regions

06 p0935 A69-17767

HIGH EFFICIENCY

U EFFICIENCY

HIGH ENERGY

U ENERGY

HIGH ENERGY ELECTRONS

Photometric measurement of atomic oxygen green line emissions and high energy electron flux using twilight sounding rocket

02 p0309 A69-12743

High latitude outer zone electrons boundary region during geomagnetically quiet periods

03 p0502 A69-14004

Energetic electron fluxes measured at 2000 km over auroral and polar regions and at 17 earth radii in magnetotail plasma sheet

03 p0503 A69-14013

Interplanetary relativistic electrons from solar flare events

04 p0650 A69-15528

Energetic electrons of terrestrial origin behind bow shock and upstream in solar wind

05 p0815 A69-16253

High resolution electron and proton energy measurements by sounding rockets indicating plasma sheet as source of energetic auroral electrons

05 p0756 A69-16273

Gamma ray production and high energy electrons in cosmic radiation

05 p0817 A69-16712

X ray astronomy use for probing hot regions of outer space and high energy electrons

06 p0991 A69-17307

Synchrotron radiation from trapped high energy electrons in Van Allen belt

06 p0992 A69-17324

Packet of finite amplitude VLF whistler waves, examining cyclotron resonance interaction with high energy electrons and development in magnetosphere

06 p0917 A69-17378

Electrostatic ionospheric waves excited around lower hybrid resonance frequency by high energy electrons

06 p0918 A69-17381

Radial diffusion of high energy electrons in outer radiation belts, determining statistically delay time between electron intensity variations

06 p0919 A69-17720

Cut-off boundary latitude and electron flux changes in midnight sector of outer radiation belt during magnetic bay periods from Injun 4 satellite data

07 p1204 A69-18836

Synchrotron radiation from relativistic electrons in magnetosphere, calculating variation with frequency and height of lines of force

08 p1306 A69-20182

Hydrogenic atoms ionization by high energy electrons, discussing cross sections for ejected electrons and total energy

08 p1356 A69-20738

Fast electron diffusion in stochastic magnetic field, obtaining diffusion coefficient as function of ratio of correlation time to Larmor period

08 p1368 A69-20807

Solar flare energetic electron access to polar zones from measurements made by nine channel magnetic spectrometer on polar orbiting vehicle

09 p1577 A69-21709

Hard X ray event spectrum representation by thermal bremsstrahlung spectrum emitted by energetic

electrons, determining various physical parameters of source

09 p1579 A69-22180

Energetic solar proton and electron event observed in July 1966 by Explorer 33 and OGO-C, noting association with invisible solar hemisphere flare

09 p1579 A69-22181

Relativistic solar electron detection in interplanetary space during July 7, 1966 proton flare event, noting energy spectrum and time history

10 p1767 A69-23766

Cosmic ray composition and nuclear interactions at very high energies, comparing results of Monte Carlo simulations with various experimental data

12 p2149 A69-26475

Plasmapause, plasma sheet and energetic trapped electrons in earth magnetosphere, considering slot, peak intensity and trapping boundary

12 p2151 A69-26953

ESRO 1 satellite measuring proton intensities and energy spectra of precipitated and magnetically trapped electrons

13 p2327 A69-27754

High energy electrons producing electromagnetic cascades in electron photon showers in lead measured by scintillation detectors

13 p2332 A69-28419

Charge sign ratio of primary cosmic ray electrons measured by balloon flown multistage spark chamber, studying east-west asymmetry

15 p2678 A69-31497

High energy electrons emission during alloy evaporation on hot metal filaments used for thin film deposition

16 p2827 A69-32016

Gamma ray flux from processes associated with high energy electrons from pulsar NP 0532, noting light polarization

20 p3588 A69-37410

Anisotropy of relativistic cosmic ray electrons, considering electron exposure time to synchrotron effects, energy loss from inverse Compton effect, etc

20 p3593 A69-38145

Monograph on whistler mode waves in plasma covering apparatus for studying gyroresonant interaction between whistler radiation and fast electrons

21 p3779 A69-39868

4 October 1965 type IV solar burst, studying acceleration mechanisms for fast electrons by comparing fine structure at various frequencies

22 p4001 A69-39983

Magnetospheric instabilities and whistler mode turbulence relationship to loss of high energy electrons from Van Allen belts

24 p4306 A69-42692

High energy nucleons and electrons accelerated in solar flares, considering interplanetary magnetic field effect on radiation properties near earth orbit

24 p4372 A69-43617

HIGH ENERGY INTERACTIONS

Cosmic ray air shower distribution from Crab Nebula, M87, M82, quasars, X ray sources and recent supernovae

02 p0308 A69-12597

Extensive air showers due to interaction of high energy particles with atmosphere, discussing astrophysics, cosmology and fundamental particle physics

03 p0498 A69-12938

Strong interactions at energies above 100 Gev, examining use of cosmic ray experiment for qualitative studies of interaction process

03 p0498 A69-12939

High energy strong interaction theory in cosmic ray physics, discussing Regge model, fireball production and quark problem

03 p0469 A69-12940

High energy interactions used to estimate energy of individual cosmic rays

03 p0498 A69-12941

High energy cosmic ray research facility at mountain altitudes, noting nucleon-proton interactions, particle identification and momentum analysis

03 p0499 A69-12942

Balloon flown High Altitude Particle Physics Experiments /HAPPE/ for research on high energy cosmic rays and particle interactions

03 p0499 A69-12943

High energy cosmic ray particles observed with SEZ-14 instrument aboard Proton 1 and 2 satellites

03 p0499 A69-12944

Ultrahigh energy interactions working model, suggesting interpretation of cosmic ray experimental data on basis of Aleph plus Pionization model

03 p0499 A69-12945

High energy interactions greater than 10 Gev from dosimetric point of view

03 p0371 A69-13477

Upper limit estimated for anomalous interaction between cosmic muons with greater than 100 Bev energy

06 p0986 A69-17246

Astrophysical aspects of primary energy spectrum deduced from shower size spectra and high energy interactions of extensive air showers

06 p0990 A69-17298

Extensive air showers characteristics based on models of high energy interactions of nucleons and pions with air nuclei

06 p0990 A69-17301

Muon component of extensive cosmic ray showers, discussing effect of multiplicity of secondary particles created by high energy nuclear interactions

07 p1207 A69-19325

Direct muon production, discussing range vs energy relation for favorable experiment and difficulties with observed muon flux isotropy

07 p1209 A69-19406

Compton scattering of microwave radiation on cosmic ray electrons proposed as mechanism generating 100 Mev cosmic gamma rays

09 p1580 A69-22295

Renormalizable weak interaction mechanism for generation of high energy muons from Tev cosmic rays in upper atmosphere

09 p1581 A69-22530

Weak interaction theory modifications needed for high energy cosmic ray muons to not violate conservation of probability

09 p1583 A69-22758

Superhigh energy cosmic ray interaction with neutrinos in universe, shape of cosmic ray spectrum and universe development

10 p1757 A69-22826

High energy cosmic radiation using Conversi detectors, noting design and internal efficiency

10 p1693 A69-23296

Line spectrum of flare gamma radiation due to atmosphere nuclei excitation by high energy proton acceleration

11 p1945 A69-24241

Poisson formula in double logarithmic approximation for photon emission cross section in analysis of bremsstrahlung involving high energy particles

11 p1922 A69-25758

Inelastic interactions between Tev cosmic particles and light element nuclei, describing design and operation of measuring apparatus and derivable data

12 p2093 A69-26583

High energy particle collisions, calculating inelastic interactions between cosmic nuclei

13 p2330 A69-28370

Nuclear emulsion high energy nucleon-nuclei interaction model accounting for two maxima track formation

13 p2303 A69-28371

Multiple particle production and resonance events during high energy particle collisions

13 p2303 A69-28372

High energy inelastic particle collisions observed at high altitude station, using Monte Carlo computations for nucleon-nucleon collision model

13 p2330 A69-28374

Four dimensional momenta transfer during high energy cosmic ray particle collisions, comparing various collision models

13 p2330 A69-28375

Gamma quanta produced during high energy nucleon-nuclei interaction of air atoms recorded with X ray film

13 p2303 A69-28376

High energy nuclear interactions in graphite block at high altitude, recording gamma quanta produced

13 p2330 A69-28377

Gamma quantum spectrum shape from high altitude X ray film and nuclear emulsion blackening, discussing high energy pion production

13 p2330 A69-28378

Fireball events, isobars and meson resonances in very high energy nuclear interactions, discussing dispersion and four momenta transfer methods

13 p2303 A69-28380

Pionization cross sections at 100 gev for interactions of cosmic ray neutrons and pions with C and Pb nuclei

13 p2330 A69-28382

Inelastic interaction cross sections of nuclear active particles at C and Fe in 70 to 1000 gev energy range

13 p2330 A69-28383

Inelastic interaction cross sections of nuclear active cosmic ray particles with atomic Fe and Pb in 100 to 1000 gev range

13 p2330 A69-28384

Mean free path of interaction of nuclear active particles in Fe with energies greater than 530 gev

13 p2303 A69-28385

Nuclear component energy flux absorption in Fe measured with ionization calorimeter

13 p2330 A69-28386

Nuclear interactions between high energy nuclear active particles and C nuclei, studying electron-photon component energy with nuclear photoemulsions

13 p2331 A69-28388

Asymmetrical showers in interaction of high energy nuclear active particles with atomic nuclei, estimating target particle mass

13 p2303 A69-28391

High energy nuclear active particles and muons studied with calorimeters, noting cascades muon origin and muon energy spectra

13 p2331 A69-28395

High energy scattering approximation valid from small to large angles, discussing errors and proton scattering by He

14 p2487 A69-29008

Nonlinear interactions of linearly polarized carbon dioxide laser signals in sulfur hexafluoride measured as function of angle between polarization planes

14 p2460 A69-29602

Three dimensional Monte Carlo calculations for hadronic component of extensive air showers using semiempirical model high energy nuclear interactions

15 p2678 A69-31482

High energy cosmic ray muon charge ratios at large zenith angles measured as function of momentum by using spectrometer

17 p3023 A69-33321

Photodisintegration of ultrahigh energy cosmic rays by universal radiation field, analyzing implications on origin and propagation time

18 p3188 A69-35006

Transverse momentum of fireball particles emitted in high energy inelastic collision related to emission angle and energy in accelerators

19 p3396 A69-36644

Cosmic protons and high energy heavy nuclei interaction with radiation in expanding universe, including estimates of light radiation influence on cosmic ray spectra

20 p3591 A69-38034

Matter and radiation interaction in hot model universe, investigating residual radiation spectrum deviation from Planck curve

21 p3797 A69-38536

Proton-antiproton high energy elastic scattering by bosons exchange, introducing vertex functions for non-local Lagrangian

21 p3775 A69-39467

Book on high energy astrophysics covering violent stellar phenomena, radio galaxies, quasars, pulsars, cosmic rays origin, mystery neutron stars, etc

22 p4008 A69-39900

Scattering of high energy Ar beams by room-temperature Ar, He and H molecules, deriving interaction energies at internuclear distances

22 p3988 A69-41187

Air showers muon threshold energies deep underground as function of zenith angle, discussing nucleon-air-nucleus collision parameters variation effect

23 p4207 A69-42497

High energy negative kappa meson-nucleon interactions with respect to multiplicity distribution of charged pions in nucleon-antinucleon annihilation, showing binomial distribution

24 p4351 A69-42791

HIGH ENERGY OXIDIZERS

Book on inorganic high energy oxidizers covering synthesis, structure and properties of fluoronitrogen, fluorine, fluorohalogen and oxygen compounds

12 p2146 A69-25824

HIGH ENERGY PROPELLANTS

High thrust fluorine engines and propellants

03 p0494 A69-12889

Material requirements for uncooled nozzles of solid propellant rocket motors burning aluminized propellants, discussing successful testing of pyrolytic graphite

06 p0946 A69-17530

HORA, flexible upper rocket stage, noting variable fuel tank capacity and high energy propulsion

08 p1409 A69-20094

Rocket engine high energy hybrid propellant performance optimization, discussing engine enlargement, oxidizer injection geometry, fuel additives, combustion gas vorticity, etc

11 p1943 A69-25428

Analytical model for liquid fluorine no-vent loading operations noting application to lightweight upper stage systems
[AIAA PAPER 69-579]

16 p2767 A69-32715

HIGH EXPLOSIVES

U EXPLOSIVES

HIGH FIELD MAGNETS

Cryogenic solenoids with pure Al conductor for production of strong magnetic fields, discussing softness and strain resistivity problems

12 p2016 A69-26497

NbN thin film production by refined reactive sputtering technique, discussing Pauli spin paramagnetism and spin orbit scattering in high field superconductivity

17 p3016 A69-33790

HIGH FREQUENCIES

Polarization rotation and phase delay effects as function of frequency for ionospherically propagated HF signals

02 p0208 A69-12331

Space charge limited square law diodes as HF mixers, noting low conversion loss of asymmetrical type

03 p0404 A69-13580

HF scattering of scalar plane wave by transparent sphere based on Watson transformation

07 p1181 A69-19033

HF breakdown of air using Boltzmann equation to determine net ionization frequency relation with electric field strength

08 p1357 A69-20810

Sporadic E region HF backscatter observed during IQSY, using PPI display

09 p1489 A69-21701

HF measurements by phase and amplification control of signal in impulse oscillography, noting accuracy in nanosecond range and signal distortion

11 p1880 A69-24541

Convective drift and flute instabilities of plasma stabilized by exerting HF forces on electrons, determining required HF field amplitudes

11 p1932 A69-25538

Transient behavior of transistor UHF oscillator, discussing network analysis for oscillation amplitude calculation by nonlinear transistor equivalent circuit diagram

11 p1854 A69-25613

Negative resistance effects computed for HF operation of SCL diodes, based on quantitative analysis of small signal response

12 p2038 A69-26349

Antenna suspension height variation effects on HF signals in ionospheric scattering lines

12 p2032 A69-26705

Shock pulse criterion limitations and HF transients technique for design and tests of structures and components

12 p2182 A69-26731

Multiple beam HF receiving antenna system for directivity, azimuthal coverage and noise limitation

13 p2228 A69-27631

Small signal, HF equivalent circuit for intrinsic metal oxide semiconductor field effect transistor, considering nonpinchoff and pinchoff modes

13 p2238 A69-28429

Disaccommodation component of magnetic aftereffect causing dynamic absorption of HF magnetic energy in ferrites

15 p2665 A69-30038

Atmospheric absorption calculations, noting direct D layer reflection effects on lower HF oblique propagation

16 p2752 A69-32389

Synchrotron radiation HF cut-off resulting from electrons with anisotropic pitch angle distribution for type IV solar radio bursts

22 p4006 A69-40577

Space simulation tests of satellite-borne quartz crystal oscillators for tracking based on Doppler effect

22 p3927 A69-40590

HF radio waves auroral absorption in ionosphere reviewed for first decade of riometry

22 p3902 A69-41218

HF receiver interference blanker, discussing limiter-blanker system, integration, effectiveness and squelch circuit

23 p4141 A69-42221

HIGH GAIN

High output laser amplifier consisting of glass and selenium oxychloride/Nd liquid lasers

23 p4173 A69-41565

HIGH GRAVITY ENVIRONMENTS

Sustained high deceleration load effects on quartz crystals during atmospheric entry studied by centrifuge test program on oscillator circuits

01 p0042 A69-10417

Electrodes for fuel cells with liquid electrolytes, discussing problems under weightless and high gravity situations

16 p2738 A69-32409

Environment effect on scientific and telecommunication equipment mounted on exploratory probe during Venus atmosphere entry for acceleration loading in design

19 p3431 A69-36037

HIGH LATITUDES

U POLAR REGIONS

HIGH LIFT DEVICES

U LIFT DEVICES

HIGH MELTING COMPOUNDS

U REFRACTORY MATERIALS

HIGH PASS FILTERS

Numerical filtering procedures for gust spectrum analyses compared for gain and phase lag frequency response characteristics, discussing gust acceleration spectra

01 p0084 A69-11052

Narrow bandpass filters based on ripple adjustment in response of low or high pass prototype

04 p0574 A69-14345

RLC filters transfer functions applied to development of high pass filter

08 p1300 A69-21176

High pass filters reflection group delay compared with low pass filters transmission group delay with Butterworth, Chebyshev and elliptic responses

21 p3686 A69-39139

Waveguide below cut-off high pass filters fabrication technique using slot cut into waveguide section

23 p4170 A69-42231

HIGH POLYMERS

Thermally stable polymers for high stress aerospace applications, noting chemical stability and structure of high polymers

12 p2117 A69-25853

Skin friction drag reducing high polymer solution injected into turbulent boundary layer to test effectiveness on marine vehicles

17 p2951 A69-33254

Craze formation and shear yielding considered for glassy polymers in terms of stress field requirements

17 p2993 A69-34169

Linear high polymer heat capacities by adding contributions from chain segments, deriving table of heat capacity contributions of polymer constituents

19 p3359 A69-36287

Heat conduction orientation anisotropy in linear amorphous high polymers due to uniaxial stretching, noting molecular weight distribution and temperature effects

19 p3359 A69-36443

Molecular engineering of high organic polymers, discussing molecular weight, crystallization, elastomers, fiber formers and building construction materials

20 p3566 A69-37598

HIGH PRESSURE

Ultrahigh pressure physics of materials, discussing apparatus, phase transitions and yield strength ductility relationships

02 p0260 A69-11803

High pressure rocket engine design, considering complete combustion, propellant feed system overall efficiency and thermodynamic gain

03 p0495 A69-12888

Graphite ablation in high pressure environments, extending existing analysis of thermochemical and thermomechanical behavior to include allotropic features
[AIAA PAPER 68-1153]

04 p0686 A69-14873

Viscosity of compressed nonreacting gas mixtures at high temperatures, discussing conditions for accurate calculation

05 p0845 A69-15895

Handbook of techniques in high pressure research and engineering, discussing construction materials, design and construction methods, measuring techniques, etc

07 p1137 A69-18412

Tensile strength of alloys under high pressure of hydrogen and helium, discussing embrittlement
[ASM PAPER D8-14.2]

07 p1169 A69-19667

Two way pyrotechnic high pressure gas valve for D2 satellite, noting resistance to leakage due to nearly monolithic construction

10 p1635 A69-23033

High pressure arc discharge diagnostics with spectroscopic method relating spectral profiles to central temperature, pressure and temperature distribution

12 p2094 A69-26968

High pressure AC arc heater system design criteria, discussing magnetic field, chamber gas flow, stabilizing elements, etc
[AIAA PAPER 69-348]

13 p2243 A69-28283

Elastohydrodynamic lubrication of square section high pressure face seals mounted on rigid housings, considering design charts for load and leakage
[ASLE FICFS PREPRINT 16]

15 p2621 A69-30493

High pressure combustion of ortho-barenes /carboranes/, determining formation heat and amounts of boric acid and carbon dioxide

21 p3670 A69-39625

Thomas-Fermi approximation applied to calculation of equations of state and thermodynamic functions at high pressure from differential equations of statistical atom model

22 p3984 A69-40186

Metals conductivity under high pressure, giving theories for electrons scattering cross sections on ions and for Debye temperature

22 p3980 A69-40187

HIGH PRESSURE OXYGEN

In vivo hyperbaric hyperoxia effect on erythrocytes unsaturated fatty acid composition alterations of tocopherol deficient mice

03 p0375 A69-14070

Induced high pressure HF discharge parameters computed for Ar, O and N by using electrical and thermal conductivity functions

15 p2662 A69-30976

Mice convulsions at varying hyperbaric oxygen pressures and carbon dioxide content correlated with decreasing brain alpha aminobutyric acid levels

19 p3257 A69-35972

Hyperbaric oxygen convulsions origin and site, studying pressure effect on brain electrical activity in rabbit by EEG

21 p3656 A69-38977

GABA shunt contribution to total metabolism of alpha ketoglutarate to succinate and high pressure O effect on system under in vitro conditions

22 p3877 A69-40776

HIGH Q

U Q FACTORS

HIGH RESOLUTION

Automatic heteroatomic plotting of high resolution mass spectral data, presenting relative intensity vs elemental composition in bar form

01 p0024 A69-10905

High range resolution by pulse to pulse frequency shifting, utilizing existing low resolution equipment by adding signal processing capability to receiver

03 p0388 A69-13181

High resolution magnetograph study of solar magnetic field, showing magnetic asymmetry and fluctuations

04 p0651 A69-14367

High resolution silver halide photoemulsions analyzed by holographic resolvometry using Ne-He laser to obtain interference patterns

15 p2606 A69-30052

Image intensifier and return beam sections of 4.5 inch high resolution vidicon and camera system for high definition signal readout

17 p2976 A69-34063

Multielement compound high resolution quick scan interferometer for rapidly changing solar burst observations at 3.75 GHz

18 p3118 A69-34968

Auroral spectroscopy for high resolution coverage at maximum wavelength range, discussing plane diffraction grating

21 p3707 A69-38486

HIGH SENSITIVITY

U SENSITIVITY

HIGH SPEED

High speed deformation of metals under pulse loading, noting role of maximum stress magnitude and deformation characteristics

12 p2113 A69-26043

Aerodynamic considerations of high speed hydrodynamics for underwater craft, noting rocket propulsion

13 p2245 A69-27418

HIGH SPEED CAMERAS
NT FRAMING CAMERAS

Ultrahigh speed holographic interferometry for studying plasmas produced by focused laser beam, noting electron density evolution in deuterium plasma

05 p0760 A69-15587

Electronically controlled spark gap system for HF optical frame separation based on Cranz-Schardin principle

05 p0763 A69-15985

High speed streak camera synchronization with shock tube process involving nonreacting gases or mixtures in pressure chamber

06 p0926 A69-17499

High speed photographic study of finely dispersed Al particles combustion and ignition in high temperature gas flows, noting dependence on oxidizers concentration

08 p1375 A69-20341

Book on photographic recording of high speed processes noting slit scanning, cinecameras, shutters, mirror rotation drive mechanisms, photographic materials, etc

08 p1317 A69-21033

Photography role in experimental research with applications to flight analysis and comparison with human visual accuracy

11 p1881 A69-24573

High speed photography - Conference, Stockholm, June 1968

12 p2080 A69-26135

Photoelectronic high speed image intensifier framing camera, showing single shot synchronized photography of electric spark in air

12 p2082 A69-26137

Shutter drive circuits for image converter camera noting focusing, deflection system, applications in plasma research, etc

12 p2082 A69-26138

Electron-optical image converter camera for wide time intervals, considering nanosecond electronic control and high voltage stabilized power supply

12 p2083 A69-26140

Nanosecond electron-optical image converter multiframe camera designed for reducing frame exposure time

12 p2083 A69-26141

Multiframe image converter registration of space-time ruby laser spot structure changes in Q switched regime prior to giant pulse formation

12 p2083 A69-26142

Image intensifier cascade tubes and slit type electronic cameras with high sensitivity multiple integral images, exemplifying projectile velocity measurements

12 p2083 A69-26143

Meshless shutter tube with nine images double deflection capability, using deflectron and semiconducting plates assembly

12 p2083 A69-26144

Diode type image shutter tube with proximity focusing for high speed photography

12 p2083 A69-26145

Ultrahigh speed photographic cameras with exposure times between 5 and 500 nsec, using image tube and high voltage pulse generator

12 p2083 A69-26146

Electronic image converter camera for observing rapidly evolving light phenomena consisting of high voltage pulse generator and biplanar tube image converter

12 p2084 A69-26147

RLC integrated low inductance circuit for magneto-optical high speed camera shutters, Q switched ruby laser and short light pulses in spark gap

12 p2084 A69-26149

Rotating mirror streak cameras in quantitative measurements of extreme compressions by shock waves, analyzing spatial and temporal resolving power

12 p2084 A69-26151

Practical time resolution of streak camera, discussing streak camera transfer function and measurement of resolution with pulsed laser diode emission

12 p2084 A69-26152

Continuously operating mirror scanning system for high speed photographic cameras, emphasizing maximum scanning speeds and framing rates

12 p2085 A69-26154

High speed streak camera for recording fast processes, noting changeability from optical to UV spectral range

12 p2085 A69-26155

Rotating mirror turbine with air cushion floating shaft for use in streak and framing cameras, noting framing rate

12 p2085 A69-26156

Rotating mirror framing camera with continuous access at f/18 aperture, discussing image transfer system, frame rate and capacity, etc

12 p2085 A69-26157

High speed continuous access framing camera design noting velocity doubler, parallax free aperture stop and polaroid film capability

12 p2085 A69-26158

Multiple lens high speed camera with mechanical shutter for investigating AC arc in circuit breaker during zero current, noting framing rate and capacity

12 p2085 A69-26159

Image intensifier for high speed spectrography of short duration faint radiation source, noting high speed shutter and resolution

12 p2085 A69-26160

Remote control spectrophotochronograph to study radiation of high speed high temperature processes, giving construction data and diagrams

12 p2085 A69-26161

Selective stroboscope with explosive bright light source and microsecond pulse duration for short flash period over large area, noting single frame separation method

12 p2086 A69-26162

Direct electron beam shadowgraph photographic /betagraphy/ technique for recording small high speed objects with 3 nanosecond exposure time

12 p2086 A69-26164

Shadow and schlieren photography, interferometry and quantitative data treatment obtainable by high speed multiframe photographic arrangement, using laser beam

12 p2086 A69-26165

Ultrahigh speed multiple framing photography system using sequentially modulated ruby laser and smear type camera applied to dynamic photoelasticity

12 p2086 A69-26166

Repetitive Q switched laser light source for interferometry, holography and high speed photography

12 p2087 A69-26170

Cine-holographic apparatus consisting of ruby laser and semitransparent mirror, noting capability of photographing within 10-100 nsec intervals

12 p2087 A69-26172

Q switched ruby laser application to high speed shadow photography and holography in study of gas flow around ballistic body

12 p2088 A69-26177

Schlieren high speed photography systems for ballistic projectile studies, discussing use of gas lasers as nanosecond light sources

12 p2088 A69-26182

Flow field over plain or complex bodies with pressure density changes, using high speed schlieren apparatus with color strip filter

12 p2088 A69-26183

Laser beam damage in glass blocks, noting high speed photographic study and absorption of light by inclusions

12 p2117 A69-26193

Fracture surfaces of thermally toughened glass plates using Cranz-Schardin spark camera, confirming internal front lead over front in surface layers

12 p2118 A69-26194

High speed photography of W strip fracture, considering electric current effects and electric circuit interruption by fracture

12 p2113 A69-26195

Ultrahigh speed cinematographic materials, discussing mirror turbines, streak and synchronized framing cameras

12 p2090 A69-26197

Streak camera for continuous photographing of dark and bright satellites up to 9 stellar magnitude

12 p2092 A69-26451

Flash radiography technique using tungsten wire explosion in vacuum to obtain ultrafast reproducible X ray pulse

12 p2092 A69-26480

High speed photographic study of plasma luminescence front and charged particle concentration front counter to electrodynamic force in crossed electric and magnetic fields

12 p2141 A69-27130

High speed photographs of plasma emission spectra in UV and soft X radiation spectrum regions, discussing theory, design and operation of facilities

14 p2496 A69-29784

High speed streak cameras applicability to low density theta pinch studies, describing image converters design, operation and block diagrams

14 p2496 A69-29787

High speed picture thermography in nondestructive testing, describing IR scanning frame rate and thermal image recording

15 p2618 A69-30316

High speed plate holder and shutter mechanisms for observing 20 May 1966 annular solar eclipse

15 p2686 A69-30534

KB-18A rotary prism moving film panoramic aerial strike camera

15 p2614 A69-31281

Kerr magneto-optic camera for 10 nsec exposures of dynamic magnetization configuration in magnetic thin film during high speed flux reversal

17 p2970 A69-32853

Nanosecond photography with superradiant light source, X rays or electrons using multipurpose electron accelerator, obtaining stop motion pictures

19 p3305 A69-35721

High speed photography using multiply pulsed ruby laser, Pockels cell modulation and smear camera for isochromatic and photoelastic pattern recording

19 p3306 A69-35731

High speed photography for hypervelocity aerobalistic ranges, using giant pulse ruby laser for front lighting

19 p3306 A69-35732

Dynamic Kerr observations of high speed flux reversal and relaxation process in permalloy thin films by magneto-optical camera with Q switched ruby laser

19 p3383 A69-36446

Holographic camera using Q switched laser for recording high speed interferograms in plasma diagnostics

19 p3315 A69-36726

Cranz-Schardin camera for high speed recording in dynamic photoelastic fringe pattern studies, discussing framing rates, fringe gradients and design

20 p3541 A69-37778

Photographic studies of explosive reactions with description of ultrahigh speed cameras

21 p3719 A69-38446

Pulse ruby laser-smear camera ultrahigh speed multiple frame recording system, describing applications to transmitted and scattered light photoelasticity

22 p3944 A69-40076

Photographic high speed recording system characteristics effects on dynamic photoelastic fringe patterns fidelity

22 p3945 A69-40077

HIGH STRENGTH

High modulus graphite/asbestos reinforced laminates, noting improved transverse strength and thermal properties

24 p4337 A69-43447

HIGH STRENGTH ALLOYS

NT MARAGING STEELS

Electron beam welding of beryllium, discussing procedures, weld quality and tensile strength efficiencies

02 p0252 A69-11863

Chromium bronze blanks compacted from granules for hardness and electrical conductivity, noting improved high strength characteristics over conventional production methods

02 p0266 A69-12127

Subcritical crack growth kinetics in high strength materials, suggesting growth rate control by reaction rate or diffusion

03 p0449 A69-13874

Low temperature aging prior to higher temperature artificial aging increases Al alloys strength

04 p0614 A69-14634

Columbium alloys properties, discussing creep strength, oxidation resistance, costs, production, etc

07 p1164 A69-18791

Elevated temperature mechanical properties data for commercially produced super-strength alloys supplemented by product description tables

08 p1328 A69-19913

Statistical techniques to develop nickel base superalloy with high temperature capabilities for jet engine turbine bucket applications

08 p1329 A69-20001

Fretting fatigue prevention in Al alloys, noting strength reduction due to fretting

09 p1526 A69-22148

Aluminum alloy weld tensile strength increased by heat treatment, discussing weld porosity due to surface film of absorbed hydrogen

11 p1891 A69-24896

- Preliminary natural aging effects on maximum strength properties obtained at various artificial aging temperatures for aluminum ternary alloy
11 p1905 A69-24921
- High strength alloys stress corrosion cracks, analyzing tensile ligament instability from plastic flow tests of bulk/compression/ specimens
13 p2277 A69-27404
- Fracture mechanics based on linear elasticity for evaluating crack propagation resistance, presenting plane strain fracture toughness test results for high strength alloys
[ASME PAPER 69-DE-10] 14 p2461 A69-28842
- Room temperature fatigue crack propagation rates for high strength aluminum alloy in heavy water environment compared with argon and distilled water
15 p2640 A69-30815
- Fracture processes in high strength materials, considering effect of stored elastic energy, component geometry, fracture toughness and environment
17 p2988 A69-33553
- Arrest mechanisms to halt crack before gross failure, involving material toughness exploitation and subduing stress by structural configuration
17 p3060 A69-33560
- Metallurgy, properties and applications of Co-Ni-Mo-Cr ultrahigh strength alloy, discussing corrosion
18 p3154 A69-34307
- Exposure tests of corrosion resistant claddings for high strength Al alloys protection, finding higher purity alloy cladding superiority
19 p3322 A69-35571
- High strength titanium alloys subcritical stress corrosion crack propagation, studying stress and environment effects on cleavage mode
19 p3343 A69-35922
- Fabrication effects on high strength Al alloy plate properties, comparing texture, plane strain fracture toughness, yield stress, ultimate tensile stress and elongation
19 p3346 A69-36437
- Alpha-beta Ti-Al-V-Mo-Zr alloy with high strength, fracture toughness and crack propagation resistance, low density and adequate ductility, discussing test results
[AIME PAPER S69-3] 21 p3747 A69-39472
- Optimal conditions for extrusion compacting of hard alloy mixtures plasticized with paraffin, determining plasticizer content, upsetting, pressure and temperature
22 p3956 A69-40635
- High strength austenitic Cr-Mn-Ni steel applicability to welded pressure vessels for cryogenic fluid storage, discussing operating temperature stability, weldability, etc
23 p4175 A69-41475
- Ingot dendrite arm spacing and thermomechanical treatment effects on fracture behavior and mechanical properties of Al alloy, finding ultimate and yield strengths
23 p4176 A69-41506
- HIGH STRENGTH STEELS**
NT MARAGING STEELS
- High temperature magnetic analysis of metallurgical structure of high strength steels and composites, including phase transformation and matrix grain structure
01 p0093 A69-10111
- Welding procedure for avoiding hydrogen cracking in high strength steels, stressing hydrogen escape from weld deposits
01 p0088 A69-11398
- High strength steel welding with physical properties equal to parent metal, discussing gas tungsten-arc, electron beam and plasma arc techniques
01 p0088 A69-11399
- Damping capacity and resistance to resonance fatigue of titanium and aluminum based steels and alloys
03 p0443 A69-13025
- Consumable electrode vacuum melted steels, discussing ausforming and stress corrosion cracking
04 p0604 A69-14528
- High strength martensitic aging steels alloying effects, phase transformation and aging
04 p0615 A69-14644
- Precipitation hardening stainless steels, discussing corrosion resistance, high strength, weldability, fabricability, heat treatment, etc
06 p0932 A69-17874
- Ultrahigh strength steel susceptibility to brittle failure, describing methods of testing rupture toughness and stress intensity factor
07 p1158 A69-18402

- Strength increase in steel components of aircraft, missiles and subsurfaces in relation to chronological application sequence, discussing ultimate strength
[ASM PAPER GG8-9.4] 07 p1169 A69-19675
- Retained austenite content control, strain aging and ausforming to improve toughness of high strength martensitic stainless steel without strength loss
08 p1330 A69-20010
- Constructional HY steels for high stress critical welded structures, discussing fracture mechanics stress intensity factor
08 p1333 A69-20405
- High strength steels welding processes effects on weld metal composition and microstructure, heat affected zone, etc
08 p1320 A69-20410
- Giant landing gear steel parts fabrication for Boeing 747 aircraft, discussing material and processing problems including Cr and Cd-Ti coatings application
09 p1434 A69-22064
- Cast and forged steel mechanical properties noting starting materials and production methods roles in cast steel improvement
11 p1904 A69-24644
- Heat treatable low alloy steels weldability for lightweight ultrahigh strength pressure vessels, gear and shaft fabrication in aerospace applications
12 p2100 A69-25827
- Covered electrode, submerged arc, electroslag, gas metal arc, gas tungsten arc and plasma arc welding processes application to high strength steels
12 p2100 A69-25828
- High strength steels, discussing ductility, austenite to martensite transformation for increased strain hardening rate and elongation and corrosion resistance
12 p2115 A69-26829
- Dynamic strain aging of Fe-Cr-C and Fe-Mo-C steels, analyzing strength, ductility and secondary hardening by using microprobes, foils diffraction and extraction replicas
13 p2276 A69-27403
- Bolt materials selection criteria in design of high strength lightweight joints, showing fatigue curves and temperature effects
13 p2268 A69-27758
- Tensile and creep deformation of fiber reinforced composites consisting of Mg-Li alloy matrix with high strength precipitation hardening stainless steel wire
17 p2986 A69-33073
- Plane strain fracture toughness of high strength steels and Ti alloy from precracked notched bend test method
19 p3346 A69-36436
- Crack growth in steel tested in hydrogenated condition, distilled water and in combination by acoustic emission, relating time intervals to hydrogen diffusion
19 p3350 A69-36893
- Welding processes providing low hydrogen welds for high strength steels, discussing heat treatment, maraging steels, fracture toughness, fatigue and static strength
[SBAC PAPER 8] 20 p3549 A69-37447
- Titanium strengthened high strength hot-rolled steels, discussing cooling rates leading to complete ferrite phase transformation
21 p3743 A69-38652
- High strength steel landing gear components corrosion protective finishes, discussing paint over bare steel, porous Cd plating and vacuum deposited Cd
21 p3743 A69-38730
- Metallurgy and properties of quenched and tempered high strength Ni-Co steels, discussing welding and aerospace applications
23 p4175 A69-41299
- Single run reheated weld wrought steel H cracking tested by constant load rupture /static fatigue/ technique
24 p4320 A69-42943
- HIGH TEMPERATURE**
- Electrothermal domains in semiconductors, examining domain velocity of motion under external potential
06 p0981 A69-17880
- Electrothermal domains in semiconductors, examining domain velocity of motion under external potential
14 p2503 A69-28789
- Corrosion mechanism in high temperature Nb-Zr/Li and Ta/Li heat pipes and heat transfer measurements, noting oxygen content of wall material
14 p2462 A69-29203
- Rate constants for recombination of atomic hydrogen with hydrogen molecules, hydrogen atoms and argon atoms at high temperatures behind shock waves
14 p2488 A69-29637

Intrinsic quantum-mechanical behavior of fully ionized gas at high temperature and low density, defining classical limit
14 p2502 A69-29992

HIGH TEMPERATURE AIR

- Very high temperature air flow laminar boundary layers on rotating bodies with unsteady chemical reactions, determining flow dynamic behavior
01 p0060 A69-10725
- Sikhote-Alin iron meteorite high temperature oxidation and ablation and simulation with Fe-Ni alloy, noting phase compositions and structure
01 p0025 A69-11373
- Zr-Be-Nb system oxidation resistance decrease at 650 degrees C ascribed to Be and Nb additions
02 p0262 A69-11844
- Air jet high temperature and low pressure influence on combustion stability in ramjet engine
03 p0531 A69-12968
- Large convective clouds in superheated air generated by static tests of Saturn 5 first stage
03 p0462 A69-14125
- Model for predicting characteristics of short duration intense microwave pulse propagating in heated high temperature air
04 p0634 A69-14453
- High temperature air plasma total radiant intensity measurements in shock tube
04 p0685 A69-14719
- Nickel structure alterations during interaction with high speed air flow at elevated temperatures
05 p0783 A69-16812
- Optical properties of hot air used to solve radiative transfer problems, including emissivities and absorption coefficients calculations
07 p1185 A69-19167
- Flow and heat transfer measurements for heated air in subsonic flow through contraction section connecting tube to conical section
[JPL-TR-32-1348] 10 p1809 A69-23194
- Energy transfer mechanisms between translational, rotational, vibrational, chemical and electronic degrees of freedom in hypersonic shock wave in high temperature air
12 p2063 A69-26969
- Air plasma electrical and thermal conductivity coefficients measured in wall stabilized DC arc at atmospheric pressure and high temperatures
15 p2663 A69-30979
- UV absorption coefficients of high temperature air measured in shock tube reflected region
18 p3230 A69-35073
- High temperature air spectral absorption indices determined at different pressures and temperatures
18 p3231 A69-35122
- Photoelectric measurements of UV absorption coefficients of high temperature air at specific temperature and wavelength ranges in pressure-driven shock tube
22 p4049 A69-40098
- Hot air balloon observational platform capabilities and advantages compared with helicopters, fixed wing aircraft and He balloons
22 p3865 A69-40810
- HIGH TEMPERATURE ALLOYS**
U HEAT RESISTANT ALLOYS
- HIGH TEMPERATURE ENVIRONMENTS**
- Cobalt base alloy for construction in high temperature corrosive environment, discussing mechanical properties, oxidation and corrosion resistance and phase stability
01 p0095 A69-10546
- BCS theory application to metallic modification of hydrogen for obtaining high temperature superconductor
04 p0642 A69-14680
- Mathematical model for estimating microbial survival in heat sterilization of spacecraft, including environmental and time cumulative effects
05 p0707 A69-15941
- High temperature effects on physiological functions of man noting cardiovascular system and heart performance, body heat exchange and blood and urine composition
05 p0710 A69-16523
- Rolling elements for high temperatures, discussing solid film lubricants, unlubricated rolling contact and materials and surface treatment
[IME PAPER 2] 07 p1138 A69-18566
- Instrumentation design problems connected with NERVA, considering high gamma and neutron radiations and temperature environments
[IEEE PAPER 2D-5] 07 p1134 A69-19189
- Glass/resin laminates behavior at high temperature
07 p1136 A69-19515

Arc jet generation and control noting application to hyperthermal aerospace environment studies, wind tunnels and materials heating and fabrication
08 p1371 A69-21128

Titanium-boron composites for gas turbines, mechanical properties and service life in high temperature environment
[ASME PAPER 69-GT-1] 09 p1527 A69-22510

Venus atmosphere origin, discussing high temperature effects and chemical composition via space probe and terrestrial observations
10 p1775 A69-23183

Space mission medical heat problems covering thermal characteristics and heat control, protection and resistance of space vehicle and astronaut adaptation
12 p2023 A69-26493

Ablation test specimen environment at high temperature, analyzing laboratory heating, pyrolysis gas diffusion, convective heating, critical stress and temperature profiles, etc
12 p2191 A69-26815

Tungsten disilicide coated Ta-W alloy oxidation mechanisms, comparing coatings protective properties at high temperatures
13 p2280 A69-28137

Barium vapor effect on converter materials, examining metals-ceramics compatibility at high temperatures
14 p2467 A69-29215

High temperature thermal resistance stability of multilayer cylindrical elements for thermionic converters determined by layer strain rate
14 p2539 A69-29218

Elastoplastic continua fire resistance at high temperatures, establishing plasticity condition and stress-strain relationships
14 p2536 A69-29598

Passive temperature indicators for maximum temperatures attained within rocket nozzle ablative materials
15 p2613 A69-31273

Strain gages to measure flight loads in high temperature environment, discussing selection, calibration techniques and performance characteristics
15 p2614 A69-31277

Airborne radomes reliability and high temperature environments, discussing missile nose cones, light weight ceramic techniques, circular polarization, etc
17 p2942 A69-34084

Polymer selection and plastics contribution to technologies, noting trend toward improved performance at elevated temperatures
18 p3161 A69-34610

High temperature effects on physiological functions of man noting cardiovascular system and heart performance, body heat exchange and blood and urine composition
18 p3096 A69-34742

Radiation effects produced by high temperatures of shock waves and nuclear explosion fireballs, air cooling, laser emission-matter interaction and optical phenomena
18 p3230 A69-34926

Barringerite as Fe-Ni phosphide occurring in meteorite Ollague pallastite, indicating troilite and schreibersite crystallization at high temperatures
18 p3205 A69-35433

Time required for acclimatization to work in high temperatures, noting rectal temperature and heart rate changes
21 p3654 A69-38905

Carbon monoxide dissociation at high temperatures observed spectroscopically, finding complex reaction chain with diatomic C as intermediate
23 p4113 A69-41692

Fastener materials selection for high temperature aircraft structures, considering various physical properties influence
24 p4325 A69-43441

HIGH TEMPERATURE FLUIDS

Chemical reactions activation energy at high temperature, noting cross section shape role for deducing activation energy from rate data
18 p3099 A69-34443

Level signaling device for high temperature conducting fluids, describing sensor construction and circuitry
20 p3536 A69-36980

HIGH TEMPERATURE GASES

Time dependent interaction of hot gas bubble with chemically reactive liquid stream, detailing thermal boundary layer theory
01 p0058 A69-10162

Collision integrals for high temperature gases calculated for high order potentials
01 p0124 A69-10929

Free bounded continuum processes effect in nonequilibrium gases of finite continuous opacity, noting curves of growth for finite plane parallel layer emission lines
01 p0121 A69-10959

Gases emissivity at high temperatures calculated for different gas layer thicknesses and atmospheric pressures, giving results in tabular form
02 p0285 A69-11567

Pressure to density ratio to analyze one dimensional high temperature gas flows with heat transfer, considering motion equations
02 p0350 A69-11576

Intermolecular interaction potentials for dissociating air components determined by calculating collision integrals for very high temperature gases
02 p0283 A69-11586

Integral spectral emissivity of gas arc plasmas at high temperatures and atmospheric pressure
02 p0291 A69-12484

Boundary layer local densities in high temperature gas flows obtained by measuring monochromatic soft X rays attenuation in layer
02 p0233 A69-12489

Photodissociation and photoionization of diatomic molecules at high temperatures with calculation of absorption cross sections
03 p0473 A69-14147

Constants in formulas describing temperature and pressure dependence of thermodynamic characteristics of high temperature monatomic ionized gases for positive ions
03 p0473 A69-14156

Motion of vapor derived from solid material vaporization and subsequent heating by nonequilibrium continuum radiation, noting continuity equations and energy transfer
04 p0686 A69-14985

Spectral line reversal method of measuring high temperatures of gases
05 p0761 A69-15763

Viscosity of compressed nonreacting gas mixtures at high temperatures, discussing conditions for accurate calculation
05 p0845 A69-15895

Emissivity of high temperature air and carbon dioxide-nitrogen mixtures in two diaphragm shock tube
06 p0911 A69-17348

Hot gas flows turbulence linear component intensity and frequency spectrum using optical measurement of pulse velocities
06 p0926 A69-17540

Gaseous film cooling at various hot gas acceleration rates and free stream turbulence levels
06 p1033 A69-17557

Fluidic vortex valve warm gas flow control for rocket application
[AIAA PAPER 69-118] 06 p0872 A69-18147

Static adhesion of metals in hot oxidizing gas environment, considering dry lubrication to prevent adhesion
[IME PAPER 4] 07 p1139 A69-18567

Hot gases optical properties based on real spectra, discussing radiative processes and cross sections calculation methods
07 p1185 A69-19166

Atomic and molecular excitation mechanisms in nonequilibrium gases up to 20000 K
08 p1354 A69-20146

Fortran 4 program for computation of equilibrium compositions of gas mixtures at high temperatures
08 p1278 A69-20154

High speed photographic study of finely dispersed Al particles combustion and ignition in high temperature gas flows, noting dependence on oxidizers concentration
08 p1375 A69-20341

Thermal and nonthermal radiation of hot gases using spectroscopic plasma diagnostics
08 p1363 A69-20463

Monograph on ignition, combustion and expansion in hypergolic liquid propellant mixtures at gas temperatures up to 3000 K for small rocket engines
08 p1375 A69-20723

High temperature regions cooling as applied to solar flares, considering energy losses due to heat conduction, bremsstrahlung, line emission and recombination radiation
09 p1588 A69-21362

Partially ionized Kr and Xe transport coefficients for various pressures and at high temperatures computed on basis of charged particle cross sections
09 p1548 A69-21935

Photometric methods for determination of H atom and hydroxyl radical concentrations in hot gases in convergent-divergent nozzles, noting Li/ lithium hydroxide absorption
09 p1496 A69-21952

Enthalpy distribution in plasma tube arc heater inlet flow region with hot and cold gas core boundary in presence of electric field
09 p1553 A69-22538

Hot gas ignition devices for solid propellant rocket motors, discussing ignition rod and microrockets
10 p1752 A69-23025

Intergalactic gas temperature and density reevaluated, considering neutral hydrogen distribution in galaxies peripheries and metagalactic background of ionizing UV radiation
11 p1946 A69-24589

Piston driven facilities for hot high pressure gas production including gas tunnels, heavy piston facilities, piston driven shock tunnels and high speed guns
11 p1862 A69-25012

Radiation studies of pressure driven shock tubes with atomic ionization at high temperatures, discussing thermal light sources, autoionization, etc
11 p1863 A69-25014

Planning, instrumentation and analysis of shock tube experiments in chemical kinetics, noting gas phase reaction rates at high temperatures
11 p1863 A69-25015

Electrostatic probe measurements in gas warmer than probe, demonstrating applicability of continuum theory for highly negative probe
11 p1930 A69-25274

Photometric and colorimetric characteristics of hot gas optically thin in continuous spectrum with optical thickness of several units in Balmer series lines
12 p2159 A69-26667

Blue continuum emission from hot carbon dioxide measured in shock tube, discussing applications to temperature measurement of gases containing carbon dioxide
14 p2427 A69-29014

Stellar Si burning at constant temperature studied for various initial abundance compositions, noting convergence toward pure Si relaxation
14 p2529 A69-29983

Induced high pressure HF discharge parameters computed for Ar, O and N by using electrical and thermal conductivity functions
15 p2662 A69-30976

Pressure, temperature, density and enthalpy of carbon dioxide behind primary and reflected shock waves determined by method suitable for computer
15 p2592 A69-31054

High gas stream temperature levels and distributions from transient and intermittent probe measurements
15 p2612 A69-31268

Microwave breakdown dependence on elevated gas temperature in electric arc shock tube, considering air, nitrogen and argon
16 p2749 A69-31693

Induction period of reactions behind incident shock waves traveling through undiluted high temperature CO and molecular oxygen mixtures, using CO flame spectra
16 p2877 A69-31768

High temperature radial turbine design for small gas turbine engines, discussing aerodynamic, structural and thermal analyses
[AIAA PAPER 69-524] 16 p2838 A69-32662

Fluidic vortex valve to modulate solid propellant generated hot gas flow
[AIAA PAPER 69-424] 16 p2844 A69-32723

Nongray equilibrium radiative heat transfer in viscous radiating shock layer around blunt body entering high temperature nonisothermal carbon dioxide-nitrogen atmosphere
[AIAA PAPER 69-636] 17 p3070 A69-33258

Radiative and conductive heat transfer in heated finite gaseous body with emphasis on collisional and radiative relaxation, noting cooling as two stage process
[AIAA PAPER 69-638] 17 p3073 A69-33311

Gladstone-Dale constants for dissociating high temperature oxygen determined for molecule and atom from density changes across shock
18 p3176 A69-34452

High temperature regions cooling as applied to solar flares, considering energy losses due to heat conduction, bremsstrahlung, line emission and recombination radiation
18 p3197 A69-34752

- High temperature combustion chamber as high velocity gas generator, noting application to MHD power generator research
18 p3184 A69-34931
- Time dependent equations for non-LTE occupation numbers of lower bound levels of hot gas or plasma outer layer atoms and ions
18 p3231 A69-35242
- Inelastic collisions and radiation effects on transport properties and shock structure in high temperature gases, obtaining density and temperature profiles
19 p3448 A69-36149
- Spectral absorption coefficients and emissivities of thermodynamic equilibrium mixture of various combustion products at high temperatures, based on graphs
19 p3266 A69-36840
- High gas stream temperatures determination from short exposure probe based on inferring temperature from transient response of sensor
20 p3536 A69-37005
- Modified model for vibration-dissociation relaxation coupling phenomena in nonequilibrium high temperature gas flow, discussing parameter U variation with kinetic temperature
20 p3514 A69-37208
- Electron band forces probable values of Meinel system positive N molecules and first positive system of nitrogen molecules at high temperatures
20 p3579 A69-37307
- Polytetrafluoroethylene ablation in high temperature argon, nitrogen, air and oxygen jets, discussing electric heater and heat flux measurement
20 p3632 A69-37522
- Destructive interaction of refractory carbides and graphite compositions with chemically active high temperature gas streams
21 p3751 A69-38640
- High temperature pneumatic systems for missile and space vehicle control, describing pressure regulators, flow controls, thrusters and analog valves
22 p3870 A69-41240
- Chemical reaction kinetics in high temperature gases in terms of collision theory, discussing gaseous statistics and Boltzmann equation
23 p4113 A69-41518
- Propellant ignition delay in contact of condensed fuel with hot reactive gas in shock tube, using graphical method and surface temperature fractional increase
23 p4199 A69-41897
- Hot gas flow through multilayer cylindrical shells, calculating temperature fields in walls
24 p4407 A69-42588
- HIGH TEMPERATURE LUBRICANTS**
- Two phase self lubricating composite materials for high temperature, detailing impact strength, friction and wear tests [IME PAPER 12]
07 p1137 A69-18560
- Rolling elements for high temperatures, discussing solid film lubricants, unlubricated rolling contact and materials and surface treatment [IME PAPER 2]
07 p1138 A69-18566
- Static adhesion of metals in hot oxidizing gas environment, considering dry lubrication to prevent adhesion [IME PAPER 4]
07 p1139 A69-18567
- Steel ball bearing high temperature fatigue life tested with synthetic paraffinic oil, fluorocarbon and polyphenyl ether [ASME PAPER 69-LUBS-18]
18 p3140 A69-34378
- Oil high temperature and oxidation conditions in aircraft piston engines, including physicochemical changes
24 p4321 A69-43141
- HIGH TEMPERATURE MATERIALS**
- U REFRACTORY MATERIALS**
- HIGH TEMPERATURE PLASMA**
- High temperature electron component of plasma produced by strong electron beam in adiabatic magnetic trap, deriving turbulent diffusion coefficient dependence
09 p1553 A69-22657
- Relativistic corrections to particle distribution functions for high temperature plasma in thermodynamic equilibrium by integrating Gibbs distribution
14 p2499 A69-29847
- High temperature ionized turbulent argon jet gasdynamics noting electron density
16 p2770 A69-31889
- Surface wave terms found in long wavelength limit during solution of initial value problem for semiinfinite hot plasma
24 p4356 A69-43364

HIGH TEMPERATURE PLASMAS

- Light scattering from plasmas embedded in homogeneous magnetic field, discussing solid state and high temperature gas plasmas
01 p0125 A69-10015
- Nonlinear hydromagnetic solitary wave propagation at angle to magnetic field in fully ionized quasi-neutral collisionless warm plasma, noting isotropic pressure effect
01 p0127 A69-10336
- High temperature, fully ionized plasma equation of state, using quantum statistical theory of low density electron-ion plasma in thermal equilibrium
01 p0128 A69-10346
- Double probe characteristics in flame with electronegative gas injection interpreted in terms of conduction of ions in ionized medium
01 p0176 A69-10385
- High temperature plasmas generated by exploding gold wires in vacuum, using time of flight technique for plasma densities and flow velocities
01 p0129 A69-10667
- Soviet book on high temperature plasma diagnostics methods covering measurement errors, holographic interferometers and light scattering
01 p0132 A69-11199
- High temperature measurement based on spectral line displacement and broadening due to Stark effect, noting diagrams for O, Na, Mg, Al and Si at various temperatures
03 p0481 A69-14146
- Electron emission from metal foils used to study lifetime, concentration and mean ion energy of hot plasma
03 p0481 A69-14211
- Continuous absorption of coefficient hydrogen-carbon plasma at 40,000 degrees K and 70 atm in 230-460 mm spectral range
04 p0639 A69-15371
- Plasma production by ultrashort pulse Q switched laser beam, discussing avoidance of initiation of breakdown wave
05 p0770 A69-15584
- Plasma instabilities produced by beam plasma discharge in mirror magnetic trap
05 p0803 A69-16212
- Hot plasma research at Polish Institute of Nuclear Research at Swierk
06 p0964 A69-17174
- Structure of plane shock wave of arbitrary force propagating across magnetic field in hot rarefied plasma
07 p1190 A69-18692
- Shot noise in dipole antenna immersed in hot plasma related to antenna input resistance, using Maxwellian velocity distribution
07 p1079 A69-18920
- Hot plasma containment by magnetic field, presenting results from stellarator for toroidal sheared magnetic field properties
07 p1190 A69-18929
- Thermonuclear neutron emission from high temperature deuterium plasma produced by focusing high power laser radiation on lithium deuteride surface [IEEE PAPER O-11]
07 p1153 A69-19072
- Collisionless shock waves in high beta plasmas and in cold plasmas
07 p1194 A69-19366
- Nuclear fusion reactor development, discussing magnetic field confinement of hot dense plasmas and electric power production economic possibilities
08 p1361 A69-20124
- High temperature high density theta-pinch plasma refraction measurements by interference refractometer with beam perpendicular to plasma axis
09 p1544 A69-21302
- Warm plasma addition to mirror confined hot plasma stabilizing convective loss cone mode
09 p1551 A69-22040
- Optical features of Sco-X-1, Tau-X-1 and Cyg-X-2 X ray sources, discussing optically thin hot plasma model for X ray emitter
10 p1682 A69-23327
- Power generating equipment operating with high temperature plasma as working medium requiring reactors with plasmized nuclear fuel coupled to MPD generators
10 p1738 A69-23489
- Gas film protection of quartz tube wall transparency loss due to hot plasma contact used to study UV emission during high power pulse discharges
11 p1926 A69-24616

Electrostatic probe measurements in gas warmer than probe, demonstrating applicability of continuum theory for highly negative probe
11 p1930 A69-25274

HF electrostatic waves propagation excited by electron beam in hot inhomogeneous plasma in magnetic field, studying wave transformation and absorption
11 p1931 A69-25364

High temperature plasma quasi-classical pseudopotential, binary function and free energy derived, using displacement and collective variable methods
11 p1934 A69-25701

Thermal conductivity of hydrogen plasma in transverse magnetic field at high temperatures
12 p2133 A69-25765

Joint probability distributions of electric microfield in hot ionized plasma consisting of noninteracting particles
12 p2139 A69-26871

UV radiation decreased transmittance through quartz exposed to plasma at high temperature and pressure, showing dependence on heated surface layer absorption
14 p2490 A69-29159

Millimeter and submillimeter microwave spectrometric studies of high temperature plasmas and noise emission, discussing instrumentation and absolute measurements
14 p2451 A69-29786

Scintillation counter to determine neutrons number and distribution in time in pulses generated in hot plasma
14 p2452 A69-29809

Thermodynamic Green function for Compton scatter cross section of photons by electrons in hot plasma
15 p2664 A69-31479

Continuous absorption of coefficient hydrogen-carbon plasma at 40,000 degrees K and 70 atm in 230-460 mm spectral range
16 p2822 A69-32118

Test apparatus for determining radiative properties of Ar plasma as function of high temperature and pressure [AIAA PAPER 69-601]
17 p3010 A69-33310

Plasma instabilities produced by beam plasma discharge in mirror magnetic trap
20 p3581 A69-37784

Mathematical model of nonlinear microwave breakdown for overdense and underdense plasma outside reentry vehicle, predicting nonlinear pulse transmission through high temperature plasma
20 p3495 A69-37853

High temperature equilibria from hydrocarbon plasma sources subjected to 3000 W RF electrodeless discharge
21 p3670 A69-39738

Equilibrium plasma configurations in magnetic field of two dimensional dipole analyzed under similar conditions to magnetospheric tail formation with neutral hot plasma layer
23 p4205 A69-41835

Soviet high temperature plasma physics research, discussing magnetic plasma containment by Tokamak traps
23 p4196 A69-42167

High temperature relatively dilute plasmas, discussing equations of motion, plasma oscillations, Landau damping, plasma confinement, etc
23 p4197 A69-42311

Guiding center Vlasov equation derived dielectric tensor of collisionless plasma, obtaining dispersion relation of Alfvén waves in warm plasma
23 p4197 A69-42416

High temperature plasma generation by high power laser beam irradiation on small solidified gas particle, detailing experimental equipment and procedures
24 p4354 A69-42645

Ionization equilibrium and radiative cooling of high temperature low density plasma, noting cosmic gas cooling curve of line emission from oxygen ion transitions
24 p4376 A69-42661

Error sources in magnetic field measurements using magnetic probes in high temperature plasmas, discussing detection, correction and elimination [AIAA PAPER 68-727]
24 p4316 A69-43571

Hot dense plasma used as driver gas producing plane stable current-free high Mach number shock fronts resembling plane blast waves
24 p4359 A69-43647

HIGH TEMPERATURE RESEARCH

- High temperature research on systems formed by zirconium dioxide with samarium and gadolinium sesquioxides near melting point
 - 01 p0101 A69-10044
- Zirconium corner in Zr-Nb-Cu phase diagram, plotting isothermal sections for high temperatures
 - 02 p0263 A69-11854
- Creep relaxation and kinking of aluminum-nickel whiskers at elevated temperature, noting permanent plastic deformation after heat treatment
 - 03 p0443 A69-13119
- Plasticity of metals under isothermal conditions at elevated temperatures
 - 04 p0671 A69-14454
- High temperature physical, mechanical and thermal properties of polycrystalline graphites, relating properties to manufacturing techniques and processing [AIAA PAPER 68-297]
 - 04 p0621 A69-15329
- Total and spectral emittance of cobalt surfaces conditioned by evaporating some cobalt from surface at high temperature in vacuo
 - 05 p0716 A69-16447
- Metal matrix composites highest potential for future use and development of filament-matrix compatibility in relation to high temperatures
 - 06 p0939 A69-16941
- Dynamic measurements of modulus of elasticity for polycrystalline nickel-tungsten alloys at elevated temperatures
 - 06 p0943 A69-17232
- Oxygen line absorption at elevated temperatures in Schumann-Runge system, estimating line widths
 - 06 p0962 A69-17803
- Static adhesion of metals in hot oxidizing gas environment, considering dry lubrication to prevent adhesion [IME PAPER 4]
 - 07 p1139 A69-18567
- Pressure-temperature dependence of nitrogen solubility in tungsten at 2400-3000 C
 - 07 p1168 A69-19602
- Consistency of high temperature equation of state of solids, considering Gruneisen parameter and lattice dynamics
 - 08 p1419 A69-19814
- Electron microscopy for continuous observation and recording of dynamic reactions in high temperature materials
 - 09 p1499 A69-22304
- Laser applications to high temperature, gas dynamical and plasma phenomena
 - 10 p1741 A69-23809
- Back stress role in strain rate equation for high temperature deformation and study of structure and applied stress effects
 - 11 p1987 A69-25388
- Pyrolytic zirconium carbide emissivity during initial heating compared with results for specimens prepared by powder metallurgy
 - 15 p2640 A69-30985
- H beta line for measuring radial temperature distribution in cylindrical hydrogen arc at one atm and to 150 A current in high temperature range
 - 15 p2671 A69-31101
- High temperature creep, discussing creep curves and activation energy
 - 17 p2986 A69-32911
- Machine for testing high temperature creep under variable tensile-compressive stress while maintaining specimen stability, noting discrepancy between creep strains in heat resistant alloy
 - 17 p3054 A69-33044
- High temperature electrochemical high performance batteries
 - 17 p2904 A69-33663
- High temperature and short duration flows - Conference, Freiburg University, West Germany, April 1967
 - 18 p3114 A69-34444
- Oxygen influence on low pressure ethylene decomposition on high temperature tungsten and Re ribbons surface
 - 19 p3266 A69-36732
- Book on high temperature materials covering creep phenomena, design considerations, load and temperature effects, various steels, superalloys, refractory metals, etc
 - 20 p3559 A69-37148
- High temperature pyrolysis of simple organic molecules in shock tube, considering diatomic C formation and decay rate
 - 23 p4113 A69-41693

HIGH TEMPERATURE TESTS

- Wires electrical explosion applications used to study equilibrium characteristics of metals and alloys at high temperatures
 - 02 p0280 A69-11581
- Zr-Be-Nb alloys mechanical tensile properties above room temperature for low concentrations of Be and Nb
 - 02 p0262 A69-11845
- Oxidation resistance of Zr-Nb-Mo alloys at high temperature in air or water
 - 02 p0264 A69-11857
- High temperature tensile strengths of uncoated boron filament and filament coated with silicon carbide
 - 02 p0270 A69-12731
- Gas turbine alloys composition role in high temperature corrosion resistance under high sulfur diesel fuel combustion
 - 03 p0444 A69-13309
- Shock tube equilibrium method for determining vapor pressure of platinum submicron particles by suspension in xenon-argon carrier gas at high temperatures
 - 03 p0532 A69-13319
- Li and Cs electrical conductivity measured from 300-1200 K, obtaining interpolation formulas by least squares method
 - 03 p0481 A69-14148
- Fluid stability, viscosity, compressibility, gas solubility and lubricating properties determination for high temperature hydraulic systems
 - 04 p0550 A69-14662
- High temperature eddy current crack detection technique for atomic reactor components under high thermal gradients
 - 04 p0607 A69-14972
- Structural stability of cobalt base superalloy at high temperature prolonged exposure under stress
 - 05 p0781 A69-16448
- Grain strain measurements use in studies of high temperature creep
 - 06 p0943 A69-17231
- Mechanical stability of pressed and forged Ti alloy gas turbine disks at high temperatures and rates of rotation
 - 06 p1026 A69-18018
- Polycrystalline W steady state creep rate at high temperatures noting effects of stress, grain size and sub-grain size
 - 07 p1158 A69-18241
- High temperature vacuum tensile test device for continuously direct recording various stress-strain diagram rates by interchangeable dynamometer scale
 - 07 p1117 A69-19319
- Thermal conductivity, electrical resistivity and degree of blackness of refractory metals at high temperatures measured by Bode and Eger-Disselhorst methods
 - 09 p1522 A69-21589
- Heat resistant nickel alloys static and dynamic properties at high temperature, creep-fatigue interaction, etc
 - 09 p1523 A69-21609
- Refractory compounds static strength temperature dependence at high temperatures measured in reference to melting temperature
 - 09 p1523 A69-21873
- Silica fabric reinforced phenolic composites mechanical properties at temperatures above cure level
 - 09 p1530 A69-22321
- High temperature magnetic testing and analysis of structure sensitive hysteresis properties
 - 09 p1512 A69-22375
- Titanium alloy castings fatigue behavior at room and elevated temperatures in annealed and heat treated conditions [ASME PAPER 69-GT-22]
 - 09 p1619 A69-22497
- Nickel alloy high temperature tests, noting coagulation of precipitated gamma prime phase, vacancies and creep rate increase
 - 09 p1528 A69-22733
- Superplasticity in W-Re alloys, noting tensile properties, grain size and strain rate sensitivity for various Re contents at high temperatures
 - 10 p1707 A69-22990
- Low cycle fatigue fracture behavior at high temperatures, noting fatigue crack behavior and crack density concept
 - 10 p1797 A69-23081
- Ultrasonics for automatic measurements of temperature and elastic moduli above 5000 F
 - 10 p1694 A69-23373

- Anharmonic lattice vibrations, specific heats and coefficient of linear expansion of solids at high temperatures, noting interatomic spacing
 - 10 p1809 A69-23653
- Brittle fracture at high temperatures in titanium alloys using scanning electron beam microanalysis, noting reaction diffusion with atmosphere and grain boundaries destruction
 - 10 p1713 A69-23823
- Refractory metals testing at high temperatures in vacuum, discussing equipment modifications, temperature measurement and residual gas problems
 - 10 p1714 A69-23848
- Bending creep vacuum testing device for brittle materials at high temperatures, noting load variation capability
 - 10 p1696 A69-23851
- Metal fatigue at elevated temperatures concerning viscosity, energy loss and stress, strain and temperature cycling
 - 10 p1803 A69-24043
- Zr-W high temperature phase relationships, noting Zr-zirconium tungstide eutectic temperature, zirconium tungstide peritectic temperature and Zr solubility in W
 - 11 p1903 A69-24578
- Reinforced metals properties and applications including fibers and lamination, notch sensitivity, brittle fracture, failure and heat resistance characteristics
 - 11 p1904 A69-24898
- Integral normal emissivity of electrically conducting materials heated to high temperatures by HF field of inductor, discussing measurement procedure and equipment
 - 11 p1888 A69-25230
- Heat resistant composites, discussing composition, properties and high temperature behavior, plastic materials, reinforcement filaments, whiskers and test methods
 - 12 p2117 A69-25855
- Stress corrosion cracking of titanium alloys in contact with high temperature fuel tank sealants
 - 12 p2112 A69-25945
- Beryllium oxide semiconductor thermistor for temperatures to 2500 K, discussing construction materials and test results
 - 12 p2092 A69-26478
- Furnace for automatic high temperature cycling in controlled oxidizing environment
 - 12 p2093 A69-26483
- Wing section of high lift/drag test vehicle for 2500 F reentry, describing design, manufacture and testing
 - 12 p2103 A69-26837
- Intermetallic compound precipitation effects on mechanical properties of Fe-Mo alloy at high temperatures
 - 12 p2116 A69-26925
- Friction and wear characteristics of ceramics and cermets as bearing materials, with tabulation of room temperature hardness and maximum service temperatures
 - 13 p2284 A69-27232
- Polycrystalline Re high temperature plastic deformation during tensile creep, including activation energy and substructure dislocation study
 - 13 p2280 A69-27767
- Actinium fueled thermionic generator design and characteristics, noting emitter temperature and material
 - 14 p2399 A69-29192
- Monograph on mechanical behavior of crystalline solids at elevated temperatures, discussing creep properties of metals, solid solutions and two phase alloys
 - 14 p2465 A69-29749
- Electrodeposits on molybdenum alloys in high temperature oxidizing environments, noting performance of Cr-Ni-Cr composite coating
 - 14 p2466 A69-29934
- Thermal diffusivity and conductivity of rolled plane parallel spectrally pure palladium preheated in vacuum and high temperatures
 - 15 p2636 A69-30045
- Tungsten vacuum-arc melted samples in deformed and recrystallized conditions, studying mechanical properties at temperatures near ductile to brittle transition
 - 15 p2637 A69-30267
- High temperature structural adhesives at temperatures of 350 F and higher including epoxies, polyimides, amide-imides and polybenzimidazoles
 - 15 p2642 A69-30329
- Vaporization rates of Ti, Zr, Hf, Nb and Ta carbides at high temperatures measured by Langmuir method
 - 15 p2640 A69-30983

Integral normal emissivity of Ta and Hf carbides at temperatures from 1300 to 3000 K measured by radiation method in vacuum

15 p2640 A69-30984

Water cooled split-flow probe measuring enthalpy of high temperature subsonic streams

15 p2614 A69-31275

High temperature capacitance strain gage development, discussing extensometer prototype systems

15 p2614 A69-31278

High temperature ultrasonic testing to measure and control solid materials early in processing

15 p2632 A69-31514

Creep rate and temperature effect on creep resistance shown in direct correlation with Al-Mg alloys strength by long term high temperature tests

16 p2801 A69-31782

Thermal EMF, electrical conductivity and Peltier effect in sintered refractory oxides at high temperature in air and in Ar

17 p3068 A69-32990

Fatigue crack growth rates in stainless steel at elevated temperature measured as function of oxygen pressure in resonant fatigue machine

17 p2987 A69-33074

Column method of measuring thermal conductivity of CO and oxygen in 350-1500 degrees K temperature range, discussing error sources and data reliability [AIAA PAPER 69-603]

17 p3073 A69-33298

Testing machine for in vacuo tensile testing of tubular metallic specimens at high temperatures and low pressures

18 p3117 A69-34604

Deformation studies of high melting point metals and alloys at high temperatures in vacuum, noting crack formation resistance and annealing time variations

18 p3155 A69-34651

Ti thermal diffusivity and conductivity at high temperatures measured from heat wave phase shift

18 p3156 A69-34699

Low cycle fatigue leading to failure on AISI 321 stainless steel as function of elevated temperature and straining frequency

18 p3219 A69-34834

Kinetics of titanium oxidation in transitional range at high temperatures, showing agreement with oxidation model

18 p3157 A69-35252

Annealed Cr structural changes during creep at 900 C in air, discussing crystalline disorientation X ray studies and stress

18 p3160 A69-35453

Nickel base superalloy high temperature fatigue properties, comparing crack initiation and propagation in directionally solidified and conventionally cast forms

19 p3342 A69-35919

Boron nitride and boron nitride composite under high temperatures in air and vacuum for various time periods, discussing thermal shock and oxidation resistance

19 p3359 A69-36208

Titanium alloys hot salt stress corrosion cracking, studying effects of chlorides and surface oxides

19 p3352 A69-36905

High temperature strain measurement based on strain gage with capacitance changes for structural analysis

20 p3537 A69-37006

Inorganic heat resistant coatings high temperature mechanical tests noting corrosion, safety factors and rigidity after heating and temperature gradients

20 p3538 A69-37360

Creep strain rate measurement at high temperatures by inductance strain gage to determine deformations from 0.2 microns

20 p3544 A69-37815

Refractory materials thermal conductivity high temperature measurement technique, discussing sample geometry, furnace design, temperature modulation and computerized simulation

21 p3742 A69-38422

External friction of refractory materials at high temperature in vacuum, discussing testing machine and methods including metallographic, X ray, spectral and electron diffraction analyses

21 p3690 A69-39154

Serrated yielding at high temperatures from dislocation theory viewpoint, considering critical strain relation to temperature and strain rate

21 p3749 A69-39710

Ablation effect on heat transfer coefficient of carbon, silica and ceramic cloths impregnated with phenolic resin subjected to torch testing and motor firing

21 p3753 A69-39800

High temperature electronic tensile testing device utilizing SCR to study strain rate effect on metals properties

21 p3727 A69-39811

Time-temperature method modified for combining stress relaxation data with stress or strain into single correlation curve, analyzing isothermal relaxation data

21 p3846 A69-39812

Mn, S and rare earth additions influence on Inconel alloy weld microfissuring including material, hot ductility and tensile strength data

22 p3967 A69-39883

Cu, Ni, Co, Cr and Ti effect on high temperature mechanical properties and stability after prolonged annealing of Al-Si alloy with added 1 percent Mg

22 p3968 A69-40063

Error correction of strain gage/cement combination reading relaxation under prolonged steady loading at elevated temperature

22 p4042 A69-40313

Thermal conductivity precision tests for refractory materials using ASTM method C 201-47, emphasizing sample preparation and calorimeter calibration

22 p3956 A69-40671

Spectral emissivity and radiation intensity spectral distribution measurements for heat-resistant materials at high temperature, using photographic method

23 p4238 A69-41330

Black body radiation at very high temperatures, discussing pion-nucleon interaction in pion gas in thermal equilibrium

23 p4238 A69-41358

Silicate glass impurity droplet formations on alumina single crystals polished surfaces analyzed by electron microprobe as function of high temperature

23 p4176 A69-41597

Dynamic hot corrosion rig test for operating environment and alloy composition effect on sulfidation attack during gas turbine fuel combustion

23 p4150 A69-42448

Thermochemical analysis of hot corrosion during sulfidation-oxidation of superalloy gas turbine engine components using Pourbaix method

23 p4178 A69-42449

Vacuum cured glass-reinforced polyimide laminate tests for use at elevated temperatures on F-111 aircraft

24 p4335 A69-42933

HIGH VACUUM ORBITAL SIMULATOR

Thermal vacuum simulator for testing manned Lunar Module Test Vehicle, using conformal skin heaters to control heating rates and skin temperature [AIAA PAPER 69-312]

09 p1479 A69-22386

HIGH VOLTAGES

High voltage controlled amplitude rectangular pulse generators having nanosecond buildup time

04 p0597 A69-14849

Controlled factorial experiments on high voltage vacuum breakdown, using Yates algorithm analysis on computer

05 p0731 A69-16244

HIGHWAYS

Ground access routes between business districts and airports compared for passenger transport modes [AIAA PAPER 68-1072]

12 p2059 A69-26773

HILBERT SPACE

NT BANACH SPACE

Unstable Volterra integral equation reduced to finding solutions for Fredholm integral equation by restricting solutions to closed ball in Hilbert space

01 p0103 A69-10004

Approximate solution convergence for linear operator equation in Hilbert space by least squares method

01 p0105 A69-10728

Bogoliubov transformations effect on quasi-free translationally invariant states of fermion fields, using Clifford algebra based on Hilbert space

03 p0455 A69-13364

First-kind operator equation solution by reduction to dual extremum problem, proving existence and convergence

04 p0622 A69-14622

Theorems concerning interspherical fractionally linear transformations of operators in Hilbert spaces formulated and proved, analyzing unit sphere during fractional linear transformation

05 p0787 A69-16423

Lehmann-Machly procedure for lower and upper bounds to eigenvalues of Hermitian operators in Hilbert space

06 p1020 A69-17131

Convergence of Bubnov-Galerkin method in complex separable Hilbert space, proving theorems for sufficient conditions

12 p2123 A69-26607

Variational formulation of nonlinear differential equations, treating vector fields in Hilbert spaces, finding relations useful in quantum mechanics

23 p4181 A69-41723

HILBERT TRANSFORMATION

Hilbert transform properties and application to random signals, analyzing analytic signal associated with general Gaussian random signal

08 p1271 A69-19915

Infinite strip plane elastic problem reduced to Hilbert problem by employing multiply connected region and biharmonic solutions

15 p2707 A69-30625

HILL DETERMINANT

Dynamic systems stability with periodically varying parameters analyzed by Hill type infinite determinant, exemplifying helicopter rotor aeroelastic stability in forward flight

11 p1990 A69-25510

Differential equations application to electrical circuit problems, solving voltage for series LCR networks and transforming Mathieu into Hill equation

12 p2052 A69-26351

HILL LUNAR THEORY

Five families of simple periodic symmetrical orbits in Hill limiting case of restricted three body problem, studying asymptotic forms

08 p1393 A69-20572

HILL METHOD

Hill stability in unbounded three body problem, analyzing motion in baricentric coordinate system, deriving equations for curves defining conditions for stability

04 p0652 A69-14543

Hill surfaces in triangular restricted four body problem, deriving equation of surface of zero relative velocity

04 p0660 A69-15038

Jacobi integral and Hill criterion for analyzing motion stability of natural satellites and large planets inside gravitational sphere

20 p3596 A69-37314

Hill method applied to motion theory for minor planet 11 Parthenope using computerized first order perturbations from principal planets

20 p3596 A69-37316

HILLER MILITARY AIRCRAFT

U MILITARY AIRCRAFT

HILSCH TUBES

Stationary velocity profile near jet driven vortex tube outer wall calculated by laminar boundary layer flow theory, neglecting wall curvature effects

05 p0798 A69-15610

Ranque vortex tube as cooling device in MA-3 ventilating garment

09 p1447 A69-22550

HINDRANCE

U CONSTRAINTS

HINGE MOMENTS

U TORQUE

HINGED ROTOR BLADES

U HINGES

U ROTARY WINGS

HINGELESS ROTORS

U RIGID ROTORS

HINGES

Life margin tests of oil lubricated oscillating caged needle roller bearings under service conditions duplicating helicopter rotor hinge pin locations [ASLE PAPER 68-LC-7]

15 p2622 A69-30609

Degrees of freedom requirements in hinge couplings of multibody satellites, examining main body attitude control

21 p3820 A69-39233

HIPPOCAMPUS

EEG electrode stimulated simian mental activity in problem solving during simulated space flight, discussing skull implantation and EEG recordings of hippocampus activity

17 p2910 A69-33749

Stimulation effects of reticular formation, hippocampus and septum on sensory responses of posterior hypothalamic neurones in cats

21 p3656 A69-38979

HISS

Simultaneous VLF hiss, auroral light and X rays observed during Norwegian balloon study

02 p0309 A69-12744

Auroral VLF emission bursts simultaneous with sharp ionospheric absorption dip and SC deflections in geomagnetic H, noting corpuscular ionization

24 p4308 A69-43001

HISTAMINES

- Dogs cardiovascular responses to histamine liberator /compound 48/80/, describing shock and acidosis with elevated histamine levels
22 p3873 A69-40206

HISTOGRAMS

- Histograms construction for azimuthal distribution of atmospherics from visual and photographic data obtained by CRT display goniometer
04 p0593 A69-15102
- Histogram approximation of plastic deformation of metals, analyzing tube under internal load and sandwiched layer compression
10 p1793 A69-22850
- Arbitrary circle distribution in plane transformed to corresponding distribution of spheres in space for size and shape distribution determination of disperse phase
20 p3627 A69-37764

HISTOLOGY

- Cosmic radiation genetic, cytological and histological changes, particularly of pathological nature, on ecological systems employed in long duration Soviet manned flights
01 p0016 A69-10948
- Physiological, cytochemical and histological effects on muscular activity, nervous system, adrenal and thyroid glands and liver of mice during 30 day hypokinesia
02 p0198 A69-11502
- Surgical radiolesion in human brain by high energy protons
03 p0374 A69-13501
- Histological investigation of internal organs of mice exposed to atmosphere with high oxygen content
05 p0709 A69-16513
- Immunological and histochemical methods for studying mice reactivity after long term exposure to hyperoxic atmosphere
07 p1065 A69-18975
- Structural and functional changes in cells as result of freezing of muscular tissue or suspension of erythrocytes
10 p1642 A69-23117
- Histochemical studies on nucleus basalis of Meynert of squirrel monkey
12 p2018 A69-25774
- Histochemical tests on enzymes distribution in rhesus and squirrel monkeys intrafusal and extrafusal muscle fibers
12 p2018 A69-25777
- Lactate dehydrogenase and monoamine oxidase distribution in medulla oblongata and cerebellum of squirrel monkey
12 p2018 A69-25778
- Pulmonary oxygen toxicity, analyzing reticulin and clastic tissue damage and hyaline membranes by histochemical techniques
14 p2407 A69-29298
- Histological changes in rat skin after 13 Mev proton irradiation, evaluating biopsies in tissue culture
14 p2407 A69-29299
- Histological investigation of internal organs of mice exposed to atmosphere with high oxygen content
18 p3096 A69-34732
- Immunological and histochemical methods for studying mice reactivity after long term exposure to hyperoxic atmosphere
20 p3479 A69-38223
- Albino guinea pigs respiration rates and ear skin histology after exposures to coherent ruby laser light
24 p4270 A69-42578
- Vascular interface histological and chemical responses to acute mechanical stress in dog aorta
24 p4257 A69-42625
- Fibrosis histological patterns of left ventricular papillary muscles from comparison of hearts with myocardial infarction, noting acute and healed mural lesions
24 p4261 A69-42724

HIVOS [SIMULATOR]

- U HIGH VACUUM ORBITAL SIMULATOR

HL-10 REENTRY VEHICLE

- Lifting Body Test Program at Edwards AFB compared with flight testing standards of high performance aircraft, discussing testing philosophy
06 p1017 A69-17671

HMX

- Slowly exploding wires for igniting self sustaining deflagrations in PETN, RDX, HMX and tetryl, comparing circuit parameters for detonation initiation
01 p0141 A69-10678

HO-6 HELICOPTER

- U OH-6 HELICOPTER

HODOGRAPHS

- Subsonic or transonic bidimensional flows around airfoils by hodograph method [ONERA-TP-645]
03 p0361 A69-12873
- Vehicle motion parameters in Newtonian central force field determined, using geometrical structures devised from properties of velocity hodograph
05 p0765 A69-16686
- Hodograph for lifting airfoil with subsonic velocity at infinity, using Chaplygin compressibility law for computation [ONERA-TP-631]
07 p1049 A69-18416
- Graphical method for plotting electrophysiological observations, showing hodographs application in biopotential studies of cortical reactions
11 p1829 A69-24540
- Kowalewski solution for motion of heavy body with fixed point, noting hodographs
11 p1917 A69-24776
- Construction of single headed spin detonation polar as confluence of shock and deflagration waves by two dimensional hodograph
19 p3451 A69-36368
- Compressible fluid two dimensional supersonic and one dimensional unsteady flows similarities shown graphically, discussing hodograph-speedgraph relationship
19 p3300 A69-36777
- Invariant transformations for hodograph matrix equations in gas dynamics
21 p3695 A69-39001
- Normalized hodographic mapping for constrained trajectory families, discussing mapping concepts, information content and applications [AIAA PAPER 69-924]
21 p3809 A69-39362
- HOHMANN TRAJECTORIES**
U ELLIPTICAL ORBITS
U TRANSFER ORBITS
- HOHMANN TRANSFER ORBITS**
U ELLIPTICAL ORBITS
U TRANSFER ORBITS
- HOLDERS**
NT FLAME HOLDERS
- Clamp type diode holders for obtaining CW coherent emission from gallium arsenide injection lasers
03 p0435 A69-12985

HOLE DISTRIBUTION

- Stress concentration near holes in three layer spherical shells, determining boundary conditions at hole perimeters for various loads
21 p3833 A69-38570

HOLE DISTRIBUTION [ELECTRONICS]

- Minority carrier density and diode current obtained as Laplace transforms from analyzing differential equations, describing charge carriers in semiconductor
01 p0049 A69-11361
- Photoluminescence measurement of distribution of majority carrier concentration in GaAs
03 p0489 A69-13893
- Electrical properties of crystals relation to variations of electron or hole distributions, discussing inhomogeneities
04 p0641 A69-14506
- Hole concentration at deep energy levels in p-type indium antimonide single crystals containing structural defects
07 p1199 A69-18687
- Photoconductivity of semiconductors with multivalley electron energy and isotropic hole spectra, discussing nonlinearity of field dependence
11 p1937 A69-24913
- Photoluminescence measurement of distribution of majority carrier concentration in GaAs
11 p1939 A69-25694
- Ultrahigh vacuum cleaved GaAs-Cs and GaAs-cesium monoxide photoemission acceptor densities, noting crystal parameters role
23 p4198 A69-41548

HOLE DISTRIBUTION [MECHANICS]

- Stress-strain state of isotropic elastic medium using equations with stress tensor, noting role of curvilinear hole
01 p0164 A69-10081
- Stress concentration near eccentric elliptical hole in spherical shell, using computer methods
01 p0165 A69-10089
- Three dimensional stress concentration around cylindrical hole in semiinfinite elastic body loaded at infinity, using Fredholm integral equation
01 p0172 A69-11332

- Unreinforced circular cutouts effects on buckling behavior of circular cylindrical shells under axial compression, using photoelastic plastic shells
03 p0523 A69-12988
- Successive approximations utilizing analytic stress functions used to obtain solution for infinite plate with arbitrary holes under biaxial stresses [ASME PAPER 68-PVP-1]
03 p0523 A69-12998
- Stress distribution near circular hole in elastic layer
04 p0667 A69-14266
- Stress concentration near arbitrary hole, assuming small deformations and physical nonlinearities
04 p0667 A69-14268
- Plane thermal stress distribution determined around holes under steady temperature distribution, using complex variable approach
05 p0836 A69-15877
- Plane problem of moment theory of elasticity for stress concentration near circular hole
05 p0842 A69-16502
- Stress concentration at thermally insulated holes in elastic material created by disturbance of uniform heat flow at holes
06 p1021 A69-17184
- Two dimensional stress distribution changes around rectangular hole with rounded corners for varying internal pressure and temperature
06 p1025 A69-17611
- Stress distribution in shallow spherical shell with smooth cornered rectangular hole or biperiodically arranged set of holes, using computer program
06 p1027 A69-18020
- Stress distribution around equal size holes at ends of crack for normal uniaxial tension, based on photoelastic and brittle lacquer technique
08 p1412 A69-20257
- Monograph on plane problem and bending problem for infinite elastic plate with doubly periodic set of circular holes
08 p1416 A69-20709
- Contour of axisymmetric holes in dimensional electron-beam machining calculated from density distribution of transmitted energy
08 p1321 A69-20727
- Stress concentration at circular hole in infinite plate for large strains and nonlinearity, analyzed by integral operator method
09 p1613 A69-21629
- Stress-strain state of infinite plate with elliptical eccentric reinforced hole, using quadrature method
09 p1613 A69-21630
- Asymptotic two dimensional moment theory of elasticity, analyzing stress concentration at curvilinear holes and fluctuating boundary loads
09 p1614 A69-21884
- Error estimates of stress concentration at free hole determined by two dimensional elasticity theory of thick plates
09 p1614 A69-21885
- Plastic strain intensity distribution in aluminum alloy specimen with central hole measured with marked orthogonal lattice
09 p1617 A69-22221
- Surface heat transfer coefficients under perforated plate of multiple square array round impinging air jets [ASME PAPER 69-GT-4]
09 p1624 A69-22508
- Numerical analysis for stresses in finite or infinite plate with arbitrary holes, considering boundary value problems
10 p1793 A69-22882
- Thickness and drilled holes effects on notch toughness of Charpy V notch bars over wide temperature range
10 p1798 A69-23087
- Couple-stresses and singular stress concentrations in elastic solids with locally unbounded deformations and stress reduction around hole
10 p1798 A69-23149
- Central circular hole effect on fundamental frequency of rectangular fixed edges plate, discussing hole size, square plates, etc [ASME PAPER 69-VIBR-62]
10 p1805 A69-24156
- Elastic unbounded isotropic plane weakened by doubly periodic system of identical holes, noting solution involving Cauchy type integral
11 p1972 A69-24652
- Stress distribution around holes in thin shells and plates during large elastic displacements, considering hole size, loading and shallow spherical shells
11 p1972 A69-24654
- Stress concentration in isotropic plates weakened by curvilinear holes subjected to loading at infinity, noting curvature at corner points of holes
11 p1972 A69-24655

Semibrittle material decompaction influence on stress distribution in infinite plate with edge loaded circular hole, noting stress-strain relation nonlinearities
11 p1972 A69-24656

Limiting equilibrium of plate weakened by curvilinear hole stress raiser with one or two cusps, obtaining stress-strain diagrams
11 p1973 A69-24658

Stress concentration at holes and cavities in thin elastic shells under static and dynamic loads, considering physical nonlinearities of material
11 p1974 A69-24665

Stress concentration around curvilinear holes in three layer spherical and cylindrical isotropic shells with hard and soft fillers under external loads
11 p1984 A69-25171

Boundary determination for separating elastic and plastic regions of infinite perforated sheet with triangular network of circular holes
11 p1996 A69-25736

Membrane and bending stresses around elliptic hole in thin circular cylindrical shell, considering axial tension
[NAL-TN-13] 13 p2362 A69-28123

Stress and displacement fields for uniaxially loaded infinite elastic continua with doubly periodic array of holes and inclusions, using finite element method
13 p2363 A69-28133

Stress concentration around holes in thin shells, including analysis of stress-strain state in cylindrical and spherical shells
14 p2532 A69-28977

Couple-stresses effect on stress concentration of plate containing infinite row of holes, solving linear elastic problem in isotropic Cosserat continua for plate
15 p2708 A69-30640

Thermal stresses in circular cylinder with regularly distributed cavities, establishing distribution laws for temperatures and stresses
15 p2714 A69-31196

Stresses in perforated ribbed cylindrical shell subjected to internal pressure using brittle coating, electrical strain gages, photoelasticity and micrometers
16 p2876 A69-32784

Iterative algorithm applied to shell theory boundary value problem of stress concentrations at shallow shell holes
19 p3436 A69-35847

Stress and strain concentration factors under initial stages of elastoplastic deformation for circular hole in infinite medium, using method of successive approximation
19 p3447 A69-36860

Thermal stress concentration near elliptical hole in thin walled liquid filled cylindrical shell in presence of temperature gradient across shell cross section
20 p3622 A69-37325

Enlargement of circular hole in disk with kinematic hardening and Tresca yield function compared with isotropic hardening
21 p3840 A69-39297

Infinite systems of algebraic equations in periodic problems for spherical shells with circular holes approximated by reduction method
23 p4227 A69-41706

Stress concentrations in circular plate with square hole subject to triaxial tension
23 p4227 A69-41712

Deflections of heated circular plates with or without concentric circular hole and with different boundary conditions and temperature distributions
23 p4234 A69-42412

HOLE MOBILITY

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels
01 p0137 A69-10257

Differential thermal EMF at room temperature in p-InSb as function of concentration for different electron and hole scattering mechanisms
06 p0981 A69-17881

Hole density/Zn concentration ratio in Zn doped solution grown p-type GaP, noting anomalous electrical properties
09 p1557 A69-21750

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels
09 p1559 A69-22650

Differential thermal EMF at room temperature in p-InSb as function of concentration for different electron and hole scattering mechanisms
14 p2503 A69-28790

Hole mobilities in InSb due to phonon and ionized impurities scattering on basis of strain potential constants
16 p2824 A69-31575

HOLES

Surface smoothness of laser beam holes, discussing possible damage and technology recommendations
04 p0606 A69-14607

HOLES [ELECTRON DEFICIENCIES]

Avalanche multiplication in abrupt silicon p-n junctions analyzed using ionization coefficient measurements for holes and electrons
01 p0135 A69-10038

P-n-p junctions photoconductivity decay observation, determining signal bulk minority carrier lifetime in thin n regions
01 p0136 A69-10242

Static problem of electric field intensity and space charge density distribution in semiconductor with hot electrons and holes
06 p0978 A69-16989

Microwave spectrum of n-InSb avalanche plasmas under magnetic field, considering dynamic current-voltage characteristics, hole wave instabilities and microwave emission processes
07 p1197 A69-18466

Hole density/Zn concentration ratio in Zn doped solution grown p-type GaP, noting anomalous electrical properties
09 p1557 A69-21750

Drawn n-p and p-n junctions obtained in Te and Zn doped GaSb single crystals prepared in pure He atmosphere by Czochralski method
10 p1745 A69-23329

LF noise mechanism for forward biased semiconductor p-n junction, noting charge carrier capture in electron traps of carrier depleted region
11 p1857 A69-25705

Electromagnetic wave propagation cut-off in slightly uncompensated electron hole plasma, discussing wave evanescence above critical magnetic field value
12 p2133 A69-25926

Photosimulation of electron hole and exciton mechanisms of NaI-Tl and KI-Tl single crystal scintillations
12 p2144 A69-26722

Magnetic and electric field effects on undamped electron-hole LF frequency plasma oscillations in spatially homogeneous nonpolar semiconductor
13 p2323 A69-28581

Periodicity of magnetothermal oscillations in pressure annealed pyrolytic graphite compared with hole carriers
14 p2504 A69-29005

Inhomogeneous distribution of nonequilibrium current carrier concentrations in semiconductors with electrons and holes of different lifetimes, noting instability
15 p2665 A69-30041

Photosimulation of electron hole and exciton mechanisms of NaI-Tl and KI-Tl single crystal scintillations
21 p3781 A69-39135

HOLLAND

U NETHERLANDS

HOLOGRAPHY

Ultrasonic holography applications in nondestructive testing, describing conversion of ultrasonic field into optical field
01 p0078 A69-10132

Three dimensional holography using scatter plates applicable to transilluminated objects in particular distribution of particles or phase disturbances
01 p0079 A69-10217

Hologram chromatic aberration compensation by two lens system
01 p0080 A69-10430

Multibeam recording technique producing speckle-free images in redundant holograms of transparencies
01 p0082 A69-10850

Holographic film sensitometric properties, plotting density vs log exposure and time vs gamma curve
01 p0082 A69-10851

Holographic measurement of sinusoidally vibrating Al sheet, verifying results with Twyman-Green interferometer
01 p0082 A69-10853

Holographic phase variation distribution recording by interference between reconstructed wave fronts from separate holograms
01 p0083 A69-10984

Holographic theory of visual memory behavior, discussing human tests in situation of prompted visual recall
01 p0083 A69-10985

Axisymmetric optical filter synthesis based on holographic technique for making Gabor zone plates, using scalar diffraction theory
02 p0249 A69-11927

Hyperstereoscopic and hypostereoscopic hologram images with doubled or halved interocular distance noting effect on image depth
02 p0249 A69-11931

Stroboscopic holography for repetitive scenes, using mode locked laser as source
02 p0250 A69-12411

Stroboscopic technique for obtaining interferential holograms of vibrating transparent and reflecting plates
02 p0251 A69-12561

Holographic laser type memory with bulk storage capacity and short readout time
03 p0428 A69-13116

Optical imaging systems achieving aperture synthesis by lensless Fourier transform holography, noting X ray astronomy, ultrasonic and space applications
03 p0430 A69-13324

Holographic and microwave technology relationship, noting side-looking radar photos and X band radiation
03 p0430 A69-13354

Hologram heterodyne scanner for production from scanning coherent light beam of electrical signal corresponding to scanned hologram, noting camera tube application
03 p0431 A69-13827

Hologram film nonlinearity effect in recording diffusely illuminated objects analyzed by means of amplitude transmittance
03 p0431 A69-13958

Lithium niobate single crystals for holographic storage, noting use for optical information storage, processing and display devices
03 p0432 A69-14184

Bleaching of absorption hologram diffraction gratings for improved light efficiency, discussing bleaching materials results
04 p0596 A69-14284

Submicron particles spatial location in three dimensional volume detected by Fraunhofer holography
04 p0596 A69-14292

Laser holography using colored KBr crystals subjected to hard gamma radiation as photosensitive material
04 p0598 A69-14855

Vibrational characteristics of sonar transducer analyzed by optical holographic interferometry
04 p0598 A69-14871

Holographic interferometer for isopachic stress analysis, utilizing photochromic recording for real time interference
04 p0599 A69-15013

Holography, discussing image formation, position, enlargement, aberration and application to stress analysis
04 p0601 A69-15186

Corollary of reciprocity theorem in holography
04 p0602 A69-15377

Ultrahigh speed holographic interferometry for studying plasmas produced by focused laser beam, noting electron density evolution in deuterium plasma
05 p0760 A69-15587

Plasma refractive index determination by holographic interferometry with double pulse ruby laser
05 p0761 A69-15620

Holograms applied to analysis of wave packets propagating in quasi-optical transmission lines
05 p0718 A69-15650

Holograms volume depth increased by reference beam splitting or by photographing holograms on same plate in sequence
05 p0761 A69-15651

Holography, discussing one beam recording, real time interferometry, pulsed laser, etc
05 p0761 A69-15774

Thermal self defocusing effect of laser beam in self focusing liquids, measuring refractivity changes by high speed double exposure holography
[IEEE PAPER J-7] 05 p0775 A69-16320

Antennas with any mean surface, prescribed feeder and radiation pattern synthesized by microwave holography
05 p0734 A69-16574

Stationary coherent /hologram/ radar and sonar using zone plate action to provide range information
05 p0721 A69-16578

- Strain releasing method for reduction of small local movements of recording holographic emulsions resulting in degradation of holographically reconstructed wavefronts
06 p0923 A69-16930
- Acoustic holograms, describing electronic method of reconstructing holographic image in order to avoid multiple image problem
06 p0923 A69-16933
- Time averaged optical holographic interferometry of standing longitudinal acoustic waves in square cross section duct
06 p0923 A69-17150
- Lippman-Bragg holograms production with high reconstruction efficiencies by suitable recording and processing techniques with commercially available photographic plates
06 p0926 A69-17481
- Holography for display devices, nondestructive testing, quality control, high speed, microscopy, acoustic testing, sonar, data storage, etc
06 p0928 A69-17873
- Optical Fourier transform applied to structural analysis of catalase crystalline media by gas laser
06 p0928 A69-17890
- Acoustical and microwave holography obviating need for real or simulated reference wave, using recording time for reference
06 p0928 A69-17902
- Laser displays for information transfer to provide improved computer driven read-out techniques, noting real image and holographic displays
06 p0928 A69-17924
- Ultrasonic holograms and optical reconstructions derived by scanning receiver or source
06 p0930 A69-18228
- Holographic interferometry, determining mechanical vibration amplitudes of compressor and turbine blades and airframe panel [SAE PAPER 690265]
07 p1130 A69-18313
- Fresnel pulse holograms of three dimensional diffuse objects by single mode ruby laser with or without Q switching
07 p1132 A69-18801
- Hologram form of forward scatter bistatic radar or sonar
07 p1078 A69-18866
- Hologram storing on photochromic film, obtaining equations for optimal exposure time [IEEE PAPER F-1]
07 p1133 A69-19053
- Holography principles to design high capacity high speed storage devices, using photochrome recording medium
07 p1133 A69-19158
- Microwave holographic reconstruction of metal objects inside purse by nonscanning method, visualizing microwave field by polaroid and liquid-crystal techniques
07 p1135 A69-19449
- Holography by scanning receiver, source, object or both source and receiver, discussing resolution, magnification, image position and aberrations
07 p1136 A69-19640
- Holography combined with laser interferometry for nondestructive testing in materials, components and assemblies
07 p1137 A69-19777
- Holographic developments, discussing interferometry, micro deflections, dynamic behavior of three dimensional structure, acoustical applications, etc
08 p1312 A69-19894
- Image degradation in holograms undersampled with respect to space-bandwidth product, noting signal to noise ratio and resolution
08 p1312 A69-20078
- High quality holography with illumination possessing low degree of spatial coherence by means of interferometric arrangement with amplitude division
08 p1312 A69-20081
- Back diffraction field behind hologram illuminated with laser beam, noting hologram image observation through beam cross section
08 p1312 A69-20086
- Reflection holograms with single mode pulsed ruby laser
08 p1313 A69-20164
- Holography applied to schlieren and phase contrast methods to enable visualization of minute phase change in light scattering object
08 p1313 A69-20176
- Stereoradiography using holographic techniques to examine internal structure of opaque objects
08 p1313 A69-20178
- Holography and similarity criterion for developing image recognition algorithm
08 p1314 A69-20417
- Holographic technique for measuring thin fluid film profiles using interference image reconstruction and helium-neon laser as coherent light source
08 p1317 A69-20873
- Helium-neon gas laser as coherent light source for holograms of vaporizing fuel films and for Michelson interferometer
08 p1327 A69-20874
- Formation and characteristics of flash produced in air by single pulse of Q switched ruby laser, using holographic interferograms
08 p1317 A69-21022
- Holographic displays using ultrasonic vibrations or laser outputs as optical sources, discussing recording materials, responses and computer applications
09 p1492 A69-21394
- Spatial size and velocity distributions for liquid or solid aerosols suspended in air flow using Q spoiled ruby laser and holography
09 p1492 A69-21418
- Borrmann effect and abnormal transmission and extinction observed by reconstruction of images of holograms recorded in three dimensional photosensitive medium
09 p1494 A69-21492
- Holographic image formation through turbulent medium simulated by shower glass, noting thickness variations and prismatic light deflection effects
09 p1494 A69-21559
- Holograms with unfiltered radiation obtained from superhigh pressure mercury lamp and incandescent lamp
09 p1495 A69-21671
- Time average holography for analysis of vibrations, overcoming fringe peak decrease with large amplitude and loss of phase information
09 p1495 A69-21749
- Holographic technique for reconstructing light wave front, developing algorithm for three dimensional images recognition
09 p1495 A69-21859
- Holographic technique application to radio and sound wave ranges, discussing incoherent holography development to overcome difficulties in image reconstruction of stationary objects
09 p1498 A69-22133
- Two dimensional signal analog correlation in noise background using optical spatial filtering Fraunhofer hologram and input as functions
09 p1499 A69-22276
- Holography, presenting state of art review, specifications of patents and extensive classified bibliography
09 p1502 A69-22773
- Light wave reconstruction including polarization, using single reference beam with depolarizing diffuser as source
10 p1690 A69-22951
- Shearing interferometry by simultaneous reconstruction of two wavefronts on single photographic plate
10 p1690 A69-22952
- Complex spatial filtering by holographic Fourier transform subtraction
10 p1690 A69-22953
- Modulated wave holography for detecting and reconstructing ultrasonic beam path, noting applicability to vibrating objects analysis
10 p1694 A69-23368
- Acoustical holography - Conference, Huntington Beach, California, December 1967, Volume 1
10 p1694 A69-23540
- Physical principles and practical methods in light and sound holography, comparing advantages and limitations
10 p1694 A69-23541
- Acoustic holographic measurement of surface deformation generated by sound waves impinging on gas-liquid interface, discussing acoustic amplitude components
10 p1695 A69-23542
- Imaging ultrasound by holography with reconstruction in light, comparing methods using scanned hologram and liquid surface
10 p1695 A69-23543
- Holographic techniques for acoustical imaging to obtain three dimensional images of opaque objects encountered in nondestructive testing
10 p1695 A69-23544
- Quantitative analysis of plane waves for weak interaction of two dimensional sound and light fields in acoustical imaging by diffracted light
10 p1695 A69-23545
- Digital reconstruction of images from optical holograms for acoustical data, discussing image degradations
10 p1695 A69-23547
- Qualitative analysis of recording phase only acoustic holograms of object wave instead of both phase and amplitude, considering fringe patterns and conjugate image
10 p1695 A69-23548
- Matrix method for acoustical holograms and optical reconstruction of virtual and conjugate images using laser light of 6328 Å wavelength
10 p1696 A69-23549
- Hologram obtained by recording interference pattern displayed by ultrasonic camera, discussing real time viewing
10 p1696 A69-23550
- Typographical spatial correlation filtering methods for reconstructing holographic images with ultrasonic waves, noting application to flaw recognition
10 p1696 A69-23551
- Alphabetical listing of references and abstracts of papers on acoustical holography
10 p1696 A69-23552
- Associative holographic memories, discussing recall systems, logic circuits, etc
10 p1697 A69-23868
- Computer generated holograms using binary transmittance for wave fronts and three dimensional images construction
10 p1697 A69-23869
- Holographic motion picture recorded using CW Q switched laser and conventional camera
10 p1697 A69-24002
- Magnetic reversible phase holograms on thin film Mn-Bi by Curie-point writing technique
10 p1706 A69-24007
- Holographic mode shapes used in conjunction with mechanical impedance approach for vibration analysis of turbine blades [ASME PAPER 69-VIBR-32]
10 p1806 A69-24174
- Double focus lens holography for diffusely reflecting surface deformation recording, discussing gas lasers, Polaroid photographic materials, etc
11 p1880 A69-24467
- Holograms on photochrome films by split beam He-Ne laser using special mirror system
11 p1881 A69-24631
- Holography - Conference, San Francisco, May 1968
11 p1881 A69-24675
- In-line, off-axis, incoherent light, computer generated and coded object beam holograms
11 p1882 A69-24676
- Fourier transform holography lensless recording using spherical wave as reference beam
11 p1882 A69-24677
- Fraunhofer hologram as interference pattern between Fraunhofer diffraction pattern and coherent background, noting role of distance in image deterioration
11 p1882 A69-24678
- Multicolor hologram recording and reconstruction gas lasers, discussing control of ghosts in three dimensional image
11 p1882 A69-24679
- Gas lasers coherence properties and availability for holography, discussing continuous power output of He-Ne, Ar and Kr ion lasers
11 p1895 A69-24680
- Holographic recording materials effect on optical reconstruction wave and hologram properties
11 p1882 A69-24681
- Pulsed laser holography advantages for recording small objects in motion and holographic interferometry advantages for complex surfaces and time-separated events
11 p1883 A69-24682
- Pulsed laser holography for recording interferograms of laser created plasma, discussing laser source properties, spatial and spectral coherence, double pulse mode, etc
11 p1895 A69-24683
- Holographic multiplexing for producing three dimensional reconstruction of nonlaboratory objects in horizontal direction, noting TV and X ray pictures applications
11 p1883 A69-24684
- Holography of moving diffuse object, noting bright unblurred image dependence on adaptation to velocity
11 p1883 A69-24685
- Coherent pulse laser holography for front and back lighted holograms of moving objects
11 p1895 A69-24686

Acoustic holography free surface and scanning methods, noting acoustical intensity role in phase stability

11 p1883 A69-24687

Holographic techniques application to optical systems for high resolution images of distant objects by overcoming atmospheric turbulence and light diffraction limitations

11 p1883 A69-24688

Single frequency Ar ion laser for deep field holography noting thermal compensation, servo stabilization, operating mode, high power and high coherence

11 p1895 A69-24689

Scenic holographic stereograms resolution and up/down scaling, discussing roles of projector lens and camera aperture

11 p1883 A69-24690

Holographic recording of three dimensional flow field velocities, applying theory of particle size assessment via Fraunhofer holography

11 p1884 A69-24691

Bias elimination in intensity pattern of incoherent holograms by introducing narrow band time modulation of light

11 p1885 A69-24846

Holographic scanning technique for laser beam deflection, noting two and three dimensional raster scanning

11 p1885 A69-24847

Ray tracing application to evaluating aberrations produced by Fresnel holograms for optimizing design of aplanatic lens holography system

11 p1885 A69-24848

Holographic reconstruction of spatial distribution of laser light field within and outside resonator, noting suitability for pulsed laser analysis

11 p1885 A69-24919

Large capacity holographic memory design based on page organization concept, considering lens parameters and hologram size

11 p1886 A69-25041

Holograms reconstructing images of points with diameters approximated by width of autocorrelation functions

11 p1886 A69-25058

Holography for temperature distribution measurement around heated wire, using He-Ne laser

11 p1887 A69-25197

Phototelegraphic transmission of holographs of objects in many shades through channel with limited number of signal levels

11 p1889 A69-25549

Light scattering materials for transparent objects holography, analyzing Christiansen filter and milk white and ground glass plates

11 p1889 A69-25550

Holographic in-focus projection of images on three dimensional focal planes of arbitrary shape, noting moire pattern strain analysis

11 p1889 A69-25653

Liquid crystals for photographically recording microwave holograms, noting impossibility of three dimensional image reconstruction with side-looking radar zone plates

12 p2079 A69-25917

Multiple information storage in sampled hologram in space division multiplexing holography, constructing hologram with sound waves and reconstructing images with laser light

12 p2079 A69-25921

Holography theory and applications including imaging, Fourier transforms and interferometry

12 p2086 A69-26169

Repetitive Q switched laser light source for interferometry, holography and high speed photography

12 p2087 A69-26170

Holography with pulsed lasers for high speed recording of amplitude and phase disturbances and rapid transient events, noting reconstruction evaluation problems

12 p2087 A69-26171

Cine-holographic apparatus consisting of ruby laser and semitransparent mirror, noting capability of photographing within 10-100 nsec intervals

12 p2087 A69-26172

Cinematic holography as continuous motion uninterrupted viewing system compared with standard cinematography, noting flicker-free shutterless reproduction

12 p2087 A69-26173

Holographic position and velocity measurement techniques for high speed objects from explosions

12 p2087 A69-26174

Deformation measurement by laser pulse holographic method, discussing laser source choice criteria

12 p2087 A69-26175

Holography for optical analysis of hypersonic aerodynamics in single shot firing tunnel

12 p2087 A69-26176

Q switched ruby laser application to high speed shadow photography and holography in study of gas flow around ballistic body

12 p2088 A69-26177

Holographic interference method for measuring film height in analyses of fluid film vaporization under blowing hot gas

12 p2088 A69-26178

Pulsed laser holography used in conjunction with schlieren three dimensional system for observing gas density gradients at different test positions

12 p2088 A69-26179

Fourier transform holograms by Fresnel zone-plate fringe interferometer, discussing source size and bandwidth

12 p2090 A69-26249

Atmospheric turbulence degradation of holographs resolution improved by geometrical optics and series-expansion methods, noting role of Gaussian and exponential refractive index structure

12 p2090 A69-26250

Twin image elimination in holography using single sideband object waves without offset reference wave introduction

12 p2090 A69-26253

Power spectrum of object flux transmittance using Fourier transform type holographic system compared to systems similar to correlator

12 p2090 A69-26254

Nonlinear holograms distortions analyzed by five point method utilizing relation between irradiance and amplitude transmittance of photographic emulsion

12 p2090 A69-26255

Holographic recording in spatially incoherent light, describing hologram reconstruction method

12 p2090 A69-26293

Coherent optical flaw detection and surface microstrain measurement techniques including holographic interferometry, optical correlation and diffraction

12 p2180 A69-26305

Mach-Zender interferometer to study discontinuities of transparent objects by holographic methods

12 p2091 A69-26369

Holographic plasma diagnostics covering phase, amplitude variations images, laser spark, theta pinch studies, etc

12 p2094 A69-26707

Lasers application to measurement techniques including alignment, direction, distance, elongation, interferometric, holographic, etc

12 p2094 A69-26903

Hologram recording on photosensitive material based on photoinduced polymerization showing good resolution and diffraction efficiencies

13 p2258 A69-27199

Hologram recording by offsetting reference beam temporal frequency instead of using reference beam spatial offset

13 p2258 A69-27201

Linear recording of object wave phase to produce acoustic holograms

13 p2259 A69-27243

Holographic storage of three dimensional measurement information using model formed by stacking plates

13 p2260 A69-27739

Single mode ruby laser for application to holography of ultrahigh speed three dimensional objects

13 p2262 A69-27980

Pulsed laser holographic interferometry of density field created by high speed projectile motion in air [AIAA PAPER 69-347]

13 p2263 A69-28282

Acoustic hologram recorded by laser flying spot scanner

13 p2265 A69-28662

Ultrasound holography for imaging opaque structures, noting distortion due to long wavelength of sound field and distortion reduction techniques

13 p2265 A69-28663

Image formation with arbitrary holographic surfaces achieved by reversing direction of propagation of diverging wave

14 p2450 A69-29582

High resolution silver halide photoemulsions analyzed by holographic resolmetry using Ne-He laser to obtain interference patterns

15 p2606 A69-30052

Laser holography using colored KBr crystals subjected to hard gamma radiation as photosensitive material

15 p2608 A69-30247

Stroboscopic technique for obtaining interferential holograms of vibrating transparent and reflecting plates

15 p2608 A69-30258

Interferometric technique for studying fracture specimens plastic zone using laser holography

15 p2609 A69-3068

Microwave hologram construction and image reconstruction by laser beam, analyzing results by matrix expression

15 p2610 A69-30802

Lasers and holography applications in astronomy including high resolution spectrographic diffraction gratings manufacture and astronomical objects photographic pictures evaluation

15 p2610 A69-3081

Book on principles of holography covering plane and volume holograms general theories, factors affecting image resolution, color holography, applications, etc

15 p2611 A69-3106

Stresses in fixed two dimensional photoelastic models analyzed by hologram interferometry, displaying isochromatic and isopachic interference patterns

15 p2611 A69-31110

Time average, multiple exposure and real time holographic interferometry based on image synthesis

15 p2611 A69-31146

Holographical interferometry with laser spark radiation containing fundamental and second harmonic wavelengths, confirming heavy particle densities decrease in plasma with time

16 p2789 A69-31771

Corollary of reciprocity theorem in holography

16 p2790 A69-32124

Holograms applied to analysis of wave packets propagating in quasi-optical transmission lines

16 p2754 A69-32507

Holograms volume depth increased by reference beam splitting or by photographing holograms on same plate in sequence

16 p2791 A69-32508

Multiple reference sources to improve field of view of lensless Fourier transform holography limitation due to modulation transfer function of film and turbulence

17 p2971 A69-32920

Holography of intensities, discussing recording of self luminous body by modulation of scattered radiation using optical Q switch

17 p2973 A69-33111

Holographic recording of temporal coherence pattern of wave train from pulsed radiation source, investigating single mode ruby laser

17 p2973 A69-33114

Point object image differential field during reconstruction by surface nonplanar holograms, determining image position and aberrations

17 p2981 A69-33115

Vibrating objects phase determined by time average and real time holographic interferometry

17 p2974 A69-33324

Holography application in gas turbine components stress and vibration analysis, discussing techniques and apparatus usable by nonspecialist and measurement accuracy

17 p2974 A69-33351

Tv transmission of two dimensional transparency hologram with reduced resolution requirements on camera tube, eliminating zero order terms

17 p2974 A69-33401

Microwave holography for antenna synthesis, radiation patterns and visible images reconstruction

17 p2976 A69-33891

Anamorphic holography, discussing optical and nonoptical wavelength processes and generation and reconstruction of holograms for radar applications

17 p2976 A69-34062

Multiple interference effect introduced by nonlinear characteristics of photographic material, measuring phase variations by holographic multiple beam interferometry

17 p2977 A69-34159

Electron microprobe to produce plane grating X ray hologram based on Lloyd mirror experiment principle

17 p2977 A69-34160

Liquid rocket combustion investigated by pulsed ruby laser holography at sea level rocket engine test stand, noting laminated glass acrylic window byproduct [AIAA PAPER 69-471]

17 p3075 A69-34200

Holographic cine-interferometry, using live fringe method with Q switched pulsed ruby lasers to obtain consecutive submicrosecond interferograms

18 p3133 A69-34265

Vibration measurement by hologram interferometry explaining interference fringes as linear combination of vibrating object classical modes

18 p3135 A69-34635

Strains in solids of any form, using moire method combined with holographic interferometry

18 p3139 A69-35280

Holographic interferometry for nondestructive testing of aircraft materials, discussing applications to quality control

19 p3322 A69-35576

Holographic method of a posteriori restoration of images formed by coherent and incoherent light by spatial frequency retrieval

19 p3304 A69-35603

Fraunhofer holography for measurement of three dimensional flowfield velocity components, investigating rectangular channel flow

19 p3305 A69-35729

Holographic velocimetry data reduction applicable to flow field holograms, using singlet interference pattern for spherical and plane wave illumination

19 p3305 A69-35730

Hologram imaging characteristics expression, deriving relations characterizing localization and dimensions of images

19 p3308 A69-35868

Weak displacements of opaque objects and optical distortion in solid state lasers analyzed by holographic interferometry

19 p3308 A69-35909

Plate material Poisson ratio determined by application of holographic interferometry to plate pure bending deformation contour lines

19 p3312 A69-36206

Holographic system to process signals received by pulse Doppler radar, noting real time operation with availability of instantaneous development image storage media

19 p3314 A69-36598

Holographic camera using Q switched laser for recording high speed interferograms in plasma diagnostics

19 p3315 A69-36726

Microwave holograms generated by spinning dipole field perturbation technique, showing zone plates and moire fringe resolution

19 p3315 A69-36824

Wide view angle holocamera to produce 360 degree hologram in strips for simultaneous image reconstruction from single laser beam

20 p3536 A69-36932

Scanned receiver acoustical holography for mapping or imaging sources of radiated acoustic energy on complex vibrator in water, noting application in air

20 p3576 A69-37323

Holographic wave front reconstruction emphasizing between-wave interference fringes, discussing application to microscopy, Thompson and Parrent disdrometer, interferometry, etc

20 p3540 A69-37637

Resolving power and field of view relations of holographic device for images recording through inhomogeneous atmosphere

20 p3540 A69-37728

Holographic image range contouring produced by multifrequency emission from resonant output reflector in pulsed ruby laser cavity

20 p3540 A69-37733

Sensitivity improvement for inertialess microwave signal scanning and readout by applying pulse compression concepts, discussing application to real time microwave imaging and holography

20 p3545 A69-37901

Vibrating surface relative phases visual observation by introducing small rotation between exposures of stroboscopic hologram

20 p3546 A69-38123

Holography application to three dimensional structure determination of weakly scattering semitransparent objects

20 p3546 A69-38198

Transverse and longitudinal laser modes in holography, noting Michelson interferometer interference pattern role

21 p3734 A69-38398

Image deblurring and aperture synthesis using a posteriori processing by Fourier transform holographic spatial filtering

21 p3722 A69-38793

Information processing with coherent light, discussing holographic interferometry, contour mapping, three dimensional pictures, holographic coding, etc

21 p3722 A69-38797

Fresnel pulse holograms of three dimensional diffuse objects by single mode ruby laser with or without Q switching

21 p3724 A69-38946

Holographic interferometry by single two wavelength laser pulse exposure, discussing variable sensitivity techniques

21 p3725 A69-39448

Holographic recording of focused images and reconstruction in white light, discussing optimal conditions, calculating ray paths

21 p3725 A69-39543

Optical properties of Gabor holograms with pure reference beam, discussing image reconstruction using He-Ne laser

21 p3726 A69-39624

Microholographic system for nonpseudoscopic stereoscopic image reconstruction of transparent and nontransparent microobjects

21 p3726 A69-39702

Randomly moving objects holography and reduction of stability requirement during exposure period due to automatic phase modulation

21 p3726 A69-39741

Small particle holography technique extended for dynamic properties of particle fields, determining velocity and density field, size distribution, flow structure and diffusion rate

21 p3726 A69-39776

Holograms capable of multiple imaging or reconstructing point images, using extended and correlated signal and reference sources in recording process

21 p3727 A69-39777

Resolution limitations in holographic images using single record, discussing lensless holography using plane reference waves

21 p3727 A69-39778

Flash holography using ruby laser, describing optical system arrangement

21 p3727 A69-39784

Holography applied to stress and vibration analysis of gas turbine blades, disks and small components

22 p4040 A69-39960

Wedge fringes visibility and localization in hologram interferometry during focusing on surface under examination for displacements

22 p3943 A69-40016

Extended source Fourier transform holography for single image synthesis of multiple identical images produced by multiple pinhole camera in X ray astronomy

22 p3943 A69-40019

Motion-distorted photograph deblurring method using extended range holographic Fourier transform division

22 p3944 A69-40020

Holographic photogrammetry compared with conventional holography in monocular and binocular parallax reconstruction and stationary stability of objects

22 p3944 A69-40044

Holography for engineering metrology, discussing interferometry, pattern interpretation, inspection techniques, etc

22 p3945 A69-40235

Holographic interferometry for surface strain and vibrations visualization, describing photographic recording techniques

22 p3945 A69-40244

Fresnel zone plate as converging and diverging lens in holographic image reconstruction, noting sine wave zone plate

22 p3947 A69-40864

Holographic technique of coherent light field transformation with desirable phase distribution from laser light beams of arbitrary wavefront characteristics

22 p3950 A69-41115

Holographic storage of electric signals in wideband pulsed carrier radar communications, noting Fourier transform in ultrasonic light modulator

23 p4164 A69-41626

Reconstruction properties of image plane holography for producing bright white light displays, using reference beams

23 p4164 A69-41627

Multiple index high contrast holographic contouring technique compared with analogous multiple frequency system

23 p4164 A69-41628

Hologram film nonlinearity effect on reconstructed image, discussing role of illumination type

23 p4165 A69-41636

Reconstruction of three dimensional holograms without reference beam, noting thick layered Lippmann emulsions and dyed alkali halide crystals

23 p4166 A69-41969

Acoustical holograms phase recording, combining external phase locked electronic reference beams

23 p4166 A69-42180

Optical imaging problems in ultrasonic holography including distortion, resolution and depth of field

23 p4166 A69-42181

Temporal reference acoustical holography with Sokolov ultrasound camera system using double pulsed ruby or scanning CW laser

23 p4166 A69-42182

Retroreflector and Scotchlite object images obtained in long range holography with Q switched ruby laser, noting atmospheric seeing conditions

23 p4167 A69-42184

Holographic interferometry for measuring small static displacements of diffusely reflecting surfaces

23 p4167 A69-42185

Phase and amplitude acoustical holography in opaque media, discussing medical diagnosis and underwater viewing

23 p4167 A69-42198

Acoustical holography principles and reconstruction techniques, noting advantages of liquid-surface and temporal reference holography over optical counterparts

23 p4167 A69-42199

Holography phototechnical and optical variants, discussing combination of conventional photography and wave front reconstruction

24 p4312 A69-42616

Linear motion blur compensation technique in photographic recordings by reconstruction of sharp image from hologram

24 p4314 A69-42972

Fraunhofer hologram of glass fiber by Be X rays reconstructed using He-Ne laser light

24 p4314 A69-42973

Holographic technique for reduction of image distortion during penetration through inhomogeneous medium

24 p4314 A69-42975

Microwave holography by two beam interference method, discussing operating principles, equipment, image reconstruction, etc

24 p4314 A69-42976

Holographic interferometry for determining total free electrons in plasma produced by irradiating solid hydrogen foils with giant pulse ruby laser

24 p4314 A69-42980

Image reconstruction by graphical method for equal wavelengths of recording and reconstructing radiation and equal scales of hologram

24 p4315 A69-43166

Hologram transmission by heterodyne scanning reference beam technique

24 p4283 A69-43333

Holo-diagram device for making and evaluating holograms for small deformations measurement in large machine tool parts

24 p4317 A69-43760

Hologram electronic transmission, obtaining required bandwidth reduction by differential recording of image and scene diffraction pattern

24 p4317 A69-43761

Microcrack detection by holographic interferometry, describing experimental apparatus and test procedure and results

24 p4317 A69-43763

Three dimensional shadowgraph-like images in single exposure holograms of diffusely illuminated flame explained as time average holographic interferograms

24 p4317 A69-43764

HOLOMORPHISM

U ANALYTIC FUNCTIONS

HOMEOSTASIS

Visual feedback mechanisms in simulated high altitude conditions, discussing physiology of ocular homeostasis adaptation

06 p0882 A69-17647

Head movements controlled for rapid vestibular adaptation in slow rotation room (SRR), preventing motion sickness

17 p2908 A69-33178

Aldosterone and hydrocortisone introduced into bladders of adrenalectomized dogs to restore sodium metabolism contributing to normal water-salt homeostasis

21 p3656 A69-38965

Mineral dynamics during hibernation and disuse atrophy in connection with organismal homeostasis and chronic-term manned space flight, noting skeletal effect of immobility

21 p3660 A69-39175

HOMEOTHERMS

High temperature acclimation, climates with heat dissipation problems and hibernation or torpor effects on metabolic depression in homeotherms

10 p1642 A69-23121

HOMING DEVICES

Random order linear homing systems analyzed by frequency methods employing method of proportional navigation, noting use of transfer functions
01 p0113 A69-10805

Virtual or projected miss distance for assessment of missile homing impairment effects, deriving expression based on kinematics
04 p0629 A69-15517

Strapped down phased array radar tracker mechanization with digital loop closure electronics for homing missiles, noting cost advantages
[AIAA PAPER 69-873] 21 p3763 A69-39399

Gliding cargo airdrop system including automatic homing and manual control
[AIAA PAPER 68-958] 24 p4254 A69-43723

HOMODYNE RECEPTION

Single band millimeter wave amplitude modulator for phase meters with homodyne frequency conversion
04 p0577 A69-14850

Homodyne frequency converter design using microwave oscillator with bitonal frequency modulation
14 p2451 A69-29801

Single band millimeter wave amplitude modulator for phase meters with homodyne frequency conversion
15 p2575 A69-30242

Homodyne detection of IR radiation from carbon dioxide laser scattered from moving diffuse target, noting applicability to IR radar, heterodyne spectroscopy, etc
17 p2971 A69-32913

HOMOGENEITY

Quality control of semiconductor materials, analyzing homogeneity by statistical distribution of nonequilibrium carriers based on photoconductivity measurement
04 p0642 A69-14856

Synthesizable automata with sequential homogeneous structure formed by standard fixed units combination
13 p2224 A69-27249

Air mass analysis, discussing homogeneity, quasi-barotropic fluids, noise elimination to arrive at smooth flow pattern, etc
15 p2647 A69-30193

Quality control of semiconductor materials, analyzing homogeneity by statistical distribution of nonequilibrium carriers based on photoconductivity measurement
15 p2667 A69-30248

Phase analysis of systems Mn-S, Mn-Se and MnS-MnSe by X ray diffraction techniques, revealing homogeneity ranges
20 p3485 A69-38286

HOMOGENEOUS TURBULENCE

Homogeneous turbulence, discussing turbulence decay, vorticity generation, Kolmogoroff theory and structure turbulence
05 p0745 A69-15772

Fluctuation velocity, apparent kinematic viscosity and turbulent shear stress in isothermal homogeneous free jets
06 p0909 A69-17169

Homogeneous turbulent gas flame front location as function of caloric value of mixture and flow velocity
08 p1420 A69-19998

Self consistent perturbation procedure for stationary homogeneous turbulence of incompressible fluid
10 p1680 A69-23648

Magnetic field and magnetic energy evolution in infinitely conducting homogeneous isotropic turbulent medium, applying results to galactic magnetic field model
10 p1783 A69-23793

Homogeneous turbulence in incompressible fluid, expanding field variable on ideal random basis
11 p1867 A69-24282

Atmospheric turbulent energy spectra in boundary surface layer, considering homogeneous axisymmetric model in presence of temperature and velocity gradients
12 p2067 A69-26355

Thermal shielding effectiveness of flat wall behind tangential blowing slit, considering case of quasi-isothermal homogeneous turbulent boundary layer
14 p2537 A69-28971

Radio wave propagation in homogeneous turbulent gyrotropic medium, presenting solution for fluctuations in direction of wave scattering by geometrical optics approximation
17 p2927 A69-33861

Homogeneous isotropic turbulence spectrum asymptotic behavior for various spectral energy transfer models
19 p3301 A69-36818

Final period of decay for viscoelastic fluid in homogeneous isotropic turbulence, deriving expressions for double correlation function and energy decay
22 p3928 A69-39891

HOMOLOGY

Homology within solar flare associated type 2 radio events from dynamic spectra
17 p3024 A69-33803

Solar hard and soft X rays time-intensity profiles showing homology with centimeter radio bursts, suggesting origin from same electrons
20 p3589 A69-37553

HONEYCOMB CORES

Bending method for unfolded honeycomb cores shaping for curvilinear sandwich structures
16 p2794 A69-32006

Lap-shear strengths of Mg-Al alloy bonded with nylon-epoxy adhesive, including anodized coating rolling schedule and honeycomb core fabrication
24 p4323 A69-43417

Damage repair techniques of polyimide honeycomb sandwich panels constructed with polyimide and Ti face sheets, using precured plugs, prepreg disks, sealants, etc
24 p4323 A69-43420

Corrosion resistant bonding materials, discussing metal-to-metal adhesive primers, Al honeycomb core and foil finish
24 p4334 A69-43421

HONEYCOMB STRUCTURES

Hypervelocity impact effect on structural honeycomb spacecraft wall configurations, stressing design and wall thickness parameters
[AIAA PAPER 68-314] 02 p0345 A69-12389

Shear strengths of polyimide and polybenzimidazole resin/fiberglass reinforced honeycomb materials compared to previous high temperature materials, noting lightweight sandwich aircraft structures
04 p0620 A69-14844

Jaguar combat trainer/tactical support aircraft to meet France and UK military requirement, noting supersonic performance and honeycomb construction
04 p0549 A69-15062

Nondestructive tests for determining braze bond quality of open face honeycomb seal rings, using low viscosity liquids with fluorescent additives
07 p1140 A69-18797

Paper-honeycomb sandwich radome structure for protecting monopulse UHF radar antennas used in BMEWS
07 p1111 A69-19537

Fabrication and processing techniques, tooling concepts and quality control for composite materials used in large aircraft, discussing honeycomb and sandwich structures
[ASM PAPER D8-25.4] 07 p1172 A69-19670

Diffusion bonded Ti honeycomb sandwich, demonstrating structural integrity, efficiency, low weight and cost effectiveness
12 p2115 A69-26828

Multiwall meteoroid protection design in Apollo program, discussing bumper, backup sheet and honeycomb cells insulation
[AIAA PAPER 69-372] 13 p2367 A69-28304

Hexagonal and nonhexagonal cell phenolic honeycomb design as energy dissipating material noting processing, composite constituents, cell configuration and usage environment
19 p3353 A69-35503

Salt bath brazing for honeycomb structures, describing brazing techniques for thoriated dispersed Ni and NiCr, Rene 41 and Ti honeycomb panels
19 p3320 A69-35557

Diffusion bonded Ti honeycomb sandwich, discussing production, structural efficiency, high strength/weight ratio, etc
19 p3320 A69-35558

Thermal control of Mars entry capsule with fiberglass honeycomb sandwich shell analyzed with and without aft thermal curtain, emphasizing cruise-flight phase
[AIAA PAPER 68-1082] 19 p3429 A69-35949

Ti honeycomb sandwich panels, comparing properties of Ti and Al based brazing alloys
21 p3730 A69-38665

Metallurgical and structural production of diffusion bonded titanium honeycomb sandwich panels for aerospace hardware weight saving
24 p4324 A69-43434

Al brazed Ti honeycomb sandwich structures brazed in vacuum and Ar, analyzing mechanical properties and corrosion resistance as functions of temperature and pressure
24 p4324 A69-43435

Structural airframe fasteners, reviewing systems for fatigue critical wing/fuselage structures, honeycomb panel attachments and data on fatigue life
24 p4325 A69-43437

Orthotropic fiberglass/epoxy faced honeycomb aircraft type sandwich structure elastic properties by edgewise compression test
24 p4403 A69-43443

Potting material reinforcing honeycomb structure for fastener installation prior to bonding face sheets to core, noting mechanical properties
24 p4326 A69-43466

Welded honeycomb sandwich structures of Ti, steel and similar materials for use in extreme thermal and acoustical environments
[AIAA PAPER 68-973] 24 p4326 A69-43716

HONING

Friction characteristics during diamond honing of different steel grades, determining lubricating and cooling liquids effect on friction coefficient
22 p3958 A69-41170

HOOKES LAW

Natural vibration properties of elastic free-free body obeying Hooke law analysis from equilibrium and motion equations, determining Green tensor
01 p0167 A69-10323

NonHookian behavior of stiff strong carbon fibers under stress
03 p0454 A69-13937

Plane stress theory for large elastic deformations of isotropic thin sheets, outlining successive substitutions method for neoHookean materials static and dynamic problems
13 p2359 A69-27320

Constitutive equations for living soft tissues freely deforming under negligible stresses with Hooke law as limit
14 p2535 A69-29366

Curvilinear planform plates natural oscillations, assuming small elastic bending strain obeying Hooke law
22 p4038 A69-39912

HORIZON

NT RADIO HORIZONS

Observable horizons in expanding universe, considering absorption of extragalactic radiation
04 p0648 A69-14566

IR horizon of earth from ionospheric IR emission spectra obtained by sounding capsule, discussing earth geometric horizon and particular spectral bands
[ONERA-TP-709] 15 p2601 A69-31370

Horizon definition for Apollo space navigation references from examining earth atmosphere visible and far IR spectrum
[AIAA PAPER 69-869] 21 p3763 A69-39395

HORIZON SCANNERS

Near field repeatable stimulator of infrared earth horizon sensors in variable environments and test levels, noting orbital conditions
[AIAA PAPER 69-322] 09 p1478 A69-22376

Instrument error analysis for spacecraft orientation and positioning near planet from planet disk observations
13 p2260 A69-27695

Star/horizon measurements for onboard spacecraft navigation without cloud cover obscuration, discussing sightings, data processing and evaluation
19 p3369 A69-35800

HORIZONTAL FINS

U FINS

HORIZONTAL FLIGHT

Optimal lift and thrust control programs to maximize range of missile in horizontal flight
09 p1610 A69-22086

Flight dynamics problems, determining extremum of functional by graph-analytical method and with aid of Pontryagin maximum principle
11 p1823 A69-25343

HORIZONTAL STABILIZERS

U STABILIZERS [FLUID DYNAMICS]

HORIZONTAL TAIL SURFACES

Unsteady aerodynamic forces on coplanar lifting surfaces in subsonic flow induced by wing/ horizontal tail interference
04 p0543 A69-14819

HORIZONTAL TAILS

U TAIL ASSEMBLIES

HORMONE METABOLISMS

- Hibernation seasonality, protein synthesis during periodic awakenings and importance of awakenings to maintenance and evolution of thyroid activity
10 p1642 A69-23120
- Urinary excretion of hormonal metabolites in intercontinentally flown test subjects, using gas chromatographic procedure for steroid identification
24 p4268 A69-43404

HORMONES

- NT ALDOSTERONE
NT CORTISONE
NT PITUITARY HORMONES
- Steroid hormones effect on nervous system and behavior from data on gonadectomized rats and monkeys treated with testosterone propionate
03 p0375 A69-13551
- Visceral afferent pathways influence on vasopressin secretion, ADH levels and urinary excretory patterns of dogs during surgical stress
05 p0708 A69-15970
- Identity between growth hormone degrading activity of pituitary gland and plasmin
06 p0873 A69-17105
- Decreased antidiuretic activity measured in blood of chronically centrifuged rats, noting role of antidiuretic hormone (ADH)
14 p2407 A69-29301
- Circadian rhythm phase shifts during ontogenesis produced by hormone concentration changes resulting from light variations
22 p3872 A69-40198
- Antidiuretic hormone (ADH) and bradykinin effects on human thermal and cholinergic sweating after subdermal injection in forearm, abdomen and leg
23 p4077 A69-41311

HORN ANTENNAS

- Far and near fringe radiation of asymmetrical mirror and horn antennas by method of boundary waves
02 p0214 A69-11601
- Symmetric and asymmetric metal flanges effects on radiation patterns of H plane sectoral horns, noting theoretical explanation and applications
02 p0216 A69-12027
- Asymmetric excitation of conducting flanges by primary aperture antenna and consequent radiation pattern
02 p0217 A69-12246
- Gain and radiation pattern of conical horn excited by conical waveguide, using geometric theory of diffraction
02 p0218 A69-12327
- Horn antenna far field radiation pattern distortion by isotropic plasma slab, noting attenuation variation with electron density
02 p0218 A69-12335
- Multimode direction tracking with polarization tracker used simultaneously, analyzing cross coupling and conical horn/reflector antenna
06 p0888 A69-17652
- Metal flanges position effect on radiation patterns of H-plane sectoral horn radiators
08 p1285 A69-20554
- Mode coefficients for geometrical optics field expansion at waveguide feed junction of sectoral horn
09 p1468 A69-22590
- Conducting flanges effects on H plane radiation patterns of E plane sectoral horns, noting improved beam width and gain and H plane beam tilting
10 p1665 A69-24063
- Far and near fringe radiation of asymmetrical mirror and horn antennas by method of boundary waves
11 p1846 A69-24708
- Power transmission efficiency between arbitrarily focused circular antennas with Gaussian amplitude illumination in Fresnel region for various phase illuminations and Fresnel numbers
11 p1851 A69-24991
- Conducting grill effect on E-plane radiation patterns of E-plane sectorial horns, giving data for various horns at different frequencies
11 p1836 A69-24992
- Horn exciter with fundamental and second mode in feeding waveguide of shallow paraboloid antennas
12 p2044 A69-27093
- Optical image diffraction method for analyzing radiation patterns of horn antenna sounding beams used in microwave measurement of expanding plasmoids
14 p2497 A69-29793
- Horn antenna with parabolic reflector for 30 cm wavelength, calculating field distribution, main and sidelobe radiation patterns and aperture efficiency
17 p2937 A69-33147

- Multifunction lightweight antenna system package for spin stabilized near synchronous satellite having axis normal to orbital plane
22 p3913 A69-40694

HOSPITALS

- Patient transportation and evacuation system at disposal of Paris hospital, using short and long haul aircraft, turbojets and helicopters
23 p4105 A69-41785
- Private one doctor one nurse clinic at Sydney airport, discussing history, operating conditions, medical record and statistics
23 p4105 A69-41786

HOT AIR

U HIGH TEMPERATURE AIR

HOT CATHODES

- Positive Ar ion energy distribution for beam extracted from nonmagnetic hot cathode gas discharge ion source under various source conditions
03 p0427 A69-13102
- Equivalent pressure concept verification for arc discharge with incandescent cathode in mercury vapor
03 p0478 A69-13843
- Relation between energy spectrum and potential drop in plasma expelled from hot cathode tube into vacuum derived by electrostatic analyzer
06 p0963 A69-16899
- Secondary emission and hollow cathode effects in low pressure hot cathode thyratron filled with hydrogen and with shield surrounded thermionic cathode
06 p0896 A69-17475
- Plasma flow from hot cathode discharge in magnetic field increases ion flux intensity and prevents flow divergence in vacuum
08 p1370 A69-21075
- Spectral lines emitted from low voltage discharge in cesium filled diode with hot cathode, giving current-voltage characteristics as function of pressure and temperature
14 p2491 A69-29260

HOT CYCLE PROPULSION SYSTEM

U TIP DRIVEN ROTORS

HOT ELECTRONS

- Temperature dependence of hot electron drift velocity in silicon at high electric fields, using space charge perturbation theory
01 p0135 A69-10120
- Transport phenomena in semiconductors in strong DC field, emphasizing electrical conductivity as function of crystallographic orientation
03 p0491 A69-14097
- Particles nonlinear motion in plasma in magnetic field with arbitrary electron velocity distribution, discussing wave discontinuity patterns
05 p0804 A69-16370
- Static problem of electric field intensity and space charge density distribution in semiconductor with hot electrons and holes
06 p0978 A69-16989
- Nitrogen, oxygen and air luminescence spectra excited by fast electrons at low gas pressures in IR spectral region compared with polar auroral spectra
10 p1687 A69-23916
- Electric drift instability in semiconductors with hot electrons, discussing diffusion, electron heat conduction, energy transfer, space charge density, etc
13 p2318 A69-27891
- Boltzmann equation for hot electron distribution functions in GaAs and threshold field in Gunn effect
15 p2665 A69-30025
- Hot electron plasma formation by injecting mega-electron volt ion beams followed by Lorentz trapping, noting advantages of DC operation
15 p2661 A69-30925
- Hot electron behavior in n-type InSb under magnetic fields at 4.2 and 1.7 K, plotting current-voltage and current-Hall voltage characteristics, etc
19 p3388 A69-36544
- Hot electrons effect on Fe-doped CdTe optical absorption by measuring optical transmission vs photon wavelength at liquid helium temperatures
19 p3389 A69-36551
- Kinetic equation describing dynamics of inhomogeneous cloud of fast electrons and ions trapped in earth magnetic field
20 p3520 A69-37029

HOT EXTRUDING

U EXTRUDING

HOT GAS SYSTEMS

U HIGH TEMPERATURE GASES

HOT GASES

U HIGH TEMPERATURE GASES

HOT JET EXHAUST

U HIGH TEMPERATURE GASES

U JET EXHAUST

HOT JETS

U JET FLOW

HOT MACHINING

- Titanium hot forming and sizing die fabrication concepts for aircraft structures [ASM PAPER D8-26.1]
07 p1143 A69-19671

HOT PLASMAS

U HIGH TEMPERATURE PLASMAS

HOT PRESSING

- Hot pressed boron nitride properties and fabrication, noting low moisture absorptivity and aerospace applications
02 p0270 A69-11802
- Compaction kinetics in continuous quasi-viscous medium having plastic flow material under applied load, discussing hot pressing of nichrome powders
04 p0618 A69-15389
- Nickel reinforced with mullite whiskers produced by hot pressing
05 p0782 A69-16794
- Solid lubricant compacts for ball bearing separator materials, describing fabrication, design and friction and wear properties in air and vacuum [ASLE PAPER 68-LC-16]
07 p1139 A69-18626
- Boron carbide body armor fabrication by hot pressing in graphite molds
08 p1320 A69-20411
- Photocells with p-n heterojunctions from sintered CdS, describing spectral sensitivity and temperature dependence of no-load photo EMF
08 p1374 A69-21084
- Bonded Al-B metal matrix composite materials hot press fabrication and design, discussing temperature pressure time cycles and honeycomb sandwich structures
09 p1510 A69-22351
- Hot pressed molybdenum disulphide-nickel composite film friction and wear tests in air and face seal configuration [ASLE FICFS PREPRINT 23]
15 p2620 A69-30491

HOT STARS

- NT A STARS
NT B STARS
NT O STARS
NT WHITE DWARF STARS

- Astronomical needs for atomic spectra, discussing emissions in Wolf-Rayet lines and Of stars and forbidden lines in absorption in sun and F-K stars
03 p0508 A69-13172
- Strong line profiles computed for models of hot expanding extended atmospheres of OB supergiants
07 p1223 A69-19637
- Space motions of bright F type stars from parallaxes obtained by photometry
08 p1386 A69-20074
- Wolf-Rayet star properties, model and mass loss
08 p1395 A69-20640
- General relativistic models of massive hot nonrotating stars with adiabatic temperature gradients consisting of ideal gas and radiation mixture
09 p1605 A69-22416
- Carbon rich star models with and without neutrinos, considering carbon burning, central stars of planetary nebulas and hot white dwarfs
09 p1606 A69-22419
- Structure and pulsational properties of massive stars with helium cores and thin hydrogen poor envelopes
09 p1606 A69-22421
- Far UV stellar astronomy, concerning very hot stars and interstellar gas composition studies
10 p1772 A69-22870
- Hot companion presence for RW Camelopardalis confirmed from UVB photometry
10 p1775 A69-23201
- Galactic nuclei congeneric and coexisting peculiarities, including hot star planar formations in spiral galaxies
12 p2164 A69-27027
- Azimuthal electric currents generation by Coriolis forces in hot stars with intensive radial flows in convective zones
13 p2350 A69-27862
- Spectrographic and photoelectric analyses of F type sharp line eclipsing binary HR 7484, tabulating masses, radii, color indices and absolute magnitudes
15 p2693 A69-30776
- Physical nature of HZ 22 short period hot subdwarf binary, noting arguments against normal B type binary hypothesis
17 p3044 A69-34181

Four color photometry data of late F type stars in general catalog tabulated with columns for HD and GC numbers, apparent visual magnitude, etc
18 p3195 A69-34430

Hydrostatic instability in high temperature stars in postNewtonian approximation
20 p3580 A69-37926

Hot star photogravitational acceleration determined from difference between apex and antiapex brightness, noting constant magnitude and direction of principal component of apex force
20 p3608 A69-38046

LTE departure calculated for He I in hot star model atmospheres for effects on populations of singlet and triplet states
21 p3801 A69-38761

Pion production rate for proton-proton interactions in hydrogen, discussing relevance to hot massive stars, charged pion decay probability and mu-neutrino production
21 p3792 A69-39615

Helium-carbon star BD plus 10 degrees 2179 re-analyzed by grid of constant flux models containing right amount of C
22 p4026 A69-40652

Wolf-Rayet stars formation, evolution, age, galactic distribution and relation with open star clusters
23 p4208 A69-41288

VV Cephei type binaries cool and hot primary stars light variations, discussing duration, orbital cycle correlation, mass loss, etc
24 p4386 A69-43346

HOT SURFACES

Heat transfer rates for water, acetone and alcohol droplets splattering from heated plate, noting effect of impact angle and velocity
10 p1809 A69-23196

Holography for temperature distribution measurement around heated wire, using He-Ne laser
11 p1887 A69-25197

Pressure waves interaction with solid fuel hot surface at HF based on linear theory of acoustic instability in condensed systems
13 p2371 A69-27383

Evaporation of liquid droplets from heating wall observed cinematographically, noting heat transfer by violent film boiling and conduction through thin vapor layer
15 p2718 A69-31117

HOT WATER ROCKET ENGINES

Explosive and pyrotechnical elements for Grillo 1, Grillo 2 and Trigone 1 hot water rockets, detailing nozzle closure and chemical reaction activation
10 p1753 A69-23028

HOT-WIRE ANEMOMETERS

Superlayer structure determination near turbulent boundary layer with zero pressure gradient, using constant temperature linearized hot-wire anemometers
01 p0061 A69-10759

Yaw parameter and curvature effects on accuracy of hot-wire anemometer, noting King law
03 p0426 A69-12845

Göttingen type wind tunnel, discussing stream characteristics and turbulence measurement by hot-wire anemometer
03 p0420 A69-14238

Inclined hot-wire and hot-film anemometers parameter dependent on length-to-diameter ratio used to describe deviations from cosine law
[ASME PAPER 68-WA/APM-16]
04 p0596 A69-14391

Incompressible turbulent boundary layers in channel flow using constant temperature hot-wire anemometer, emphasizing measurement in viscous sublayer
[ASME PAPER 68-FE-26]
05 p0747 A69-16066

Circular cylinder near wake in cross flow measured with hot-wire anemometry for various Reynolds numbers, noting data processing on digital computer
[ASME PAPER 68-FE-5]
05 p0747 A69-16068

Rotating hot wire and five hole pressure probes for determining complete velocity vector in subsonic flow
05 p0764 A69-16398

Hot-wire anemometer with no moving parts for measurement of three orthogonal components of wind velocity and wind direction
06 p0923 A69-16926

Linearizing circuit for low velocity hot-wire anemometry, using analysis of transistor circuit to generate desired function
06 p0927 A69-17701

Calibration curve for constant temperature hot-wire anemometer, taking into account high wire temperature and gas pressure effects
06 p0930 A69-18218

Superlayer structure in turbulent boundary layer without pressure gradient, using constant temperature linearized hot wire anemometers
07 p1118 A69-18299

Nonlinear control theory for constant temperature hot-wire anemometers with large velocity fluctuations, noting second harmonic generation
09 p1493 A69-21421

Tubulent flow problems, discussing hot-wire techniques, viscosity effect, compressibility surface curvature, turbulent boundary layers, heat transfer, etc
11 p1871 A69-25017

Hot wire and hot film anemometers for measuring turbulence in MHD flow noting applications in flowing mercury
11 p1886 A69-25087

Monograph on velocity distribution function in turbulent boundary layer, discussing hot wire anemometer for mean velocity, turbulence intensity and higher order moments determination
13 p2250 A69-28336

SNR improvement during low level turbulence measurements, examining correlation between hot-wire anemometers, including error analysis
14 p2446 A69-29018

Hot-wire anemometers calibration technique providing accurate and direct velocity measurements in slow moving liquids
17 p2971 A69-32901

Thermoanemometer filament frequency response measured by generator of velocity pulsations compared with conventional methods
19 p3308 A69-35856

Wall influence on thermoanemometer readings in incompressible air stream measured with wedge shaped film sensors
19 p3308 A69-35857

Liquid mercury flow turbulent intensity measured by quartz insulated Pt hot-film sensors, discussing calibration equation and measurement techniques
21 p3722 A69-38769

Monograph on hot wire anemometer measurements of velocity and temperature turbulence, discussing flow characteristics, calibration, etc
22 p3951 A69-41256

Constant temperature thermoanemometer design and subsystem operation applied to measurements of turbulent flow velocity and pulse characteristics
24 p4311 A69-42558

Hot-wire anemometer calibration technique for measuring velocity of very slowly moving liquids
[ASME PAPER 69-HT-A]
24 p4316 A69-43527

HOT-WIRE FLOWMETERS

Hot wire and hot film anemometers for measuring turbulence in MHD flow noting applications in flowing mercury
11 p1886 A69-25087

Hot wire sensitivity to velocity, temperature and density fluctuations of temperature varying flow field, discussing calibration curves and special cases
11 p1886 A69-25088

Turbulence measurement errors with inclined hot wires described by equations, assuming normal component cooling includes greater tangential cooling
18 p3134 A69-34442

HOT-WIRE TURBULENCE METERS

U TURBULENCE METERS

HOT WORKING

NT AUSFORMING

Ti alloy blanks production technology and quality control, noting rolling of sectional profiles
07 p1161 A69-18765

Creep and hot working strain-rates relationships, showing work hardening and dynamic recovery relative levels dependence on plot used
13 p2278 A69-27417

Hot extrusion process for steel and various metals in U.S. semifinished product industry, considering lubrication problems, research centers and development
15 p2618 A69-30228

In-process annealing and warm working temperature effects on long time creep rupture properties of Mo alloys tested in vacuum furnace
17 p2987 A69-33076

Polygonization and strengthening effects simultaneous action at grain boundaries increased thermal stability of thermomechanically treated Ni-Cr alloy
17 p2991 A69-33940

Plane strain forging of pure Al and Al-Cu alloy at low strain rates and elevated temperatures, in constant velocity compression test
17 p2979 A69-34137

Optimum conditions for producing Ti-V alloy sheet plated on one side with Nb by hot rolling
18 p3155 A69-34652

Polycrystalline ceramics chemical and microstructural control through thermomechanical and thermochemical hot forming techniques, discussing pressure sintering, hot extrusion, strain annealing, etc
24 p4321 A69-43338

HOTSHOT WIND TUNNELS

Roughness effects on boundary layer transition up to Mach 16 in hotshot wind tunnel
[AIAA PAPER 68-377]
13 p2242 A69-28213

Integrated double oblique shock scramjet for supersonic combustion tests and instrumentation development, discussing fuel injection through sonic orifices, combustion data, etc
[AIAA PAPER 69-827]
16 p2840 A69-32673

Calibration of inertial and surface temperature heat transfer transducers for hotshot and shock tube measurements developed and tested at ONERA
[ONERA-TP-683]
19 p3305 A69-35726

Double knife-edged double-crossing schlieren apparatus analyzed for operation principle and applied to measure hypersonic wake characteristics in hotshot tunnel
19 p3293 A69-35740

HOUSINGS

U RADOMES

HOVERCRAFT

U GROUND EFFECT MACHINES

HOVERCRAFT GROUND EFFECT MACHINES

Hovercraft range operating at constant speed as function of design efficiency, power apportionment, fuel consumption and initial specific resistance
03 p0367 A69-13909

Hovercraft and applications of air cushion principle, discussing large and small size vehicles, autostabilization, hybrids and ram wings
03 p0367 A69-14084

Semi amphibious Vosper VT 1 hovercraft for passengers and cars, discussing design, water contact propulsion, peripheral skirt, supercavitating propellers, structure, performance, etc
04 p0549 A69-15187

Airflow and power requirements of compressible hovercraft jet operating under equilibrium conditions
05 p0697 A69-15708

Hovercraft development by British Hovercraft Corporation, discussing technical contributions in design, control and propulsion, environmental tests, etc
12 p2014 A69-27140

Glass reinforced plastics for Hovermarine HM.2 sidewall hovercraft designed for ferry routes
13 p2201 A69-27542

Small hovercraft simple and bag skirts design characteristics, considering materials
13 p2202 A69-27545

Plenum chamber obstructions influence on hovercraft lift fan performance, discussing tests and losses due to flat plate at impeller outlet
13 p2202 A69-27546

HOVERING

Longitudinal dynamics of VTOL aircraft during hover-forward flight transition, using multiple time scale analysis
[AIAA PAPER 69-130]
06 p0869 A69-18157

Boundary layer discontinuity on helicopter rotor blade in hovering using flow visualization
[AIAA PAPER 69-197]
07 p1051 A69-19561

Human pilot adaptation in simulated multiloop VTOL hovering task with series loop closure model
10 p1650 A69-23878

Three dimensional potential surface flow past rotor blade in hover, accounting for compressibility and blade element theory limitations
[AHS PAPER 324]
17 p2895 A69-33537

Hover and forward speed aerodynamic characteristics of tracked air cushion vehicle (TACV) models, discussing wind tunnel tests
[AIAA PAPER 69-750]
18 p3084 A69-34410

Lifting line theory for hovering propellers deformed wakes based on continuous vortex sheet representation
18 p3087 A69-35217

HOVERING STABILITY

Water hover effects tested on tilt wing V/STOL seaplane model, noting effects of wind and waves on water passing through propellers
01 p0011 A69-11061

Advance indication based on extrapolation for aiding manual attitude control of VTOL aircraft in hovering flight, noting results on flight simulator
03 p0366 A69-13645

- Fixed point support properties of quasi-vertical peripheral jet hovercraft with two pressure stages
06 p0857 A69-16820
- Reaction forces for jet lift VTOL attitude control during hover and transition, considering hot gas and pitch ducting applications
[AIAA PAPER 69-545] 16 p2735 A69-32756
- Helicopter hovering performance prediction from wake analysis by iteration, discussing wake interference significance and blade number influence
[AHS PAPER 321] 17 p2895 A69-33538
- Slot height, position and trailing edge geometry effects on elliptically shaped rotors selected for hover efficiency, size, transitional gust insensitivity and rigidity
18 p3088 A69-35231
- HRB-1 HELICOPTER**
U CH-46 HELICOPTER
- HSS-2 HELICOPTER**
U SH-3 HELICOPTER
- HU-1 HELICOPTER**
U UH-1 HELICOPTER
- HUBS**
Bursts of high speed rotor occurring at diametric cross section and around hub as function of hub size
01 p0142 A69-10306
- Vortex lattice method correlation on rotor/wing configurations for aerodynamic characteristics, noting triangular and circular hub and blades
20 p3458 A69-37163
- HUGHES AIRCRAFT**
U OH-6 HELICOPTER
- HUGHES MILITARY AIRCRAFT**
U MILITARY AIRCRAFT
- HUGONIOT EQUATION OF STATE**
Stress-strain-time relations in magnesium alloy and aluminum plate impact load tests, discussing stress measurement, Hugoniot equation of state, yield point and dynamic response
08 p1330 A69-20102
- High pressure Hugoniot points made by hypervelocity gas gun, using laser beams to measure impact velocity and pressure transducer for impact stress
[AIAA PAPER 69-358] 13 p2264 A69-28291
- Finite control volume approach to shock Hugoniot in unidirectional fiber reinforced composite, computing shear force along matrix-fiber interface
[AIAA PAPER 69-359] 13 p2366 A69-28292
- High purity beryllium dynamic tests, determining Hugoniot equation of state, shock profile and spall threshold/onset of microcracking/for elastic pulses
[AIAA PAPER 69-360] 13 p2283 A69-28293
- Polydiethylene glycol-bis-allyl carbonate (PBAC)/Hugoniot equation of state, reporting shock data, discussing applications to propellant testing
16 p2879 A69-32179
- Hugoniot prediction for shock moving along longitudinal direction of unidirectional fiber reinforced composite
20 p3627 A69-37768
- Hugoniot equation of state of shock loaded W determined at room temperature and 950 C
20 p3564 A69-38127
- HUMAN BEHAVIOR**
Human behavior during stressed underground confinement, discussing adaptation processes
01 p0020 A69-10757
- Human visual systems ability to encode retinal images produced by different size objects
03 p0369 A69-13359
- Psychological aspects of crew members resistance to eject from aircraft in trouble
06 p0877 A69-16956
- Physiological or survival training emphasizing psychological approach
06 p0879 A69-16965
- Organization behavior models compared in theory of scientific and professional personnel management, noting compromise between excess restrictions and freedom
[AIAA PAPER 68-805] 08 p1422 A69-20196
- Organizational behavior of scientists noting working environments, effectiveness of work sections, research management and organizational development
08 p1423 A69-21124
- Human adaptation to various environments, emphasizing experimental space psychoneurology role in human behavior examinations during space missions
10 p1647 A69-23587
- Matrix computation operations devoid of sense and relevancy arising in interdisciplinary problems
11 p1910 A69-25522
- Human operators instrument-monitoring behavior noting optimal control, information processing, physical limitations, etc
12 p2022 A69-25929
- Human behavior simulation - NATO Conference, Paris, July 1967
12 p2024 A69-27079
- Man machine model for prediction of human control behavior, generating model from analysis of helicopter pilot tasks
12 p2025 A69-27082
- Model for temporal structure of human behavior from analysis of temporal information treatment in subjective synchronization task
12 p2025 A69-27084
- Models for cognitive behavior and psychomotor behavior for maintenance tasks
12 p2025 A69-27086
- Behavioral differences between engineers and scientists with reference to work environment
15 p2721 A69-31073
- Characteristics, incentive and promotional patterns and work adjustment of engineering technicians
15 p2723 A69-31242
- Guide for establishing harmonious relationships with design engineers within typical mechanical engineering department
17 p3077 A69-34198
- Mathematical basis for human operators purposeful behavior in complex systems control situation requiring decision reaching
19 p3260 A69-35895
- Environmental crowding effect on individual and group behavior in rat colony, using implanted passive resonant circuits for identification and passage information
19 p3257 A69-36243
- Organizational identification of scientists as professional employees, exploring degree of loyalty and perceived self prestige
21 p3855 A69-38765
- Life in common by groups of four or five people isolated on high mountain under adverse conditions
21 p3661 A69-39267
- Sensory and logic behavior model of sequence selection based on received information, considering perception, sense, desire, concept and criteria levels
23 p4109 A69-41976
- Learning model of motor behavior in brain cortex of higher animals and man, discussing M automaton, information reception, correlation, memory, emotions, desires and actions
23 p4109 A69-41977
- Group leadership attempting behavior dependence on situational and perceptual variables
23 p4110 A69-42015
- Group interaction finite Markov chain model, analyzing changes in interpersonal relationships based on balanced dyadic states
23 p4110 A69-42017
- HUMAN BEINGS**
Probability of biological development leading to human life on another planet
21 p3652 A69-38786
- Reticulocyte count comparison on trained and sedentary college male subjects before and after strenuous exercise, noting role in oxygen uptake
21 p3654 A69-38907
- Caucasian and Bantu males oxygen consumption at different work rates, gross body weight accounted for 70 percent of differences between individuals
21 p3655 A69-38911
- Atelectatic and direct toxic effects of oxygen on human subjects
22 p3873 A69-40208
- Linear models with self excitation for brightness and contrast perception studies in human visual system
22 p3881 A69-40862
- Pulmonary capillary blood flow pulse of healthy men in supine position recorded by nitrous oxide/plethysmograph and phonocardiogram
24 p4259 A69-42638
- HUMAN BODY**
Human body dynamic response to vibration combined with linear acceleration, noting changes in body mechanical impedance and resonance
01 p0022 A69-11335
- Acceleration, hypoxia and stress effects on humans and animals, noting latent functional disorders of organisms requiring special techniques for detection
02 p0197 A69-11488
- Data acquisition program for Apollo crew motion disturbances experiment consisting of ground simulations and orbital experiment establishing mathematical model of human body
02 p0201 A69-11759
- Mechanical model of human body used to study response to vibration, impact, blast and decompression loads
04 p0552 A69-14470
- Conduction equations for conduction cooling of human body solved by finite difference method
06 p0880 A69-17088
- Objective evaluation of metabolic reactivity of organism based on biophysical model compared with experimental individual
06 p0874 A69-17595
- Physiological functions of aged Japanese pilots, discussing height, weight, Rohrer index, obesity, vision deterioration and hearing disturbances
06 p0876 A69-18028
- Viscoelastic rod model of human spine subjected to accelerations
07 p1072 A69-19725
- Analog computer modeling of human systemic arterial tree, based on lump parameter circuit approximation
07 p1072 A69-19727
- Human body temperature regulating factors in low temperature environment, studying metabolism, lung ventilation and onset of shuddering
10 p1648 A69-23298
- Identifying human bodies torn apart or crushed in aircraft accidents, noting example of jet passenger plane crash
12 p2021 A69-25839
- High altitude acclimatization effects on cardiovascular system, external respiration, blood composition, optical and vestibular analyzers in human subjected to various stresses
13 p2212 A69-28623
- Body composition of USAF flying personnel, evaluating obesity by using radioactive potassium (K-40) method
14 p2409 A69-29295
- Glycolysis control by respiration in human leukocytes with and without Pasteur effect conditions
15 p2555 A69-30413
- Pulmonary ventilation and perfusion in normal supine subjects before and during exposure to lower body negative pressure measured using Xe-133
17 p2909 A69-33180
- Flow mechanics applications to medicine, discussing vascular and technical systems and measuring equipment adaptation to human organisms
17 p2915 A69-33771
- Ejection seat cushion dynamic characteristics influence on incidence of spinal injury during ejection, considering MIL specification dynamic model of human body
17 p2917 A69-34033
- Volume prediction of human body exposed to vacuum based on animal skin elasticity and anatomical features
19 p3258 A69-36456
- Human taste perception mechanism and taste system anatomy
21 p3652 A69-38783
- Control circuits in nature and sensory information data processing in human work, including servomechanism of brain-muscle system
21 p3652 A69-38784
- Carbon dioxide washout during square wave hyperventilation in man, postulating blood flow factor
22 p3885 A69-40975
- Oscillatory electric field disturbances monitored near human body concurrent with heart beat and respiration, showing signals unrelated to blood flow or streaming potentials
23 p4101 A69-41449
- Barometric pressure affecting convective heat transfer from human body in air, deriving empirical formula as function of air density, speed and temperature
24 p4267 A69-43384
- HUMAN CENTRIFUGES**
Physiological studies of centripetal and Coriolis accelerations effects on vestibular function of humans in rotating chamber
02 p0197 A69-11498
- Human acceleration tolerance dependence on age, profession and physical training from investigation of reactions to repeated centrifugal accelerations
07 p1065 A69-18980
- Human sensorimotor reactions during rotation in small radius apparatus at different speeds and torso inclinations
20 p3471 A69-37258

Human acceleration tolerance dependence on age, profession and physical training from investigation of reactions to repeated centrifugal accelerations
20 p3479 A69-38228

Human heart chronotropic reactions during centrifuge acceleration tests up to tolerance limit, establishing sinus tachycardia in various degrees
22 p3877 A69-40283

Jet pilot blood pressure response during positive acceleration in actual flight measured by telemetry compared with centrifuge test
23 p4089 A69-41822

Centrifugation for removal of bullet fragment floating freely in ventricular system of human brain to fixed life position in left lateral ventricle wall
24 p4265 A69-43372

Circulatory reactions of humans under g forces in centrifuge for various periods, with or without anti-g suit
24 p4267 A69-43385

HUMAN FACTORS ENGINEERING

Human factors in aviation - Conference, Los Angeles, June 1968
01 p0010 A69-10448

Human factors in aircraft systems, discussing personnel selection throughout design and manufacturing phases
01 p0019 A69-10449

Human engineering program plans for Phase 3 of SST Development Program in accordance with airframe and engine contracts
01 p0019 A69-10451

All-weather landing flight director systems and fault warning display simulator studies of Boeing 707-720B aircraft in Category 3-C environment
01 p0010 A69-10455

Modular three dimensional mockup technique for economizing and facilitating design of control and display equipment
02 p0202 A69-11953

Human factors evaluation of computer based information storage and retrieval system using questionnaire and interview techniques
02 p0204 A69-12220

Vertical contact analog display /VCAD/ design, emphasizing need for integrated and supplementary information to pilots in systematic way
03 p0379 A69-13361

Human inspection performance in quality control operations to assess visual inspection tasks accuracy
03 p0433 A69-13386

Airline operators economic oriented airframe maintenance problems, discussing cost accounting improvement
03 p0434 A69-13698

Visual factors of laser displays providing human factors recommendation for several visual variables
05 p0760 A69-15591

Medical fitness regulations for pilots, including federal and internal airline regulations
06 p1041 A69-16844

Professional activity of cosmonauts, considering training, mental and physical qualities and engineering background
[UN PAPER 68-95716] 06 p0879 A69-17036

Predictive scale of aircraft emergencies, analyzing human error rate under stress
06 p0880 A69-17208

Leisure time and recreation facilities during long duration space missions, discussing astronaut selection procedure, active recreation, passive enjoyment and exercise programs
06 p0880 A69-17209

Weightless simulators effectiveness for obtaining space systems maintainability criteria, using nonparametric experimental design for performance data
06 p0882 A69-17648

Flying safety and human factors relationships from job classification survey oriented toward social psychology
06 p0884 A69-18035

Management control systems, discussing malfunction, inefficiency and needs of human elements
07 p1244 A69-18963

Lunar shelter regenerative life support system performance and manned test
07 p1071 A69-19427

Occupational attrition estimation methods for determining personnel separation through marriage, death, retirement and transfer applied to engineering and nursing
07 p1245 A69-19728

Flight deck equipment guidelines in aircraft, discussing pilots natural senses, visual information, dis-

plays, logic and memory capable computers and ground controller
08 p1266 A69-20450

Aircraft head-up display systems emphasizing all-weather operations and equipment characteristics
08 p1315 A69-20451

Organizational behavior of scientists noting working environments, effectiveness of work sections, research management and organizational development
08 p1423 A69-21124

Improved suit for lunar wear, noting production and qualifying schedule and astronaut tests
08 p1267 A69-21146

Human engineering program at early design phase of SST aircraft to achieve maximum human efficiency and man machine compatibility
09 p1447 A69-22546

Neurological changes in men due to hypokinesia, analyzing tremor data, EEG recordings and stabilography fluctuations
10 p1647 A69-23585

Aircraft engine instrument displays evaluated by human factors, noting vertical scale design
[SAE PAPER 690328] 11 p1829 A69-24488

Business aircraft injury protection and impact survival design considerations, stressing upper torso restraint installations
[SAE PAPER 690335] 11 p1829 A69-24493

Target displacement and track coherence in pursuit tracking tasks experiments for human performance studies
11 p1829 A69-24737

Manned space stations for future space exploration, discussing earth-like environment, artificial gravity, human factors and time dependence
11 p1965 A69-25644

Man machine integration, detailing sensory input and motor /or output/ systems, control loop and social structure impact
11 p1831 A69-25656

FAA aircraft accident human factors investigation plan, discussing on-call pathologists, site organization and investigation, autopsy and result reporting
12 p2022 A69-25843

Alignment/test rig for head-up displays using laser light pencils
12 p2091 A69-26304

Complex piloting simulation including fatigue for optimizing man machine synergy, emphasizing human adaptability and computer precision and speed
12 p2025 A69-27083

Heart rate and respiratory response correlations in men during surface and underwater work, showing reasonable approximations of workload in surface-equivalent terms
14 p2406 A69-29293

Characteristics, incentive and promotional patterns and work adjustment of engineering technicians
15 p2723 A69-31242

Motivation and performance increase in R and D by incentive plans, discussing prestige, power, responsibility, recognition, work, salary, comfort, etc
17 p3075 A69-32963

Protective helmet design effectiveness against concussion and skull fracture as function of dimension, weight, load spreading, etc
17 p2913 A69-33177

Ergonomy and aviation medicine, discussing biotechnological aspects of information in man machine systems and observation tasks
17 p2915 A69-33770

Protective filter for inspiration valve of oxygen masks in high performance aircraft, reducing respiratory volume exchange with given pressure amplitude
17 p2916 A69-33773

Color coding effect on alphabetic filing names, comparing first and second letter codes and no color code condition
17 p2916 A69-34004

Minimum dimensions of circular nondetent knobs mounted on concentric shafts in case of nontolerable frequent inadvertent operation of adjacent coaxial knobs
17 p2916 A69-34005

Optimum knob crowding, measuring reach time, turning time, inadvertent touching and influence of knob spacing, diameter and configuration
17 p2916 A69-34006

Motion cues simulation system with seat of six differentially inflatable sections, discussing DYNASEAT
17 p2947 A69-34007

Human performance reliability, testing mathematical model application and implications of time to first error concept by vigilance task
18 p3097 A69-34478

Man-computer speech communication, discussing model and aspects of acoustics, phonetics, linguistics, language training, physiology, psychology, bionics, etc
18 p3107 A69-35099

Human ear frequency discrimination, discussing nonlinear functional modeling systems
18 p3097 A69-35440

Accelerate-stop criteria examined from human engineering standpoint, discussing flight simulator study of pilot reaction times for transition to rejected takeoff configuration
[AIAA PAPER 69-772] 19 p3244 A69-35650

Vertical vibrations effect on test subjects in supine position, noting human tolerances and mood changes
19 p3260 A69-35986

Reliability measurements based on maintenance records, considering human factor and life limiting and random chance design
19 p3327 A69-36013

Subsystem designs evaluated on basis of human reliability metric to select desirable design configurations
19 p3261 A69-36026

Impact mechanism in hip safety belt protection in vehicles, deriving motion for natural oscillations of upper part of human body model
20 p3482 A69-37595

Mathematical models of human vestibular system for dynamic space orientation, using control theory
21 p3662 A69-38728

Multiple cues in paired comparisons, discussing mathematical model of psychological process in information extraction and combination
21 p3664 A69-38970

Human radar operator effectiveness at night noting vigilance level lowering, discussing possible logic mechanism perturbation
21 p3666 A69-39268

Space cabin and suit pressures for decompression sickness avoidance and fire hazard alleviation
22 p3890 A69-40212

Representative data of actual forces and moments applicable to large spacecraft attitude control system for typical crew activities obtained through simulation programs
[AIAA PAPER 69-1006] 22 p3921 A69-40380

Cockpit displays for transport aircraft noting digital techniques and flight control-navigation integration
22 p3946 A69-40486

Flicker characteristics of eye color receptive systems by measuring modulation thresholds for sinusoidal flicker of color superimposed on complementary color background
22 p3880 A69-40851

Saccadic eye movements comparison during fixation and reading by contact lens optical lever technique
22 p3880 A69-40855

Human factors methods importance in nonmilitary flight simulation training, discussing cost factors and skills evaluation
22 p3894 A69-41138

Human angular acceleration sensitivity using rotation and oculogyril illusion perception as indicators, relating to spatial orientation and flight control task precision
23 p4101 A69-41674

SST flight crew operational requirements to achieve maximum human efficiency and man/machine compatibility, discussing pilot role, advanced flight instrumentation, etc
23 p4107 A69-41820

Human factors in air traffic control, considering personnel, equipment, environmental and social factors
23 p4108 A69-41828

Head-Up Display /HUD/ incorporated with autopilot for human participation in flight control for all-weather operation
23 p4109 A69-41871

Human sciences contribution to man-computer interaction based on review of relevant human factors literature
24 p4273 A69-43015

Man-computer interaction problems for human factors research, considering conversational languages development and evaluation, use patterns and interaction modeling
24 p4274 A69-43016

Display system design principles and procedures, discussing checklists, formal procedures and behavior theory
24 p4274 A69-43017

Manual vehicle control analysis based on feedback systems analysis and mathematical models for human operators engaged in control tasks
24 p4274 A69-43021

Ergonomic study of experimental tests design for comparing equipments efficiency with man
24 p4275 A69-43023

HUMAN FACTORS LABORATORIES

Relationship between human response to noise and physical parameter, discussing controlled laboratory investigation to determine duration effect on annoyance
18 p3097 A69-34324

Orbital biomedical laboratory for in-flight measurement to assure human safety and optimize astronaut performance in extended space mission
23 p4223 A69-41801

HUMAN PATHOLOGY

Surgical radiolesion in human brain by high energy protons
03 p0374 A69-13501

Corneal greyish opaque arc as warning of atheromatosis in flight crews
05 p0711 A69-16631

Cosmic radiation and hibernation physiopathology of human organism, noting beryl as radiation resisting agent in spacecraft design
06 p0874 A69-17645

Primates for space research, discussing selection, purchase, handling and use as controls in observations of disorders experienced by man
09 p1445 A69-22723

Pathology and aircraft accident causes noting environmental factors, injuries and preexisting diseases
12 p2021 A69-25838

Aviation pathology in aircraft accident investigation of accident survivability features and accident precipitation factors, noting cockpit structures and protective equipment
12 p2021 A69-25841

FAA aircraft accident human factors investigation plan, discussing on-call pathologists, site organization and investigation, autopsy and result reporting
12 p2022 A69-25843

Preventive medicine in handling airline pilots to avoid accidents attributable to disability and death from natural causes
12 p2024 A69-26559

Long microextensions on cultivated human liver cells, using scanning electron microscope
20 p3480 A69-38287

Chronic hypoxic hypoxia on oxygen-hemoglobin dissociation curve and respiratory gas transport in man, considering altitude residents and heart and lung diseased patients
21 p3650 A69-38383

Surface electromyography/EMG/ frequency analysis of normal and pathological muscle or nerve contraction as diagnostic tool for industrial physician
21 p3664 A69-38920

Airway distensibility effect on elastic behavior of human lungs, noting compliance and resistance at different breathing frequencies for diseased lungs
22 p3873 A69-40205

Serial ECG change from normal conduction to right bundle branch block in 59 patients without overt cardiac disease
23 p4085 A69-41677

Heart murmurs frequency analysis on patients to improve detection of aortic insufficiency in presence of mitral stenosis
24 p4279 A69-43800

HUMAN PERFORMANCE

NT ASTRONAUT PERFORMANCE

NT OPERATOR PERFORMANCE

NT PILOT PERFORMANCE

Holographic theory of visual memory behavior, discussing human tests in situation of prompted visual recall
01 p0083 A69-10985

Component total task relationships, analyzing simple and sequential practice effects with aid of Melton Complex Coordinator
02 p0203 A69-12214

Lunar gravity simulation effect on human performance, discussing fidelity requirements, self locomotion, metabolic rate and psychomotor task decrement
02 p0203 A69-12217

Human inspection performance in quality control operations to assess visual inspection tasks accuracy
03 p0433 A69-13386

Work and rest scheduling effect on working capacity and physiological state of male subjects in sealed chamber
03 p0381 A69-14201

Human auditory function during exposure to prolonged low barometric pressure unaffected with normal oxygen partial pressure
03 p0378 A69-14206

Cardiac function changes during orthostatic tests and problems in predicting reactions of cosmonauts in flight
03 p0381 A69-14229

Hypohydration effects on isometric muscular strength, noting decreasing trends in maximal strength
05 p0708 A69-15983

Vectorometric EKG analysis of cardiac activity during hypokinesia with and without exercise and medication
05 p0710 A69-16519

Ideal safety system for accident prevention, considering foreseeable and unforeseeable aspects to eliminate individual or collective human error
06 p1040 A69-16836

Finger dexterity in JMG-1 pressure gloves with regard to efficiency associated with fine adjustments
06 p0884 A69-18032

Auditory startle stimuli effect on human performance, noting decrease in mental and sensorimotor activity
07 p1066 A69-19421

Medical factors as probable cause of aircraft accidents, discussing psychological factors, CO poisoning, hypoxia, alcohol, etc
07 p1067 A69-19433

Mental and physical human performance characteristics under thermal loads noting admissible temperatures and endurance limits
08 p1263 A69-19940

Underwater experiment to determine man capability to perform scientific mission during 60 days isolation, noting task performance, social interaction and personal adjustment
08 p1300 A69-20113

Mild hypoxia effect on selective attention performance of human subjects at simulated 8000 ft altitude
09 p1445 A69-22553

Systolic murmurs and flight personnel evaluation, noting phonocardiographic definition and tracings of specific systolic murmurs
09 p1445 A69-22726

Stimuli human subjects can identify on unidimensional visual stimulus continuum, discussing apparatus and line length influence
10 p1641 A69-23039

Control operation time found dependent on gloves, physical characteristics of control and type of required operation
10 p1648 A69-23180

Glove characteristics effects on manipulability, finding operation time differences between gloved and barehanded operation dependent on type of required control operation
10 p1648 A69-23181

EEG, heart beat, respiration rates, body temperature, motor activity, physical and mental efficiency of man during anechoic chamber confinement
10 p1646 A69-23510

Moisture losses of men wearing partial pressure suit with oxygen mask determined by changes in skin temperature and heat flow
10 p1647 A69-23591

Human information processing rates during one and two axis compensatory tracking tasks with secondary auditory task
10 p1650 A69-23880

Target displacement and track coherence in pursuit tracking tasks experiments for human performance studies
11 p1829 A69-24737

Altitude climates effects on human performance, discussing oxygen consumption at moderate altitudes during vigorous physical activity
11 p1827 A69-24924

Polarity coincidence correlation method due to random processes state characterization applied to man machine systems
12 p0202 A69-25931

Aeronautical health service problems relating to efficiency of military and civil aviation personnel of all nations
12 p0203 A69-26490

Human vestibular reactions at various bodily rotation rates and planes, including counterrotation illusion and nystagmic reaction
12 p0200 A69-26564

Human operator as servo system element of subassemblies in tracking and equilibrium tasks, stressing results of electromyographic analysis
12 p0205 A69-27081

Mathematical models of human performance in man machine systems, discussing operations research, maintainability and real time computer simulation for command and control systems
12 p0205 A69-27085

Computer simulation models for prediction of individual and crew performance in man machine environments
12 p0206 A69-27087

Standardization requirement for laboratory and field research into vibration effects on humans, stressing subjective rating and performance measurements
13 p2213 A69-28091

Combined cueing and knowledge of results for transfer of training in visual monitoring
13 p2213 A69-28256

Astronaut selection and training in U.S. and U.S.S.R.
13 p2216 A69-28636

Noise measurement and scales in studying psychological and nonauditory physiological effects on human functioning
14 p2485 A69-29150

Fast visual task performance indoors found dependent on sound pressure level
15 p2550 A69-30305

Engineer performance related to organizational factors, discussing colleague contact, work diversity, number of subordinates and involvement in work
15 p2721 A69-31069

Telemetry techniques, based on pulse rate measurements, permitting continuous examination of humans under natural working conditions
15 p2559 A69-31228

Cardiovascular system, neuromuscular activity and mental fitness of subjects performing physical and mental assignments with prescribed work-rest schedule during confinement
17 p2906 A69-32936

Prolonged hypokinesia effect on human resistance to physical stress, noting prophylactic influence of physical exercises
17 p2907 A69-32939

Hand movements in water environment, weightlessness and normal gravity conditions, discussing inner coordinative structure and muscular efforts
17 p2915 A69-33385

Muscle motor performance under continuous practice conditions, analyzing individual differences, intrasubject variability and remoteness
17 p2911 A69-34003

Intermittent noise effects on human target detection to test neutral ratio dependence on noise intensity level, noting attention flexibility
17 p2911 A69-34008

Continuous and intermittent noise effects on audiovisual checking task performing subjects, considering omission errors
17 p2911 A69-34009

Mechanical vibration effects on human operation of various decimal input devices
17 p2916 A69-34010

Muscle power output relation to imposed load modified to accommodate inverse relationship between generated force and contraction speed for determining maximum strength
17 p2916 A69-34011

Psychophysical method of studying heart rate as indication of physiological fatigue
17 p2911 A69-34013

Guide for establishing harmonious relationships with design engineers within typical mechanical engineering department
17 p3077 A69-34198

Human performance reliability, testing mathematical model application and implications of time to first error concept by vigilance task
18 p3097 A69-34478

Vectorometric EKG analysis of cardiac activity during hypokinesia with and without exercise and medication
18 p3096 A69-34738

Factor analysis of complex perceptual-motor performance of man, measuring speed, flexibility, balance and strength
18 p3098 A69-35085

Flight and piloting influence on morbidity of civil aviation personnel, noting incidence of enteric, hemorrhoidal and respiratory diseases
18 p3098 A69-35303

Quiet military aircraft design factors, considering human hearing characteristics, noise suppression methods, propeller noise-performance relationships and jet engine noise nature
[AIAA PAPER 69-792] 19 p3243 A69-35637

Man machine modeling technique for establishing personnel performance requirements, discussing field tests 19 p3261 A69-36025

Controlled-variable prediction display based on Taylor series computation, describing acceleration system simulator and human operator performance 19 p3313 A69-36414

Recording instrument paper speed effect on pulse wave measurements precision, discussing multiple observer studies of left ventricular ejection time 19 p3258 A69-36449

Sensorimotor coordination of man performing graphic assignments in upright, reclining and prone position, discussing interaction of vestibular, visual and motor analysors 20 p3470 A69-37246

Motion sickness forms in human subjects subjected to induced rocking, noting impaired performance and sensorimotor reactions to visual stimuli 20 p3472 A69-37263

Human performance and adaptation to space flight effects under low calorie diet including optimal proportion of basic nutrients and amino acids 20 p3482 A69-37621

Human operator decision making in vehicle manual control, considering success likelihood and possible outcome costs based on signal detection model 20 p3482 A69-37720

Adaptive compensation to minimize human task in continuous manual control system using various models 20 p3482 A69-37721

Averaged cortical evoked response characteristics relationship to performance in traditional threshold procedures, discussing stimulus sensitivity and intensity control in central nervous system 21 p3653 A69-38897

Model for lateral inhibitory interaction in human retina, providing systematic account of simultaneous brightness contrast 21 p3653 A69-38898

Ear-hand coordination adaptability tested by exposure to auditory rearrangement entailing 30 degree rotation of interaural axis produced by electronic pseudophones 21 p3663 A69-38899

O uptake of middle aged men, comparing short and long term endurance running effects 21 p3654 A69-38904

Human performance assessed by pulse rate increment at onset of exercise on bicycle ergometer and decrement during recovery after fasting 21 p3655 A69-38910

Mathematical model of probability of errorless human performance for time continuous tasks for use in systems reliability analysis 21 p3664 A69-38971

Personality factors and job performance ratings relationship in radar controllers, computing Pearson correlation matrix based on age, education, motivational distortion, etc 21 p3665 A69-39169

Healthy, physically untrained students compared with trained athletes for differences in working capacity concerning orthostatic tolerance and blood pressure responses 22 p3889 A69-39940

Maximum voluntary isometric muscle strength relation to endurance time in static work during partial curarization 22 p3890 A69-40213

Exercise-temperature regulation in men under constant submaximal workload at various simulated altitudes, discussing exercise core temperature equilibrium level setting mechanisms 22 p3891 A69-40219

Prolonged wakefulness effect on human work capacity in isolated chamber, determining physical, intellectual and sensory capacities 22 p3877 A69-40280

Fixed interval human performance control under various histories of conditioning and response cost conditions, considering effects of postreinforcement pauses 23 p4100 A69-41437

Human observers visual monitoring of multiple meter display differentially controlled by concurrent signal scheduling 23 p4081 A69-41438

Human performance on button pressing task with fixed ratio fixed interval reinforcement schedules 23 p4081 A69-41439

Hand and thumb exercise effects on acquisition tracking task performance 23 p4101 A69-41453

Human mental performance impairment at simulated 8000 ft altitude indicated in increasingly difficult tests 23 p4102 A69-41680

Arterial oxygen partial pressures and heart beat rates measured in humans during acute hypoxia after altitude and ergometer training, noting sensorimotor performance 23 p4086 A69-41788

Healthy, physically untrained students compared with trained athletes for differences in working capacity concerning orthostatic tolerance and blood pressure responses 23 p4108 A69-41821

Point images reference groups identification by human operator with limited visual perception in background noise, comparing results with automatic system using selection algorithms 23 p4109 A69-41955

Mental patient performance in detecting and identifying visual signals under fixed interval schedule, noting nonuniform performance and comparing to normal subjects 23 p4091 A69-42014

Feedback effects and social facilitation of human vigilance performance, evaluating mere coaction vs potential evaluation 24 p4271 A69-42751

Visual and tactual interaction in judgments of vertical in dark room experiments, discussing effects of various reference systems 24 p4271 A69-42752

Personnel training and selection systems, applying information processing models to diagnostic testing in job classification for performance improvement 24 p4274 A69-43020

Adaptive manual control rapid variation determined by input, controlled element, task and programmed adaptation systems, discussing human strategy changes 24 p4274 A69-43022

Ergonomic study of experimental tests design for comparing equipments efficiency with man 24 p4275 A69-43023

Head movement affecting visual and kinesthetic localization accuracy, discussing free and fixed head conditions 24 p4275 A69-43118

Parameter identification algorithm identifying linear dynamic systems by digital computer used to identify human operator characteristics in closed loop control situation 24 p4276 A69-43320

HUMAN REACTIONS

Weak alternating electric field effects on human circadian rhythms 01 p0013 A69-10167

Noise and relations between environment and man, discussing sound perception, measurement and judgment of noise annoyance and harm 01 p0020 A69-10741

Soviet book on space physiology covering space flight and laboratory data on cerebral cortex function, digestive system, tissue changes, etc 01 p0014 A69-10743

Human psychological factors involved in genesis of contingent or conative negative variation using EEG activity measurements 01 p0015 A69-10904

Soviet book on human movements coordination during space flight covering space walks, lunar surface photographs, space docking, weightlessness, etc 01 p0018 A69-11180

Human endocrine-metabolic response to sequential decompression exposure during simulated orbital flight or extravehicular activity 01 p0022 A69-11337

Nitrogen and helium as factors affecting human decompression stress severity, using urinary measurements reflecting various endocrine and metabolic changes 01 p0018 A69-11338

Tinted ophthalmic media effect on detection and recognition of red signal lights in daylight, noting allowable coloration for aviation use 01 p0022 A69-11341

Ophthalmic 2 percent pilocarpine effect on normal ocular dynamics of various age groups, including visual acuity, accommodation and refraction 01 p0022 A69-11347

Hypokinesia and transverse accelerations combined effect on human cardiovascular system and regional blood circulation 02 p0197 A69-11495

Human nervous system and vestibular and auditory analysors functional changes under combined hypokinesia and radial accelerations effects 02 p0197 A69-11496

Weightlessness effects on organism in space flight along parabolic trajectories, discussing interaction between analysors 02 p0197 A69-11499

Differential and threshold sensitivity of acoustic analysors of humans under space flight factors 02 p0197 A69-11500

Hypokinesia and acceleration effects on human organism immunity and resistance to inflammatory diseases in 62 day test 02 p0198 A69-11513

Lateral acceleration effects on human kidney functions, noting increase in diuresis and erythrocytes in urine 02 p0198 A69-11514

Long term restriction of muscular activity noting effects on dynamics of cardiac contraction 02 p0198 A69-11515

External observer effect on human behavior during sensory deprivation tests conducted in isolation chambers as factor in estimating personality 02 p0200 A69-11516

Temporal pattern perception by human subjects required to integrate information presented in two modalities 02 p0200 A69-12724

Human reaction to aircraft engine noise, evaluating effective perceived noise level and constraints on engine design 02 p0204 A69-12766

Respiratory disturbances relationship to experience and attitudes toward gas anesthesia and response to different types of face mask 03 p0378 A69-12884

Stability and habituation of nonspecific galvanic skin responses during light and sound stimulation periods in medical students 03 p0380 A69-13462

Radiation effects in man, searching for dose relationships in prodromal syndrome 03 p0374 A69-13503

Manual performance relationship to men exposed to cold, thermal neutral and hot environments, discussing finger dexterity and motor coordination tests 03 p0381 A69-14074

Organic reaction and adaptation of rabbits and dogs to simulated weightlessness and acceleration compared with orbital flight data of human responses 03 p0376 A69-14192

Isolation effects on higher nervous activity, motor and vegetative reactions, muscular strength and emotional state 03 p0377 A69-14202

Human orienting reaction to sonic boom, determining degree of discomfort 03 p0378 A69-14210

Psychochemical research theory and methodology, relating biochemical phenomena to human brain function 04 p0553 A69-14976

Circadian rhythm effect between individuals of separate twin pairs, noting application to physiological research in medical genetics and human biometeorology 04 p0553 A69-15152

Rotational velocity estimates by observers during angular acceleration, noting vestibular function interpretation 04 p0554 A69-15332

Protein contained purine free basal and yeast ribonucleic acid diets effect on plasma and urinary uric acid production in male subjects 05 p0708 A69-15968

Psychophysical methods for determining perception threshold of angular acceleration in man during vertical rotation 05 p0708 A69-15969

Recorded vocal reactions of humans analyzed as characteristic of positive and negative emotions 05 p0709 A69-16518

Coriolis acceleration dosages applied in vestibulometric tests of male subjects inclined in rotating chair 05 p0710 A69-16521

Biochemical indicators of pilot reactions to flights complicated by unexpected autopilot failures, using postflight chemical analysis of blood and urine 05 p0710 A69-16525

Book on space clinical medicine covering hypoxia, ebullism, decompression, aerotitis, dehydration, hyperthermia, cabin atmosphere contamination, urinary calculus, etc
05 p0711 A69-16801

Physiological approach to tests and evaluation of aviation survival equipment, noting human reactions study under extreme conditions
06 p0877 A69-16953

Biological aspects of space exploration, analyzing human response to artificial environment in prolonged space missions
[UN PAPER 68-95715] 06 p0873 A69-17035

Human physiology advances in connection with space exploration, discussing internal medium adaptation to space environment
[UN PAPER 68-95729] 06 p0873 A69-17061

Sympathoadrenal activity during and after impact stress measured from urinary excretion of catecholamines and 17-hydroxycorticosteroids
06 p0875 A69-17839

Soviet cosmonauts physiological reactions during weightlessness, analyzing EKG, arterial pressure, heart and respiratory rates and motion coordination
07 p1060 A69-18570

Gravitational effects during physiological functions formation of human organism, noting myogenic tonus rearrangement as primary response
07 p1060 A69-18572

Human sensory reactions to short term weightlessness
07 p1060 A69-18574

Subjects sensory reactions to weightlessness during parabolic flight, studying coordination of writing, eating and drinking motions
07 p1060 A69-18575

Statistical study of heart beat, respiration rate and arterial pressure of man during intermittent accelerations and short term weightlessness
07 p1061 A69-18579

Sensory and physiological reactions experienced by cosmonauts during parabolic training flights, tabulating arterial pressure, heart beat and respiration rate
07 p1061 A69-18580

Human vestibular reactions during weightlessness preceded and followed by acceleration
07 p1061 A69-18581

Human and animal cardiovascular system reactions to weightlessness, noting vagus nerve role in adjusting organism
07 p1061 A69-18583

Pneumograms and EKG used to determine heart beat, respiration rates and systolic index of cosmonauts during Voskhod 2 flight
07 p1062 A69-18585

Human vestibular and sensory reactions to rotation and rocking, Coriolis acceleration and vestibular reaction inhibition on ground test stand for effects of temporary weightlessness
07 p1062 A69-18586

Vestibular-vegetative reactions during angular and Coriolis accelerations alternating with weightlessness, noting increased parasympathetic and sympathetic activity
07 p1062 A69-18587

Otolith and cupular apparatus interaction in human vestibular analyzer during gravitational changes
07 p1062 A69-18589

Decrease in bioelectric activity of skeletal muscles in animals and man during intermittent acceleration and weightlessness
07 p1062 A69-18591

Sensory and motor activity of human subjects exposed to reduced gravitation during aircraft motions along parabolic trajectories
07 p1062 A69-18592

Human postural muscle activity, motor reactions and dexterity during gravitational changes
07 p1063 A69-18593

Human motor reactions during weightlessness based on parabolic or orbital space flight observations, noting cosmonaut writing performance
07 p1063 A69-18595

Arbitrary human motions coordination in reorganization phases determined during weightlessness for cyclographic analysis of adjustment time
07 p1065 A69-18979

Human organism reaction to prolonged limitation of muscular activity during weightlessness simulated by bed rest, noting hypokinetic component of weightlessness
08 p1262 A69-19837

Work capacity and adaptation characteristics of humans confined in small chamber and experiencing effects of isolation and sensory deprivation
08 p1262 A69-19838

Stability of male cardiovascular, respiratory and motor systems functional conditions after physical activity in pure O medium at high altitude pressure
08 p1262 A69-19931

Hypokinesia muscular activity deficit in males confined to bed rest compensated for by physical exercise, noting orthostatic resistance, acceleration endurance, immunity, etc
08 p1263 A69-19932

Otolith apparatus response threshold under weightlessness conditions simulated by aircraft flight, measuring galvanic current threshold for banking
08 p1263 A69-19934

Social isolation and other sensory deprivations effects on human organism
08 p1263 A69-19937

Aircrew members skin temperature changes in response to intense diffuse thermal radiation, noting psychological response to exposure
[AGARDOGRAPH-111] 08 p1264 A69-20669

Thermoregulatory reactions of human body to sharp increase of ambient radiant temperature
[AGARDOGRAPH-111] 08 p1264 A69-20670

Human reactions to increasing heat exposure, noting thermoregulation and metabolic and evaporative heat loss
[AGARDOGRAPH-111] 08 p1265 A69-20675

Cold water immersion effects on man from physiological and physiopathological viewpoint, examining clothing effect
08 p1267 A69-20682

Long time physiological effects of rotating systems, surveying acceleration effects and rotation experiments on humans and rats
08 p1265 A69-21183

Physiologic and metabolic effects in humans undergoing therapeutic hypothermia
10 p1643 A69-23125

Psychological, physiological and biochemical responses to controlled diets, determining regional and total body sweat composition of men working in temperate environment
10 p1644 A69-23314

Hypokinesia effects on human neurology on extended space flights simulated by 72-day bed rest
10 p1646 A69-23506

Human physiology for exposure to acute hypoxia studied with variation pulsograms and indices of external respiration and pulmonary gas exchange
10 p1647 A69-23592

Biotelemetry of human physiological processes in space for assuring physiopsychological control and immediate intervention for emergencies, discussing application in Mercury and Gemini projects
12 p2023 A69-26491

Human nystagmic reaction variations due to simultaneous rotation of head and body, studying coriolis couple in horizontal semicircular canals
12 p2020 A69-26565

Book on earth atmosphere and outer space influence on human physiology for life support systems design
12 p2024 A69-27074

Standardization requirement for laboratory and field research into vibration effects on humans, stressing subjective rating and performance measurements
13 p2213 A69-28091

Physiopathological reactions of humans exposed to infrasonic vibrations applied via auricular canal, observing cardiac and circulatory hemodynamic troubles
13 p2215 A69-28590

Climatic environments development for physiological studies, considering ambient temperature, radiated heat and air velocity and movement
13 p2215 A69-28594

Closed life support systems tests, describing effects of long term /one year/ confinement of three human subjects
13 p2216 A69-28612

Prolonged dehydrated food diet effect on metabolism of humans, noting complete adaptation after three or four months
13 p2212 A69-28624

Combined hypoxic hypoxia and high ambient temperature found relieving strain on humans by increasing heat release by evaporation
13 p2212 A69-28628

Acoustical, psychological, sociological and political aspects of human reaction to SST sonic booms over populated areas, tabulating Boeing and Concorde boom intensities
14 p2408 A69-29151

Noise duration and spectral complexity effect on subjective rating of disturbance level
14 p2408 A69-29152

Auditory evoked response /AER/ as measure of narcosis induced at depth in diving personnel, discussing hyperbaric nitrogen and oxygen effects
14 p2407 A69-29302

Latent desynchronization, discussing life system and distortion, body rhythms coordination, circadian rhythms and adaptation to new system of time
15 p2557 A69-31457

Alternating electric field effects on circadian rhythms in men, discussing period shortening and internal desynchronization
15 p2557 A69-31461

Long distance air flights through different time zones, discussing circadian physiological cycles, light-dark ratio shifts effects and methods of lessening desynchronization effects
16 p2745 A69-32444

Phagocytic activity and carbohydrate metabolism in peripheral blood neutrophils of men exposed to atmosphere with increased O content, noting neutrophil energy exchange disorder role
17 p2907 A69-32942

Diphenidol and prochlorperazine effect on human semicircular canal function, noting failure of drug to alter vestibular responses
17 p2913 A69-33168

Urine excretion following water load in male subjects exposed to normal, hot/dry and comfortable/dry environment applied to airline crews
17 p2914 A69-33182

CH-46 helicopter flight simulation program for pilot response to large perturbation maneuvers, using six degrees of freedom mathematical models
[AHS PAPER 361] 17 p2946 A69-33521

Compensatory reactions to prolonged weightlessness in human and animal organisms emphasizing blood circulation, heart, metabolism, digestive and nervous systems
17 p2909 A69-33577

Relationship between human response to noise and physical parameter, discussing controlled laboratory investigation to determine duration effect on annoyance
18 p3097 A69-34324

Recorded vocal reactions of humans analyzed as characteristic of positive and negative emotions
18 p3096 A69-34737

Coriolis acceleration dosages applied in vestibulometric tests of male subjects inclined in rotating chair
18 p3096 A69-34740

Biochemical indicators of pilot reactions to flights complicated by unexpected autopilot failures, using postflight chemical analysis of blood and urine
18 p3096 A69-34744

Toxic effects of Freon R FE 1301 on animals and human beings at different concentrations, assessing judgement, alertness and neuromuscular skill
18 p3098 A69-35061

Tremographic studies of central nervous system during supersonic flight as engineering psychology application to man machine relations in aircraft-spacecraft industries
19 p3259 A69-35834

Space medicine to characterize nature and degree of changes in human functional capabilities due to space flight environment prolonged exposure
19 p3456 A69-36460

Visual and vestibular analysors interrelation in subjects receiving light pulses before and after rotation, noting role of cortical elements
20 p3470 A69-37249

Combined angular and centrifugal acceleration effects on human and animal eyes motion studied to explain weightlessness effects on humans
20 p3471 A69-37257

Human sensorimotor reactions during rotation in small radius apparatus at different speeds and torso inclinations
20 p3471 A69-37258

Coriolis acceleration effect on vestibulo-vegetative and vestibulo-somatic reflexes of humans subjected to forward tilting, noting pulse and respiration rates
20 p3472 A69-37259

Vestibular functions of humans subjected to Coriolis acceleration via prolonged rotation at different angular velocity rates
20 p3472 A69-37260

Human sleep during prolonged rotation, discussing electroencephalograms, acoustic signal frequency producing waking reaction, cutaneous galvanic reflex and deepness of sleep
20 p3472 A69-37261

Arbitrary human motions coordination in reorganization phases determined during weightlessness for cyclographic analysis of adjustment time
20 p3479 A69-38227

Male patients urine tests during sinusoidal vibration, noting catecholamine excretion as criterion of emotional stress under various environmental conditions
21 p3654 A69-38909

Physiological and psychological measurements of high pressure effects on man and animals, discussing decompression sickness, respiratory embarrassment, inert gas narcosis, helium tremble, etc
21 p3655 A69-38912

Carbon dioxide levels monitoring in spacesuit research including limits of physiological acceptability
21 p3665 A69-39170

Somatic radiation effects on human organism related to manned space flights
21 p3660 A69-39172

Desynchronization and resynchronization of human circadian rhythms of activity, body temperature and urine excretion during isolation in underground bunker in various conditions
21 p3660 A69-39173

Motion sickness susceptibility during parabolic flight, comparing weightlessness and hypergravity effects on normal and labyrinthine-defective subjects
21 p3660 A69-39176

Sleep habits of radar operators working in alternate crews in radar station on continuous watch
21 p3666 A69-39269

Radiotelemetric EEG recording variation possibility, examining dynamic behavior of human cerebral rhythms
22 p3889 A69-40158

Age and carbon dioxide tension effects on EEG of adolescents and adults, discussing end-tidal carbon dioxide during routine hyperventilation
22 p3872 A69-40162

Isometric tensions of detached lateral rectus muscles measured during strabismus surgery for mechanical components of human eye movements, giving muscle tone range
22 p3872 A69-40200

Circadian variations in human temperature regulation, measuring peripheral and rectal temperatures and peripheral heat and arterial blood flows in clothed resting males
22 p3872 A69-40201

Peripheral chemoreceptor carbon dioxide sensitivity, measuring human respiratory response to large carbon dioxide breath in oxygen at sea level and high altitude
22 p3890 A69-40207

Thermoregulatory responses to cooling in spinal man, discussing deep temperature sensitive structures and relationship between skin and central regulatory structures
22 p3873 A69-40209

Skin temperature change rate influence on sweating in male subjects, discussing role of central thermosensitive structures
22 p3874 A69-40210

Human metabolic response to hypothermia measured over wide range of work intensities and durations
22 p3891 A69-40215

Oxygen uptake and circulatory response in human male subjects during maximal treadmill and bicycle exercise
22 p3874 A69-40226

Human lung ventilation-perfusion scatter decreasing gas exchange efficiency during high altitude adaptation
22 p3875 A69-40227

Spatial distribution of amplitude and onset of pre-motion positivity, readiness and motor potential changes in human cerebral cortex preceding voluntary finger movements
22 p3875 A69-40261

Cortical responses by transient sensory stimulation of fingers EEG recorded, obtaining isomorphism between psychological and neurophysiological events
22 p3876 A69-40262

Zoellner illusion in human visual system measured as function of background pattern density consisting of intersect angles and background line spacing
22 p3879 A69-40841

Human visual response to moving spatially periodic patterns, analyzing critical frequencies, dependence on stimulus area and period, phase blindness and pattern reversal
22 p3880 A69-40850

Visual stimuli initiating horizontal eye vergence movement in human subjects, noting cerebral conditions for convergence
22 p3881 A69-40859

Subjective and objective thresholds of darkness adaptation in human subjects grouped from infancy to adulthood, using same variable intensity light source equipment
22 p3881 A69-40861

Retinal topography relation to blue arcs phenomenon, assessing disparity in photoreceptor location and associated neurones for analysis of critically sited plots
22 p3882 A69-40872

Angular velocity of visual stimulus effect on human torsional eye movements using sectorized disks
22 p3883 A69-40874

Spatial interactions and thresholds in identification and detection of compound visual stimuli
22 p3883 A69-40878

Response characteristics of human visual mechanisms sensitive to motion while varying adaptation stimulus contrast to control visual effectiveness
22 p3884 A69-40887

Human response to visual beat phenomena by combining intermittent stimuli, considering brightness estimation
22 p3884 A69-40889

Insensible water loss from human skin as function of ambient vapor concentration using IR gas analysis, applying results to water loss model revision
23 p4077 A69-41293

Antidiuretic hormone /ADH/ and bradykinin effects on human thermal and cholinergic sweating after subdermal injection in forearm, abdomen and leg
23 p4077 A69-41311

Physical exercise effect on adolescent males, comparing oxygen uptake, heart volume and height in training and nontraining groups
23 p4077 A69-41312

Heart rate measurements in ski jumpers with radio telemetric system revealing tachycardia during climbing and emotional stress
23 p4078 A69-41313

Fixed interval human performance control under various histories of conditioning and response cost conditions, considering effects of postreinforcement pauses
23 p4100 A69-41437

Telemetered heart rate response to progressively increased distance swimming competition compared with equidistance running events for change patterns, magnitude and recovery
23 p4100 A69-41444

Human sweat glands reflex responses to diverse skin cooling rates in hot room, discussing bath temperature step decrease effect on lower limb
23 p4082 A69-41446

Circadian rhythms characteristics of healthy human beings as reference standards for comparing investigation data from different continents
23 p4083 A69-41457

Frequency response transient vibration testing of standing man, discussing data analysis procedure, test stand, and Welch correction for instrument dynamics
23 p4101 A69-41494

Hypoxia acclimatization studied by subjecting groups to bicycle exercise at simulated high altitude and at ground level
23 p4086 A69-41678

Human physiological responses to angular acceleration during breath holding, Mi, Valsalva and Mueller respiratory maneuvers in hollow spherical simulator
23 p4102 A69-41679

Radio telemetry system for evaluating protective masks dynamic performance by remote simultaneous monitoring of respiration, acceleration and temperature data generated by human subjects
23 p4121 A69-41765

Hypoxia reaction elimination in human beings by repeated exposure to hypoxia, discussing nitrogen inhalation experiments and adaptive behavior of respiratory system
23 p4214 A69-41789

Space medicine to characterize nature and degree of changes in human functional capabilities due to space flight environment prolonged exposure
23 p4087 A69-41803

Klaxon hooter sudden sound used as auditory startle stimulus to determine hand sensorimotor activity and standing stability in pilot error causes
23 p4088 A69-41808

Alcoholic hangover effects on human balance system from flying demands viewpoint, discussing ocular-vestibular system disturbances
23 p4089 A69-41817

Subjects confined in caves for two to six months to note physiological rhythms time evolution and associated desynchronization and resynchronization
23 p4107 A69-41818

Subjective feeling of dampness correlation with relative humidity of air at zero and below zero C temperatures
23 p4109 A69-41870

EEG, ocular movements, gastric mobility and pH during human sleep from data transmitted by swallowed radio transmitter
23 p4093 A69-42063

Diurnal rhythms of heart rate and blood pressure reactions to posture changes on tilt table, finding orthostatic lability maxima
23 p4094 A69-42072

Human thermal regulatory mechanism using analog simulation compared with experimental results of resting subjects responses to climatic chamber
23 p4111 A69-42079

Human heart rate changes resulting from diving and breath holding exercises
23 p4095 A69-42083

Venous tone, peripheral venous pressure, skin and muscle blood flow, alterations of heart rate and respiration in men during leg exercise
23 p4096 A69-42090

Sound evoked DC changes on intact skull of adult humans using data from AgCl electrodes, investigating intensity function, analyzing data by computer
23 p4098 A69-42101

Blood flow, volume and venous pressure measurements in right hand at low and high altitudes in residents and newcomers
23 p4098 A69-42106

Psychological, psychophysiological and biochemical effects of prolonged sleep deprivation in human males, noting transient ego disruption
23 p4099 A69-42195

Human body responses to microwave irradiation, discussing thermal and nonthermal effects and damage to eyes and to information storage in living systems
23 p4111 A69-42216

Adrenosympathetic reaction in flight, studying contributions of physical and nervous stresses in physically trained and untrained persons
23 p4099 A69-42363

Psychological stress effect on human convergent and divergent thinking after presentation of disturbing or benign control films
24 p4269 A69-42555

Central circulatory responses of humans to rapid skin temperature changes during continuous exercises
24 p4258 A69-42633

Stewart-Hamilton theorems for total input-output analysis of body cholesterol in man
24 p4259 A69-42639

Electroretinogram and visually evoked cortical potential as response potentials in human visual system
24 p4271 A69-42644

Steady state model for human respiratory system analysis, discussing controlled and controlling parts
24 p4276 A69-43272

Brightness discrimination judgments for gray chips by humans, using psychophysical limits method and white, noncoherent red and He-Ne laser light sources
24 p4276 A69-43323

Urine sampling conditions for kidney function circadian rhythm during global flight, considering food and water intake, sampling intervals and body position
24 p4266 A69-43374

Human circulatory reactions to cumulative flight vegetative stimuli evaluated by cumulative stress simulation method
24 p4266 A69-43375

Circulatory reactions of humans under g forces in centrifuge for various periods, with or without anti-g suit
24 p4267 A69-43385

Circadian periodicity of human reaction times tested during normal diurnal cycles and 24 hour wakefulness, noting acoustic and visual stimuli effects on learning
24 p4267 A69-43387

HUMAN TOLERANCES

Helicopter structures design for maximum practicable crashworthiness and survivability, comparing load factors and deformations with indicated human impacts tolerance
[AHS PAPER 225] 01 p0009 A69-10408

Cardiovascular changes in male students during tilt and negative pressure tests with bed rest studied from heart rate, blood pressure and leg volume measurements
01 p0021 A69-11334

Prolonged decompression stress effects on humans in simulated orbital flight or extravehicular activity, investigating endocrine-metabolic disturbance by urinalysis

01 p0022 A69-11336

Basal metabolism in humans restricted to prolonged bed rest, noting decreased oxygen consumption rates

02 p0197 A69-11497

Biological effects in man due to heavy particles emission during major solar cosmic ray events, noting protective effect of human body

03 p0374 A69-13500

Physiological mechanisms of weightlessness on human organism, discussing adaptation to weightlessness

03 p0377 A69-14197

Daily sleep and wakefulness periodicity changes effect on heart rate, respiration and body temperature diurnal rhythms in human males under isolation conditions

03 p0377 A69-14203

Changes in blood circulation, external respiration and gas exchange rates in humans during prolonged hypodynamia

03 p0377 A69-14204

Human motor activity under hypodynamia and increased carbon dioxide, discussing positive effects of prescribed physical exercises

03 p0377 A69-14205

Impact/injury data used to estimate human tolerance to instantaneous accelerations

04 p0552 A69-14469

Mechanical model of human body used to study response to vibration, impact, blast and decompression loads

04 p0552 A69-14470

High temperature effects on physiological functions of man noting cardiovascular system and heart performance, body heat exchange and blood and urine composition

05 p0710 A69-16523

Cerebral circulation under longitudinal acceleration, discussing rheoplethysmographic measurements of heart rate

05 p0710 A69-16625

Professional activity of cosmonauts, considering training, mental and physical qualities and engineering background
[UN PAPER 68-95716]

06 p0879 A69-17036

Radiative, convective and evaporative heat losses and thermal comfort conditions for human beings, describing theoretically and empirically based equation

06 p0880 A69-17087

Cardiac arrhythmias during positive G sub x acceleration, treadmill exercise and tilt table testing

06 p0874 A69-17834

Human body cold tolerance and relation to BMR seasonal variation

06 p0876 A69-18024

Human acceleration tolerance dependence on age, profession and physical training from investigation of reactions to repeated centrifugal accelerations

07 p1065 A69-18980

Human acceleration tolerance under reduced pressures corresponding to various high altitudes, noting visual disorders

07 p1065 A69-18982

Human endurance during isolation in closed space with prescribed veloeometric exercises, noting impairment of functional capacity

08 p1263 A69-19933

Underwater experiment to determine man capability to perform scientific mission during 60 days isolation, noting task performance, social interaction and personal adjustment

08 p1300 A69-20113

Brief intense thermal stresses effects on cardiovascular system of man, noting criticality of effective blood volume for circulatory competence

08 p1264 A69-20668

Cold water immersion effects on man from physiological and physiopathological viewpoint, examining clothing effect

08 p1267 A69-20682

Skin temperature and cutaneous pain during warm water immersion, refuting subcutaneous thermal gradient hypothesis for stimulation of heat pain

08 p1267 A69-20683

Physiological effects of breathing cool dehumidified air in hot humid environment, tabulating tolerance time, heart rate, temperature changes and sweat loss

09 p1446 A69-22543

Heat and humidity endurance limits in man

10 p1645 A69-23494

Long term hypokinesia effect on cardiovascular system of athletes indicating human orthostatic resistance increase due to physical exercises

10 p1646 A69-23581

Prolonged bed rest effect on human myogenic tonus and proprioceptive reflexes, comparing test subjects with and without physical exercises

10 p1646 A69-23583

Combined effect of prolonged bed rest and acceleration exposure on human blood circulation, noting increased heart rate and arterial blood pressure

10 p1646 A69-23584

Human adaptation to various environments, emphasizing experimental space psychoneurology role in human behavior examinations during space missions

10 p1647 A69-23587

Limits of human tolerance to localized skin exposure to IR irradiation of various intensities from pain threshold observations, noting skin temperature role

10 p1647 A69-23589

EEG, EKG, respiratory motions and pulmonary ventilation recordings in study of carbon dioxide additions effect on human tolerance to hypoxic conditions

10 p1650 A69-23898

Human intolerance to bacteria as food, considering response to Hydrogenomonas eutropha and Aerobacter aerogenes

13 p2213 A69-27265

Human resistance to short duration high accelerations applied to aircraft ejection studies, noting bone damage, consciousness retention, etc

13 p2215 A69-28591

Autonomic nervous system role in controlling body functions after rapid decompression, increasing tolerance to pressure gradients by physical training

13 p2212 A69-28622

Human tolerance to SST sonic booms through scheduled community exposure, discussing physiological effects and acceptability level

14 p2541 A69-29153

Human noise tolerance laboratory and community studies, discussing proposed tone corrections for aircraft noise

15 p2719 A69-30374

Shield facility and Helmholtz coil system used to investigate chronic effects on man of zero magnetic field regulated to cancel geomagnetic field variations

15 p2586 A69-30382

Artificial heat acclimatization effect on orthostatic tolerance in man exposed to stresses of heat, exercise and dehydration

16 p2746 A69-32810

Aircraft noise acceptability tests based on listening in absence and presence of speech

18 p3097 A69-34325

High temperature effects on physiological functions of man noting cardiovascular system and heart performance, body heat exchange and blood and urine composition

18 p3096 A69-34742

Mechanical vibration effects on human body in industry and in terrestrial, aerial and nautical vehicles, discussing harmful frequencies and safety measures

19 p3259 A69-35605

Vertical vibrations effect on test subjects in supine position, noting human tolerances and mood changes

19 p3260 A69-35986

Test pilot vestibular training program to achieve higher tolerance of rotation, rocking and balancing and visual stimuli

20 p3472 A69-37266

Human acceleration tolerance dependence on age, profession and physical training from investigation of reactions to repeated centrifugal accelerations

20 p3479 A69-38228

Human acceleration tolerance under reduced pressures corresponding to various high altitudes noting visual disorders

20 p3480 A69-38230

Bicycle ergometer combined with induction clutch, investigating effect of eccentric dynamic work with arms and legs

21 p3663 A69-38902

Noise influence on heart rate and oxygen consumption of young male subjects under simultaneous physical stress

21 p3654 A69-38908

Human susceptibility to motion sickness under Coriolis acceleration during parabolic flight weightlessness

21 p3659 A69-39168

Strenuous physical training effects on human tolerance for work in heat, measuring rectal and mean skin temperatures and heart rates

22 p3890 A69-40199

Unilateral hypoventilation effect during bronchspirometry on human pulmonary blood flow

22 p3875 A69-40229

Heart rate responses and corresponding tolerance tests in trained athletes and nonathletes during simulated environmental extremes

23 p4102 A69-41683

High intensity and short duration acceleration effects on human beings, discussing mechanical resistance of spinal column and circulatory aspects

24 p4266 A69-43380

Heat tolerance in case of SST aircraft air conditioning failure, discussing physiological and psychomotor reactions and time curves for metabolic activity levels

24 p4277 A69-43382

Physical and physiological factors involved in determining aircraft passengers time of safe unconsciousness permissible after cabin decompression

24 p4278 A69-43398

Acoustic analyzer response of man during prolonged noise effect of varying pitch and intensity

24 p4278 A69-43408

HUMAN WASTES

NT FECES

NT SWEAT

NT URINE

Mineralized human wastes solutions utilization for Chlorella cultivation, noting growth rates

02 p0200 A69-11511

Physicochemical method for converting human urine and feces into carbohydrates in closed ecological systems

03 p0381 A69-14199

Biowaste propelled restojet control systems selection criteria based on NASA Manned Orbital Research Laboratory with six man crew

04 p0554 A69-15506

Physicochemical synthesis of monosaccharides from human waste products at atmospheric and elevated pressures, considering methane oxidation by nitrogen oxides and ozone

07 p1071 A69-18971

Reactors technical characteristics for high temperature mineralization of closed life systems biological wastes, deriving equations to estimate energy balance

10 p1649 A69-23504

Monosaccharide production from carbon dioxide from respiration or human waste incineration, evaluating toxicological effects of synthetic monosaccharides

15 p2557 A69-31471

Physicochemical synthesis of monosaccharides from human waste products at atmospheric and elevated pressures, considering methane oxidation by nitrogen oxides and ozone

20 p3483 A69-38219

Material recovery from metabolic and other wastes for long duration manned space missions, discussing carbon dioxide removal, bioregenerative food systems, etc

24 p4272 A69-42876

Urinary excretion of hormonal metabolites in intercontinentally flown test subjects, using gas chromatographic procedure for steroid identification

24 p4268 A69-43404

HUMIDITY

Meteorological PTU /pressure, temperature, humidity/ probe for lower atmospheric layers, discussing detectors and assembly qualities

04 p0601 A69-15229

Heat and humidity endurance limits in man

10 p1645 A69-23494

Wet steam injector power losses in nozzle as function of humidity, noting compensation of nozzle throat diameter and fluid flow rates

13 p2246 A69-27490

Water-air interface models unreliability in calculating atmospheric heat and humidity turbulent flow over ocean

14 p2443 A69-29839

Energy dissipation of solder-covered and solderless solar cells with TiAg contacts as function of storage time, temperature and humidity

19 p3253 A69-35706

Analog computer used to correct body plethysmographic chamber signal distortion due to inspired/expired air temperature and humidity differences

23 p4111 A69-42081

F-5 cockpit fogging during low flights and dive bombing in South Vietnam attributed to hot humid weather, recommending cockpit temperature control and pilot diet

24 p4277 A69-43376

HUMIDITY MEASUREMENT

HUMIDITY MEASUREMENT

Northern California humidity to 32 km utilizing alpha radiation hygrometer and associated balloon sounding equipment

03 p0461 A69-13345

Aspiration psychrometric probe for measurements of relative humidity of gas-vapor phase of gas flow containing liquid droplets

06 p0927 A69-17689

Solar radiation absorption measurements by balloon for atmospheric water vapor distribution

09 p1536 A69-21864

Dew /or frost/ point determination method for low temperature humidity measurement

09 p1502 A69-22691

Mean absolute relative humidity variations above earth surface over various time intervals during cloudless nights, obtaining spatial humidity differences and corresponding extinction coefficients

24 p4346 A69-43158

HUMMINGBIRD AIRCRAFT

U XV-4 AIRCRAFT

HUNTER F-2 AIRCRAFT

U F-2 AIRCRAFT

HURRICANES

Apollo 7 and weather satellite observation photographs of hurricane Gladys and typhoon Gloria

10 p1722 A69-22944

Fully developed whirls steady state structure, discussing tornadoes maximum azimuthal speed, hurricanes rotational speed, model for mature hurricane and numerical computation

[AIAA PAPER 69-671]

17 p2997 A69-33499

HUYGENS PRINCIPLE

Mathematical model of fields reradiated by Huygen sources in front of array for glide path site analysis

17 p3003 A69-34107

HYBRID COMPUTERS

Hybrid computers, discussing analog and digital devices combination and distinction between use of computer for general purpose computation and control purposes

02 p0212 A69-11997

Heat transfer in pyrolytic graphite analyzed by hybrid computer simulation

02 p0353 A69-12387

Functional optimization techniques for serial hybrid computer solution of partial differential equations, emphasizing algorithms handled on digital computer

04 p0566 A69-15344

Hybrid assumed mode solution of nonlinear partial differential equations /initial value problems/ in time-like independent variable

04 p0566 A69-15345

Hybrid computer algorithm for numerical integration of partial differential equations, using assumed sum separation of variables

04 p0566 A69-15346

Hybrid computational method for partial differential equations to reduce time of solution and error propagation

04 p0566 A69-15347

Iterative solution of continuous-time-discrete- space /CTDS/ equations as approach to hybrid computation of certain partial differential equations

04 p0567 A69-15348

Lockheed hybrid computer system, describing features implemented by modifying and augmenting digital batch processing system

04 p0567 A69-15349

Design and implementation of executive system for hybrid simulation, discussing requirements placed upon digital computer and operating software

04 p0567 A69-15350

Hybrid executive development based on digitally oriented software, explaining assembly language routing

04 p0567 A69-15351

Boeing/Vertol Hybrid Facility for solving engineering problems in V/STOL design and research

04 p0567 A69-15352

NASA-Ames hybrid simulation software systems, subsystems and implementation

04 p0567 A69-15353

Automatic preventive maintenance program for hybrid computer system by checking individual units

04 p0568 A69-15359

Diagnostic techniques development to test and perform preventive maintenance on hybrid system

04 p0568 A69-15360

Learning model of brain stem reticular formation based on nonlinear probabilistic hybrid computer concepts

05 p0711 A69-15802

Digital computer interface systems design for simulation, control, instrumentation and data processing, discussing hybrid computer linkages

05 p0723 A69-16195

Error analysis methods for inherent errors in analog, digital and linkage equipment of typical hybrid computer configuration

05 p0725 A69-16472

Medium scale integration for packaging hybrid electronic monolithic systems

05 p0735 A69-16752

Analog-hybrid computer configurations for average and rms values of signals with respect to time

06 p0891 A69-17220

Hybrid simulation of transport lag with variable time delay, noting dynamic range limitations due to digital computer processing and memory capacity

10 p1661 A69-23852

Asymptotic sampling error in closed loop hybrid systems, noting dependence on sampling period and execution time

12 p2053 A69-26508

Hybrid computer system for real time optimum feedback controller using iterative algorithms with rapid convergence, discussing simulation and performance

15 p2582 A69-30071

Automatic hybrid apparatus for solving linear equations, using Gauss-Seidel iterative method and stressing control arrangement, communication circuits, etc

15 p2572 A69-31089

Automated patching system design for analog and hybrid computers to reduce number of switches required

16 p2756 A69-32551

Onboard hybrid computer for helicopter fire control system, generating turret pointing angles and corrections

17 p2934 A69-34074

Automated analog scaling for in hybrid computer systems imposing magnitude and frequency constraints, using equations for amplifier input factors

18 p3105 A69-34617

Stability contours for sampling and delay effects analysis in analog/digital hybrid simulation loops, considering compensation quality over simulated system natural modes

21 p3680 A69-39609

Simulation of passively stabilized satellites using in-line hybrid computer

[AIAA PAPER 68-853]

21 p3680 A69-39758

Multispacecraft simultaneous simulation on hybrid computer using Encke perturbation method for translational motion and Hamilton quaternion method for inertial transformations

[AIAA PAPER 69-937]

22 p4036 A69-40320

Analog and digital computer elements combined in hybrid technique for aeronautic simulation

23 p4146 A69-41603

HYBRID PROPELLANT ROCKET ENGINES

Regression rate model for pressure sensitive hybrid combustion based on classical turbulent flame theory

[WSCI PAPER 68-22]

07 p1240 A69-18362

Rocket engine high energy hybrid propellant performance optimization, discussing engine enlargement, oxidizer injection geometry, fuel additives, combustion gas vorticity, etc

11 p1943 A69-25428

Hybrid chemical rocket theory and design noting radiation effects, regression and convective heat transfer

11 p1944 A69-25589

Hybrid motor in sounding rocket using amino plastic as fuel and nitric acid as oxidizer, discussing advantages in cost, handling, thrust, performance, etc

16 p2835 A69-31744

Hybrid rockets combustion mechanism, discussing turbulent boundary layer with heat and mass transfer, chemical reactions, etc

16 p2879 A69-32002

Regression rate of solid fuel in hybrid combustion determined as eigenvalue by Rayleigh flow model with evaporating boundary

16 p2879 A69-32013

Thrust magnitude and direction modulation of hybrid propellant engine, noting applications

17 p3019 A69-33337

Flame propagation mechanism on plastic fuel in oxygen-nitrogen atmospheres with variable pressures and at different initial fuel temperatures, discussing safety and ignition problems

17 p3074 A69-33662

Liquid, solid, hybrid propellant and nuclear, electric and air breathing rocket engines, discussing orbiting payload cost, controllability, operating environments, velocity, etc

19 p3395 A69-36321

High energy oxygen-free hybrid propulsion system using polyethylene propellant and F oxygen mixture as oxidizer

[DGLR-69-017]

23 p4202 A69-41930

Concentric or eccentric rotation effect on burning rate and geometry of small hybrid rocket motors using hydrogen peroxide-organic fuel

23 p4203 A69-41932

HYBRID PROPELLANTS

Deflagration of solid and hybrid propellants in steady state for missile and rocket propulsion applications

06 p0982 A69-17422

Hypergolic filling materials for solid fuels with hybrid propellant combinations, discussing ignition and combustion of ethylenimine derivatives

10 p1753 A69-24023

Polymethyl methacrylate burning rates in mixture with ammonium perchlorate or in hybrid systems when mixed with ammonium chloride

13 p2324 A69-28503

Low thrust reaction control for space missions, summarizing range and specific impulse characteristics for solid and hybrid systems

[AIAA PAPER 69-433]

16 p2834 A69-32745

Thermodynamics of propellant combination of Li hydride containing solid fuel with ethylenimine base, coupled with Cl trifluoride oxidizer and ammonium nitrate added

22 p3997 A69-39919

Combustion considerations in fuel rich solid and hybrid propellant systems in air breathing propulsion for comparison with metal ignition requirements

23 p4199 A69-41894

HYBRID PROPULSION

Hybrid chemical rocket theory and design noting radiation effects, regression and convective heat transfer

11 p1944 A69-25589

Hybrid propulsion chemical and technical problems, discussing solid fuel fragmentation and defining typical combustion modes

17 p3021 A69-33358

High energy oxygen-free hybrid propulsion system using polyethylene propellant and F oxygen mixture as oxidizer

[DGLR-69-017]

23 p4202 A69-41930

HYBRID ROCKET ENGINES

Burning rate of solid grains of hybrid rocket engine, using calculated diagrams for quick computations of engine

08 p1376 A69-20590

Boron combustion for air augmented rocket applications, discussing single boron particle ignition and combustion characteristics

16 p2828 A69-31737

HYDRATES

Gaseous hydrates formation in comet nuclei, discussing stability at given temperatures and pressures and solar radiation shielding by dust sheath

03 p0515 A69-14032

HYDRAULIC ACTUATORS

U ACTUATORS

HYDRAULIC ANALOGIES

Hydraulic analogy for shock and expansion waves arising in supersonic compressors due to three dimensionality of flow

[ONERA-TP-598]

02 p0187 A69-11621

Supersonic compressors for supersonic and subsonic air intakes, studying wave configuration at entry of circular cascade of blades with hydraulic analogy

[ONERA-TP-669]

05 p0699 A69-16340

Hydraulic analog for determining acoustic behavior of baffle cell used in liquid rocket engines, comparing ring and spoke type baffles

09 p1570 A69-22004

Fluidics /no moving part fluidics/, discussing diodes, capacitors, logic elements, temperature sensors, systems design, environmental factors, etc

17 p2904 A69-34067

HYDRAULIC CONTROL

Fluid mechanics of one stage momentum fluidic diode

02 p0195 A69-12071

Fluidic system controlling inlet guide vanes to high pressure compressor of two spool jet engine, using digital elements to drive hydraulic servosystem

02 p0305 A69-12090

- Fluidic numerical controls of linear or rotating motors, discussing pneumatic, hydraulic, hybrid logic components and amplifiers
04 p0550 A69-15082
- Electrohydraulic guidance of second stage of Diamant rocket used for orbiting satellites employing thrust vector orientation
04 p0551 A69-15183
- Electrohydraulic radar antenna telecontrol system, discussing pump assembly, hydraulic motor and pump control servojack
04 p0551 A69-15185
- Synthesis of simulated aircraft cabin pure fluidic temperature control system
[ASME PAPER 68-WA/FE-30]
05 p0705 A69-16103
- Electrohydraulic attitude servomechanism for controlling movements of pilot training cabin, describing hydraulic system and electric control circuit
06 p0906 A69-16966
- Hydraulic control valves for guidance of rockets by secondary liquid injection into nozzle skirt, discussing structure, single nozzle missile and mass gain
07 p1230 A69-19293
- Aircraft electrohydraulic primary control systems including electrical signal transmission, engine failure detection, signal structure and digital systems
08 p1347 A69-20872
- Collection of articles on fluid control components and systems design
08 p1256 A69-20948
- Fluidics in UK, discussing digital control elements and systems and transmission lines in alternating flow hydraulics
[AGARDOGRAPH-118]
08 p1257 A69-20952
- Peripheral fluidic devices for sequencing and monitoring machinery in hazardous areas, describing circuits
[AGARDOGRAPH-118]
08 p1257 A69-20954
- Fluidic control systems for angular rate and attitude stabilization flight-tested, noting good impact and acceleration resistance
[AGARDOGRAPH-118]
08 p1257 A69-20955
- Air powered fluid jet engine compressor bleed control stressing closing, reset and override operations
[ASME PAPER 69-GT-19]
09 p1571 A69-22498
- Vortex fluid devices in control systems, considering electrical, mechanical and hydraulic systems
09 p1443 A69-22740
- Active broadband vibration isolation of human subjects from severe vertical dynamic excitations experienced in low level high speed flight
[ASME PAPER 69-VIBR-65]
10 p1650 A69-24157
- Electrohydraulic vibration isolation systems with feedback, considering band and notch isolation, system stability and adjustable frequency response
[ASME PAPER 69-VIBR-40]
10 p1641 A69-24178
- Modular hydraulic power source systems for general aviation aircraft, discussing design selection, phase in and customer acceptance problems
[SAE PAPER 690329]
11 p1825 A69-24505
- Optimal parameters of hydraulic sensor of angular accelerations for given dynamic and geometrical requirements
13 p2259 A69-27432
- Fluidic control systems for industrial applications, discussing fluidic solutions to process problems
15 p2553 A69-31297
- Self contained remote sense remote control pressure regulator using pure fluid amplifiers, controlling large or small flow over wide pressure range
15 p2554 A69-31303
- Fluid controlled solid rocket motors design for Mars mission with acceleration level as parameter, discussing mission specifications, system design and component considerations
[AIAA PAPER 69-446]
16 p2841 A69-32687
- Fluidic thrust reversal control system for turbojet achieving cost and weight reduction, illustrating fluidic circuit and noting circuit reliability
17 p3018 A69-33329
- Brake system components automatic testing for pneumatic or hydraulic integrity essential to safe system performance
17 p2978 A69-33377
- Fluidic attitude control systems performance prediction from conventional control analysis emphasizing steady state positioning accuracy
17 p2904 A69-34069
- Pressure drop in control element of gas generator during readjustment of throttle in hydraulic supply line, noting assumptions
19 p3393 A69-35819
- Static and dynamic characteristics of pressure compensated oil-hydraulic flow control valves and relief valves with emphasis on linearized effects
19 p3256 A69-36713
- Fluid amplifiers for gas turbojet engines control, discussing hydraulic control and relationship between turbine rpm, fuel consumption and operating temperature
20 p3585 A69-36944
- Electrohydraulic servomechanism harmonic response showing nonlinear behavior, including jump resonance, analyzed by mathematical model and analog simulation
20 p3464 A69-36999
- Electrohydraulic servosystem to counteract atmospheric turbulence effects on B-52 global bombers, noting reduction in aircraft fatigue and structural damage
20 p3467 A69-38184
- Fluidic amplifiers development and logic applications, describing various elements and circuits
22 p3870 A69-41239
- Fluidic proportional level control and density control systems, discussing advantages of low initial and maintenance cost, long life and temperature, shock, radiation resistance, etc
22 p3870 A69-41241
- Miniature hydraulic controls with emphasis on four-way directional control valve for space and cost problems
22 p3870 A69-41243
- Fluidic servoactuator controlled by hydraulic vortex valves using mechanical signals for helicopter stability augmentation system
24 p4255 A69-42800
- Stability criteria for electrical interconnection in parallel operating valve controlled hydraulic servomotors applied to gimbaled system
24 p4256 A69-43310
- HYDRAULIC EQUIPMENT**
NT AIRCRAFT HYDRAULIC SYSTEMS
Ultrasonic quality control test methods for melt through welds in hydraulic line assemblies, noting equipment and surface roughness requirements
02 p0252 A69-11810
- Large hydraulic press forgings for light metals, discussing 50,000 ton machine used for Al alloys, tooling and die considerations
[ASM PAPER C7-5.1]
04 p0604 A69-14521
- Hydraulic press large closed die forging of various alloys and refractory materials, evaluating mechanical and metallurgical problems
[ASM PAPER C7-5.4]
04 p0604 A69-14522
- Fluid stability, viscosity, compressibility, gas solubility and lubricating properties determination for high temperature hydraulic systems
04 p0550 A69-14662
- Filtration and flow characteristics of wire cloths used in hydraulic systems described by expressions from measured properties
[ASME PAPER 68-WA/FE-39]
05 p0750 A69-16111
- Hydrostatic bearings, hydraulic drive system and hydraulic braking system for radio telescope with 2550 tons moving weight
[ASME PAPER 68-WA/PEM-2]
05 p0743 A69-16147
- Flow control valve for hydraulic motor speed regulation operated by remote pressure signal
11 p1827 A69-25646
- Hydraulic servo actuators load effect included in control loop actuator simulation
12 p2016 A69-26266
- Working fluids elastic characteristics variability effect on hydraulic actuator dynamics, studying adiabatic and isothermal conditions
14 p2405 A69-29423
- Hydraulic regenerative servoamplifier system for electrohydraulic actuator design, discussing specifications and test results
15 p2553 A69-31294
- Pressure in sealing groove and increase time due to pumping action of moving wall applied to force cylinder of translational motion, considering liquid in groove laminar
16 p2736 A69-32135
- Oscillation amplitude of rotor with hydraulic dampers on elastic supports by expanding forced vibration modes with friction in natural modes
16 p2837 A69-32136
- Turbopump weight minimization and low suction pressure requirements realized using high rotating speeds, hydraulic turbine driven upstream inducer and computer testing
[AIAA PAPER 69-552]
16 p2741 A69-32747
- Lubrication properties of mineral oils for power hydraulics using Stanhope-Shell four ball test machine
17 p2991 A69-32948
- Soviet book on hydraulic servo drive covering design and performance, static and dynamic characteristics and stability problems
18 p3093 A69-34356
- Transient performance of full flow hydraulic turbine driven two speed pump inducer system, formulating computer model
[AIAA PAPER 69-551]
18 p3140 A69-34415
- Discharge coefficient and opening time of pneumatic and hydraulic systems incorporating disks, nozzles and valves
18 p3094 A69-34981
- Forced pressure fluctuations in hydraulic systems of aircraft fuselages and engines, taking into account square law of losses at resistance points
18 p3094 A69-34991
- System engineering to select hydraulics subsystem for advanced fighter aircraft by cost effectiveness analysis, noting maintainability and reliability
19 p3254 A69-36012
- Hydraulic systems incipient failure detection, discussing destructive cavitation, component defects, human error, etc
19 p3255 A69-36018
- Hydraulic-powered self propelled six degree of freedom loading vehicle moving tests assembly to test chamber with high accuracy positioning
20 p3511 A69-38181
- Rotary actuator to create realistic control effects in hydraulic loading system of jet flight-training simulators
20 p3511 A69-38182
- Motion stability of hydraulic actuators with open loop control system in presence of nonlinear negative resistance damping
21 p3650 A69-39716
- Noise reduction research for hydraulic machines, examining piston pumps noise generating mechanism
22 p3870 A69-41238
- HYDRAULIC FLUIDS**
Hydraulic fluid cleanliness measured using microscopy, automatic particle counters and gravimetrics, discussing silting index and evaluator used by aerospace industry
19 p3256 A69-36715
- Soviet book on fluid contamination influence on aircraft hydraulic systems operational reliability covering friction, particle size, filtration, etc
21 p3649 A69-39530
- HYDRAULIC HEATING SOURCES**
U HEAT SOURCES
HYDRAULIC JETS
Water jet propulsion for air cushion vehicles, emphasizing inlet shape effect on performance and potential flow theory application to inlet design
08 p1254 A69-20115
- Mean drop size generated in vapor pressure regime of liquid water jet, noting effect of water temperature and orifice diameter
09 p1483 A69-21995
- Noncavitating and cavitating performance of low area ratio water jet pumps, analyzing efficiency, area ratio, throat length, nozzle spacing and diffuser geometry
18 p3095 A69-35176
- Water jets with greater than half sound speed created by shock wave impinging on cavity within liquid, discussing mechanism, maximum speed, shape, etc
19 p3301 A69-36815
- Forced and periodic motion of air or water jets impinging in double input vortex chamber described in terms of oscillator deriving energy from hydrodynamic instability
[ASME PAPER 69-FLCS-19]
20 p3465 A69-37981
- HYDRAULIC PUMPS**
U PUMPS
HYDRAULIC SHOCK
MHD channel mercury flow with hydraulic shock in transverse magnetic field, determining characteristic values distribution over range of principal parameters
13 p2307 A69-27499
- Liquid driver shock tubes dynamic and thermodynamic properties as functions of diaphragm pressure ratio and initial conditions
19 p3295 A69-36471
- HYDRAULIC TEST TUNNELS**
Hydraulic tank for visualizing flows around stationary models, noting absence of wall effects
[ONERA-TP-708]
17 p2956 A69-33588

HYDRAULIC VALVES

U VALVES

HYDRAULICS

Mechanical construction device for Carafoli profile in aerodynamics and hydraulics, establishing mechanism for tracing rounded and sharp trailing edges profiles

15 p2549 A69-31264

HYDRAZINE ENGINES

Fast heat-up electrothermal ammonia thruster role in development of hybrid resistojets in millipound thrust range

[AIAA PAPER 69-496] 16 p2838 A69-32649

Rocket motors using hydrazine as monopropellant, considering doping as means of using anhydrous hydrazine mixed with other products

17 p3019 A69-33340

Titian 3 transtage attitude control system hydrazine rocket engine design and performance, emphasizing problems associated with monopropellant

[AIAA PAPER 69-422] 19 p3394 A69-36300

Catalyst poisoning and hydrazine material compatibility during hydrazine propulsion systems sterilization and decontamination

21 p3786 A69-39768

Communication satellite systems using hydrazine engine thrust for trajectory correction, discussing trajectory deviations causes and ERNO engine design

[DGLR-69-013] 23 p4203 A69-42152

HYDRAZINES

NT CHLORPROMAZINE

NT METHYLHYDRAZINE

NT TETRAFLUROHYDRAZINE

Absorption coefficient of hydrazine and hydrogen peroxide determined with 2.5 angstrom bandwidth monochromator, giving results in graphical form

02 p0205 A69-11873

Hydrazine decomposition in glow discharge, analyzing emission spectra and threshold level of decomposition by gas chromatography

04 p0646 A69-14860

Liquid hydrazine ignition by nitrogen tetroxide gas based on stagnation flow principle, presenting threshold measurements

[WSCI PAPER 68-43] 06 p0983 A69-17792

Medical examinations of missile fuel handlers, noting some abnormal results in liver function tests and possible hydrazine toxicity

09 p1447 A69-22556

Vibration and absorption bands in IR spectra of diborene hydrazine stabilized by boiling in benzene

12 p2027 A69-26917

Reaction kinetics between hydrazine and esters in benzene solution at 55 C, using amides as catalytic agents

14 p2409 A69-29033

Isothiocyanates and phenyl isocyanate reaction with hydrazinoethanol and hydrazinoethyl hydrogen sulfate

16 p2747 A69-31808

Nonequilibrium initial condition combustion effects on propellant performance for hydrazine/chlorine pentafluoride and hydrogen/fluorine with equilibrium, kinetic and frozen nozzle flow

[AIAA PAPER 69-469] 16 p2832 A69-32659

Turbulent heat and mass diffusion in catalytic reactors for hydrazine decomposition, developing computer program to calculate temperature and reactant concentration distributions

[AIAA PAPER 69-421] 16 p2846 A69-32768

Aqueous hydrazine solution effect on Ti disulfide crystalline structure

23 p4112 A69-41426

Pressure effects in spontaneous ignition of interimpinging hydrazine and red fuming nitric acid (RFNA)/liquid streams in evacuated test chamber

24 p4415 A69-43667

Intermediate hydrazine-RFNA reaction product formed on injector nozzle and combustion chamber surfaces after fuel injection without ignition analyzed by various methods

24 p4365 A69-43669

HYDRIDES

NT BERYLLIUM HYDRIDES

NT BORANES

NT CARBORANES

NT CHLOROSILANES

NT DIBORANE

NT LITHIUM ALUMINUM HYDRIDES

NT LITHIUM HYDRIDES

NT METAL HYDRIDES

NT PHOSPHINES

NT SILANES

NT ZIRCONIUM HYDRIDES

Low temperature technique for preparing solid-solid diffusion sources for silicon device fabrication based on gaseous hydrides as reagents

07 p1198 A69-18619

Niobium hydride and tantalum hydride formation using metal powders, noting solid phases during dehydriding

09 p1448 A69-21599

Electrical resistivity decrease in niobium-hydrogen alloys during isothermal aging at low temperature attributed to hydride precipitation, noting reaction rate and activation energy

14 p2463 A69-29288

HYDROAEROMECHANICS

U. AERODYNAMICS

HYDROBAROPHONES

U. HYDROPHONES

HYDROBROMIC ACID

Thermal dissociation rate of HBr in Ar in 2100-4200 K temperature range by shock tube analysis, using IR emission and UV absorption

20 p3484 A69-37347

HYDROCARBON COMBUSTION

Sulfur organic compound formation effect on composition and structure of solid phase formed during hydrocarbon jet fuels oxidation

01 p0142 A69-11097

Olefins combustion studies, considering influence on hexane combustion at different oxidation stages leading to ignition

02 p0352 A69-12309

Temperature and pressure measurements in low temperature combustion of n pentane covering slow reaction and cool flame regions

02 p0353 A69-12321

Electrically controlled heat transfer between flat parallel flow hydrocarbon diffusion flame and walls of combustion chamber

02 p0353 A69-12324

Grey and very grey thermochemical tables for C-H and C-H-O species

[WSCI PAPER 68-38] 06 p0885 A69-17795

Ignition time of methane and acetylene, considering concentration and thermodynamic properties during reaction

[WSCI PAPER 68-41] 07 p1240 A69-18356

Flame front instability in air-propane mixtures established by motion picture study

08 p1421 A69-20344

UV, visible and near IR spectral characteristics of hydrocarbon-air flames with particulate Al, Mg and B, noting hot metal continuum and oxide emissions

11 p1940 A69-24483

Optical constants of soot applied to heat flux calculations, discussing soot particles concentration determination in hydrocarbon combustion products

[ASME PAPER 68-HT-13] 13 p2374 A69-27777

Transverse wave spacings for self sustaining detonations in oxygen and diluents mixtures with hydrogen, methane, acetylene or ethylene fuel, noting dilution

13 p2378 A69-28217

Steel cylinder wall materials effects on flame propagation at constant volume of propane-air mixtures

13 p2379 A69-28363

Burning velocity inhibitors effects on hydrocarbon-oxygen-nitrogen mixtures ignition temperature, reporting data on 20 additives at ambient temperature and pressure

[WSCI PAPER 69-14] 16 p2831 A69-32352

Kinetics of combustion promotion of hydrogen-hydrocarbon mixtures by active particles, free atoms and free radicals using differential equations

17 p3069 A69-33139

LF oscillations in simple combustion chamber using gaseous propane fuel, discussing association with progressive flame necking

18 p2320 A69-34837

Mono and bicyclic hydrocarbons effect on jet fuels combustion properties, considering burnup factor, deposit and smoke production levels

18 p3184 A69-35382

Perfluorocyclobutane-oxygen mixture combustion, measuring burning velocities and adiabatic equilibrium flame temperatures

21 p3852 A69-39594

Interferometric study of cool flame propagation in equimolar propane-oxygen mixtures, observing refractive index and temperature distribution changes

21 p3852 A69-39595

Laminar burning rate of premixed propane-air flames at one atmospheric pressure in DC electric fields, using cooled porous plug burned method

21 p3852 A69-39596

Major ions in chemi-ionization of hydrocarbon flames determined for heats of formation by photoionization mass spectrometer

22 p3896 A69-40727

HYDROCARBON FUELS

NT JET ENGINE FUELS

NT JP-4 JET FUEL

Hydrocarbon-air fuel cell producing electric power automatically for five days

01 p0013 A69-10965

Deposit formation in empty wing tanks due to autoxidative degradation of hydrocarbon fuel, noting results of environment simulation tests

[SAE PAPER 680733] 03 p0366 A69-13439

Electrochemical oxidation of n-octane based fuels containing aromatic, olefinic and naphthenic components

[ACS PAPER 93] 05 p0716 A69-16234

Long term electrochemical oxidation performance of n-octane based fuels containing aromatic, olefinic and naphthenic components

[ACS PAPER 94] 05 p0716 A69-16235

Combustion mixture composition dependence on electrical conductivity of products with potassium additive, discussing hydrocarbon fuels

06 p0870 A69-17908

Chemical kinetic model for hydrocarbon fuels combustion and application to multidimensional finite difference mixing analyses in hypersonic engines and nozzles

[AIAA PAPER 69-86] 06 p1037 A69-18119

Reaction kinetics package for pyrolysis and combustion of aliphatic hydrocarbon molecule, considering reaction rates definition

[WSCI PAPER 68-37] 07 p1073 A69-18353

Gas dynamics, thermodynamics, chemical properties, energy and products of hydrocarbon-air detonations in tubes under standard atmospheric conditions

[WSCI PAPER 68-26] 07 p1241 A69-18369

Flame burnout of atomized hydrocarbon fuel in gas turbine combustion chambers as function of ratio of time to total burnout time

08 p1420 A69-19999

Thin film metallic oxide catalysts for oxidation in low temperature cells using hydrogen and hydrocarbons and for oxygen reduction in acid electrolyte

16 p2738 A69-32408

Space storable regenerative cooling with FLOX/methane under conditions for small pump fed engine, describing injector and chamber design

[AIAA PAPER 69-509] 16 p2844 A69-32718

Packed bed catalytic reactors cooling capacity in promoting endothermic reactions of hydrocarbon fuels, using computerized temperature and composition profiles

[AIAA PAPER 69-588] 17 p3071 A69-33265

Benzene antidetonation properties improved by separating n-alkanes with synthetic zeolite

23 p4199 A69-42479

HYDROCARBONS

NT CYCLIC HYDROCARBONS

NT ETHANE

NT ETHYLENE

NT MESITYLENE

NT METHANE

NT NAPHTHALENE

NT PARAFFINS

NT PENTANES

NT PROPANE

NT PROPYLENE

Hydrocarbon formation mechanisms under conditions resulting from graphite filament explosions in hydrogen atmospheres, emphasizing stepwise radical formation and methane role

01 p0120 A69-10675

Gas chromatographic determination of hydrocarbon quantity in methane in parts per billion range

03 p0382 A69-14115

Flame inhibition with electron attachment observed using halogenated hydrocarbons

06 p1034 A69-17926

Ignition of binary mixtures of hydrocarbons at high and minimum ignition temperatures of components

06 p1035 A69-17935

Adsorption kinetics of hydrocarbon oxidation on platinum electrode

08 p1268 A69-21052

Molecular ion C13H line found in zeta Oph at 4232.08 Å, measuring equivalent width and finding C12/C13 ratio
09 p1603 A69-22266

Test of Velikovsky theory for dense hydrocarbon clouds and dusts surrounding Venus, using IR reflection spectra
09 p1608 A69-22566

Temperature effects on phosphorescence lifetimes and intensities of aromatic hydrocarbons in polymethyl methacrylate, estimating activation energy for thermally activated nonradiative decay mode
10 p1652 A69-23523

Interstellar molecular hydrogen and CH photodissociation, discussing molecular formation rates in interstellar medium
10 p1781 A69-23672

Viscosity-temperature chart for hydrocarbons permitting linear extrapolations into low viscosity high temperature regions
10 p1753 A69-23975

Additions of dialkyl and diaryldithiophosphates of Ba, Ca, Zn, Pb and Ni as antioxidants and corrosion inhibitors for hydrocarbons
12 p2027 A69-27091

Electrochemical oxidation of hydrocarbons on platinum electrode, discussing adsorption kinetics
16 p2740 A69-32423

Gas phase arrest peak analogy with liquid phase oxygen cut-off during final stages of hydrocarbons gaseous oxidation reactions, noting active centers
21 p3669 A69-38805

High temperature equilibria from hydrocarbon plasma sources subjected to 3000 W RF electrodeless discharge
21 p3670 A69-39738

Aromatic and nonaromatic hydrocarbon fractions in terrestrial graphite, discussing classification and analysis by chromatography and mass spectrometry
22 p3934 A69-39890

Absorption coefficient measurement for hydrocarbon gases for He-Ne laser beam at 3.39 microns, tabulating coefficients, noting variations from spectroscopic data
23 p4174 A69-42192

HYDROCHLORIC ACID

Laser with molecular H and Cl mixture at HCl vibrational transitions
14 p2461 A69-29672

Passive Q switching of chemical laser operating on vibrational-rotational line of vibrational transition of HCl
16 p2796 A69-31840

HYDROCYANIC ACID

U HYDROGEN CYANIDES

HYDRODYNAMIC EQUATIONS

NT HELMHOLTZ VORTICITY EQUATION

Hydrodynamic analysis for determining steady flow region with closed separation area for Reynolds numbers to describe viscous mixing by Prandtl equations
02 p0190 A69-12570

Hydrodynamic theory of light scattering by dilute monatomic gases generalized by using linearized Burnett equations instead of Navier-Stokes equations
03 p0466 A69-13135

Short term weather forecasts by means of hydrodynamic equations in adiabatic approximation, noting atmospheric motions and processes, adiabatic invariants and meteorological fields
03 p0459 A69-13332

Exact solutions with helical symmetry for hydromagnetic dynamo problem steady state equations
03 p0476 A69-13380

Hydrodynamic model of atmospheric circulation in equatorial region, using group invariant method
03 p0462 A69-13931

MHD generator two dimensional analysis for studying edge effect, taking into account Hall effect
03 p0480 A69-14099

Approximate hydrodynamic equations applied to analysis of heat transfer in real gas flow in tube, taking into account energy transfer by radiation
04 p0686 A69-14993

Source and sink method application to direct axisymmetric problems of hydrodynamics
05 p0747 A69-16039

Viscous hydrodynamical equations for flow field exterior to obstacle moving with constant velocity, discussing force relationships, drag invariance and integral representations
07 p1121 A69-19298

Flapper valves in high pressure hydraulic aircraft systems, with hydrodynamic equations and charts for design and performance characteristics
09 p1435 A69-21296

Normal solutions of linearized Boltzmann equation for initial and boundary conditions in hydrodynamics solved by approximation
09 p1480 A69-21667

Hydrodynamic equations and Grad transport coefficients for nonequilibrium rarefied monatomic gases developed for molecular collisions
09 p1481 A69-21888

Navier-Stokes boundary value problem bifurcation solution analysis, determining stability ranges
10 p1677 A69-22901

Existence of motions of second type in explicit self similar strong shock solutions of Euler equations when velocity is linear function of coordinate
10 p1680 A69-23789

Hydrodynamic equations and conservation laws for nonviscous fluid in postNewtonian approximation of Brans-Dicke theory applied to gaseous mass dynamic instability
10 p1789 A69-24130

Two dimensional convective flow stability for arbitrary Rayleigh numbers in horizontal layer, assuming large Prandtl number and free boundary conditions
11 p2003 A69-25657

Electrohydrodynamic equations and transfer coefficients for multicomponent plasma with volumetric charge in electric field, discussing Ohm law and equations for plasma motion
12 p2135 A69-26399

Relativistic hydrodynamic equations for charged particles interacting in external scalar and gravitational fields, considering particle motion and scalar plasma dispersion
12 p2130 A69-26462

Two beam electron flux instability in crossed magnetic and inhomogeneous electric fields using linearized hydrodynamic and Lagrangian formalism approximation
12 p2133 A69-26714

Integral equations for classical elasticity boundary value problems, stressing analogous Stokes flow hydrodynamic equations
14 p2535 A69-29361

Ocean and atmospheric interactions analyzed by using hydrodynamic equations for boundary layers
14 p2442 A69-29838

External wind shear influence on isolated cumulus cloud evolution based on hydrodynamic and thermodynamic equations numerical integration
15 p2648 A69-30644

Hydrodynamic approximation to interplanetary gas motion influenced by solar flare caused perturbations
17 p3035 A69-33627

Drift waves parametric excitation in resistive plasma derived from fluid equations, assuming plane geometry with periodic boundary conditions in magnetic field and azimuthal directions
18 p3179 A69-34440

Hydrodynamic equations of laminar plane flow of incompressible viscous fluid in rectangular region, calculating velocity field by equivalent network and integration
19 p3297 A69-35853

Numerical program for gas dynamics of hydrodynamic flow and radiation transport in diffusion and grey body approximations
19 p3450 A69-36356

Linear hydrodynamic equations describing inviscid fluid flow past thin elastic cylindrical shells in circle with motions described by shallow shell equations
21 p3834 A69-38719

Hydrodynamic equations for radial solar wind expansion linearized and specialized to treat co-rotating perturbations
22 p4003 A69-40302

Hydrodynamic equations derived from Boltzmann equation, obtaining molecular expressions for transport coefficients
23 p4151 A69-41513

Boundary value problem of hydrodynamic equations discontinuous solution stability under random perturbations, analyzing combustion and detonation models
23 p4239 A69-41961

Instability theory of baroclinic vortices in incompressible and inviscid fluid, investigating symmetric meridional motions time evolution by numerical integration of hydrodynamic equations
23 p4153 A69-42346

Energetics of planetary boundary layer /Prandtl layer/ from system of hydrodynamic equations,

discussing flux divergence term importance in free-windless convection transition region
24 p4309 A69-43148

HYDRODYNAMIC STABILITY

U FLOW STABILITY

HYDRODYNAMIC TUNNELS

U PLASMA JET WIND TUNNELS

HYDRODYNAMICS

NT ELASTOHYDRODYNAMICS

NT ELECTROHYDRODYNAMICS

NT MAGNETOHYDRODYNAMICS

Gas combustion hydrodynamic stability using feedback equation and theorems for variations in mass and momentum vector
01 p0173 A69-10087

Weather forecasting, discussing atmospheric models and computer operations for long range forecasting based on hydrodynamic theory and statistics
01 p0108 A69-10398

Immersion depth influence on hydrofoil for flow of arbitrary depth with bottom consisting of free surface or solid wall
01 p0007 A69-11132

Hydrodynamics-electrodynamics analogies for electromagnetic light
01 p0121 A69-11134

Book on theoretical hydrodynamics covering Bernoulli equation, tensor and vector methods, two dimensional fluid motion, complex variables and conformal mapping
02 p0230 A69-11812

Boundary conditions for irrotational hydrodynamic field around sphere moving along axis of cylindrical tube containing incompressible fluid calculated by least squares method
03 p0415 A69-13362

Small oscillations of viscous incompressible fluid in container with free surface under action of potential force field
04 p0587 A69-14620

Cavitation stream calculation methods for ideal incompressible fluid with free boundaries, noting cavitation generators and Riabouchinsky problems
04 p0589 A69-14994

Stability of high speed rotors with sliding bearings
04 p0607 A69-15163

Velocities, accelerations and drag forces on spheres falling along center line in viscous fluid, considering different Reynolds numbers and Stokes approximation range
05 p0788 A69-15725

NonNewtonian hydrodynamics equations for non-linearly viscous and viscoelastic media, analyzing dependence on rheological model
05 p0745 A69-15786

Fifty years of N. E. Zhukovskii Central Aerohydrodynamic Institute in U.S.S.R.
06 p1043 A69-17390

Two dimensional boundary value problem for symmetrical entry of wedge into incompressible nonviscous fluid using complex variable theory
08 p1305 A69-20995

Characteristics of dynamic mechanical systems including solid state and hydrodynamic analogs of ideal incompressible fluids, based on statistical theory of turbulence
10 p1678 A69-23209

Stroboscopic generator of trains of high brightness light flashes for hydrodynamic and gas dynamic research, noting electronic control and thyratron circuits
11 p1879 A69-24235

Blasius-Chaplygin formula for generalizing Kutta-Joukowski theorem concerning jet profiles, calculating resultant of hydrodynamic forces
11 p1867 A69-24355

Hydrodynamic effects in flame spreading, ignitability and steady burning of liquid fuels, using analogy of films floating on water
11 p1999 A69-24484

Dynamics of turbulent motion of incompressible viscous fluid particles, using Lagrangian functions
11 p1867 A69-24536

Hydrodynamic calculation of 1.42 solar mass white dwarf supernova, considering instability and collapse initiation by electron capture
12 p2156 A69-26210

Aerodynamic considerations of high speed hydrodynamics for underwater craft, noting rocket propulsion
13 p2245 A69-27418

LF spectral analysis of flowing water pressure pulsations behind single bulge on hydrodynamic channel smooth wall at low disturbance level
13 p2246 A69-27535

LF spectrum analysis of hydrodynamic flow near-wall pressure pulsations over rough surfaced wall
13 p2246 A69-27537

Hydrodynamics of large scale atmospheric circulation, analyzing interactions between different scales and between atmosphere and underlying surface
13 p2253 A69-27849

Electric arc structure in hydrogen magnetic annular discharge computed using nonequilibrium hydrodynamics to analyze supersonic and subsonic processes
13 p2312 A69-28221

Nonlinear equations for motion of rigid body with cavity partially filled with ideally incompressible liquid
14 p2432 A69-29626

Hydrodynamic theory of climate and atmospheric circulation, emphasizing numerical experiments role in studying large scale processes
14 p2476 A69-29819

Convective heat and mass transfer coupling in laminar hydrodynamic duct flow, obtaining values for bulk and wall temperatures, transfer coefficients and rates, etc
15 p2716 A69-30004

Leakage in mechanical face seals with hydrodynamic films, noting misaligned seal theories for pumping with cavities and two fluids
[ASLE FICFS PREPRINT 19]
15 p2621 A69-30497

Nova outburst dynamics investigation by time dependent hydrodynamics computer program including energy transport by radiation and convection
15 p2692 A69-30769

Hydrogen oxygen rocket engine two phase liquid hydrogen pump capability and hydrodynamic design, analyzing constant-quality flow, acoustic effects, compressible flow and cavitation
[AIAA PAPER 69-549]
16 p2845 A69-32759

Planetary zonal flows hydrodynamic instability characteristics analysis, using quasi-geostrophic numerical model to study earth atmospheric cyclone wave role
17 p2960 A69-33149

Elastic circular cylindrical panel behavior in fluid with acoustic shock wave, allowing for propagation waviness of elastic stresses
18 p3216 A69-34579

Hydrodynamic noise as pseudosound field resulting from pressure variations in turbulent fluid flow, using Lighthill acoustic analogy
18 p3123 A69-34921

Ionization effects in hydrodynamic model of radiation driven breakdown wave propagation, obtaining wave velocity and absorbed laser flux density relationship
18 p3174 A69-35286

Hydrodynamic stability of incompressible fluid boundary layer flow during blowing or suction through porous surface, determining Reynolds number lower bounds
18 p3124 A69-35381

Hydrodynamic vertical or horizontal impact of sphere immersed in ideal heavy liquid of finite depth, considering container floor effect, surface pressure distribution, etc
19 p3299 A69-36393

Book on continuum mechanics and hydrodynamics covering elasticity, plasticity, thermodynamics, solid and structural mechanics, aerodynamics and gas dynamics
19 p3441 A69-36771

Group properties of adiabatic motion equations of medium in relativistic hydrodynamics, including solutions of subgroups applicable to multiple particle production
19 p3301 A69-36843

Plasma flow structure near frontal point in earth magnetosphere, using quasi-hydrodynamic two dimensional model to obtain power series solution
20 p3594 A69-37019

Hydrodynamics of turbulent gas flow through powder layer for vapor phase coating of particles, noting fluidized bed
20 p3548 A69-37363

Plasma oscillations of electrons of atomic system, using simple hydrodynamic model
20 p3580 A69-37818

Computation method of hydrodynamic blade cascade for compressible fluid and variable channel width by stream function
20 p3460 A69-37972

LF spectral analysis of flowing water pressure pulsations behind single bulge on hydrodynamic channel smooth wall at low disturbance level
20 p3518 A69-38202

LF spectrum analysis of hydrodynamic flow near-wall pressure pulsations over rough surfaced wall
20 p3518 A69-38203

Schlieren framing photography used for studying shock wave hydrodynamic structure and ignition dynamics during expansion into detonable gas region
21 p3849 A69-38803

Hydraulic resistance of pipes with flow vorticity produced by helical swirlers
21 p3695 A69-38862

Soviet book on hydrodynamic cascade theory covering mathematical methods and numerical solutions for ideal fluid flow problems
21 p3696 A69-39527

Soviet book on earth atmosphere fluctuations covering propagation of acoustic, gravity and gyroscopic waves using linearized equations of hydrodynamics
21 p3717 A69-39528

Hydrodynamic turbulence in statistical prediction for Burger equation, considering statistical inference problem for initial conditions and prediction criterion with estimable error
21 p3697 A69-39673

Book on porous bodies hydrodynamics covering motion equations for free, filtration, perfect and Newtonian fluids
23 p4150 A69-41501

Numerical integration of double integral with Cauchy type singularity for calculation of aerodynamic or hydrodynamic load on lifting body
23 p4182 A69-41913

HYDROELASTICITY

Hydrofoil vehicle flutter investigations including simple foils and struts, geometrical parameters, finite span, cavitation, etc
09 p1614 A69-21898

HYDROFLUORIC ACID

Hydrogen fluoride corrosive effects in cryogenic propellant, emphasizing contamination by particulate matter from corrosion products
21 p3783 A69-39486

Reaction zone following overdriven detonation wave propagating into mixtures of fluorine oxide and hydrogen molecules showing HF laser emission
22 p4052 A69-41188

Hydrogen fluoride chemical laser emission spectrum, studying rotational-vibrational transition of molecules triggered optically or electrically
23 p4172 A69-41493

HYDROFOIL CRAFT

Hydrofoil vehicle flutter investigations including simple foils and struts, geometrical parameters, finite span, cavitation, etc
09 p1614 A69-21898

HRV-1 navy research pusher amphibian aircraft, discussing hydrofoils and operational problems
10 p1633 A69-23223

Hydrofoils fully submerged in seawater at up to 140 knots and constant Froude number, discussing foils lift/drag ratios as function of speed and submergence
11 p1871 A69-25122

HYDROFOIL OSCILLATIONS

Hydrofoil vehicle flutter investigations including simple foils and struts, geometrical parameters, finite span, cavitation, etc
09 p1614 A69-21898

HYDROFOILS

Immersion depth influence on hydrofoil for flow of arbitrary depth with bottom consisting of free surface or solid wall
01 p0007 A69-11132

Hydrofoils fully submerged in seawater at up to 140 knots and constant Froude number, discussing foils lift/drag ratios as function of speed and submergence
11 p1871 A69-25122

Supercavitating flow past thin hydrofoils, determining flow velocity or acceleration potential near free surface
22 p3933 A69-41023

HYDROFORMING

Hydroextrusion effect on Mo structure and mechanical properties, noting improved ductility after high temperature annealing
02 p0267 A69-12189

HYDROGEN

NT DEUTERIUM
NT DEUTERIUM PLASMA
NT LIQUID HYDROGEN
NT ORTHO HYDROGEN
NT PARA HYDROGEN
NT TRITIUM

High pressure hydrogen environment on tensile properties of stainless steel with and without strain induced martensite
01 p0093 A69-10062

Fine structure of vibrational spectra of molecular H and O, water and deuterium oxide, using molecular photoelectron spectrometer
01 p0023 A69-10141

Neutral hydrogen content in directions of pulsars related to distance estimates
01 p0149 A69-10271

Pressure and temperature dependence of slow crack growth in hardened steel in gaseous hydrogen environment
01 p0096 A69-10612

Hydrocarbon formation mechanisms under conditions resulting from graphite filament explosions in hydrogen atmospheres, emphasizing stepwise radical formation and methane role
01 p0120 A69-10675

Gas content and impurities in aluminum melts, analyzing oxides and hydrogen interactions
01 p0098 A69-10958

Multiple velocity dispersion in normal hydrogen and normal hydrogen-helium mixtures at room temperature using ultrasonic interferometer
01 p0121 A69-11284

Welding procedure for avoiding hydrogen cracking in high strength steels, stressing hydrogen escape from weld deposits
01 p0088 A69-11398

Multiphoton ionization of molecular hydrogen and rare gases using Q switched Nd laser apparatus
02 p0283 A69-11701

Explosion limits in hydrogen-oxygen reaction measured in diffusion regime, giving rate constant of branching step
02 p0353 A69-12319

Reactions kinetics contribution to nonequilibrium recombination occurring in supersonic nozzle flow of combustion products of hydrogen in air
02 p0353 A69-12488

Combustion and flame stabilization in axisymmetric laminar or turbulent H flows, noting combustion rates and flame breakdown conditions
02 p0355 A69-12673

Hydrogen spectral line broadening under combined action of ions and electrons, tabulating values for calculation of absorption coefficient
04 p0651 A69-14373

Methods of protecting industrial steel against hydrogen corrosion at high temperatures and pressures including cladding, carbon additions, surface film coating, etc
04 p0613 A69-14432

BCS theory application to metallic modification of hydrogen for obtaining high temperature superconductor
04 p0642 A69-14680

Submillimeter water vapor laser power output for admixtures of H, N, carbon dioxide, methane, He and Ar, noting buffer effect of H
04 p0612 A69-15175

Hydrogen effect on interatomic bonds of Ti beta alloy and Young modulus, noting measurements at various temperatures
04 p0618 A69-15178

Diminished RF intensity of neutral hydrogen line near radio source W 49 due to diminished kinetic temperature of gas
04 p0662 A69-15253

Hydrogen adaptation effect on fluorescence of normal and Mn deficient algae, noting system II photosynthesis
04 p0554 A69-15325

Hydrogen molecular action in vacuum UV region during high current discharge
05 p0771 A69-15814

Explosive combustion of hydrogen at high pressures, showing attainment of constant value of hydrogen peroxide
05 p0849 A69-16615

Dissociation of hydrogen on tantalum using modulated molecular beam mass spectrometry
06 p0960 A69-17107

Natural orbital expansion coefficients of LCAO-MO-SCF-CI wave functions for ground state of H molecule
06 p0960 A69-17112

Chemisorption of H onto Nb (110) surface, measuring low energy electron diffraction and inelastic electron scattering from clean and H-covered surfaces
06 p0980 A69-17758

Absorption oscillator strengths for rotational lines in Lyman transition vibrational bands of molecular

hydrogen from equivalent widths measured photoelectrically 06 p0962 A69-17818

Angular dependence of low energy electron impact excitation cross section of lowest molecular hydrogen triplet states 06 p0962 A69-17820

Pulsar distance estimates based on evaluation of galactic H absorption of 21 cm radiation 06 p1012 A69-18225

Solar supergranules and hydrogen convection zone analysis based on polytropic atmosphere convection physics 07 p1211 A69-18408

Hydrogen molecule spectroscopy in vicinity of ionization limit, determining absorption and ionization cross sections and fluorescence 07 p1184 A69-18490

Hydride, cold, irreversible and reversible hydrogen brittleness in titanium and titanium alloys 07 p1162 A69-18772

Hydrogen absorption coefficients, giving number densities in hydrogen gas or plasma for wide range of temperature and pressure 07 p1184 A69-19165

Early phase of Stromgren sphere development in interstellar molecular hydrogen cloud, analyzing R-type dissociation-ionization fronts using quasi-steady flow 07 p1218 A69-19281

Cooling requirements for high speed polytetrafluorethylene lubricated ball bearings operating in cold hydrogen gas, developing minimum gas flow rate equation [ASLE PAPER 68-LC-2] 07 p1141 A69-19310

Depolarized Rayleigh line widths measured for carbon dioxide, nitrogen and hydrogen, using measurements to calculate reorientation cross sections [IEEE PAPER B-11] 07 p1157 A69-19485

Hydrogen concentration above earth surface during minimum solar activity from ionospheric rocket and satellite measurements 07 p1129 A69-19612

High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection [ASM PAPER D8-14.1] 07 p1143 A69-19666

Tensile strength of alloys under high pressure of hydrogen and helium, discussing embrittlement [ASM PAPER D8-14.2] 07 p1169 A69-19667

Neutral hydrogen distribution and dynamics in galaxies, discussing observations by spectrographic transit telescope, data processing and profiles 07 p1224 A69-19711

Radiative cooling layer behind shock front from neutral interstellar hydrogen cloud collision at Mach 20, discussing molecular hydrogen abundance during cooling 08 p1381 A69-19796

Detonation wave propagation in H-O mixtures in supersonic flow, noting detonation front structure and velocity 08 p1420 A69-19882

Polarization of Lyman alpha radiation in hydrogen rare gas collisions calculated in Born and distortion approximations including rotational coupling 08 p1355 A69-20207

Hydrogen solubility in solid and liquid phases of nickel-molybdenum and nickel-tungsten alloys at high temperatures 08 p1333 A69-20448

Low latitudes observations of 21 cm line of H I in galactic center direction, giving contours maps of brightness temperature 08 p1392 A69-20562

Neutral hydrogen asymmetry in Galaxy M101 as evidence for tidal effects due to nearby companions, noting hydrogen emission spectra 08 p1394 A69-20625

Pulsar distance estimates, discussing effect of interstellar electron and H densities and temperature dependence of H density-electron density ratio within disk 08 p1397 A69-20698

Optical depth determination in absorption lines of interstellar neutral hydrogen clouds by spectral observation of variable intensity radio sources 08 p1398 A69-20774

Inelastic transport cross sections for Lyman alpha transitions in hydrogen 08 p1357 A69-20814

Carbon dioxide bending mode deactivation by orthohydrogen, parahydrogen and deuterium through rotational transitions 08 p1358 A69-21010

Segmented anode, carbon dioxide-hydrogen performance and hollow cathode erosion tests on low power MPD arc thruster, noting current measurements [AIAA PAPER 69-242] 09 p1563 A69-21236

Tables of effective electron cross sections and macroscopic coefficients, Volume 1, covering hydrogen and rare gas molecular and atomic interactions with electrons 09 p1541 A69-21579

Metals hydrogen embrittlement theory, discussing role of dynamic strain aging hypothesis in overcoming theory defects 09 p1523 A69-21849

Neutral hydrogen content and distribution of late type spiral galaxy NGC 6946 from 21 cm line measurements 09 p1598 A69-22187

Molecular hydrogen in Orion dark cloud from observed faint emission 09 p1599 A69-22191

High level hydrogen populations in gaseous nebulae, noting electron density range and temperature effect 09 p1604 A69-22406

Hydrogen diffusion flames stabilization by flame holders in supersonic flow at low stagnation temperature, measuring burning limits [DVL-815] 09 p1624 A69-22615

D type dissociation ionization front structure and associated shock fronts using quasi-steady flow approximation for Stromgren sphere development in interstellar molecular hydrogen cloud 10 p1772 A69-22858

Nb H alloys embrittlement, discussing hydride formation and resistance variation with temperature 10 p1707 A69-22989

Solid hydrogen mantle condensation accounting for lack of detectable alpha hydrogen in star clusters and OB associations 10 p1776 A69-23214

Solid hydrogen condensation on graphite grains for microwave background, discussing hydrogen grain promotion of galactic and stellar formation 10 p1776 A69-23216

Pulsed glow discharges in He and He-H mixtures for high current density, noting electric field and wall potential distributions 10 p1739 A69-23660

Interstellar molecular hydrogen and CH photodissociation, discussing molecular formation rates in interstellar medium 10 p1781 A69-23672

Magnetic fields in interstellar neutral hydrogen clouds in direction of radio source Cassiopeia A, noting field amplification 10 p1785 A69-24096

High velocity neutral hydrogen cloud formation by cold condensations in hot corona, ejection from galactic nucleus, extragalactic objects and supernova envelopes 11 p1954 A69-24364

Intergalactic gas temperature and density reevaluated, considering neutral hydrogen distribution in galaxies peripheries and metagalactic background of ionizing UV radiation 11 p1946 A69-24589

Hydrogen effect on temperature dependence of tensile strength and stress rupture strength of Ti alloys, considering annealing, quenching and aging 11 p1905 A69-24962

Hydrogen solubility in solid and liquid Ti close to melting point, showing no effect on welds and castings porosity 11 p1905 A69-24963

Molecular state of hydrogen gas in high density condensations in H II regions, discussing effects of nearby stars 11 p1963 A69-25258

Electrolytic hydrogen evolution reaction on Al covered by thin oxide in aqueous buffered acetate solutions 11 p1832 A69-25674

Hydrogen viscosity temperature dependence at constant density below room temperature 11 p2003 A69-25704

Correlation of stellar surface density distribution of young stars and neutral hydrogen gas in Small Magellanic Cloud 12 p2152 A69-25802

Pulsar distances estimated from neutral hydrogen absorption, using observations from 140 ft telescope 12 p2156 A69-26224

Nonmesonic to mesonic decay ratio estimated for delta hydrogen hyperfragments 12 p2133 A69-26298

Hydrogen embrittlement of stainless steel and effects on mechanical properties, discussing martensitic phase role 12 p2115 A69-26616

Velocity distribution and density of neutral hydrogen in southern portions of M 31 and Sc-type galaxy M 33 by 75 m radio telescope 12 p2166 A69-27038

Electric arc and hydrogen flow interaction at high pressure, showing radiation role in heat exchange 13 p2305 A69-27387

Linear oscillation modes of premain sequence star model of pure hydrogen composition with variable specific heats ratio, discussing dynamic instability of polytropes 13 p2336 A69-27449

Stellar atmosphere models of pure hydrogen in hydrostatic, radiative and statistical equilibrium, including Lyman-alpha and continua, discussing nonLTE deviations 13 p2338 A69-27560

Nuclear energized pulsational instability of stars based on linear quasi-adiabatic theory, including models with hydrogen burning shells 13 p2340 A69-27576

Hayashi effect modifications due to high opacity stellar atmosphere or presence of molecular hydrogen dissociation zone, discussing pressure dissociation role 13 p2342 A69-27594

Astronomical maps of integrated hydrogen density, dispersion and velocity of high galactic latitude neutral hydrogen concentration, discussing kinetic temperature 13 p2347 A69-27718

Neutral hydrogen cloud observed at high galactic latitude, discussing top intensity velocity, peak intensity dispersion, age, hydrogen mass and density 13 p2347 A69-27719

Charge transfer and vibrational excitations in hydrogen molecular ion-hydrogen gas collisions 13 p2302 A69-28196

Electric arc structure in hydrogen magnetic annular discharge computed using nonequilibrium hydrodynamics to analyze supersonic and subsonic processes 13 p2312 A69-28221

Air-hydrogen supersonic mixing and combustion, characterizing hot hydrogen jet discharging into supersonic concentric air stream at atmospheric pressure [AIAA PAPER 69-339] 13 p2378 A69-28275

Ionization of rare gases /H and N/ by nitrogen ions, determining cross sections of formation of slow ions and electrons 13 p2304 A69-28440

HNO role in hydrogen-NO reaction rate data reexamined by numerical integration of governing differential equations 13 p2218 A69-28457

Molecular hydrogen electron scattering, optical refractivity and molecular anisotropy used to construct model dipole spectrum consistent with oscillator strength rules 14 p2488 A69-29094

Emissivity of two photons decay from metastable 2s level of pure hydrogen gaseous nebula, noting radiative and collisional excitation 14 p2529 A69-29975

HO2 radical detection in rarefied H flame produced by HF discharges, recording high amplitude signals 15 p2716 A69-30054

Hydrogen Lyman alpha nightglow models, discussing solar photon scattering in geocorona and hydrogen vertical distribution 15 p2595 A69-30191

Hydrogen gas role in galaxy formation, estimating quantity needed to dissipate gas cloud contraction energy, discussing formation mechanics of molecular hydrogen 15 p2680 A69-30204

Diatomic hydrogen abundance evolution in uniform medium, discussing photodissociation effects and galactic evolution 15 p2680 A69-30205

Simulation of two phase hydrogen venting to space environment, discussing thrust effect measurements, flow instabilities and instrumentation 15 p2701 A69-30396

Spin temperature of interstellar neutral hydrogen calculated from 21 cm absorption spectra line profiles 15 p2681 A69-30411

Excited hydrogen radio lines observations, analyzing neutral and excited hydrogen distribution in galaxies 15 p2682 A69-30502

Nova thermal explosion, analyzing hydrogen combustion after penetration from white dwarf shell into degenerate core

15 p2682 A69-30507

Neutral hydrogen in dark dust clouds in 21 cm line, showing hydrogen excesses and deficiencies

15 p2691 A69-30763

Pure hydrogen stellar atmosphere nonLTE models, calculating surface temperature rise due to H alpha line effect on continuum energy balance

15 p2693 A69-30777

Molecular dissociation by line radiation absorption, applying results to hydrogen molecules in H I region dissociated by photons of mean interstellar UV radiation field

15 p2693 A69-30783

Neutral hydrogen high velocity clouds as possible extragalactic objects in Local Group not contracted to galactic dimensions or densities

15 p2694 A69-30785

Atomic H Lyman-alpha interstellar absorption line in theta Orionis spectrum, showing equivalent width relations to H column density and spin temperature

15 p2695 A69-30890

H beta line for measuring radial temperature distribution in cylindrical hydrogen arc at one atm and to 150 A current in high temperature range

15 p2671 A69-31101

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for vibrational levels using potential energy function, Part I

15 p2656 A69-31156

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for vibrational levels using potential energy function, Part II

15 p2656 A69-31157

Photoionizing effect of hydrogen and helium UV glow in nighttime ionosphere compared with ground based IF ionosonde and sounding rocket observations

15 p2605 A69-31436

Balmer alpha emission for abundance and distribution of hydrogen around earth, relating temporal variations to azimuth

15 p2700 A69-31437

Finite difference method for turbulent mixing and combustion of hydrogen injected parallel to supersonic air stream, considering vitiated and unvitiated air [AIAA PAPER 69-539]

16 p2877 A69-31844

Additives effect on flame propagation velocity and stability in N diluted hydrogen-chlorine propellants, noting entrained air role [WSCI PAPER 69-13]

16 p2831 A69-32353

Frequency distribution of star masses formed from solid H grains clouds, noting agreement with Salpeter initial mass function

16 p2862 A69-32372

Star formation in interstellar solid hydrogen clouds originating from cellular pressure created by hydrogen condensation onto interstellar grains

16 p2862 A69-32375

Prebreakdown currents measurement in H and N for deducing ionization coefficients via Townsend and Lucas equations respectively, noting validity by digital computer technique

16 p2815 A69-32574

Ozone concentration photochemistry between 30-35 km, determining parameters in Hampson theory /hydrogen-oxygen atmosphere/

16 p2787 A69-32636

Hydrogen effects on ELI Ti-Al-Sn alloy, conducting tensile, fretting and abrasion tests on stressed and thermal cycled specimens [AIAA PAPER 69-585]

16 p2803 A69-32760

Laboratory plasma produced by electromagnetically generated shock front propagation through unionized hydrogen [AIAA PAPER 69-693]

17 p2945 A69-33447

Radio wave absorption in interstellar H I regions, considering mean absorption coefficient dependence on height above galactic plane, evaluating planar electron density

17 p3034 A69-33608

Interstellar neutral hydrogen in mean galactic latitudes noting two different component types

17 p3039 A69-33766

Perturbation procedures applied to energy computation for ground and first excited state of hydrogen molecule at large separation

17 p3009 A69-34170

Quasars and intergalactic hydrogen density, using Schmidt law of increase in number density of quasars to construct plausible models

18 p3190 A69-34288

Zeeman effect measurement revealing magnetic fields in interstellar neutral H clouds

18 p3190 A69-34291

Submillimeter water vapor laser power output for admixtures of H, N, carbon dioxide, methane, He and Ar, noting buffer effect of H

18 p3152 A69-34717

Balmer alpha and Lyman beta intensities for multiple scattering calculated for hydrogen geocorona models by radiative transfer equations, discussing radiation transport through earth hydrogen atoms

18 p3128 A69-34943

N-type In-doped ZnSb with melt under H-gas preparation and properties

18 p3183 A69-35268

Hydrogen effect on embrittlement of Cr-Ni stainless steel from viewpoint of corrosion cracking, using reverse bending apparatus

19 p3358 A69-35774

Forbidden transitions in diatomic molecules with nonzero spin and zero orbital angular momentum, stressing application in outer planets and M stars hydrogen spectra

19 p3421 A69-36213

Spectral lines due to magnetic dipole transitions in fine structure levels in collisionally excited neutral H clouds, discussing theoretical difficulties in interpretation

19 p3379 A69-36225

Hydrogen jet structure ejected into vacuum from Laval nozzle at supersonic velocity, considering separation point from diffuser wall

19 p3240 A69-36601

Moisture and hydrogen role in hot chloride salt stress corrosion cracking of Ti alloys by radiotracer technique and mass spectrography

19 p3352 A69-36904

Thermal energy rate constants of ion-molecule reactions in gaseous hydrogen, deuterium and HD, using ion cyclotron resonance method

20 p3578 A69-36934

Reactivity of hydrogen with surface of Ti-Al-V alloy under fatigue cycling at ambient and cryogenic temperatures

20 p3557 A69-36960

Pulsar distance determined by electron content in line of sight to pulsar compared with neutral H amount integrated through galaxy in pulsar direction

20 p3597 A69-37409

Normal ionizing shock waves in H, analyzing shock velocities as function of drive magnetic field using Chapman-Jouguet hypothesis

21 p3691 A69-38332

Upper atmospheric H and He observations, showing Lyman alpha, H alpha measurements and H abundance values relative to Kockarts-Nicolet model

21 p3714 A69-38529

Inconel and aluminum tested in pressurized hydrogen at room temperature, using surface flawed fracture toughness specimens and preflawed pressure vessels

21 p3730 A69-38666

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for each electronic state by numerical solutions of radial Schroedinger equation

21 p3774 A69-38758

Hot salt stress corrosion of Ti alloy, discussing hydrogen generation during elevated temperature exposure and embrittlement as manifestation of strain rate

21 p3747 A69-39434

Galactic hydrogen distribution, discussing velocity field, spiral structure, symmetry, layer shape, ionization, spectra, etc

21 p3810 A69-39503

Hydrogen high level transition probabilities formula, giving two tables of oscillator strengths [AFRL-69-0301]

22 p3983 A69-40149

Absolute thermal conductivity measurements on fluid normal H and fluid parahydrogen, noting apparatus and data graphical presentation along isotherms, isochores and isobars [NAS-NRC PAPER D-1]

22 p3998 A69-40631

Cold neutral H cloud existence in Galaxy from measurements of 21 cm line spectra

22 p4025 A69-40644

Spectroscopic analysis of nebula NGC 6302 for identification as highly excited gaseous nebula, noting He-H ratio

22 p4026 A69-40647

Hydrogen-hydrogen excitation collisions by impact parameter treatment, investigating rotation coupling influence in four state cross sections approximation

22 p3987 A69-41007

Absorption features of 21 cm neutral hydrogen line in part of Cygnus X and of W 49, showing equal velocity contour diagrams from right ascension scans

22 p4034 A69-41200

Hydrogen permeability in Pd alpha phase measured, coupling with grain size measurements for grain boundary to bulk diffusivity ratio

23 p4175 A69-41502

Hydrogen-air reaction kinetics analyzed using standing wave normal shock noting wall effects, ignition delay and recombination [AIAA PAPER 67-479]

23 p4239 A69-41893

H concentration and pore formation in Ti fusion welds

24 p4319 A69-42885

Order-disorder transitions in solid hydrogen, discussing model to explain molecular rotation angular momentum operator fluctuations

24 p4350 A69-43119

Primordial hydrogen and helium concentration in Pesyanoe meteorite measured by gas chromatography, indicating solar wind injection source

24 p4384 A69-43213

Mixing spread of hydrogen plumes and air pollutants exhausted into open atmosphere, predicting subsonic free round jets air entrainment

24 p4300 A69-43257

Performance curves of cylindrical water heat pipe for performance map, observing free hydrogen accumulation [ASME PAPER 69-HT-15]

24 p4413 A69-43554

Low Reynolds number unsteady wake flows, using hydrogen bubble flow visualization in high concentration glycerine mixtures

24 p4298 A69-43691

Formation mechanism of positive ethyl ion and hydrogen molecule during interaction between positive methyl ion and methane molecule

24 p4280 A69-43814

HYDROGEN ATOMS

Resonance theory of thermomolecular recombination kinetics applied to hydrogen atoms

01 p0122 A69-10034

Ionization cross sections of excited states of hydrogen atoms and hydrogenoids calculated by Monte Carlo method

01 p0122 A69-10040

Partial maser effect in recombination lines of hydrogen atoms in nebular plasma due to overpopulation of energy levels at thermodynamic equilibrium

01 p0148 A69-10042

Shock front structure in radiative relaxation region in atomic H, calculating Lyman continuum effects

01 p0122 A69-10125

Statistical equilibrium equations solution for thermodynamic equilibrium variations of populations of very high energy levels in hydrogen and complex atoms

01 p0150 A69-10395

Electron impact excitation of Lyman alpha emission from 2p state of atomic H, noting discrepancy below 50 Mev

02 p0283 A69-12466

Excited atomic H state radiative mean life measurements using beam-foil excitation method

03 p0469 A69-12920

Free excited H atom Lyman alpha radiation intensity study using beam-foil excitation method

03 p0471 A69-13167

Solar hydrogen Lyman alpha line profile measurement by rocket-borne spectrograph, obtaining flux available for scattering by atomic hydrogen in geocorona

05 p0815 A69-16254

Two cavity large storage box atomic hydrogen maser, obtaining self excited oscillations coupled with high gain amplifier [IEEE PAPER C-8]

05 p0774 A69-16310

Electron impact ionization cross sections for second quantum level of atomic H, using Born exchange approximation and Vainshtein approximation

06 p0961 A69-17138

Diffusion coefficients of H atoms in mixtures of He and Ar with hydrogen by catalytic sink technique, discussing rigid sphere collision diameters

07 p1185 A69-19300

Perturbation methods for exchange and Coulomb energy of hydrogen molecule, calculating Hamiltonian by wave function

07 p1186 A69-19446

Dissociation-ionization fronts in interstellar molecular hydrogen clouds, analyzing effects of UV radiation from early stars

07 p1221 A69-19584

Monte Carlo method for calculating atomic hydrogen escape rate from carbon dioxide atmosphere, considering Mars and Venus atmospheres
08 p1386 A69-20076

Wing of solar line H-alpha for levels population of hydrogen atom in solar photosphere, discussing excitation temperature, absorption coefficient and thermodynamic equilibrium
08 p1390 A69-20394

Hydrogenic atoms ionization by high energy electrons, discussing cross sections for ejected electrons and total energy
08 p1356 A69-20738

Debye potential for effective interaction between electron and proton of hydrogen atom in partially ionized plasma
08 p1365 A69-20746

Oscillator forces and photoionization and photorecombination cross sections of electron transitions in hydrogen atom, considering approximation for total radiation probability
09 p1588 A69-21365

Steady state operation of atomic hydrogen maser by analogy with electronic circuits, calculating atomic magnetic susceptibility using density matrix and deriving equivalent circuits
09 p1517 A69-22093

Neutral atomic H content of small angular diameter galaxies, noting systematic radial velocities and total mass of galaxies
10 p1773 A69-22956

Primary processes leading to atomic and molecular hydrogen formation in hydrogen peroxide photolysis at 1236 Å, noting OH formation
10 p1652 A69-23527

Ionized gas flow from globule containing atomic H in interstellar space, noting surrounding H II region and radiation at ionization front
10 p1782 A69-23682

Direct Coulomb interaction matrix elements between hydrogen atoms in ground states calculated, presenting interaction potential
11 p1921 A69-24416

Equilibrium between H and OH radicals in turbulent H flames, noting component concentrations in H-O-N flames of different composition
11 p1999 A69-24487

D/H ratio in Venus exosphere, discussing isotopic fractionation mechanisms and Lyman alpha data from Mariner 5
11 p1962 A69-25145

Color excess and 21 cm line intensity of RR Lyrae stars at high latitudes, confirming correlation between dust and atomic hydrogen
12 p2063 A69-25808

Double focalization in atomic hydrogen maser by hexapolar magnets selecting hyperfine energy transitions
12 p2105 A69-26050

Average ionization cross sections of atomic and molecular H and He beams ionized by plasma electrons with Maxwellian velocity distribution
12 p2138 A69-26542

Spectral line formation in nonlinear multilevel atom line transfer problems, considering radiation transfer through plane parallel atmospheres of H and Mg atoms
12 p2133 A69-26967

Negative charge production by H atoms collisions with rare gases and hydrogen, noting smooth rise of cross section with energy for rare gases
13 p2302 A69-27459

Hydrogen atoms in interstellar grains as source of stellar flux absorption, noting crystal environment effect on atomic hydrogen Lyman alpha transition
13 p2337 A69-27518

Atomic hydrogen vertical profiles with increased high-low altitude ratio for interpreting observations of thermospheric and exospheric hydrogen abundance
14 p2440 A69-29130

Solar wind and solar breeze theories distinguished, discussing applications to geocoronal hydrogen emission and solar corona expansion
15 p2676 A69-30858

Resonances in elastic cross section for electron/hydrogen atom scattering noting wide structure
15 p2657 A69-31265

Atmospheric hydrogen and helium atoms emission in geomagnetic poles and winter hemisphere, comparing thermal dissipation and migration of light atoms
15 p2599 A69-31322

UV OGO observations of atomic hydrogen and oxygen in airglow, comparing results to exospheric models of hydrogen geocorona
15 p2603 A69-31400

Photoinduced shock processes involving metastable hydrogen atoms and molecules, discussing vibrational and rotational levels
16 p2813 A69-31754

Density ratios of H ions to H atoms in ground state calculated as function of quasi-neutral plasma electron density
16 p2820 A69-31770

Stripping and low-energy collisions of H atoms on O and N molecules, showing target ionization to projectile stripping ratio dependence on ionization potential
16 p2814 A69-31773

Sky brightness temperature spectra searched for neutral intergalactic atomic hydrogen radio emission, using horn-reflector antenna
18 p3190 A69-34285

Oscillator forces and photoionization and photorecombination cross sections of electron transitions in hydrogen atom, considering approximation for total radiation probability
18 p3197 A69-34755

Hydrogen bulge above springtime pole indicated by Lyman alpha radiation in earth geocorona, discussing hydrogen horizontal transport and hydrogen compounds dissociation as causes
18 p3129 A69-34956

Hydrogen atom excess charge creating universal repulsive force in analyzing cosmological gravitational contraction in terms of Newtonian mechanics
18 p3206 A69-35469

Atomic H ionization by proton impact analyzed to calculate ejected electrons angular and energy distributions by extending Rudge and Seaton theory
19 p3375 A69-35911

High velocity interstellar gas in H I and H II regions, emphasizing observations of neutral atomic hydrogen in and far from galactic plane
19 p3402 A69-35962

Photodissociation of diatomic hydrogen by solar radiation for Venus atmosphere investigation, considering H atoms production rate by Stecher-Williams process
20 p3609 A69-38102

Universal hydrogen distribution, discussing atomic hydrogen needed to close universe
20 p3610 A69-38140

Thermodynamic properties of hydrogen atoms, protons and electrons, using canonical group analysis to determine bound and free states
21 p3850 A69-38964

Primary H nuclei flux and spectrum near geomagnetic equator, discussing emulsion stack exposure
22 p4005 A69-40520

Projected surface density upper limit of neutral atomic H between M31 and M33 galaxies, noting brightness temperature between NGC 4631 and 4656
22 p4024 A69-40578

Quasars observation failure for red shifts beyond z suggested due to absorption of intergalactic neutral H
22 p4024 A69-40582

Impact parameter versions of two state and Born approximations to calculate single excitation cross sections of H atoms ground state collisions
22 p3987 A69-41006

Solar motions respecting high velocity atomic hydrogen clouds and local stellar group
22 p4035 A69-41209

Pt wire detector for flow regulation of atomic hydrogen beam, noting hydrogen maser application
22 p3950 A69-41232

H and He atoms escape from atmosphere under MHD waves action at exosphere boundary
23 p4156 A69-41847

Low energy galactic cosmic ray spectrum determined from ionization rate per hydrogen atom, correlating peak intensity with stellar particle emission high energy portion
24 p4365 A69-42608

HYDROGEN BONDS
Single run reheated weld wrought steel H cracking tested by constant load rupture /static fatigue/ technique
24 p4320 A69-42943

Polycrystalline ammonium cyanide IR absorption spectrum as function of temperature, discussing ammonium ion hydrogen bonding to C or N atoms
24 p4280 A69-43809

HYDROGEN CHLORIDE
U HYDROCHLORIC ACID

HYDROGEN COMPOUNDS
NT BERYLLIUM HYDRIDES
NT BORANES
NT CARBORANE
NT CHLOROSILANES
NT DEUTERIUM COMPOUNDS

NT DIBORANE
NT HEAVY WATER
NT HYDRIDES
NT LITHIUM ALUMINUM HYDRIDES
NT LITHIUM HYDRIDES
NT METAL HYDRIDES
NT PHOSPHINES
NT SILANES
NT ZIRCONIUM HYDRIDES

HI and DI reaction into HD and 2I, noting need for rotational or vibrational excitation in addition to translational energy of collision
01 p0123 A69-10686

Atmospheric ozone photochemistry, studying time dependence on hydrogen compounds, equilibrium concentration effects on reaction rates, latitude and season
06 p0916 A69-17004

SH above photosphere in solar atmosphere, discussing dissociation equilibrium of diatomic molecules and possible abundances
06 p1002 A69-17317

HYDROGEN CYANIDES
Sideband amplification via saturated gas resonance in 258 GHz reflection amplifier with hydrogen cyanide gas filled cylindrical cavity
07 p1145 A69-18479

Transition probabilities in repetitively Q modulated HCN maser radiation dependent on gas discharge current
09 p1516 A69-21626

Simultaneous HCN and HOH laser emission in pulsed discharge through mixture containing H, C, N and O
12 p2107 A69-26330

Pulsed HCN sealed laser long term operation, discussing behavior of 311 and 377 micron emissions
12 p2107 A69-26391

HCN laser line width measurement with high resolution spectrum analyzer indicating spectral widths caused by mechanical instability
17 p2979 A69-32850

HCN laser line gain measurements during continuous excitation as function of current and pressure for acetonitrile and water mixtures
19 p3339 A69-36695

Gas phase ion-molecule chemistry of HCN by ion-cyclotron resonance spectroscopy identifying individual reactions by double resonance
20 p3485 A69-38262

Frequency locking of HCN laser transition at 890 GHz to harmonic of crystal controlled oscillator
22 p3963 A69-40567

Short term frequency fluctuations of CW HCN masers reduced to 10 kHz by improving plasma stability
24 p4327 A69-42614

HYDROGEN DEUTERIUM OXIDE
U HEAVY WATER

HYDROGEN FLUORIDES
U HYDROFLUORIC ACID

HYDROGEN FUELS
Hydrogen-air supersonic combustion at low densities, discussing laboratory computer simulation based on boundary layer concepts and finite rate chemistry [WSCIPAPER 68-29]
07 p1240 A69-18358

Low temperature hydrogen fuel cells and basic electrolyte batteries design, discussing electrolyte concentration regulation by elimination of water formed
08 p1258 A69-21027

Kinetics of combustion promotion of hydrogen-hydrocarbon mixtures by active particles, free atoms and free radicals using differential equations
17 p3069 A69-33139

Temperature and concentration measurements of H radical in hydrogen flames
21 p3669 A69-38807

HYDROGEN IONS
Galactic H II regions morphology from high resolution radio observations, noting variation of electron density with region size
01 p0151 A69-10552

Elastic scattering of slow electrons by negative H and positive Li ions, calculating differential cross sections and phase shifts
03 p0469 A69-12924

Pulsed arc source using plasma jet to obtain intense hydrogen ion beam
03 p0412 A69-13842

Mass spectrometric technique applied to positive column of hydrogen glow discharge for plasma properties, including relative densities of various hydrogen ions
05 p0802 A69-15913

Molecular jets obtained by charge exchange of triatomic ion beams consisting of hydrogen, deuterium and nitrogen, noting formation, energy level, etc
05 p0797 A69-16339

Hydrogen ions collision-induced dissociation cross section angular dependence measured, showing qualitative agreement with theoretical predictions
05 p0798 A69-16698

Absolute isophotometry of hydrogen alpha photographs of bright galactic H II regions, attributing difference between theoretical and observed ratio to interstellar absorption
07 p1217 A69-19231

Southern Hemisphere galactic H II regions continuum thermal radiation at 6 cm, noting maps for 28 of 36 sources, peak temperatures and emission and half intensity widths
07 p1206 A69-19271

Dissociation equilibrium of negative H ions in solar type stellar atmospheres, noting H molecule vibrational and rotational levels and continuous thermal radiation
07 p1223 A69-19635

Radial distribution of H II regions in spiral galaxies, noting peak at 1/4 distance from center
08 p1384 A69-20052

Galactic H II regions and projected electron density or dispersion measures of pulsars, noting early stars
08 p1397 A69-20696

Charge exchange collisions in ground state and ionic hydrogen incident on cesium vapor, measuring beam components after passage through target
08 p1356 A69-20737

Electron impact ionization of negative H ions computed by wave expansion methods and compared with experiments
09 p1542 A69-21622

Contour maps of H II regions W12, Orion A, W43 and W51, listing flux densities and angular sizes of components
09 p1598 A69-22186

Radio spectra and structure of H II regions in emission nebula NGC 281 and unnamed nebula near NGC 2264
10 p1773 A69-22957

HI cloud densities near fronts of H II regions by gasdynamic calculations based on observational data for electron density, temperature and particle velocity
10 p1782 A69-23683

Radio brightness map at 22.25 MHz of galactic plane including H II regions IC 1805 and IC 1848, discussing LF absorption
10 p1787 A69-24115

Optical and radio measurements of electron temperature of H II regions obtained from brightness ratio of hydrogen line and continuum, considering isothermal model
11 p1950 A69-25110

Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations
11 p1879 A69-25157

Molecular state of hydrogen gas in high density condensations in H II regions, discussing effects of nearby stars
11 p1963 A69-25258

Photographic studies of unsteady features of galaxies, discussing spectra, color, spiral arm instability and extragalactic H II regions
12 p2170 A69-27063

Steady state model envelopes of Bc stars, determining excitation and ionization states for hydrogen atoms
13 p2338 A69-27559

Galactic H II regions of high surface brightness in radio continuum surveyed at 1.95 cm wavelength with high resolution and positional accuracy
13 p2339 A69-27568

Isothermal H II region dynamics for moving central star, integrating equations numerically using holograph transformation and Riemann invariants
13 p2347 A69-27712

Ionized hydrogen regions in NGC 4449 from H alpha photography through narrow band interference filter, obtaining radial velocities
13 p2347 A69-27714

Messier 51 ionized hydrogen observations, discussing H II regions, radial velocities and galactic mass, rotation and noncircular nuclear motions
13 p2347 A69-27720

H II alpha and beta radio recombination lines strengths predicted, noting role of calculations of hydrogen energy levels non-LTE populations
14 p2517 A69-29088

Galactic anticenter region surveyed at 13.1 MHz, observing ionized hydrogen concentrations in galactic plane
14 p2519 A69-29370

Semiconductor materials and fabrication methods for surface barrier junction n-type and p-type silicon counters used in hydrogen ion flux recording
14 p2452 A69-29810

Spectrometric characteristics of He, H and molecular H ion recording counters as function of temperature
14 p2452 A69-29811

Hydrogen and He ion distribution measurements, noting seasonal and local magnetic time variability
15 p2599 A69-31326

Plasmasphere hydrogen and He ion concentration models, using diffusive equilibrium theory for plasmasphere parameters
15 p2677 A69-31447

Initial ionization processes in strong shock wave in hydrogen, determining ionization relaxation length and cross section of atom-atom excitation collisions
16 p2815 A69-31590

Magellanic-like galaxy NGC 4631 observed in H alpha light through narrow band interference filter, detecting and cataloging 88 H II regions
16 p2854 A69-31647

Density ratios of H ions to H atoms in ground state calculated as function of quasi-neutral plasma electron density
16 p2820 A69-31770

RF spectral line detection from ortho hydrogen ions in Omega Nebula and NML Cygnus
16 p2864 A69-32571

Pulsars distance determined using H II region data covering line of sight stars and Galaxy hydrogen distribution
17 p3026 A69-32858

H II regions distribution in nearby irregular I galaxies, attributing asymmetry to localized bursts of star formation
18 p3190 A69-34289

Depolarization of extragalactic radio sources at low Galactic latitudes attributed to ionized hydrogen produced by B2 star tunneling through interstellar hydrogen cloud
18 p3194 A69-34425

Atomic H ionization by proton impact analyzed to calculate ejected electrons angular and energy distributions by extending Rudge and Seaton theory
19 p3375 A69-35911

Dynamical effects in structure of H II equilibrium region left behind expanding ionization front, showing temperature as function of distance from star
19 p3403 A69-35966

Hydrogen molecular ion dissociation due to ion-molecule inelastic collisions, comparing measured and calculated velocity distributions of protons produced
19 p3375 A69-35985

Shock ionization by ion impact against triatomic H molecules gas target, showing positive ion production dependence on extraction voltage, collision chamber pressure, etc
19 p3378 A69-36188

Charge exchange cross sections and electron losses in hydrogen ion beam impacting on water vapor molecules
19 p3378 A69-36190

Two photon decay of metastable levels of hydrogenic and He-like ions in solar corona, depopulating via proton collisional excitation to 2p level
19 p3396 A69-36218

OGO 5 ion spectrometer for measuring oxygen, He and hydrogen ion concentration, noting functions as energetic particle analyzer and proton energy distribution measurement capability
19 p3314 A69-36679

Drift velocity and lateral diffusion of positive hydronium, hydrogen and K ions in hydrogen with zero field mobilities
20 p3580 A69-38026

Gas in H II regions and associated stars radial velocities correlation and systematic difference suggesting relationship between nebulae and stars
20 p3611 A69-38150

Photospheric radiation field role in temperature inversion of stellar chromospheres with dominant H ion opacity, postulating mechanical energy dissipation
20 p3613 A69-38173

Atlas of H II regions in 20 nearby galaxies
22 p4015 A69-40153

Explorer 34 observations of hydrogen and He ions in solar wind, noting number density variations and tentative association with geomagnetic storms
22 p4004 A69-40305

Possible star formation regions in Milky Way galaxy searched for compact H II regions, tabulating results
22 p4024 A69-40576

Radio recombination line data from H II regions interpreted in terms of single electron temperature, considering non-LTE / local thermodynamic equilibrium/ and clumping
22 p4025 A69-40645

Evolutionary dynamic model for H II region produced by massive stars within dense dust-laden clouds, discussing grain sputtering and time scales
22 p4025 A69-40646

Positively charged diatomic hydrogen molecules interstellar extinction and photodissociation cross section in terms of formation mechanisms
24 p4375 A69-42610

Proton ejection as hydrogen ion clusters by low energy electron bombardment of solid hydrogen
24 p4389 A69-43747

HYDROGEN ISOTOPES

NT DEUTERIUM

NT TRITIUM

Dissociation energy and vibrational terms of ground state hydrogen
05 p0796 A69-15908

Radiative cooling rates of bounded plasma of hydrogen isotopes, comparing dense deuterium plasma analytical results with brightness measurement
11 p1927 A69-25218

Lithium 6 and 7 fission following pion capture, searching for H 4 and 5
12 p2132 A69-26296

HYDROGEN OXYGEN ENGINES

NT M-1 ENGINE

NT RL-10-A-1 ENGINE

HM 4 rocket motor for second stage of Diogene booster, using LOX and hydrogen propellants
04 p0647 A69-15064

Fluidic secondary injection thrust vector control systems for solid propellant and hydrogen-oxygen rocket engines
10 p1753 A69-23561

Oxidizer injector face configuration for high power variable thrust rocket engine using hydrogen/oxygen propellant
16 p2835 A69-31749

Hydrogen oxygen rocket engine two phase liquid hydrogen pump capability and hydrodynamic design, analyzing constant-quality flow, acoustic effects, compressible flow and cavitation
16 p2845 A69-32759

Liquid oxygen and hydrogen rocket engine HM4 design and operation, discussing fuel, low temperatures and heat exchange
17 p3020 A69-33345

HYDROGEN OXYGEN FUEL CELLS

Water electrolysis, discussing oxygen generators for spacecraft prototype cells and testing
03 p0379 A69-12987

Oxygen supply inert diluent impurities effect on hydrogen-oxygen fuel cell performance
04 p0551 A69-15310

Water removal unit design for electrolyte reaction accumulation in hydrogen oxygen fuel cell systems
04 p0552 A69-15316

Water and heat removal unit for hydrogen/oxygen fuel cell systems, discussing temperature distribution, heat and liquid transport
05 p0704 A69-15676

Energy source for space environments based on compact cold hydrogen-oxygen fuel cell, discussing heat control and water elimination methods
08 p1260 A69-21041

Justi-Winsel extraction process by electrodialysis for removing product water from electrochemical reaction in H-O fuel cells
08 p1260 A69-21043

Hydrogen-oxygen fuel cells with conducting and nonconducting hydrophobic electrode matrices
08 p1261 A69-21055

Heat and mass transfer in porous medium with bulk flow in thin adjacent channel, applying Green function analysis to hydrogen-oxygen fuel cell
15 p2552 A69-31115

Hydrogen-oxygen low power space use fuel cell, noting geometrical and electrical characteristics of electrodes
16 p2738 A69-32412

Hydrogen-oxygen ion exchange membrane fuel cells for sounding balloons, discussing flight duration and power requirements, gas supply pressure effects, etc
16 p2738 A69-32413

Optimization of electrolytic extraction process of water from H-O fuel cells through choice of current density as function of electrolyte concentration
16 p2738 A69-32414

Hydrogen oxygen fuel batteries with hydrophobic porous film electrodes and alkaline electrolyte
16 p2740 A69-32426

Pseudosplitting/peroxide mechanism for O reduction at fuel cell cathodes, analyzing O molecule adsorption, H bonding and electron transfer at surface
16 p2748 A69-32809

High power density spacecraft hydrogen/oxygen fuel cells with open cycle heat and product-water removal subsystems and reactant tankage
23 p4076 A69-42309

HYDROGEN PEROXIDE

Absorption coefficient of hydrazine and hydrogen peroxide determined with 2.5 angstrom bandwidth monochromator, giving results in graphical form
02 p0205 A69-11873

Spacecraft sterilization by hydrogen peroxide solutions mixed with selected anion active detergents
05 p0713 A69-15943

Explosive combustion of hydrogen at high pressures, showing attainment of constant value of hydrogen peroxide
05 p0849 A69-16615

Primary processes leading to atomic and molecular hydrogen formation in hydrogen peroxide photolysis at 1236 Å, noting OH formation
10 p1652 A69-23527

Hydrogen peroxide electrode cathodic polarization studied for liquid oxidant use in methanol fuel cells
11 p1825 A69-24523

Highly concentrated hydrogen peroxide production, handling and storage, discussing crystallization process, equilibrium diagram, decomposition reduction and stabilizers
17 p3017 A69-33353

HYDROGEN PLASMA

NT DEUTERIUM PLASMA

High temperature, fully ionized plasma equation of state, using quantum statistical theory of low density electron-ion plasma in thermal equilibrium
01 p1128 A69-10346

Pressure rise and thermal conductivity in cylindrical hydrogen plasma column in axial magnetic field, assuming local thermal equilibrium
03 p0479 A69-13967

Double microwave interferometer for measuring hydrogen plasma decay
04 p0600 A69-15024

Hydrogen spectral line widening by plasma electrons emphasizing Lyman, Balmer and Paschen series
04 p0638 A69-15239

Continuous absorption of coefficient hydrogen- carbon plasma at 40,000 degrees K and 70 atm in 230-460 nm spectral range
04 p0639 A69-15371

Hydrogen plasma transport properties for semiclassical quantum potential calculated by Chapman-Enskog-Hilbert theory
05 p0799 A69-15735

Plasma flow in electromagnetic shock tube with various pressures and speeds, noting turbulence onset in shock layer
06 p0968 A69-17764

Relaxation theory of highly ionized hydrogen plasma noting applications to stimulated emission, radiation source development and electromagnetic radiation amplification
07 p1191 A69-18996

Hydrogen absorption coefficients, giving number densities in hydrogen gas or plasma for wide range of temperature and pressure
07 p1184 A69-19165

Spectroscopic analysis of hydrogen spark plasma discharge parameters at small PD values, discussing shock wave initiation accounting for transition to quasi-stable phases
08 p1360 A69-20100

Symmetric Alfven waves propagation in hydrogen plasma with nonuniform density distribution, deriving dispersion relations for fully ionized plasma
08 p1367 A69-20794

Impurity elimination from hydrogen plasma jets injected from coaxial source normal to octupole magnetic field
08 p1370 A69-21016

Electron multiplication during ionized H plasma exposure to annular electric field and magnetic field, including microwave diagnostics
09 p1543 A69-21299

Current instability in H plasma in electric field of large amplitude fast magnetosonic wave, noting plasma heating
09 p1552 A69-22526

Nonequilibrium distribution functions for neutral atoms excited states in optically thin low temperature singly ionized plasma containing ions, electrons and neutrals
10 p1731 A69-23437

Radiative cooling rates of bounded plasma of hydrogen isotopes, comparing dense deuterium plasma analytical results with brightness measurement
11 p1927 A69-25218

Free electron density upper limits in plasma attributed to negative ion formation, noting effect on ionization equilibrium calculations for stellar atmospheres
11 p1928 A69-25255

Thermal conductivity of hydrogen plasma in transverse magnetic field at high temperatures
12 p2133 A69-25765

LF wave propagation in DC discharge hydrogen plasma, noting self and artificial wave excitation
13 p2316 A69-28584

Hydrogen plasma heating by fast large amplitude magnetoacoustic wave, measuring resonance excitation and absorption of wave
14 p2493 A69-29643

Magnitude and type of wall losses from small opening in discharge tube for positive plasma column of low pressure glow discharge in hydrogen
14 p2493 A69-29691

Polychromator measurement of hydrogen plasma electron density produced by normal ionizing shock wave, using Stark broadening study of H beta line
14 p2494 A69-29767

Pulsed HF discharge analysis in hydrogen based on laser light scattering at plasma electrons, noting presence of satellites
14 p2451 A69-29781

Three component fast neutral beam for hydrogen plasma ion density and electron temperature determination, improving accuracy and reliability
14 p2452 A69-29812

Radial distribution functions for dense hydrogenous plasma near ionization temperature by solving Pereus-Yevick equations
14 p2502 A69-29998

Ambipolar to free diffusion transition in magnetized slab plasmas, discussing basic equations, iterative numerical procedure, characteristic parameters and H plasma
15 p2657 A69-30023

Thermal conductivity coefficients in solar corona and chromosphere computed and tabulated for H plasma
15 p2694 A69-30788

Hydrogen plasmas motions in multipole magnetic fields, discussing plasma polarization, double vortex flow patterns and field line configurations
15 p2661 A69-30924

Plasma experiments with TM-3 apparatus under stable discharge conditions in H, discussing energy loss mechanisms, transport coefficients, reciprocal lifetime, etc
16 p2820 A69-31795

Balmer line H alpha emission and absorption coefficients measured with hydrogen plasma generated in high current low voltage free burning arc
16 p2822 A69-32040

Continuous absorption of coefficient hydrogen- carbon plasma at 40,000 degrees K and 70 atm in 230-460 nm spectral range
16 p2822 A69-32118

Faraday effect and permittivity of hydrogen plasma measured simultaneously, determining electron density and collision frequency
17 p2919 A69-33394

Oblique hydromagnetic shock waves in magnetized hydrogen plasma enclosed in pyrex chamber by oscillatory zeta discharge, probing for front development and structure
17 p3013 A69-33823

Radiative energy transport quantities for hydrogen plasma including Plank and Rosseland mean absorption coefficients, discussing line and continuum radiation and optical limits
20 p3581 A69-37306

N and H plasmas and N-H plasma mixtures thermodynamic properties calculation, discussing numerical methods and corrections for electrostatic interactions
21 p3847 A69-38421

Ionized plasma motion under-stroke piston action by self similar solution of Navier-Stokes equations
22 p3991 A69-41021

Recombination and ionization coefficients for quasi-steady state homogenous H and hydrogenic ion plasmas based on collisional-radiative model
22 p3988 A69-41153

Collisional radiative recombination and ionization coefficients for weakly ionized H plasmas using rate equations
22 p3988 A69-41154

Classical path approximation in line broadening theory to derive impact and one-electron theories, with application to Stark broadening of Lyman series in hydrogen
23 p4193 A69-41379

Holographic interferometry for determining total free electrons in plasma produced by irradiating solid hydrogen foils with giant pulse ruby laser
24 p4314 A69-42980

Drift characteristics of hydrogen plasma partially captured by transverse magnetic field, finding drift rate dependence on magnetic field level
24 p4357 A69-43470

Hydrogen plasma-axisymmetric magnetic field interaction, studying plasmoid motions during exit from field
24 p4358 A69-43472

Hydrogen plasmoids in axisymmetric magnetic field with acute angle geometry produced by opposing coils, measuring induction current field and plasmoid density distribution
24 p4358 A69-43473

H plasmoid tail cut-off eliminating plasma impurities during injection across octupole magnetic field from coaxial source
24 p4358 A69-43474

Crossed inhomogeneous electric and magnetic fields effect on H plasma fluxes dynamic behavior, deriving plasma motion formula
24 p4358 A69-43475

Light scattering from ruby laser beam passing through collisionless shock produced by H plasma compression measured by photomultiplier
24 p4360 A69-43748

HYDROGEN RECOMBINATIONS

Resonance theory of thermomolecular recombination kinetics applied to hydrogen atoms
01 p0122 A69-10034

Partial maser effect in recombination lines of hydrogen atoms in nebular plasma due to overpopulation of energy levels at thermodynamic equilibrium
01 p0148 A69-10042

Absolute reddening curves derived for planetary nebulae by comparing radio continuum with hydrogen recombination lines
08 p1384 A69-20057

Radio recombination lines of galactic hydrogen as sensitive test for low energy cosmic ray existence in interstellar medium
09 p1580 A69-22273

Hydrogenic recombination decrements in gaseous nebulae, discussing effects of Lyman line leakage, Balmer line self absorption, internal dust, optical depth, etc
10 p1787 A69-24118

H II alpha and beta radio recombination lines strengths predicted, noting role of calculations of hydrogen energy levels non-LTE populations
14 p2517 A69-29088

Rate constants for recombination of atomic hydrogen with hydrogen molecules, hydrogen atoms and argon atoms at high temperatures behind shock waves
14 p2488 A69-29637

Unidentified cometary spectra line emission possible interpretations, examining atomic hydrogen abundance in cometary atmosphere and ionic hydrogen recombination
15 p2685 A69-30523

Hydrogen recombination in hot universe model, discussing emission of energetic quanta
15 p2690 A69-30734

Hydrogen laser operation time reduction attributed to hydrocarbon formation on inner surface of storage flask, promoting atomic hydrogen recombination
15 p2634 A69-30942

Recombination and ionization coefficients for quasi-steady state homogenous H and hydrogenic ion plasmas based on collisional-radiative model
22 p3988 A69-41153

Collisional radiative recombination and ionization coefficients for weakly ionized H plasmas using rate equations
22 p3988 A69-41154

HYDROGEN SULFIDE

Reaction between nickel-base alloy and hydrogen sulphide at high temperatures under atmospheric pressure, discussing activation energy 12 p2115 A69-26617

Germanium single crystals etching with water vapor and hydrogen sulfide in hydrogen flow system, studying concentration, pressure and temperature effects on surface reactions 22 p3970 A69-40737

HYDROGENATION

Hydrogen content effect on relaxation spectrum of alpha titanium, using nondestructive tests 01 p0096 A69-10614

Chemical vapor deposition of W-Mo-Re ternary alloys from hydrogen reduction of fluorides on Cu or Mo substrates 01 p0096 A69-10642

Solvent effect in catalytic hydrogenation reaction of Schiff bases of alpha-keto acids with optically active alpha-alkylbenzylamine 12 p2026 A69-25779

Optically active alanine synthesis from oxaloacetic acid by hydrogenolytic asymmetric transamination, noting role of decarboxylation 12 p2026 A69-25780

HYDROGENOMONAS

Hydrogenomonas eutropha as means of protein food source independent of conventional agriculture for animal feed supplement 10 p1644 A69-23306

Human intolerance to bacteria as food, considering response to Hydrogenomonas eutropha and Aerobacter aerogenes 13 p2213 A69-27265

NADH stimulation of ATP dependent carbon dioxide fixation in crude extracts of Hydrogenomonas facilis, considering allosteric regulation of phosphoribulokinase activity 15 p2554 A69-30036

Structural phospholipoprotein isolated from hydrogenomonas facilis and neurospora crassa 22 p3871 A69-40049

HYDROGRAPHY

IR measuring techniques for water surface temperature remote sensing 15 p2617 A69-31543

HYDROLOGY

Satellite automatic picture transmission application to meteorological and hydrological problems including wind estimates, atmospheric stability and cloud distributions [UN PAPER 68-95300] 01 p0108 A69-10462

Passive and active transmitters and receivers of electromagnetic radiation in earth orbital satellites to collect pictorial or numerical data to study hydrology [UN PAPER 68-95333] 01 p0064 A69-10487

Color and color IR aerial photography compared for estuarine and marshland research, considering detection of turbidity, pollution, salinity, etc 22 p3942 A69-40993

HYDROLYSIS

Enzymic decomposition of urea in urine, noting production of ammonia and effect of urea components on hydrolysis rate 08 p1265 A69-19834

Proline residue effects on hydrolysis of peptide bonds by thermolysin 15 p2561 A69-30083

Exonuclease function of DNA polymerase from Escherichia coli, discussing hydrolysis of polydeoxyribonucleotides and resistancy of oligonucleotides 22 p3898 A69-41073

HYDROMAGNETIC FLOW

U MAGNETOHYDRODYNAMIC FLOW

HYDROMAGNETIC STABILITY

U MAGNETOHYDRODYNAMIC STABILITY

HYDROMAGNETIC WAVES

U MAGNETOHYDRODYNAMIC WAVES

HYDROMAGNETICS

U MAGNETOHYDRODYNAMICS

HYDROMAGNETISM

U MAGNETOHYDRODYNAMICS

HYDROMECHANICS

U ELASTOHYDRODYNAMICS

U ELECTROHYDRODYNAMICS

U HYDRODYNAMICS

U HYDROSTATICS

U MAGNETOHYDRODYNAMICS

U MAGNETOHYDROSTATICS

HYDROMETEOROLOGY

Soviet book on automatic control and telemechanics in hydrometeorological measurements covering sensors, transducers, amplifiers, etc 01 p0111 A69-10997

Averaging procedures to represent highly time variable actual hydrometeorological fields by less variable equivalent fields 06 p0952 A69-17989

HYDRONIUM IONS

Drift velocity and lateral diffusion of positive hydronium, hydrogen and K ions in hydrogen with zero field mobilities 20 p3580 A69-38026

HYDROPHONES

Near field flow noise generated in boundary layer of water vehicle measured for rotating cylinder, ship and buoyant unit using hydrophone 17 p3004 A69-32953

HYDROPONICS

Sweet potatoes productivity and nutritive value as carbohydrates source in manned spaceflights 13 p2216 A69-28619

Cotton leaves reflectivity and transmittance measurements, discussing substrate salinity effects on internal structure of hydroponically grown plants 15 p2558 A69-30456

Carrot plants growing during 374 days in conveyor type aeroponic assembly, noting yield and morphological features 17 p2912 A69-32943

HYDROSPHERE [EARTH]

U EARTH HYDROSPHERE

HYDROSTATIC PRESSURE

Hydrostatic pressure effects on mechanical properties of hot pressed, extruded and rolled polycrystalline beryllium sheet 01 p0092 A69-10059

Buckling of electroformed thin conical shells under hydrostatic pressure, proving theory for cones of large taper ratio 02 p0347 A69-12515

Hydrostatic pressure effect on recombination emission in indium phosphide p-n junctions 04 p0639 A69-14428

Intrarenal capillary hydrostatic pressure effect on hemodynamically induced changes in sodium excretion 07 p1063 A69-18629

Grain-size refinement of beryllium castings and extrusions after compression in pressure chamber, determining effect on ductility 08 p1330 A69-20013

Incremental and corresponding total strain theories of plasticity used to analyze hydrostatic bulging of circular diaphragm 08 p1418 A69-20826

Complicated power metallurgical shapes fabricated by hydrostatic pressing, noting spheres, cones, rods, tubes and combinations 09 p1511 A69-22353

Radial hydrostatic bearing parameters calculated by pressure distribution diagram in bipolar coordinates, obtaining equations of motion 11 p1892 A69-25341

Hydrostatic pressure-cycling technique for controlled fatigue precracking of spin burst fracture toughness specimens, noting ultrasonic flaw detection 11 p1995 A69-25650

Axisymmetric plastic buckling of complete spherical shells subjected to external hydrostatic pressure 13 p2361 A69-27439

Dislocation pattern in thin Mo foils deformed by hydroextrusion observed by transmission electron microscope 14 p2463 A69-29311

Pressure losses in pipeline with venturi tube, calculating hydraulic resistance coefficient as function of structural parameters and pipeline length 15 p2612 A69-31180

Multipad externally pressurized spherical bearing fed with incompressible fluid for satellite attitude control systems tests 16 p2793 A69-31728

Hydroextrusion influence on mechanical properties of powder compacts of sintered Mo rods 16 p2803 A69-32491

Aerospace balancing system with hydrostatic spindle, describing component construction and functions [SAWE PAPER 737] 18 p3118 A69-34890

Theory for describing rotating fluid planets external geometry in state of hydrostatic equilibrium, noting role of equipotential surfaces 20 p3594 A69-37077

HYDROSTATICS

NT MAGNETOHYDROSTATICS

Hydrostatic journal gas bearings calculations for carrying capacity, gas consumption and optimal dimensions for maximum lifting capacity 03 p0432 A69-12960

Amplitude-frequency characteristics of rotor mounted on hydrostatic bearings calculated by equations of dynamic compliance method 03 p0432 A69-12961

Orifice compensated hydrostatic face seal under pressure and thermal loading for aircraft gas turbine [ASME PAPER 68-WA/LUB-6] 05 p0768 A69-16131

Hydrostatic tension test of brittle material using spherical specimen bonded into center of cube of matrix material 05 p0784 A69-16434

Book on fluid mechanics fundamentals and applications covering incompressibility and compressibility effects, viscosity, hydrostatics, aerostatics, one dimensional, potential, turbulent flow and boundary conditions 07 p1121 A69-19376

Nonlinear partial differential equations for solution of steady stratified flows, noting hydrostatic pressure distribution and horizontal and vertical scales 11 p1869 A69-24889

Liquids in zero g environment for controlling position of propellant within tank for restart of rocket engine, noting minimum energy principle applications 11 p1944 A69-25599

Plastic deformation effects by hydrostatic fluid extrusion on mechanical properties of Ni maraging steels 13 p2278 A69-27414

Hydrostatic tube extrusion, discussing equipment, techniques and commercial applications [SAE PAPER 690319] 15 p2617 A69-30093

Hydrostatic instability in high temperature stars in post-Newtonian approximation 20 p3580 A69-37926

Hydrostatic bearings analysis for high pressure cryogenic rocket engine turbopumps to predict steady state and time dependent performance, noting turbulence, inertia and compressibility 22 p3955 A69-40408

Total load factor static vertical component and lubricant flow rate square related to pocketed hydrostatic journal bearing revolutions 24 p4321 A69-43091

HYDROTHERMAL CRYSTAL GROWTH

Subsolidus equilibrium study in potassium tantalate K niobate system for dry and hydrothermal runs, using X ray powder diffraction and petrography 08 p1332 A69-20373

Percorait phase in nickel analog of clinochrysoile formed under hydrothermal conditions in Wolf Creek meteorite cracks 18 p3199 A69-34824

HYDROX ENGINES

U HYDROGEN OXYGEN ENGINES

HYDROXIDES

NT POTASSIUM HYDROXIDES

Interstellar gas masers account for properties of 18 cm emission lines from OH molecules 03 p0511 A69-13465

HYDROXYCORTICOSTEROID

U CORTISONE

HYDROXYL COMPOUNDS

NT ALCOHOLS

NT ETHYL ALCOHOL

NT GLYCOLS

NT METHYL ALCOHOLS

NT PHENOLS

Perhydroxyl radical electron spin resonance spectrum in solution of hydrogen peroxide and water at 77 K, noting g factor, hyperfine splitting and molecular structure 01 p0024 A69-10683

Reagent menthyl chloroformate use in optical analysis of asymmetric amino and hydroxyl compounds by gas chromatography 07 p1075 A69-19499

Wideband 1665 MHz OH emission source in Carina region of galaxy in weak continuous radiation region with low degree of polarization 08 p1397 A69-20772

RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Casiopeia A source 09 p1586 A69-21295

OH emission source in constellation Canis Major discovered with interferometer in October 1968, noting nearby IR object 09 p1591 A69-21448

OH emission source in W24 during July 19, 1967 lunar occultation, obtaining better position for brighter OH emission feature

09 p1591 A69-21449

Collision broadening cross sections of OH UV transition at room temperature, using flash photolysis

09 p1543 A69-22252

Radio telescopic survey for OH emission at 1667 MHz in interstellar dust clouds for catalog compilation, tabulating results

09 p1603 A69-22267

Hydroxyl luminescence spectrographic observations at twilight in vibrational-rotational band from 10600 to 11200 Å

10 p1681 A69-22847

Position and polarization of 1720 MHz OH emission from W28, W44 and galactic center, considering unresolved concentrations of shell type nonthermal sources

10 p1776 A69-23220

Primary processes leading to atomic and molecular hydrogen formation in hydrogen peroxide photolysis at 1236 Å, noting OH formation

10 p1652 A69-23527

RF spectroscopy of OH molecule, RF absorption by galactic OH and radio emission from OH in dust clouds

10 p1781 A69-23671

Position of OH sources near seven galactic radio sources determined with two element variable-baseline interferometer, noting strong circular polarization

10 p1787 A69-24114

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars

11 p1954 A69-24379

Equilibrium between H and OH radicals in turbulent H flames, noting component concentrations in H-O-N flames of different composition

11 p1999 A69-24487

Hydroxyl microwave emission sources in Cygnus not connected with continuum emission

11 p1964 A69-25403

Lambda-doublet radiation from excited state of interstellar OH detected at 5 cm wavelength

13 p2335 A69-27312

Galactic OH emission sources time variations found in W49 and W75

14 p2517 A69-29085

Maser emission in interstellar OH ground state produced by IR pumping, noting population inversion mechanism

15 p2691 A69-30762

RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Casiopeia A source

15 p2697 A69-31226

Hydroxyl band contamination of emission and background radiation from night sky

16 p2774 A69-31987

Intensity and rotational temperature seasonal variations of hydroxyl emission at different latitudes in upper atmosphere

16 p2775 A69-32081

Hydroxylamine complexes of inorganic salts preparation and characterization, including hygroscopic properties, chemical bonds, etc

17 p2917 A69-33657

Lambda doublet maser emission from excited OH rotational level, discussing conditions necessary for microwave radiation

18 p3185 A69-34292

Interstellar hydroxyl molecular clouds as radio wave sources, using very long baseline interferometry, suggesting natural masers in space for OH emissions

19 p3427 A69-36659

Satellite-anomalous OH radio emission sources, observing spatial distribution and Stokes parameters

20 p3610 A69-38146

Excitation temperatures and OH microwave line optical depths measured for dust clouds, discussing optical depths and LF radio absorption

20 p3611 A69-38147

Upper limits for OH microwave emissions from radio sources F transitions, discussing pumping mechanism role in emission detection

21 p3796 A69-38477

OH emission rise after sunset and decay at sunrise attributed to strong solar dissociation of ozone

21 p3712 A69-38520

Airflow and vertical eddy transport photochemical models, analyzing O green line and OH emission distribution

21 p3713 A69-38523

Upper atmosphere OH molecules vibrational temperature and total emission energy, measuring average seasonal variations

24 p4308 A69-43007

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars

24 p4389 A69-43769

HYDROXYLAMINE SULFATE

Hydroxylamine complexes of inorganic salts preparation and characterization, including hygroscopic properties, chemical bonds, etc

17 p2917 A69-33657

HYDROXYLAMMONIUM PERCHLORATES

Hydroxylamine complexes of inorganic salts preparation and characterization, including hygroscopic properties, chemical bonds, etc

17 p2917 A69-33657

HYGROMETERS

NT PSYCHROMETERS

Northern California humidity to 32 km utilizing alpha radiation hygrometer and associated balloon sounding equipment

03 p0461 A69-13345

HYGROSCOPICITY

Visibility improvement in warm fog by seeding with micron size hygroscopic particles, noting results for NaCl

01 p0111 A69-10696

Continental and maritime hygroscopic particles associated with increasing relative humidity, determining effect on backscattered power from laser beam using Mie scattering equations

17 p2981 A69-33160

HYPERBOLAS

Elastic two cavity revolving hyperboloid deformation by arbitrary forces solved by spherical functions

11 p1984 A69-25169

Multiple characteristics and Levi-Lax conditions for hyperbolicity to prove correctness of Cauchy problem

18 p3165 A69-35277

HYPERBOLIC COORDINATES

Partial difference methods from parabolic, elliptic and hyperbolic equations solved by splittings of locally one dimensional nature

21 p3754 A69-38745

HYPERBOLIC FUNCTIONS

Cauchy problem correctness for one dimensional hyperbolic equation of arbitrary order with data on degeneracy line

01 p0104 A69-10699

Boundary value problem of hyperbolic equation with discontinuous boundary conditions

04 p0622 A69-14617

Differential-difference equations and nonlinear initial boundary value problems for linear hyperbolic partial differential equations, noting procedure based on method of characteristics

04 p0623 A69-14949

Hyperbolic double waves found in compressible flow problems, presenting method of plotting all waves and determining geometrical characteristics

05 p0751 A69-16646

Kepler hyperbolic sine equation calculated for Arend-Roland comet for case of constant residues by false position method

06 p0997 A69-16821

General two dimensional second order hyperbolic differential equation analyzed by substitution method

06 p0948 A69-17786

Hyperbolic sine creep law, discussing limiting stresses for approximation by linear or exponential relationship

07 p1235 A69-19384

Mixed initial boundary problem for hyperbolic equations with given boundary outgoing variables, determining incoming data

08 p1342 A69-20347

Liapunov direct method in stability problems for semilinear and quasi-linear systems of hyperbolic partial differential equations with independent variables

09 p1534 A69-22799

Wave propagation in connected space-time for linear second order hyperbolic partial differential equation, describing unitary invariant theory

11 p1908 A69-24356

Existence theorems for hyperbolic genuinely nonlinear systems of conservation laws, studying Cauchy problem

11 p1909 A69-25163

Boundedness criteria for second order hyperbolic equation boundary value problem solution in Banach space

12 p2122 A69-26573

Boundary value problems for hyperbolic and mixed equations using model of wave, Lavrentiev- Bitsadze and Tricomi equations

12 p2123 A69-26727

Nonlinear hyperbolic partial differential equations with dissipation term for periodic solutions

12 p2124 A69-26929

Dirichlet problem for second order linear hyperbolic partial differential equations in cylindrical domain, deriving necessary and sufficient condition for solution uniqueness

12 p2124 A69-26932

Difference schemes for quasi-linear hyperbolic equations, with applications to three dimensional supersonic flow past bodies

14 p2430 A69-29475

Riemann problem with arbitrary jump data for extended hyperbolic systems of equations, showing conditions for unique solution

14 p2433 A69-29678

Asymptotic Krylov-Bogoliubov methods application to solving boundary value problems for hyperbolic quasi-linear equations with distributed parameters and retardation

15 p2653 A69-31192

Book on quasi-linear equations systems and application to gasdynamics, including problems involving systems of quasi-linear hyperbolic equations with two independent variables

16 p2771 A69-32113

Classical solution existence to mixed boundary value problems for second order hyperbolic operators obtained by Laplace transforms

18 p3165 A69-35313

Optimal generalized controls for systems under random forces described by hyperbolic partial differential equation system

23 p4144 A69-41957

Wrong boundary conditions influence decay in overdetermined difference approximations to hyperbolic partial differential equation

24 p4340 A69-43227

HYPERBOLIC NAVIGATION

NT DECCA NAVIGATION

NT LORAN

NT LORAN C

Hyperbolic marine and air navigation including TACAN, pulse modulation, rotating hyperbolic fields, sector beacons and all-weather landing aids

13 p2296 A69-27334

Maritime navigation hyperbolic charts for aircraft position determination

23 p4186 A69-42026

HYPERBOLIC REENTRY

Radiation self absorption effects on heating loads of blunt body during hyperbolic entry

21 p3644 A69-39040

HYPERBOLIC SYSTEMS

Software remechanization of conventional hyperbolic LORAN for totally passive closed loop one way direct range measurements to individual LORAN transmitters

17 p3002 A69-34079

Positive solutions of parabolic and hyperbolic partial differential equations arising as viscoelastic media equations of motion, noting maximum principle utilization

22 p3976 A69-41035

Iterative finite difference method for initial value problems applied to hyperbolic system representing one dimensional time dependent flow of compressible polytropic gas

24 p4340 A69-43226

HYPERBOLIC TRAJECTORIES

Spacecraft trajectory using microthrust and lunar gravitational attraction for acceleration into heliocentric orbit

09 p1593 A69-21620

Double galaxies consisting of components moving away from each other with hyperbolic velocities from statistical tests of hypotheses

10 p1775 A69-23203

Photographically observed meteor orbits 1937-1963, noting overestimation of hyperbolic orbits due to observation errors

15 p2697 A69-31253

Optimal rendezvous maneuver of pursuing vehicle with minimum fuel expenditure in approach stage on elliptic and hyperbolic orbits

15 p2701 A69-31548

HYPERCAPNIA

- Minimum fuel guidance from hyperbolic into specified circular orbit 19 p3367 A69-35663
- Optimal transfer between hyperbolic asymptotes about finite size planet, discussing twelve types of analytical solutions in terms of arrival, departure and escape velocities [AAS PAPER 69-242] 24 p4380 A69-42856

HYPERCAPNIA

- Dog adaptation to 60 or 90 mm Hg carbon dioxide in 260 mm Hg total pressure environment, noting arterial pH and bicarbonate level 03 p0375 A69-14071
- Irreversible blunted respiratory response to ventilation in high altitude natives, considering hypoxic and hypercapnic stimuli 12 p2018 A69-26130
- Ventilatory responses to hypercapnia and hypoxia in anesthetized and unanesthetized rabbits before and after bilateral cervical vagotomy 21 p3651 A69-38390
- Ventilatory response to hypoxia and hypercapnia in hypothermic anesthetized dogs, noting decreased sensitivity of central chemoreceptors to carbon dioxide 22 p3885 A69-40977

HYPERFINE STRUCTURE

- Fraunhofer lines hyperfine structure effect on solar abundances of V, Mn, Co, Cu and Ba, calculating equivalent line widths by ALGOL program 02 p0311 A69-11458
- Level crossing effect in stimulated emission and application to determination of hyperfine splitting in Xe 129 excited electronic state during laser transition 07 p1156 A69-19398
- Hyperfine transition line of He 3 II for abundance in Messier 17 source by radio telescope 10 p1785 A69-24098
- Double focalization in atomic hydrogen maser by hexapolar magnets selecting hyperfine energy transitions 12 p2105 A69-26050
- RF spectra for hyperfine structure of ortho-hydrogen molecular ion, calculating doubling constant for vibrational effects 15 p2693 A69-30784
- Hyperfine spectrum analysis of NaCl at low field using molecular beam electric resonance method, discussing Hamiltonian group representation 16 p2815 A69-32794

HYPERGEOMETRIC FUNCTIONS

- Asymptotic solutions for prolate spheroidal wave functions satisfying given differential equation, producing asymptotic expansions in terms of confluent hypergeometric functions 04 p0623 A69-14892
- Quasi-plane stress in rotating disks of unconventional profile emphasizing conical shaped disk analysis in terms of hypergeometric series 07 p1235 A69-19444
- Boundary value problem for elliptic-parabolic partial differential equations in theory of random processes, obtaining analytical solution in terms of hypergeometric functions 10 p1719 A69-23516
- Elliptic equation of degenerating order in neighborhood of degeneration hyperplane, discussing solution behavior 11 p1908 A69-24696
- Analytic continuation of Appell hypergeometric series into linear combination of four infinite series 12 p2123 A69-26605
- Series and integral expansions of Jacobi polynomials with positive kernel, noting ultraspherical polynomials 14 p2470 A69-28905
- Jacobi polynomial series analytical expansion, studying relationship to Taylor series singular points 21 p3757 A69-39537
- Approximation of linear unsteady dynamic systems at finite time interval expressed in Bessel or degenerate hypergeometric functions 22 p3917 A69-40616

HYPERGEOMETRY U HYPERSPACES

HYPERGLYCEMIA

- White rats hyperglycemia during blood sugar changes following single X ray dose, indicating increased sugar benefit in radiation damage treatment 21 p3658 A69-39057

HYPERGOLIC ROCKET PROPELLANTS

- Combustion response of hydrazine-nitrogen tetroxide hypergolic rocket propellants to transverse gas flows, noting coupled and uncoupled oscillations 01 p0175 A69-10112

- Liquid hydrazine ignition by nitrogen tetroxide gas based on stagnation flow principle, presenting threshold measurements [WSCIPAPER 68-43] 06 p0983 A69-17792

- Laboratory test stands for ignition, combustion and expansion processes experiments in hypergolic liquid fuels, noting minimal recombination gains 08 p1301 A69-20170

- Monograph on ignition, combustion and expansion in hypergolic liquid propellant mixtures at gas temperatures up to 3000 K for small rocket engines 08 p1375 A69-20723

- Qualitative and quantitative hazards analysis of potential accidents/incidents in Post Boost Propulsion System with hypergolic propellants, considering recovery 10 p1753 A69-22972

- Hypergolic filling materials for solid fuels with hybrid propellant combinations, discussing ignition and combustion of ethyleneimine derivatives 10 p1753 A69-24023

- Ignition delay of paraphenylenediamine associated with nitric acid, showing relation between grain diameter and hypergolic ignition mechanism, noting oxidizer concentration effects 15 p2561 A69-30185

- Fluorine injectors for main tank injection of space vehicle liquid hydrogen tank, including study of hypergolicity and reaction product freezing [AIAA PAPER 69-528] 16 p2767 A69-32717

- Continuous mode operation in hypergolic bipropellant low thrust rocket motors, discussing high temperatures reached by combustion chamber walls and cooling solutions 17 p3019 A69-33335

- Halon 1301 fire extinguisher for burning spilled hypergol on Apollo/Saturn LM adapter, discussing concentration requirements and exposure hazards 18 p3094 A69-35062

- Halon 1301/bromotrifluoromethane/ concentration for inerting Aerazine-50 spills or extinguishing fires, noting joint use of carbon dioxide and water 18 p3094 A69-35090

HYPERONS

- Particle physics and discovery of K mesons and hyperons emphasizing track recording, cloud and bubble chamber techniques 24 p4352 A69-43039

HYPEROXIA

- High oxygen tension effect on transport and incorporation of exogenous leucine and protein synthesis in *Pseudomonas saccharophila* cells 03 p0369 A69-13433
- In vivo hyperbaric hyperoxia effect on erythrocytes unsaturated fatty acid composition alterations of tocopherol deficient mice 03 p0375 A69-14070
- Histological investigation of internal organs of mice exposed to atmosphere with high oxygen content 05 p0709 A69-16513
- Electron microscopic changes in lungs of rats after repeated exposure to pure oxygen 05 p0709 A69-16514
- High oxygen concentration influence at normal pressure on evoked potential of cortical optic zone and subcortical zones 05 p0709 A69-16515
- Hyperoxia exposure and hemolysis in tocopherol deficient mice 06 p0874 A69-17837

- Immunological and histochemical methods for studying mice reactivity after long term exposure to hyperoxic atmosphere 07 p1065 A69-18975

- High oxygen concentration effect on conditioned reflex and associated EEG responses to light flash in rabbits occurs in well defined sequences 07 p1065 A69-18976

- In vivo hemolytic susceptibility to hyperoxia in mice deficient in tocopherol 07 p1066 A69-19422

- Prolonged exposure of rats to oxygen concentrations studied for effects on organisms 08 p1262 A69-19831

- Pathological changes in respiratory and cardiovascular systems of white rats due to various levels of hyperoxia 10 p1646 A69-23577

- Pulmonary oxygen toxicity, analyzing reticulin and elastic tissue damage and hyaline membranes by histochemical techniques 14 p2407 A69-29298

- Oxygen consumption and rectal temperature in male mice confined in nitrogen and helium diluted hyperoxic atmosphere at specific temperature and humidity ranges 17 p2906 A69-32932

- Phagocytic activity and carbohydrate metabolism in peripheral blood neutrophils of men exposed to atmosphere with increased O content, noting neutrophil energy exchange disorder role 17 p2907 A69-32942

- Histological investigation of internal organs of mice exposed to atmosphere with high oxygen content 18 p3096 A69-34732

- Electron microscopic changes in lungs of rats after repeated exposure to pure oxygen 18 p3096 A69-34733

- High oxygen concentration influence at normal pressure on evoked potential of cortical optic zone and subcortical zones 18 p3096 A69-34734

- Immunological and histochemical methods for studying mice reactivity after long term exposure to hyperoxic atmosphere 20 p3479 A69-38223

- High oxygen concentration effect conditioned reflex and associated EEG responses to light flash in rabbits occurring in well defined sequences 20 p3479 A69-38224

- Hyperoxia and pulmonary surfactant washout in pulmonary compliance measurements of rats subjected to 100 percent diatomic oxygen before asphyxial death 21 p3659 A69-39066

- Normobaric oxygen toxicity pathology in baboons and Macaca, irus and squirrel monkeys during 14 day exposure 21 p3660 A69-39179

- Air and saline P-V curves of rat lungs after hyperoxia, comparing hyperoxia effects to surfactant washout on pulmonary compliance 23 p4081 A69-41440

- Increased oxygen tension adaptation and effects on adrenocortical and sympatho-adreno-medullary activity in rats, indicating toxic conversion of epinephrine to indoles 23 p4087 A69-41791

- Coronary circulation response to hyperoxia after vagotomy and combined alpha and beta adrenergic receptors blockade in anesthetized intact dog 23 p4096 A69-42088

- Hyperoxia and hypoxia effects on mitotic activity in regenerating and normal rat liver exposed to environmental conditions 24 p4269 A69-43565

HYPERPLANES

- Function generator internal storage and dimensions diminished, approximating functions of several variables by hyperplane strip 14 p2425 A69-29142

- Image recognition algorithm for determination of hyperplane separating two finite sets of elements in Euclidean space 14 p2418 A69-29353

- Einstein equations solution for empty space without singularities containing metric, with closed homogeneous space type hypersurfaces expanding anisotropically 15 p2690 A69-30732

- D-stationary principle to determine optimum hypersurfaces in configuration space containing optimal motion trajectories 16 p2811 A69-31625

- Stability criteria for integral manifold formed by intersection of hypersurfaces in Euclidean n-dimensional space 21 p3770 A69-38850

HYPERSONIC AIRCRAFT

- Fluidic type temperature sensor for total temperature measurement for hypersonic aircraft in atmosphere 05 p0766 A69-16755

- Aircraft propelled at Mach 7, discussing low speed and transonic characteristics, stability, power plant integration and ONERA wind tunnel experiments [ONERA-TP-657] 07 p1052 A69-18414

- Turbojets, turbo-rockets and Ramjet turbines compared as propulsion systems for aircraft with speeds to Mach 7 08 p1376 A69-20656

- Coated refractory tantalum alloy as ductile, weldable material for application on hypersonic aircraft or reusable reentry vehicles at high temperatures 09 p1526 A69-22326

- Supersonic ramjet propelled air breathing booster for speeds up to Mach 12, discussing flight mechanics,

aerodynamics, propulsion, heating and air intake design

09 p1573 A69-22608

Aerodynamic problems posed by hypersonic flight from Mach 3 to 20, considering relationship to half cone with flat base

16 p2867 A69-31761

Integrated propulsion control system for ramjet Hypersonic Research Engine to operate at 3-8 Mach numbers

[AIAA PAPER 69-546]

16 p2845 A69-32744

Hypersonic aircraft induced changes in chemical and thermodynamic properties of air influencing aerodynamic forces on vehicle

17 p2895 A69-33576

Stream surface characteristics as criteria for hypersonic lifting bodies shapes for optimal aerodynamic and fuel performance

19 p3248 A69-36399

Drag influence on mission performance of hypersonic aircraft during climb and cruise, noting payload capacity

20 p3461 A69-37154

Aircraft propelled at Mach 7, discussing low speed and transonic characteristics, stability, power plant integration and ONERA wind tunnel experiments

21 p3644 A69-39164

Hypersonic wave riders lift and drag coefficients, lift drag ratio, shock profile and pressure distribution, discussing wind tunnel measurements of caret wings

21 p3645 A69-39802

HYPERSONIC BOUNDARY LAYER

Hypersonic boundary layer on flat plate with strong hypersonic viscous interaction and uniform surface blowing distribution

04 p0588 A69-14722

Interaction of laminar hypersonic boundary layer and supersonic corner expansion wave, discussing upstream influence, transverse pressure gradients and external flow

[AIAA PAPER 69-137]

06 p0913 A69-18078

Transition of hypersonic boundary layers on conical body using shock tunnel, obtaining surface heat transfer distributions

[AIAA PAPER 68-39]

09 p1482 A69-21943

Density and density fluctuations in hypersonic turbulent boundary layer on shock tunnel nozzle wall measured using electron beam probe

16 p2770 A69-31907

Density and velocity fluctuations in hypersonic turbulent boundary layer based on Wallace data

16 p2770 A69-31908

Critical review of paper on suction effect on hypersonic laminar boundary layer separation

16 p2771 A69-31928

Free stream disturbances influence on hypersonic boundary layer transition Reynolds number in heated and unheated flows

[AIAA PAPER 69-704]

17 p2953 A69-33453

Hypersonic boundary layer transition on blunt slender cones at M equal 10 obtained independent Reynolds number

[AIAA PAPER 69-705]

17 p2954 A69-33455

Three dimensional hypersonic laminar boundary layer subdivided into inner and outer regions, obtaining flow description by matching inner and outer solutions

[AIAA PAPER 69-710]

17 p2955 A69-33467

Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor

[AIAA PAPER 69-684]

17 p2955 A69-33474

Miniature probe with short time response for total temperature profile measurements in hypersonic turbulent boundary layer on wall of hypersonic tunnel nozzle

19 p3293 A69-35751

Free jet boundary layer in mixing zone of hypersonic gas flow past body

20 p3513 A69-37094

Hypersonic turbulent boundary layer separation over cone-cylinder flare configuration at zero angle of attack and high Reynolds number

22 p3930 A69-40557

Book on entropy gradient effect on laminar hypersonic boundary layers, covering external frictionless flow calculations based on momentum and energy integral theorems

22 p3930 A69-40618

Strong interaction between hypersonic boundary layer over flat plate and associated inviscid flow, discussing heating and vorticity effects, boundary layer edge, etc

22 p3860 A69-40896

Asymptotic description of laminar hypersonic boundary layer acceleration approaching sharp corner, assuming small interaction with outer inviscid flow

[AIAA PAPER 68-67]

23 p4059 A69-41883

Aerodynamic forces on hypersonic vehicle surfaces, deriving relations for weak interaction pressures induced in unsteady flow

24 p4306 A69-43676

HYPERSONIC COMBUSTION

Air intakes for fixed exhaust throat hypersonic ramjet engines, discussing configuration dependence on Mach number at beginning of combustion

[ONERA-TP-658]

07 p1203 A69-18418

HYPERSONIC FLIGHT

Air intakes for fixed exhaust throat hypersonic ramjet engines, discussing configuration dependence on Mach number at beginning of combustion

[ONERA-TP-658]

07 p1203 A69-18418

Supersonic combustion technology, noting air breathing propulsion systems for application to hypersonic flight

11 p2003 A69-25596

Aerodynamic problems posed by hypersonic flight from Mach 3 to 20, considering relationship to half cone with flat base

16 p2867 A69-31761

Shock layer properties, radiative and convective heat transfer about two hypersonic blunt bodies at zero angle of attack in assumed Martian atmosphere

[AIAA PAPER 69-634]

17 p2891 A69-33281

Nonequilibrium multicomponent ionization calculations for stagnation merged shock layer of hypersonic blunt body by successive accelerated replacement

[AIAA PAPER 69-655]

17 p2892 A69-33469

HYPERSONIC FLOW

Hypersonic flow of nonequilibrium diatomic gas on and near wedge, studying shock curvature variations

01 p0005 A69-10161

Pressure and shock shape determination for plane supersonic and low hypersonic flows past aerodynamic profiles

01 p0008 A69-11299

Hypersonic gas flow past blunt body problem solved by integral correlation method, taking into account radiation effects and gas dynamic parameter distribution in shock wave layer

02 p0188 A69-11651

Soviet book on hypersonic internal and external three dimensional viscous and nonviscous gas flow, emphasizing flow past slender blunt bodies

02 p0230 A69-11775

Hypersonic flow distribution and separation types over highly swept delta wings with trailing edge flaps at Mach 6

[AIAA PAPER 68-97]

02 p0189 A69-12522

Curved bodies substitution in unsteady hypersonic flow past slender sharp nosed bodies within framework of plane sections

02 p0191 A69-12576

Hypersonic flow past delta wings with attached shock wave, analysis leads to determination of closed flow pattern

02 p0191 A69-12577

Hypersonic perfect gas flow past delta wing with blunt edges at small angles of attack, noting constant drag coefficient

02 p0191 A69-12584

Soviet book on hypersonic flow past truncated cones at various angles of attack with allowance for physicochemical equilibrium transformations

03 p0362 A69-13633

Heat input influence on hypersonic flows past sphere and circular cylinder

[DVL-844]

03 p0364 A69-13663

One-dimensional self similar motion of relaxing gas, noting ODEs of process and gas dynamic parameters of flow field

04 p0588 A69-14623

Hypersonic turbulent boundary layer in adverse pressure gradients studied for transition, measuring static/pitot pressure, stagnation temperature and heat transfer rates

[AIAA PAPER 68-44]

04 p0588 A69-14716

Surface geometry of three dimensional inviscid hypersonic flows, developing tensor equations for geodesic, steepest descent and pressure approximations

04 p0542 A69-14718

Inviscid hypersonic flow of uniform equilibrium gas past axisymmetric blunt body

04 p0542 A69-14723

Stokes-like region around yawed needle in hypersonic strong interaction regime, discussing asymptotic analysis under Stewartson conditions

04 p0542 A69-14732

Shoulder pressure on slender cone/afterbody combinations in hypersonic inviscid flow of perfect gas

04 p0542 A69-14735

Blunt cone hypersonic roll damping derivative, using Mach number distribution and graphical integration

04 p0542 A69-14739

Rarefied hypersonic flow model for sharp flat plate in strong interaction regimes, discussing inviscid and viscous shock and merged layers subregions

04 p0589 A69-14747

Axisymmetric hypersonic flow of model gas over slender bodies with strong viscous interaction and shock wave extended to power law viscosity variation

05 p0744 A69-15720

Peculiarities of aerodynamic characteristics of flow past plate and pointed and blunt slender cones in viscous hypersonic thermodynamically ideal gas

05 p0699 A69-16673

Asymptotic theory concerning nonsimilar structure of blast wave with expanding interface applied to hypersonic perfect gas flow

06 p0860 A69-17636

Hypersonic body shaping for minimum drag and improved performance from view of flight regimes, discussing implications of pressure laws

[AIAA PAPER 69-181]

06 p0863 A69-18052

Autoration characteristics of various shapes in subsonic and hypersonic flows for mechanics of free flight reentry to earth impact

[AIAA PAPER 69-132]

06 p0863 A69-18062

Low temperature simulation of hypersonic melting ablation and wave patterns of gas-liquid interface

06 p0907 A69-18064

Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation

[AIAA PAPER 69-136]

06 p0864 A69-18141

Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics

[AIAA PAPER 69-187]

06 p0865 A69-18176

Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique

[AIAA PAPER 69-140]

06 p0865 A69-18184

Flow near leading edge of sharp insulated and cooled flat plates, using Monte Carlo direct molecular simulation

[AIAA PAPER 69-141]

06 p0866 A69-18208

Hypersonic laminar boundary layers on compression corner model, studying flap lengths effects and mass transfer

[AIAA PAPER 69-36]

06 p0866 A69-18214

Heat transfer to wedge in nearly free-molecular hypersonic flow, of strongly rarefied gas

07 p1050 A69-18707

Approximation of Chaplygin plane motion equations of gas flow at high supersonic velocities

07 p1120 A69-18754

Hypersonic flow past blunt body near stagnation point, noting surface layer characterized by increased density and decreased entropy of gas

07 p1050 A69-18755

Laminar boundary layer flow on sphere in hypersonic flow of equilibrium dissociating air

07 p1050 A69-18756

Three dimensional optimum hypersonic wings construction for wave drag minimization for given lift

[AIAA PAPER 68-158]

09 p1430 A69-21944

Book on dynamics and thermodynamics of gas at hypersonic velocities and extremely high altitudes

09 p1483 A69-22400

Laminar boundary layer separation and heat transfer on zero incidence cone at hypersonic speed, noting wall temperature and Reynolds number effects

09 p1433 A69-22609

High enthalpy air flow in hypersonic conical nozzle, calculating chemical and thermodynamic nonequilibrium effects with computer program

09 p1433 A69-22610

Noninterfering instrumentation techniques to measure hypersonic flowfield parameters in wind tunnels, measuring flight time of pulsed laser generated spark for velocity

10 p1672 A69-23266

Axisymmetric bodies longitudinal contours for hypersonic flow minimum drag, considering Newtonian pressure distribution and skin friction

10 p1632 A69-23886

Angle of attack and Reynolds number effect on hypersonic flow past circular cone, obtaining shock wave shape
[ONERA-TP-692] 11 p1818 A69-24751

Kinetic theory for spherical expansion of hypersonic jet flow indicating translational freezing in hypersonic source expansion 11 p1870 A69-25006

Spherically blunted 15 degree semivertex angle cone flow field parameters at Mach 8.6, measuring pitot pressure and shock shape 11 p1818 A69-25143

Flat plate in two dimensional low density hypersonic flow wind tunnel tested for aerodynamic effects on spacecraft reentry 11 p1819 A69-25424

Aerodynamic characteristics of flat plate in viscous hypersonic flow incident at zero or small angle of attack, using numerical integration 11 p1820 A69-25471

Hypersonic viscous gas flow past thin bodies, deriving equations for interactions between boundary layer and external flow 11 p1820 A69-25472

Supersonic and hypersonic flow of rarefied gas around blunted cylinders at various angles of attack, noting pressure distribution on model surface 11 p1821 A69-25478

Aerodynamic measurements on Apollo CM model at hypersonic flow simulating earth orbital reentry trajectory 12 p2012 A69-26800

Laminar boundary layer studies by finite difference computer program for Mach numbers up to 15 13 p2248 A69-28173

Roughness effects on boundary layer transition up to Mach 16 in hotshot wind tunnel [AIAA PAPER 68-377] 13 p2242 A69-28213

Free flight sharp cone drag measurements in rarefied hypersonic flow 13 p2199 A69-28244

Longshot free piston gun tunnel for high Reynolds number hypersonic flow tests [AIAA PAPER 69-333] 13 p2249 A69-28269

Vitiated air contamination effects on combustion and hypersonic air breathing engine ground tests [AIAA PAPER 69-338] 13 p2325 A69-28274

Supersonic Preston tube correlations for Mach number and Reynolds number effects on hypersonic turbulent skin friction on adiabatic surfaces, simplifying correlation [AIAA PAPER 69-345] 13 p2249 A69-28280

Angle of attack and blunting effect on aerodynamic lift and drag coefficients of flat plates in hypersonic flow at low Reynolds number 13 p2200 A69-28358

Unsteady pressure on oscillating slender cone in hypersonic flow derived by expanding flow equations in powers of shock density parameter 14 p2389 A69-29020

Boundary layer physical and chemical processes effect on dynamic parameters of high temperature hypersonic gas flow past blunt bodies 14 p2391 A69-29620

Diffuser performance in hypersonic shock wind tunnel for nitrogen flow, discussing steady shock wave and separation zone formation time 14 p2391 A69-29622

Optimum surface for thick delta wing in hypersonic flow obtained by variational method, assuming closed leading and trailing edges 16 p2731 A69-31559

Wall pressure and heat flux distribution in hypersonic flow on delta wings at variable angle of attack for low Reynolds numbers 16 p2731 A69-31605

Subliming ablation effects on boundary layer transition for cones in hypersonic flow, discussing Reynolds numbers measured in wind tunnel tests [AIAA PAPER 68-40] 16 p2732 A69-31881

Streamline flow of ideal stable gas with constant ratio of specific heats around conical body with arbitrary taper, determining flow velocity components 16 p2732 A69-32126

Shock tunnel facility generating short duration high velocity high density air flow with equilibrium chemical simulation of free stream flight conditions [AIAA PAPER 68-17] 16 p2766 A69-32167

Monograph on solutions to equations for unsteady flow of ideal gases, with applications to hypersonic flows, based on three space coordinates and time 16 p2773 A69-32428

Aerodynamic characteristics of cone/cylinder and cone/cylinder/cone configurations with blunted cones in hypersonic flows at small angles of attack 17 p2889 A69-33122

Boundary layer trip geometry, size and location effect on position of transition at hypersonic speeds 17 p2950 A69-33249

Hypersonic slender cone zero angle of attack drag in rarefied continuum and noncontinuum flow in shock tunnel, indicating body dimension influence in transition regime [AIAA PAPER 69-711] 17 p2891 A69-33445

Exact similarity solutions of hypersonic small disturbance equations for steady flow, discussing equations of state and motion and dissociating gas flow [AIAA PAPER 69-707] 17 p2953 A69-33448

Eddy viscosity models adapting laminar boundary layer solution techniques to turbulent flows compared with measurements in hypersonic flows [AIAA PAPER 69-688] 17 p2954 A69-33454

Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases [AIAA PAPER 69-716] 17 p2891 A69-33463

Supersonic and hypersonic flow of inviscid ideal gas over conical delta wings using three dimensional method of characteristics [AIAA PAPER 69-646] 17 p2893 A69-33486

Flow field study of merging between bow shock and viscous layer upstream of highly cooled axisymmetric blunt body in rarefied hypersonic stream [AIAA PAPER 69-656] 17 p2893 A69-33498

Nonequilibrium, real gas and nose bluntness effects on hypersonic slender body flows, analyzing similitudes, free stream temperature, velocity and relaxation [AIAA PAPER 69-708] 17 p2894 A69-33501

Strong shock wave structural model, considering near molecular beam, upstream hypersonic and downstream subsonic flows and beam-continuum conversion by collision 18 p3120 A69-34457

Transport processes effect in shock wave on hypersonic flow past blunt body in neighborhood of stagnation point, noting heat transfer 18 p3086 A69-34910

Electron beam fluorescence probe and afterglow investigation for hypersonic He flow visualization, observing qualitative structure 19 p3291 A69-35722

Hypersonic rarefied gas flow past flat plate with sharp leading edge and past circular cylinder, noting wake structure similarity to viscous theory prediction 19 p3294 A69-35755

Aerodynamic characteristics of two dimensional nonexpandable flexible sail in hypersonic inviscid flow, discussing roles of sail length and chord and angle of attack 19 p3237 A69-35814

Nose bluntness effect on hypersonic flow for slender blunt bodies with arbitrarily shaped lateral surfaces at small attack angle 19 p3239 A69-36402

Wing tunnel and theoretical studies of hypersonic wall flow on cone, considering static pressure and convection heat flux density effects 19 p3241 A69-36759

Stagnation point heating in hypersonic gas flow past blunt bodies, considering radiative transfer effects on shock wave temperature and density distribution, wave separation, etc 20 p3457 A69-36981

Hypersonic gas flow past blunt bodies valid for any optical thickness of gas, allowing for absorption coefficients, dependence on temperature, pressure and frequency 20 p3457 A69-36993

Surface pressure, skin friction and heat transfer measurements on sharp flat plates and wedges in low density hypersonic flow, noting slip velocity 20 p3458 A69-37186

Free flight telemetered base pressure test data correlation for high Mach numbers, noting facilities and instrumentation 20 p3458 A69-37196

Conical delta wings in supersonic-moderate hypersonic flow, studying yaw effects on pressure distribution behind shock wave 20 p3459 A69-37593

Monte Carlo simulation for studying rarefied hypersonic gas flow about slender cones and flat plates 20 p3459 A69-37902

Monograph on forces exerted by air during yawing motion of sharp cones in supersonic and hypersonic flows by semilinear method 20 p3460 A69-37919

Three dimensional laminar boundary layer hypersonic flow about slender conical vehicles, analyzing 24 p4306 A69-43674

transverse surface curvature effect, studying Reynolds number, cone angle, etc [ASME PAPER 69-FE-23] 20 p3460 A69-37992

Gaseous injection effect on laminar boundary layer hypersonic flow around transpiration-cooled blunt bodies analyzed by integral method and Newtonian model 21 p3644 A69-39014

Optimum form for hypersonic profile with minimum drag for given bending strength solved by variational method 21 p3644 A69-39099

Axisymmetric and two dimensional flows over blunt bodies at high Mach numbers by integral relations method 21 p3645 A69-39790

Aerodynamic forces under space-like conditions measured by swing balance, using large scale molecular beams for rarefied hypersonic gas flow simulation [AIAA PAPER 69-1032] 22 p3924 A69-40400

Mach 8 flow field effects and forces on small delta tail surfaces mounted on body of revolution at various angles of attack [AIAA PAPER 68-891] 22 p3859 A69-40539

Hypersonic flow for low Reynolds number, including magnetic field and wall temperature effects on heat transfer and skin friction for blunt shapes 22 p3860 A69-40540

Shock wave detachment distance in front of spheres and cylinders in hypersonic flow, using magnetic shock tubes and Mach 5 and 18 wind tunnels 22 p3931 A69-40710

Piston motion influence on gaseous motion set up by constant energy explosion, applying to steady high Mach number flow past blunt nosed object 22 p3931 A69-40892

Frictionless supersonic and hypersonic flow of ideal gas of constant specific heat past cone with deformed axis at zero angle of attack 23 p4058 A69-41579

Radiative transfer effects in low Reynolds number or merged layer regime of hypersonic flow about axisymmetric blunt bodies, including thin shock layer theory 23 p4059 A69-41885

Mach 42 test measuring surface pressures, surface heat transfer rates and shock wave shapes in strong interaction regime for sharp and blunt plates [AIAA PAPER 68-720] 23 p4059 A69-41886

Hypersonic turbulent flow heat transfer and pressure data for flat plate containing steps and cavities obtained in hypersonic wind tunnel [AIAA PAPER 68-673] 23 p4060 A69-41902

Windward shock angle parameters on yawed cones correlated in single variable for hypersonic flow 23 p4060 A69-41918

Nonlifting blunt axisymmetric hypersonic shape determination to maximize pressure drag for given convective heat transfer, diameter and free-stream conditions 24 p4244 A69-42960

Underexpanded plane hypersonic gas jet injection into resting medium from straight nozzle, discussing shock wave formation 24 p4246 A69-43484

Intense heat exchange narrow zones on blunted semicone surfaces in hypersonic gas flows ascribed to large Reynolds numbers 24 p4246 A69-43494

Hypersonic viscous interaction, studying axisymmetric flow over slender sharp nose cones at zero angle of attack and three dimensional flow over sharp flat plate 24 p4248 A69-43579

Inviscid hypersonic flow over oscillating slender wedge, defining equivalent phase shift 24 p4248 A69-43582

Radiation equilibrium temperature measured downstream of transpiration cooled gas flow near slender cone vertex in continuous flow hypersonic tunnel 24 p4248 A69-43588

Perturbation equations for oscillating wedges and carot wings with attached bow shock in hypersonic and supersonic flows 24 p4249 A69-43659

Mass injection effects on viscous hypersonic low Reynolds number shock layer downstream and at stagnation point in blunt forebody region analyzed for non-reacting gas 24 p4249 A69-43663

Strong shock and Mach waves interaction generated downstream of thick wedge body shock in unsteady hypersonic and supersonic flows 24 p4306 A69-43674

Free flight telemetry base pressure measurements on slender cones and domed afterbodies in hypersonic laminar flow, using shock tunnel test facility [AIAA PAPER 68-698] 24 p4249 A69-43675

Cylindrical models in hypersonic rarefied flow, determining drag data by free flight technique 24 p4249 A69-43677

HYPERSONIC FORCES

Scaling laws for nose bluntness effects on hypersonic aerodynamics of bodies of revolution [AIAA PAPER 68-1158] 03 p0362 A69-13566

HYPERSONIC GLIDERS

Hypervelocity glide vehicle optimum maneuvers, finding lift optimal control law for maximization of final velocity or altitude 17 p3025 A69-32836

HYPERSONIC HEAT TRANSFER

Boundary layers and heat transfers at shock tube walls, establishing approximate solution of boundary layer equation for laminar and turbulent cases [ONERA-TP-647] 03 p0412 A69-12875

Heat transfer and drag of cylinders with cavities at hypersonic speeds measured by platinum film thermometer and strain gauge balance in gun tunnel [DVL-850] 04 p0543 A69-14822

Hypersonic laminar and transitional heat transfer rate distribution on spherically blunted cones 05 p0696 A69-15707

Laminar boundary layer separation and heat transfer on zero incidence cone at hypersonic speed, noting wall temperature and Reynolds number effects 09 p1433 A69-22609

Multirecompression heater for pure airflow tests of ballistic vehicles and hypersonic aircraft [AIAA PAPER 69-332] 13 p2242 A69-28268

Flow characteristics and wall heat transfer in separated flow region of annular cavity at free stream hypersonic speed and high gas temperature [AIAA PAPER 68-672] 20 p3458 A69-37185

Hypersonic flow for low Reynolds number, including magnetic field and wall temperature effects on heat transfer and skin friction for blunt shapes 22 p3860 A69-40540

Mach 42 test measuring surface pressures, surface heat transfer rates and shock wave shapes in strong interaction regime for sharp and blunt plates [AIAA PAPER 68-720] 23 p4059 A69-41886

HYPERSONIC INLETS

Shock wave-boundary layer interaction configurations for hypersonic propulsion device inlets under transitional and turbulent conditions, noting heat transfer rate 06 p0915 A69-18172

Collection of articles on ramjets including reaction propulsion, hypersonic inlets, combustion problems, Griffon aircraft, storable liquid fuels, etc 16 p2837 A69-32608

Turbulent boundary layer subject to sudden pressure variation due to rapid expansion or shock wave, noting application to hypersonic ramjet air intake [ICAS PAPER 68-42] 17 p2895 A69-33587

HYPERSONIC NOZZLES

Dense gas effects in free piston hypersonic wind tunnel, discussing Longshot facility, free piston cycle, reservoir conditions decay and hypersonic nozzle flow [AIAA PAPER 69-169] 06 p0907 A69-18188

High enthalpy air flow in hypersonic conical nozzle, calculating chemical and thermodynamic nonequilibrium effects with computer program 09 p1433 A69-22610

Laminar boundary layers in low density supersonic and hypersonic conical and axisymmetric nozzles, treating displacement, transverse curvature, velocity slip and temperature jump [AIAA PAPER 69-653] 17 p2954 A69-33458

HYPERSONIC REENTRY

Acoustic probe for measuring pressure fluctuations on hypersonic reentry vehicle, discussing flow characteristics and heat shield ablation effects on frequency response 01 p0008 A69-11278

Unsteady aerodynamics of ablating flared reentry body, noting complications due to blunted nose shear flow and entropy gradient effects 02 p0189 A69-12524

Flight tests in wide Mach number range of blunt nosed flare stabilized hypersonic reentry nose cone, deducing drag and stability coefficients [AIAA PAPER 68-1145] 03 p0521 A69-13668

Inert gas discontinuous injection into nonequilibrium laminar boundary layer 06 p0860 A69-17635

Transpiration cooling of reentry vehicle nosetips, noting two dimensional aspects of porous wall coolant flow and matrix-coolant energy exchange [AIAA PAPER 69-96] 06 p1039 A69-18212

Radiant heat transfer in hypersonic aerodynamic heating, discussing radiant flux and carbon dioxide concentration in reentry problems 11 p2002 A69-25233

Hypervelocity reentry simulation problems for slender and blunt bodies, defining significant parameters 15 p2681 A69-30376

Ion and electron distributions in chemical nonequilibrium boundary layer flow over hypersonic reentry vehicle, discussing plasma sheath and boundary layer thickness relations 16 p2769 A69-31874

Reentry flight test vehicle development for West German space program, using hypersonic model to determine controllability and aerodynamic stability 16 p2867 A69-31934

Radiative energy emission by blunt vehicle shock layer under severe entry conditions, discussing flow properties and radiative transfer coupling [AIAA PAPER 69-719] 18 p3084 A69-34416

Radiating gas flows during hypersonic planetary reentry, discussing atmospheric composition, shock layer characteristics, nonequilibrium flows, etc 20 p3513 A69-36982

Hypersonic parachute structural design using nylon ribbon, glass fiber heat shield and ablative coating construction [AIAA PAPER 68-963] 21 p3647 A69-39230

Reentry Vehicle Altitude-Velocity Sensor for continuously measuring hypersonic vehicles free stream density and velocity in atmosphere at low angle of attack [AIAA PAPER 69-866] 21 p3725 A69-39392

Spacecraft trajectory control algorithm for hypersonic reentry, describing onboard equipment role and simulation results 21 p3767 A69-39649

Hypersonic reentry spheres drag coefficients derived from radar measurements 23 p4059 A69-41898

Flight tests in wide Mach number range of blunt nosed flare stabilized hypersonic reentry nose cone, deducing drag and stability coefficients [AIAA PAPER 68-1145] 24 p4394 A69-43250

Near wake electron density distribution for reentry configuration models in shock tunnel with minimum flow interference [AIAA PAPER 68-161] 24 p4248 A69-43643

Image intensifier coupling to electron scanning image converter to increase time-resolving spectrograph sensitivity in simulated reentry studies 24 p4317 A69-43759

HYPERSONIC SHOCK

Shock tunnel hypersonic flow effect on critical Weber number for zirconium drop breakup in partially and fully molten states 12 p2063 A69-26802

Energy transfer mechanisms between translational, rotational, vibrational, chemical and electronic degrees of freedom in hypersonic shock wave in high temperature air 12 p2063 A69-26969

MGD hypersonic shock layer at spherically blunted body analyzed by utilizing induction equation including Hall effect [AIAA PAPER 69-722] 17 p3012 A69-33494

Electron concentration in hypersonic nonequilibrium shock layer flow by two wavelength laser interferometry, noting wavelength dependence of refractivity 19 p3306 A69-35742

Probe for spectral radiation from luminous gas-cap stagnation region to determine driver gas in test section of hypersonic shock tunnel 19 p3294 A69-35753

Conical delta wings in supersonic-moderate hypersonic flow, studying yaw effects on pressure distribution behind shock wave 20 p3459 A69-37593

HYPERSONIC SPEED

Lift drag ratio attainable by optimal transversal contour slender conical lifting body at hypersonic speeds 06 p0861 A69-17640

Leeward side of delta wing with sharp leading edges at hypersonic speeds, noting Prandtl-Meyer expansion [AIAA PAPER 68-675] 09 p1431 A69-21992

Hypersonic flight test data of Berenice missile compared to wind tunnel test data, discussing in-flight flow separation, Mach-Reynolds torque, etc 10 p1632 A69-23842

Nose bluntness effect on hypersonic unsteady aerodynamics of flared and conical bodies of revolution [AIAA PAPER 68-889] 12 p2012 A69-26794

Mach number, cone angle, bluntness and wall to recovery temperature ratio effects on slender cones boundary layer transition measurements at hypersonic speeds 17 p2890 A69-33250

Nonuniform heating rates during laminar boundary layer transition on slender cone at hypersonic speeds 18 p3085 A69-34435

Law of wall parameters for compressible turbulent boundary layer with air injection through wall determined by analyzing data for hypersonic speeds 21 p3692 A69-38685

Hypersonic lifting bodies with high lift-drag ratio, presenting flat-top wing-body combination aerodynamic characteristics 21 p3645 A69-39793

Newton formula and Ritz method to determine wing shape with blunt leading edge, considering minimum drag achievement at hypersonic velocities 24 p4247 A69-43497

HYPERSONIC TEST APPARATUS

Hypersonic surface measurements and flowfield properties about slender cones in hypersonic viscous interaction regime [AIAA PAPER 68-2] 02 p0189 A69-12520

Free flight static, dynamic stability and drag data for 10 degree semiangle cone obtained at 8-16 Mach numbers [AIAA PAPER 69-133] 06 p0862 A69-18050

Atmospheric entry testing in terms of velocity-altitude duplication, suggesting multistage rocket propelled aeroballistic range type testing [AIAA PAPER 69-166] 06 p0907 A69-18189

Hypersonic slipper bearing problem in rocket boosted sleds, discussing flow model consisting of laminar stagnation region and boundary layers [AIAA PAPER 68-756] 09 p1477 A69-22003

Hypersonic drag and shock wave characteristics of blunt bodies including cones, spherical nose and concave nose bodies 09 p1433 A69-22568

Hypersonic test equipment and programs at CEAT /France/, describing compressor, wind tunnels and several experiments 16 p2766 A69-32071

Kyoto University hypersonic gun tunnel equipment and performance data, discussing central control system, automatic operating system and double diaphragm device 22 p3927 A69-40587

HYPERSONIC VEHICLES

NT HL-10 REENTRY VEHICLE

Hypersonic lifting body configurations for maximum lift drag ratios and subject to volumetric efficiency, nose heating limit and skin friction constraints 02 p0189 A69-12378

Minimum drag configurations with low heat transfer for hypersonic bodies of revolution, noting performance at supersonic speeds 02 p0191 A69-12578

Hypersonic lifting body optimization under single and combined constraints of volumetric efficiency, heating and skin friction, using numerical search routine [AIAA PAPER 68-1157] 03 p0362 A69-13557

Limiting speed for target tracking hypersonic vehicle due to electrons formation through aerodynamic heating, calculating allowable flow conditions, maximum speeds and electron distribution 07 p1086 A69-19509

Ceramic radomes for hypervelocity aerospace vehicles, considering wide temperature environment effects on stability and properties 07 p1171 A69-19511

Hypersonic missile interceptor vibration characteristics in lower atmosphere, noting role of base pressure excitation 09 p1614 A69-21890

Hypersonic vehicles multivariable flight control systems, analyzing flight path in terms of equation of motion of longitudinal mode 12 p2128 A69-26066

Cone-conical-frustum configurations meeting center of gravity requirements for higher hypersonic lift-drag ratios in axisymmetric manned spacecraft 21 p3644 A69-39237

Aerodynamic forces on hypersonic vehicle surfaces, deriving relations for weak interaction pressures induced in unsteady flow 24 p4306 A69-43676

HYPERSONIC WAKES

Microwave and far IR molecular rotational absorption spectra investigated for measuring concentrations of reacting molecular and atomic species in hypersonic projectile wakes

01 p0006 A69-10961

Viscous interaction solution obtained for near wake of axisymmetric bodies by integral moment method and axisymmetric incompressible similar wake solutions

06 p0860 A69-17633

Laminar near wake flow field of two dimensional adiabatic circular cylinder with surface mass transfer

[AIAA PAPER 69-67] 06 p0862 A69-18044

Axisymmetric hypersonic near wake with base injection, discussing zero injection case, jet-plume interaction and mixing region

[AIAA PAPER 69-66] 06 p0914 A69-18115

Turbulent density fluctuations in near wake of hypersonic axisymmetric slender body measured photometrically with near UV absorption of sulfur dioxide in flow

[AIAA PAPER 69-70] 06 p0864 A69-18158

Electron density fluctuations in turbulent wakes of hypersonic projectiles in ballistic ranges, discussing use of cylindrical Langmuir probe for direct measurement

09 p1496 A69-21934

Analog simulation of cylinder wake potential for hypersonic motion in collisionless plasma

11 p1926 A69-24756

Nose bluntness and model scale effect on radial and axial variation of wake fluid and plasma properties by hypervelocity shock tunnel

[AIAA PAPER 69-330] 13 p2242 A69-28266

Laminar and turbulent hypersonic wakes trailing blunt bodies studied by finite difference method, taking into account pressure gradients and nonequilibrium chemical reactions effects

14 p2391 A69-29618

Hypersonic wakes interference effects induced by facility instrumentation, discussing results of wind/shock tunnel investigations

15 p2588 A69-30475

Steady state plasma wind tunnel for flow around ionospheric satellites, studying wakes of cylinders and spheres

[AIAA PAPER 69-673] 17 p2893 A69-33488

Laminar recompression behavior downstream of stagnation point behind hypersonic slender body, obtaining finite difference numerical solutions for near wake flow field

[AIAA PAPER 69-713] 18 p3085 A69-34417

Electrostatic probes calibration and use for hypersonic wakes behind projectiles in ballistic range

19 p3291 A69-35717

Ablating sphere viscous wake using image converter camera, computing luminance radial distribution by unit volume

19 p3306 A69-35739

Double knife-edged double-crossing schlieren apparatus analyzed for operation principle and applied to measure hypersonic wake characteristics in hotshot tunnel

19 p3293 A69-35740

Hypersonic rarefied gas flow past flat plate with sharp leading edge and past circular cylinder, noting wake structure similarity to viscous theory prediction

19 p3294 A69-35755

Mars entry capsule ionized wake producing circularly polarized antenna radiation null region, noting effect on communication blackout time

22 p3914 A69-40701

Bistatic radar scattering cross sections for reentry vehicle with ionized wake

23 p4116 A69-41593

Fluid mechanical structure of laminar hypersonic wake behind sharp circular cone, investigating flow field at zero angle of attack and adiabatic wall temperature

24 p4247 A69-43576

Near wake electron density distribution for reentry configuration models in shock tunnel with minimum flow interference

[AIAA PAPER 68-161] 24 p4248 A69-43643

HYPERSONIC WIND TUNNELS

U HYPERVELOCITY WIND TUNNELS

HYPERSONICS

Stimulating effects of space hypersonic experiments on technical and scientific progress, discussing steel degassing, welding, electroforming and geological applications

[UN PAPER 68-95459] 06 p0857 A69-17083

Holography for optical analysis of hypersonic aerodynamics in single shot firing tunnel

12 p2087 A69-26176

HYPERSPACES

Quantum geometrodynamics in superspace, noting dynamical evolution of geometry with no real mass energy sources

05 p0793 A69-15773

HYPERSPHERES

Einstein equations solution for empty space without singularities containing metric, with closed homogeneous space type hypersurfaces expanding anisotropically

15 p2690 A69-30732

HYPERTENSION

Essential hypertension in selection and evaluation of airline pilots, discussing use of thiazide therapy

06 p0875 A69-17850

Blood pressure measurements of pilots at rest during tests under stress on bicycle ergometer revealing transient hypertension

23 p4087 A69-41795

HYPERTHERMIA

Human metabolic response to hypothermia measured over wide range of work intensities and durations

22 p3891 A69-40215

HYPERTONIA

U OSMOSIS

HYPERTROPHY

U GROWTH

HYPERVELOCITY CRATERING

U PROJECTILE CRATERING

HYPERVELOCITY FLOW

Matched asymptotic expansions method applied to problem of hypervelocity atmospheric entry, noting solution division into outer Keplerian region and inner expansion region

09 p1430 A69-21964

Fluorescence stimulated by high energy electron and ion beams, determining vibrational temperature and concentration of molecular oxygen in high enthalpy wind tunnel flows

13 p2302 A69-28265

Nose bluntness and model scale effect on radial and axial variation of wake fluid and plasma properties by hypervelocity shock tunnel

[AIAA PAPER 69-330] 13 p2242 A69-28266

Isentropic compression tube with piston compressor for producing hypervelocity test flows, noting shock speeds

[AIAA PAPER 69-334] 13 p2249 A69-28270

Hypervelocity shock wave propagation in rarefied gas, observing anomalous wave attenuation

14 p2433 A69-29846

Pressure and temperature surveys of Mach 27-47 nozzle boundary layer at Ames M-50 He tunnel, determining velocity profiles, wall friction coefficient, etc

[AIAA PAPER 69-686] 17 p2953 A69-33441

Hypervelocity ionized gas flow analysis, allowing for finiteness of energy exchange duration between electrons and ions

19 p3379 A69-36383

Gaseous mixtures for hypervelocity applications, studying equilibrium conditions and thermodynamic properties for shock and constant volume heating processes

22 p4049 A69-40266

HYPERVELOCITY IMPACT

Hypervelocity impact effect on structural honeycomb spacecraft wall configurations, stressing design and wall thickness parameters

[AIAA PAPER 68-314] 02 p0345 A69-12389

Transient response of targets subjected to hypervelocity impacts and quantitative aspects of impact process, noting study of wax targets interiors

07 p1234 A69-19380

Hypersonic wind tunnel for erosion test of multiple particle impacts, considering dust on cork, carborazole and silicone rubber

[AIAA PAPER 69-341] 13 p2243 A69-28277

Computer program for compressible fluid flows with space and time dependent variables, discussing hypervelocity impact

[AIAA PAPER 69-353] 13 p2365 A69-28286

Characteristics method for stress waves from hypervelocity impact of circular cylinder on half space, discussing numerical diffusion effect on pressure and flow fields

[AIAA PAPER 69-355] 13 p2365 A69-28287

Numerical method for time dependent compressible Navier-Stokes equations applied to axisymmetric flow field produced by hypervelocity impact, examining viscous effects

[AIAA PAPER 69-354] 13 p2366 A69-28288

Projectile impacts into laminated targets consisting of plastic layers backed by Al substrates using SHAPE

code with hydrodynamic elastoplastic distortional model

[AIAA PAPER 69-356] 13 p2366 A69-28289

Hypervelocity impact of spheres on thin targets studied with numerical solutions utilizing STEEP code two dimensional technique based on hydrodynamic elastoplastic model

[AIAA PAPER 69-357] 13 p2366 A69-28290

High pressure Hugoniot points made by hypervelocity gas gun, using laser beams to measure impact velocity and pressure transducer for impact stress

[AIAA PAPER 69-358] 13 p2264 A69-28291

Experimental and predicted shock axial pressure variations for semiinfinite metallic targets during high velocity impact, using Al alloys and Cu

[AIAA PAPER 69-361] 13 p2366 A69-28294

Hypervelocity impact flash resolved into sub-microsecond continuum radiation pulse succeeded by slow rising long duration light pulse from neutral atomic line emission

[AIAA PAPER 69-364] 13 p2313 A69-28296

Impact crater cross section in fused silica, describing photomicrographic technique for distinguishing hypervelocity from low energy impacts

[AIAA PAPER 69-367] 13 p2366 A69-28299

Hypervelocity impact dynamics on copper cube targets imbedded with nickel wires, discussing terminal positions, Vickers hardness, flow fields, etc

[AIAA PAPER 69-368] 13 p2367 A69-28300

Fracture of bumper protected fuel tanks subjected to hypervelocity meteoroid impact, applying method of characteristics to stress wave propagation in tank walls

[AIAA PAPER 69-369] 13 p2367 A69-28301

Pyrex spheres accelerated to 15 km/sec by plasma rail gun to study hypervelocity impact in thin stainless steel and Al targets

[AIAA PAPER 69-378] 13 p2368 A69-28308

Bumper materials effect on two component hypervelocity impact shields performance, noting material density influence

[AIAA PAPER 69-379] 13 p2283 A69-28309

Two plate meteoroid shields effectiveness determined by analyzing debris cloud ejected behind front plate after hypervelocity impact

[AIAA PAPER 69-380] 13 p2368 A69-28310

Hypervelocity micrometeor impact sites identification on aluminized glass, using conchoidal pattern as criterion in analysis

18 p3199 A69-34952

HYPERVELOCITY LAUNCHERS

NOL hypervelocity launcher heat transfer and erosion analysis by experiment and computer simulation

[AIAA PAPER 69-336] 13 p2242 A69-28272

HYPERVELOCITY PROJECTILES

Microwave and far IR molecular rotational absorption spectra investigated for measuring concentrations of reacting molecular and atomic species in hypersonic projectile wakes

01 p0006 A69-10961

Recovery behavior of nickel strain hardened by impact loading by aluminum projectiles, showing microstructure correlation with stress levels

03 p0447 A69-13620

Ablation surface patterns and resulting roll torques and roll behavior of hypervelocity vehicles

[AIAA PAPER 69-180] 06 p1036 A69-18051

Schlieren high speed photography systems for ballistic projectile studies, discussing use of gas lasers as nanosecond light sources

12 p2088 A69-26182

Hypervelocity projectile size and density effect on ballistic limit of dual sheet spacecraft meteoroid protection structures, considering penetration of low and high density particles

[AIAA PAPER 69-376] 13 p2367 A69-28306

Pyrex spheres accelerated to 15 km/sec by plasma rail gun to study hypervelocity impact in thin stainless steel and Al targets

[AIAA PAPER 69-378] 13 p2368 A69-28308

Electrostatic probes calibration and use for hypersonic wakes behind projectiles in ballistic range

19 p3291 A69-35717

High speed photography for hypervelocity aeroballistic ranges, using giant pulse ruby laser for front lighting

19 p3306 A69-35732

Laser shadowgraph technique for visual observation of projectiles surface flying at hypersonic velocity along ballistic trajectory

22 p3963 A69-40601

HYPERVELOCITY WIND TUNNELS

NT CASCADE WIND TUNNELS

NT HOTSHOT WIND TUNNELS

NT PLASMA JET WIND TUNNELS

NT SHOCK TUNNELS

Intermittent traversing gear with stepping motor for small hypersonic helium wind tunnels

01 p0054 A69-10219

Blow-down facility for hypersonic testing of air breathing engines, describing test cell, air heating system, exhausters and data system

02 p0227 A69-11756

Ground simulation of reentry observables with ablation, studying ablation products interaction with flow-field of wave superheater hypersonic tunnel

02 p0229 A69-12502

Spatial distribution of three dimensional laminar boundary layer transition zone on sharp half angle cone from hypersonic wind tunnel tests [AIAA PAPER 69-12]

06 p0863 A69-18112

Dense gas effects in free piston hypersonic wind tunnel, discussing Longshot facility, free piston cycle, reservoir conditions decay and hypersonic nozzle flow [AIAA PAPER 69-169]

06 p0907 A69-18188

Free stream turbulence influence on stagnation zone heating in arc heated hypersonic facilities, obtaining stagnation point heating rates [AIAA PAPER 69-167]

06 p1039 A69-18198

Noninterfering instrumentation techniques to measure hypersonic flowfield parameters in wind tunnels, measuring flight time of pulsed laser generated spark for velocity

10 p1672 A69-23266

Hypersonic flight test data of Berenice missile compared to wind tunnel test data, discussing in-flight flow separation, Mach-Reynolds torque, etc

10 p1632 A69-23842

Time varying flow properties effects on hypersonic wind tunnel spectroscopic measurements, considering direct emission and electron beam techniques [AIAA PAPER 69-331]

13 p2242 A69-28267

Longshot free piston gun tunnel for high Reynolds number hypersonic flow tests [AIAA PAPER 69-333]

13 p2249 A69-28269

Axisymmetric hypersonic wind tunnel nozzle design by determining inviscid contour and correcting for turbulent boundary layer growth [AIAA PAPER 69-337]

13 p2200 A69-28273

Hypersonic wind tunnel for erosion test of multiple particle impacts, considering dust on cork, carborazole and silicone rubber [AIAA PAPER 69-341]

13 p2243 A69-28277

Multimegawatt arc heater for hypersonic continuous flow high enthalpy wind tunnel

15 p2586 A69-30378

Hypersonic test equipment and programs at CEAT /France/, describing compressor, wind tunnels and several experiments

16 p2766 A69-32071

Transient calibrations for Ge surface thermocouple heat flux sensors used in hypervelocity impulse tunnel

19 p3292 A69-35725

Miniature probe with short time response for total temperature profile measurements in hypersonic turbulent boundary layer on wall of hypersonic tunnel nozzle

19 p3293 A69-35751

Wing tunnel and theoretical studies of hypersonic wall flow on cone, considering static pressure and convection heat flux density effects

19 p3241 A69-36759

Hypersonic wave riders lift and drag coefficients, lift drag ratio, shock profile and pressure distribution, discussing wind tunnel measurements of caret wings

21 p3645 A69-39802

Kyoto University hypersonic gun tunnel equipment and performance data, discussing central control system, automatic operating system and double diaphragm device

22 p3927 A69-40587

Arc-heated hypersonic wind tunnel for simulated spacecraft reentry environment, aerodynamic heating characteristics and research applications

22 p3927 A69-40595

HYPERVENTILATION

Age and carbon dioxide tension effects on EEG of adolescents and adults, discussing end-tidal carbon dioxide during routine hyperventilation

22 p3872 A69-40162

Carbon dioxide washout during square wave hyperventilation in man, postulating blood flow factor

22 p3885 A69-40975

Hyperventilation induced hemolysis in dogs measured as function of exposure time, body temperature and blood pH

22 p3887 A69-41192

Hyperventilation effect on flight personnel, discussing oxygen and carbon dioxide partial pressures, symptoms and clinical signs

24 p4269 A69-43410

HYPNOSIS

EEG alpha activity relationship to laterality of reflective eye movements, indicating physiological correlates of hypnotizability

22 p3887 A69-41213

Hypnotic compounds properties influencing REM /rapid eye movements/ stage, discussing insomnia problems with jet flight crew and passengers

24 p4277 A69-43389

HYPODYNAMIA

Hypokinesia and nutrition deficiency effect on blood coagulation, noting combination with accelerations may lead to hypocoagulation

13 p2212 A69-28625

Prolonged hypokinesia effect on human resistance to physical stress, noting prophylactic influence of physical exercises

17 p2907 A69-32939

Muscular strength dynamometric measurements in subjects during prolonged inactivity with restricted caloric and protein intake, showing decrease in strength

21 p3653 A69-38901

Radioisotopic determination of haemodynamic and bioelectric disturbances of rat striated muscles subjected to acceleration and hypokinesia

24 p4268 A69-43409

HYPOLYCEMIA

Blood glucose measured before, during and after high performance aircraft flight for occurrence of fasting hypoglycemia

09 p1445 A69-22555

Metabolic relationship between hypoxia and hypoglycemia in Wistar rats, noting oxygen consumption, energy expenditure under insulin and hydrogen partial pressure decrease effect

09 p1445 A69-22727

Glider pilots fatigue attributed to nutritional habits

23 p4106 A69-41796

HYPOTENSION

Clinical spectrum of postural hypotension, treating vasodepressor syncope, orthostatic arterial anemia and idiopathic orthostatic hypotension

06 p0873 A69-17017

Responsiveness of cortex and visual pathway during transient hypotension induced by increased gravitational stress, discussing intraocular pressure of cat

22 p3878 A69-40779

Coronary vessel lumen changes under oligemic hypotension resulting from circulating blood volume decrease in anesthetized cats, discussing constrictory coronary vessel responses

23 p4084 A69-41470

Receptor and adrenergic blockade effects on blood loss, tolerated period and metabolic sequels of hypotension in dogs

23 p4098 A69-42102

HYPOTHALAMUS

Transverse acceleration effect on male rabbit frontal hypothalamus nuclei neurosecretory function, noting blood plasma antidiuretic activity

08 p1262 A69-19930

Hypothalamic motivational systems and stimulation, discussing behavior patterns and plasticity

09 p1444 A69-21310

High altitude environmental effects on adrenal glands and hypothalamic neurosecretion in rats

13 p2211 A69-28615

Hypoxic hypoxia effect on catecholamine content and cytochemical changes in hypothalamus of cat exposed to simulated altitude, using Euler method

14 p2407 A69-29297

Central adrenergic mechanisms role in neurosecretory function of hypothalamo-hypophyseal system of rabbits under transverse accelerations in centrifuge

15 p2554 A69-30055

Constant light/darkness effects on stress response rhythm of hypothalamic-pituitary-adrenocortical system in female rats

15 p2556 A69-31330

Electrode stimulated hypothalamic drinking in rats compared with drinking induced by water deprivation, noting difference in consumption

17 p2910 A69-33750

Lateral hypothalamic stimulation bound eating motivation in animals, comparing electrical stimulation and hunger elicited eating

17 p2910 A69-33752

Ventromedial hypothalamic /VMH/ lesions, body weight and food consumption changes in male and female rats, observing differential effects

17 p2910 A69-33756

Lateral and ventromedial hypothalamic areas functional interaction in rats, noting bilateral cuts producing hyperphagia

21 p3650 A69-38322

Stimulation effects of reticular formation, hippocampus and septum on sensory responses of posterior hypothalamic neurones in cats

21 p3656 A69-38979

Electrical stimulation effect on drive specificity in lateral hypothalamus area of sated rat, suggesting fallacy in previous conclusion concerning appetite

22 p3876 A69-40269

Aminazine and adrenaline effects on adrenocortical function in patients with diencephalic syndrome

22 p3888 A69-41272

Potent chemical factors released from anterior hypothalamus of rhesus monkeys in response to thermal stress during thermoregulation

23 p4084 A69-41472

Electrical self stimulation adaptability of hypothalamus or instrumental self reinforcing reaction in rats using skinner box technique

23 p4091 A69-42052

Positive pressure breathing effects on cerebral arterial and venous blood pressure, hypothalamus and adrenal glands catecholamine content and cerebrum histological changes in dogs

24 p4265 A69-43371

HYPOTHERMIA

White rat physiological processes while maintained on hypothermic cardiopulmonary bypass with small membrane type heart-lung machines

05 p0708 A69-15971

Glucose, lactate, free fatty acids, hepatic glycogen and endocrine activity in fasting hibernating dormouse and rat in deep hypothermia

10 p1642 A69-23118

Hypothermia induced alterations in biochemical processes studied with isolated rat liver perfused at low temperature

10 p1642 A69-23119

Computer analysis of cortical and subcortical activity in yellow bellied marmot during sleep, hibernation and hypothermia

10 p1643 A69-23122

Electrocardiograms of homeothermic animal, hibernator, warm and cool climate poikilothermic animals compared for hypothermia, considering metabolic changes contributing to EKG changes

10 p1643 A69-23123

Learned behavior performance failure in hypothermia as temperature dependent phenomenon using rat, guinea pig, chinchilla, mouse, gerbil and hamster

10 p1643 A69-23124

Physiologic and metabolic effects in humans undergoing therapeutic hypothermia

10 p1643 A69-23125

Radiation resistance of animals in hibernation and hypothermia, noting temperature dependence of protective effect

10 p1643 A69-23126

Altitude effects on body chilling rate in rats noting hypoxia role in inducing hypothermia

13 p2210 A69-28532

Vestibular reactions in rats under hypothermic conditions by measuring postrotatory nystagmus beats number and duration, respiration rates and rectal temperature

17 p2906 A69-32934

Ventilatory response to hypoxia and hypercapnia in hypothermic anesthetized dogs, noting decreased sensitivity of central chemoreceptors to carbon dioxide

22 p3885 A69-40977

HYPOTHESES

NT EXPECTANCY HYPOTHESIS

NT VORTICITY TRANSPORT HYPOTHESIS

Algorithm for hypothesis optimal tests by series during signal detection in presence of noise

13 p2222 A69-28509

Soviet book on cosmos and hypotheses covering origin and physical characteristics of earth, moon, Venus and Mars

20 p3596 A69-37234

HYPOTONIA

Decrease in bioelectric activity of skeletal muscles in animals and man during intermittent acceleration and weightlessness

07 p1062 A69-18591

Myocardial repolarization changes in healthy persons with restricted motor activity

07 p1066 A69-18984

Arterial tone and human muscular activity limitations, analyzing hypodynamic effects on aorta, arm and leg vessels constriction

10 p1647 A69-23586

Myocardial repolarization changes in healthy persons with restricted motor activity

20 p3480 A69-38232

HYPOVENTILATION

Unilateral hypoventilation effect during bronchspirometry on human pulmonary blood flow

22 p3875 A69-40229

HYPOVOLEMIA

Left ventricular function in intact anesthetized dogs analyzed during graded hypovolemia produced by lower body negative pressure

22 p3874 A69-40225

HYPOXEMIA

Human motor activity under hypodynamia and increased carbon dioxide, discussing positive effects of prescribed physical exercises

03 p0377 A69-14205

Neural integration of cardiorespiratory responses and suprabulbar control during arterial hypoxemia in rhinencephalic thalamic pontine rabbits

24 p4258 A69-42635

HYPOXIA

Renal effects of moderate hypoxia exposure in mice as reflected in urine volume and electrolyte excretion patterns during four days at simulated altitude

01 p0015 A69-10921

Hypoxia exposure effect on RNA synthesis in rat anterior pituitary cultured in vitro

01 p0015 A69-10923

Increasing hypoxia effects on rabbit EEG and light flash conditioned alimentary reflex for simulated altitude ascent, noting subcortical stimulation

02 p0197 A69-11492

Hypoxia effects on vestibular analyzer function of rats in pressure chambers at simulated altitudes from 11,000 to 12,000 m

02 p0198 A69-11506

Lactodehydrogenase activity and LDG isoenzymes ratio in various tissues of rats during exposure to prolonged hypoxia at simulated heights

02 p0199 A69-11982

Hypoxia effect on animal brain gamma-aminobutyric acid levels

04 p0552 A69-14482

High oxygen concentration influence on animal organisms noting respiration, pulmonary gas exchange, hypoxia, brain phosphorylation, immunological indices and morphological structure of rats and mice

05 p0709 A69-16512

Transient changes in oxygen consumption, carbon dioxide elimination and respiratory quotients during and after induced hypoxia to rabbits

06 p0876 A69-18026

Invertebrates resistance to explosive decompression and low end pressure, noting hypoxia and freezing as cause of death

07 p1059 A69-18537

Hypoxia warning system based on dry electrolyte oxygen sensor with millisecond response time

07 p1071 A69-19430

Sampled data regulator for maintenance of constant alveolar carbon dioxide during steady state and transient ventilatory responses to hypoxic stimulation

07 p1072 A69-19480

Mild hypoxia effect on selective attention performance of human subjects at simulated 8000 ft altitude

09 p1445 A69-22553

Acclimation to altitude hypoxia and duration of resistance to muscular effort in white Wistar rats on treadmill

09 p1445 A69-22725

Metabolic relationship between hypoxia and hypoglycemia in Wistar rats, noting oxygen consumption, energy expenditure under insulin and hydrogen partial pressure decrease effect

09 p1445 A69-22727

Glycolysis rate and lactic acid content in rats myocardium during adaptation to hypoxia, using pressure chamber

10 p1645 A69-23501

Human physiology for exposure to acute hypoxia studied with variation pulsograms and indices of external respiration and pulmonary gas exchange

10 p1647 A69-23592

EEG, EKG, respiratory motions and pulmonary ventilation recordings in study of carbon dioxide additions effect on human tolerance to hypoxic conditions

10 p1650 A69-23898

Irreversible blunted respiratory response to ventilation in high altitude natives, considering hypoxic and hypercapnic stimuli

12 p2018 A69-26130

Blood coagulation in animals under acute hypoxia at exposures to pressure corresponding to 5000 m altitude, noting blood morphology

12 p2019 A69-26348

Protective effect of hydrocortisone in rats observed during hypoxia

13 p2210 A69-27800

Altitude effects on body chilling rate in rats noting hypoxia role in inducing hypothermia

13 p2210 A69-28532

Combined hypoxic hypoxia and high ambient temperature found relieving strain on humans by increasing heat release by evaporation

13 p2212 A69-28628

Oxygen saturation in outflowing and inflowing renal blood in dogs under normal and hypoxic conditions, assessing cannula technique

14 p2406 A69-28916

Hypoxic hypoxia effect on catecholamine content and cytochemical changes in hypothalamus of cat exposed to simulated altitude, using Euler method

14 p2407 A69-29297

Antihypoxic preparations protective effect on white mice and rats subjected to gravitational accelerations

17 p2906 A69-32931

High oxygen concentration influence on animal organisms noting respiration, pulmonary gas exchange, hypoxia, brain phosphorylation, immunological indices and morphological structure of rats and mice

18 p3095 A69-34731

Pubertal puppy and adult dog cardiovascular system during inhalation of various nitrogen-oxygen mixtures, comparing heart beat rates, minute blood volumes, etc

19 p3257 A69-36169

Chronic hypoxic hypoxia on oxygen-hemoglobin dissociation curve and respiratory gas transport in man, considering altitude residents and heart and lung diseased patients

21 p3650 A69-38383

Ventilatory responses to hypercapnia and hypoxia in anesthetized and unanesthetized rabbits before and after bilateral cervical vagotomy

21 p3651 A69-38390

Heart muscle ultrastructure during general hypoxia in dogs, noting development of compensatory-adaptational and dystrophic changes in myocardial intracellular components

21 p3651 A69-38412

Rat dental pulp hemorrhages following acute hypoxia from exposure to decompression chambers, atmospheric pressure variations or high acceleration

21 p3661 A69-39276

Peripheral chemoreceptor carbon dioxide sensitivity, measuring human respiratory response to large carbon dioxide breath in oxygen at sea level and high altitude

22 p3890 A69-40207

Hypoxia tolerances in nitrogen dilution chamber of chickens at sea level and high altitudes, discussing role of hematocrit and heart mass

22 p3874 A69-40214

Ventilatory response to hypoxia and hypercapnia in hypothermic anesthetized dogs, noting decreased sensitivity of central chemoreceptors to carbon dioxide

22 p3885 A69-40977

Protein rates and RNA synthesis in cerebra of rats analyzed as factor of high altitude hypoxia adaptation

22 p3886 A69-41122

Effects of oxygen saturation variations of blood on rates of weight gain in isolated perfused canine lung, noting pulmonary edemogenesis

22 p3887 A69-41189

Anoxia effect on succinic dehydrogenase and lactic dehydrogenase activities in digestive glands and organs sensitive to oxygen tension changes

22 p3887 A69-41193

Cardiovascular effects of hypoxia in conscious and anesthetized dogs in environmental chamber, discussing artery pressure, tachycardia, stroke volume and cardiac output

23 p4078 A69-41314

Physical training effects under normal atmospheric pressure on high altitude hypoxia and acceleration resistance in rats, including survival times

23 p4079 A69-41383

Physiological response to steady state hypoxia from exposure to 12 percent oxygen atmosphere, noting minimal heart rate and blood pressure changes

23 p4085 A69-41673

Hypoxia acclimatization studied by subjecting groups to bicycle exercise at simulated high altitude and at ground level

23 p4086 A69-41678

Arterial oxygen partial pressures and heart beat rates measured in humans during acute hypoxia after altitude and ergometer training, noting sensorimotor performance

23 p4086 A69-41788

Hypoxia reaction elimination in human beings by repeated exposure to hypoxia, discussing nitrogen inhalation experiments and adaptive behavior of respiratory system

23 p4214 A69-41789

Flight altitude effects on pilot performance with comparison of sensory and mental functions, considering oxygen use and flight safety

23 p4106 A69-41794

Cardiovascular autonomic effects dynamic characteristics under severe arterial hypoxia in unanesthetized rabbit

24 p4258 A69-42632

Altered gaseous environments effect (parabiosis) on interferon production in mice injected with Newcastle disease virus, noting hypoxia role

24 p4262 A69-42888

Physical and physiological factors involved in determining aircraft passengers time of safe unconsciousness permissible after cabin decompression

24 p4278 A69-43398

Hyperoxia and hypoxia effects on mitotic activity in regenerating and normal rat liver exposed to environmental conditions

24 p4269 A69-43565

HYPSOMETERS

Hypsometric contour map of lunar surface from absolute altitude measurements of 1200 points on lunar surface

03 p0512 A69-13689

Lunar shape hypsometric peculiarities, analyzing heights and asymmetry in relation to lunar equator, central meridian and image plane

04 p0662 A69-15249

HYSTERESIS

Input transistor performance analysis in Schmitt trigger circuit, considering role of hysteresis

01 p0039 A69-10170

Hysteresis properties of membrane structures with soldered or rolled edges noting superiority of added elastic element in clamped area

01 p0087 A69-10828

Single degree of freedom structural damping estimations from viscous and hysteretic energy dissipation data

03 p0523 A69-12947

Forced flexural vibrations of elastic truss systems with allowance for hysteresis friction

03 p0432 A69-12953

Mathematical model for voltage step-down DC to DC converter with hysteretic bistable trigger circuit regulating output voltage

06 p0904 A69-17941

GaAs lasers radiation power hysteresis manifested in generating starts and stops at different injection current levels

07 p1157 A69-19593

High temperature magnetic testing and analysis of structure sensitive hysteresis properties

09 p1512 A69-22375

Bilinear hysteretic system undergoing random vibration, substantiating linearization analysis with analog computer simulation and comparing lifetime to linear system

[ASME PAPER 69-VIBR-25]

10 p1806 A69-24173

Energy dissipation in freely oscillating bodies under static stresses described by differential equation, assuming elliptical hysteresis loop

11 p1919 A69-25092

Hysteresis loop contour equation derivation based on energy dissipation dependence on stress amplitude in cyclically deformed vibrating system

11 p1985 A69-25176

Spool valve flow patterns within hysteresis region, discussing effects of valve geometry, Reynolds and cavitation numbers

11 p1827 A69-25645

Neutron irradiation and temperature effects on ferrite and Permalloy memory cores hysteresis loops

12 p2142 A69-26259

Hysteresis of on-off element with proportional feedback around element, noting autooscillations and results for electromagnetic relay

12 p2053 A69-26507

- Polycrystalline Fe-Ni, Fe-Ni-Co ferrites structure, magnetostriction, magnetization curves and hysteresis prior and after thermomagnetic treatment
13 p2319 A69-27992
- Dynamic stability of two degrees of freedom circulatory systems with bilinear hysteresis damping
13 p2363 A69-28127
- Ferrite core storages characteristics with rectangular hysteresis loop for digital control units, discussing optimal selection method
14 p2418 A69-29145
- Damping of gravity gradient stabilized satellites by hysteresis of materials, friction of viscous fluids, magnetic hysteresis and Foucault currents
17 p3047 A69-33230
- Gravity gradient satellite stabilization and magnetic hysteresis damping systems, outlining energy dissipation device involving torques
17 p3047 A69-33231
- Damping techniques using viscoelastic materials, discussing mechanical hysteresis
17 p2992 A69-33660
- Magnetic hysteresis dynamic model suitable for digital computer simulation of near-earth satellite attitude motions damping compared with experimentally generated loops
[AIAA PAPER 69-833] 21 p3821 A69-39364

I

I BEAMS

- Temperature distributions and thermal stresses in bimetallic I-beam structures with dissimilar materials for skins and webs and with kinetic heating inputs
06 p1024 A69-17610

IAPETUS

- Magnitude data for Saturn satellites compiled and analyzed, noting discrepancy for Iapetus
08 p1394 A69-20619

IBM 360 COMPUTER

- System/360 Continuous Modeling Program, detailing input language, user-defined functions and documentation
05 p0723 A69-16196
- Roseau onboard computer simulation by IBM 360, discussing use of assembly language and FORTRAN
20 p3502 A69-37396
- Real time operating system /RTOS/ 360 for spaceflight control, describing hardware, applications, task management and capacity, etc
21 p3679 A69-39602
- IBM 360-50 computer with I/O terminals to process PCM and analog data from Modular Auroral Probe series of sounding rockets on real time basis
23 p4133 A69-41764

ICARUS ASTEROID

- Icarus asteroid position measurements by astronomical photography, noting comparison for two South African observatories
01 p0150 A69-10373
- Icarus positions from photographic observations with astrophotograph
01 p0159 A69-11331
- Radar observation of Icarus at time of close approach, giving values of radius, rotation period and Doppler shift derived from spectrograms
02 p0323 A69-12300
- Project Icarus for reduction of threat of asteroid collision with earth by deflection or disintegration, noting guidance, control and communications for rocket
04 p0652 A69-14564
- Icarus observation by Triped-Metcalf method, tables show Icarus retreat and advance and velocities of eight asteroids neighboring earth
05 p0819 A69-15698
- Icarus radar and optical observations analyzed to verify general relativity predictions using Schwarzschild metrics and to estimate solar oblateness, Mercury mass, etc
13 p2350 A69-27823
- Icarus asteroid observed at Royal Observatory of Belgium with 40-cm double astrophotograph, tabulating acquired data
14 p2521 A69-29584
- TV-optical observations of asteroid Icarus, discussing installation, photographs and position
21 p3719 A69-38402

ICBM [MISSILES]

U INTERCONTINENTAL BALLISTIC MISSILES

ICE

- Critique of paper on water crystal existence on Venus, presenting arguments against existence of clouds of micron sized ice crystals
01 p0157 A69-11292
- Low temperature adhesive shear tests to measure force to break ice away from stainless steel surfaces coated with various bonded solid lubricants
19 p3323 A69-35581
- Gamma radiolysis of silver nitrate ice forming neutral Ag in magnetically distinct sites, discussing water dipoles rotation and electron paramagnetic resonance
22 p3992 A69-40574

ICE FORMATION

NT CLOUD GLACIATION

- Cloud instrumentation for measurement of icing conditions of airplane flight tests
01 p0055 A69-11044
- Vibrating rod automatic ice detection and control system for fixed and rotary wing aircraft
01 p0083 A69-11046
- Icing of airframes, discussing ice formation, deicing methods and protection of aircraft
02 p0192 A69-11889
- Supercooled water drop frozen and observed to undergo explosive shattering and ejection of ice splinters
02 p0275 A69-12693
- Ice nucleus formation in developing comet, discussing dissociation and vaporization characteristics of parent molecules as participants in process
06 p1004 A69-17537
- Anticing for all-weather operation of business jets, discussing atmospheric conditions, ice formations, prevention and removal systems
[SAE PAPER 690333] 11 p1822 A69-24500
- Variational statistics applied to hourly meteorological data for predicting airport runways icing conditions time and duration
12 p2127 A69-26900

- Vertical wind velocity profiles approximation accuracy determined by linear, exponential and logarithmic functions of altitude during ice and frost
13 p2293 A69-27846
- Dim astronomical sources observability from sunlit spacecraft, considering coma of micron sized ice crystals influence on scattering by condensation model
16 p2861 A69-32301
- Noctilucent clouds formation relation to ice sublimation, discussing rocket soundings
21 p3701 A69-38345
- EOLE constant level balloon flights in troposphere, discussing short lifetime due to overloading with ice in dense cirrus cloud
21 p3646 A69-38373

ICE NUCLEI

- Aircraft instrumentation system for cloud nucleation studies measures and records ice nucleus and aerosol concentration/distribution, temperature, etc
01 p0080 A69-10542
- Mathematical analysis for mechanism of spherical comet nucleus division as effect of nonuniform surface heating during rotation
04 p0659 A69-14997
- Ice nucleus formation in developing comet, discussing dissociation and vaporization characteristics of parent molecules as participants in process
06 p1004 A69-17537
- Comet Ikeya-Seki phenomena near perihelion interpreted from mean surface and ice nucleus internal layers temperatures
14 p2523 A69-29706
- Halley comet abrupt daily motion variation ascribed to solid particles ejection from ice nucleus stimulated by gas outflow
14 p2524 A69-29712

ICE PREVENTION

- Engine inlet thermal antiicing analysis, detailing computer programs to determine air flow velocity, water impingement and thermal requirements
01 p0055 A69-11045
- Vibrating rod automatic ice detection and control system for fixed and rotary wing aircraft
01 p0083 A69-11046
- Passive ice protection of aerodynamic surfaces by icephobic coating, measuring removal of ice under simulated conditions in tunnel tests
01 p0056 A69-11047
- Light aircraft all-weather flight feasibility, discussing storm and clear air turbulence detection and icing prevention
01 p0111 A69-11049

- Analytical design of SH-3 helicopter engine inlet ice deflector shield interior surfaces, defining potential flow pattern and moisture droplet trajectories
01 p0011 A69-11064
- Icing of airframes, discussing ice formation, deicing methods and protection of aircraft
02 p0192 A69-11889
- Anti-icing system for business jets, noting activation prior to encountering visible moisture
06 p0868 A69-17669
- Anticing for all-weather operation of business jets, discussing atmospheric conditions, ice formations, prevention and removal systems
[SAE PAPER 690333] 11 p1822 A69-24500

ICE REPORTING

- Radar backscatter analysis for Arctic ice identification, deriving ice surface roughness factors from Kirchhoff-Huygens principle
14 p2416 A69-29530

ICING

U ICE FORMATION

IDEAL FLUIDS

- Three dimensional sonic flow downstream from shock wave in nondissipative perfect fluid, introducing pseudorotating flow to obtain velocity field
03 p0362 A69-13363
- Hall effect destabilization influence in Kelvin-Helmholtz problem for ideal plasma, noting instability growth rate
03 p0478 A69-13804
- Ideal liquid small oscillations in vessel under close to weightlessness conditions, discussing surface tension, equilibrium conditions and solution by decomposing vector function space
03 p0418 A69-13811
- Primary frequency of oscillations of ideal liquid in cylindrical vessel with axially directed weak gravitational field
03 p0418 A69-13812
- Cavitation stream calculation methods for ideal incompressible fluid with free boundaries, noting cavitation generators and Riabouchinsky problems
04 p0589 A69-14994
- Equations of motion solved for solid body with ellipsoidal cavity containing ideal incompressible fluid in uniform eddy motion
06 p0957 A69-16823
- Ritz method for natural oscillations of ideal liquid in spherical vessel with various filling levels, considering vertical perturbing force
06 p0910 A69-17333
- Physical mechanism of stability loss in nonvortical flows of uniformly dense ideal fluids, discussing entropy production
06 p0911 A69-17498
- Thermodynamic and aerodynamic characteristics of organic Rankine cycle working fluids for ideal applicability to manufacturing
[SAE PAPER 690063] 07 p1057 A69-18308
- Natural modes and eigenfunctions of low amplitude oscillation determined by Ritz averaging method for ideal fluid with equilibrium surface in weak force field
07 p1119 A69-18746
- Theory of unsteady one dimensional motion of ideal compressible fluid, discussing equation of state
07 p1119 A69-18750
- Ideal fluid interaction with gravitational field, assuming internal energy as function of natural pressure and density
07 p1182 A69-19419
- Schwarzschild perfect fluid spheres stability to radial perturbations, noting fluid adiabatic index relation to critical value
07 p1221 A69-19585
- Arbitrary stationary foil in perfect incompressible fluid moving at constant velocity at infinity assuming plane, steady and irrotational flow
08 p1303 A69-20272
- Plane steady transonic flow of perfect fluid around airfoils with constant curvature using hodographic method, discussing various boundary conditions
09 p1429 A69-21605
- Surrounding fluid effects on free axisymmetric vibrations of thin elastic spherical shells, studying irrotational motions in compressible and incompressible ideal fluids
09 p1613 A69-21720
- Boundary value problem for gravity induced wave motion of ideal fluid in axisymmetric vessel with annular ribs, noting application to bodies of revolution
11 p1868 A69-24769

Optimum controller design for dynamic stability of ideal incompressible fluid in cavity of body constrained to horizontal rectilinear translational motions

11 p1966 A69-25330

Natural frequencies and forms of small vibrations of ideal liquid in spherical container with weak force field, considering surface tension forces

11 p1875 A69-25484

Axisymmetric detached flow past slender solid of revolution by ideal incompressible fluid at zero angle of attack and with small cavitation number

11 p1877 A69-25741

Ideal compressible fluid motion and heat transfer, noting convective heat transfer intensification with increased twisting velocity of flow

13 p2251 A69-28559

Ideal fluid unsteady rectilinear plane-parallel flow stability, calculating shear layers before breakdown by using modified Rayleigh method

14 p2431 A69-29606

Aerodynamic forces acting on harmonically oscillating thin profile in stalled plane parallel flow of ideal incompressible fluid

16 p2732 A69-32142

Flow rate of ideal fluid ejected from swirl injector taking into account radial component of flow velocity at nozzle exit

19 p3297 A69-35820

Hydrodynamic vertical or horizontal impact of sphere immersed in ideal heavy liquid of finite depth, considering container floor effect, surface pressure distribution, etc

19 p3299 A69-36393

Perturbed motion of solid body containing axisymmetric cavities partially filled with ideal incompressible fluid, solving boundary value problems of fluid oscillations

20 p3518 A69-38296

Optimal control of ideal noncompressible fluid vibrations partially filling rectangular container moving in horizontal direction

21 p3695 A69-38892

One dimensional flow of perfect compressible relativistic fluids, obtaining expression showing wave velocity dependence on relativistic speed of sound

22 p3931 A69-40711

MHD of ideal charged gravitating fluid by variational principle, considering Einstein general relativity theory

22 p3992 A69-41056

Dynamic behavior of gas bubble in ideal fluid plane flow, considering bubble shape, velocity field, gas pressure and stagnation point pressure determination

24 p4302 A69-43478

Unsteady axisymmetric potential flow of ideal incompressible fluid with free surfaces, deriving differential equations for gas bubble dynamics and surface geometry

24 p4302 A69-43500

IDEAL GAS

Difference methods in solution of incorrect Cauchy problem simulating ideal gas flow in nozzle

01 p0006 A69-10379

Continuum eigenfunction problem for hard sphere gas in spherically symmetric state, applying theory of singular integral equations

01 p0061 A69-10813

Thermodynamics of ideal multiatomic gases in local nonequilibrium, approximating real gas system by ergodic subsystems grouped by degrees of freedom

02 p0350 A69-11552

Hypersonic perfect gas flow past delta wing with blunt edges at small angles of attack, noting constant drag coefficient

02 p0191 A69-12584

Ideal gas spectra and density fluctuations correlations calculated during Markovian and nonMarkovian wandering of particles

03 p0477 A69-13414

Numerical computer results applied to supersonic flow of perfect gas past staggered cones

03 p0363 A69-13659

Ideal gas flow near stagnation line for blunt bodies, applying van Dyke series truncation method to numerical solution

03 p0364 A69-13660

Anisotropic nonlinear wave propagation in arbitrarily moving ideal gas, using singular surface/ray combined theories

04 p0630 A69-14532

Shoulder pressure on slender cone/afterbody combinations in hypersonic inviscid flow of perfect gas

04 p0542 A69-14735

Thermodynamic function tables for 30 gases under ideal gas conditions up to 6000 K

04 p0686 A69-15153

Second approximation to Boltzmann equation solved for rigid sphere gas by reducing integral equation to differential equation

04 p0633 A69-15434

Shock wave damping at large distances from body situated in ideal gas three dimensional flow

04 p0591 A69-15535

HF plane sound waves in ideal gases with internal dissipation, considering particular applications to dissociating diatomic and vibrational relaxing gases

05 p0792 A69-15723

Semiperfect gases with enthalpy dependent only on temperature, discussing validity of concept and Joule experiment on equivalence of heat and work

05 p0848 A69-16336

Peculiarities of aerodynamic characteristics of flow past plate and pointed and blunt slender cones in viscous hypersonic thermodynamically ideal gas

05 p0699 A69-16673

Nonisentropic simple waves in two dimensional steady flow of ideal gas

05 p0752 A69-16687

State variables of ideal gas in two phase region, discussing determination from equations of state and equation for internal energy and Maxwell criterion inapplicability

06 p1030 A69-17170

Hydromagnetic plasma stability in infinite electrical conductivity approximation applied to smooth closed systems, discussing ballooning instability mode

06 p0965 A69-17519

Asymptotic theory concerning nonsimilar structure of blast wave with expanding interface applied to hypersonic perfect gas flow

06 p0860 A69-17636

Bodies of revolution in sonic flow of ideal gas, showing same perturbational effect of source and dipole on flow before shock front

10 p1632 A69-23364

Invariant transformation of equations for ideal gas plane steady motions, noting application to gas flows with shock waves and eddies

10 p1680 A69-23709

Boltzmann equation for system of equations governing evolution of gas of identical particles with discrete velocity distribution, applying Chapman-Enskog method

11 p1921 A69-24325

Existence and completeness of eigenfunctions for boundary value problem arising in theory of small amplitude motions of stratified polytropic gas

11 p1868 A69-24884

Motion equations for ideal transonic gas flow, applying solutions to flow with incident shock waves of various profiles

11 p1820 A69-25468

Numerical integration of equations for three dimensional laminar boundary layer on sharp elliptical cones in supersonic flow of ideal gas, discussing heat exchange

11 p1821 A69-25477

Difference methods in solution of incorrect Cauchy problem simulating ideal gas flow in nozzle

12 p2012 A69-26671

Influence coefficients for compressible flow processes involving area, friction and total temperature changes

12 p2063 A69-26799

Transonic ideal gas flow past semiinfinite bodies, determining flow potentials from body perturbations and surface boundary conditions

14 p2390 A69-29476

Spatial supersonic ideal gas flows past blunt bodies analyzed by numerical finite difference methods, discussing flow fields and entropy

14 p2390 A69-29616

Thermal radiation effects on subsonic flow of ideal gray gas, calculating streamwise variations of flow properties

15 p2717 A69-30908

Book on three dimensional flow of ideal gases past smooth bodies, emphasizing utility of finite difference methods

16 p2771 A69-32003

Streamline flow of ideal stable gas with constant ratio of specific heats around conical body with arbitrary taper, determining flow velocity components

16 p2732 A69-32126

Monograph on solutions to equations for unsteady flow of ideal gases, with applications to hypersonic flows, based on three space coordinates and time

16 p2773 A69-32428

Shocks in gases, giving differential equation set for ideal gas behavior

17 p2948 A69-32845

Exhaust plume rarefaction from sonic orifice, considering continuum to transitional behavior for perfect gas [AIAA PAPER 69-657]

17 p2892 A69-33465

Supersonic and hypersonic flow of inviscid ideal gas over conical delta wings using three dimensional method of characteristics [AIAA PAPER 69-646]

17 p2893 A69-33486

Integral relation method analysis of supersonic gas flow past blunt body of revolution

18 p3086 A69-35051

Nonuniform supersonic flow of ideal inviscid gas impinging on plane obstacle, discussing flowfields and shock wave production in impact

19 p3239 A69-36397

Equilibrium Couette flow of ionized multicomponent ideal gas between moving catalytic plates, obtaining thermal flow formulas and thermal conductivity coefficient

19 p3240 A69-36403

Solar atmosphere radio emission generation by hydrodynamic shock wave interaction with coronal plasma, treating corona as ideal gas consisting of protons and electrons

22 p4009 A69-39984

Velocity and temperature boundary layers on plane wall developed by ideal shock tube flow for weak shock and expansion waves

22 p3932 A69-40894

Adiabatic plane ideal gas flow past airfoil, studying shock waves propagation effect on dynamic behavior

22 p3861 A69-41024

Transonic flows behind separated shock waves of ideal gases past bodies of various geometries

23 p4151 A69-41526

Frictionless supersonic and hypersonic flow of ideal gas of constant specific heat past cone with deformed axis at zero angle of attack

23 p4058 A69-41579

IDENTIFYING

Optical identifications for 17 Ohio survey sources with peaked or flat spectra

01 p0153 A69-10854

Optical identification of X ray source Cen XR-2 as variable star WX Cen, discussing colors and similarity to Sco X-1

01 p0145 A69-10857

Electrolytic marking process for aircraft component identification without use of stamping or engraving

02 p0253 A69-12065

Plant identification procedures by stepwise approximation and least squares methods

03 p0409 A69-13072

Channel identification coding for data compressors, deriving optimum code word length for bit compression ratio and overflow identification scheme

03 p0391 A69-13219

Nonlinear system on-line identification in presence of noise, using stochastic methods and analog equipment

03 p0401 A69-13764

Nonlinear system identification by learning model, assuming discrete on-line operation and Hammerstein form

05 p0737 A69-15805

Identification of finite memory, time discrete linear systems by Kiefer-Wolfowitz stochastic approximation procedures, presenting two algorithms for sequential identification

06 p0900 A69-17359

Linear regression and related procedures in identifying dynamic processes

06 p0901 A69-17360

Stochastic approximation algorithms for adaptive linear discrete time system identification using noisy input

06 p0904 A69-17940

Aircraft communications, navigation and identification, discussing role of satellites, common waveform modulation and electronics technology

07 p1085 A69-19178

Transponder design with planar triode for aircraft identification and air traffic control

09 p1462 A69-21411

Iterative identification method for nonlinear control systems with single element, based on criterial functional

14 p2426 A69-29306

Subcontractors documentation coordination system for Mississippi Test Facility, identifying end items for maintenance and spares provisioning

18 p3118 A69-35063

Robbins-Monro stochastic approximation method using algorithms for identifying finite memory time-discrete timestationary linear system from noisy input-output measurements

22 p3918 A69-41013

IDENTITIES

Matrix identity associated with linear digital filtering and recursive estimating determined using matrix projection operators and properties

22 p3975 A69-41014

IGNITERS

NT DETONATORS
NT INITIATORS [EXPLOSIVES]
NT PRIMERS [EXPLOSIVES]

Electrical explosive devices for space applications including explosive bolts, primers and igniters

01 p0141 A69-10544

Igniter design guidelines, types and characteristics of igniter materials

[WSCI PAPER 68-32] 07 p1202 A69-18361

Igniter formulations characteristics, discussing desirable properties

10 p1750 A69-23009

Solid propellant rocket motors ignition and igniter performance, discussing ignition interior ballistics

16 p2829 A69-31997

IGNITION

NT ELECTRIC IGNITION
NT SOLID PROPELLANT IGNITION
NT SPARK IGNITION

Stabilized low temperature ignition of cyclohexane using vertical flow reactor

02 p0304 A69-12314

Fuel films ignition behind shock waves in air and oxygen

02 p0353 A69-12317

Heat production rate equivalence to heat removal rate during ignition of ballistite powder by incandescent wires

02 p0354 A69-12668

Photochemical ignition of low pressure fuel-oxidizer mixtures applied to unsensitized stoichiometric mixtures of methane-oxygen and hydrogen-oxygen

[WSCI PAPER 68-42] 06 p1034 A69-17791

Ignition of binary mixtures of hydrocarbons at high and minimum ignition temperatures of components

06 p1035 A69-17935

Sustained combustion initiation in subatmospheric gaseous fuel-oxidant mixtures by UV radiation at room temperature, measuring parameters as function of mixture pressure

[AIAA PAPER 69-88] 06 p0983 A69-18118

Gasdynamic flow shock wave phenomena during exploding wire dwell time inside metal vapor cylinder, noting effect on reignition

07 p1188 A69-18275

Adiabatic kinetic calculations of chemical additive effects on ignition delay of hydrogen-oxygen-argon gas mixtures

[WSCI PAPER 68-52] 07 p1239 A69-18316

Ignition time of methane and acetylene, considering concentration and thermodynamic properties during reaction

[WSCI PAPER 68-41] 07 p1240 A69-18356

Thermal explosion criterion used for explosion/ignition delay of exothermic material surrounding heated wires having good thermal conductivity

[WSCI PAPER 68-23] 07 p1240 A69-18359

High speed photographic study of finely dispersed Al particles combustion and ignition in high temperature

gas flows, noting dependence on oxidizers concentration

08 p1375 A69-20341

Monograph on ignition, combustion and expansion in hypergolic liquid propellant mixtures at gas temperatures up to 3000 K for small rocket engines

08 p1375 A69-20723

Hydrodynamic effects in flame spreading, ignitability and steady burning of liquid fuels, using analogy of films floating on water

11 p1999 A69-24484

Ignition dynamics of solid materials with differing kinetic and thermophysical parameters, emphasizing temperature growth during chemical reaction leading to ignition

11 p2000 A69-25188

Ignition of condensed homogeneous combustible materials in presence of phase transition in heated layer, discussing temperature distribution and ignition delay time in ammonium perchlorate

11 p2000 A69-25189

Equations for steady state combustion of fuel drops in oxidizing atmosphere integrated numerically, obtaining ignition and extinction conditions

13 p2379 A69-28456

Differential equations for ignited mode theory, considering ion and electron transport and energy flux

14 p2490 A69-29233

Preignition volt-ampere curves for thermionic cesium diodes exhibiting nonsaturation characteristics under low temperature and electron-rich emission conditions

14 p2403 A69-29253

Ignition delay of paraphenylenediamine associated with nitric acid, showing relation between grain diameter and hypergolic ignition mechanism, noting oxidizer concentration effects

15 p2561 A69-30185

Reacting gas ignition by sudden contact with heated noncatalytic surface, deriving heating time and transferred heat amount by Blasius perturbation method

16 p2878 A69-31955

Turbulent jet theory, thermal ignition theory and flameout characteristics of bluff body flame stabilizers

16 p2879 A69-32141

Gas phase ignition theory with feedback of homogeneous propellant exposed to stagnant gas after shock reflection

[AIAA PAPER 69-559] 16 p2880 A69-32740

Ignition hazards in electrical circuits contaminated by glycol fluids, describing hazard detection by RF methods, decontamination procedures, safety checks, etc

19 p3359 A69-36028

Schlieren framing photography used for studying shock wave hydrodynamic structure and ignition dynamics during expansion into detonable gas region

21 p3849 A69-38803

Thermal stability of reactive spherical shell, investigating spontaneous ignition of volatile fuel drop exposed to hot oxidizing environment

21 p3849 A69-38804

Hydrogen-air reaction kinetics analyzed using standing wave normal shock noting wall effects, ignition delay and recombination

[AIAA PAPER 67-479] 23 p4239 A69-41893

IGNITION LIMITS

Combustion chamber equation for liquid fuel rocket engine, considering time varying ignition lag

01 p0142 A69-10090

Temperature distribution and vaporization rate boundary conditions on metal particle surface during preignition heating in oxygen containing medium

02 p0355 A69-12670

Liquid hydrazine ignition by nitrogen tetroxide gas based on stagnation flow principle, presenting threshold measurements

[WSCI PAPER 68-43] 06 p0983 A69-17792

Low pressure deflagration limit dependence on strand size in terms of cross section dimensions for composite ammonium chlorate propellant

[AIAA PAPER 69-144] 06 p0983 A69-18162

Threshold criteria of gas phase thermal ignition for cellulose materials, considering heating by radiant energy

11 p1940 A69-24474

Steady propagation of flame front initiated by local ignitor /spark/ in gas mixture, discussing critical requirements, boundary conditions, etc

11 p2001 A69-25190

Ignition critical conditions based on reactions in condensed phase, discussing initiation from pulsed and continuous external heat sources, heat release by chemical reactions of ignition, etc

11 p2001 A69-25191

Diffusion flame stability at inlet of fuel stream into oxidizer, showing ignition coordinates dependence on fuel, oxidizer and ratio of burning/ flow rate

19 p3448 A69-35855

Discontinuity characteristics of trough-shaped flame stabilizers for combustion in wake of poorly streamlined body during period of ignition arrest

21 p3851 A69-39092

Propellant ignition delay in contact of condensed fuel with hot reactive gas in shock tube, using graphical method and surface temperature fractional increase

23 p4199 A69-41897

IGNITION SYSTEMS

Igniter design guidelines, types and characteristics of igniter materials

[WSCI PAPER 68-32] 07 p1202 A69-18361

Shock ignition procedure to keep pyrotechnic composition in optimum condition in space environment, describing test layouts and theory

10 p1749 A69-23007

Igniter formulations characteristics, discussing desirable properties

10 p1750 A69-23009

Electroexplosive devices protection by nonconducting composition against premature ignition by RFI in spacecraft environment, noting Apollo Standard Initiators

10 p1751 A69-23018

Electroexplosive devices design for extreme conditions, considering igniter, delay and functioning systems

10 p1751 A69-23020

Secondary explosives ignition by primers and other explosive wire devices on missiles, discussing circuitry and resistance to severe climatic and electrical environments

10 p1751 A69-23021

Hot gas ignition devices for solid propellant rocket motors, discussing ignition rod and microrockets

10 p1752 A69-23025

Soviet book on electric ignition systems for piston and jet engines and design aspects of different types of ignition systems

12 p2146 A69-26756

Solid rocket motor ignition system based on exothermic alloying of bimetallic wire constituents

[AIAA PAPER 69-425] 16 p2832 A69-32653

Initiation distance and time of detonation with weak ignition sources related to temperature, tube diameter, mixture composition and pressure

19 p3451 A69-36364

IGNITION TEMPERATURE

NT FLASH POINT

Analytical model for thrust-time curve during ignition transient of solid propellant rocket engines, discussing flame spreading

[WSCI PAPER 68-33] 07 p1203 A69-18365

Threshold criteria of gas phase thermal ignition for cellulose materials, considering heating by radiant energy

11 p1940 A69-24474

Cool flames nonisothermal two-stage ignition of neopentane-oxygen mixtures, discussing chain propagation due to isomerization

11 p1940 A69-24477

Thermal ignition of methane-oxygen mixture, observing flame propagation

13 p2380 A69-28459

Burning velocity inhibitors effects on hydrocarbon-oxygen-nitrogen mixtures ignition temperature, reporting data on 20 additives at ambient temperature and pressure

[WSCI PAPER 69-14] 16 p2831 A69-32352

Spontaneous reignition predictions for solid restartable rocket motors with solid propellant combustion terminated by liquid quenching

[AIAA PAPER 69-444] 16 p2842 A69-32695

Energy balance equation for two phase liquid-gas mixture ignition process, deriving formula for speed of combustion zone movement

18 p3231 A69-35123

Ignition of aircraft fluids leaked onto hot turbofan engine surfaces, considering cooling air direction, surface temperature, nacelle engine compartment ventilation, engine power, etc

[SAE PAPER 690436] 23 p4200 A69-41653

IGY [GEO PHYSICAL YEAR]

U INTERNATIONAL GEOPHYSICAL YEAR

ILLUMINANCE

Radiation pattern shaping from circular aperture antenna with constant illumination amplitude

[UN PAPER 68-95756] 01 p0029 A69-10524

Spacecraft illuminance by reflected solar radiation calculated by computer method

01 p0151 A69-10576

Direct light pressure effect on evolution of limited planetocentric orbits of small bodies, noting longitudes of ascending node and pericenter

05 p0823 A69-16043

Spacecraft illuminance by reflected solar radiation calculated by computer method

15 p2691 A69-30746

Direct light pressure effect on evolution of limited planetocentric orbits of small bodies, noting longitudes of ascending node and pericenter

20 p3606 A69-37952

ILLUMINATING

Aircraft instrument lighting color effects on posture, scotopic absolute and acuity threshold and legibility for reading of instruments

03 p0380 A69-14073

Laser ranging and illumination systems, discussing direction of pulsed monochromatic radiation to illuminate scene and utilization of reflected radiation for imaging

03 p0442 A69-14191

Aircraft instrument panel lighting color and intensity preference by pilots for taxiing, takeoff, cruising flight and landing

05 p0715 A69-16622

Aircraft instrument panel lighting, comparing red and white colors for general and peripheral vision

05 p0715 A69-16623

Incident integral light flux relations and visibility range equation derived for objects illuminated by narrow light beams in scattering media

10 p1725 A69-23971

Reversibility principle in transilluminated three dimensional photoelastic medium

14 p2535 A69-29359

Combined distribution density of elevations and slopes for illuminated areas of stable statistically homogeneous random surface exposed to parallel rays beam

15 p2569 A69-30948

Visual perception of three dimensional objects under simulated solar illumination in space considered in relation to manned spaceflight maneuvers

17 p2913 A69-33174

Incident integral light flux relations and visibility range equation derived for objects illuminated by narrow light beams in scattering media

21 p3772 A69-39657

Illumination effect on air navigation chart reading during flight, using questionnaire data

24 p4271 A69-42605

ILLUMINATION

Gold/polycrystalline cadmium selenide film contact found ohmic in darkness and barrier in light, noting potential distribution, electron concentration and energy gap

19 p3384 A69-36480

Constant illumination intensity effects fixed ratio lever pressing behavior for appetitive reinforcement with chimpanzee in temperature and humidity controlled environment

24 p4260 A69-42702

ILLUMINATORS

High repetition rate pulsed illuminator using electrodeless halogen discharge for rapid light extinction

04 p0599 A69-15021

Optoelectronic spectrum analyzer with raster illuminator for producing two dimensional Fourier transform to analyze two dimensional functions

10 p1725 A69-23301

Solar UV radiation measurements by balloon-borne monochromatic illuminator, using Cd-cathode photomultiplier detector

11 p1945 A69-24410

Portable electric lamp for work and photographic purposes in manned spacecraft, describing circuitry, construction and applications

[IES PREPRINT 30] 18 p3138 A69-35173

Briteye battlefield illumination flare configuration, candle power, burn duration and hot air balloon-type suspension system

20 p3461 A69-37166

ILLUSIONS

NT OCULOGRAPHIC ILLUSIONS

Apparent movement in peripheral vision induced by sequential flashing of spatially unresolved two dots, studying dynamics of illusion

16 p2746 A69-31556

Vestibulometric test program for flight surgeon appraisal of flying personnel, emphasizing singling out persons prone to illusory sensations

20 p3473 A69-37277

ILMENITE

Chemical analysis and paragenesis of manganian ilmenite from Sierran adamellite using electron microprobe

19 p3302 A69-35977

Ilmenite composition in equilibrated ordinary chondrites, analyzing Fe, Mg, Ti and Cr content

24 p4382 A69-42890

ILS (LANDING SYSTEMS)

U INSTRUMENT LANDING SYSTEMS

IMAGE CONTRAST

Photographic image degradation resulting from wave front distortion due to atmospheric refractive density gradients over long oblique optical path

01 p0107 A69-10223

Atmospheric influence on ground visibility reduction of airborne objects, using radiative transfer equation to calculate contrast transmission function

01 p0111 A69-11100

Imagery degradation by moisture condensation on thermal IR scanners optics during aircraft descent from higher to lower altitude

08 p1311 A69-19821

ATS satellite distorted photographs conversion into normal and Mercator projections, using computer programs

10 p1689 A69-22945

Visual observation of aerospacecraft, discussing object luminance, eye contrast sensitivity, atmospheric contrast transmission function and psychophysiological and atmospheric effects

10 p1649 A69-23872

Atmospheric turbulence degradation of holographs resolution improved by geometrical optics and series-expansion methods, noting role of Gaussian and exponential refractive index structure

12 p2090 A69-26250

Atmospheric turbulence effects on detection and resolution of incoherent objects, discussing error probabilities of threshold and maximum-likelihood systems

12 p2029 A69-26252

IR polarizing microscope with IR corrected objectives and eyepieces providing higher contrast, sharper focusing and less light scattering

12 p2093 A69-26595

Spotted scattered background contrast relation to scattering system geometry during laser scattering by suspended Lycopodium spores

13 p2273 A69-28550

Ultrasound holography for imaging opaque structures, noting distortion due to long wavelength of sound field and distortion reduction techniques

13 p2265 A69-28663

Panchromatic illumination in radar systems for image quality, tracking and detection problems, suggesting application to polypanchromatic radar

14 p2416 A69-29529

Linear mean square estimator for restoration of images degraded by system with bandlimited spread function

15 p2611 A69-31032

Finite resolution effect on solar granulation simulated by numerical experiments using two dimensional smeared pattern

17 p3029 A69-33046

Aerospace images information suppressing and enhancing methods to aid interpreter in making more accurate recognition and measurement of earth resources subjects

18 p3133 A69-34338

Visibility degree of noctilucent cloud determined from ratio of brightness contrast against sky to eye contrast threshold

19 p3362 A69-36410

Multispectral imaging system to increase contrast using optical mechanical scanner, multielement dispersing spectrometer and electronic signal processing equipment

20 p3540 A69-37737

Remote sensors discrimination and performance, discussing linear filter system, contrast ratio, tricolor systems and multispectral scanning system

20 p3493 A69-37743

Wedge fringes visibility and localization in hologram interferometry during focusing on surface under examination for displacements

22 p3943 A69-40016

Motion-distorted photograph deblurring method using extended range holographic Fourier transform division

22 p3944 A69-40020

Linear models with self excitation for brightness and contrast perception studies in human visual system

22 p3881 A69-40862

Human peripheral retina contrast sensitivity determined by measuring psychophysically for sinusoidal grating target describing luminance effects

22 p3882 A69-40870

Response characteristics of human visual mechanisms sensitive to motion while varying adaptation stimulus contrast to control visual effectiveness

22 p3884 A69-40887

Orthophotography as technique for eliminating distortions in vertical aerial photographs during conversion into uniform scale reproductions

22 p3949 A69-40998

Reconstruction properties of image plane holography for producing bright white light displays, using reference beams

23 p4164 A69-41627

Solar image selection device based on statistical analysis of photospheric contrast, noting use for electronic photography and location impaired observatory

23 p4213 A69-41697

IMAGE CONVERTERS

Lithium niobate based parametric image converter for IR to visible operation, discussing design factors performance calculations

[IEEE PAPER B-3] 07 p1150 A69-19048

Optical processing of planetary radar data for range Doppler image generation

08 p1270 A69-19816

Shutter drive circuits for image converter camera noting focusing, deflection system, applications in plasma research, etc

12 p2082 A69-26138

Photoelectric recorder with timebase image converter tube for investigating ultrashort light pulse transient response of laser

12 p2083 A69-26139

Electron-optical image converter camera for wide time intervals, considering nanosecond electronic control and high voltage stabilized power supply

12 p2083 A69-26140

Nanosecond electron-optical image converter multiframe camera designed for reducing frame exposure time

12 p2083 A69-26141

Multiframe image converter registration of space-time ruby laser spot structure changes in Q switched regime prior to giant pulse formation

12 p2083 A69-26142

Electronic image converter camera for observing rapidly evolving light phenomena consisting of high voltage pulse generator and biplanar tube image converter

12 p2084 A69-26147

High speed streak cameras applicability to low density theta pinch studies, describing image converters design, operation and block diagrams

14 p2496 A69-29787

Generalized quantum yield for sensitivity of photoelectric devices, considering multistage image converter and photomultiplier

14 p2496 A69-29788

Filamentary nebula IC 443 observation by Fabry-Perot etalon with image converter, determining radial, expansion velocities and H alpha line half width

15 p2686 A69-30538

Magnetically focused electronographic image converters in far UV photography and spectroscopy in space astronomy applications

17 p2972 A69-33084

X ray TV system with electronic-optical converter and X ray vidicon for industrial defectoscopy

18 p3138 A69-35113

Ablating sphere viscous wake using image converter camera, computing luminance radial distribution by unit volume

19 p3306 A69-35739

Image converter camera and astronomical telescope arrangement for photographing metal diaphragm openings in shock tube

20 p3538 A69-37227

Magnetically focused electronographic image converters for far UV photography and spectroscopy from sounding rockets, discussing stellar observations

20 p3543 A69-37801

Optical instruments as visual aids in scientific research including electron optical image converters detecting emissions invisible to human eye

22 p3943 A69-39974

Orthophotography as technique for eliminating distortions in vertical aerial photographs during conversion into uniform scale reproductions

22 p3949 A69-40998

IMAGE CORRELATORS

- Pseudorandom radar ranger /DIOMEDE/ using optical correlator and phase loop
03 p0393 A69-13254
- Holographic technique for reconstructing light wave front, developing algorithm for three dimensional images recognition
09 p1495 A69-21859

IMAGE DISSECTOR TUBES

- Image dissector meteorological cameras, discussing ATS-III and Nimbus systems, high resolution camera and multispectral cameras
18 p3137 A69-35101

IMAGE FILTERS

- Satellite digital video data analyzed by two dimensional filter computer technique, discussing biomedical applications
02 p0213 A69-12155
- Filter effectiveness in improving air to ground target identification performance on TV display
06 p0887 A69-17210
- Restoration of photographic images by optical spatial filtering with least mean square error filter in presence of random additive noise
15 p2611 A69-31033
- Glass filter systems for aerial color photography developed from spectral studies of sunlight, skylight and airlight in Rayleigh atmosphere
22 p3948 A69-40986
- Multispectral color aerial photography using broadband spectral filters for detecting and identifying small environmental features of earth surface
22 p3949 A69-40997

IMAGE INTENSIFIERS

- Fiber optic electrostatically focused image intensifier tube for recording star spectra with reduced exposure time [WERL-68-1C2-TAEC-P1]
04 p0603 A69-15444
- Image intensifier-vidicon closed circuit TV network for auroral cinematography at low light levels
06 p0925 A69-17382
- Auroral H beta intensities determined from photographs by image intensifier, describing equipment and data reduction method
10 p1684 A69-23824
- Electroluminescence and electroluminescent devices, considering semiconductor lasers, radiation sources and image amplifiers
11 p1899 A69-25198
- Crab Nebula pulsar detection by TV camera with image intensifier at focus of astronomical telescope, detailing instrumentation and observations
11 p1962 A69-25251
- Photoelectronic high speed image intensifier framing camera, showing single shot synchronized photography of electric spark in air
12 p2082 A69-26137
- Image intensifier cascade tubes and slit type electronic cameras with high sensitivity multiple integral images, exemplifying projectile velocity measurements
12 p2083 A69-26143
- Image intensifier for high speed spectrography of short duration faint radiation source, noting high speed shutter and resolution
12 p2085 A69-26160
- Pulsating and flaming auroral patches recorded by image intensifier vidicon camera, calculating upward field aligned speeds for luminosity enhancement
16 p2780 A69-32305
- Image intensifier and return beam sections of 4.5 inch high resolution vidicon and camera system for high definition signal readout
17 p2976 A69-34063
- Holographic method of a posteriori restoration of images formed by coherent and incoherent light by spatial frequency retrieval
19 p3304 A69-35603
- Quantitative photographs of low density flowfields during shock tunnel tests using electron beam excitation with image intensifier tube detector
19 p3292 A69-35723
- Low light level TV systems for military uses, describing design and operation of various image intensifier tubes
22 p3945 A69-40141

IMAGE ORTHICONS

- Ohz intensity variation in bright homogeneous auroras prior to and during breakup observed visually and with image orthicon TV systems
04 p0594 A69-15129

- Flaming auroras observations with auroral image orthicon TV systems, calculating electron release points on field line of station
05 p0758 A69-16413
- Image orthicon tube to detect low intensity pulsed light signals, formulating SNR in terms of resolvable image points
08 p1317 A69-21085
- Rocket trajectory determination by tracking on-board light source against star background with image orthicon TV system
12 p2033 A69-26965

IMAGE TUBES

- High dispersion IR image tube spectroscopy using telescope, discussing alpha Sco and alpha Boo spectral regions
07 p1074 A69-19203
- Silicon vidicon for near IR and visible radiation viewing describing spectral response, energy transfer characteristics, resolution and dark leakage currents
09 p1466 A69-22456
- Image tube storage target mesh electrode structure and transmission data for electron beams of various velocities, noting secondary electron redistribution control
11 p1848 A69-24749
- Image tube spectra observations of interstellar absorption band at 4430 A, noting emission band at 4400 A
11 p1965 A69-25658
- Image intensifier cascade tubes and slit type electronic cameras with high sensitivity multiple integral images, exemplifying projectile velocity measurements
12 p2083 A69-26143
- Meshless shutter tube with nine images double deflection capability, using deflectron and semiconducting plates assembly
12 p2083 A69-26144
- Diode type image shutter tube with proximity focusing for high speed photography
12 p2083 A69-26145
- Ultrahigh speed photographic cameras with exposure times between 5 and 500 nsec, using image tube and high voltage pulse generator
12 p2083 A69-26146

IMAGERY

- NT AERIAL PHOTOGRAPHY
NT ALL SKY PHOTOGRAPHY
NT ASTRONOMICAL PHOTOGRAPHY
NT AUTORADIOGRAPHY
NT CHRONOPHOTOGRAPHY
NT CINEMATOGRAPHY
NT CLOUD PHOTOGRAPHY
NT COLOR PHOTOGRAPHY
NT ELECTRO-OPTICAL PHOTOGRAPHY
NT ELECTRON PHOTOGRAPHY
NT HOLOGRAPHY
NT INFRARED PHOTOGRAPHY
NT KINOFORM
NT LUNAR PHOTOGRAPHY
NT PHOTOMICROGRAPHY
NT PHOTORECONNAISSANCE
NT RADAR PHOTOGRAPHY
NT RADIOGRAPHY
NT REPRODUCTION [COPYING]
NT ROCKET-BORNE PHOTOGRAPHY
NT SATELLITE-BORNE PHOTOGRAPHY
NT SCHLIENEN PHOTOGRAPHY
NT SHADOWGRAPH PHOTOGRAPHY
NT SPACEBORNE PHOTOGRAPHY
NT STEREOHELIOGRAPHS
NT SPECTROPHOTOGRAPHY
NT STEREOPHOTOGRAPHY
NT ULTRAVIOLET PHOTOMETRY
- Polarization effects of scattered coherent light on laser imagery, determining surface roughness and angle of incidence effects photographically on basis of Fung theory
11 p1896 A69-24849
- Solar telescope imaging quality measured as function of atmospheric turbulence and temperature above land level
14 p2453 A69-29973
- Multispectral scanner with multichannel spectrometer for earth observations, describing video image generation from detector elements output signals
19 p3310 A69-36066

IMAGES

- NT AFTERIMAGES
NT RETINAL IMAGES
- Coincidence error between star image and planet edge for entrance pupil and telescope magnification
08 p1314 A69-20383
- Image motion trajectory in rotating angular mirror having converging reflections from two surfaces, using precession theory of gyroscopes
11 p1881 A69-24562

- Spontaneous decomposition of image space into compact sets /images or classes/ using adaptive dispersion method to reduce system learning time
11 p1859 A69-24964
- Slow waves contribution to image radiation from array of line sources above ground plane, determining optimum height of lowest element of array
11 p1837 A69-25002
- Photodielectric tape camera with optical images stored on tape in form of charge pattern
16 p2792 A69-32558
- Solar image motion frequency spectra analysis via photoelectric equipment, showing influence on photographic pictures, spectra and modulation transfer functions for diffraction telescope
17 p3029 A69-33047
- Hologram imaging characteristics expression, deriving relations characterizing localization and dimensions of images
19 p3308 A69-35868
- After image measuring method of eccentric fixation during autokinetic light tracking
22 p3878 A69-40837
- Pilots body images determined by inkblot tests, considering effects of aircraft type, pilots experience, etc
23 p4112 A69-42364

IMAGING TECHNIQUES

- Digital computer system for storing, processing and displaying TV pictures
01 p0077 A69-10024
- Mirror photogrammetry geometric principles, studying photo pairs, mirror reflection and reduction methods
01 p0077 A69-10025
- Synchronous observations of satellites by photographic techniques from satellite stations, discussing reference stars plane coordinates and exposure time recording
01 p0027 A69-10224
- Multibeam recording technique producing speckle-free images in redundant holograms of transparencies
01 p0082 A69-10850
- Charge image detector for reading information as extended spatial charge distribution on dielectric layer surface, using vibrating conducting probe scanner
02 p0248 A69-11822
- Refractive index structure constant for different atmospheric turbulence conditions, discussing possibility of improved capabilities for imaging systems
02 p0275 A69-11930
- Hyperstereoscopic and hypostereoscopic hologram images with doubled or halved interocular distance, noting effect on image depth
02 p0249 A69-11931
- Monochrome pictorial encoding, discussing pulse code modulation, delta modulation and buffer storage techniques
02 p0213 A69-12154
- Stroboscopic holography for repetitive scenes, using mode locked laser as source
02 p0250 A69-12411
- Optical imaging systems achieving aperture synthesis by lensless Fourier transform holography, noting X ray astronomy, ultrasonic and space applications
03 p0430 A69-13324
- Aerospace sensor systems, discussing adaptive multimode sensors and multispectral sensing, electronic recognition of image components, laser radar and Raman scattering technique
03 p0431 A69-13851
- Laser ranging and illumination systems, discussing direction of pulsed monochromatic radiation to illuminate scene and utilization of reflected radiation for imaging
03 p0442 A69-14191
- Mars unmanned spacecraft mission profiles for surface imaging, noting influence of lighting requirements [SMPTE PAPER 104-21]
04 p0650 A69-14361
- Fourier coding method for coding images for digital transmission, achieving bandwidth reduction for televised images
04 p0556 A69-14429
- Holography, discussing image formation, position, enlargement, aberration and application to stress analysis
04 p0601 A69-15186
- Photographs of intensity of radio emission in millimeter band, using luminophor based on ZnS and CdS
04 p0560 A69-15272
- Temperature distribution over receiving layer of absorption edge image transformer, discussing thermal conduction influence on performance of thin film IR image receiver
04 p0631 A69-15280

Solar image or spectrum focal plane scanning technique with output beam displaced but undeviated relative to input beam for solar spectrophotometry
04 p0602 A69-15378

Algorithm generating same stereogram for two or more selected surfaces by extending random dot stereogram technique
04 p0603 A69-15445

Holograms volume depth increased by reference beam splitting or by photographing holograms on same plate in sequence
05 p0761 A69-15651

Acoustic holograms, describing electronic method of reconstructing holographic image in order to avoid multiple image problem
06 p0923 A69-16933

Blurred spaceborne photographic image reconstruction by spatial frequency filtration
[UN PAPER 68-95240] 06 p0923 A69-17080

Ranger pictures improvement by computer, eliminating image distortion due to electronic imaging systems
06 p0924 A69-17164

Map information display methods comparison for tactical image interpreters
06 p0924 A69-17212

Optical commutation to permit multifield monitoring and recording with one sensor by employing high resolution imaging fiber optics elements feeding common focusing lens
06 p0926 A69-17678

Specular reflection computer program utilizing virtual image technique to determine reflection characteristics of enclosed diffusely emitting surface
[AIAA PAPER 69-65] 06 p1040 A69-18215

Ultrasonic holograms and optical reconstructions derived by scanning receiver or source
06 p0930 A69-18228

Imaging systems for weld inspection, discussing physical factors and selection of radiation
07 p1139 A69-18796

Fourier transform algorithm introduction leading to image coding technique with image transformed by Hadamard matrix operator
07 p1078 A69-18859

Lithium niobate based parametric image converter for IR to visible operation, discussing design factors performance calculations
[IEEE PAPER B-3] 07 p1150 A69-19048

Three dimensional information pictures of chromospheric alpha H line using special camera attached to solar telescope diffraction grating spectrograph
07 p1217 A69-19241

Microwave holographic reconstruction of metal objects inside purse by nonscanning method, visualizing microwave field by polaroid and liquid-crystal techniques
07 p1135 A69-19449

Photoelectronic imaging systems in space exploration emphasizing acquisition time, storage capacity and transmission time
07 p1136 A69-19591

Holography by scanning receiver, source, object or both source and receiver, discussing resolution, magnification, image position and aberrations
07 p1136 A69-19640

Object restoration, discussing data processing method for single variable functions with small signal to noise ratios
07 p1137 A69-19721

Range-Doppler processing in pulsed radar applied to imaging of rigid rotating body with motion compensating resolution cells
08 p1270 A69-19861

Image degradation in holograms undersampled with respect to space-bandwidth product, noting signal to noise ratio and resolution
08 p1312 A69-20078

Holography and similarity criterion for developing image recognition algorithm
08 p1314 A69-20417

Quantitative spectroscopy and spectral photometry, discussing developed image properties and connection between exposure and image
08 p1315 A69-20467

Holographic technique for measuring thin fluid film profiles using interference image reconstruction and helium-neon laser as coherent light source
08 p1317 A69-20873

Galaxies classification using rectified images, noting pitch and inclination angles
08 p1408 A69-21135

Borrmann effect and abnormal transmission and extinction observed by reconstruction of images of holo-

grams recorded in three dimensional photosensitive medium
09 p1494 A69-21492

Holographic image formation through turbulent medium simulated by shower glass, noting thickness variations and prismatic light deflection effects
09 p1494 A69-21559

Holograms with unfiltered radiation obtained from superhigh pressure mercury lamp and incandescent lamp
09 p1495 A69-21671

Silicon diode array camera tube modified to permit X ray images to be displayed on TV monitor
09 p1463 A69-21845

Holographic technique for reconstructing light wave front, developing algorithm for three dimensional images recognition
09 p1495 A69-21859

Holographic technique application to radio and sound wave ranges, discussing incoherent holography development to overcome difficulties in image reconstruction of stationary objects
09 p1498 A69-22133

Laser spark image in air photographed in scattered laser radiation light, showing singularities and absence of beadlike structure
09 p1519 A69-22531

Multiple pinhole camera for X ray astronomy, suggesting cross correlation image recovery technique based on Fourier convolution theorem
09 p1502 A69-22768

Modulated wave holography for detecting and reconstructing ultrasonic beam path, noting applicability to vibrating objects analysis
10 p1694 A69-23368

Imaging ultrasound by holography with reconstruction in light, comparing methods using scanned hologram and liquid surface
10 p1695 A69-23543

Holographic techniques for acoustical imaging to obtain three dimensional images of opaque objects encountered in nondestructive testing
10 p1695 A69-23544

Quantitative analysis of plane waves for weak interaction of two dimensional sound and light fields in acoustical imaging by diffracted light
10 p1695 A69-23545

Acoustical transparencies illuminated by sound waves for optical imaging and ultrasonic diffraction, noting application to visualization of inhomogeneities in samples
10 p1695 A69-23546

Digital reconstruction of images from optical holograms for acoustical data, discussing image degradations
10 p1695 A69-23547

Qualitative analysis of recording phase only acoustic holograms of object wave instead of both phase and amplitude, considering fringe patterns and conjugate image
10 p1695 A69-23548

Matrix method for acoustical holograms and optical reconstruction of virtual and conjugate images using laser light of 6328 A wavelength
10 p1696 A69-23549

Hologram obtained by recording interference pattern displayed by ultrasonic camera, discussing real time viewing
10 p1696 A69-23550

Computer generated kinoform optical element operating on phase of incident waves and forming wave front reconstruction single image
10 p1697 A69-23867

Computer generated holograms using binary transmittance for wave fronts and three dimensional images construction
10 p1697 A69-23869

Electron beam addressed electrooptic light valve used as spatial filter, discussing electronic control and optical processing in real time
10 p1697 A69-23870

Statistical estimation theory giving angular resolution of imaging systems in terms of noise characteristics and modulation transfer function
10 p1725 A69-24048

Spectroheliograph technique, obtaining high resolution magnetic maps of solar magnetic fields directly in single image without photographic subtraction
11 p1880 A69-24432

Coherent optical target recognition through randomly turbulent medium for imaging system offsetting image degradation due to turbulence
11 p1894 A69-24470

Computer processed pictures including transformation of graphical material, picture generation from data or abstract rules, discussing procedures, instrumentation, color and applications
11 p1842 A69-24588

Holograms on photochrome films by split beam He-Ne laser using special mirror system
11 p1881 A69-24631

Multicolor hologram recording and reconstruction gas lasers, discussing control of ghosts in three dimensional image
11 p1882 A69-24679

Pulsed laser holography advantages for recording small objects in motion and holographic interferometry advantages for complex surfaces and time-separated events
11 p1883 A69-24682

Holographic multiplexing for producing three dimensional reconstruction of nonlaboratory objects in horizontal direction, noting TV and X ray pictures applications
11 p1883 A69-24684

Holography of moving diffuse object, noting bright unblurred image dependence on adaptation to velocity
11 p1883 A69-24685

Coherent pulse laser holography for front and back lighted holograms of moving objects
11 p1895 A69-24686

Acoustic holography free surface and scanning methods, noting acoustical intensity role in phase stability
11 p1883 A69-24687

Holographic techniques application to optical systems for high resolution images of distant objects by overcoming atmospheric turbulence and light diffraction limitations
11 p1883 A69-24688

Scenic holographic stereograms resolution and up/down scaling, discussing roles of projector lens and camera aperture
11 p1883 A69-24690

Imaging radar systems for employment on small spacecraft, fabricating small lightweight radar systems packages with integrated circuit techniques
11 p1835 A69-24695

Single and double mirror systems geometrical optical image aberrations noting focal number, angle of field, secondary magnification and mutual position tolerances
11 p1918 A69-24836

Ray tracing application to evaluating aberrations produced by Fresnel holograms for optimizing design of aplanatic lens holography system
11 p1885 A69-24848

Visible imaging of IR objects by conversion of IR frequency to visible with sum-frequency generation within nonlinear dielectric medium
11 p1897 A69-25037

Holograms reconstructing images of points with diameters approximated by width of autocorrelation functions
11 p1886 A69-25058

Solid state IR imaging using monolithic Ge mosaics of isolated sensor elements, discussing design, structure, fabrication, system readout and operation
11 p1938 A69-25307

Light scattering materials for transparent objects holography, analyzing Christiansen filter and milk white and ground glass plates
11 p1889 A69-25550

Holographic in-focus projection of images on three dimensional focal planes of arbitrary shape, noting moire pattern strain analysis
11 p1889 A69-25653

Planetary imaging systems design problems illustrated by Mars orbiter reconnaissance, discussing radiation effect on film, shielding, stereo method comparisons, color bands, etc
[SMPT PAPER 105-78] 12 p2078 A69-25770

Photoelectronic image devices, discussing detectors, electronography, Lallemand camera, spectracon and electron image multipliers
12 p2082 A69-26136

Multiple frame camera with image compensation as ballistic photodiode
12 p2084 A69-26153

Rotating mirror framing camera with continuous access at f/18 aperture, discussing image transfer system, frame rate and capacity, etc
12 p2085 A69-26157

Selective stroboscope with explosive bright light source and microsecond pulse duration for short flash period over large area, noting single frame separation method
12 p2086 A69-26162

Direct electron beam shadowgraph photographic (betagraphy) technique for recording small high speed objects with 3 nanosecond exposure time
12 p2086 A69-26164

Ultrahigh speed multiple framing photography system using sequentially modulated ruby laser and smear type camera applied to dynamic photoelasticity
12 p2086 A69-26166

Holography theory and applications including imaging, Fourier transforms and interferometry
12 p2086 A69-26169

Cinematic holography as continuous motion uninterrupted viewing system compared with standard cinematography, noting flicker-free shutterless reproduction
12 p2087 A69-26173

Pulsed laser holography used in conjunction with schlieren three dimensional system for observing gas density gradients at different test positions
12 p2088 A69-26179

Quantitative schlieren technique for one dimensional recording of light refraction in density gradients of high speed flow fields
12 p2088 A69-26181

HF interferometry for statistical-numerical oscillation analysis of unsteady plane transonic flow, constructing phase planes for study of wave surfaces propagation
12 p2089 A69-26188

Twin image elimination in holography using single sideband object waves without offset reference wave introduction
12 p2090 A69-26253

Power spectrum of object flux transmittance using Fourier transform type holographic system compared to systems similar to correlator
12 p2090 A69-26254

Active optics system for obtaining perfect mirror figure in orbiting astronomical telescope, using laser and white light sources, interferometers and data converter
12 p2092 A69-26423

Optical/mechanical IR line scanner imagery role in remote sensing
12 p2096 A69-26979

Radar imagery for agricultural land mapping, noting field and crop discrimination and parameters influencing radar return
12 p2097 A69-26986

Remote sensing and forest survey sampling designs, discussing nonstereo stratification, conventional photography and IR or radar imagery
12 p2097 A69-26991

Multispectral and calibrated Alaskan Arctic aerial survey of sea ice, thaw lakes and polygonal soils
12 p2075 A69-26996

Terrain photography applications and analysis including remote sensing of photographic systems and photointerpretation
12 p2098 A69-27006

Remote sensing of urban environments for metropolitan information systems noting photographic, thermal IR, radar and microwave applications
12 p2193 A69-27012

Linear recording of object wave phase to produce acoustic holograms
13 p2259 A69-27243

Ultrasonic images detection for nondestructive testing including surface-relief technique, Pohlman cell and scanning with piezoelectric transducers
13 p2269 A69-28661

Ultrasound holography for imaging opaque structures, noting distortion due to long wavelength of sound field and distortion reduction techniques
13 p2265 A69-28663

Image recognition algorithm for determination of hyperplane separating two finite sets of elements in Euclidean space
14 p2418 A69-29353

Panchromatic illumination in radar systems for image quality, tracking and detection problems, suggesting application to polypanchromatic radar
14 p2416 A69-29529

Remote sensor imaging techniques for simultaneous radar, IR and visible electromagnetic spectra of extensive land areas, presenting two clustering algorithms for multiple images
14 p2448 A69-29533

Image formation with arbitrary holographic surfaces achieved by reversing direction of propagation of diverging wave
14 p2450 A69-29582

Image quality of color disks in aerial photographs using panchromatic, color positive, color negative and false color films, measuring reflected sunlight
14 p2450 A69-29600

Image enhancement by coherent optical system without spatial filter, noting improved defocused transparencies
14 p2450 A69-29641

Optical image diffraction method for analyzing radiation patterns of horn antenna sounding beams used in microwave measurement of expanding plasmoids
14 p2497 A69-29793

Integrated landscape analysis with radar imagery for earth resources
15 p2608 A69-30454

Microwave hologram construction and image reconstruction by laser beam, analyzing results by matrix expression
15 p2610 A69-30802

Time average, multiple exposure and real time holographic interferometry based on image synthesis
15 p2611 A69-31146

Iris microphotometer with measurement and reference beams traversing plate in neighboring regions designed for stellar images measurement
16 p2790 A69-32225

Instrument for simultaneous observation of astronomical plate pairs for detection of stars with UV color excess
16 p2791 A69-32226

Holograms volume depth increased by reference beam splitting or by photographing holograms on same plate in sequence
16 p2791 A69-32508

Photographic system for astronaut training in Apollo Mission Simulator, using fixed camera and moving earth model coincident with strip color film past exposure slit
16 p2792 A69-32787

Multiple reference sources to improve field of view of lensless Fourier transform holography limitation due to modulation transfer function of film and turbulence
17 p2971 A69-32920

Mosaic mirror and lens camera system for multiple image high resolution photography
17 p2972 A69-33089

Point object image differential field during reconstruction by surface nonplanar holograms, determining image position and aberrations
17 p2981 A69-33115

Microwave holography for antenna synthesis, radiation patterns and visible images reconstruction
17 p2976 A69-33891

Anamorphic holography, discussing optical and nonoptical wavelength processes and generation and reconstruction of holograms for radar applications
17 p2976 A69-34062

Multispectral imaging remote sensors, analyzing energy sources affecting systems synthesis
17 p2977 A69-34064

Electron microprobe to produce plane grating X ray hologram based on Lloyd mirror experiment principle
17 p2977 A69-34160

Relative control data incorporation into sequential or simultaneous analytical triangulation systems, considering extraterrestrial photographs reduction
18 p3133 A69-34335

Aerospace images information suppressing and enhancing methods to aid interpreter in making more accurate recognition and measurement of earth resources subjects
18 p3133 A69-34338

Image dissector meteorological cameras, discussing ATS-III and Nimbus systems, high resolution camera and multispectral cameras
18 p3137 A69-35101

Optical imaging with partially coherent nonthermal light, discussing correlation function propagation, transfer functions, spatial Fourier analysis, weak visibility and matrix form
19 p3372 A69-35907

Optical imaging with partially coherent nonthermal light, discussing reconstruction of object from image and similarity between object and image, including detection
19 p3372 A69-35908

Thermal IR imaging devices for shape recognition and target position, emphasizing optical mechanical image or object plane scanners using point detectors
19 p3310 A69-36064

TV camera tubes with electron beam scanning adapted to IR imaging, emphasizing vidicon
19 p3311 A69-36069

Holographic system to process signals received by pulse Doppler radar, noting real time operation with availability of instantaneous development image storage media
19 p3314 A69-36598

Satellite IR hyperaltitude imagery for earth resources application, obtaining geological, meteorological and hydrological information
20 p3536 A69-36930

Scanned receiver acoustical holography for mapping or imaging sources of radiated acoustic energy on complex vibrator in water, noting application in air
20 p3576 A69-37323

Imaging radars - Conference, University of Michigan, July-August 1969
20 p3488 A69-37631

Imaging radar study based on optical imaging and electromagnetic wave processes, discussing Doppler signal processing, synthetic aperture radars and microwave holography
20 p3489 A69-37632

Holographic wave front reconstruction emphasizing between-wave interference fringes, discussing application to microscopy, Thompson and Parent disdrometer, interferometry, etc
20 p3540 A69-37637

Atmospheric phenomena effects on terrain imaging radar systems performance, discussing tropospheric turbulence and ionospheric irregularities
20 p3490 A69-37647

Imaging radar applications noting military surveillance, navigation assistance, iceberg detection, sea rescue operations, all-weather traffic surveys, terrain mapping, etc
20 p3491 A69-37649

Geological radar in regional and detail studies, discussing area side scanning imagery and lithology changes detection
20 p3491 A69-37652

Resolving power and field of view relations of holographic device for images recording through inhomogeneous atmosphere
20 p3540 A69-37728

Airborne imaging radar drawbacks and advantages, describing techniques to overcome defects
20 p3493 A69-37735

Multispectral imaging system to increase contrast using optical mechanical scanner, multielement dispersing spectrometer and electronic signal processing equipment
20 p3540 A69-37737

Thermal IR image forming devices, explaining principles of image and object plane scanning
20 p3540 A69-37738

Thermal scanner model block diagram presented including lens, filter, detector, CRT and camera, considering environmental factors affecting image character
20 p3541 A69-37740

Remote sensing by electromagnetic waves in microwave region, describing differences between microwave and optical sensing
20 p3493 A69-37741

Sensitivity improvement for inerteless microwave signal scanning and readout by applying pulse compression concepts, discussing application to real time microwave imaging and holography
20 p3545 A69-37901

Acoustic visualization for nondestructive testing, describing image formation by lenses, reflectors, holography, Bragg diffraction and phase contrast
20 p3512 A69-38269

Two channel TV Cassegrain telescope, describing color separation system for obtaining integral and monochromatic images of astronomical objects
20 p3547 A69-38309

Three dimensional X ray pictures of flaws shape and location in various materials
20 p3551 A69-38311

Orbital images for earth resources satellite mission planning using Mercury, Gemini and Apollo synoptic terrain photographs
21 p3721 A69-38632

Image deblurring and aperture synthesis using a posteriori processing by Fourier transform holographic spatial filtering
21 p3722 A69-38793

Holographic recording of focused images and reconstruction in white light, discussing optimal conditions, calculating ray paths
21 p3725 A69-39543

Optical properties of Gabor holograms with pure reference beam, discussing image reconstruction using He-Ne laser
21 p3726 A69-39624

Microholographic system for nonpseudoscopic stereoscopic image reconstruction of transparent and nontransparent microobjects
21 p3726 A69-39702

Randomly moving objects holography and reduction of stability requirement during exposure period due to automatic phase modulation

21 p3726 A69-39741

Holograms capable of multiple imaging or reconstructing point images, using extended and correlated signal and reference sources in recording process

21 p3727 A69-39777

Resolution limitations in holographic images using single record, discussing lensless holography using plane reference waves

21 p3727 A69-39778

Flash holography using ruby laser, describing optical system arrangement

21 p3727 A69-39784

Planetary nebulae imaging stratification effects on structural difference studies by slit and slitless spectrographs and narrow band photography

21 p3817 A69-39785

Extended source Fourier transform holography for single image synthesis of multiple identical images produced by multiple pinhole camera in X ray astronomy

22 p3943 A69-40019

Image disappearance or reappearance time controlled by inducing changes in alpha occurrence probability, executing on-line closed loop program detecting alpha rhythm

22 p3871 A69-40159

Stereoscopic shadow caster application to photographic stereoscopic projection for studying binocular stereopsis under kinetic viewing conditions in vision research

22 p3893 A69-40839

Fresnel zone plate as converging and diverging lens in holographic image reconstruction, noting sine wave zone plate

22 p3947 A69-40864

Color chemistry concept producing high quality color negatives and prints in existing black and white processing systems

22 p3948 A69-40990

Automatic discriminator design for identifying distorted image in noise based on ideal transmitter and use of split scanning beam

23 p4163 A69-41551

Mars landing site topography reconstructed via stereoscopic pictures returned by surface-based imaging systems

23 p4164 A69-41618

Hologram film nonlinearity effect on reconstructed image, discussing role of illumination type

23 p4165 A69-41636

Optical imaging problems in ultrasonic holography including distortion, resolution and depth of field

23 p4166 A69-42181

Temporal reference acoustical holography with Sokolov ultrasound camera system using double pulsed ruby or scanning CW laser

23 p4166 A69-42182

Retroreflector and Scotchlite object images obtained in long range holography with Q switched ruby laser, noting atmospheric seeing conditions

23 p4167 A69-42184

Phase and amplitude acoustical holography in opaque media, discussing medical diagnosis and underwater viewing

23 p4167 A69-42198

Acoustical holography principles and reconstruction techniques, noting advantages of liquid-surface and temporal reference holography over optical counterpart

23 p4167 A69-42199

Linear motion blur compensation technique in photographic recordings by reconstruction of sharp image from hologram

24 p4314 A69-42972

Holographic technique for reduction of image distortion during penetration through inhomogeneous medium

24 p4314 A69-42975

Microwave holography by two beam interference method, discussing operating principles, equipment, image reconstruction, etc

24 p4314 A69-42976

Image reconstruction by graphical method for equal wavelengths of recording and reconstructing radiation and equal scales of hologram

24 p4315 A69-43166

Three dimensional shadowgraph-like images in single exposure holograms of diffusely illuminated flame explained as time average holographic interferograms

24 p4317 A69-43764

Sobolev first embedding theorem providing relationship between global and local properties of functions in theory of differential equations

01 p1013 A69-10005

Computer aided circuit design by singular imbedding, beginning with prespecified topology and undetermined elements

07 p1115 A69-19148

Four dimensional space-time immersion in conformally flat six dimensional space or flat eight dimensional space, noting group of isometries of tangent spaces

10 p1774 A69-23162

One parameter operator imbedding to modify Newton method for solution of nonlinear equations

10 p1719 A69-23519

IMIDES

High temperature structural adhesives at temperatures of 350 F and higher including epoxies, polyimides, amide-imides and polybenzimidazoles

15 p2642 A69-30329

IMINES

Polymerization of monomers considered for direct synthesis of iminobenzylidene

10 p1651 A69-23308

Hypergolic filling materials for solid fuels with hybrid propellant combinations, discussing ignition and combustion of ethyleneimine derivatives

10 p1753 A69-24023

Propylene imine IR and Raman spectra, calculating thermodynamic functions based on rigid rotator harmonic oscillator model

14 p2410 A69-29922

Curing agents for carboxy and hydroxy functional prepolymers synthesis and evaluation including sulfonyl, acyl and ureido aziridines

16 p2747 A69-32777

IMMERSION

U SUBMERGING

IMMISCIBILITY

U SOLUBILITY

IMMITTANCE

U ELECTRICAL IMPEDANCE

IMMOBILIZATION

Physiological, cytochemical and histological effects on muscular activity, nervous system, adrenal and thyroid glands and liver of mice during 30 day hypokinesia

02 p0198 A69-11502

Hypokinesia and acceleration effects on human organism immunity and resistance to inflammatory diseases in 62 day test

02 p0198 A69-11513

Barbamyl effect with and without somatotrophic hormone injection in mice during prolonged isolation and hypokinesia, noting sleep duration

10 p1646 A69-23576

Long term hypokinesia effect on cardiovascular system of athletes indicating human orthostatic resistance increase due to physical exercises

10 p1646 A69-23581

Hypokinesia effects on transversostriated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm

13 p2212 A69-28616

Immobilization effects on alpha rhythm, locomotor coordination and visual alimentary motor reflexes of cats

13 p2212 A69-28617

IMMUNITY

Hypokinesia and acceleration effects on human organism immunity and resistance to inflammatory diseases in 62 day test

02 p0198 A69-11513

IMMUNOLOGY

Immunological and histochemical methods for studying mice reactivity after long term exposure to hyperoxic atmosphere

07 p1065 A69-18975

Specific antibody formation to influenza A virus vaccine /strain PR sub s/ in hibernating ground squirrels /Citellus tridecemlineatus/

08 p1263 A69-20173

Sublethal ionizing radiation doses effect on hemolytic immunocompetent spleen cells in mice upon using chemical radiation protectors

13 p2210 A69-28334

Immunological and histochemical methods for studying mice reactivity after long term exposure to hyperoxic atmosphere

20 p3479 A69-38223

Local stress effect on immunocompetent cells differentiation in guinea pigs lymphatic ganglia, showing antibody producing cells number increase

22 p3877 A69-40277

Retarded immunological recovery in sublethally X-irradiated mice by additional thymic exposure reversal with injected marrow cells

22 p3887 A69-41194

IMP

NT EXPLORER 18 SATELLITE

Interplanetary magnetic field fluctuations obtained by IMP 2

05 p0824 A69-16264

IMP F and G solar cosmic ray spectrometer utilizing FET analog multiplier for onboard particle identification data processing

[IEEE PAPER 3C-3] 07 p1135 A69-19197

Cosmic ray detectors design for medium, low and very low energy events on IMP-1 spacecraft, noting PCM format

23 p4118 A69-41738

IMP-A

U EXPLORER 18 SATELLITE

IMP-D

U EXPLORER 33 SATELLITE

IMP-E

U IMP

IMPACT

NT ELECTRON IMPACT

NT HYPERVELOCITY IMPACT

NT ION IMPACT

NT POINT IMPACT

NT PROTON IMPACT

Trajectories of elastic bodies analyzed by Hertz theory of impact

02 p0349 A69-12829

Large signal model for analysis of RF output and efficiency of IMPATT diode oscillator, noting frequency tuning

05 p0733 A69-16555

Si IMPATT diode oscillator and amplifier for CW operation at 50 GHz noting fabrication, performance and phase locking properties

05 p0733 A69-16560

Explosive bonding technique, discussing choice of explosive and geometrical parameters to match material parameters

[ASME PAPER 69-DE-47] 14 p2454 A69-28849

IMPACT ACCELERATION

Dynamic analysis and development of response histories and tradeoff study charts for spherical impact limiters for protecting hard landing planetary payloads

04 p0683 A69-15508

Mathematical formula for estimating cost and efficiency of parachuting supplies, noting shock load reduction

07 p1053 A69-19140

Rats tolerance to impact accelerations from blood enzyme activity providing safety limits for living organisms

10 p1645 A69-23500

Plastic cylindrical shell buckling under axial impact, predicting velocity required to cause flexural waves

18 p3218 A69-34624

Impact mechanism in hip safety belt protection in vehicles, deriving motion for natural oscillations of upper part of human body model

20 p3482 A69-37595

Impact limiter system design for Mars landing vehicle noting balsa wood or phenolic honeycomb construction

[AIAA PAPER 68-161] 21 p3820 A69-39228

IMPACT DAMAGE

NT METEORITIC DAMAGE

NT RAIN IMPACT DAMAGE

Barrier penetration depth by meteorite particles at prethreshold impact velocities, taking into account energy dissipation on shock wave front

01 p0152 A69-10579

Trailing camera technique to photograph impact and projectile penetration into earth materials from above and behind test vehicle

02 p0227 A69-11760

Strain rate effect of large deflections of clamped circular viscoplastic plates subject to rigid mass impact

02 p0349 A69-12798

Asymptotic estimate derived for size distribution function of fragments resulting from brittle impact destruction of rigid object applied to meteorites and lunar craters

03 p0512 A69-13691

Structures response to explosive blast, discussing damage criterion in terms of blast wave impulse and critical time

04 p0671 A69-14476

Reaction vs time relations in accidental impact of large commercial aircraft against rigid surface, detailing stress analysis of nuclear power plants structures

09 p1613 A69-21677

IMBEDDINGS [MATHEMATICS]

NT INVARIANT IMBEDDINGS

Spacecraft sterilization requirements, evaluating viable organisms release probability from spacecraft as function of equipment fracturing

11 p1828 A69-25460

Microbial contamination release probability from solids fractured by impact, considering spacecraft sterilization requirements

11 p1828 A69-25461

Impact crater cross section in fused silica, describing photomicrographic technique for distinguishing hypervelocity from low energy impacts

[AIAA PAPER 69-367] 13 p2366 A69-28299

Hypervelocity impact dynamics on copper cube targets imbedded with nickel wires, discussing terminal positions, Vickers hardness, flow fields, etc

[AIAA PAPER 69-368] 13 p2367 A69-28300

Pyrex spheres accelerated to 15 km/sec by plasma rail gun to study hypervelocity impact in thin stainless steel and Al targets

[AIAA PAPER 69-378] 13 p2368 A69-28308

Barrier penetration depth by meteorite particles at prethreshold impact velocities, taking into account energy dissipation on shock wave front

15 p2709 A69-30749

Meteoroid penetration damage to spacecraft system, showing particle mass density distribution as protection criterion

21 p3805 A69-39229

Air pressure wave forces on missile from silo wall motion resulting from close nuclear blast, using acoustic wave equation for concentric cylinder flow

21 p3691 A69-39765

Meteorite impact hypothesis supported by autochthonous and mixed breccias, shattercones and microscopic shock deformation evidence in central uplift rocks at La Malbaie structure

22 p4021 A69-40410

Darwin and Macedon impact glasses related to Far Eastern tektites through age determination by fission track technique

23 p4210 A69-41344

IMPACT DECELERATION

U DECELERATION

IMPACT LOADS

Finite deformation mode stability for finite amplitude first diameter nonlinear plastic wave initiation and growth at impact face in long rods

02 p0342 A69-12279

Viscous effects on impact pressure measurements in free jet low density gas flows at high Mach numbers

02 p0234 A69-12633

Recovery behavior of nickel strain hardened by impact loading by aluminum projectiles, showing microstructure correlation with stress levels

03 p0447 A69-13620

Impulse buckling threshold for elastic-plastic cylinder with elastic core after development of unstable motion

04 p0671 A69-14414

Inelastic strain measurement in metals during cyclic loads by impact tester

04 p0674 A69-14539

Multidegree of freedom systems for modeling optimum design of cantilever and simply supported beams for sudden loading

04 p0674 A69-14590

Nonlinear boundary value problem of elastokinetics solved by step-by-step integration to study thin walled shells stability under axial impact

[DVL-853] 04 p0677 A69-14836

Impulse loaded elastic-plastic beam response approximate solutions based on uniqueness proof

[ASME PAPER 68-WA/APM-23] 05 p0840 A69-16188

Theoretical and experimental results on annealed tapered aluminum rods to assess one-dimensional rate independent theory of plastic wave propagation from longitudinal impact

06 p1022 A69-17365

Plastic deformation in bcc, fcc and hcp metals as function of initial impact load energy, noting strain hardening effects

07 p1166 A69-19144

Stress-strain-time relations in magnesium alloy and aluminum plate impact load tests, discussing stress measurement, Hugoniot equation of state, yield point and dynamic response

08 p1330 A69-20102

Hertz impact theory application to aircraft tire in operation, considering imperfectly elastic body with impact expressible by Newton recovery factor of about one

10 p1633 A69-22887

Dynamic plastic response of finite bar subject to axial impact load noting reflected waves, stress-strain-time histories and residual strain

11 p1991 A69-25512

Asymptotic solution of two dimensional problem of elastic impact of bars, showing longitudinal and surface waves decay with time

11 p1996 A69-25737

Transverse impact along flexible couplings, deriving motion equations in presence of elastoplastic deformation

12 p2178 A69-26034

High speed deformation of metals under pulse loading, noting role of maximum stress magnitude and deformation characteristics

12 p2113 A69-26043

Large plastic deformation of two metallic cylindrical flat ended missiles in mutual longitudinal impact

12 p2179 A69-26217

High velocity liquid lithium effect on structural materials for MHD power generators, discussing material loss

13 p2278 A69-27478

Structural stress under acceleration loading simulated by two dimensional photoelastic model noting improvement of fringe patterns quality

14 p2532 A69-28885

Axisymmetric impact of circular cylindrical plates, obtaining two dimensional dynamic stress distributions for materials of linear elastic compressibility and plastic behavior in shear

14 p2534 A69-29027

Clamped circular plates impulse load tests with sheet explosives, showing finite difference program for computing large deflection dynamic response

15 p2709 A69-30675

Annealed aluminum rods dynamically compressive impact loading used to study longitudinal plastic waves propagation velocity

15 p2709 A69-30677

Bird impact resistance of polyurethane foam filled tailplane

17 p2901 A69-33648

Circular cylindrical shell nonlinear response to uniform radial impulsive pressure, noting inextensibility constraint and equations of motion roles

[ASME PAPER 69-APM-26] 18 p3214 A69-34399

Periodic motions in single mass impact vibration system by point transformations method, noting complexity characteristics

18 p3172 A69-34565

Rod buckling under impact load, discussing compression strain wave front propagation

18 p3217 A69-34580

Viscous friction damping effect on impact vibrator stability, analyzing boundary region of multiply periodic single impact motion by point mapping

18 p3172 A69-34588

Stressed state analysis in dynamic brittle breakdown wave front of compression waves propagating in brittle rod under longitudinal impact

18 p3217 A69-34592

Thin walled cylindrical shells deflections under axial impact load, assuming deformations resembling cylindrical surface bending

18 p3217 A69-34599

Plastic cylindrical shell buckling under axial impact, predicting velocity required to cause flexural waves

18 p3218 A69-34624

Asynchronous gyrostat postimpact drift direction found orthogonal with respect to initial impulse by averaging method

19 p3311 A69-36192

Hydrodynamic vertical or horizontal impact of sphere immersed in ideal heavy liquid of finite depth, considering container floor effect, surface pressure distribution, etc

19 p3299 A69-36393

Monograph on beam impact force and bending stresses during transverse impact, noting Bernoulli and Hertz theories application

20 p3628 A69-37922

Impact pressures during two body collisions, correlating pressure with particle speed

21 p3836 A69-38943

Dynamic plasticity of nonsymmetrical free flight collision impact of crystalline solids, using linear temperature dependent stress-strain function and finite amplitude wave expansion

21 p3840 A69-39298

Impact effects on metallic materials deformation and wear, considering impact force, time and coefficients, penetration depth, deformation energy, etc

22 p3966 A69-39876

Reaction impulse during steel spheres impacts at lead surface in vacuum dependent on kinetic energy, velocity and spheres material

22 p4047 A69-41101

Central transverse impacts of sphere on free-free beams, investigating maximum strains variation with impact velocity by narrow band tuned circuit filter

23 p4235 A69-42455

Sphere set in motion at constant velocity by impulsive force submerged in incompressible fluid in half space

24 p4298 A69-42585

Dispersive pulse propagation in laminated composites compared with theoretical predictions for timing and amplitude of oscillations

[ASME PAPER 69-APMW-22] 24 p4401 A69-43097

Longitudinal elastic waves produced in truncated hollow Al cone due to steel spheres impact

[ASME PAPER 69-APMW-15] 24 p4401 A69-43101

IMPACT PREDICTION

Helicopter fire control systems evaluation by computer model for hit probability and impact point sensitivity to various parameters

[AHS PAPER 316] 17 p2933 A69-33540

IMPACT RESISTANCE

Force law determining impact processes of pyramidal and conical body penetration into smooth surface of rigid plastic metals

02 p0337 A69-11615

Explosives and propellants sensitivity to fragment impact, establishing threshold detonation velocity

04 p0645 A69-14473

Critical end-on impact velocities calculated for reentering solid and granular radioisotopic fuel rods with solid and granular earth materials

04 p0630 A69-14800

Remotely operated open-cup impact tester for studying impact initiation of reaction of various liquid fluorinating agents with metals and plastics

06 p0907 A69-17876

Fluidic control systems for angular rate and attitude stabilization flight-tested, noting good impact and acceleration resistance

[AGARDOGRAPH-118] 08 p1257 A69-20955

Bumper materials effect on two component hypervelocity impact shields performance, noting material density influence

[AIAA PAPER 69-379] 13 p2283 A69-28309

Bird impact resistance of polyurethane foam filled tailplane

17 p2901 A69-33648

IMPACT STRENGTH

Impact cyclic loading fatigue tests of smooth and notched duralumin, discussing increased impact strength resulting from initial underloading

07 p1167 A69-19317

Impact hardness of materials determined by Droz method of static hardness determination, noting tests on steel

10 p1801 A69-23850

Projectile impacts into laminated targets consisting of plastic layers backed by Al substrates using SHAPE code with hydrodynamic elastoplastic distortional model

[AIAA PAPER 69-356] 13 p2366 A69-28289

Nickel maraging steel weld metal impact strength and fracture toughness improved by heat treatment

18 p3151 A69-35430

Ni-Ti maraging steel hardness impact strength and thermal EMF changes during quenching

19 p3345 A69-36154

Boron fiber reinforced Al alloys spall failure and shock induced filament damage, using flyer plate technique

20 p3562 A69-37772

IMPACT TESTING MACHINES

Remotely operated open-cup impact tester for studying impact initiation of reaction of various liquid fluorinating agents with metals and plastics

06 p0907 A69-17876

Drop-weight tear tests dependence on specimen thickness and metallurgical properties

09 p1503 A69-21389

Impact testing machine with dropping load, noting provision for sample fastening to reduce reflected tensile wave effect

15 p2583 A69-30286

IMPACT TESTS

NT CHARPY IMPACT TEST

Perforation and penetration mechanisms of Styrofoam slabs, using impact tests with free falling and rifle powered projectiles

01 p0165 A69-10115

Free flight impact tests showing deformation curve for aluminum and copper single crystals representable as 1/4 power law

02 p0344 A69-12288

Free surface motion and stress measuring instrumentation, describing plate impact one dimensional strain configuration for determining mechanical properties under stress wave propagation

02 p0344 A69-12290

Hypervelocity impact effect on structural honeycomb spacecraft wall configurations, stressing design and wall thickness parameters

[AIAA PAPER 68-314] 02 p0345 A69-12389

FM/AM telemetry circuits with three axis piezoelectric accelerometer for measurements during impact tests of soft landing models

10 p1654 A69-23279

High pressure Hugoniot points made by hypervelocity gas gun, using laser beams to measure impact velocity and pressure transducer for impact stress

[AIAA PAPER 69-358] 13 p2264 A69-28291

Hypervelocity impact dynamics on copper cube targets imbedded with nickel wires, discussing terminal positions, Vickers hardness, flow fields, etc

[AIAA PAPER 69-368] 13 p2367 A69-28300

Penetration mechanics of multisheet structures based on discrete particle modeling of impact debris

[AIAA PAPER 69-371] 13 p2367 A69-28303

Aluminum double sheet target penetration resistance determined by studying high velocity pyrex glass impact effects on front/rear sheets and spacing

[AIAA PAPER 69-375] 13 p2367 A69-28305

Quality assurance impact energy attenuation testing of U.S. Army flyer protective helmet, considering combined interaction of shell, foam liner and plastic pads

15 p2559 A69-30851

Brittle toughness determination method compared with Robertson and notch impact tests, evaluating steel susceptibility to brittle failure propagation

16 p2795 A69-32796

Crash helmet impact protection capability, considering helmet construction

17 p2913 A69-33169

Cylindrically shaped projectiles low velocity impact upon horizontal surface of dry commercial Ottawa sand mass, estimating penetration for soft landing

21 p3839 A69-39231

Impact effects on metallic materials deformation and wear, considering impact force, time and coefficients, penetration depth, deformation energy, etc

22 p3966 A69-39876

Rain erosion process on aircraft surface, using single impact test apparatus with photographic recording and photoelastic study

23 p4227 A69-41872

Sand erosion behavior of metals and plastics in air blast rig under varying exposure time, angles of impact and tensile stress

24 p4363 A69-42787

Scale error correction technique for structural impact modeling using dissimilar materials, involving permanent deformation of spherical caps impacted into liquids

24 p4406 A69-43692

IMPACT TOLERANCES

Impact/injury data used to estimate human tolerance to instantaneous accelerations

04 p0552 A69-14469

Mechanical model of human body used to study response to vibration, impact, blast and decompression loads

04 p0552 A69-14470

Mars landers impactable power subsystems, considering thermoelectric generators, batteries, conversion equipment, Mars environment, etc

23 p4069 A69-42253

IMPEDANCE

NT ACOUSTIC IMPEDANCE
NT CONTACT RESISTANCE
NT ELECTRICAL IMPEDANCE
NT ELECTRICAL RESISTANCE
NT LC CIRCUITS
NT MECHANICAL IMPEDANCE
NT REACTANCE
NT RESPIRATORY IMPEDANCE

Impedance and gain approximation in transistor configurations, noting gyrator circuit

02 p0213 A69-11532

Impedance sheet approximation to plasma slab, considering plane wave propagation, plasma covered slot antenna and transmission loss

02 p0209 A69-12348

Emission of thin metallic antenna in randomly inhomogeneous medium, determining effective impedance

06 p0894 A69-17451

Cylindrical electromagnetic waves diffraction at impedance wedge in anisotropic cold plasma, using Maxwell equation and double contour integral

09 p1545 A69-21505

Emission of thin metallic antenna in randomly inhomogeneous medium, determining effective impedance

20 p3508 A69-37936

IMPEDANCE MATCHING

Variable impedance matching device employing lumped and homogeneous circuit elements and stub line technique

01 p0046 A69-10740

Mismatched errors associated with Y factor power ratio measurement effect on microwave noise-temperature calibrations

[JPL-TR-32-1345] 02 p0211 A69-12442

Lossy transmission line filters and wideband impedance matching

03 p0406 A69-13906

Impedance matching of volumetrically scanned waveguide arrays, stressing element spacing, surface wave impedance, etc

04 p0571 A69-14312

Impedance matching selection for phased array element, using element impedance data and equivalent circuit

04 p0572 A69-14323

Transistor scattering matrix parameters determination, emphasizing directional coupler errors and impedance mismatches

04 p0582 A69-15067

Thermal noise and other disturbances from mismatched two port isolator in low power microwave transmission antenna noise between generators and leads

07 p1108 A69-19486

Electric propulsion design, considering effects of weight, impedance matching, beam voltage regulation and operating point variations in formulating system mass and reliability

[AIAA PAPER 69-254] 09 p1569 A69-21879

Mismatch correction in microwave power measurements based on directional coupler techniques

12 p2038 A69-26055

Matched diodes in monolithic balanced mixer by diode array fabrication for noise suppression

13 p2233 A69-28071

Dispersion and coupling impedance of logarithmic spiral resting on anisotropic magnetodielectric layer for microwave devices design

13 p2235 A69-28512

360 degree varactor linear phase modulator, analyzing impedance matching, insertion loss, tuning design and serrodyne application

16 p2756 A69-31577

High resolution swept frequency reflectometer suitable for impedance matching in waveguides or coaxial lines

16 p2759 A69-31940

Coupling between electric dipoles in warm plasma, determining electron density and temperature from resonance peak of mutual impedance at electron plasma frequency

17 p2925 A69-33846

Interrelations among mutual coupling, element efficiency, active impedance and radiation patterns in linear arrays derived from infinite order difference equation

17 p2929 A69-33874

Active antenna impedance matching network constituting low noise device for electromagnetic interference measurements useful for automatic or manual scanning

17 p2943 A69-34131

Directional couplers design considerations for use in microwave power meters, analyzing directivity and mismatch effect on system error

19 p3282 A69-35826

Two loop resonant amplifiers design, considering mismatched, matched and optimally matched regimes

22 p3912 A69-40258

Small losses measurement in circulators and reciprocal quadrupoles, using scattering matrix to eliminate mismatch errors

22 p3875 A69-40259

Dispersion and coupling impedance calculation for symmetrical or helical slow wave structures employed in traveling and backward wave tubes

22 p3916 A69-40958

Equivalent circuit technique for dispersion equation and coupling impedance of slow wave structures of ring-rod systems, noting retardation

23 p4139 A69-41944

Double cellular surface geometry effect on dispersion and coupling impedance of two dimensional periodic resonator slow wave structure

23 p4140 A69-42048

IMPEDANCE MEASUREMENTS

Permittivity measurements by measuring impedance on thin cylinders in rectangular waveguide or in cavity formed by coaxial transmission line

02 p0222 A69-12756

Linear transistor models synthesis based on measured characteristics of four terminal admittance parameters

03 p0404 A69-13596

Admittance between terminals measured for stabilizing single loop negative feedback transistor amplifier

05 p0739 A69-16341

Large signal impedance measurements and dynamic characteristics explain Si avalanche diodes efficiency degradation at higher frequencies

06 p0893 A69-16938

Complex admittances and impedances of various networks determined by impedance bridge, describing frequency dependent limits of measurement parameters

09 p1501 A69-22578

RF measurement techniques and interpretation of bonding impedance characteristics through VHF region

12 p2040 A69-26472

Small signal quasi-stationary characteristics of pulse transistors including gain and input impedance calculations

13 p2227 A69-27423

Automatic device for impedances and complex transmission factors measurement at meter and decimeter wavelengths, noting reflection factor

13 p2235 A69-28520

Cardiac output determined simultaneously in adult male humans by thoracic impedance changes and radioisotope dilution

14 p2408 A69-29304

Input impedance measurement of radiating symmetrical HF and microwave antennas, using solid state oscillator for feeding

14 p2420 A69-29394

Transistors transfer admittances measured indirectly, evaluating mean square error for transfer parameters

14 p2420 A69-29396

Transistor scatter and admittance differential parameters measurements graphically correlated

14 p2420 A69-29397

Output impedance measurements for accurate calibration in UHF region, using mobile discontinuity and bolometer for linear or nonlinear systems

14 p2422 A69-29583

Complex load impedance determination by measuring maximum, minimum and load voltages in line, including error analysis

15 p2582 A69-30123

Junction diode field factor, comparing results of dynamic impedance and distortion measurement methods with deduced values of static characteristic

15 p2575 A69-30301

Linear array composed of dual mode elements radiating into parallel plate region, obtaining scan angle compensation of element impedance

17 p2929 A69-33875

Direct detection of ionospheric irregularity by device onboard San Marco satellite, utilizing antenna impedance fluctuations

21 p3715 A69-38562

IMPEDANCE PROBES

NT RADIO FREQUENCY IMPEDANCE PROBES

High speed compression waves, rarefaction waves and gas interface regions position and velocity measurement in shock tube by sensing electrical impedance

03 p0428 A69-13104

Three probe impedance meter with graphic arithmetical element designed to cover frequency range from 50-1000 MHz

[ONERA-TP-605] 05 p0764 A69-16590

IMPELLER BLADES

U ROTOR BLADES [TURBOMACHINERY]

IMPELLERS

NT PUMP IMPELLERS

Steady three dimensional flow through impeller of turbines with small number of blades and with edge cut hub, noting inefficiency of flow without impact

01 p0142 A69-10309

Flow in impellers of mixed and radial flow compressors for jet engines, turbochargers and automotive gas turbines, discussing velocity, load distribution, etc

[SAE PAPER 690033] 07 p1049 A69-18312

Unsteady relative flow in centrifugal impeller passage running at part capacity and zero flow observed by hydrogen bubble flow visualization method [ASME PAPER 69-GT-35] 09 p1432 A69-22489

Plenum chamber obstructions influence on hovercraft lift fan performance, discussing tests and losses due to flat plate at impeller outlet 13 p2202 A69-27546

Unsteady aerodynamic processes in centrifugal compressor stage with impeller, vaneless diffuser and annular receiver chamber 15 p2547 A69-30073

Centrifugal compressor impeller disk design, considering stress analysis for shielding portion profile determination to satisfy equal strength condition 17 p3057 A69-33193

Discrepancy between theoretical and experimental coefficients of friction losses on blades of centrifugal compressor impeller wheels, using lattice theory 23 p4058 A69-41727

IMPERFECTIONS
U DEFECTS

IMPERMEABILITY
U PERMEABILITY

IMPINGEMENT
NT JET IMPINGEMENT

Cumulative damage concept for rain erosion of solid materials, noting incubation period and similarity to microscopic damage in fatigue failure 12 p2187 A69-26848

Solid materials erosion rate as function of cumulative damage generated by liquid droplets impingement 16 p2794 A69-31904

Free flow field from underexpanded rocket motor nozzle and impingement effects of pressure and heat transfer to flat plate [AIAA PAPER 69-568] 16 p2842 A69-32693

Attitude control rocket exhaust plume impingement effect on electrical performance and mechanical damage of commercial silica covered silicon solar cells 19 p3252 A69-35700

Pressure effects in spontaneous ignition of interimpinging hydrazine and red fuming nitric acid /RF-NA/ liquid streams in evacuated test chamber 24 p4415 A69-43667

IMPLANTATION

MOSFET fabrication by ion implantation using gate metal as mask, noting source and drain alignment with gate and low feedback capacitance 05 p0734 A69-16563

Multichannel telemetry system for chronic implantation in animals to monitor physiological parameters 15 p2559 A69-31044

Single channel pressure telemetry unit with magnetic latching or RF switch for chronic implantation 23 p4100 A69-41295

IMPLEMENTATION
U PERFORMANCE

IMPLOSIONS

Nonuniform propagation of imploding shock waves by extending self similar solution to earlier times in implosion process when shock strength is finite 10 p1678 A69-22931

Mach reflection shock-shock locus in shock tube implosions generation by area change 16 p2766 A69-31919

Shock tube with cylindrical explosive to implode glass wall and produce high velocity glass particle jet, studying jet velocity and behavior and test gas pressure effects 18 p3116 A69-34460

IMPREGNATING

Tensile, bending and impact strengths of materials produced by metal porous blank impregnation with molten glass, noting metal density and sintering effects 15 p2643 A69-31188

IMPULSE GENERATORS

Dissipative fluid sphere motion due to impulsive point source calculated by finite difference scheme, assuming Voigt and Maxwell type internal friction mechanisms limitations 14 p2485 A69-29026

IMPULSE NOISE
U ELECTROMAGNETIC NOISE

IMPULSE TRANSFER ORBITS
U TRANSFER ORBITS

IMPULSES

Impulse bandwidth measurement error determination by trapezoidal numerical integration 03 p0398 A69-13902

Time varying linear system with input-output relation described by differential equation calculated for impulse response using Taylor series 09 p1459 A69-22580

Vignetting effect on impulse response of general coherent optical Fourier processor, noting time varying character and input position sensitivity 12 p2036 A69-25912

Backscattered impulse response waveforms of conducting circular cylinder for broadside incidence utilizing Fourier synthesis 17 p2917 A69-32918

Satellite motion orbital elements dependence on large short impulse arbitrarily directed in space, analyzing optimal orbits transfer and thrust control 21 p3818 A69-39821

IMPURITIES

Interstitial impurity effects on mechanical properties of molybdenum single crystals, considering temperature dependence of flow stress in bcc metals 01 p0095 A69-10609

Synthetic solid lubricants impurity detection by X ray diffraction and oxidation thermogravimetry 01 p0102 A69-10909

Impurity concentration in n-type indium antimonide semiconductors at liquid nitrogen temperatures estimated by current-voltage measurements 02 p0294 A69-11631

Thorium and La-compounds retained superconductivity to Pr and Tm concentrations due to crystal field splitting effect producing nonmagnetic singlet ground state 02 p0295 A69-11778

Intentional impurities effects on nitronium perchlorate thermal stability explained by change in cation and anion vacancies 02 p0304 A69-11899

GaAs injection lasers noting spectral function, I-V characteristics and relations among lasing wavelength, threshold current density and impurity concentration 02 p0256 A69-11993

Localized vibration modes of defects and IR absorption bands in compensated Si doped GaAs 02 p0299 A69-12402

Impurity concentration measurement for alloyed region of tunnel diode by determining Fermi level position 02 p0301 A69-12685

Impurity profiles and energy band diagram for cuprous sulfide-CdS heterojunction based on capacitance, Hall and electron microprobe measurements 03 p0368 A69-13075

Temperature dependence of elastic constants of highly and weakly doped n- and p-type GaAs 03 p0484 A69-13282

Josephson current dependence on nonmagnetic impurity concentration in pure and highly contaminated superconductor 03 p0484 A69-13284

Ground state energy for single magnetic impurity dissolved in nonmagnetic metal, applying cluster variation method to s-d interaction Hamiltonian 03 p0485 A69-13298

Impurities effect on defects in oxygen deficient niobium, tantalum and zirconium oxide scales at high oxygen pressures, noting relationship to metal oxidation 03 p0444 A69-13312

Si and iron impurities effects on duraluminum alloy structure and mechanical and plastic properties for fabrication from granules and rolling from ingots 03 p0452 A69-14120

Photoionization of donor impurities during absorption of IR radiation in n-type Te doped GaP at low temperatures 03 p0492 A69-14169

Diffusion in compounds of elements of groups III-V 04 p0641 A69-14502

Heterodiffusion of metallic impurities in body centered phases of doped zirconium and titanium, determining diffusion coefficients via radioactive isotopes 04 p0613 A69-14557

Spectral study of crystal lattice of gallium phosphides for influence of vacancies and impurities on band formation 04 p0643 A69-15258

P-type GaSb crystals with various impurity concentrations noting conductivity, transverse magnetoresistance, Hall effect and acceptor band width and conductivity 04 p0643 A69-15259

Electrical properties of n-type Cd tin arsenide single crystals with impurity concentrations at various temperatures 05 p0809 A69-16375

Recovery of carrier concentration and lifetime in n- and p-type Si during annealing after irradiation by 10 Mev electrons, noting impurities effects 06 p0974 A69-16865

Junction gate field effect transistor design covering geometries and impurity profiles 06 p0893 A69-17197

Titanium surface impurities effect on porosity in welds, proposing machining immediately before welding as solution 06 p0945 A69-17894

Oxide impurity effects causing potential shifts in Si covered by thick oxide layer studied with metal-oxide-Si electrical measurement and radiochemical analysis 07 p1072 A69-18272

Impurity atoms effects on Cu diffusion and solubility in GaAs, determining Hall coefficient temperature dependence and conductivity 07 p1199 A69-19009

Impurities effect on electron energy spectrum in semiconductors at zone boundary and arbitrary doping levels, using Green function 09 p1554 A69-21467

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes 09 p1555 A69-21475

Impurity concentrations in expansion tube flow, measuring radiation intensities [AIAA PAPER 68-371] 09 p1477 A69-21961

Specific heat dependence of beryllium at low temperatures on sample impurities, considering Debye temperature 09 p1527 A69-22399

Impurities effect on plastic flow stress and activation volume as functions of strain, strain rate and temperature in molybdenum crystals 10 p1710 A69-23089

Shallow impurity states in semiconductors, calculating bulk and surface energy eigenvalues in Si and Ge 10 p1745 A69-23361

Nitrogen impurities effect on electron energy balance in DC arc burning in inert gas 10 p1732 A69-23442

Interstellar diffuse absorption bands due to resonance lines of impurity atoms trapped in low temperature hydrocarbon matrices 10 p1781 A69-23677

Microimpurities in aluminum-yttrium garnets determined spectrographically by using gallium oxide as carrier and Teflon powder for fluorinator 10 p1747 A69-23843

Electrical conductivity of impurity semiconductors containing variable current carrier concentrations, discussing current-voltage characteristics 11 p1937 A69-24909

Equations for pn junction behavior valid at impurity concentrations beyond nondegenerate range, noting contact potential and carrier density 11 p1938 A69-25306

Metallic impurities effect on Ge surface charge and recombination properties, noting fast and slow electron density changes by forbidden band penetration 11 p1939 A69-25703

Photon loss coefficients in electron beam pumped GaAs laser showing dependence on doping type and impurity concentration, noting threshold current density measurement 13 p2271 A69-27467

Thermal accommodation coefficient and critical supersaturation for nucleation of mercury vapor on pyrex glass 13 p2321 A69-28005

Epitaxial layers impurity concentration and resistivity measurements by capacitive and three point probe methods 13 p2323 A69-28641

Temperature dependence of elastic constants of highly and weakly doped n- and p-type GaAs 14 p2508 A69-29655

Josephson current dependence on nonmagnetic impurity concentration in pure and highly contaminated superconductor 14 p2508 A69-29656

Electronic states of semiconductor acceptor centers at forbidden band deep levels, considering inner electron shell excitation in impurity ion 15 p2665 A69-30039

Impurities effect on electron energy spectrum in semiconductors at zone boundary and arbitrary doping levels, using Green function 15 p2669 A69-30712

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes 15 p2669 A69-30720

Multicomponent semiconductor compounds of non-stoichiometric composition, studying structure,

behavior and correlation between electrical properties and phase diagrams

15 p2670 A69-31243

Electrical conductivity of cesium iodide single crystals with anion and cation impurities noting temperature dependence

16 p2824 A69-31573

Hole mobilities in InSb due to phonon and ionized impurities scattering on basis of strain potential constants

16 p2824 A69-31575

Vibrational excess entropy in dilute solid solutions alloys calculated by changes in potential fields surrounding impurity atoms

16 p2798 A69-31706

Ammonium nitrate thermal decomposition activation by dyes and halides, noting endothermic and exothermic reactions, proposing models to study impurities role

17 p3016 A69-32830

Refractory metals fracture, discussing interstitial impurity addition effects in Group 5a and 6a metals

17 p2989 A69-33556

Gas ionization relaxation times from ion density profiles in shock tubes at low Mach numbers, discussing influence of impurities on ionization process

18 p3116 A69-34451

Impurity levels in semiconductors with multiconduction bands, noting impurities influence on photoluminescence, laser action and Gunn effect

19 p3385 A69-36514

InSb single crystals impurities incorporation and distribution, concluding electrical properties vary with homogeneity or heterogeneity of dopant microdistribution

19 p3389 A69-36547

Aircraft breathable LOX purity, water percentage and carbon dioxide and methane proportions, determining other contaminants after concentration by refrigeration

21 p3666 A69-39273

Impurities effect on corrosion of fluorine containing propellant oxidizer systems, noting aqueous and anhydrous hydrogen fluoride corrosion

21 p3784 A69-39487

Impurities effect on corrosivity of nitrogen tetroxide with tank construction metals, Al, stainless steel and Ti-Al-V alloy, noting temperature aging and concentration

21 p3748 A69-39488

Spin compensated state of localized magnetic impurity moment in space, calculating size range of magnetic impurity spin/conduction electron spin correlation function

22 p3983 A69-40061

Strong doping criterion for Si with deep level impurity centers based on electron spectra of fast surface traps

22 p3992 A69-40604

Silicate glass impurity droplet formations on alumina single crystals polished surfaces analyzed by electron microprobe as function of high temperature

23 p4176 A69-41597

Hafnium microstructure and impurity concentrations before and after electron beam melting

23 p4178 A69-42361

IMPURITY

U PURITY

IN-FLIGHT MONITORING

Space controlled microbiology, discussing telemetry control of waste material conversion in air and water pollution

[UN PAPER 68-95861] 01 p0014 A69-10456

Cardiac output during space flight based on rebreathing method for estimation of gas tension in mixed venous blood and Fick equation

[UN PAPER 68-95746] 01 p0151 A69-10527

Data analysis methods for integrated data processing system for onboard in-flight checkout for launch vehicle evaluation

[AIAA PAPER 67-911] 01 p0037 A69-11024

In-flight measurement of shock and vibration effects on aircraft and propulsion systems

01 p0084 A69-11051

In-flight and flight line checkout techniques for foreign object damage to jet engines

01 p0056 A69-11055

Man as main component of future spacecraft or planetary station closed ecological system, discussing spacecrew physiological monitoring for biological cycles optimization

01 p0020 A69-11076

Analytical techniques for in-flight monitoring of aerospace water supplies for potability, emphasizing rapidity, sensitivity and reproducibility

01 p0019 A69-11339

Satellite monitoring application to air traffic control in parallel track system, discussing lateral and longitudinal separation control

02 p0277 A69-11591

In-flight measurement of shear, bending moment and torque on lifting or control surfaces and loads on nose and main landing gear

04 p0677 A69-14842

Automatic processing of electrocardiograms recorded during space flight by computer

05 p0715 A69-16524

Telemetric system for in-flight measurements of jet pilot heart and circulatory system to determine flight stresses leading to pilot failure

05 p0715 A69-16707

Air Force Eastern Test Range data processing systems perform real time operations during in-flight phases of ballistic missiles and orbiting vehicles

05 p0727 A69-16772

Radiation protection plan for Apollo lunar mission based on real time monitoring of solar activity and radiation in spacecraft

[AIAA PAPER 69-19] 06 p0996 A69-18113

Solar flare in-flight radiation detection and warning system for Concorde SST, noting radiation hazards due to solar cosmic rays

07 p1131 A69-18551

Solar proton monitoring by particle detectors on-board rockets and IMP satellite

08 p1318 A69-21142

Symptom pattern observation technique for flight data analysis, discussing in-flight symptoms and SPOT chart in aircraft maintenance

10 p1669 A69-22982

Airborne integrated in-flight data system to record and evaluate various engine parameters of operating jet engines

10 p1660 A69-23262

Ruggedized ballistic range telemetry system survivability and in-flight stability after gun launching, presenting temperature, strain and stagnation point pressure measurements

10 p1654 A69-23281

Computer program for onboard medical checkups of spacecraft crews during extended space flights, discussing tests and intervals

10 p1649 A69-23505

Onboard test instrumentation for monitoring aircraft communication, navigation and identification systems, noting adaptive programming

11 p1866 A69-25080

Onboard checkout system concept, discussing philosophy, requirements, underlying considerations, system description, development and techniques of system selection

11 p1866 A69-25081

Monograph on physicochemical principles of takeoff monitoring systems for large aircraft covering taxiing, safety control systems design, analog simulation, etc

12 p2128 A69-26119

Blood pressure telemetry of pilot during flight including determination of psychophysical relations

15 p2559 A69-31229

EEG and pilots flight performance relations, discussing in-flight telemetric measurements from ground station

15 p2560 A69-31233

Fatigue life gage on operational aircraft providing in situ monitoring of fatigue damage prior to and during propagation of running fatigue cracks

15 p2613 A69-31271

Electromagnetic interference correction for airborne telemetry, illustrating actual and simulated data for interfering source signatures identification

16 p2754 A69-32575

Jet engine compressor stalls in-flight investigation up to Mach 2 on F-111A by pressure sensors, noting steady state distortion role

[AIAA PAPER 69-488] 16 p2843 A69-32706

Performance capabilities and handling quality characteristics of aircraft equipped for in-flight thrust reversing

[AIAA PAPER 68-880] 17 p2902 A69-34031

Automatic multichannel transient monitor for electrical transient detection and data processing, transmission and storage on aircraft

17 p2947 A69-34135

Automatic processing of electrocardiography recorded during space flight by computer

18 p3098 A69-34743

Strapdown inertial reference unit system for inflight reliability and maintainability, discussing design and components

19 p3370 A69-35803

Design concepts and principles of systems for monitoring of Concorde flight control actuators, considering servo control, control interconnections and control input system

20 p3467 A69-38190

In-flight test to determine variation effects in bank angle control parameters on cruise flight handling qualities, considering spiral stability

[AIAA PAPER 69-893] 21 p3648 A69-39425

Orbital biomedical laboratory for in-flight measurement to assure human safety and optimize astronauts performance in extended space mission

23 p4223 A69-41801

Monitoring devices and modular construction features of Rolls-Royce RB.211 three shaft turbofan engine, discussing maintainability

24 p4321 A69-43112

IN-FLIGHT THRUST MEASUREMENT

U THRUST MEASUREMENT

INACTIVATION

U DEACTIVATION

INCIDENCE

Incidence for three dimensional reentry trajectories preprogrammed as function of velocity, finding bank angle as function of inclination

03 p0504 A69-12858

Thermal dissociation of chlorine trifluoride behind incident shock waves at high temperature, discussing bimolecular reaction rate constant

[WSCI PAPER 68-40] 07 p1202 A69-18355

INCIDENT RADIATION

Normally incident linearly polarized electromagnetic wave reflection and transmission by semimfinite longitudinally drifting magnetoplasma in static magnetic field

01 p0134 A69-11290

Relation between color index over lunar surface and solar rays angle of incidence, noting supplementary emission attributed to surface luminescence

03 p0506 A69-13089

Angle of incidence influence on unpolarized and linear polarized light of solar cell short circuit current

04 p0551 A69-15312

Diffraction of plane electromagnetic waves obliquely incident on conducting rotated periodically tapered grating structure formed of infinite metal strips

05 p0723 A69-16788

Solid target output pulse magnitude and direction dependence on angle of incidence of intense laser beam

06 p0935 A69-17686

Solar absorptance and hemispherical emittance of metals at space conditions determined with cyclic incident radiation technique

[AIAA PAPER 69-60] 06 p0945 A69-18154

Ruby laser beam incident on steel surface in air or water measured for energies, determining reflected energy dependence on incident energy for self insulation effect

07 p1157 A69-19594

Resolving power increase in multibeam antenna, discussing signal demodulation through incident field breakdown

10 p1664 A69-23797

Computer generated kinoform optical element operating on phase of incident waves and forming wave front reconstruction single image

10 p1697 A69-23867

Incident integral light flux relations and visibility range equation derived for objects illuminated by narrow light beams in scattering media

10 p1725 A69-23971

Diffraction of plane electromagnetic wave incident on conducting sphere segment, deriving secondary electromagnetic field equations in geometrical optics approximation

11 p1846 A69-24613

Horizontally moving body wake scattering cross section calculated with allowance for sphericity of incident and scattered radio waves, using Bessel functions

12 p2031 A69-26699

Relation between color index over lunar surface and solar rays angle of incidence, noting supplementary emission attributed to surface luminescence

14 p2516 A69-28771

Inverse scattering technique for electromagnetic bistatic scattering by expressing field produced by incident plane wave as sum of incident field and Fourier transform

16 p2754 A69-32569

Complex index of refraction of naturally occurring rock and mineral as function of wavelength of incident radiation
17 p2973 A69-33093

Scattering of electromagnetic waves obliquely incident on inhomogeneous plasma column of parabolic radial density distribution, noting applications to ionospheric irregularities
18 p3102 A69-34963

Plane screen electrical shielding effectiveness calculation, using incident wave impedances associated with current loop and magnetic dipoles in transmission line equations
19 p3267 A69-35932

IR detectors defined as transducers producing electrical signal proportional to IR power incident on detector, classifying types
19 p3310 A69-36068

Lunar surface thermal radiation incident on unit area flat surface located at variable distance and orientation above moon, considering diffusion effects
21 p3803 A69-38973

Photographic and photometric study of absorption and reflection of ruby laser light incident on biological objects
21 p3665 A69-39060

Incident integral light flux relations and visibility range equation derived for objects illuminated by narrow light beams in scattering media
21 p3772 A69-39657

Diffuse reflection of electromagnetic longitudinal wave from magnetoactive plasma in oblique incidence
22 p3990 A69-40788

Gain modification from spectral splitting of optical transition by incident light wave on higher frequency coupled transition
22 p3965 A69-41125

Photomultiplier tubes performance enhancement by light incidence on photocathode at oblique angles explained by reflection
23 p4191 A69-42194

Electromagnetic waves incident upon anisotropic plasma, determining transmission and power reflection coefficients
24 p4282 A69-42978

INCLINATION

Satellite motion perturbations in vicinity of critical inclination, using Encke method of numerical integration
19 p3397 A69-35607

INCLUSIONS

Thermal stresses near spherical inclusion in elastic matrix with uniform heat flow
01 p0171 A69-11264

Grain boundary interaction energy with inclusion of second phase, describing equilibrium and boundary shape
03 p0449 A69-13880

Integral equations solved numerically for general nonhomogeneous elastic inclusion problem, using linear elasticity theory
03 p0530 A69-14064

Elastic equilibrium stress condition of anisotropic plates with circular isotropic inclusions
04 p0667 A69-14264

Axisymmetric stress field around spheroidal inclusions and cavities in transversely isotropic material [ASME PAPER 68-WA/APM-14]
04 p0669 A69-14400

Circular inclusion effect on stresses around line crack in sheet under tension based on elasticity theory
05 p0841 A69-16432

Thermal stress concentrations in vicinity of cylindrical elastic inclusions embedded in elastic matrix, using displacement functions and photothermoelasticity
07 p1171 A69-18726

Metal bath surface conditions for floating aluminum trioxide inclusions in pure iron and carbon steels
07 p1167 A69-19342

Thermal stress field under uniform heat flow due to elliptical elastic inclusion for anisotropic case
08 p1418 A69-21003

Black chondritic inclusions in Cumberland Falls meteorite, discussing inclusion chemical, mineralogical and electron probe data
19 p3416 A69-36127

Variational principle for Fredholm integral equations applied to inclusion and indentation problems in elasticity
19 p3440 A69-36589

Nonmetallic inclusions formation mechanism after reducing iron by Al, Zr and Ti, noting oxygen/reducing agent ratio role
22 p3969 A69-40069

Nonmetallic inclusions effect on steels cyclic strength dependence on inclusion composition and metallic matrix properties, derived from fatigue tests
22 p4047 A69-41064

Force maintaining rigid inclusion embedded in elastic plate with rigid boundaries
23 p4235 A69-42465

Overall elastic moduli evaluation for solid composite materials comprising matrix of homogeneous elastic materials embedded with cylindrical shape inclusions
24 p4396 A69-42731

Porosity and inclusions effects on Al arc weld fatigue properties at ambient and cryogenic temperatures
24 p4331 A69-42940

INCOHERENCE

Holograms with unfiltered radiation obtained from superhigh pressure mercury lamp and incandescent lamp
09 p1495 A69-21671

INCOHERENT SCATTERING

Radio waves incoherent scattering to measure electron concentration profiles at mean latitudes, allowing for collisions
01 p0065 A69-10575

High power radar for investigating ionosphere by incoherent scatter technique
03 p0398 A69-13768

Incoherent scatter power measurements, comparing square law signal detection, phase coherent receiver and parametric amplifier methods
07 p1085 A69-19222

Faraday rotation measurements using incoherent scatter to obtain ionospheric electron density profiles
07 p1085 A69-19223

Emission line formation in homogeneous chromosphere for noncoherent scattering, considering various chromosphere models
08 p1381 A69-19800

Incoherent wave scattering of particle orbits as nonlinear effect of LF instabilities
08 p1367 A69-20801

Incoherent scatter measurements of F region electron concentrations at solar activity minimum
10 p1684 A69-23825

Ionospheric measurements of electron density, electron and ion temperature profiles from strength of incoherent radio wave scattering
10 p1686 A69-23910

Two fluid continuum theory of incoherent scattering extended to include unequal electron and ion temperatures, considering backscatter power dependency on collision frequencies
14 p2510 A69-28946

Incoherent scatter observations of ionosphere, discussing radar equipment and measurement of electron density and temperature, ionic temperature and composition, etc
14 p2415 A69-29522

Radio waves incoherent scattering to measure electron concentration profiles at mean latitudes, allowing for collisions
15 p2597 A69-30745

Far IR radiation generation, considering incoherent sources, harmonic generators, electron tubes, relativistic electrons and quantum oscillators
22 p3982 A69-40669

Index of refraction turbulent fluctuations effect on beam traversing optically active medium, discussing far field diffraction pattern and incoherent scattering [AIAA PAPER 68-683]
24 p4304 A69-43578

INCOMPATIBILITY

Effective tensors of elastic moduli and yielding of composite materials, considering multiparticle interactions and use of equilibrium and incompatibility equations
13 p2360 A69-27382

INCOMPRESSIBILITY

Finite plane deformations theory extended to incompressible materials with logarithmic change of volume proportional to pressure
12 p2181 A69-26613

Variational principle based on assumed stress hybrid method suitable for finite element analysis of incompressible solids
13 p2368 A69-28348

INCOMPRESSIBLE FLOW

NT STOKES FLOW

Jet line in rotational incompressible plane flows around shrouded propeller blade, using electrical analog
01 p0058 A69-10037

Effect of steady flow of incompressible conducting fluid on magnetic dipole at center of sphere
01 p0128 A69-10363

INCOMPRESSIBLE FLOW

Stress field and force system within torsional flow of cylindrical mass of incompressible anisotropic fluid
02 p0229 A69-11558

Wing upper surface velocity distributions having peak near leading edge, considering incompressible flow at zero angle of attack [ONERA-TP-632]
02 p0187 A69-11618

Downstream pressure asymmetry effect on efflux angle and contraction coefficient of incompressible jet from two dimensional orifice
02 p0231 A69-12075

Exact solutions for Navier-Stokes equations for non-steady incompressible viscous flow near two dimensional or axisymmetrical stagnation point
02 p0233 A69-12527

Compressible and incompressible laminar boundary layer with constant wall shear stress, using initial profiles
02 p0233 A69-12535

Unsteady incompressible boundary layer flow over leading edge boundary layer calculated by three dimensional time dependent equations
02 p0233 A69-12543

Arbitrary phase shift vibrations of airfoil profiles in incompressible flow reduced to Fredholm equations, allowing for trailing vortices influence
02 p0190 A69-12574

Heat transfer in crossed field MHD Couette flow for incompressible fluid, assuming linear wall temperature in flow direction
03 p0476 A69-13306

Two dimensional flow of incompressible fluid near sharp leading edge of plate at zero incidence, discussing approximation error and friction stress
03 p0415 A69-13651

Analysis of solution of Navier-Stokes equations describing two dimensional flow of viscous incompressible fluid by finite difference techniques and introduction of curl
03 p0416 A69-13652

Incompressible turbulent boundary layer with near zero wall friction at circular cylinder situated longitudinally in flow
03 p0416 A69-13664

Steady flows of incompressible viscous fluid exterior or interior to circular cylinder
04 p0589 A69-14898

Unsteady hydromagnetic flow of viscous electrically conducting incompressible liquid over infinite conducting harmonically oscillating plate
04 p0638 A69-15093

Dynamic behavior of series and parallel flow thrust-balance systems for compressible and incompressible flow, using analog computer simulation
04 p0647 A69-15521

Equations of motion derived for incompressible and irrotational viscous fluids in special relativity
05 p0792 A69-15682

Incompressible jet flows, discussing two dimensional jet, axisymmetric laminar jet and turbulent free jet
05 p0746 A69-16008

Incompressible turbulent boundary layers in channel flow using constant temperature hot-wire anemometer, emphasizing measurement in viscous sublayer [ASME PAPER 68-FE-26]
05 p0747 A69-16066

Pressure distribution across short vortex chamber to exit radius with known inlet geometry based on incompressible flow model and visualization photographs [ASME PAPER 68-WA/FE-17]
05 p0748 A69-16093

Turbomachinery research, discussing two and three dimensional incompressible flow in cascades near end wall and in rotating machines
05 p0751 A69-16534

Incompressible two dimensional turbulent boundary layers calculated on phenomenological basis
06 p0908 A69-17133

Inviscid incompressible fluid flow stability against helical disturbances in circular cylinder
06 p0910 A69-17332

Incompressible laminar Falkner-Skan boundary layer suffering sudden acceleration by moving belt, noting boundary layer separation [AIAA PAPER 69-40]
06 p0912 A69-18049

Computer solution of incompressible two dimensional time dependent Navier-Stokes equations for oscillating body with rectangular boundaries [AIAA PAPER 69-185]
06 p0914 A69-18135

Turbulent incompressible MHD flow between two parallel smooth plates in transverse magnetic field, determining magnetic Reynolds number
07 p1195 A69-19736

Incompressible jets bounded by infinite auxiliary thin jets, discussing straight wall jets and establishing ex-

istence and uniqueness of boundary value problem solution
09 p1480 A69-21734

Krause numerical solution applied to normal injection in three dimensional incompressible laminar boundary layer
[DVL-902] 09 p1482 A69-21971

Incompressible two dimensional potential flow analysis with compressibility effects for thick highly cambered multibodies in cascade, noting slotted compressor blade performance
[ASME PAPER 69-GT-6] 09 p1432 A69-22507

Digital computer programs for aerodynamics of subsonic gas turbine combustion systems applicable to incompressible flow with specified flow boundaries, noting vortices distribution
09 p1573 A69-22621

Incompressible Newtonian flow between two parallel planes, noting marginal stability condition, mean velocity profile and turbulence
10 p1678 A69-22909

Incompressible axisymmetric flow in turbomachines, analyzing flow field and velocity distribution
10 p1631 A69-22910

Three dimensional laminar boundary layer of incompressible flow controlled by suction or injection, considering similarity flow solutions and role in satellite design
10 p1678 A69-22936

Vortex incompressible flow in thin cylindrical chamber, analyzing outer and inner region and interface tangential velocity, shear and static pressures
10 p1679 A69-23557

Asymptotic boundary curves for two dimensional and axisymmetric incompressible irrotational flows into throat of convergent duct
10 p1680 A69-23893

Numerical solutions for incompressible Newtonian flow around circular cylinder for various Reynolds numbers
11 p1867 A69-24279

Velocity profiles in unsteady laminar incompressible boundary layer over flat plate in shock tube by two parameter integral method
11 p1871 A69-25026

Turbulent wall jet growth in streaming two dimensional incompressible flow over plane smooth wall with pressure gradient
11 p1873 A69-25139

Similarity solutions for incompressible, steady hydrodynamic and thermal boundary layers on longitudinally curved walls, allowing for displacement and curvature effects
12 p2060 A69-25761

Viscous incompressible conducting fluid flow through porous coaxial nonconducting cylinders under radial magnetic field with pressure gradients functions of time
12 p2062 A69-26275

Different pressure and deflection measurements coherence in vortex flows verified assuming radial equilibrium conditions
12 p2012 A69-26362

Incompressible elastic-plastic solid flow through rough converging conical channel analyzed using Mises yield condition and Prandtl-Reuss equations
12 p2063 A69-27114

Incompressible uniform shear flows merging behind trailing edge of semiinfinite flat plate, using inner-outer expansion method based on Navier-Stokes equation
13 p2248 A69-28223

Boundary layer characteristics of incompressible flow in wind tunnel with asymmetric two dimensional contraction, discussing flow profiles
13 p2249 A69-28235

Relative variations of wall friction and thermal flux for laminar incompressible flow of constant volume mass
13 p2250 A69-28357

Laminar to turbulence transition in submerged and bounded jets, using schlieren visualization for compressible flow and birefringent visualization for incompressible flow
14 p2428 A69-28876

Flow stability of one dimensional Cartesian and cylindrical incompressible inviscid flows with no body forces and interfaces
14 p2429 A69-29013

Incompressible laminar jet bounded by two parallel walls or by three walls, using linearized analysis related to Oseen approximation
14 p2429 A69-29023

Boundary value problem in three dimensional boundary layer theory for incompressible flow near stagnation point
14 p2432 A69-29677

Three dimensional laminar boundary layer on semiinfinite permeable flat plate in viscous incompressible fluid flow, calculating velocity profiles and skin friction components
14 p2433 A69-29898

Incompressible two dimensional turbulent boundary layer equations with arbitrary pressure distribution solved by weighted residual method
[AIAA PAPER 69-397] 15 p2591 A69-30478

Incompressible attached wall jet /Coanda flow/ over circular cylinder with finite incompressible injection normal to surface
16 p2772 A69-32148

Incompressible turbulent boundary layer analysis by two region characterization for eddy viscosity, using Spalding generalized function and Prandtl free shear flow model
17 p2951 A69-33255

Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface
[AIAA PAPER 69-724] 17 p2952 A69-33436

Two dimensional incompressible flow past circular cylinder at moderate Reynolds number, reducing partial differential equations of motion by series truncation for flow field
17 p2896 A69-33600

Optimum pressure distribution and airfoil profiles for maximum lift without separation in incompressible flow determined by second order theory
[AIAA PAPER 69-739] 18 p3083 A69-34401

Three dimensional incompressible wake behind blunt obstacle at leading edge of flat plate compared with mathematical model by Oseen linearization
18 p3083 A69-34403

Low Reynolds number solutions for incompressible viscous flows resulting from finite disk steady rotation
18 p3121 A69-34784

Higher order boundary layer theory development from Prandtl simplification of Navier-Stokes equations to successive approximations for incompressible and compressible flows
18 p3123 A69-34923

Boundary layer equation for steady incompressible flow past flat plate with parabolic leading edge, obtaining series solution in inverse powers of Reynolds number
18 p3124 A69-35270

Viscous incompressible fluid flow around semiinfinite oscillating plate and skin friction on infinite cylinders oscillating parallel to length
19 p3237 A69-35620

Wall influence on thermoanemometer readings in incompressible air stream measured with wedge shaped film sensors
19 p3308 A69-35857

Predictability of deterministic fluid systems with many scales of motion using vorticity equation for two dimensional incompressible flow, noting application to earth atmosphere
19 p3303 A69-36404

Wall curvature effect on hydrodynamic stability of laminar incompressible boundary layer with respect to perturbing Tollmien-Schlichting waves
19 p3299 A69-36587

Transition in near wake, from study of base pressure on circular cylinders in incompressible flow
19 p3242 A69-36809

Initial phase of parachute inflation in incompressible flow
[AIAA PAPER 68-927] 20 p3461 A69-37165

Model predicting steady state input-output characteristics of vortex amplifiers operating in incompressible flow regime, correlating model with experimental data
[ASME PAPER 69-FLCS-20] 20 p3465 A69-37980

Unsteady laminar incompressible time dependent boundary layer flows with cylindrical symmetry, transverse boundaries and no swirl
[ASME PAPER 69-FE-47] 20 p3517 A69-37997

Three dimensional turbulent boundary layer over flat surface in incompressible flow calculated by finite difference method based on time averaged motion equations integration
21 p3693 A69-38767

Navier-stokes equation numerical integration for three dimensional incompressible flow, discussing annulus thermal convection and trigonometric transforms algorithm
21 p3694 A69-38770

Spectral equation for decaying isotropic turbulence of incompressible inviscid flow at large Reynolds number, using spectral cascading
21 p3694 A69-38835

Optimal boundary layer control ensuring minimum heat transfer to porous plate from incompressible flow of hot gas of cooling system
21 p3849 A69-38846

Aligned uniform magnetic field effect on hydromagnetic stability of two dimensional incompressible electrically conducting jet flow with large Reynolds number
22 p3931 A69-40687

Boundary layer calculation in incompressible turbulent flow with closed streamlines, avoiding von Mises equation
22 p3932 A69-40931

Airfoils and cascades design for incompressible flow by numerical methods
23 p4058 A69-41610

Numerical method for calculating unsteady two dimensional boundary layers in laminar incompressible flow
23 p4152 A69-42108

Rheoelectrical analog technique for low speed aerodynamic characteristics of finite wings in incompressible flow, using deep electrolytic tank for lifting surface calculations
23 p4061 A69-42351

Time dependent unsteady flow of incompressible and electrically conducting fluid between two infinite disks rotating in uniform axial magnetic field
23 p4153 A69-42410

Two dimensional incompressible inviscid fluid flow problems solution by conducting-paper analog with electrical equipotentials tracing, based on Laplace equation applicability
24 p4299 A69-43024

Design of vortex fluid amplifiers operating in incompressible flow regime, based on fluid properties and geometry effects on amplifier behavior
24 p4256 A69-43299

Symmetry properties of Cameron-Martin-Wiener kernels in isotropic velocity field, applied to one dimensional model of incompressible turbulent flow
24 p4301 A69-43358

Incompressible fluid flow inhomogeneities effect on oscillations of airfoils cascade, noting occurrence of parametric resonance in turbine engine blades
24 p4245 A69-43479

Boundary layer equations with heat transfer for laminar and turbulent incompressible flows about two dimensional and axisymmetric flows, using finite difference method
[ASME PAPER 69-HT-7] 24 p4304 A69-43561

INCOMPRESSIBLE FLUIDS

Small oscillations in solid body with arbitrary cavity partially filled with viscous incompressible fluid
01 p0165 A69-10084

Incompressible fluid steady motion in curved tube investigated by Fourier series, solving coupled nonlinear equations numerically
01 p0058 A69-10142

Boundary value problems for steady, three dimensional MHD flow of viscous incompressible conducting fluid past various bodies, proving existence of solutions
01 p0126 A69-10164

Vector potential used to express equations of incompressible fluid motion in form suitable for digital solution, discussing boundary conditions
01 p0058 A69-10228

Asymptotic forms of Navier-Stokes equations for laminar motions of incompressible viscous fluid, discussing validity and applications
[ONERA-TP-651] 01 p0059 A69-10383

Turbulent heat and mass transfer in rotating incompressible fluid flow analyzed by kinetic energy and shear stress equations
01 p0060 A69-10402

Mixed boundary value problem for system of Navier-Stokes equations for viscous incompressible fluid in stationary motion in vessel, noting rotating fluid
02 p0272 A69-12223

Accelerated plate motion effect on flow of electrically conducting viscous incompressible fluid past infinite flat plate in uniform magnetic field
02 p0289 A69-12237

Cylindrical jet stability of perfectly conducting, incompressible and inviscid fluid in presence of axial magnetic field
03 p0474 A69-13142

Boundary conditions for irrotational hydrodynamic field around sphere moving along axis of cylindrical tube containing incompressible fluid calculated by least squares method
03 p0415 A69-13362

- Finite difference solution of time dependent Navier-Stokes equation for incompressible fluids, using velocities and pressure as variables
03 p0415 A69-13369
- Difference schemes to solve Navier-Stokes equations for viscous incompressible fluid by substituting fourth order partial differential equation
03 p0415 A69-13650
- Motion and stability of solid body with cavity containing rotor and two incompressible nonmixing liquids with surface tension
03 p0418 A69-13814
- Laminar two dimensional free jet outflow of incompressible nonNewtonian pseudoplastic fluid from orifice into mass of same fluid
04 p0586 A69-14406
- Kinematic and dynamic relations determined for vortex flow of ideal incompressible fluid past circular cylinder, noting use for calibrating cylindrical adapters
04 p0541 A69-14484
- Rayleigh step journal bearings, considering pressure distribution, load capacity and attitude angle and optimal film thickness ratio for incompressible fluid lubrication
04 p0605 A69-14587
- Small oscillations of viscous incompressible fluid in container with free surface under action of potential force field
04 p0587 A69-14620
- Cavitation stream calculation methods for ideal incompressible fluid with free boundaries, noting cavitation generators and Riabouchinsky problems
04 p0589 A69-14994
- Ideal plane incompressible fluid flow past airfoil noting hydrodynamic effects, assuming presence of constant eddy
04 p0589 A69-14996
- Surface wave stability for horizontal layer of incompressible dielectric fluid in electric field, noting viscosity effect
04 p0638 A69-15193
- Boundary layer flow of viscous incompressible liquid past wedge embedded circular cylinder
04 p0590 A69-15276
- Differential rotation of sphere in viscous incompressible liquid, discussing pressure and skin friction drag between two hemispheres with different angular velocities
04 p0590 A69-15278
- Viscous incompressible fluid motion in two or more dimensions and with zero fluid velocity on domain boundary, determining lower bounds and uniqueness for solutions
04 p0626 A69-15311
- Solution to system of equations in boundary layer theory of steady incompressible fluid flow
05 p0751 A69-16454
- Equations of motion solved for solid body with ellipsoidal cavity containing ideal incompressible fluid in uniform eddy motion
06 p0957 A69-16823
- Secular equation for Couette flow stability in incompressible viscoelastic fluid
06 p0909 A69-17240
- Laminar source flow of viscous incompressible liquid between two parallel coaxial rotating porous disks
06 p0909 A69-17243
- Universal equations for three dimensional laminar boundary layer of incompressible fluid on walls of axisymmetric channel with vortical external flow
06 p0909 A69-17328
- Linear equations for three dimensional perturbations in boundary layer of viscous incompressible fluid flow on plane surface, discussing Tollmein-Schlichting waves
06 p0909 A69-17329
- Incompressible laminar boundary layer with normal suction or blowing, discussing approximate method for evaluating laminar friction on wing contour
06 p0911 A69-17781
- Unsteady flow of viscous incompressible conducting fluid in MHD generator channel, discussing external circuit inductance and flow velocity during start-up
06 p0969 A69-17915
- Motion of viscous incompressible fluid in interspace between rotating and parallel fixed permeable plane having supplementary fluid injection solved by Navier-Stokes equations
07 p1119 A69-18743
- Navier-Stokes equations for steady rotational motions of incompressible viscous fluid at small Reynolds numbers between rotational surfaces
07 p1119 A69-18748
- Stationary viscous incompressible fluid flow past rough surface, noting solution stability and friction stress determination for given pressure gradient
07 p1119 A69-18751
- Uniqueness theorem for laminar MHD duct flows
07 p1190 A69-18813
- Laminar and turbulent stresses in plane asymmetric incompressible flows analyzed based on Boussinesq formula for turbulent shear stresses
07 p1121 A69-19330
- Fluid motion and MHD disturbances in viscous incompressible fluid of finite electrical conductivity, studying axis of oscillating dipole perpendicular to exciting field
07 p1195 A69-19451
- Unsteady suction motion of viscous incompressible fluid under action of slowly rotating suction disk, noting fluid velocity variation
08 p1302 A69-19875
- Arbitrary stationary foil in perfect incompressible fluid moving at constant velocity at infinity assuming plane, steady and irrotational flow
08 p1303 A69-20272
- Integral of Navier-Stokes equations for steady three dimensional motion of incompressible viscous fluid, giving angular velocity vector projections
08 p1342 A69-20320
- Statistical dynamics of turbulent incompressible fluid, discussing harmonic function in Navier-Stokes equation
08 p1303 A69-20323
- Incompressible laminar thermal boundary layer unsteady development from state of rest in vicinity of wall of obstacle subjected to unsteady thermal field [ONERA-TP-680]
08 p1304 A69-20754
- Two dimensional boundary value problem for symmetrical entry of wedge into incompressible nonviscous fluid using complex variable theory
08 p1305 A69-20995
- Coaxial cylindrical shells oscillation frequencies with interspace filled with incompressible liquid determined as functions of liquid level and interspace width
09 p1612 A69-21483
- Three dimensional flow field of incompressible fluid with purely axial development in conical ducts and turbomachines
09 p1480 A69-21597
- Self gravitating incompressible fluid sphere free oscillations, deriving characteristic equations for arbitrary viscosities
09 p1481 A69-21790
- Unsteady free convection in incompressible viscous fluid having internal thermal source contained in bounded volume
09 p1621 A69-21792
- Incompressible fluid nonlinear oscillations in rectangular basin analyzed by Green function for mixed problem, calculating velocity potential and free surface approximations
09 p1483 A69-22711
- Incompressible fluid unsteady motion between journal and bearing solved in form of Reynolds number power series from stream functions
09 p1514 A69-22712
- Approximate solution method for Navier-Stokes equations for incompressible viscous fluids
10 p1718 A69-22861
- Incompressible fluid flow engine spiral casing, considering flow as potential flow
10 p1632 A69-22914
- Flow instability of incompressible nonconducting fluid in thin cylindrical conducting elastic pipe in constant uniform magnetic field
10 p1798 A69-23094
- Laminar flow heat transfer of viscous incompressible fluid in entrance region of circular tube, using nonlinear equations
10 p1809 A69-23195
- Characteristics of dynamic mechanical systems including solid state and hydrodynamic analogs of ideal incompressible fluids, based on statistical theory of turbulence
10 p1678 A69-23209
- Similarity solutions of laminar boundary layer equations for three dimensional flows of incompressible power law fluids
10 p1678 A69-23235
- Solid cylindrical body entrainment by viscous incompressible fluid flow in tube under constant pressure gradients and absence of gravitational force
10 p1678 A69-23366
- Self consistent perturbation procedure for stationary homogeneous turbulence of incompressible fluid
10 p1680 A69-23648
- Homogeneous turbulence in incompressible fluid, expanding field variable on ideal random basis
11 p1867 A69-24282
- Nonuniformity of magnetic field effect on steady flow of incompressible inviscid electrically conducting fluid in duct, considering Reynolds and Alfven numbers [JPL-TR-32-1376]
11 p1923 A69-24291
- Dynamics of turbulent motion of incompressible viscous fluid particles, using Lagrangian functions
11 p1867 A69-24536
- Formula in Prandtl-Batchelor theory describing motion of incompressible fluid in sphere interior verified experimentally
11 p1868 A69-24755
- Helical motions of body bounded by multiply connected surface immersed in infinite ideal incompressible fluid, discussing congruence
11 p1868 A69-24790
- Large amplitude symmetric and asymmetric irrotational motion of inviscid incompressible fluid with liquid-vapor interface in accelerating cylindrical container of revolution
11 p1871 A69-25124
- Second order effects on two dimensional laminar boundary layer flow of incompressible fluid
11 p1872 A69-25127
- Reverse transition in two dimensional accelerated incompressible turbulent boundary layer flow, noting skin friction coefficient and turbulent intensity profiles
11 p1872 A69-25129
- Steady incompressible fluids flow around stationary wings and through rotating blades cascades based on Prandtl airfoil theory of bound vortices
11 p1873 A69-25202
- Low Reynolds number stability of incompressible fluid half jet flow, investigating free laminar boundary layer instability
11 p1874 A69-25280
- Axisymmetric turbulent supersonic incompressible fluid jet, calculating momentum flow distribution and excess heat flow densities in basic segment
11 p1818 A69-25346
- Axisymmetric oscillations of two spherical shells with noncoinciding centers of curvature immersed in compressible or incompressible fluids
11 p1875 A69-25467
- Steady flow of viscous incompressible fluid studied with system of equations equivalent to Navier-Stokes equations and finite difference method
11 p1875 A69-25480
- Steady flow field for viscous incompressible fluid in rotating pipe with porous walls determined from Navier-Stokes equations
11 p1875 A69-25481
- Thin deformable body motion in disturbed potential flow of ideal incompressible fluid
11 p1876 A69-25488
- Free periods of oscillation of incompressible rotating fluid bounded by rigid concentric spheres, using Longuet-Higgins solution of Laplace tidal equation
11 p1876 A69-25558
- Axisymmetric detached flow past slender solid of revolution by ideal incompressible fluid at zero angle of attack and with small cavitation numbers
11 p1877 A69-25741
- Unsteady surface and internal waves diffraction induced by source in ideal incompressible fluid, obtaining solutions in form of convolution and transfer functions
12 p2061 A69-25953
- Inertia effect on incompressible fluid film pressure between two oscillating parallel plates, considering Reynolds number
12 p2102 A69-26241
- Iterative solutions of nonlinear integrodifferential dynamical equation for two point velocity correlation tensor in incompressible fluid turbulence studies
12 p2062 A69-26602
- Heat transfer for incompressible inviscid fluid flow in cone, expressing solution in terms of dimensionless numbers
13 p2375 A69-27788
- Monograph on return currents produced by confined jet of incompressible fluid with low initial ambient fluid velocity
13 p2250 A69-28335
- Three dimensional thermal laminar boundary layer around body moving with constant acceleration in incompressible fluid, considering wall temperature and Prandtl number
13 p2380 A69-28631

Viscous incompressible fluid self similar mixing problems, performing group analysis for complete boundary value problem

14 p2428 A69-28803

Nonlinear internal gravity waves in stratified atmosphere of unbounded inviscid incompressible fluid, noting wave amplitude inverse proportion to atmospheric density

14 p2441 A69-29574

Nonlinear equations for motion of rigid body with cavity partially filled with ideally incompressible liquid

14 p2432 A69-29626

Incompressible viscous fluid steady motion caused by rotating ellipsoid, determining drag moments for circular disk and sphere

14 p2432 A69-29627

Laser beam light pressure bending of incompressible liquid surface leading to beam self focusing in linear medium

14 p2461 A69-29674

Magnetic field effect on heat and mass transfer in incompressible fluid MHD flow

14 p2500 A69-29901

Circular curved foil steady oscillations near screen in semiinfinite space filled with incompressible fluid transformed into equivalent linearized problem

15 p2547 A69-30576

Steady rectilinear translational motion of circular disk-shaped slightly bent wings near solid wall in incompressible fluid medium in absence of vortices and external forces

15 p2547 A69-30583

Plane incompressible fluid interface stability in presence of transverse electric field, deriving equation of motion for perturbation amplitude

15 p2652 A69-30911

Drag and friction coefficients for laminar pulsating incompressible fluid flow in circular tubes obtained from Navier-Stokes equation

15 p2592 A69-30988

Eigenfrequency spectrum and stability of perfectly conducting inviscid incompressible fluids in cylindrical channels and twisted magnetic fields, noting flowfields and critical wavelengths

15 p2664 A69-31063

Numerical approximation of Taylor vortices in viscous incompressible fluid flow between concentric rotating cylinders, using truncated eigenexpansions

15 p2593 A69-31518

Three dimensional laminar jet mixing of incompressible viscous fluid from rectangular cross section nozzle into uniform stream

16 p2768 A69-31687

Multipad externally pressurized spherical bearing fed with incompressible fluid for satellite attitude control systems tests

16 p2793 A69-31728

Asymptotic behavior of one dimensional laminar flow of incompressible viscous fluid in infinite cylindrical tube, giving equations for boundary conditions and flow rate

16 p2769 A69-31831

Book on mechanics of deformable media covering fluid and solid mechanics and applications to irrotational flows of compressible and incompressible fluids

16 p2813 A69-32789

Monograph on ring airfoil theory with nonuniform incidence covering steady flow and shear flow transition into boundary value problem of potential theory

17 p2889 A69-32995

Statistical dynamics of turbulent incompressible fluid, discussing harmonic function in Navier-Stokes equation

17 p2952 A69-33313

Transformed Navier-Stokes equations for incompressible fluids flow, deriving forces acting on surface of bounded region

18 p3122 A69-34830

Buoyant plumes and thermals defined as vertical motions produced under gravity by density or temperature contrast between incompressible source fluid and environment

18 p3122 A69-34917

Laminar separation in incompressible fluid flowing past bluff body at high Reynolds number, investigating shock wave interaction with laminar boundary layers

18 p3122 A69-34918

Statistical dynamics and structure of turbulent shear flows in incompressible fluids of constant density, discussing Reynolds stress at critical layers

18 p3123 A69-34922

Hydrodynamic stability of incompressible fluid boundary layer flow during blowing or suction through

porous surface, determining Reynolds number lower bounds

18 p3124 A69-35381

Similarity solutions describing buoyancy effect on laminar and turbulent wakes of heated body in incompressible fluid vertically ascending flow

19 p3296 A69-35761

Hydrodynamic equations of laminar plane flow of incompressible viscous fluid in rectangular region, calculating velocity field by equivalent network and integration

19 p3297 A69-35853

Boundary conditions of incompressible viscous flow on semiinfinite plate edge defined using difference methods for Navier-Stokes equations

19 p3299 A69-36394

Incompressible fluid flow of given density and kinematic viscosity near trailing edge of flat plate

20 p3458 A69-37098

Axial velocity and static pressure for incompressible fluid flow through straight smooth porous tube [ASME PAPER 69-FE-44]

20 p3517 A69-38000

Statistical description of turbulence of viscous incompressible fluid at large Reynolds numbers, using velocity distribution probability

20 p3517 A69-38007

Incompressible electrically conducting fluid in presence of magnetic field and Coriolis forces, analyzing Rayleigh-Taylor instability by variational principles

20 p3577 A69-38195

Perturbed motion of solid body containing axisymmetric cavities partially filled with ideal incompressible fluid, solving boundary value problems of fluid oscillations

20 p3518 A69-38296

Second circle theorem for two dimensional irrotational flow of incompressible inviscid fluid in z plane

20 p3518 A69-38316

Viscous incompressible nonNewtonian fluids flow with treatment for steady rotational problems and oscillatory motion, considering primary and secondary motions

20 p3519 A69-38319

Momentum and energy equations for fluctuating flow of viscous incompressible conducting fluid past flat plate with time dependent suction under transverse magnetic field

21 p3691 A69-38445

Continuous cavitation model for incompressible fluid one dimensional unsteady motion

21 p3693 A69-38752

Incompressible viscous fluid flow past sphere at low Reynolds number, evaluating stream function and drag on sphere

21 p3694 A69-38771

Optimal control of ideal noncompressible fluid vibrations partially filling rectangular container moving in horizontal direction

21 p3695 A69-38892

Nonlinear incompressible potential flow with unbounded free surfaces, analyzing singularities in finite part of space

21 p3696 A69-39295

Spheres impulsive starting in incompressible viscous fluid, including Reynolds number and investigation time parameters in Navier-Stokes equation

21 p3696 A69-39296

Parallel shear flow equilibrium in inviscid nonheat-conducting incompressible fluid with density varying as function of vertical coordinate

21 p3697 A69-39743

Flow stability regions at surface of flight vehicle, considering boundary layer flow of incompressible fluid

21 p3645 A69-39827

Solid body filled with ideal incompressible liquid, analyzing stability of permanent rotations

21 p3773 A69-39837

Boundary layer development on body accelerating in viscous incompressible fluid, using straight lines approximation and asymptotic expansions

22 p3929 A69-40110

Oscillations of highly viscous incompressible fluid in partially filled cavity of body moving about fixed point, solving Navier-Stokes equations by asymptotic method

22 p3929 A69-40111

Finite element method application to minimum principle for incompressible lubrication problem, noting flow boundary conditions and squeeze film effects

22 p3955 A69-40406

Differential rotation of incompressible inviscid fluid of infinite electrical conductivity in spherical shell, noting toroidal magnetic field for sun

22 p4027 A69-40658

Integral equations of motion for plane steady flow of viscous incompressible electrically conducting fluid around flat plate

22 p3992 A69-41109

Velocity defect profile and skin friction law for incompressible equilibrium turbulent boundary layer using mixing length relation

22 p3934 A69-41180

Mixed boundary value problem for system of Navier-Stokes equations for viscous incompressible fluid in stationary motion in vessel, noting rotating fluid

23 p4183 A69-41974

Sphere set in motion at constant velocity by impulsive force submerged in incompressible fluid in half space

24 p4298 A69-42585

Parallel magnetic field effect on free boundary layer type flows stability of low Reynolds number between parallel streams of viscous incompressible conducting fluid

24 p4298 A69-42596

MHD flow of incompressible viscous fluid between rotating electrical insulator disks

24 p4354 A69-42599

Detachment in incompressible turbulent flows around thick body analyzed to predict base pressure, vortex volume, etc

24 p4299 A69-42674

INCONEL [TRADEMARK]

Microcracking susceptibility studies of Inconel 718 weld heat affected zones, noting hot ductility, weld circle patch and fillerless fusion welding tests

11 p1905 A69-24933

Weld cracking sensitivity of Inconel 713C investigated for determining aluminum content effect on weldability of nickel base heat resistant alloys

11 p1906 A69-25577

Oxygen environment influence on Inconel X-750 surface deformation and cracking during fatigue related to chemisorption and oxidation

20 p3558 A69-36966

Inconel and aluminum tested in pressurized hydrogen at room temperature, using surface flawed fracture toughness specimens and preflawed pressure vessels

21 p3730 A69-38666

Mn, S and rare earth additions influence on Inconel alloy weld microfissuring including material, hot ductility and tensile strength data

22 p3967 A69-39883

Titanium diboride electrodeposition on Inconel from molten salt electrolyte at high temperatures noting electrolyte metabolites and coating thickness range

22 p3970 A69-40735

Alloy Inconel 625 precipitation behavior and effect on short and long term properties, discussing tetragonal phase segregate and creep strength

22 p3971 A69-40802

INDENTATION

Electrode indentation in resistance spot welds related to weld strength for titanium, steel and aluminum alloy

01 p0086 A69-10538

Stress fields in Hertzian contact of parallel cylinders composed of anisotropic materials and transversely isotropic spherical bodies

08 p1414 A69-20524

Indentation of inhomogeneous rigid plastic solid by flat punch under plane strain conditions analyzed by perturbation method

11 p1986 A69-25244

Variational principle for Fredholm integral equations applied to inclusion and indentation problems in elasticity

19 p3440 A69-36589

Steady motion of frictionless indenters along surface of elastic layer in plane strain, using Fourier transform and Fredholm equations for numerical solution

21 p3837 A69-39155

INDEPENDENT VARIABLES

NT LATTICE PARAMETERS

Linear ordinary differential equations with exponential coefficients, giving solutions asymptotic behavior for large values of independent variable

01 p0103 A69-10231

Numerical digital computer determination of ultra subharmonic response for Duffing equation

01 p0104 A69-10235

Nonlinear time dependent parameters systems, analyzing governing differential equations in terms of elliptic functions

01 p0050 A69-10237

Darlington composite transistor hybrid parameters used to describe performance characteristics, noting load resistances and source
01 p0041 A69-10244

Asymptotic behavior of probabilities of large deviations of sums of independent random variables with moments of any order
01 p0104 A69-10264

Spacecraft motion parameters determination under controlled acceleration using information from inertial sensors
01 p0161 A69-10569

Satellite trajectories calculated in form of parameters derived from processing measured functions, considering optimum mathematical description selection
01 p0151 A69-10570

Wideband hybrid junctions synthesis from given parameters, suggesting matrix representation of ring circuits
01 p0043 A69-10593

Independent variables reduction in nonlinear partial differential equations, detailing group theory method
03 p0456 A69-13740

Bergman integral operator to solve second order differential equations with two independent variables
03 p0527 A69-13742

Inclined hot-wire and hot-film anemometers parameter dependent on length-to-diameter ratio used to describe deviations from cosine law
[ASME PAPER 68-WA/APM-16]
04 p0596 A69-14391

Algorithm for numerical solution of variational problems for functions of two independent variables and boundary value problems using local variations method
04 p0622 A69-14616

Finite element method for exact solution of more general problems with one independent variable and extension to many dependent variables
04 p0676 A69-14741

Electric quadrupole parameters, discussing relationship between voltages at terminals
04 p0579 A69-15228

Hybrid assumed mode solution of nonlinear partial differential equations /initial value problems/ in time-like independent variable
04 p0566 A69-15345

Finite differences for identifying partial differential equations and associated boundary conditions of distributed parameter system
[ASME PAPER 68-WA/AUT-1]
05 p0738 A69-16185

Microwave diodes on GaAs base, determining basic parameters and effects on crystal formation and device construction
05 p0730 A69-16222

Thermal management of integrated circuits design, noting dependence on circuit and component configurations and parameter variations
06 p0894 A69-17217

Optimal estimation of sampled stochastic process with finite state unknown parameters
06 p0901 A69-17362

Asymptotic solutions for nonlinear differential equations with gradually varying coefficients of great resistivity
06 p0947 A69-17392

Finite parameteric family of solutions to differential equations systems with deviating argument
06 p0948 A69-17500

Planetary distribution of ionospheric parameters analyzed, using geographic longitude and magnetic inclination as longitudinal and latitudinal coordinates
06 p0921 A69-17745

PCM bit synchronizer/signal conditioners performance characteristics and specification
07 p1106 A69-19120

Seal swell prediction methods extended to include three dimensional solubility parameter concept
[ASLE PAPER 68-LC-21]
07 p1171 A69-19306

Mathematical model of radar display, considering radar construction tube resolution, environment and eye perception parameters
07 p1136 A69-19504

Observability theory of dynamic objects application to composing measurements for space flights, solving parametric observability problem
07 p1087 A69-19605

Spacecraft tracking network for determining spacecraft motion parameters, noting application to coordinates and velocities determination for terrestrial observers
07 p1087 A69-19609

Components production process effect on reliability based on values and functional relations of internal parameters, noting influence on accelerated testing
08 p1319 A69-20346

Mixed initial boundary problem for hyperbolic equations with given boundary outgoing variables, determining incoming data
08 p1342 A69-20347

Control technique to make aircraft insensitive to parameter variations and to achieve desired response to control
08 p1255 A69-20719

Design parameters for optimum heavily loaded single rotation ducted fan characterized by ultimate wake vortex system
[AIAA PAPER 69-222]
08 p1253 A69-21030

Automated parameter search techniques applied to low thrust mission design, stressing trajectories and mission optimization
09 p1585 A69-21211

Two pulsars discovered during search with transit telescope at U.S. National Radio Astronomy Observatory, tabulating pulsar parameters
09 p1592 A69-21484

Efficiency of weather forecasts taking into account quality criteria and integrating index number, discussing optimization principle for new parameter
09 p1534 A69-21510

Power relations to fit radar meteorology parameters including rainfall, reflectivity function and attenuation rate
09 p1536 A69-21643

Diffusion bonding parameters for producing hollow Ti-Al compressor blades, discussing surface preparation, postbound heat treatment quality control and mechanical properties
[ASME PAPER 69-GT-46]
09 p1513 A69-22484

Data interpretation, discussing correlation describing effectiveness of independent variable and table giving values directly from sample size, t, z, F and chi square values
10 p1669 A69-23040

Flight data recorders history and regulations, discussing parameters and design of systems
10 p1691 A69-23247

Optimum control involving plants with intermediate position between lumped and distributed parameters
10 p1666 A69-23363

Geomagnetic micropulsations fluctuations during solar activity cycle showing changes in excitation frequency with change in corpuscular fluxes parameters
10 p1687 A69-23919

Equation derivation to determine optimal parameters of spacecraft orbital elements, considering constraints imposed on measured quantities
10 p1791 A69-24192

Optimization of autonomous system parameters, exemplifying by disturbed motion of gyroscope system
11 p1858 A69-24557

Output pulse parameters of short pulse thyristor generator as function of time constant, considering rise time of switch-on process
11 p1846 A69-24615

Oscillatory properties of solutions to second order nonlinear differential equations with delayed arguments
11 p1908 A69-24767

Approximate method for calculating linear multipoles antennas parameters in terms of power requirement, considering equidistant/non-equidistant element antennas
11 p1849 A69-24969

Damping accuracy sensitivity to circuit element tolerances in polynomial filters
11 p1850 A69-24970

Transfer function parameters identification by fault isolation technique using white noise stimulus and processor matrix of orthogonal filters
11 p1865 A69-25077

Computational method for quasi-optimal control with parameter sensitivity function, noting application to dynamical system model
11 p1859 A69-25165

Error analysis in conversion of two port scattering parameters used in microwave transistor characterization
11 p1852 A69-25200

Classification of second order quasi-linear partial differential equations with two independent variables in structural dynamics with emphasis on elastic structures
11 p1991 A69-25513

Tracking system for gain and time delay parameter measurements of compensatory control crossover model
12 p2022 A69-25930

Multivariable control systems - Conference, Duesseldorf, October 1968, Volume 2
12 p2045 A69-26058

Multivariable control systems - Conference, Duesseldorf, October 1968, Volume 1
12 p2046 A69-26069

Minimal representation in state variables for multivariable control system, discussing algorithms, identification methods and flow graph techniques
12 p2047 A69-26070

Higher root loci of polynomials for multivariable systems with coefficients polynomials of real parameter
12 p2048 A69-26073

Multivariable control system decoupling by appropriate choice of decoupling network structure and location in system
12 p2048 A69-26074

Multivariable automatic control system consisting of similar local subsystems studied by transforming system equations into equivalent diagonal form
12 p2048 A69-26076

Uncontrollable modes effect on transient/steady behavior and limit cycles characteristics of nonlinear multivariable control system
12 p2048 A69-26078

Linear closed loop control systems with periodically varying parameters analyzed by harmonics method using Fourier transforms
12 p2054 A69-26720

Dirichlet problem of linear degenerate second order differential elliptic systems with independent variables
12 p2123 A69-26729

Electrodeless plasmatron coupled with oscillator operating at 5-30 kHz, discussing parameters effect on operation mode and performance
12 p2140 A69-27123

Book on stress rupture parameters including least squares approach to Larson-Miller, Dorn, Manson-Haferd, Graham-Walles, Murry, Brozzo and Chitty-Duval
13 p2360 A69-27372

Analog simulation of nonlinear functions of single independent variable compared digital to analog representation principles
13 p2224 A69-27531

Critical parameters of isothermal quasi-degenerate white dwarfs calculated by energy method, allowing for relativity theory error and neutron irradiation effect
13 p2351 A69-27871

Parameter identification in linear dynamical systems with transport lags, discussing linear differential-difference equations and finite difference theory
13 p2289 A69-27945

Regional boundaries in control-parameter space constructed by computer algorithm, involving parameter vibration direction changes in parameter plane
13 p2225 A69-27967

Substituted lithium ferrites analyzed to obtain materials with small initial magnetic losses at different microwave ranges
13 p2320 A69-28000

Gas ring lasers, discussing optimal parameters, colliding waves interference, nonmutual effect and radiation polarization
13 p2272 A69-28175

Ionization fraction as independent variable in plasma transport correlation, noting role in pressure effect increase
13 p2313 A69-28241

Independent nature of variables in dimensional analysis, discussing temperature in kinetic and dimensional analyses
13 p2289 A69-28362

Wave parameters in coupled parallel surface wave transmission lines and dielectric waveguides, discussing phase velocities and spatial beat period
13 p2223 A69-28570

Varactor diode parameters measurements by microwave power reflection method
13 p2237 A69-28645

Parameters optimization in electronic equipment design, considering parameters and efficiency criteria as additive elements functions of dimensional chain
14 p2418 A69-28835

Root locus method for nonlinear systems analysis, determining existence, stability and parameters of periodic solutions
14 p2445 A69-28919

Searchless gradient self adaptive system for adjusting servosystem parameters to reference model characteristics, using auxiliary operator method
14 p2426 A69-29146

Transistor scatter and admittance differential parameters measurements graphically correlated
14 p2420 A69-29397

Electrokinetic converter of biochemical parameters for diagnosis and control of organism behavior, noting biomechanical utility
14 p2409 A69-29471

Monograph on Dirichlet problem for quasi-linear elliptic differential equations with many independent variables
14 p2471 A69-29599

Boundary layer physical and chemical processes effect on dynamic parameters of high temperature hypersonic gas flow past blunt bodies
14 p2391 A69-29620

Computer program for STV-F9 satellite communication parameters, using ELDO forecasting values as input data
14 p2530 A69-29689

Atmospheric dynamics parameters of Mercury, Venus, Mars and Jupiter, discussing generalized circulation theory
14 p2526 A69-29841

Multivariable linear time-variant systems noninteracting control problem, discussing realization by state variable feedback
15 p2582 A69-30024

Lumped and distributed parameter systems, discussing transfer matrix elements, connecting lines, etc
15 p2582 A69-30319

Three and n body problems solution by reduction of independent variables and maximum principle
15 p2652 A69-30448

Solid state and gas lasers operational parameters tabulation including pulse durations, powers, energy flux densities, electric and magnetic field strengths, etc
15 p2633 A69-30708

Spacecraft motion parameters determination under controlled acceleration using information from inertial sensors
15 p2702 A69-30739

Satellite trajectories calculated in form of parameters derived from processing measured functions, considering optimum mathematical description selection
15 p2691 A69-30740

Asymptotic Krylov-Bogoliubov methods application to solving boundary value problems for hyperbolic quasi-linear equations with distributed parameters and retardation
15 p2653 A69-31192

Statistical calculation of three dimensional frames of thin walled rods, using method of initial parameters in matrix form
15 p2714 A69-31199

Bilinear covariant of linear differential form involving 2n independent variables used for grouping to achieve symplectic and contact transformations
16 p2804 A69-31623

Asymptotic solutions to second order differential equations with slowly varying parameters and large resistance applied to mathematical pendulum damped swinging motion
16 p2804 A69-32253

System noise parameters derivation, using standard IRE definition as foundation and amplifier noise measurement as example for error analysis
16 p2755 A69-32800

He-Ne laser plasma behavior, establishing parameters for electron gas, cross sections of formation and annihilation and excited states lifetimes
17 p2982 A69-33390

Helicopter fire control systems evaluation by computer model for hit probability and impact point sensitivity to various parameters
[AHS PAPER 316]
17 p2933 A69-33540

Isonospheric parameter recording accuracy by vertical sounding, discussing errors in frequency-height curve
17 p2969 A69-34002

Asymptotic series expansion for solutions of differential equations containing parameter
18 p3163 A69-34328

Supported shafts natural vibration frequencies determination by averaging shaft parameters, noting suitability in HF ranges
18 p3147 A69-34546

State space structure of model reference adaptive control and parameter tracking systems subject to noise
18 p3111 A69-34686

Iteration process by difference scheme for numerical solution to Dirichlet problem of two dimensional Poisson equation
18 p3164 A69-34701

Parameter optimization of launch vehicle attitude control system of fixed structure for various computation techniques
18 p3210 A69-35092

Canonical transformations depending on small parameter, utilizing Lie series
19 p3397 A69-35608

Asymptotic behavior of probabilities of large deviations of sums of independent random variables with moments of any order
19 p3360 A69-36199

Digital frequency synthesizer design parameter selection, giving expressions for output frequency and division coefficient variations
19 p3284 A69-36594

State variables with delta functions for electrical network with discontinuously variable components, discussing application to parametron
19 p3287 A69-36763

Mach reflection limiting parameters of conical shock wave in Plexiglas cylinders, showing head wave curvature radius linear relationship to cylinder diameter
19 p3302 A69-36845

Eulerian correlation functions representation of wind variations in analytic form by three parameter function, noting field diagram
20 p3571 A69-37507

Orbital parameters of short-lived low altitude earth satellites assuming no atmospheric drag, no orbital precession and flat earth condition
21 p3798 A69-38626

Law of wall parameters for compressible turbulent boundary layer with air injection through wall determined by analyzing data for hypersonic speeds
21 p3692 A69-38685

Data transmission of variables in deterministic networks
21 p3673 A69-38775

Algebraic equations for determination of controller parameters, noting a priori fixed roots of characteristic equation
21 p3723 A69-38887

Space mission sensitivity to parameters of interest determined by Monte Carlo simulation samples
21 p3804 A69-39036

Unknown parameter experimental estimation based on signal direct observations with solution by stochastic approximations method
21 p3756 A69-39265

Parameter estimation using entropy of error as criterion function compared with mean square error analysis
21 p3757 A69-39664

Optimal explicit method for parameters estimation not restricted to linear Gaussian problem derived in canonical form
[AIAA PAPER 69-947]
22 p3975 A69-40330

Minimax sensitivity criteria used to synthesize filters for estimating state of first order plant subject to dynamic and/or statistical parameters uncertainties
22 p3918 A69-41016

Satellite orientation by determining rotation parameters about centers of mass with respect to certain coordinates
22 p4037 A69-41089

Book on systems stability with random parameters, considering linear and nonlinear control systems, with application to stochastic approximation
23 p4181 A69-41510

System asymptotic motion stability for given parameter values using algorithms with aid of R functions
23 p4191 A69-41704

Correcting deficiencies in parametric expressions for rate distortion function of Gaussian process under weighted square error criterion
24 p4281 A69-42722

Time independent interaction surface bounds to shells shakedown domain obtained for multiparameter loadings
24 p4396 A69-42732

Linear viscoelastic model parameters optimization for designing automobile lap seat belts, assuming abrupt impact stop
[ASME PAPER 69-APMW-25]
24 p4275 A69-43094

Slack variable to transform optimal control problem with scalar inequality constraint on state variables into unconstrained problem of higher dimension
24 p4291 A69-43270

Dynamic models for viscous fluid transmission lines using distributed parameter for accuracy and rational approximate form to avoid computational difficulty
24 p4301 A69-43289

Optimal deterministic inputs derived for estimating dynamic control system parameters from white observation noise
24 p4293 A69-43294

Distributed parameter systems stability as internal and input-output property, describing Liapunov functionals construction
24 p4293 A69-43307

Parameter identification algorithm identifying linear dynamic systems by digital computer used to identify human operator characteristics in closed loop control situation
24 p4276 A69-43320

Parametric influence on strength of brittle materials considering volume, surface, notch, strain rate, modulus variations and material variability effects
24 p4333 A69-43341

Physiological and psychological variables relationship in candidate pilots, noting age and educational level
24 p4268 A69-43406

Optimal control parameters for gyroscopic devices with constrained phase coordinates obtained on analog computer by introducing equivalent phase coordinates system
24 p4317 A69-43708

INDEXES [DOCUMENTATION]

NASA scientific and technical information program for building technical data and literature repository for scientists, engineers and technical managers, describing IAA and STAR
[UN PAPER 68-95317]
06 p1043 A69-17068

INDEXES [RATIOS]

Oxygen index test for precise flammability ratings of plastics on numerical basis, eliminating drawbacks of ignition, end point and nonequilibrium conditions operation
04 p0621 A69-14957

Oxygen index test for precise flammability ratings of plastics on numerical basis, eliminating drawbacks of ignition, end point and nonequilibrium conditions operation
08 p1335 A69-20114

Signal records from S 66 satellite with strong scintillations, noting fluctuation well described by Nakagami m-distribution and possibility of deriving relations between different indices
16 p2777 A69-32104

Scintillation index determination, discussing data reduction methods, standard test records, calibration at stations with modest equipment and simulation on digital computer
16 p2751 A69-32105

Circulation and temperature fields indices used for studying tropospheric-stratospheric interactions during stratospheric warming at constant pressure levels
22 p3977 A69-39929

INDIA

Satellite TV systems for India, alternatives and costs
[UN PAPER 68-95750]
01 p0028 A69-10495

Meteorological instrumentation in India for surface and upper air observation
02 p0248 A69-11817

Global solar radiation flux measurements over India during IQSY
02 p0307 A69-11819

Ozone vertical distribution variations over India observed by Brewer electrochemical ozonesonde, noting effects of dry and monsoon seasons
16 p2786 A69-32627

E region horizontal drift measurements at Ahmedabad from 1956 to 1966, noting solar activity and seasonal influences
17 p2962 A69-33678

Commercial satellite communication ground station at Arvi, India, discussing system design, operation and international standards
19 p3275 A69-36412

Nationwide TV system using synchronous communication satellite proposed for India, discussing antenna, modulation, multiplexed channels and educational aspects
19 p3275 A69-36413

INDIAN OCEAN

Cloud pattern characteristics in intertropical convergence zone above Indian and Pacific oceans from meteorological satellite photographs and cloud formation maps
14 p2473 A69-29728

INDICATING INSTRUMENTS

NT ANEMOMETERS
 NT APPROACH INDICATORS
 NT ATTITUDE INDICATORS
 NT CLOUD HEIGHT INDICATORS
 NT FLOW DIRECTION INDICATORS
 NT GYROCOMPASSES
 NT HOT-WIRE ANEMOMETERS
 NT MICROBALANCES
 NT PLAN POSITION INDICATORS
 NT POSITION INDICATORS
 NT SONIC ANEMOMETERS
 NT SPACECRAFT POSITION INDICATORS
 NT SPEED INDICATORS
 NT STRAIN GAGE BALANCES
 NT TACHOMETERS
 NT WEIGHT INDICATORS
 NT WIND VANES

Meteoroid penetration detector development program for spacecraft construction, discussing design, materials and environmental tests

02 p0338 A69-11749

Jet aircraft engines condition monitoring system for detecting malfunctions without engine disassembly [ASME PAPER 69-GT-66]

09 p1501 A69-22518

Aircraft engine instrument displays evaluated by human factors, noting vertical scale design [SAE PAPER 690328]

11 p1829 A69-24488

Constant velocity moving object influence on indications of vertical gyroscope having electromagnetic compensation with residual imbalance of sensor element

11 p1881 A69-24561

Soviet book on electroluminescent devices covering panels, indicator contrast levels, control, multicolor indicators, image conversion and storage and optoelectrical systems

11 p1850 A69-24976

Leak detection for aerospace hardware, discussing equipment, operations, checkout, etc

15 p2618 A69-30315

Passive temperature indicators for maximum temperatures attained within rocket nozzle ablative materials

15 p2613 A69-31273

INDICATORS

Takeoff indicator design based on solution of equilibrium equation for forces acting on aircraft along drag axis

24 p4253 A69-43085

INDIUM

Contact resistance of In or In-Ga on CdS single crystals

03 p0487 A69-13638

Indium abundances in chondritic and achondritic meteorites and terrestrial rocks determined by radiochemical neutron activation analysis

08 p1404 A69-20917

Light absorption of In and Ga thin films in various gaseous media, noting displacement of irregular absorption band

10 p1747 A69-23792

Indium, Rb and Cs abundances obtained from sunspot spectra by comparison with Zr and Ti lines

13 p2343 A69-27626

N-type In-doped ZnSb with melt under H-gas preparation and properties

18 p3183 A69-35268

INDIUM ALLOYS

Pressure and magnetostriction effects on magnetization curves of type 2 superconducting In-Tl alloy, noting Ginzburg-Landau parameter stress dependence

02 p0294 A69-11776

Contact resistance of In or In-Ga on CdS single crystals

03 p0487 A69-13638

INDIUM ANTIMONIDES

Intrinsic absorption temperature dependence in doped p-InSb, discussing forbidden transitions

01 p0136 A69-10255

Specific heats of Cu, GaAs, GaSb, InAs and InSb measured over low temperature ranges

01 p0140 A69-11252

Impurity concentration in n-type indium antimonide semiconductors at liquid nitrogen temperatures estimated by current-voltage measurements

02 p0294 A69-11631

Negative resistance behavior of InSb diodes at 77 K, extending double injection theory for insulators to extrinsic semiconductors

02 p0294 A69-11722

Numerical estimates for degenerate pinch in InSb, determining pinch parameters

02 p0300 A69-12638

Magnetoconductance of nonequilibrium plasmas in indium antimonides, noting anisotropy effect of electric and magnetic field orientation

03 p0486 A69-13463

InSb semiconductors electron scattering analysis at ionized impurities and optical and acoustical lattice vibrations with various polarizations

03 p0492 A69-14170

Transport phenomena analysis in n-InSb semiconductors during elastic/inelastic current carrier scattering

03 p0492 A69-14171

Temperature dependence of Hall coefficient, conductivity and carrier mobility in manganese doped indium antimonides

04 p0643 A69-15257

Longitudinal and transverse magnetoresistance in n-type InSb single crystals in magnetic fields, noting preparation effect on existence magnetophonon oscillations

04 p0643 A69-15262

Temperature dependence of n-InSb Hall coefficient and resistivity, noting increase in conductivity with degree of compensation associated with electrical breakdown

06 p0978 A69-16990

Quantum oscillations of Maggi-Righi-Leduc /MRL/ effect in n-InSb and n-InAs samples from single crystals at liquid helium temperature

06 p0979 A69-16992

Faraday effect at free carriers in indium antimonides and gallium arsenides, analyzing frequency dependence of rotation angle

06 p0979 A69-16996

Differential thermal EMF at room temperature in p-InSb as function of concentration for different electron and hole scattering mechanisms

06 p0981 A69-17881

Structural and electrical properties of indium antimonide and arsenide films, noting dependence of electron concentration and mobility on thickness

06 p0981 A69-17892

Microwave spectrum of n-InSb avalanche plasmas under magnetic field, considering dynamic current-voltage characteristics, hole wave instabilities and microwave emission processes

07 p1197 A69-18466

Nonisothermal wave propagation in n-type indium antimonide in orthogonal static and magnetic fields, considering instabilities and acoustic and polar optical phonon scattering

07 p1197 A69-18467

Dependence of microwave emission from n-InSb on crystalline orientations, noting anisotropy in case of rotation in perpendicular plane

07 p1198 A69-18647

Temperature dependence of conversion coefficients and sensitivity of n-type InSb detectors in millimeter and submillimeter ranges

07 p1199 A69-18683

Hole concentration at deep energy levels in p-type indium antimonide single crystals containing structural defects

07 p1199 A69-18687

Complex microwave incremental conductivity of InSb at 77 K in steady electric field using displaced Maxwellian distribution function

07 p1200 A69-19447

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method

09 p1554 A69-21469

Electron states at deep levels in InSb by deriving equations for Bloch wave functions of conduction and valence bands

09 p1556 A69-21508

Strongly doped n-type indium antimonide, determining dependence of limiting electron concentration on dopant impurity nature

09 p1558 A69-21869

Intrinsic absorption temperature dependence in doped p-InSb, discussing forbidden transitions

09 p1559 A69-22648

Repeated stepwise annealing process to obtain homogenized InSb-GaSb alloys continuous solid solutions

10 p1745 A69-23331

Surface atomic structure effects on polar faces in InSb semiconductor crystal established from measurements of contact potential difference by dynamic capacitor

10 p1747 A69-23965

Dislocation mobility temperature dependence in n-type indium antimonide, noting role of covalent interatomic bonds

12 p2143 A69-26453

Electron cyclotron resonance measurement in n-type indium antimonide using far IR emission from HCN and water vapor lasers, noting magnetic field strength effects

13 p2270 A69-27200

Frenkel defects in light irradiated p-type InSb single crystals at subthreshold radiation energies

13 p2318 A69-27885

Electrical properties of p-type indium antimonide, noting effects of deep level compensation on ev values

13 p2318 A69-27895

N-type InSb single crystals with high dislocation density, investigating anisotropy of mobility, Hall effect and transverse and longitudinal magnetoresistance

14 p2503 A69-28734

Differential thermal EMF at room temperature in p-InSb as function of concentration for different electron and hole scattering mechanisms

14 p2503 A69-28790

Dislocations effect on carrier mobility and concentration in p-type and n-type InSb crystals

14 p2507 A69-29646

Absorption band edge position in p type indium antimonide thin films after heating, showing forbidden bandwidth function relationship to film thickness

15 p2666 A69-30044

Slow neutrons irradiation compensated high resistivity p-InSb current instability

15 p2666 A69-30058

Cyclotron resonance of minority carriers measured in p-type InSb, giving temperature dependences of absorption derivative and field ratio to line half width

15 p2667 A69-30068

Indium antimonide crystals polarity effect on photoeffect, analyzing quantum yields and energy spectrum

15 p2667 A69-30076

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method

15 p2669 A69-30714

Nonuniform electrical resistivity distribution in InSb single crystals as function of growth direction

15 p2670 A69-31049

Negative resistance section of current-voltage curve for long diodes of p-type indium antimonide, noting magnetic field effects on electrical breakdown

15 p2581 A69-31149

Hole mobilities in InSb due to phonon and ionized impurities scattering on basis of strain potential constants

16 p2824 A69-31575

InSb thin films prepared by flash evaporation, discussing Hall measurements at various temperatures and electron mobility dependence on film thickness

18 p3182 A69-34348

Helicon wave dimensional resonance in n-InSb plasma waveguides at different wavelengths relative to wall thickness

19 p3383 A69-36479

Band structure and optical constants of InSb, InAs and GaSb, calculating linear momentum matrix elements and state density with spin-orbit effects included

19 p3385 A69-36515

Combined resonance transition in n-type InSb by IR radiation, plotting intensity against magnetic field for different carrier concentrations to infer band structure

19 p3385 A69-36520

Electroreflection study of inversion asymmetry and warping induced interband magneto-optical transitions in InSb, employing low temperature electric field modulation technique

19 p3386 A69-36521

Coherent emission from injection electron-hole plasma in indium antimonide without magnetic field, noting roles of crystal thickness and pinch effects

19 p3387 A69-36532

Hot electron behavior in n-type InSb under magnetic fields at 4.2 and 1.7 K, plotting current-voltage and current-Hall voltage characteristics, etc

19 p3388 A69-36544

Semiconductor plasma production effects and pinching and microwave radiation in InSb plasma, discussing impact ionization, two photon absorption and plasma lifetime

19 p3389 A69-36545

InSb instabilities and time dependence of transverse breakdown, performing Hall effect measurements on n-type InSb at 77 K

19 p3389 A69-36546

InSb single crystals impurities incorporation and distribution, concluding electrical properties vary with homogeneity or heterogeneity of dopant microdistribution

19 p3389 A69-36547

Temperature dependence of g-value in spin resonance in partially degenerate region in pure n-type InSb and InAs

19 p3389 A69-36549

Low temperature energy band gap in n-type single semiconductor crystals of In-Sb-Bi alloys analyzed by measuring Hall constant and optical absorption coefficient

19 p3390 A69-36552

Electron effective mass, density and mobility in /000/ and /111/ conduction band minima in Te-doped degenerate GaSb-InSb single crystals

19 p3390 A69-36555

Energy levels of multicharge acceptor centers and level splitting in InSb and GaAs deformed crystals, using multizone approximation

21 p3781 A69-39067

Frenkel defects in light irradiated p-type InSb single crystals at subthreshold radiation energies

21 p3782 A69-39144

Spectral dependence of optical absorption in InSb thin films under conditions of quantum dimensional effect, considering allowance for nonparabolic conduction zone

21 p3783 A69-39560

Negative surface potential effect on noise and photoconductivity in Ge doped p-type InSb single crystals at low temperature in vacuum

24 p4362 A69-43738

INDIUM ARSENIDES

Vacuum deposited n-type InAs films magnetoresistance coefficient dependences on length-to-width ratio, homogeneity moving carriers size and magnetic inductance

01 p0136 A69-10254

Solid solutions microstructure and electrical conductivity in InAs-CdS and InAs-CdS and InAs-CdSe systems

02 p0297 A69-11882

Dislocations effect on decomposition rates of solid solutions of InAs and Au, Ag or Cu

03 p0484 A69-13283

Temperature dependence of partial pressure of saturated As vapor over solid solutions of InAs-GaAs of different composition

04 p0642 A69-14938

Low temperature spectral distribution of impurity induced photoconductivity in p-type InSb crystals prepared by zone refining

04 p0644 A69-15270

Quantum oscillations of Maggi-Righi-Leduc (MRL) effect in n-InSb and n-InAs samples from single crystals at liquid helium temperature

06 p0979 A69-16992

Single crystal InAs wafers reflection spectra from specular surfaces, obtaining direct interzone transition values and fine structure

06 p0979 A69-16995

Charge carrier lifetime measured in intrinsic conductivity range of Cd doped InAs to define recombination mechanism, relating temperature dependence to surface impurities recombination

06 p0979 A69-16997

Cadmium ionization energy in InAs using heat treatment in hydrogen to eliminate anomalies

06 p0979 A69-16998

Structural and electrical properties of indium antimonide and arsenide films, noting dependence of electron concentration and mobility on thickness

06 p0981 A69-17892

InAs solid solutions reflection spectra with CdTe, CdS, CdSe and ZnTe compounds, determining conduction bands

07 p1198 A69-18511

Self modulated radiation modes of Te-doped n-type InAs injection lasers

07 p1148 A69-18685

Electrical resistance and Hall coefficient measurement in InAs-GaAs solid solutions system, giving temperature dependence of electron mobility

07 p1199 A69-18689

N type surface layer in p type sample noting effect on Hall constant and relationship to temperature

09 p1555 A69-21472

Vacuum deposited n-type InAs films magnetoresistance coefficient dependences on length-to-width ratio, homogeneity, moving carriers size and magnetic inductance

09 p1559 A69-22647

InAs thin film sensors using Hall effect to measure magnetic fields at cryogenic temperatures

10 p1696 A69-23717

InAs-InP solid solutions diffusion rate and lattice constant for various compositions

12 p2144 A69-26587

Indium arsenide electrical parameters analyzed by kinetic effects, considering conductivity, thermal and magnetothermal EMF and transverse Nerst-Ettingshausen effect

15 p2666 A69-30066

N type surface layer in p type sample noting effect on Hall constant and relationship to temperature

15 p2669 A69-30717

Solid solutions microstructure and electrical conductivity in InAs-CdS, InAs-CdS and InAs-CdSe systems

18 p3182 A69-35042

Band structure and optical constants of InSb, InAs and GaSb, calculating linear momentum matrix elements and state density with spin-orbit effects included

19 p3385 A69-36515

Indium arsenide injection laser observed for self modulation at LF modes, discussing nonMarkovian character of photon density relaxation

19 p3338 A69-36537

Anomalous phenomenon in resistance and magnetoresistance of cleaved InAs surface, plotting temperature and magnetic field variation effects, proposing explanation of anomaly

19 p3388 A69-36543

Temperature dependence of g-value in spin resonance in partially degenerate region in pure n-type InSb and InAs

19 p3389 A69-36549

INDIUM COMPOUNDS

Nonlinear voltage dependence on current in p-type indium selenide single crystals, detecting negative resistance under pulsed electric field

22 p3992 A69-40602

INDIUM PHOSPHIDES

Indium phosphide p-n junction current-voltage characteristics various temperatures, considering degree of doping effect

01 p0139 A69-10885

Electrical properties of p-n junctions of diffused Cd or Zn in indium phosphide

02 p0294 A69-11628

Thermal EMF in indium phosphide crystals as function of temperature, electron concentration and magnetic field strength, determining effective mass of electrons

03 p0489 A69-13889

Radiative recombination in p-n junctions in InP at various temperatures

03 p0492 A69-14166

Hydrostatic pressure effect on recombination emission in indium phosphide p-n junctions

04 p0639 A69-14428

Hall effect and magnetoresistance for compensated n-InP samples, discussing dependence on magnetic field

06 p0978 A69-16987

Magnetic susceptibility of InP-GaAs solid solutions at various temperatures and for varying GaP content

07 p1200 A69-19013

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects

09 p1555 A69-21470

Thermal EMF in indium phosphide crystals as function of temperature, electron concentration and magnetic field strength, determining effective mass of electrons

11 p1939 A69-25690

Vapor phase epitaxial production of indium arsenic phosphide crystalline layers, discussing electron mobilities, electrical resistivities and doping

12 p2142 A69-25934

InAs-InP solid solutions diffusion rate and lattice constant for various compositions

12 p2144 A69-26587

Indium phosphide p-n junction current-voltage characteristics at various temperatures, considering degree of doping effect

12 p2144 A69-26649

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects

15 p2669 A69-30715

Energy band gap variation as function of composition in In-Ga-P semiconductor crystals

19 p3390 A69-36553

Electric fields reducing recombination radiation intensity from bulk ionized GaAs and InP and shifting spectrum to lower energies, discussing self absorption

23 p4198 A69-41499

INDIUM SULFIDES

Field distribution and potential drop in semiconductor field emitter, noting nonlinear effects in indium trisulfide, electron mobility and multiplication factor

05 p0806 A69-15630

INDIUM TELLURIDES

InTe phase recrystallization in thin films composed of two InTe phase mixtures, showing random concentrations and distribution of centers growing as spherulites

24 p4361 A69-42993

InTe phase formation in thin film composed of two InTe phases, showing dependence on annealing in high vacuum and substrate temperature

24 p4361 A69-42994

Component proportion and diffraction spectrum of macroblock thin films of indium telluride phase of In-Te system, using X ray and microanalysis

24 p4361 A69-42995

INDOLES

NT TRYPTOPHAN

Mass spectra peaks of N-Acyl-2-indolinols fragmentation processes upon electron impact, noting compounds predominance in open chain tautomer gas phase

15 p2561 A69-30407

INDUCED FLUID FLOW

U FLUID FLOW

INDUCERS

U INTAKE SYSTEMS

INDUCTANCE

Inductive converters accuracy calculation by statistical method based on probability theory

13 p2259 A69-27424

Kinetic inductance measurements in linear circular and rectangular cylindrical superconductors, giving inductance temperature dependence for wires and both thick and thin films

17 p3016 A69-33783

INDUCTION

Perturbation method determination of gravitational induction for quasi-static axisymmetric systems

04 p0661 A69-15190

INDUCTION HEATING

Induction plasma device of continuous operation to simulate NASA designed gas core space propulsion reactor [AIAA PAPER 68-712]

22 p3979 A69-40548

INDUCTION SYSTEMS

U INTAKE SYSTEMS

INDUCTORS

Electromagnetic forming principles and applications describing large capacitor bank facility design for multipurpose research [ASTME PAPER MR68-418]

02 p0252 A69-11798

Maxwell equations solution for linear induction MHD machine coil area field components, allowing for finiteness of magnetic permeability of iron

07 p1059 A69-19028

Composite transistor simulation of circuit inductor effect for synthesizing frequency selective circuits

08 p1286 A69-20834

Io as unipolar inductor, analyzing interaction with Jupiter magnetosphere and decimetric synchrotron radiation

13 p2337 A69-27552

E shaped cores for miniaturized transformers and inductors from high permeability plastic bonded materials

13 p2237 A69-28586

Field equations for plane-parallel induction MHD machines with allowance for winding zone thickness and magnetic permeability of iron

14 p2405 A69-29914

Tubes faults monitoring in three phase Graetz converter bridges by measuring voltage across DC smoothing inductor

15 p2575 A69-30180

Coil under alternating current interacting with laminated conducting structure, giving recurrence formula for calculating deflector voltage

24 p4296 A69-42653

INDUSTRIAL PLANTS

Ammonium perchlorate grinding and blending facility, discussing process flow, machinery, etc [AIAA PAPER 69-516]

16 p2767 A69-32664

Monograph on laser communication system in IR for industrial environments

22 p3900 A69-40617

INDUSTRIAL SAFETY

Treatment procedure and preventive programs outlined for acute exposure to toxic rocket fuels or oxidizers

02 p0204 A69-12498

Industrial and workman safety concept evolution, discussing role in product design engineering [SAE PAPER 680676] 03 p0433 A69-13449

Explosive welding principles, applications, materials limitations and advantages, stressing safeness and low cost 18 p3151 A69-35479

INDUSTRIES

NT AEROSPACE INDUSTRY

NT AIRCRAFT INDUSTRY

NT DEFENSE INDUSTRY

Industrial loyalty and trade secrets, discussing preservation of forms of intellectual property posed by mobile employee and management policies 01 p0180 A69-10991

Estimate accuracy and project selection models in industrial research, examining company data for miscellaneous, technical and commercial failure 05 p0849 A69-15981

Data transmission techniques for aerospace and industrial applications, discussing radio link 08 p1271 A69-19906

Value engineering application to engineer recruiting phase of industrial relations 13 p2382 A69-28093

Value engineering proposal costs sustained by maintenance and overhaul industry in government contract negotiations, discussing reimbursement and proposed central agency 13 p2383 A69-28099

Value engineering ultimate objectives in industry, discussing engineering and procurement role in prorating goal to applicable departments 13 p2383 A69-28101

Behavioral differences between engineers and scientists with reference to work environment 15 p2721 A69-31073

Planning for safety of future supersonic air traffic including financing and coordination activity of government and industry 22 p4054 A69-41131

INELASTIC BODIES

U RIGID STRUCTURES

INELASTIC COLLISIONS

Elastic and inelastic collisions between deformable bodies, using Michelson interferometer with He-Ne laser as source 02 p0282 A69-12607

Inelastic collisions effect on electron energy distribution in low temperature diffusion dominated discharges 04 p0637 A69-15047

Free electron kinetic equation including inelastic electron-atom collisions derived for nonequilibrium low temperature plasma, showing interrelated electronic and atomic energy distribution 05 p0802 A69-15889

Physics of plasmas, Volume 2, Weakly ionized gas, covering inelastic collision, free electron scattering, intermediary plasmas, etc 06 p0963 A69-17165

Rotational inelastic transitions in atom-diatom collisions, discussing restricted distorted-wave approximation, transition probabilities, impact parameters, inelastic and glory quenching, etc 07 p1185 A69-19302

Cross sections for inelastic interactions of electrons with atoms and heavy impurity ions and processes of atomic excitation 07 p1195 A69-19652

Kinetic equations for polyatomic gases obtained by extending 13 moment approximation to solve inelastic Boltzmann equation, resulting in 17 moment approximation 08 p1357 A69-20784

Inelastic transport cross sections for Lyman alpha transitions in hydrogen 08 p1357 A69-20814

Rotational excitation and scattering cross sections for rigid diatomic molecules reduced to yield distorted wave approximation, resulting in inelastic transition probabilities 10 p1726 A69-23524

Inelastic interactions cross sections of slow electrons with adsorbed particles on W surface as function of temperature in surface bond vibrational region 12 p2132 A69-26114

Energy loss during inelastic collisions between electrons and ionospheric particles, determining ionospheric heating by UV radiation 13 p2252 A69-27614

Elastic and inelastic elementary particle collisions described by Feinman diagrams, discussing computer results for high energy particle interactions 13 p2303 A69-28369

High energy particle collisions, calculating inelastic interactions between cosmic nuclei 13 p2330 A69-28370

High energy inelastic particle collisions observed at high altitude station, using Monte Carlo computations for nucleon-nucleon collision model 13 p2330 A69-28374

Inelastic interaction cross sections of nuclear active particles at C and Fe in 70 to 1000 gev energy range 13 p2330 A69-28383

Soviet book on nuclear interactions in spacecraft shielding covering proton-Al nuclei inelastic interactions, secondary radiation, solar radiation effects, radiation belts, etc 14 p2481 A69-29817

Integrodifferential equation derived and solved for evolution of collisional model of asteroids and debris 14 p2526 A69-29879

Ionosphere D region low field conductivity in presence of high field disturbing signal, assuming inelastic electron-neutral particle collisions 16 p2850 A69-32190

Frequencies of charged secondaries numbers emitted from nucleon-nucleon and pion-nucleon inelastic collisions, observing multiplicity regularity 18 p3177 A69-35009

Hydrogen molecular ion dissociation due to ion-molecule inelastic collisions, comparing measured and calculated velocity distributions of protons produced 19 p3375 A69-35985

Inelastic collisions and radiation effects on transport properties and shock structure in high temperature gases, obtaining density and temperature profiles 19 p3448 A69-36149

Transverse momentum of fireball particles emitted in high energy inelastic collision related to emission angle and energy in accelerators 19 p3396 A69-36644

Inelastic collision cross sections for low energy interactions among electrons, ions, atoms and molecules determined as function of temperature, using approximate methods 23 p4194 A69-41520

Low energy electrons energy loss by inelastic collisions in moving through atmosphere, estimating cross sections and loss rates 24 p4351 A69-42763

INELASTIC SCATTERING

Angular correlation of inelastically scattered alpha particles and gamma rays emitted from 2-plus state of Sn 120 03 p0469 A69-13098

Angular correlation between inelastically scattered 42 Mev alpha particles and emitted gammas from 2-plus Ni 58 03 p0470 A69-13100

Transport phenomena analysis in n-InSb semiconductors during elastic/inelastic current carrier scattering 03 p0492 A69-14171

Cross section calculations for elastic and inelastic electron collisions with atoms, ions and molecules and ionization of atomic systems by electrons and photons 07 p1187 A69-19660

Quantum theory of line broadening and shift, relating adiabatic and diabatic collisions to elastic and inelastic scattering of perturbers 08 p1363 A69-20464

Optical potentials for rotational and vibrational transitions in inelastic molecular collisions, considering adiabatic and sudden approximations 08 p1358 A69-21008

Channel coupling effects in elastic electron-atom collisions involving electric dipole transitions, noting phase shifts and differential cross section 09 p1542 A69-21623

Inelastic interactions between Tev cosmic particles and light element nuclei, describing design and operation of measuring apparatus and derivable data 12 p2093 A69-26583

Inelastic interaction cross sections of nuclear active cosmic ray particles with atomic Fe and Pb in 100 to 1000 gev range 13 p2330 A69-28384

Inelastic scattering cross sections calculated, comparing results for various nuclear states expressed as Wood-Saxon radial and harmonic oscillator functions 14 p2504 A69-29006

Core polarization effects in inelastic scattering cross sections for several nuclei in 2s-1d shell, using Hartree-Fock wave functions and Born approximation 14 p2487 A69-29007

Inelastic proton scattering cross sections for target nuclei in 2s-1d shell calculated in distorted wave Born

approximation with projected Hartree-Fock wave functions 22 p3988 A69-41045

INELASTICITY

U ELASTIC PROPERTIES

INEQUALITIES

Rearrangement inequalities for positivity of nonquadratic transformations, discussing stability of nonlinear feedback loop described by difference equations 06 p0904 A69-17943

Control sets corresponding to desired stability behavior of controlled motion, giving theorem concerning differential inequality 11 p1910 A69-25412

Upper bounds for Bernstein-Kolmogoroff multidimensional inequalities, analyzing independent random vectors 11 p1910 A69-25698

Inequality theorems for multidimensional functional Volterra equations formulated and proved, deriving upper and lower solutions 13 p2290 A69-28684

Inequalities for coefficients of univalent functions 22 p3975 A69-40453

INERT ATMOSPHERE

Antifriction characteristics of hard lubricating coatings based on molybdenum disulfide and graphite in inert gas atmosphere and vacuum, determining thermal stability temperature ranges 13 p2269 A69-28053

Powder metallurgy all inert processing method for producing nickel base superalloys forgings, discussing microstructure, reproducibility, mechanical properties, etc [ASM PAPER GG-8-3-3] 21 p3745 A69-38929

INERT GASES

U RARE GASES

INERTIA

NT MACH INERTIA PRINCIPLE

Inertia effect of flow between eccentric cylinders with rotating outer cylinder, calculating pressure and shearing distribution and force on inner cylinder 01 p0059 A69-10307

Fatigue life, kinematics, dynamics, etc, of thrust loaded ball bearings, considering inertial effects of hollow balls 01 p0087 A69-10908

Axisymmetric form of stability loss of cylindrical shell under effect of axial load suddenly applied along generatrix, considering inertia forces and obtaining differential equations 06 p1021 A69-17181

Longitudinal and transverse vibrations of viscoelastic rods excited by inertia with aid of linear oscillator subjected to harmonic stress, using Kelvin-Voigt model 07 p1233 A69-19326

Inertia of electrically charged spherical body calculated on basis of relativistic stress energy 08 p1352 A69-20756

Inertia effect on incompressible fluid film pressure between two oscillating parallel plates, considering Reynolds number 12 p2102 A69-26241

Complex structures lumped weight and inertia parameters automatic computation based on finite weight element method, using SCOWL computer program 14 p2533 A69-29025

Inertial and gravitational mass equality reexamined, considering Galileo, Newton and Eotvos experiments 14 p2486 A69-29647

Oscillations and stability of cylindrical shell in gas flow taking into account inertia forces 16 p2875 A69-32287

Inertial characteristics determination error influence of solid body on damping system parameters 18 p3171 A69-34562

Spacecraft spherical motion about mass center under inertial force using Euler differential equations 21 p3830 A69-39838

Earth rotation rate variations connected to longitude variations of continentals time services, noting atmospheric circulation and inertial forces role 22 p4024 A69-40609

Inertial motions, equipotential surfaces and Coriolis forces on earth ellipsoid, discussing pendulum-like oscillations 24 p4346 A69-43156

INERTIA MOMENTS

U MOMENTS OF INERTIA

INERTIA PRINCIPLE

NT MACH INERTIA PRINCIPLE

- Secularly stable figures of equilibrium of rotating heterogeneous fluids of planetary size, noting dependence on laws of inertia and gravitation
03 p0513 A69-13780
- Inertial servomechanisms actuators, discussing dynamic characteristics, power, vibration damping, matching, couplers, etc
11 p1826 A69-25119
- INERTIA WHEELS**
U REACTION WHEELS
- INERTIAL ACCELEROMETERS**
U ACCELEROMETERS
- INERTIAL COORDINATES**
Inertial navigation systems trajectory parameters errors due to inaccurate initial coordinates input, deriving trigonometric functions for autonomous error determination
21 p3760 A69-38572
- Absolute atmospheric kinetic energy, comparing equations deduced from Euler equations with equations deduced from equations of motion for inertial system
24 p4345 A69-43151
- INERTIAL FORCES**
U INERTIA
- INERTIAL GUIDANCE**
NT STRAPDOWN INERTIAL GUIDANCE
Soviet book on inertial control of ballistic rockets covering rocket flight deviations measured by onboard sensors and computer
01 p0113 A69-10994
- Low visibility instrument landing of aircraft using ILAS and inertial guidance
01 p0114 A69-11012
- Inertial guidance system for ELDO launch vehicles
07 p1176 A69-18491
- Inertial guidance system synthesis for infantry missile with 1 n mile range against small hardened targets requiring 3 ft maximum miss distance
12 p2129 A69-26791
- Magnetic suspension device replacing mechanical bearings of inertial guidance systems gyro rotors, evaluating device strength and stability
14 p2479 A69-29492
- Europa 1 first stage attitude control system adaptation to Europa 2 requirements, discussing design modifications and improvements and inertial guidance system introduction
16 p2866 A69-31726
- Microminiature Elliott MCS 920 M digital computer for inertial guidance of CECLES-ELDO launcher, discussing construction, code, interrupt, guidance system and functions
20 p3501 A69-37391
- Spring restrained, momentum-wheel inertial orientation and stabilization system for exoatmospheric vehicles, noting mission constraints and hardware parameter variations allowances
21 p3819 A69-39214
- Reliability assessment of ballistic missile inertial guidance system, discussing objectives and requisites
22 p3953 A69-40028
- Programming and checkout of computer for Edo inertial guidance system, including flight simulation and autopilot tests
[AIAA PAPER 69-961] 22 p3978 A69-40342
- INERTIAL NAVIGATION**
NT GIMBALLESS INERTIAL NAVIGATION
Stabilized platform vibration in inertial navigation system with integral correction
01 p0112 A69-10086
- Schuler gyroscopic pendulum, noting magnitude requirement for gravitational field used in inertial navigation
02 p0248 A69-11593
- Soviet book on kinematics of inertial navigation systems covering systems classification, equations derivation and computer algorithms for error analyses
02 p0278 A69-11793
- Navigation system for American SST noting use of Doppler radar and inertial navigation
02 p0278 A69-12238
- Inertial navigation for commercial aircraft, discussing Sagem-Ferranti and Litton systems
02 p0278 A69-12239
- Error reduction in initial azimuth alignment and azimuth and level axis gyro drifts in long range air transport gyro accelerometer inertial systems
02 p0278 A69-12361
- Laser gyro in future inertial navigation systems for Category 1 landing without position updating
03 p0463 A69-13210

- Mathematical modeling of gyro drift rate in inertial navigation based on stationary and nonstationary time series analysis
03 p0463 A69-13213
- Equations for instability of stabilized platform of inertial navigation system with viscous friction in accelerometers
06 p0954 A69-16824
- SGN-10 inertial navigation system evaluation by Pan American World Airways
06 p0955 A69-17663
- Doppler radar inertial navigation, discussing developments in sensors and digital computers
06 p0956 A69-17859
- Maximum likelihood smoother using measurements containing correlated noise for application to continuous linear dynamic systems such as inertial navigation
06 p0956 A69-17938
- Hybrid OMEGA inertial system for following vehicle maneuver without lag developed by combining Schuler tuned inertial data and radio position data
07 p1177 A69-19209
- Aircraft position and velocity in directions normal to ILS reference path by correlation with inertial navigation system, noting minimal time controller
07 p1177 A69-19213
- Integrated inertial aircraft navigation with velocity and position aids, discussing in-flight calibration capabilities, performance under quick-reaction constraints and digital simulation results
08 p1349 A69-21196
- Optimum inertial/Doppler satellite navigation system, discussing position fixes application in resetting
08 p1349 A69-21199
- VOR/DME ground facilities accuracy improvement by complementing navigation computation with signals from inertial navigation system
[SAE PAPER 690338] 11 p1914 A69-24499
- Inertial navigation systems error analysis based on method of state variables
11 p1914 A69-25434
- Inertial navigation platform principles including acceleration and position of vehicle, single axis platforms and stabilized element coordination
12 p2078 A69-25872
- Pure inertial navigation system support by supplying additional or redundant navigational information, considering space flight applications and earth related problems
12 p2128 A69-25873
- Inertial navigation system sensors including one and two axis, laser, vibratory, gyroflex and free rotor gyros
12 p2078 A69-25874
- Deterministic linear observation systems and Kalman optimum linear filters application to performance improvement of inertial navigation systems
12 p2128 A69-26065
- Concorde SST equipment and systems noting microelectronics, automatic control, inertial navigation, head-up displays, linear instruments and hydraulic systems
12 p2091 A69-26360
- Litton LTN-51E inertial navigation system accuracy and reliability evaluated on basis of transpacific flights
[SAE PAPER 680299] 13 p2296 A69-28103
- Optimal linear space navigation policies including integrated nongravitational acceleration output from inertial measuring unit
14 p2479 A69-29487
- Ground testing method to evaluate inertial navigation systems dynamic errors by programmed platform drift rates, position output comparisons and error source identification
14 p2479 A69-29490
- Optimal navigation system for supersonic Concorde aircraft, discussing in-flight and terminal navigation methods
14 p2480 A69-29859
- Doppler and inertial self contained systems for long range navigation, considering air traffic control separation standards
15 p2651 A69-31544
- Inertial navigation system theory that uses increased numbers of newtonometers/force measuring devices/in place of gyroscopic sensitive elements
16 p2791 A69-32283
- Gyrocompassing precision problems related to gyro drift, input axis deviation and base motion compensation, describing inertial navigation platform alignment to true north
17 p2977 A69-34081
- Doppler inertial system with remote attitude capability, detailing sensor operation by airborne computers
17 p3002 A69-34097

- Observer theory application to hybrid inertial navigation systems, discussing error estimation and correction, real time mechanization, eigenvalues, etc
17 p3003 A69-34099
- Vibrations damping coefficient for asymptotic stability of inertial navigation system platform, determining stabilization errors
18 p3134 A69-34555
- Gyroscopic apparent rate meters generating steering moments in inertial navigation systems for determining moving object position and course
18 p3134 A69-34556
- Inertial aircraft navigation, describing instrument and error analyses with regard to simulation, error propagation and total system error
18 p3169 A69-34850
- Boeing 747 design and development, discussing aircraft characteristics, performance, inertial navigation system, production costs, etc
[SAWE PAPER 746] 18 p3091 A69-34907
- Kalman recursive filtering method applied to inertial navigation systems resetting
19 p3286 A69-36645
- Inertial navigation systems technology, discussing man machine dialog, alignment, etc
19 p3371 A69-36703
- Cost and maintenance calculations for inertial navigation system [INS/ based on three systems per aircraft, assuming 4000 hr/year aircraft utilization
19 p3371 A69-36734
- Inertial navigation systems trajectory parameters errors due to inaccurate initial coordinates input, deriving trigonometric functions for autonomous error determination
21 p3760 A69-38572
- Strapdown redundant experimental sensor inertial navigation package containing gyros and accelerometers, discussing signal real time processing by digital computer
[AIAA PAPER 69-851] 21 p3762 A69-39379
- Passively isolated and actively stabilized platform for inertial navigation components and systems tests
[AIAA PAPER 69-863] 21 p3690 A69-39423
- Guidance and navigation flight tests, demonstrating system performance improvements by onboard inertial system communicating with external navigation aid
[AIAA PAPER 69-842] 21 p3765 A69-39429
- Cumulative error in flight vehicle position determination by inertial navigation system, showing dependence on constant acceleration components
22 p3978 A69-40252
- Three channel inertial ship or aircraft navigator for determining gravity vector, using earth gravity field model
23 p4162 A69-41320
- Airline area navigation test programs involving use of VOR/DME signals and inertial navigation system within air traffic control system
23 p4185 A69-41662
- V/STOL aircraft radar inertial navigation system, describing approach and landing phase flight test results
[AAS PAPER 69-401] 24 p4252 A69-42831
- Geodetic and geophysical random uncertainties as fundamental limitations on terrestrial inertial navigation accuracy
[AIAA PAPER 68-847] 24 p4348 A69-43240
- INERTIAL PLATFORMS**
Soviet book on kinematics of inertial navigation systems covering systems classification, equations derivation and computer algorithms for error analyses
02 p0278 A69-11793
- Platform system of ELDO launch vehicle and necessary test and alignment equipment, discussing inertial platform system for future space projects
04 p0629 A69-14809
- Multiframe platform stabilization, analyzing dynamic coupling due to possible avoidance of adjusting moment and effect of coupling on attitude control
04 p0629 A69-14830
- Inertial navigation platform principles including acceleration and position of vehicle, single axis platforms and stabilized element coordination
12 p2078 A69-25872
- Fourth angle driving law for different four gimbal systems used for simulation display and inertial platform isolation
12 p2055 A69-26265
- Optimal linear space navigation policies including integrated nongravitational acceleration output from inertial measuring unit
14 p2479 A69-29487

Low cost inertial measurement unit /IMU/ for commercial and private aircraft, evaluating components and system [SAE PAPER 690337] 15 p2606 A69-30092

Gyrocompassing precision problems related to gyro drift, input axis deviation and base motion compensation, describing inertial navigation platform alignment to true north 17 p2977 A69-34081

Vibrations damping coefficient for asymptotic stability of inertial navigation system platform, determining stabilization errors 18 p3134 A69-34555

Mathematical basis for inertial vertical gyro development, considering Schuler conditions fulfillment with integral position correction 19 p3311 A69-36193

Miniature floated ball gimballess inertial platform construction, functions, readout, digital computer coupling, etc [AIAA PAPER 69-835] 21 p3761 A69-39366

Strapdown gimballess inertial measurement unit with general purpose computer, describing hardware, software and test results [AIAA PAPER 69-850] 21 p3765 A69-39426

INERTIAL REFERENCE SYSTEMS

Nonorthogonal multisensor strapdown inertial reference unit providing redundant capabilities and optimal performance 03 p0429 A69-13211

Optimizer for shaping control signal of hunting type system with plant in form of nonlinear inertialess element, examining inadequacy for system operation 07 p1115 A69-19757

Analytic platform or strapdown systems application, discussing closed and open loop leveling techniques 08 p1347 A69-19862

Rocket vehicle inertial attitude reference system, discussing flight control 09 p1609 A69-21618

Rigid space concept in gravitation theory, discussing reference systems with nonrigid and rigid background 14 p2484 A69-28863

Inertial systems in homogeneous isotropic expanding universe model, giving expression for line element accounting for Hubble effect 15 p2654 A69-31495

Time and fuel optimization of angular momentum alignment and nutation elimination of spin stabilized bodies with inertial reference direction 18 p3208 A69-34775

Attitude and heading reference devices for aircraft navigation, describing instruments, gyroscopes and gravity sensors 18 p3169 A69-34853

Strapdown inertial reference unit system for inflight reliability and maintainability, discussing design and components 19 p3370 A69-35803

Gyroscopic platforms automatic stability relative to inertial reference system, considering functional equations and error computation 21 p3760 A69-38734

Precision azimuth reference accuracy standards with confidence limits for gyrocompass evaluation, emphasizing astro and transfer angle repeatability [AIAA PAPER 69-859] 21 p3725 A69-39387

Motion analysis of symmetrical physical pendulum having mobile fulcrum for geocentric vertical indicator possibility 21 p3727 A69-39830

INERTIALESS STEERABLE ANTENNAS

Multiple beam electronically steerable retrodirective antenna array with automatic inertialess compensation for altitude or beacon location 02 p0212 A69-12816

Phased arrays applied to inertialess electronic steering of satellite antennas, discussing digitally steered, retrodirective and hybrid matrix arrays 17 p2942 A69-34083

Semiconductor phase shifting for inertialess antenna scanning at microwave to millimeter wavelengths, describing diode construction with emphasis on solving insertion loss [ONERA-TP-712] 23 p4143 A69-42519

INFARCTION

Experimental myocardial infarction in dogs, examining lysosomal enzymes activity changes in soluble and particle-bound fraction 24 p4259 A69-42636

Fibrosis histological patterns of left ventricular papillary muscles from comparison of hearts with myocardial infarction, noting acute and healed mural lesions 24 p4261 A69-42724

Supraventricular arrhythmias after acute myocardial infarction, noting benefit of early DC shock 24 p4262 A69-42729

INFECTIOUS

U INFECTIOUS DISEASES

INFECTIOUS DISEASES

NT INFLUENZA

Infectious diseases in space flight, considering environment role in infection transmission, occurrence and severity 20 p3479 A69-37973

Space cabin environment simulation effects on resistance to infection caused by pneumonia and influenza virus in rats 23 p4108 A69-41832

White mice survival rates and blood morphology and sedimentation rates in low ambient pressure confinement following infectious bacteria injection 24 p4267 A69-43397

INFINITY

Unlimited extrapolation into infinity to determine ranges of applicability of theories in relativistic cosmology noting paradoxes 14 p2516 A69-28867

INFLATABLE SPACECRAFT

U BEACON SATELLITES

U EXPLORER 22 SATELLITE

INFLATABLE STRUCTURES

NT BALLOONS

NT BEACON SATELLITES

NT EXPLORER 22 SATELLITE

NT HIGH ALTITUDE BALLOONS

NT METEOROLOGICAL BALLOONS

NT TETHERED BALLOONS

Inflatable solar shields for thermal protection of space vehicles utilizing cryogen propellants 06 p1017 A69-17609

Structural and aerodynamic developments in attached inflatable decelerators for deployment of payload at supersonic speeds [AIAA PAPER 68-929] 21 p3647 A69-39015

Recovery system for high altitude sounding rocket payloads, noting air inflated flotation device, payload separation and parachute deployment [AIAA PAPER 68-959] 21 p3820 A69-39227

Inflation effect on circular cylindrical cantilever beam subsequent response to bending loads, using theory of small deformations superimposed on large deformations 23 p4227 A69-41881

Large deflections of circular air mat plates consisting of inflatable structures of two membranes connected by inextensible cords network 24 p4405 A69-43688

INFLATING

Automatic inflators for life jackets and survival gear in emergencies activated after submersion in water 06 p0877 A69-16955

Canopy filling time for parachutes under infinite mass conditions, using continuity equation and parachute inflation concept [AIAA PAPER 68-12] 17 p2902 A69-34032

Initial phase of parachute inflation in incompressible flow [AIAA PAPER 68-927] 20 p3461 A69-37165

INFLUENCE COEFFICIENT

NT STRUCTURAL INFLUENCE COEFFICIENTS

Longitudinal stability derivatives prediction for rigid and elastic airplanes, using influence coefficient method [AIAA PAPER 69-131] 06 p0868 A69-18134

Influence function for vertical wind profile from pressure gradient field 09 p1536 A69-21867

Influence coefficients for compressible flow processes involving area, friction and total temperature changes 12 p2063 A69-26799

INFLUENZA

Resistance to bacterial pneumonia and influenza infection in space cabin environment tested on mice in simulation chamber 07 p1067 A69-19432

Specific antibody formation to influenza A virus vaccine /strain PR sub s/ in hibernating ground squirrels /Citellus tridecemlineatus/ 08 p1263 A69-20173

INFORMATION

U MATHEMATICAL TABLES

U TABLES [DATA]

INFORMATION PROCESSING

U DATA PROCESSING

INFORMATION RETRIEVAL

Charge image detector for reading information as extended spatial charge distribution on dielectric layer surface, using vibrating conducting probe scanner 02 p0248 A69-11822

Large scale information displays for group sharing in air traffic control, military operations and organization management 02 p0250 A69-12159

Scientific and technical information flow sources, showing DOD user need within defense industry and importance of local work environment 02 p0204 A69-12219

Human factors evaluation of computer based information storage and retrieval system using questionnaire and interview techniques 02 p0204 A69-12220

USAF accident information, reporting and retrieving, describing Directorate of Aerospace Safety structure and functioning 06 p1041 A69-16843

NASA scientific and technical information program for building technical data and literature repository for scientists, engineers and technical managers, describing IAA and STAR [UN PAPER 68-95317] 06 p1043 A69-17068

Chemical kinetic data evaluation, discussing compilation, production and publication programs, material content and arrangement and reliability estimates [WSCI PAPER 68-47] 07 p1073 A69-18320

Solid logic technology /SLT/ computer circuits, discussing IBM 360 computer reliability, failure analysis information retrieval, SLT module and failure rate 11 p1843 A69-24341

Soviet book on automated information retrieval systems covering computer languages, search in complex ordered codes, translation from Russian into computer language, etc 13 p2225 A69-27933

Saturn software configuration accounting and reporting system for document change and information retrieval 18 p3105 A69-34269

Dynamic Automated Reporting Technique /DART/ system for on-line conversational information storage and retrieval for use in large programs management 18 p3107 A69-35095

NASA current awareness service SCAN /selected current aerospace notices/, promoting selectivity in information transfer to abstract journals, accession lists and bibliographies 21 p3856 A69-39581

INFORMATION SYSTEMS

Saturn software configuration accounting and reporting system for document change and information retrieval 18 p3105 A69-34269

Operational system effectiveness information for reconnaissance drone system including test flights, discussing application to reliability and maintainability in project management 18 p3232 A69-34505

Aerospace technology application to commercial avionics system for cost effectiveness in functions expansion, phase-over, installation, maintenance and operation, discussing added information functions 18 p3108 A69-35069

Dynamic Automated Reporting Technique /DART/ system for on-line conversational information storage and retrieval for use in large programs management 18 p3107 A69-35095

Adaptive predicting filter mathematical model based on information probability, using adaptive systems latent memory 19 p3287 A69-36665

NASA current awareness service SCAN /selected current aerospace notices/, promoting selectivity in information transfer to abstract journals, accession lists and bibliographies 21 p3856 A69-39581

Loran C system for master station time and frequency dissemination, discussing application, coverage, timing accuracy and restrictions 23 p4116 A69-41601

Integrated adaptive data transmission system accepting analog inputs through information compressing sampler or digital inputs by sampling 23 p4121 A69-41760

Top-down initiating technique for forecasting future decade major systems requirements based on information progression [AAS PAPER 69-409] 24 p4417 A69-42803

INFORMATION THEORY

Book on probabilistic information theory-discrete and memoryless models covering information transmission, digitalized sources, generating functions, decoding error, systematic codes and sequential decoding
01 p0037 A69-11030

Multichannel digital data compression simulation, discussing algorithms, buffer queue control, identification coding and system performance measurements
02 p0213 A69-12814

Information theory application to study of biologically stimulating effects of low ionizing radiation doses, thermal energy and other environmental factors
03 p0369 A69-13434

Book on applications of information theory to dynamical systems with random initial conditions and cybernetic systems consisting of communication systems with feedback
04 p0580 A69-14520

Reliable information storage in memories designed from unreliable components
04 p0569 A69-15455

Reliable computation in computing systems designed from unreliable components, considering two models for component malfunctions
04 p0569 A69-15456

Topological codes and simplicial subclass information rates, minimum weights and word length
06 p0948 A69-17866

Informative properties of IR scanning equipment of meteorological satellites, discussing radiative flux measurements and thermal mapping
06 p0929 A69-17979

Subjective pilot ratings based on Cooper scale compared with aircraft handling criterion based on Shannon information theory, discussing pilot error and accident probability
08 p1254 A69-20458

Coherence theory of electromagnetic field from classical/wave/ or quantum/particle/ standpoint, stressing information theory
11 p1915 A69-24455

Entropy minimization in feature extraction by dimensionality reduction with linear transformation of pattern vectors, noting recognition time and storage space savings
11 p1909 A69-25291

Unknown channels classes epsilon capacity applied to estimating capacity of channels with additive noise, discussing models and upper and lower bounds
15 p2570 A69-31142

Communication channel information capacity determination through particle ensembles entropy analysis
19 p3334 A69-35885

Huffman minimum redundancy coding extension to run-length information based on Poisson distribution, including optimization and data compression applications
19 p3272 A69-36262

Information theory, circuit optimization and computer aided design in radio wave information transmission
19 p3286 A69-36432

Fourier transform techniques applications in optics, converting optical signal amplitude and phase information into electrical signal information
19 p3374 A69-36737

Information categories concept defined in relation to formulations of classical mechanics principles, considering theories of Newton, Gauss and Hertz
20 p3576 A69-37585

Data compression from standpoint of epsilon entropy theory, considering precise measure of channel capacity necessary to describe data source
23 p4134 A69-42526

Numerical computation of rate-distortion function $R(D)$ for certain memoryless message sources, discussing bounds, reduction to minimization problem and applications
24 p4284 A69-42719

Rocket IR astronomy in support of big bang hypothesis, considering photoelectric detectors and instrument system
10 p1772 A69-22868

Reddened M supergiant 119 Tauri IR spectra and IR absorption by CO and SiO molecules in stellar atmosphere and silicate mineral in interstellar grains
10 p1786 A69-24104

Double structure in IR near Trapezium region of M42 in Orion Nebula center
10 p1786 A69-24105

IR spectral distribution from region between stars of Trapezium in Orion Nebula
10 p1786 A69-24106

Coronal IR observations during solar eclipse revealing thermal emission zone at predicted interplanetary dust vaporization region
10 p1789 A69-24131

Collection of papers on IR astronomy covering lunar observations, stellar spectra, planetary atmospheres, galactic radio sources, etc
13 p2340 A69-27581

IR extragalactic radio sources including normal radio galaxies, quasars and Seyfert galaxies
13 p2342 A69-27597

IR emission from quasars, noting quasar 3C 273 B and synchrotron mechanism probability
13 p2342 A69-27598

Balloon-borne instrumentation for detection of far IR extended emission regions and bright point sources, describing results of initial flights
13 p2342 A69-27599

IR astronomy and cosmology, considering cosmic microwave background and isotropic radiation significance in distant IR
13 p2342 A69-27601

Instrumental investigation of submillimeter astronomy, noting advancements in semiconductor physics, quantum electronics and space astronomy
13 p2342 A69-27602

Millimeter and submillimeter astronomy, discussing lunar poleward darkening function, solar eclipse measurements, observations of Jupiter, Fourier transform and filter spectroscopy uses, etc
13 p2343 A69-27603

Submillimeter astronomy role for solar and atmospheric studies
13 p2343 A69-27604

Flux collectors and field imagers for IR astronomy, discussing design, construction and dimensions
13 p2239 A69-27605

IR astrophysics, discussing detection, instrumentation, IR stars and stellar evolution
14 p2516 A69-28868

Sunspot of 28 December 1967 studied by far IR scanning with interference and Reststrahlen filters defining bandpass, obtaining umbral temperature
17 p3029 A69-33050

Rocket-borne IR astronomical telescope high altitude observations compared with balloon observations
20 p3605 A69-37800

HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication
24 p4362 A69-43666

Seyfert galaxies IR radiation attributed to dust grains thermal emission of energy absorbed from galactic nucleus
24 p4374 A69-43741

INFRARED DETECTORS

IR optics for indicating dynamic mechanical component reliability via surface temperature variations
01 p0085 A69-10295

Aerial radiation temperature measurement, damping factor of atmosphere and determination of ground and water surface temperatures by radiometry
01 p0110 A69-10693

Temperature distribution over receiving layer of absorption edge image transformer, discussing thermal conduction influence on performance of thin film IR image receiver
04 p0631 A69-15280

Spectral response of fast GaAs point-contact diode in mm and submillimeter wavelength ranges
06 p0893 A69-16939

Onboard solid state neon cryostat for IR detector, noting resistance to missile vibration, acceleration and shock tests
06 p0906 A69-17103

IR scanning systems of meteorological satellites for detection of clouds and various underlying surfaces, determining detection probability and errors
06 p0952 A69-17986

IR evaluation of multilayer etched circuit boards, discussing testing of circuit distributive properties and individual layers
07 p1117 A69-19698

High responsivity high speed performance Ge bolometer detector for very far IR region, discussing performance theory and noise equivalent power
08 p1313 A69-20132

Evaporographic converter to test for striations/schlieren/ in materials used in IR
08 p1314 A69-20384

Eutectic anisotropic InSb-NiSb crystals applied to IR detection, noting sensitivity to carbon dioxide lasers
08 p1373 A69-20866

Rocket IR astronomy in support of big bang hypothesis, considering photoelectric detectors and instrument system
10 p1772 A69-22868

IR detection at sum or difference frequency by employing optically nonlinear crystal and laser in visible and photomultiplier
10 p1704 A69-23656

Aerobee rocket-borne liquid helium cooled telescope for IR night sky observations
11 p1885 A69-24852

Solid state IR imaging using monolithic Ge mosaics of isolated sensor elements, discussing design, structure, fabrication, system readout and operation
11 p1938 A69-25307

Up-converter IR detector noise characteristics for pulse and CW signal detection compared with photoconductive detector
12 p2029 A69-26329

Collision avoidance system for air traffic, discussing false signal discrimination via electronic measurement of light pulse duration from aircraft Xenon discharge beacon lamp
12 p2129 A69-26772

Earth resources remote sensing from spacecraft noting meteorology, oceanography, forestry, agriculture and IR detection of plant diseases and pollution
12 p2192 A69-26978

Airborne IR line scanning systems for latent forest fire detection, discussing discrimination module for automatic identification of hot targets
12 p2193 A69-26994

Airborne IR remote sensing techniques for fire detection, considering marginal and submarginal targets
12 p2098 A69-26995

Airborne scanning spectrometer for IR detection of clear air turbulence, presenting flight records
12 p2098 A69-26999

Airborne IR spectrometer for remote clear air turbulence detection, noting necessity for mirror stabilization in pitch axis
12 p2098 A69-27000

Airborne IR surveys in engineering studies of terrain, discussing instrumentation technology, data interpretability, economic feasibility, etc
12 p2098 A69-27007

Statistical properties of spatial radiance distribution of sky and forest backgrounds in IR, noting one dimensional Wiener spectra
12 p2131 A69-27072

IR radiation detection by photoconductor in microwave resonator noting electric field influence
13 p2223 A69-28639

IR astrophysics, discussing detection, instrumentation, IR stars and stellar evolution
14 p2516 A69-28868

Chopper modulated IR detection system error analysis through minimizing mean square error of approximating output function
14 p2450 A69-29639

IR radiation detection sensitivity emphasizing frequency up-conversion
17 p2969 A69-32839

IR radiometer to measure Jupiter atmospheric temperature by calculating certain constituents heat radiation levels through Planck formula assuming black body properties
17 p2974 A69-33425

Operational flight tests of IR atmospheric turbulence detection system
19 p3367 A69-35631

Differences concerning utilization of IR detectors, discussing nomenclature, fluctuations and definitions of detection, translation and readout
19 p3308 A69-35905

System components for spatial discrimination implementation scheme, discussing IR detector arrays and optical imagery processing
19 p3373 A69-36055

INFORMATION TRANSFER

U COMMUNICATING

INFORMATION TRANSMISSION

U DATA TRANSMISSION

INFRARED ASTRONOMY

Stellar spectra observed with 2.8-14 micron IR spectrometer, noting broad absorption feature near 5 and 8 microns
02 p0327 A69-12713

IR astronomy with ground based instruments noting Mars and Venus spectra, Jovian disk scans, solar radiometry, IR stars, quasars and galaxies
05 p0821 A69-15842

Object discrimination based on IR spectral differences, reviewing calibrated radiometers, relative spectrometers and imaging sensors
19 p3373 A69-36056

IR detector limiting noise voltage /photon noise/ due to photon arrival fluctuations at responsive element determined using Planck radiation law
19 p3309 A69-36059

Spectral parameters effect on IR instrument SNR, discussing range equations of point and extended sources and radiation-noise-limited detectors
19 p3310 A69-36061

IR detectors defined as transducers producing electrical signal proportional to IR power incident on detector, classifying types
19 p3310 A69-36068

IR measurements applications to meteorology, discussing IR radiation characteristics, atmospheric effects, thermal radiation detection and differences between real and black bodies
24 p4316 A69-43507

HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication
24 p4362 A69-43666

INFRARED FILTERS

Interference filter design for IR devices on Fresnel equation basis, analyzing plane electromagnetic wave propagation through stratified dielectric multilayer
19 p3373 A69-36053

Object discrimination based on IR spectral differences, reviewing calibrated radiometers, relative spectrometers and imaging sensors
19 p3373 A69-36056

INFRARED HORIZON SCANNERS
U HORIZON SCANNERS

INFRARED INSPECTION

Dynamic IR inspection to detect fatigue cracks in aircraft and missile structure from distance
11 p1861 A69-24262

IR techniques for nondestructive testing, discussing applications to heat injection and generation and IR test equipment capabilities
15 p2630 A69-31504

Automated IR fatigue crack detection in sonic test facility capable of subjecting large aircraft or missile structures to intense sound fields
15 p2631 A69-31505

Generalized parametric form of IR radiometric scan method applied to void detection problems, designing test techniques and establishing inspection procedure
15 p2631 A69-31506

IR inspection system for detecting interstitially caused alpha segregation in Ti alloy disks
24 p4318 A69-42757

INFRARED INSTRUMENTS

M-20 digital computer program designed for calculating statistical characteristics of signals from IR TV scanning system of Cosmos 122 meteorological satellite
06 p0929 A69-17980

IR polarizing microscope with IR corrected objectives and eyepieces providing higher contrast, sharper focusing and less light scattering
12 p2093 A69-26595

Balloon-borne instrumentation for detection of far IR extended emission regions and bright point sources, describing results of initial flights
13 p2342 A69-27599

IR techniques for nondestructive testing, discussing applications to heat injection and generation and IR test equipment capabilities
15 p2630 A69-31504

Interference filter design for IR devices on Fresnel equation basis, analyzing plane electromagnetic wave propagation through stratified dielectric multilayer
19 p3373 A69-36053

IR nonimage-forming instruments, stressing applications to communications, intrusion detection, ranging, etc
19 p3310 A69-36062

IR equipment to aid air navigation, discussing detection cells, temperature direction finding, mobile source tracking, etc
19 p3371 A69-36705

Monograph on low visibility landing in civil aviation, considering visibility determination methods and equipment and IR sighting devices
20 p3574 A69-38064

HF data transmission system unaffected by high energy electromagnetic fields using GaAs IR emitting diode, glass fiber optic light guide and photomultiplier tube
23 p4121 A69-41768

INFRARED LASERS

Negative Faraday effect and Doppler line width measurements for He-Ne IR gas laser tube by producing beat frequencies in ring laser system
01 p0088 A69-10028

Thin film thermocouple detector for molecular lasers operating in middle and far IR range
05 p0773 A69-16284

Pulsed water vapor laser with single Brewster window for operation between 20 and 120 microns, comparing performance with ordinary laser
05 p0776 A69-16334

Frequency and stability measurements in far IR laser region
07 p1146 A69-18482

He-Ne and He-Xe laser lines in IR tuned by axial magnetic field, observing Stark patterns of organic molecules
[IEEE PAPER C-5] 07 p1150 A69-19050

Iodine IR laser, discussing CW emission obtained at various wavelengths and attributed to electronic transitions in atom
[IEEE PAPER T-5] 07 p1154 A69-19082

Magneto-optic, acousto-optic, electro-optic and free carrier modulation of IR laser beams
07 p1158 A69-19743

Far IR radiation from water vapor laser, noting monochromaticity and strong linear polarization
10 p1702 A69-23160

IR He-Ne laser frequency response determined with inherently swept frequency modulator based on rotating corner reflector
10 p1702 A69-23347

Far IR lasing lines in hydrogen sulfide, sulfur dioxide and OCS, discussing output
10 p1706 A69-24008

Calorimeter for IR carbon-dioxide laser output power measurement, noting range calibration and accuracy
11 p1885 A69-24903

Far IR CW gas laser design for maximum output, discussing pulsed operation, wavelength measurement and radiation detection
11 p1898 A69-25051

Atmospheric boundary layer transparency to gas laser emissions in IR spectrum, determining attenuation factor dependence on humidity and visibility range
12 p2028 A69-25957

Pulsed IR laser optimal Q switching mode by using semiconductor mirror with nonparabolic dispersion law and changing mirror opening moment delay time
15 p2633 A69-30064

Optical IR yttrium-iron garnet rectifier increasing light intensity and system Q factor at low external magnetic field
17 p2981 A69-33117

Laser harmonic frequency measurement application to absolute frequency determination of 84 micron heavy water laser
17 p2982 A69-33406

Construction and components of laboratory water vapor laser emitting coherent radiation in far IR
21 p3738 A69-39446

Optical frequencies and polarizations of IR active phonons of tysonite lanthanide fluorides based on Kramers-Kronig reflectance spectra analysis
22 p3993 A69-40729

INFRARED PHOTOGRAPHY

Interpretation of IR cloud images transmitted by Nimbus 1 and Cosmos 122 satellites, using radiation temperature contrasts
06 p0952 A69-17984

IR camera determining surface temperatures, discussing construction and space applications
08 p1315 A69-20455

Large scale color and color IR aerial photography evaluation to determine interpretability for improving range resource inventories
11 p1880 A69-24265

TV IR cloud images interpretation transmitted by Cosmos 122, discussing specific features of cloud covers and underlying surfaces
11 p1912 A69-24826

Computer program for interpreting IR cloud pictures from Cosmos 122 satellite based on potential function method
11 p1884 A69-24833

Magellanic Clouds color composite photographs prepared from negatives taken in blue and IR light
12 p2152 A69-25801

Spectrum analysis of radio galaxy M82 nucleus, noting H alpha emission lines from analysis of IR photograph
13 p2335 A69-27310

IR TV cloud pictures from meteorological satellites used for sky condition diagnostics and forecasting through automatic interpretation by image brightness quantization
13 p2291 A69-27728

Color IR film improvement for high altitude remote sensor, using auxiliary minus-visual filters
15 p2609 A69-30457

Side-looking radar and thermal IR photography as mapping system, discussing resolution and distortion
15 p2612 A69-31162

Environmental studies using orbital photography, discussing color, color IR, black and white applications from Gemini and Apollo programs
18 p3132 A69-35275

HD 30353 He binary star invisible component suggested as KO type supergiant from IR photometric data
18 p3203 A69-35348

Satellite IR hyperaltitude imagery for earth resources application, obtaining geological, meteorological and hydrological information
20 p3536 A69-36930

M 82 direct photographs sequence observation in optical IR region, noting small nucleus and broadened inclined emission lines
21 p3799 A69-38649

Comparative photointerpretation from panchromatic, color and Ektachrome IR aerial photography
22 p3944 A69-40039

Color and color IR aerial photography compared for estuarine and marshland research, considering detection of turbidity, pollution, salinity, etc
22 p3942 A69-40993

INFRARED RADIATION
NT FAR INFRARED RADIATION
NT NEAR INFRARED RADIATION

IR emission in NGC 7027 spectrum and role of discrete line emissions, discussing magnetic dipole transitions, temperature and density
01 p0148 A69-10051

Reversed thermal conditions in mesopause, examining atomic oxygen IR radiation effect
01 p0062 A69-10129

Frequency mixing of IR signals with visible laser light in nonlinear crystals to detect IR signals
01 p0089 A69-10180

Jet stream cirrus radiative characteristics from airborne IR measurements, noting cirrus cloud emission and transmission and cirrus height and temperature estimates
01 p0110 A69-10694

Cirrus IR radiance model for explaining measured cloud radiance characteristics, considering thermal emission and irradiance scattering
01 p0111 A69-10848

Orbital spectroscopic and radiometric IR experiments, considering moon and Mars surface
[AAS PAPER 68-196] 02 p0312 A69-11474

Electric field induced IR absorption and Raman scattering by optical phonons in centrosymmetric crystals, discussing tensor coefficients
02 p0295 A69-11779

Solar continuum intensity determination in middle IR, obtaining solar disk center brightness temperature measurement by comparison with black body model
02 p0318 A69-12041

Linear absorption coefficient of seminsulating Cr doped GaAs for IR carbon dioxide laser radiation, discussing lattice absorption mechanism
02 p0258 A69-12619

Ferroelectric strontium barium niobate as sensitive detector of single pulse IR radiation, noting application to Q switched carbon dioxide laser output
02 p0300 A69-12623

Visible and IR nonequilibrium radiation from dilute gases of upper atmosphere, describing laboratory, ground, aircraft and rocket observations of reactions and interactions
02 p0247 A69-12810

Q switched laser based on light waves parametric interaction in nonlinear medium operating at wavelengths from UV to IR
03 p0439 A69-13054

IR heating, discussing operation of IR emitters employing glass and quartz envelopes
03 p0411 A69-13548

IR radiation of NML Cygnus with O/C ratio close to unity ascribed to circumstellar shell of graphite particles
03 p0513 A69-13775

Absorption and IR emission of nickel and cobalt doped alkali halides
03 p0490 A69-13941

Reflection indicatrices of aluminum oxide, MgO, Au and Pt surfaces for normal irradiation noting temperature and surface treatment effects
03 p0534 A69-14161

Carrier scattering mechanisms in n-type GaP, measuring IR radiation absorptivity in Te doped GaP
03 p0492 A69-14168

Photoionization of donor impurities during absorption of IR radiation in n-type Te doped GaP at low temperatures
03 p0492 A69-14169

IR absorption and reflection in doped n-GaSb, obtaining absorption coefficient for various impurity concentrations
03 p0492 A69-14174

Atmospheric refractive index for IR radiation in one to six micron region
04 p0591 A69-14300

Stratospheric aerosol investigation by IR and lidar, applying Mie theory to model aerosol size distribution
04 p0592 A69-14654

IR object discovered during T Tauri objects and diffuse nebulae study, discussing peculiarity
04 p0655 A69-14665

Lunar surface IR polarization measurements compared to visible and UV polarization
04 p0656 A69-14669

IR radiation heat transfer in polyatomic gases in limit of large path lengths
05 p0844 A69-15579

IR radiation in upper atmosphere, indicating sources of error in data
05 p0753 A69-16058

Dynamics of laser response in IR detection by means of optical mixing in He-Ne laser, noting bandwidth
05 p0776 A69-16331

IR radiation attenuation in transparency windows of atmosphere, using searchlights as radiation sources
05 p0760 A69-16695

Onset and development of typhoons observed by Cosmos satellites using TV type IR apparatus [UN PAPER 68-95774]
06 p0949 A69-17039

GaAs IR emitters efficiency due to semiconductor material band structure
06 p0894 A69-17248

IR radiative heat transfer in nongray gases for non-black bounding surfaces, considering diatomic gases with single vibration rotation band
06 p1033 A69-17559

Inverse problems in radiative transfer applied to remote measurements of IR radiation from planetary atmospheres, noting temperature and water vapor inversions
06 p0919 A69-17617

IR radiation at 10.6 micron from two point sources mixed with collimated ruby laser radiation in proustite, obtaining visible image
06 p0928 A69-17904

IR beam profiles of carbon dioxide laser permanently recorded on foamed polystyrene
07 p1156 A69-19305

Energy transfer in gases transmitting heat by interaction of thermal conduction and IR radiation
09 p1621 A69-21442

Relaxation times of carbon dioxide laser levels induced by radiation
09 p1515 A69-21488

High altitude radiant emittance of cirrus clouds and cloudless sky for IR transmissivity based on aircraft measurements
09 p1536 A69-21641

Bismuth bolometer as sensor recording IR radiation for thermal radiation fluctuations in atmosphere caused by temperature inhomogeneities
09 p1490 A69-21868

Outer solar coronal IR radiance measured by ground telescope and stratosphere balloon flight, noting interplanetary dust thermal emission
09 p1600 A69-22205

Bright celestial IR sources in Ursa Major detected in spectral region by rocket-borne telescope, discussing luminosities of quasi-stellar sources
09 p1603 A69-22230

IR excess from carbon-rich peculiar variable R Coronae Borealis and M7 variable associated with emission nebula R Aquarii attributed to circumstellar matter
09 p1603 A69-22263

IR nondestructive, in-process microweld evaluator, discussing energy correlations and tensile strength
09 p1510 A69-22347

IR emissivities of powdered silicates and cloudy atmosphere model of spectral emission for radiative transfer in condensed powder
10 p1778 A69-23414

IR radiation effects in cadmium sulfide crystals with green edge emission at low temperatures, discussing luminescence, photoconductivity and conductivity glow curves
10 p1746 A69-23565

Limits of human tolerance to localized skin exposure to IR irradiation of various intensities from pain threshold observations, noting skin temperature role
10 p1647 A69-23589

Spectrum of IR object NML Cygnus, discussing model based on circumstellar IR emission
10 p1785 A69-24101

Broadband photometry for circumstellar IR emission from cool stars, considering giant and carbon stars
10 p1786 A69-24102

Pulsed molecular nitrogen laser positive UV and IR systems interaction under varying gas pressure, applied voltage and tube diameters
11 p1893 A69-24346

Two dimensional autocorrelation functions of outgoing radiation fields usable as quantitative characteristics of cloud distribution structures
11 p1913 A69-24832

Rabbit corneal damage thresholds for Gaussian beams of carbon dioxide laser IR radiation at various exposure times
11 p1830 A69-24844

Visible imaging of IR objects by conversion of IR frequency to visible with sum-frequency generation within nonlinear dielectric medium
11 p1897 A69-25037

Wavelength dependence of polarization and UBVR photometry of highly polarized stars, correlating IR interstellar extinction with maximum polarization wavelength
12 p2153 A69-25809

Resonant vibrational energy transfer between specific mode of carbon dioxide and N molecules at high temperatures, monitoring IR emission
12 p2131 A69-25984

IR radiative temperature changes as function of latitude, season and height in region 30-110 km
12 p2064 A69-26008

NGC 4151 absolute intensities of wide emission of weak isolated and IR lines determined from photoelectric spectrophotometric measurements
12 p2164 A69-27023

Thermal and free-free emission from planetary nebulae based on graphite grain model, discussing IR fluxes
12 p2172 A69-27158

Residual interstellar gas from protostar formation detected as high luminosity IR object
13 p2327 A69-27593

Low resistance Bi thin film complex electrical impedance in IR range, stating methods and equivalent circuits for determining impedance
13 p2322 A69-28011

Atmospheric IR emission measured at high altitudes by interferometer spectrometers behind nitrogen cooled chopper
13 p2254 A69-28261

Incoming IR flux measurements at high altitude, noting flux increase due to water vapor condensation in troposphere
13 p2256 A69-28647

Intermediate band photometry of G, K and M stars in IR indicating continuous stellar radiation deviant from black bodies
14 p2520 A69-29375

Continuous IR parametric signal amplification in saturable absorber caused by carbon dioxide laser pumping
14 p2459 A69-29601

Electron temperature and concentration in plasma determined by measuring diamagnetic signal and IR radiation intensity, emphasizing usefulness in plasmoid head portion
14 p2496 A69-29785

Bidirectional reflectance of solar radiation and IR temperature data from Nimbus 2 satellite to differentiate clouds above snow surfaces
15 p2596 A69-30455

Global mean monthly charts for IR radiation temperature, based on Cosmos 144 satellite data
15 p2596 A69-30643

Maser emission in interstellar OH ground state produced by IR pumping, noting population inversion mechanism
15 p2691 A69-30762

Solar radiation actinometric and pyranometric observations during 20 May 1966 eclipse, examining IR component and spectral radiation energies
15 p2697 A69-31257

IR quenching of photocurrent under field effect in CdS crystal
16 p2827 A69-32044

Diurnal variations of IR atmospheric oxygen bands in airglow observed with filter photometer on balloon flights
16 p2776 A69-32091

Homodyne detection of IR radiation from carbon dioxide laser scattered from moving diffuse target, noting applicability to IR radar, heterodyne spectroscopy etc
17 p2971 A69-32913

Angular dependence of lunar nighttime IR radiation by invariant tensor techniques, noting surface roughness effect on radiation pattern [AIAA PAPER 69-597]
17 p3032 A69-33276

Directional characteristics of lunar IR radiation accounted for by crater model [AIAA PAPER 69-598]
17 p3033 A69-33285

Adiabatic and diabatic processes contributions to vertical atmospheric motions profile and IR cooling components comparison
17 p2962 A69-33689

Phenolic resin and silica cloth laminates transparency to IR radiation, noting experimental results
18 p3136 A69-34640

IR technology - Conference, Ann Arbor, June 1969
19 p3309 A69-36051

Temporal discrimination based on signal fluctuations emphasizing signal detection in presence of noise
19 p3373 A69-36057

Thermal IR imaging devices for shape recognition and target position, emphasizing optical mechanical image or object plane scanners using point detectors
19 p3310 A69-36064

IR absorption in n-type gallium phosphide doped with telluride or Si in 1.5-2.0 micron range, analyzing wavelength dependence
19 p3385 A69-36518

Combined resonance transition in n-type InSb by IR radiation, plotting intensity against magnetic field for different carrier concentrations to infer band structure
19 p3385 A69-36520

IR radiation in upper atmosphere, indicating sources of error in data
20 p3533 A69-37968

Correlating IR lunar nighttime temperature and bearing strength of lunar materials, using expressions of thermal conductivity and bearing strength of porous media in vacuo
20 p3613 A69-38248

Nongray greenhouse model of Venus atmosphere possessing IR opacity due to carbon dioxide, water and diatomic N compatible with Mariner 5 and Venera 4 results
20 p3615 A69-38259

Water vapor profiles in stratosphere from IR radiometric observations under cloudless conditions, indicating relation to tropospheric meteorological features
20 p3535 A69-38261

Galactic nucleus observations in 1.65-19.5 micron range with evidence for strong radiation at 10 and 20 microns, noting mechanisms for IR radiation
21 p3799 A69-38650

Total band absorbance of nonisothermal IR radiating gas, using wideband formulation of Curtis-Godson approximation and series expansion formulation
22 p3983 A69-40101

Carbon dioxide laser development, discussing gain, static amplifier and high pressure operations
22 p3962 A69-40474

Monograph on laser communication system in IR for industrial environments
22 p3900 A69-40617

Steady state distribution of visible and IR radiation in planetary atmosphere illuminated from outside, calculating atmospheric temperature profile
22 p4031 A69-40910

Heat resistant materials integral and spectral radiative properties in IR and visible regions determined by calorimetry and IR spectrometer
23 p4237 A69-41329

Fast neutron irradiation effect on IR absorption in single crystal GaAs for various fluences
23 p4198 A69-41540

Corrections for eliminating anomalous skin effect on IR emissivity for Ag, Cu, Au and Al
23 p4177 A69-42212

Mars thermal energy emission measurement by Mariner 1969 IR radiometer, indicating frozen carbon dioxide cap and minimum temperature
24 p4384 A69-43196

Thermal calculations of objects near lunar surface, considering IR emission directivity effects
24 p4385 A69-43254

IR measurements applications to meteorology, discussing IR radiation characteristics, atmospheric effects, thermal radiation detection and differences between real and black bodies
24 p4316 A69-43507

INFRARED REFLECTION

IR reflection and transmission properties of various semiconductor compounds, rubidium halides, strontium titanate, BN and Te
01 p0139 A69-10840

Reflection measurements in IR, investigating effect of angle of incidence and collimated beam on reflection spectra
01 p0120 A69-10891

IR absorption and reflection in doped n-GaSb, obtaining absorption coefficient for various impurity concentrations
03 p0492 A69-14174

Angular distribution measurements of visible and near IR radiation reflected from carbon dioxide cryodeposits formed on liquid nitrogen cooled surface in vacuum
[AIAA PAPER 69-63] 06 p0959 A69-18131

Diamond-like glassy semiconductor compound of cadmium germanium arsenide, determining optical lattice vibrations from IR reflection spectra
10 p1747 A69-23963

Germanium surface IR radiation absorption in vacuum at low temperatures, obtaining modulated interval reflection spectra
13 p2317 A69-27879

IR reflection spectra agreement for frost particles and Venus clouds, noting ice as clouds constituent
18 p3190 A69-34282

Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres
18 p3126 A69-34283

INFRARED SCANNERS

Informative properties of IR scanning equipment of meteorological satellites, discussing radiative flux measurements and thermal mapping
06 p0929 A69-17979

IR scanning systems of meteorological satellites for detection of clouds and various underlying surfaces, determining detection probability and errors
06 p0952 A69-17986

Imagery degradation by moisture condensation on thermal IR scanners optics during aircraft descent from higher to lower altitude
08 p1311 A69-19821

Near field repeatable stimulator of infrared earth horizon sensors in variable environments and test levels, noting orbital conditions
[AIAA PAPER 69-322] 09 p1478 A69-22376

Optical/mechanical IR line scanner imagery role in remote sensing
12 p2096 A69-26979

Tenuous cirrus cloud influence on 6.4-6.9 micron Nimbus 2 water observations, discussing equivalent black body temperatures correspondence to cloud and clear areas
12 p2075 A69-27003

Airborne and satellite IR survey over active effusive eruption at Surtsey, Iceland, comparing thermal energy yield and radiant emission to ground measurements
12 p2076 A69-27011

Sky mapping in IR, using IR photometer on TD1 ESRO satellite
13 p2260 A69-27606

High speed picture thermography in nondestructive testing, describing IR scanning frame rate and thermal image recording
15 p2618 A69-30316

European geostationary satellite orbit inclination and eccentricity modification for maximum observation time of Northern Hemisphere by high resolution IR radiometer
15 p2650 A69-31389

IR measuring techniques for water surface temperature remote sensing
15 p2617 A69-31543

Sunspot of 28 December 1967 studied by far IR scanning with interference and Restrahlens filters defining bandpass, obtaining umbral temperature
17 p3029 A69-33050

Ocean and water surface temperature measurement by IR remote sensing from aircraft and satellites, discussing accuracy and data correction
[AIAA PAPER 69-590] 17 p2973 A69-33286

Lunar surface brightness temperatures from IR observations, determining thermal emission directional characteristics to infer surface temperatures from Surveyor data
[AIAA PAPER 69-593] 17 p3033 A69-33302

TV camera tubes with electron beam scanning adapted to IR imaging, emphasizing vidicon
19 p3311 A69-36069

Side-looking radar and IR line scanning as method for simultaneous stereo height mapping, using images produced from same vantage point
20 p3536 A69-36929

Thermal IR image forming devices, explaining principles of image and object plane scanning
20 p3540 A69-37738

Thermal scanner model block diagram presented including lens, filter, detector, CRT and camera, considering environmental factors affecting image character
20 p3541 A69-37740

Effusive volcanic eruptions recorded by high thermal sensitivity satellite-borne IR systems
21 p3721 A69-38631

INFRARED SPECTRA

IR and Raman spectra of solid and matrix isolated methylamine and deuterium derivatives, locating amine twisting vibration in solid phase IR spectra
01 p0023 A69-10287

Methane IR absorption band centered near structure
01 p0023 A69-10289

Low temperature grinding technique for IR spectra of propellants and binders in potassium bromide disks
01 p0082 A69-10892

Statistical band model and line by line calculations of transmittance for IR bands in absorption spectra of ozone and water vapor
[AFCRL-68-0505] 01 p0124 A69-10919

Very far IR techniques applications in molecular and solid state spectroscopy and relationship with impurity band conduction
02 p0296 A69-11791

Spectral measurements for matrix isolated lithium fluoride extended into far IR to obtain evidence for linear lithium fluoride dimer
02 p0205 A69-12465

IR and violet sulfur lines for Seyfert galaxies, noting substantial reddening in nuclei
02 p0325 A69-12593

Induced combinational scattering /ICS/ on IR active transitions, deriving equations with allowance for population variation
02 p0282 A69-12636

Far IR and Raman spectra of ethylene carbonate, gamma butyrolactone and cyclopentanone, noting consistency with hindered pseudorotation
02 p0206 A69-12723

Night airglow spectrum between four and four microns, noting sequence of hydroxyl bands
03 p0426 A69-14251

Stellar spectra taken with rapid scanning Michelson interferometer, noting IR excess due to radiation from clouds surrounding stars
04 p0655 A69-14667

IR astronomy with ground based instruments noting Mars and Venus spectra, Jovian disk scans, solar radiometry, IR stars, quasars and galaxies
05 p0821 A69-15842

Parameters and relative errors tabulated from IR spectral emittance of Mo, Nb, Zr and Ta near 1400 K
05 p0846 A69-15903

Water and carbon dioxide IR spectra compared with laboratory measurements
05 p0759 A69-16638

Atmospheric IR spectral transparency measurement, describing optical system, recording devices and data processing
05 p0759 A69-16639

Communications of Lunar and Planetary Laboratory, Volume 7, covering IR solar spectrum atlas reports and solar spectrometer for airborne IR observations
06 p1008 A69-17807

Arizona-NASA atlas of IR solar spectrum, reproducing photometric tracings obtained from CV-990 aircraft flights
06 p1008 A69-17808

IR solar spectrum tables and graphs covering 10,657-12,857 A
06 p1008 A69-17809

NASA atlas of IR solar spectrum, reporting B and 4 meter spectrometer recordings over band containing methane telluric absorptions
06 p1008 A69-17810

Shock tube study of ammonia oxidation at high temperature, detecting molecular species in reaction zone by IR emission
06 p0885 A69-17936

IR absorptance of CO below room temperature, determining strength and half widths of lines in R branch of fundamental band
07 p1183 A69-19644

IR zero one band of molecular O observed in day airglow with ground based scanning grating spectrometer
08 p1306 A69-20096

Near IR transparent aluminocalcium glasses with improved spectral properties
08 p1336 A69-20386

Polymers and organic optical cements transparent in 1 to 13 micron IR region, noting organosilicon resin
08 p1336 A69-20387

IR photoconductivity spectra at surface of gold doped silicon, establishing monopolarity
08 p1373 A69-21073

Absolute spectrophotometry of IR lines in planetary nebulae spectra determined by diffraction spectrograph
09 p1590 A69-21380

Luminescence spectra of molecular gases excited by fast electrons in infrared spectral region, noting H alpha line
09 p1590 A69-21382

IR spectrum of NML Cygnus star with Michelson interferometer, noting CO bands and IR excess
09 p1602 A69-22229

Nonadiabatic collision broadening theory for IR spectral lines applied to carbon dioxide-carbon dioxide and carbon dioxide-nitrogen collisions, estimating rotational line widths
09 p1543 A69-22250

Photoelectric spectrum scanning and IR photometric observations of Scorpius XR-1 X ray source
09 p1604 A69-22401

Test of Velikovsky theory for dense hydrocarbon clouds and dusts surrounding Venus, using IR reflection spectra
09 p1608 A69-22566

IR emissivities of powdered silicates and cloudy atmosphere model of spectral emission for radiative transfer in condensed powder
10 p1778 A69-23414

IR and Raman spectra of gas and liquid phase methylhydrazine and deuterated methylhydrazines, discussing vibrational motions, H bonding and thermodynamic functions
10 p1752 A69-23528

Nitrogen, oxygen and air luminescence spectra excited by fast electrons at low gas pressures in IR spectral region compared with polar auroral spectra
10 p1687 A69-23916

Far IR laser lines in hydrogen sulfide, sulfur dioxide and OCS, discussing output
10 p1706 A69-24008

IR spectral distribution from region between stars of Trapezium in Orion Nebula
10 p1786 A69-24106

Brightness temperatures and spectra of Venus, Mars, Jupiter and moon measured from 8 to 14 microns by reflector and prismatic spectrometer
11 p1956 A69-24395

Real time Fourier spectroscopic system for synthesis of spectrum of interferogram, noting polystyrene IR transmission spectra
11 p1884 A69-24837

Carbon dioxide temperature distribution, absorption and concentration as functions of molecular dissociation behind shock wave determined by measuring IR bands intensity
11 p1873 A69-25226

Balloon-borne IR spectrometry to study atmospheric nitric acid vapor compared with absorption by ozone and methane
11 p1879 A69-25407

Calcite IR absorption dependence on pressure, discussing calcite-aragonite transformation
12 p2141 A69-25783

IR absorption spectrum of Br-doped n-CdTe specimen, considering donor level transfer mechanism
12 p2142 A69-25979

Limits for Martian surface materials established by comparing visible and IR spectra with laboratory spectra
12 p2156 A69-26225

INFRARED SPECTROMETERS

Vibration and absorption bands in IR spectra of diborene hydrazine stabilized by boiling in benzene 12 p2027 A69-26917

Lunar thermal anomalies in various craters observed during lunar night by IR methods, with data suggesting hot and cold regions 12 p2171 A69-27092

IR objective-prism survey along southern Milky Way for identifying high luminosity stars 13 p2335 A69-27314

IR observations of ETA Carinae to 20 microns, noting continued increase in flux density into IR 13 p2335 A69-27316

IR spectroscopic observations of moon to interpret molecular vibration spectra in terms of molecular composition, discussing rock surface roughness effects 13 p2341 A69-27582

IR day and night airglow of upper atmosphere utilized for atmospheric energy content and reactions analysis 13 p2252 A69-27585

IR airglow spectra measured by two beam interferometer on balloon, noting carbon dioxide and OH emission bands 13 p2252 A69-27586

Atmosphere effects on solar IR spectra, discussing role of absorbing molecule distribution in transmittance calculations 13 p2341 A69-27589

Expected IR line spectra of gaseous nebulae based on physical conditions, listing line intensities 13 p2342 A69-27595

Atmospheric ozone vertical distribution and total amount determined by radiative transfer and perturbation theory, presenting error analysis 13 p2255 A69-28493

Water and carbon dioxide IR spectra compared with laboratory measurements 14 p2433 A69-28794

Atmospheric IR spectral transparency measurement, describing optical system, recording devices and data processing 14 p2433 A69-28795

IR spectral transmittance and physicochemical properties of tellurite glasses with vanadium and cerium oxides, showing polymer chains in structure 14 p2468 A69-29329

Propylene imine IR and Raman spectra, calculating thermodynamic functions based on rigid rotator harmonic oscillator model 14 p2410 A69-29922

Source functions of IR Fraunhofer lines obtained using solar disk equivalent width method, noting LTE role 14 p2528 A69-29961

Synthesis of N-/trimethylsilylalkyl/ diamines and N-/trimethylsilylalkyl/-N-/2-mercaptoethyl/ diamines, determining structure by IR spectra 15 p2561 A69-30414

Atmospheric transmission functions dependences on absorbing material, pressure and temperature in 15 micron band of carbon dioxide, introducing corrections 15 p2597 A69-30653

IR horizon of earth from ionospheric IR emission spectra obtained by sounding capsule, discussing earth geometric horizon and particular spectral bands [ONERA-TP-709] 15 p2601 A69-31370

Atmospheric IR spectra determination from transmission functions overlapping effects of atmospheric gases 16 p2814 A69-31792

Spectral variations of red variable stars analyzed by objective-prism spectra in near IR 16 p2860 A69-32235

Two channel IR radiometer for 1969 Mariner mission measuring equivalent black body surface temperature 17 p2972 A69-33085

IR reflection spectra agreement for frost particles and Venus clouds, noting ice as clouds constituent 18 p3190 A69-34282

Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres 18 p3126 A69-34283

Vertical tropospheric humidity distribution estimation from IR spectra obtained by TIROS satellites 18 p3126 A69-34284

IR and optical measurement of Crab pulsar NP 0532, analyzing energy density per pulse and smoothness of visual data 18 p3191 A69-34318

Absolute spectrophotometry of IR lines in planetary nebulae spectra determined by diffraction spectrograph 18 p3198 A69-34768

Luminescence spectra of molecular gases excited by fast electrons in IR spectral region, noting H alpha line 18 p3176 A69-34770

Spectroheliograms interpretation obtained in line cores of neutral oxygen IR multiplets 18 p3204 A69-35388

Atmospheric slant path molecular absorption and emission from band model methods, discussing computer program prediction capabilities 19 p3375 A69-36052

Object discrimination based on IR spectral differences, reviewing calibrated radiometers, relative spectrometers and imaging sensors 19 p3373 A69-36056

Electromagnetic field signatures in optical IR spectrum of satellite-borne sensors, analyzing spectral, spatial and temporal distributions, polarization and phase 19 p3309 A69-36060

Forbidden lines of O I, O II, S II, N II and A III in red and near IR spectra of NGC 1976, IC 418 and II 4997 19 p3422 A69-36222

IR spectra of Eta Carinae, confirming nitrogen and sulfur abundance 19 p3423 A69-36229

Free electrons influence on reflection coefficient of semiconductor in IR spectra, showing selective modulation with change in carrier concentration 20 p3583 A69-37610

TiO bands identified in Mira variables IR region, discussing rotational structure and band strength-temperature relation 20 p3611 A69-38158

IR spectrum of NML Cygnus star using rapid scanning Michelson interferometer, estimating temperature from CO bands 21 p3800 A69-38678

Papers of Lunar and Planetary Laboratory, Volume 9, covering IR solar spectrum 21 p3800 A69-38681

Solar spectrum data covering wavelength intervals from 13138-14707 and 12187-17731 A and 1.4 micron water band 21 p3800 A69-38682

Solar IR spectrum recorded by LPL B spectrometer on NASA CV-990 aircraft using one micron grating, noting resolution 21 p3800 A69-38683

Emission band intensities of carbonyl fluoride in 2.0-6.0 micron region with scanning spectrometer, comparing results for room and shock temperature with theoretical data 21 p3669 A69-38759

Horizon definition for Apollo space navigation references from examining earth atmosphere visible and far IR spectrum [AIAA PAPER 69-869] 21 p3763 A69-39395

Visible and IR spectral reflectivity of Apollo lunar landing sites, attributing reflectivity differences to compositional and/or mineralogical differences 21 p3815 A69-39586

Lunar surface IR emissivity comparison spectra including proposed Apollo landing sites, indicating Si-O ratio difference for Plato crater 21 p3815 A69-39587

Relative IR spectral reflectivity of selected lunar surface areas measured using double beam photoelectric filter photometer 21 p3815 A69-39588

IR molecular radiation spectra of upper atmosphere in 3-8 micron range investigated by rockets and satellites, discussing radiation energy density during magnetic storms 21 p3792 A69-39772

Jupiter spectrum observations in 2.8-14 micron range, describing absorption strength and brightness temperature, basing analysis on ammonia, methane and hydrogen absorption 22 p4028 A69-40662

Dielectric constant and IR spectra of Ba titanate single crystals doped with hydroxyl, showing dependence on temperature and crystal thickness 22 p3995 A69-41157

Defect structure of ceramic Ba titanate doped with Cr ions, evaluating visible, IR and EPR spectra 22 p3996 A69-41160

IR directional and hemispherical emittance of spacecraft thermal control coatings, comparing values determined by various measurement techniques 23 p4164 A69-41633

IR excess of R CrB type variable star RY Sgr, noting visual brightness and radiation in 2.0-3.4 micron range 23 p4220 A69-42377

Equivalent width measurements of Arcturus IR line spectra using Fourier transform spectroscopy, tabulating results 23 p4222 A69-42453

IR lattice spectra of rare earth Al, Ga and Fe garnets, discussing oxygen anion, translational rare earth cation and crystal lattice external motions 24 p4360 A69-42974

Brightness temperatures and spectra of Venus, Mars, Jupiter and moon measured from 8 to 14 microns by reflector and prismatic spectrometer 24 p4390 A69-43785

INFRARED SPECTROMETERS

Atmospheric temperature and airglow spectra from IR measurements noting OH bands, atmospheric structure between 10 and 200 km at midlatitude and atmospheric absorption [UN PAPER 68-95471] 01 p0108 A69-10464

Stellar spectra observed with 2.8-14 micron IR spectrometer, noting broad absorption feature near 5 and 8 microns 02 p0327 A69-12713

IR spectrometer for Nimbus meteorological satellite for terrestrial spectral radiance data for atmospheric temperature profiles 06 p0926 A69-17621

Life raft thermal protection against exposure of aircrews to cold, noting chemically fueled heaters and IR reflective liners 06 p0883 A69-17841

Detection of micron Ne emission line from planetary nebula IC 418 using IR spectrometer 09 p1591 A69-21452

Airborne scanning spectrometer for IR detection of clear air turbulence, presenting flight records 12 p2098 A69-26999

Airborne IR spectrometer for remote clear air turbulence detection, noting necessity for mirror stabilization in pitch axis 12 p2098 A69-27000

Atmospheric IR emission measured at high altitudes by interferometer spectrometers behind nitrogen cooled chopper 13 p2254 A69-28261

Static temperature measurement in arc-tunnel tests producing high velocity air streams by duplex scanning IR spectrometer 19 p3294 A69-35752

Modular Michelson interferometer used as IR spectrometer for absorption and dispersion studies, describing instrument construction, range and accuracy 20 p3538 A69-37297

Grating spectrometer for far IR, discussing light source, reflection gratings, filters, etc 21 p3726 A69-39682

INFRARED SPECTROPHOTOMETERS

Paschen series line contours for hydrogen in solar spectrum plotted from IR spectrophotometric data 01 p0148 A69-10126

Lunar surface IR polarization measurements compared to visible and UV polarization 04 p0656 A69-14669

Multiband photoelectric photometer for near IR observations, tabulating magnitudes, colors, spectral irradiance, radii and effective temperatures of late type stars 13 p2342 A69-27592

INFRARED SPECTROSCOPY

Rapid scan spectroscopy, reviewing dispersion optical and interferometric systems and electronic image converters 01 p0082 A69-10836

High dispersion IR image tube spectroscopy using telescope, discussing alpha Sco and alpha Boo spectral regions 07 p1074 A69-19203

Mars and Earth atmospheric carbon dioxide simulation and spectroscopic measurement for developing planetary surface pressure estimating procedures from IR transmission measurements 08 p1354 A69-20151

Glass fibers size, finish and surface treatment identification by pyrolysis attenuated total reflectance IR spectroscopy 09 p1448 A69-22315

Water content of tektites, impactites and artificial glass of tektite composition using IR absorption measurements 10 p1778 A69-23413

- IR spectrometric analysis of flames of composite rocket propellants, maintaining diffusion flames between surfaces of decomposing ammonium perchlorate and fuel source
[WSCIPAPER 69-10] 16 p2831 A69-32350
- Antimony trisulfide natural light reflection and transmission in and near IR region, noting spectral temperature and time dependence peculiarities
19 p3384 A69-36481
- Continuous IR radiation source using electrically heated Mo ribbon, comparing emission from V shape and flat portions
19 p3313 A69-36491
- Satellite determination of underlying surface temperature by IR spectroscopy, measuring emitted radiation in atmospheric windows
21 p3759 A69-39114
- Stellar IR spectroscopy, describing absorption and emission lines of various atoms and molecules, atmospheric composition, problems with variable stars, etc
21 p3811 A69-39510
- Polycrystalline ammonium cyanide IR absorption spectrum as function of temperature, discussing ammonium ion hydrogen bonding to C or N atoms
24 p4280 A69-43809

INFRARED TRACKING

- Encoding and decoding in IR tracking system, analyzing chopping rotating FM reticle pattern
19 p3268 A69-36058

INFRASONIC FREQUENCIES

- Infrasonic waves recordings from Saturn 5 vehicle, observing signal reversal occurrence
03 p0509 A69-13358
- Acoustic and electromagnetic energy propagation in lower ionosphere and atmosphere for energy pulse generation by chemical explosion
07 p1078 A69-18844
- Auroral infrasonic waves morphology related to temporal and spatial distributions of supersonic auroral motions during polar magnetic storms
11 p1878 A69-25152
- Physiopathological reactions of humans exposed to infrasonic vibrations applied via auricular canal, observing cardiac and circulatory hemodynamic troubles
13 p2215 A69-28590
- Infrasonic waves identified with supersonic auroral electrojets crossing zenith from northwest during substorm activity
16 p2780 A69-32303
- Saturn F-1 rocket engine as generator of infrasonic waves and magnetic fluctuations, noting ignition and cut-off signal characteristics
24 p4365 A69-43415

INGESTION [BIOLOGY]

- NT DRINKING
- NT EATING
- Electrical stimulation effect on drive specificity in lateral hypothalamus area of sated rat, suggesting fallacy in previous conclusion concerning appetite
22 p3876 A69-40269

INGESTION [ENGINES]

- Steam ingestion tests on carrier aircraft gas turbine engines, analyzing inlet pressure and temperature distortion in steam-air environment
01 p0143 A69-11062
- Real time real temperature exhaust gas reingestion and structural heating test facility for jet lift V/STOL configurations
[AIAA PAPER 69-310] 09 p1479 A69-22388
- Ingestion and flow field characteristics of interaction of two heated parallel air jets, discussing VTOL exhaust ingestion tests
[AIAA PAPER 68-79] 12 p2012 A69-26761

INGOTS

- Optimal processing parameters for producing ingots and semifinished products from corrosion resistant Ti alloys with added Mo
11 p1902 A69-24273
- Acicular crystals growth and dendrites orientation in Mo ingots prepared by electron beam and arc melting analyzed by X rays
11 p1903 A69-24538
- Macrostructure of steel, zinc and aluminum ingots using electromagnetic vibrations during crystallization, for stress relieving of welded structures
14 p2456 A69-29916

INHABITANTS

U MOUNTAIN INHABITANTS

INHALATION

U RESPIRATION

INHIBITION [PSYCHOLOGY]

- Paradoxical inhibition negative feedback principle in oscillatory systems, using mathematical model of nerve membrane
23 p4112 A69-42444

INHIBITORS

- NT WEAR INHIBITORS
- Glycolysis rate role in regulation of substrate inhibition of dehydrogenases
01 p0015 A69-10931
- Aluminum corrosion and inhibition mechanisms in ethylene glycol/water solutions, using controlled powder immersion tests
02 p0265 A69-11895
- Flame inhibition with electron attachment observed using halogenated hydrocarbons
06 p1034 A69-17926
- Amino acid biosynthesis control in microorganisms by end product /feedback/ inhibition of enzyme action
06 p0876 A69-18238
- Burning velocity inhibitors effects on hydrocarbon-oxygen-nitrogen mixtures ignition temperature, reporting data on 20 additives at ambient temperature and pressure
[WSCIPAPER 69-14] 16 p2831 A69-32352

INHOMOGENEITY

- Basic equations for optimum inhomogeneity in pressure vessels of maximum rigidity derived, using thick walled spherical shell
01 p0167 A69-10326
- Spherical shell pressure vessels investigated for optimum inhomogeneity and rigidity using Lagrange polynomials
01 p0167 A69-10327
- Surface charge distribution in silicon p-n junctions noting luminescence of microplasmas and inhomogeneous properties
02 p0294 A69-11629
- Nonlinear mode interactions in spatially inhomogeneous laser, analyzing suppression, phase locking and linear coupling among cavity modes
02 p0258 A69-12632
- Plastically twisted prismatic bars with transverse discontinuous inhomogeneity, using sand hill analogy to determine stress field and limiting torque
03 p0524 A69-13021
- Book on continuum theory of inhomogeneities in simple bodies
05 p0833 A69-15727
- Inhomogeneities in materially uniform simple bodies described in terms of third order tensor field, treating contorted anisotropy
05 p0833 A69-15728
- Cauchy equation derived, giving rise to definite differential equation for materially uniform elastic bodies with inhomogeneities
05 p0834 A69-15730
- Nonuniform distribution and concentration of doping materials in semiconductors determined by measuring optical reflection coefficient
05 p0764 A69-16664
- Homogeneous linear systems conditions for asymptotic growth of solutions of nonhomogeneous linear differential equations system
08 p1342 A69-20348
- Inhomogeneity distribution of carrier concentration and electrovoltaic effect in GaAs devices analyzed by scanning electron microscope
09 p1557 A69-21746
- Mass spectrometric analysis of silicon carbide for inhomogeneity in sample, noting metallic impurities
09 p1448 A69-22313
- Bolometric luminosity-red shift relations of Friedmann dust universes corrected for inhomogeneities, using locally inhomogeneous Swiss cheese models
09 p1605 A69-22411
- Elasticity theory upper and lower bounds for two and three dimensional inhomogeneous problems and applications to plates
10 p1794 A69-22889
- Radio astronomical investigations of small scale inhomogeneity motion and dimensions in interplanetary plasma, using observations of 3C 48 scintillations in 1967
10 p1782 A69-23711
- Antiplane strain model for describing cracks and dislocation arrays within circular cylindrical inhomogeneity surrounded by elastic material
10 p1803 A69-24031
- Electrical conductivity of impurity semiconductors containing variable current carrier concentrations, discussing current-voltage characteristics
11 p1937 A69-24909

Thermodynamic properties of materials in critical region, discussing inhomogeneity

- 11 p2003 A69-25440
- Inhomogeneous permittivity and boundary effects influence on electric fields of laser with open cavity containing inhomogeneous active medium
12 p2110 A69-26908
- Mixed state of type 2 superconductors, stressing alloying elements effects in solid solution and structural inhomogeneities
12 p2145 A69-27119
- Elastic-plastic bending of rectangular plates with asymmetrically inhomogeneous material in plastic range, using modified Ritz method
14 p2533 A69-28984
- Drift of F 2 layer inhomogeneities compared for IGY and IQSY
14 p2443 A69-29866
- Similarity and correlation methods for drift of ionospheric inhomogeneities in Antarctica
14 p2444 A69-29867
- Ionospheric sporadic E layer inhomogeneities drift, discussing altitude dependence of velocity and direction
14 p2444 A69-29869
- Inhomogeneity effects on elastic waves generated by impulsive loading of surface using asymptotic method, discussing high stress intensification regions
16 p2873 A69-32157
- Dyadic Green function technique extended to problems of electromagnetic scattering in inhomogeneous media with spherical symmetry
17 p2924 A69-33837
- E layer inhomogeneities analysis concerning drift, chaotic processes, statistical parameters and reliability of data processing
17 p2962 A69-33896
- Laser emission divergence reduced by compensating optical inhomogeneity of active elements with prismatic reflector in resonator
17 p2983 A69-33970
- Chromospheric inhomogeneities rapid changing properties observable in H and K lines above sunspot umbrae
18 p3204 A69-35389
- Laser emission during disturbed quasi-equilibrium, considering emission spatial inhomogeneity due to arbitrary radiative transitions
19 p3333 A69-35876
- Book on antennas in inhomogeneous media, discussing impedances for dielectric loading, reentry, ionosphere and buried environment, wire antennas in free space, etc
19 p3268 A69-36150
- Twisting of spherical shell of nonhomogeneous isotropic material with variable shear modulus and inner surface assumed to be stress free
20 p3619 A69-36911
- Semiinverse method for elastic nonhomogeneity problems, considering case of seismic wave propagation
20 p3624 A69-37589
- Ground station equipment for studying motions and structure of ionospheric inhomogeneities by combined space-frequency diversity reception, noting altitude dependence of ionospheric parameters
20 p3510 A69-37693
- Resolving power and field of view relations of holographic device for images recording through inhomogeneous atmosphere
20 p3540 A69-37728
- Layer model of random discrete inhomogeneities used to derive harmonic wave one dimensional scattering field and mean square of field
21 p3673 A69-38993
- Harrison primordial inhomogeneity postulate concerning baryon numbers distribution in universe, precluding possibility of considering cosmic rays bulk as universal
21 p3810 A69-39469
- Amplification saturation in spatially inhomogeneous laser field, relating power to active medium and resonator parameters
21 p3740 A69-39549
- Inhomogeneities effect on thermoelectric power and thermal efficiency of semiconductor thermocouple with constant forbidden band width
22 p3994 A69-40933
- Rectangular waveguide with inhomogeneity represented by half space dielectric filling with boundary causing polarization, obtaining reflection elimination or minimization reflection
23 p4125 A69-42047

- Holographic technique for reduction of image distortion during penetration through inhomogeneous medium 24 p4314 A69-42975
- Stress wave propagation in nonhomogeneous elastic media, considering curvilinear characteristics transformation into equal slope straight lines by change of independent variable 24 p4403 A69-43574

INITIAL VALUE PROBLEMS

U BOUNDARY VALUE PROBLEMS

INITIATION

- Microcracking susceptibility studies of Inconel 718 weld heat affected zones, noting hot ductibility, weld circle patch and fillerless fusion welding tests 11 p1905 A69-24933

INITIATORS [EXPLOSIVES]

NT DETONATORS

NT PRIMERS [EXPLOSIVES]

- Capacitance-voltage relationships for PETN initiation by various diameter gold exploding bridgewires, noting optimum capacitance dependence on energy transfer efficiency 01 p0141 A69-10679

- Nondestructive testing of quality of electroexplosive devices based on determination of heat flow between bridge wire and surroundings 04 p0607 A69-14973

- Insensitive explosive trigger or initiator consisting of metal/metal oxide powder with low shock sensitivity and high thermal stability 04 p0646 A69-15300

- Igniferous materials for electrical initiation of explosive in extreme conditions, considering nitrophenol salts and pyrotechnics 10 p1750 A69-23015

- Initiation of priming explosives by electrons, photons, electrical discharges and laser radiation 10 p1751 A69-23017

- Electroexplosive devices protection by nonconducting composition against premature ignition by RFI in spacecraft environment, noting Apollo Standard Initiators 10 p1751 A69-23018

- Safety requirements of test ranges, considering RF hazards to electroexplosive devices 10 p1751 A69-23019

- Electroexplosive devices design for extreme conditions, considering igniter, delay and functioning systems 10 p1751 A69-23020

- Electroexplosive element design for safe reliable devices in liftoff and space environment, considering stray electric currents, RF fields and electrostatic discharges 10 p1752 A69-23022

- ELDO Europa 1 Fairings Jettisoning System and explosive devices, discussing heat shield structure and safety regulations 10 p1635 A69-23027

- Exploding bridgewire /EBW/ systems compared to hot-wire initiators for Mars space probe 17 p2905 A69-34108

INJECTION

- NT CARRIER INJECTION
- NT FLUID INJECTION
- NT FUEL INJECTION
- NT GAS INJECTION
- NT ION INJECTION
- NT LIQUID INJECTION
- NT SECONDARY INJECTION
- NT WATER INJECTION

- Injection or suction at disk surface, noting effects on heat and mass transfer in laminar flow about rotating disk 06 p1029 A69-17002

- Unsteady boundary layer with distributed injection or suction on porous plate, determining acceleration and flow parameter functions from velocity profiles 21 p3692 A69-38609

INJECTION CARBURATORS

U FUEL INJECTION

INJECTION GUIDANCE

- Apollo translunar injection burn simulation, analyzing polynomial solutions of optimum geometry and characteristic velocity [AAS PAPER 68-150] 21 p3820 A69-39225

- Parking orbit optimal orientation for minimal impulsive maneuvers total velocity increment in three dimensional capture-escape mission [AIAA PAPER 69-918] 21 p3808 A69-39347

- Rendezvous, intercept and injection optimal control laws derived from inhomogeneous linear differential equations with quadratic performance index 23 p4224 A69-41921

- Atlas/Centaur/Surveyor flights guidance accuracy, discussing postflight analysis of injection errors due to hardware, software and propulsion system [AIAA PAPER 68-842] 24 p4348 A69-43239

INJECTION LASERS

- Maximum power efficiency of pulsed injection laser with Fabry-Perot cavity expressed in terms of two dimensionless geometric variables 01 p0089 A69-10119

- P-n junction cut-off current density and ohmic losses effect on injection laser efficiency determined by using quality parameter 01 p0091 A69-10883

- Continuous wave GaAs injection lasers operation at high temperatures shown possible by using available threshold current densities with suitable heat sink materials 02 p0255 A69-11710

- Injection laser emission from gallium arsenide base films grown epitaxially from gas phase in moist hydrogen atmosphere 02 p0255 A69-11879

- GaAs injection lasers noting spectral function, I-V characteristics and relations among lasing wavelength, threshold current density and impurity concentration 02 p0256 A69-11993

- GaAs injection laser transmission losses and threshold current density under influence of external optical coupling with spherical mirror 02 p0260 A69-12687

- Clamp type diode holders for obtaining CW coherent emission from gallium arsenide injection lasers 03 p0435 A69-12985

- Uniaxial pressure applied to p-n junction of GaAs injection laser, discussing effects on threshold current and wavelength 03 p0441 A69-13848

- Gallium arsenide injection lasers properties, analyzing band structure, optical transitions, recombination lifetimes, conduction band states, optical gain, etc 05 p0772 A69-16228

- GaAs injection diode laser cooled by closed cycle gas refrigeration system, noting time required to reach laser operating temperature 05 p0777 A69-16793

- Memory effect in injection lasers output characteristics, noting anomalous increases in pulsed emission intensity with increasing current-pulse repetition rate 07 p1147 A69-18542

- Self modulated radiation modes of Te-doped n-type InAs injection lasers 07 p1148 A69-18685

- Gradual output degradation mechanism in GaAs injection lasers, attributing internal radiative quantum efficiency reduction to nonradiative recombination centers formation 07 p1148 A69-18857

- Dynamics of injection lasers, discussing picosecond pulse generation [IEEE PAPER O-1] 07 p1153 A69-19071

- GaAs lasers radiation power hysteresis manifested in generating starts and stops at different injection current levels 07 p1157 A69-19593

- Semiconductor laser with isolated diodes in cavity, noting watt-ampere characteristics during nonuniform excitation and threshold curves 08 p1326 A69-20539

- Microwave modulation of GaAs injection laser radiation, using Zaleskii recording method and liquid nitrogen to cool laser diode 12 p2105 A69-26031

- P-n junction cut-off current density and ohmic losses effect on injection laser efficiency determined by using quality parameter 12 p2109 A69-26647

- Close confinement GaAs p-n junction lasers with reduced optical loss at room temperature 14 p2457 A69-28893

- Gallium arsenide injection laser for communication systems with pulse frequency modulation, noting power output dependence on crystal quality 14 p2459 A69-29349

- Efficient extinction in optically coupled GaAs injection lasers achieved by selecting quenching radiation frequency close to operating frequency 15 p2633 A69-30059

- Injection semiconductor lasers emission characteristics, discussing gallium arsenide diodes, nonlinear losses in pulsed mode, laser interactions, etc 16 p2796 A69-31949

- GaAs dual diode laser structure used to give electrical control of laser threshold and permit study of optical flux and current density role 17 p2980 A69-32959

- Monograph on GaAs injection laser electrical and optical properties during crystallization out of solution covering principle, p-n junction fabrication, I-V characteristics, doping effect, etc 17 p2982 A69-33571

- Amplitude and output spectra of optical quantum amplifier based on GaAs injection laser, noting values in traveling wave and regeneration mode 19 p3336 A69-36348

- Injection lasers threshold characteristics, studying temperature and doping level effects on current density and radiation energy 19 p3337 A69-36527

- Injection lasers external quantum efficiency, stimulated and spontaneous emission and photoluminescence measurements 19 p3337 A69-36528

- Magnetic field effects on emission line shift, threshold current and power output of GaAs injection laser, discussing spontaneous radiation in magnetic field 19 p3387 A69-36529

- GaAs p-n injection laser output at 4.2 K in strong transverse magnetic field, deducing effective mass and g-factor from stimulated emission peak shift 19 p3387 A69-36530

- Coherent emission from injection electron-hole plasma in indium antimonide without magnetic field, noting roles of crystal thickness and pinch effects 19 p3387 A69-36532

- Radiation dynamics of GaAs injection semiconductor laser, plotting spike period dependence on resonator length 19 p3337 A69-36535

- GaAs-P injection laser time delay measured from start of current flow in p-n junction diode, studying effects of memory, temperature and reverse bias 19 p3387 A69-36536

- Indium arsenide injection laser observed for self modulation at LF modes, discussing nonMarkovian character of photon density relaxation 19 p3338 A69-36537

- Stimulated emission at current pulse end ascribed to external resonator turn-on time delay effects with GaAs injection lasers at room temperature 21 p3734 A69-38408

- Memory effect in injection lasers output characteristics, noting anomalous increases in pulsed emission intensity with increasing current-pulse repetition rate 21 p3735 A69-38694

- GaAs injection laser properties calculation with doping levels for exponential band tails formation, deriving threshold currents, lasing frequencies, I-V characteristics, etc 22 p3959 A69-40012

- Emission dynamics and fine pulse structure in GaAs injection lasers, determining pulse duration and amplitude dependence on current and resonator length 22 p3963 A69-40603

- Amplification coefficient, luminescence power and spacing between Fermi quasi-levels in GaAs diode injection lasers, using spectral absorption dependence 22 p3965 A69-40801

- Intensity of optical pulses from CW GaAs injection lasers observed with fast sampling techniques 23 p4173 A69-41500

- Oscillographic recording of GaAs laser ultrashort radiation pulses, using isolated injection regions and semiconductor photodiode as photoelectric converter 24 p4329 A69-43740

INJECTORS

NT VORTEX INJECTORS

- Condensing injector cycles internal efficiency for high velocity liquid metal flows in closed cycle MHD power plants 02 p0194 A69-11582

- Injector vaporizer performance in liquid metal MHD system, using model for total and static pressure distribution 06 p0871 A69-17918

- Injector design based on MHD injector components performance, establishing minimum diffuser nozzle area 06 p0872 A69-17920

- Liquid metal MHD systems efficiency when operating with pressure jump in diffuser nozzle 06 p0872 A69-17921

- Wet steam injector power losses in nozzle as function of humidity, noting compensation of nozzle throat diameter and fluid flow rates 13 p2246 A69-27490

- Oxidizer injector face configuration for high power variable thrust rocket engine using hydrogen/oxygen propellant 16 p2835 A69-31749

Oxygen difluoride-diborane propellant injector and chamber design criteria applied to unmanned spacecraft rocket engine development
[AIAA PAPER 69-508] 16 p2839 A69-32671

Fluorine injectors for main tank injection of space vehicle liquid hydrogen tank, including study of hypergolicity and reaction product freezing
[AIAA PAPER 69-528] 16 p2767 A69-32717

Electroforming methods in design and fabrication of liquid propellant rocket motor injectors and composite thrust chambers
[AIAA PAPER 69-583] 16 p2794 A69-32757

Space storable hydrocarbon fuel blended FLOX propellant performance with coaxial injector including characteristic velocity, chamber geometry, pressure and heat flux distribution
[AIAA PAPER 69-507] 16 p2835 A69-32772

Rocket performance optimization by extending injector design technology to high performance injectors for space storable FLOX/LPG propellants
[AIAA PAPER 69-506] 16 p2846 A69-32778

Liquid propellant rocket injectors response to HF chamber pressure oscillations using one dimensional model
21 p3786 A69-39235

INJUN SATELLITES

Injun 5 satellite VLF electric and magnetic field observations, discussing antenna operation, Poynting flux and noise band measurements
22 p3938 A69-40503

INJUN 5 SATELLITE U EXPLORER 40 SATELLITE

INJURIES

NT BACK INJURIES
NT BAROTRAUMA
NT BRAIN DAMAGE
NT BURNS [INJURIES]
NT CRASH INJURIES
NT EJECTION INJURIES
NT LESIONS
NT NOISE INJURIES
NT PULMONARY LESIONS
NT RADIATION INJURIES

Head injuries evaluation in aircrew, noting motor cycle accidents
10 p1649 A69-23378

Injury stress vs acceleration specification as valid criterion for pilots subjected to high acceleration, introducing models and illustrating with ejection example
17 p2913 A69-33008

Acceleration injury noting water immersion effect on cat lung due to intense body vibration, suggesting restraint as practical solution
17 p2913 A69-33009

Air evacuation of maxilla-facially wounded persons from place of accident, noting helicopter use
24 p4270 A69-42603

INLET FLOW

Energy dissipation at rounded pipe entrance in viscous fluid, showing relation between entrance loss and radius of roundness
01 p0059 A69-10308

Engine inlet thermal antiicing analysis, detailing computer programs to determine air flow velocity, water impingement and thermal requirements
01 p0055 A69-11045

Vitiated inlet air effects on J60-P-6 turbojet engine performance at sea level for various simulated flight Mach numbers
01 p0143 A69-11063

Confined jet mixing region at entrance of tubular reactor, discussing mass and momentum transfer, chemical conversion and effect of Reynolds number
[AICHE PAPER 25A] 04 p0586 A69-14508

Coaxial flow jet chamber flow patterns dependence on inlet gas velocity, density and length/diameter ratio
[AICHE PAPER 25B] 04 p0587 A69-14509

Entry region flow and convective heat transfer prediction in cooled vertical pipe open at both ends, considering wall temperature
05 p0845 A69-15717

Circulation, geometry and viscosity effects on speed of surge in bathtub vortex
05 p0744 A69-15718

Suction effect on incompressible flow through step expansion in circular pipe through sudden enlargement, considering inlet flow with thin boundary layer
[ASME PAPER 68-FE-11] 05 p0748 A69-16074

Inlet velocity profiles distortion effects on flow regimes and performance in two dimensional diffusers with turbulent boundary layers
[ASME PAPER 68-WA/FE-25] 05 p0698 A69-16100

Inlet conditions influence on two annular diffusers performance, using low speed tests
[ASME PAPER 68-WA/FE-38] 05 p0698 A69-16110

Conical diffuser/exit duct performance and model for estimating energy losses, discussing inlet flow and Reynolds number
[ASME PAPER 68-WA/FE-45] 05 p0698 A69-16112

Oblique shock wave propagation through two dimensional steady nonuniform incoming flow, discussing higher order theory via irrotational or rotational disturbances of arbitrary amplitude
[AIAA PAPER 69-39] 06 p0913 A69-18103

Shockload on axial intake fan leading edge of radial flow compressor, calculating flow field
08 p1251 A69-20604

Lift engine model compressor response to inlet pressure distortion to determine nature and extent of critical area of spoiling for axial flow compressors
[ASME PAPER 69-GT-29] 09 p1571 A69-22493

Incident flow in variable cross section tubes using analytic asymptotic calculation
10 p1677 A69-22897

Laminar flow heat transfer of viscous incompressible fluid in entrance region of circular tube, using nonlinear equations
10 p1809 A69-23195

Duct entrance region flow, analyzing eigenvalue problem and nonlinear transformation simplification
11 p1874 A69-25285

Ejector-diffuser performance improvement by reduction of backflow with orifice plate installed at inlet of straight diffuser duct
11 p1819 A69-25382

Finite difference method for heat transfer for developing laminar flow at inlet of circular uniformly heated and isothermal tube, determining Nusselt number
12 p2062 A69-26242

Steady state flow of viscous conducting liquid in inlet of channel with or without transverse magnetic field, emphasizing approach to Hartmann-Poiseuille patterns downstream
12 p2138 A69-26626

Exhaust gas reingestion and inlet flow distortion in V/STOL lift engines, discussing static and wind tunnel testing using fighter configuration models
[AIAA PAPER 68-78] 12 p2012 A69-26762

Aerodynamic effects of lift jet and lift fan inlets in transition flight, analyzing inlet momentum lift, inlet lip lift and drag
[AIAA PAPER 68-637] 12 p2014 A69-26767

Navier-Stokes equations of slow viscous fluid laminar flow near pipe inlet and exit with negligible mass forces, discussing velocity and pressure distribution
13 p2244 A69-27258

Diffuser inlet geometry, studying effects of straight section length on flow pattern and diffuser resistance
14 p2391 A69-29899

Inlet shape and Reynolds number effects on entrance flow development, using laser flowmeter based on Doppler effect to obtain laminar velocity profiles
15 p2589 A69-30001

Aerodynamic losses and stage efficiency in partial admission turbines, using flat bladed rotor experiments and rotors of different blade pitch
15 p2547 A69-30290

Injected gas flow nonisothermicity and transversity effects on friction, heat transfer and flow parameters at cylindrical tube inlet
15 p2592 A69-30986

Compressor surge effect on mixed compression inlet flow from numerical solution of one dimensional unsteady inviscid flow equations in variable area duct
[AIAA PAPER 69-484] 16 p2841 A69-32682

Inlet thermal boundary layer thickness effect on conical nozzle heat transfer and boundary layer determined by operating nozzle with cooled/uncooled inlet
[AIAA PAPER 69-474] 16 p2881 A69-32780

Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface
[AIAA PAPER 69-724] 17 p2952 A69-33436

Statistical analysis in inlet air flow dynamics, discussing inlet duct design and pressure variations
[AIAA PAPER 68-649] 17 p2896 A69-34020

Fueling process in internal combustion engines having fuel admission systems with different flow cross sections
19 p3393 A69-35824

Diffusion flame stability at inlet of fuel stream into oxidizer, showing ignition coordinates dependence on fuel, oxidizer and ratio of burning/flow rate
19 p3448 A69-35855

Diffuser for high performance centrifugal compressors based on discrete pipe drillings
[ASME PAPER 68-GT-38] 19 p3240 A69-36420

NonNewtonian power law fluids flow behavior in circular pipe entry region, taking into account energy loss due to viscous dissipation in boundary layer
19 p3240 A69-36472

NACA submerged intake performance at M 2.5, considering total pressure and mass flow ratios, drag coefficient and boundary layer thickness effects
19 p3242 A69-36819

Potential flow interaction effects between blade rows in axial flow compressor stage, emphasizing inlet guide vane-rotor interaction
21 p3643 A69-38439

Heat transfer in curved channel as function of inlet configurations, obtaining Nusselt number equations for thermal and mixed convection and laminar flow
21 p3850 A69-38866

Subsonic compressible flow at two dimensional inlets, analyzing field representation, boundaries, surface configuration and optimal wedge
23 p4060 A69-41915

Spanwise velocity profiles through cascades and axial flow turbomachines, analyzing loading, secondary losses and inlet conditions interacting on downstream profile
23 p4061 A69-42110

Turbulent boundary layer at inlet section of gas blown tube based on solutions of energy and momentum equations, deriving relations for inlet section length
24 p4300 A69-43079

Hydrodynamic inlet conditions effect on film boiling and near critical hydrogen heat transfer, using data from electrically heated various geometry test sections
[ASME PAPER 69-HT-27] 24 p4412 A69-43541

INLET NOZZLES

Sonic nozzle optimal profile determination with and without cylindrical throats, noting sonic line curvature importance on discharge coefficient
02 p0188 A69-12037

Pressure recovery of straight channel divergence diffusers at high inlet Mach numbers
[ASME PAPER 68-WA/FE-19] 05 p0698 A69-16095

Turbomachinery multiple pure tone noise associated with acoustic resonance of inlet cavities examined by narrow band filter tracking integer multiples of rotative speed
[ASME PAPER 69-GT-2] 09 p1572 A69-22509

Large scale axisymmetric inlet systems performance capabilities, reviewing theoretical and experimental programs
[AIAA PAPER 68-580] 17 p3022 A69-34018

INLET PRESSURE

Lift engine inlet development for XV-4B aircraft, discussing tests, pressure distortion and recovery during simulated hover and transitional flight
[AIAA PAPER 68-636] 20 p3585 A69-37150

INLETS [DEVICES]

U INTAKE SYSTEMS

INNER RADIATION BELT

Inner Van Allen belt proton dose rate and spectral charged particle environment profiles correlated, noting agreement with theoretical values
01 p0145 A69-11081

Electron flux intensities and energy spectra in inner radiation zone, noting decay constants
01 p0147 A69-11235

Cosmos satellites monitoring electrons distribution in inner radiation belt suggest intensity stability for solar activity cycle
01 p0147 A69-11309

Nonadiabatic particle losses effect on integral proton flux in inner radiation belt, discussing proton energy spectrum
06 p0921 A69-17742

Bimodal diffusion mechanism for acceleration of trapped electrons and protons in earth radiation belts, noting particle intensity profiles and energy spectra
09 p1576 A69-21708

Inner radiation zone including data on electrons, protons and heavier particles and results from high altitude nuclear tests
12 p2152 A69-27144

Low altitude trapped protons in inner radiation belt during solar minimum period, using emulsion detectors on polar-orbiting satellite
18 p3187 A69-34944

- RF synchrotron emission from electrons trapped in earth magnetic field observed by satellite, using magnetospheric environment model
18 p3128 A69-34948
- Cosmic ray albedo neutron decay /CRAND/ source for trapped protons, showing disagreement with intensities in inner zone measured on OV1 2 spacecraft
22 p4005 A69-40512
- Cosmos 137 proton spectra data obtained in inner radiation belt agreeing with Relay 1 data
22 p4007 A69-41093

INOCULUM

- Inoculum dose effect on complement-fixing antigen production, heat lability and separation from BHK-21 cells infected with lymphocytic choriomeningitis virus
24 p4263 A69-43336

INORGANIC COATINGS

- NT ANODIC COATINGS
NT CERAMIC COATINGS
- Cleaning, deoxidizing and chromating process effects on chromate coated Al, using salt spray corrosion tests
19 p3321 A69-35570
- Inorganic heat resistant coatings high temperature mechanical tests noting corrosion, safety factors and rigidity after heating and temperature gradients
20 p3538 A69-37360
- Zr and Nb carbide coatings on Nb, Ta Mo and W, investigating methods for coating and base metal combinations
20 p3560 A69-37362

INORGANIC COMPOUNDS

- NT AMMONIA
NT LIQUID AMMONIA
- Refractory metal oxidation protection by inorganic compounds at high temperatures, discussing protective mechanisms
09 p1526 A69-22322
- Book on inorganic high energy oxidizers covering synthesis, structure and properties of fluoronitrogen, fluorine, fluorohalogen and oxygen compounds
12 p2146 A69-25824
- Life origin and organic-inorganic systems, emphasizing protein colloids-mineral salts interactions at protocell stage
14 p2408 A69-29632
- Radiation effect on inorganic solids isothermal decomposition induction period, deriving equations for conditions representing various kinetics combinations during irradiation [WSCIPAPER 69-21]
16 p2832 A69-32359
- Hydroxylamine complexes of inorganic salts preparation and characterization, including hygroscopic properties, chemical bonds, etc
17 p2917 A69-33657
- Liquid filter cells design with emphasis on filters usable for inorganic and organic liquids
21 p3770 A69-38679

INORGANIC NITRATES

- U AMMONIUM NITRATES
U SILVER NITRATES

INORGANIC PEROXIDES

- U HYDROGEN PEROXIDE

INORGANIC SULFIDES

- U CADMIUM SULFIDES
U COPPER SULFIDES
U HYDROGEN SULFIDE
U INDIUM SULFIDES
U LEAD SULFIDES
U MOLYBDENUM DISULFIDES
U MOLYBDENUM SULFIDES
U WURTZITE
U ZINC SULFIDES

INPUT

- Input transistor performance analysis in Schmitt trigger circuit, considering role of hysteresis
01 p0039 A69-10170
- End correction for input admittance of electrically thick monopole antenna with arbitrary radius driven from coaxial line
02 p0219 A69-12346
- Input signal piecewise linear approximation for investigating response of dynamic automatic control systems to nonstandard input signal
14 p2426 A69-29143

INPUT/OUTPUT ROUTINES

- Aerodynamic research for rotary wing and V/STOL aircraft, suggesting analytical techniques with software packages designed around standard input/output formats
23 p4146 A69-41373
- Telological systems behavior modeling based on input, output, goals, operation duration, etc
23 p4134 A69-42059

- Stewart-Hamilton theorems for total input-output analysis of body cholesterol in man
24 p4259 A69-42639

INSECTICIDES

- U DICHLORODIPHENYLTRICHLOROETHANE
U URETHANES

INSECTS

- NT BEETLES
NT DROSOPHILA
NT PUPA

- Drosophila melanogaster flies reproductive behavior and Tradescantia paludosa chromosome patterns after weightlessness onboard Vostok 3 and 4
07 p1063 A69-18597

- Radar application to meteorology, entomology and ornithology, discussing clear air turbulence detection and flight tracking of birds and insects
12 p2034 A69-27004

- Depolarization degree of angel echo signals measured by radar station, indicating insects and other foreign particles in atmosphere as reflection sources
16 p2779 A69-32274

- Angel sources rate of motion observed at automatic tracking coherent pulse station, obtaining coincidence with wind and insect velocities
16 p2779 A69-32276

- Insects mutational responses to space flight and associated radiation on biosatellite 2 compared with ground based controls
20 p3476 A69-37618

- Nervous system relations to insect flight musculature of lift and thrust mechanism
21 p3651 A69-38780

- Virulike particles in fat body cells and oenocytes of Drosophila melanogaster imagoes, in glial cells of cephalic ganglionic center of flies and in gamma radiated cells
23 p4091 A69-42021

INSENSITIVITY

- U SENSITIVITY

INSERTION

- Low thrust guidance for multirevolution trajectory required for earth parking orbit transfer to parabolic orbit insertion, noting advantages over high thrust scheme [AAS PAPER 69-403]
24 p4379 A69-42832

INSERTION LOSS

- Radome material insertion loss measurement by radiometric method noting error analysis
02 p0251 A69-12434
- Reciprocal latching ferrite phase shifters application to lightweight scanned phased arrays, noting quasi-circularly polarized modes with lowest insertion loss
04 p0572 A69-14320

- Peak acoustic attenuation frequency shifts and peak power insertion losses in air flow ducts related to air specific weight changes
07 p1117 A69-19700

- 360 degree varactor linear phase modulator, analyzing impedance matching, insertion loss, tuning design and serrodyne application
16 p2756 A69-31577

- Dual channel waveguide insertion loss test set for calibrations at 90 GHz in radio astronomy and communication systems, using sprayed thermistor mount
16 p2760 A69-31945

- Channel dropping filter for millimeter wave in low loss circular waveguide for overland telecommunications in bandwidth over 10 GHz
17 p2936 A69-33032

- Semiconductor phase shifting for inertialess antenna scanning at microwave to millimeter wavelengths, describing diode construction with emphasis on solving insertion loss [ONERA-TP-712]
23 p4143 A69-42519

INSERTS

- NT NOZZLE INSERTS

- Stresses due to nucleus of thermoelastic strain in infinite elastic solid with two rigid circular inserts
16 p2872 A69-31906

INSOLATION

- Daily insolation observations at Blue Hill, Massachusetts, correlated by month with observations of temperature, snow cover, winds, sunshine, sky cover, pressure and precipitation
01 p0066 A69-10862
- Earth surface temperature change quantitative determination due to Milankovitch insolation variations
03 p0426 A69-14232

INSPECTION

- NT INFRARED INSPECTION
NT X RAY INSPECTION

- Imaging systems for weld inspection, discussing physical factors and selection of radiation
07 p1139 A69-18794

- High pressure storage vessels for gaseous hydrogen: discussing failure, manufacturing controls and access for internal nondestructive inspection [ASM PAPER D8-14.1]
07 p1143 A69-19664

- Passenger aircraft flight readiness verification: discussing flaw and corrosion detection and rivet joint inspection methods
11 p1822 A69-24524

- Remote disassembly and inspection methods for evaluating NRX-AG reactor components performance [AIAA PAPER 69-511]
16 p2810 A69-32744

- Radioactive Kr as gaseous penetrant for nondestructive test inspections, noting high sensitivity
19 p3322 A69-35574

- Holography for engineering metrology, discussing interferometry, pattern interpretation, inspection techniques, etc
22 p3945 A69-40233

INSTABILITY

- U STABILITY

INSTALLATION

- U INSTALLING

INSTALLING

- Aerodynamic characteristics of power plant installation, discussing nacelle design from viewpoint of aircraft performance and economic efficiency
17 p2898 A69-33215

- Clamping and sealing fastener for single direction installation consisting of pin, collar and sealing collar with insert
22 p3957 A69-40831

INSTITUTIONS

- U BUREAU [ORGANIZATIONS]

INSTRUCTIONS

- U EDUCATION

INSTRUCTORS

- Witkin Rod and Frame Testing of pilots and engineers requiring greater field independence in pilots: discussing applications to pilot instructor selection
12 p2023 A69-26556

INSTRUMENT APPROACH

- Multifunction helicopter rotor blade radar for navigation, IFR approach and fire control, including flight test results [AHS PAPER 315]
17 p2920 A69-33535
- All-weather landing in civil air operations, discussing ground/air systems in tracking, visual reference and aircraft performance required for safe landing capability
20 p3574 A69-38119

INSTRUMENT COMPENSATION

- NT TEMPERATURE COMPENSATION

- Automatic control systems correction by compensation for nonlinear statistical dynamic characteristics with aid of nonlinear devices
01 p0053 A69-10801

- Solar X ray flare absolute flux correction, taking into account geometric obliquity factor variation with angles between satellite spin axis and satellite-sun line
01 p0147 A69-11242

- Compensation method for measurement of mismatched noise source effective temperature independent of reflection coefficient, noting error analysis
02 p0210 A69-12441

- Multiple beam electronically steerable retrodirective antenna array with automatic inertialess compensation for altitude or beacon location
02 p0212 A69-12816

- Optical pumping distortion compensation in glass laser rod by changing coolant temperature, obtaining mode locked laser pulses
04 p0609 A69-14286

- Optimal compensating loop in stabilization circuit of uniaxial gyrostabilizer
04 p0597 A69-14604

- Dry friction stabilizing effect on motion of astatic gyroscope with quasi-elastic compensation
04 p0597 A69-14605

- Radiation compensating thermocouple for gas temperature measurement, noting advantage over single thermocouples
04 p0598 A69-14916

- Satellite-borne auroral particle spectrometer calibration to minimize uncertainty in measuring absolute particle flux of electrons and protons
04 p0599 A69-15022

- Low DC current measurement on board satellite, noting absence of elaborate compensation
04 p0602 A69-15399

Automatic compensation of unwanted signal level fluctuation in measuring setups including microwave generators and detectors

06 p0903 A69-17489

Calibration curve for constant temperature hot-wire anemometer, taking into account high wire temperature and gas pressure effects

06 p0930 A69-18218

Sky background light automatic compensation in stellar photography, using single or double channel photometer

08 p1313 A69-20247

Linearization unit for compensating hyperbolic characteristic of capacitive displacement sensor used for contactless displacement measurement

08 p1317 A69-20879

Specifying electrical isolation and error signals suppression due to presence of common mode voltage in passive signal handling and conditioning equipment

10 p1654 A69-23272

Optimum calibration interval program for determining test equipment calibration frequencies on basis of mean time between failures and acceptable reliability levels

10 p1699 A69-23288

Spectral baseline instability correction for time of flight mass spectrometer operating at source pressures up to one torr

10 p1693 A69-23345

Constant velocity moving object influence on indications of vertical gyroscope having electromagnetic compensation with residual imbalance of sensor element

11 p1881 A69-24561

Multiple frame camera with image compensation as ballistic phototheodolite

12 p2084 A69-26153

Comparative calibration characteristics determination, discussing absolute measurements method for thermal conductivity parameters

12 p2091 A69-26363

Bandwidth potential increase of parametric amplifier obtained by adding active filter elements to signal circuit, noting satellite communication band

12 p2039 A69-26380

Solar spectroscopic techniques, discussing instrumentation problems affecting photosphere line spectra, SNR in absorption spectra and near IR spectra

13 p2341 A69-27588

Electrical properties of p-type indium antimonide, noting effects of deep level compensation on ϵ_v values

13 p2318 A69-27895

Ballistic deviations limits for aircraft vertical gyroscope taking into account aircraft vertical movements, using compensation in system

14 p2445 A69-28899

Direct phase measuring and measured phase compensating microwave devices designed for plasma diagnostics applications

14 p2452 A69-29804

Laser emission divergence reduced by compensating optical inhomogeneity of active elements with prismatic reflector in resonator

17 p2983 A69-33970

Buffer shift register with feedback control during tape recorder playback to obtain variable delay to compensate for recorder time base error

19 p3312 A69-36284

Airborne imaging radar motion compensation and sensing problems concerning perturbed signal correction, discussing spatial sensitivity measures and constraints

20 p3490 A69-37645

Light sources with uniform variable luminance field designed for calibrating cameras used in space exploration

21 p3726 A69-39580

Isoclinic angle errors effects on photoelastic fringe order measurements accuracy

22 p3945 A69-40082

Calcium K line strengths in A stars measured by narrow band spectrometer compensated for seeing and transparency variations

22 p4015 A69-40154

Screw-nut feeder and adjustor systems with compensation for clearance and wear of cutting tools, determining efficiency for conversion of rotary to translational motion

23 p4168 A69-41414

Accelerated motion influence on onboard vertical gyro with design based on free astatic gyro with electromagnetic compensation

23 p4163 A69-41553

Wideband telemetry recording error compensator for reducing flutter and interchannel time-base error in magnetic tape instrumentation

23 p4137 A69-41775

Surface accuracy of large diameter radio telescopes maintained by uncoupling reflector surface from backup structure, using active compensation

23 p4149 A69-42136

RMS surface error compensation in radome-housed Cassegrain parabolic antenna including weight analysis

23 p4150 A69-42137

Linear motion blur compensation technique in photographic recordings by reconstruction of sharp image from hologram

24 p4314 A69-42972

INSTRUMENT ERRORS

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influenced by appearance of thermal noise

01 p0152 A69-10578

Phase ionosonde cost, possibilities and errors

01 p0071 A69-11163

Solid body automatic orientation, discussing data units for angular error and angular velocity

-01 p0122 A69-11302

Geomagnetic field H and Z components measured by proton magnetometer, applying supplementary field method for error correction

02 p0238 A69-11675

Rubidium self oscillating magnetometer long term stability, noting changes affecting accuracy and sensitivity

02 p0250 A69-12394

Mismatched errors associated with Y factor power ratio measurement effect on microwave noise-temperature calibrations

02 p0211 A69-12442

VOR path course errors, emphasizing effects of propagation and receiver processing

03 p0392 A69-13245

Instrument and rounding-off errors of aircraft computers as function of digital network dimensions

04 p0563 A69-14491

Radiation compensating thermocouple for gas temperature measurement, noting advantage over single thermocouples

04 p0598 A69-14916

Evaluation tests of fixed frequency variable tension vibroscope for filaments and wires, noting instrument errors and corrections

04 p0599 A69-15018

Errors in amplitudes and phases recorded by earth tide recording equipment determined, using special multiflex galvanometer

04 p0601 A69-15305

Strapdown gyros in back to back connection for reduction of component cross coupling errors

04 p0603 A69-15473

Tensiometric aerodynamic balances in great velocity ranges, discussing measurements, elastic elements and tensiometric balance construction and measuring errors nature

05 p0762 A69-15922

Expressions for calculating filtering errors resulting from insufficient information about useful signal and noise characteristics

05 p0740 A69-16668

Error origin and control in high gain operational amplifier in time differentiation of voltage signal used for photoemission studies

06 p0897 A69-17700

Upper wind observation and computation accuracy, comparing radar and slide rule instrument errors

06 p0950 A69-17788

Automatic remotely operated sodium D line reversal temperature measuring apparatus, analyzing systematic errors

06 p1035 A69-17932

Nonstationary aerodynamic load for harmonically oscillating body in fluid flow with constant mean velocity measured, determining errors as functions of system parameters

07 p1050 A69-18752

Root mean square time delay error with respect to playback time and autocorrelation function of tape recorded sine wave for studying jitter spectra

07 p1132 A69-18827

Boresight error in missile radome-antenna combination due to reflection and surface wave effects

07 p1111 A69-19536

Noise-signal receiver amplitude-limitation effect on noise measurement in presence of pulsed interference

07 p1088 A69-19754

Phase error and amplitude and phase modulation in aircraft VOR omni receiver in vicinity of reflecting objects, noting asymmetrical filter effect

08 p1271 A69-19863

Pointing calibration of Haystack parabolic antenna by using radiometric measurements of cosmic ray sources

08 p1281 A69-20032

Coincidence error between star image and planet edge for entrance pupil and telescope magnification

08 p1314 A69-20383

Radio interferometer antenna array spatial characteristics obtained as function of geographical coordinates of site for reducing observation errors

08 p1314 A69-20434

Error analysis of high resolution balloon-borne temperature sensor and comparison of temperature data with simultaneous rawinsonde measurements

09 p1494 A69-21642

Microwave interferometer circuits errors, considering interferometers with phase detector, logic counting circuits, frequency conversion and amplitude modulation

09 p1496 A69-22029

Refraction errors in plasma density measurement by microwave interferometry

09 p1496 A69-22031

Operational errors of floating gyroscopes with hydrostatic unloading of bearings, establishing eccentricity tolerances, axes misalignment and temperature field nonuniformity

09 p1497 A69-22103

Kinematics of vertical gyroscope mounted in additional servo frame, determining kinematic errors due to rotor axis deviation

09 p1498 A69-22108

Gyroscope error due to axial play of inner gimbal of Cardan mounting during base circular vibrations, noting axial clearance reduction

09 p1498 A69-22110

Calibration for instrument systems including strain gages, piezoelectric, thermoelectric and thermoresistive transducers

10 p1691 A69-23229

Noise in instrumentation systems, considering coupling and current noise source and reduction by isolation and filtering

10 p1691 A69-23231

Photogrammetry for three dimensional geodesy, discussing satellite triangular methods, refraction anomalies, error corrections, etc

10 p1682 A69-23390

Algorithm for determining readings dispersion during cosmic ray recording, considering cosmic rays variability, statistical nature and instrument errors

10 p1770 A69-23906

Satellite mounted radiometers for determining albedo variations, using Fredholm equation with allowance for instrument errors

10 p1689 A69-23969

Nonpolar latitude variations due to observation errors, discussing instrumental, computational and meteorological influence, particularly refraction resulting from climatic conditions

11 p1952 A69-24257

HF measurements by phase and amplification control of signal in impulse oscillography, noting accuracy in nanosecond range and signal distortion

11 p1880 A69-24541

Inertial navigation systems error analysis based on method of state variables

11 p1914 A69-25434

Optimal scale factor selection to ensure minimum error variance in signal detection against random noise background for input limited range of measuring instrument

12 p2079 A69-25966

Multielectrode plasma probe with potential negative with respect to plasma, noting effect of microoptical features of probe on accuracy of I-V measurements

12 p2138 A69-26538

Instrument error analysis for spacecraft orientation and positioning near planet from planet disk observations

13 p2260 A69-27695

Refraction error in measurements with simple and radar interferometers, considering atmospheric effect

13 p2221 A69-27961

Ferrite parameters measurement in alternating fields based on continuous analysis of magnetic, magnetizing and measuring circuits for assessing errors

13 p2320 A69-27996

Plasma microwave interferometry error due to refraction and beam displacement at receiving antenna aperture
13 p2312 A69-28113

Ionization calorimeter energy measurement systematic errors
13 p2331 A69-28394

Geomagnetic field H and Z components measured by proton magnetometer, applying supplementary field method for error correction
13 p2257 A69-28706

Directional gyroscope with interframe correlation, discussing errors during object pitching and banking
14 p2446 A69-28923

Electrolytic vertical indicators response errors, discussing nonlinear properties of transducer steady state characteristics
14 p2446 A69-28925

Atmospheric multifrequency probing accuracy limitation imposed by irregularities based on scatter theory
14 p2449 A69-29535

Dynamic instrumental errors of quasi-steady state mechanical meters approximated by graph analytical method
14 p2451 A69-29747

Instrumental accuracy of discrete filter during measurement of initial phase of signal dependent on phase structure
15 p2574 A69-30139

Calibration of interference measuring instruments, stressing input impedance calibration of field intensity meters
15 p2577 A69-30375

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influences by appearance of thermal noise
15 p2691 A69-30748

Barometric altimeters development, discussing servo and three pointer types, accuracy, Central Air Data Computer repeater function and future trends
15 p2610 A69-30859

Reflecting or reradiating obstacle proximity as cause of siting errors in azimuth radio measurements, discussing omnidirectional obstacles effect
15 p2651 A69-31090

Thermocouple probe measurement error evaluation by parallel plate analytical model
16 p2789 A69-31903

Piloting errors due to false instrument readings during turbulent atmosphere flight
16 p2734 A69-32007

Azimuth error from observations of circumpolar stars at greatest elongation using transit instrument
17 p3028 A69-32878

Differences in latitude readings obtained with two zenith telescopes, showing Pearson distribution of type VII and influence of observation conditions
17 p2959 A69-32879

Photomicroscope film plane inclination adjusted to improve circle readings measurement, noting instrument errors role in star declinations errors
17 p2970 A69-32881

Contact thermocouples to measure temperature of wall exposed to radiation, evaluating errors
17 p2975 A69-33596

Gyrocompassing precision problems related to gyro drift, input axis deviation and base motion compensation, describing inertial navigation platform alignment to true north
17 p2977 A69-34081

Measurement errors and geometry effects on navigational accuracy, determining maximum allowable error for measuring devices employed
17 p3002 A69-34098

Turbulence measurement errors with inclined hot wires described by equations, assuming normal component cooling includes greater tangential cooling
18 p3134 A69-34442

Casing bearings dry friction force moment effect on double rotor gyrocompass sensor motion, showing diminished device accuracy at high latitudes
18 p3135 A69-34560

Inertial aircraft navigation, describing instruments and error analyses with regard to simulation, error propagation and total system error
18 p3169 A69-34850

Automatic celestial navigation, discussing star trackers design, mathematics of celestial fix and relationship to errors and physical and environmental constraints
18 p3169 A69-34852

Dynamic performance accuracy of astatic gyroscope with three degrees of freedom improved by inner gimbal mass increase
19 p3308 A69-35825

Directional couplers design considerations for use in microwave power meters, analyzing directivity and mismatch effect on system error
19 p3282 A69-35826

Wall influence on thermoanemometer readings in incompressible air stream measured with wedge shaped film sensors
19 p3308 A69-35857

Meteorological corrections of meson megatelescope data based on hourly ground-level pressures and temperatures, considering vector and regression analyses
19 p3308 A69-35991

Errors in sighting and identifying geodetic contour points on aerial photographs, considering stereocomparators parallaxes effect
21 p3719 A69-38404

Gyroscopic platforms automatic stability relative to inertial reference system, considering functional equations and error computation
21 p3760 A69-38734

Precision autocollimating solar sensor design for attitude alignment changes, including detector calibration and sounding rocket flight test results [AIAA PAPER 69-858]
21 p3762 A69-39386

Satellite mounted radiometers for determining albedo variations, using Fredholm equation with allowance for instrument errors
21 p3717 A69-39655

Temperature control instrumentation accuracy in terms of static errors and dynamic errors minimizing costs
22 p3954 A69-40037

Standardizing strain gage with long time stability characteristics, analyzing statistically strain calibration results
22 p3945 A69-40078

Maximum errors of telemetering systems under interchannel transient distortions in multistage amplifier of video signals
22 p3899 A69-40250

Probability characteristics of total error in vertical gyroscope evaluated from component errors along suspension axes
22 p3946 A69-40251

Resistance thermometer for measuring rapidly varying gas temperatures, optimizing length to eliminate heat transfer to mounting
23 p4163 A69-41557

Distortion processes in ear, discussing sound pressure level (SPL) measurements in rigid-walled couplers
23 p4085 A69-41573

Analyzing conditions for variable magnetic and electric noise occurrence at input of nuclear precession magnetometer used in field strengths measurements
23 p4165 A69-41852

Antenna pointing and tracking accuracy by identifying error sources in servo, structural, mechanical and alignment factors
23 p4125 A69-42126

RMS surface error compensation in radome-housed Cassegrain parabolic antenna including weight analysis
23 p4150 A69-42137

Radial velocity errors in high dispersion astronomical spectrographs in terms of variable spectral shifts along plate produced by mirror surface irregularities
23 p4167 A69-42189

Pb isotopic analysis using double spike mass spectrometric method to achieve reproducibility and accuracy, discussing principles and performance
24 p4280 A69-42733

Extragalactic radio sources flux densities at 5009 MHz tabulated, ascribing accuracy variations to uncertainty in receiver gain and dish efficiency
24 p4382 A69-42922

Empirical determination of equivalent frequency characteristics of nonlinear system in random noise, assessing measurement errors
24 p4289 A69-42950

Scattered light meter accuracy as function of aerosol particles atmospheric distribution according to size, analyzing measurement errors
24 p4343 A69-42966

Astatic gyro motion with horizontal rotor axis, defining suspension error with allowance for external force moments
24 p4317 A69-43707

INSTRUMENT FLIGHT RULES

Rotary wing handling qualities, discussing analytical tools, design and IFR capabilities for higher speed range
05 p0701 A69-15550

Multifunction helicopter rotor blade radar for navigation, IFR approach and fire control, including flight test results [AHS PAPER 315]
17 p2920 A69-33539

Air traffic control, discussing objectives, government responsibilities and airspace organization, including U.S. system
18 p3170 A69-34859

INSTRUMENT LANDING SYSTEMS
NT AUTOMATIC LANDING CONTROL

All-weather landing factors for aircraft and pilots, describing instrument landing system, runway and visibility, pilot and crew procedures, etc
01 p0112 A69-10445

Low visibility instrument landing of aircraft using ILAS and inertial guidance
01 p0114 A69-11012

Air traffic control at Los Angeles International Airport, discussing simultaneous parallel ILS approaches and departures and STOL problems
01 p0057 A69-11356

Low visibility landing, discussing problems of radioguidance geometry, visibility measurement, aircraft dynamics, pilot psychology, regulation and politics
01 p0114 A69-11391

Flight inspection positioning system, discussing microwave interferometer angle calibration for instrument landing
03 p0430 A69-13680

Low visibility aircraft landing, discussing total system approach, modern electronic developments, collision avoidance, safety and air traffic control
03 p0465 A69-13853

V/STOL operations in intercity and intracity service, discussing technical feasibility and need for steep approach instrument landing system
05 p0703 A69-16723

Aircraft position and velocity in directions normal to ILS reference path by correlation with inertial navigation system, noting minimal time controller
07 p1177 A69-19213

Scanning beam landing systems for VTOL aircraft
07 p1178 A69-19631

STOL aircraft intercity test flights emphasizing curved ILS approach, using onboard computer for altitude and distance data
08 p1347 A69-20601

Airborne ILS marker beacon receivers and secondary surveillance radar transponder using microelectronic equipment, noting thermal dissipation problems [AGARDOGRAPH-114]
08 p1292 A69-20991

All-weather landing including zero-zero, discussing planning in Europe and U.S.A.
10 p1722 A69-23698

Manual control displays for instrument landing approach of large subsonic jet transport, evaluating closed loop system performance and scanning workload
10 p1650 A69-23877

Microwave scanning beam landing guidance system for Swedish tactical aircraft Saab 37 Viggen, reviewing ground station and onboard equipment
16 p2735 A69-32057

Direction defining radio beacons performance, discussing signal amplitude and phase comparison systems and Doppler techniques
17 p2918 A69-33028

Vertical path guidance computer, noting applications to feeder airlines and airtaxi services operating from airports with VOR/TACAN only
17 p3003 A69-34104

On-course monitoring for instrument landing system glide path operating with far field samples
17 p3003 A69-34105

Multisensor data processing technique for fail operational landing commands, using real time error analysis inherent in Kalman filter
17 p3003 A69-34106

TAPIR automatic pilot, describing components and automatic landing
19 p3371 A69-36704

Correlation protected ILS implementing conventional ILS with no operational restrictions on air traffic control, taking into account changing terminal conditions
22 p3978 A69-39963

Steep descent landing systems developmental phases for VTOL aircraft, discussing noise abatement, approach angle and descent rates
22 p3978 A69-40674

Low visibility VSTOL instrument landing system and associated electronic structures, discussing instrument to visual flight transition
22 p3979 A69-40675

Localizer acquisition system quasi-optimization technique based on time optimal control theory, with application to SST ILS problem
24 p4348 A69-43312

INSTRUMENT ORIENTATION

Solar X ray flare absolute flux correction, taking into account geometric obliquity factor variation with angle between satellite spin axis and satellite-sun line
01 p0147 A69-11242

Rocket released probe orientation determination from polarization measurements on telemetry signal
02 p0207 A69-11813

Astronomical alignment accuracy by rocket Cassiopeia system, discussing scientific payload rotation and orientation by celestial bodies
03 p0462 A69-12850

Error analysis of orientation methods for extraterrestrial stereophotogrammetric mapping [JPL-TR-32-1344]
03 p0429 A69-13299

Optical sighting method for determining orientation of rocket on launch pad by laser collimator, noting lining up of Cassiopeia system
06 p0930 A69-17104

Separable payload control for three axis orientation of sounding rocket instruments, discussing error sensors and pointing accuracies
06 p1014 A69-17583

Analytic platform or strapdown systems application, discussing closed and open loop leveling techniques
08 p1347 A69-19862

Spectral study of Stokes vector for light scattered by natural objects, recommending phase and optical axis inclination angles for aircraft measurements
09 p1588 A69-21367

Stabilized gyroscope platform internal dynamics analysis, outlining optimal orientation for full compensation of cross couplings
09 p1499 A69-22240

Large steerable mm wave radio telescope of Simeiz observatory in U.S.S.R. noting computer aided pointing system
10 p1674 A69-23805

Gyroscopes orientation influence on dynamic drift of triaxial power gyrostabilizer on rocking platform, noting optimum orientations
11 p1881 A69-24560

Spectral study of Stokes vector for light scattered by natural objects, recommending phase and optical axis inclination angles for aircraft measurements
18 p3198 A69-34756

Computerized prediction of RF instrumentation system signal margins for missile flight tests based on trajectory and range balance equation
18 p3103 A69-35097

Quartz compasses designed for orientation of electronic devices with respect to magnetic meridians at low horizontal component values
23 p4166 A69-41869

Portable He-Ne laser design featuring positional adjustment for use in aligning optical systems
24 p4327 A69-42924

INSTRUMENT PACKAGES

NT APOLLO LUNAR SURFACE EXPERIMENTS PACKAGE

Magnetometer experiment for Apollo project to measure lunar surface magnetic field, describing mission requirements and instrumentation [AAS PAPER 68-206]
02 p0312 A69-11481

Buoyant station with science package designed for long duration missions with horizontal mobility in Venus atmosphere
02 p0333 A69-11745

Manned spacecraft systems design optimization for extended space missions replacement modules
05 p0830 A69-16380

Surveyor lunar scientific payload and results, discussing TV camera, soil mechanics and surface sampler, alpha scattering instrument, small magnets and surface analysis
06 p1001 A69-17162

Attitude control system for maintaining orientation of experimental package relative to space stabilized platform, noting transient response and steady state accuracy
06 p0955 A69-17587

Small Scientific Satellite program, discussing payload for investigating magnetosphere and near interplanetary space [IEEE PAPER 3C-1]
07 p1230 A69-19195

Vela 4 satellite energetic particle experiment, describing instruments design and operation [IEEE PAPER 3C-2]
07 p1134 A69-19196

Pyrotechnic activated calorimeter for reentry package design of vehicles entering earth atmosphere at lunar return velocities
10 p1669 A69-23026

Transpondersondes for atmospheric measurements, considering ground tracking, radiosondes, rocket-sondes and flight results
10 p1692 A69-23257

Flight instrument package for change of energy absorption and energy radiation of vehicle surfaces during various phases of space vehicle mission
15 p2613 A69-31269

Stratospheric winds effect on instrument package suspended from high altitude balloon, discussing package displacements, yarn shapes and air drag characteristics
17 p2961 A69-33612

Atmospheric wind shear velocity snapping effect on yarn suspending instrument package from balloon gondola during parachute recovery
17 p2975 A69-33613

Duplex servoactuator package sized for stabilator channel of F-4 aircraft providing compact integrated control surface positioning [AIAA PAPER 69-788]
19 p3249 A69-35640

Strapdown redundant experimental sensor inertial navigation package containing gyros and accelerometers, discussing signal real time processing by digital computer [AIAA PAPER 69-851]
21 p3762 A69-39379

Gyro test package, dynamic test facility and real time attitude algorithm to investigate operational capabilities of strapdown inertial attitude package [AIAA PAPER 69-849]
21 p3765 A69-39424

Dornier ASTRID attitude stabilization system design for spinning rocket nose cone with instrument payload, using first stage biaxial inertial platform and second stage star tracker
21 p3826 A69-39639

Thermal design of missile mounted S band telemetry transmitter package based on temperature control system, using heat-of-fusion characteristics of wax material
22 p3909 A69-39945

INSTRUMENTAL ANALYSIS

U AUTOMATION

INSTRUMENTATION

U INSTRUMENTS

INSTRUMENTS

Digital data processing equipment for space flight PCM telemetry
03 p0393 A69-13290

Aerospace instrumentation - Conference, Cranfield, Beds., England, March 1968
05 p0765 A69-16747

Radiation effects on NERVA out-of-core instrumentation, discussing cryogenic temperature measurements and transducer measuring pressure at gamma heating rates
06 p0956 A69-16882

Fundamentals of aerospace instrumentation - ISA Conference, Boston, June 1968, Volume I
10 p1690 A69-23224

Instrumentation in the aerospace industry - Conference, Boston, June 1968, Volume I4
10 p1670 A69-23245

Noninterfering instrumentation techniques to measure hypersonic flowfield parameters in wind tunnels, measuring flight time of pulsed laser generated spark for velocity
10 p1672 A69-23266

Second order system equations to approximate transfer function of homogeneous pneumatic instrumentation line terminated with pressure transducer
10 p1692 A69-23267

Instrumentation - ISA Conference, New York, October 1968
15 p2615 A69-31286

Instrumentation - ISA Conference, New York, October 1968
15 p2553 A69-31293

Instrumentation in aerospace simulation facilities - Conference, Farmingdale, New York, May 1969
19 p3289 A69-35714

INSULATED STRUCTURES

Silicon dioxide dielectric isolation for high speed low power circuits, noting saturation resistance and transient characteristics
02 p0221 A69-12470

Gas breakdown model for analyzing breakdown of Ce vapor filled crack in thermionic trilayer insulator
09 p1441 A69-21840

Super insulation blankets comprised of dacron sailcloth, silk net or aluminized mylar, describing crinkling, cutting, sewing and hole drilling techniques
09 p1507 A69-22330

Multiwall meteoroid protection design in Apollo program, discussing bumper, backup sheet and honeycomb cells insulation [AIAA PAPER 69-372]
13 p2367 A69-28304

INSULATION

U ELECTRICAL INSULATION

U MULTILAYER INSULATION

U THERMAL INSULATION

INSULATORS

Electric field control of growth rates of insulating organic crystals from vapor phase
01 p0135 A69-10140

Negative resistance behavior of InSb diodes at 77 K, extending double injection theory for insulators to extrinsic semiconductors
02 p0294 A69-11722

Metal-insulator transition, observability and transition in ionic lattices and polar liquids
03 p0489 A69-13922

Solid insulator performance in vacuum, analyzing breakdown factors
05 p0731 A69-16243

Gamma radiation effects on gate threshold voltages in modified oxide insulators in MOS structures
06 p0976 A69-16876

Dielectric relaxation for analysis of defect structure, microstructure, surface behavior, structural changes kinetics and environmental effects in insulators and semiconductors
09 p1559 A69-22307

INTAKE SYSTEMS

NT AIR INTAKES

NT ENGINE INLETS

NT HYPERSONIC INLETS

NT SUPERSONIC INLETS

Ram recovery of flush intake for air cushion vehicles noting influence of intake geometry, placement and incidence angle
01 p0005 A69-10026

Water jet propulsion for air cushion vehicles, emphasizing inlet shape effect on performance and potential flow theory application to inlet design
08 p1254 A69-20115

M 3.5 two dimensional mixed compression inlet system with self restart using flexible variable ramp system [AIAA PAPER 69-447]
16 p2845 A69-32732

Turbopump weight minimization and low suction pressure requirements realized using high rotating speeds, hydraulic turbine driven upstream inducer and computer testing [AIAA PAPER 69-552]
16 p2741 A69-32747

Transient performance of full flow hydraulic turbine driven two speed pump inducer system, formulating computer model [AIAA PAPER 69-551]
18 p3140 A69-34415

INTEGERS

Integer programming method for optimizing constrained reliability problems with several system failure modes
20 p3504 A69-37069

INTEGRAL CALCULUS

Numerical evaluation of curvilinear integrals and areas, using digital computer
01 p0106 A69-10867

Integrals of nonlinear equations of evolution and solitary waves, discussing double wave solutions of Korteweg-de Vries equation
03 p0468 A69-13825

Analytical expressions for integrals involving Euler and Bernoulli numbers
04 p0624 A69-14969

Random processes study by special integral calculus containing deltas and theorems, with application to stationary processes
05 p0718 A69-15881

Convergence of improper integral evaluated along solution of differential equation, noting use in asymptotic control theory
05 p0788 A69-16481

Characteristic coefficients in method of integral relations calculated by Lagrange interpolation, noting application to numerical solution of differential equations
06 p0857 A69-17102

Torsion theory for modules over integral domain, giving definition of injective sums
13 p2287 A69-27339

Integration formulas involving integrand derivatives simplified by decreasing integrating power in terms of polynomials

18 p3164 A69-34615

Algorithm for definite integrals evaluation, using Clenshaw-Curtis and Romberg quadratures combination in each subinterval

20 p3498 A69-36947

Soviet book on integral methods of calculations in theory of turbulent jets and wakes, covering turbulent boundary layers, laminar mixing, etc

20 p3518 A69-38211

Criterion for class of differential equations ensuring absence of nontrivial periodic solutions

22 p3974 A69-39897

Navier-Stokes equations numerical integration based on biharmonic operator inversion by alternating direction method of Douglas-Rachford type

22 p3932 A69-40928

Surface integration technique used in conjunction with wedge diffraction theory to analyze TEM radiation patterns of parallel plate waveguides

23 p4136 A69-41581

Table of definite and indefinite integrals of products of exponential integrals with elementary or transcendental functions

24 p4341 A69-43324

INTEGRAL EQUATIONS

NT FREDHOLM EQUATIONS

NT SINGULAR INTEGRAL EQUATIONS

NT VOLTERRA EQUATIONS

NT WIENER HOPF EQUATIONS

Bounds from asymptotic behavior of solutions of nonlinear integrodifferential equation arising from nonlinear oscillators in acoustics

01 p0103 A69-10001

Simultaneous partial integro-differential equations governing natural vibrations of arbitrary cross section cylindrical tubes, suggesting Fourier series solution

01 p0164 A69-10065

Unsteady heat flow in finite composite hollow circular cylinder using inverse method of eigenfunction expansion/method of finite integral transformation/

01 p0175 A69-10230

Distribution of moment of first passage through positive level for homogeneous process with independent increments and exponential characteristic function, constructing integral equation

01 p0104 A69-10265

Eigenproblem for displacement integral equations with finite cosine transform kernels, extending Roark-Wing numerical method for eigenvalues to kernels

01 p0106 A69-10986

Integral operators on space of Borel measurable functions bounded considering weight function, giving condition for infinite complex matrices, mapping analytic sequence spaces

01 p0107 A69-11244

Stress transfer from loaded matrix to single fiber in composite materials determined by series and step formulations

01 p0172 A69-11271

Atmospheric temperature profiles by regularizing algorithm, discussing influence of random errors in measured radiation and kernel of integral equation on interpretation accuracy

02 p0274 A69-11448

Cosmic ray propagation in interplanetary space taking into account reverse effect on solar wind, deriving integrodifferential equation

02 p0306 A69-11657

Linear integrodifferential motion equations for turbulent flow within Heisenberg statistical turbulence theory

02 p0230 A69-11869

Convergence of Muthopp collocation method for numerical solution of linear singular integrodifferential equation, noting use in airfoil, propeller and elasticity theory

02 p0271 A69-12056

Infinite system of first order integral equations derived from Prandtl boundary layer equation and continuity equation

02 p0231 A69-12059

Electromagnetic wave propagation problems, using asymptotic solutions of differential and integral equations in domains containing transition points

02 p0208 A69-12130

Nonlinear integrodifferential equations of parabolic type with delayed argument, discussing boundary value problems with caloric and hereditary operators

02 p0273 A69-12249

Integral prediction method for arbitrary continuous function on right hand side of nonhomogeneous linear differential equation with constant coefficients

03 p0455 A69-13022

Compatibility equations in plane micropolar thermoelasticity theory obtained by associated matrix method

03 p0525 A69-13607

Integral equation solution for plate with internal support

03 p0528 A69-13799

Uniform asymptotic expansion series for saddle point integrals applied to probability distribution in noise interference problems

03 p0398 A69-13832

Integral equations solved numerically for general nonhomogeneous elastic inclusion problem, using linear elasticity theory

03 p0530 A69-14064

Infinite phased dipole array, discussing integral equation, current distributions and active admittances

04 p0571 A69-14316

Generalized Riemann-Liouville fractional integrodifferential operator and application to representation of analytic and harmonic functions inside circle

04 p0622 A69-14512

Optimal control theory applied to systems described by partial differential/integral equations

04 p0581 A69-14571

Mathematical modeling of Gaussian and nonGaussian processes obtained by linear and nonlinear transformations of white Gaussian noise, noting Markov processes

04 p0623 A69-14694

Equilibrium and compatibility equations for axisymmetric stress distribution in finite length anisotropic elastic cylinder reduced to single integrodifferential equation

04 p0676 A69-14709

Phenomena satisfying inhomogeneous Helmholtz equation in cylindrical coordinates, inferring equivalent infinite series directly from integral-transform method

04 p0623 A69-14896

Book on linear boundary value problems of mathematical physics based on Green function covering Hilbert spaces, integral equations and spectral theory of differential operators

04 p0625 A69-15232

Linear integral equations for brightness coefficients and auxiliary functions in semiinfinite atmosphere, expressing atmospheric albedo using moments and Chandrasekhar function

04 p0662 A69-15237

Modified Karman-Pohlhausen pulse integral equation for calculating boundary layers is more accurate when seeking flow separation point

04 p0591 A69-15408

Second approximation to Boltzmann equation solved for rigid sphere gas by reducing integral equation to differential equation

04 p0633 A69-15434

Engineering solution for integrodifferential equations of physical systems with electronic circuits

05 p0724 A69-16468

Stress-strain state of infinite plate with two holes of different diameter solved, using integral equation derived for two dimensional problem in elasticity theory for anisotropic medium

05 p0843 A69-16680

Stress-strain state of shell having one end clamped and other under concentrated bending moments and concentrated force acting along generatrix solved by integral equation

05 p0843 A69-16681

Riemann problem in regions, showing integral operators become bounded if closed rectifiable Jordan curve without cusps becomes curve of bounded rotation

06 p0947 A69-16893

Residue contributions to integrals associated with admittance of plasma or dielectric covered circular aperture antenna used to calculate surface wave contribution to waveguides

06 p0896 A69-17477

Iterative solution of integral equation and uniform convergence conditions of function sequence approximating incremental stress distribution in elastic-plastic structures

06 p1024 A69-17510

Integrodifferential equation for plasma oscillations solved for effect of ion Larmor radius size and intrinsic electric field on flute instability of axially symmetric plasma

06 p0966 A69-17520

Integral equation solution with Mellin inversion formulas for light scattering problems

06 p0949 A69-17887

Soviet collection of papers on boundary value problems and integral equations

07 p1172 A69-18499

Differential equations with singular problem solutions analyzed by reducing problem to solution of integro-differential equation

07 p1174 A69-19004

Viscous hydrodynamical equations for flow field exterior to obstacle moving with constant velocity, discussing force relationships, drag invariance and integral representations

07 p1121 A69-19298

Fundamental problems of plane elastostatics with stress couples reduced to solution of integral equations, noting uniqueness theorem in plate bending theory

07 p1233 A69-19328

Diffuse reflection and transmission of parallel rays by homogeneous two layer slab, solving simultaneous integro-differential equations governing auxiliary functions

08 p1350 A69-19799

Wolf and generalized Parseval theorems applied to transformation of integral equation to S-plane in systems analysis

08 p1271 A69-19865

Partially translatable one parameter continuous transformation group for complete system of integrals in celestial mechanics, discussing Wintner nonisolating integral and Poincare theorem

08 p1382 A69-19872

Viscoelastic problem solutions for hereditary media, using Laplace transforms or solutions of integral equations for inaccurately approximated kernels

08 p1412 A69-20329

Stability theorem for nonlinear mixed integral equations in boundary value problems

08 p1343 A69-20355

Heat transfer mechanism in solid body, deriving integrodifferential equation with classical equation and hyperbolic equation of heat propagation as special case

09 p1621 A69-21587

Integrodifferential equations describing longitudinal oscillation properties in nonlinear region of electron Maxwellian plasma waves and two cold electron beams

09 p1550 A69-22026

Diffraction problem on cylindrical bodies of arbitrary shape reduced to integral equations by using Green functions for free spaces

09 p1459 A69-22634

Singular integral equation for velocity in linearized Rayleigh problem in rarefied gas flow field solved by applying Luke weight coefficients

10 p1679 A69-23596

Integral equation and related optimal regularization problems, finding operator in class of operators defined on set of functions

10 p1721 A69-23882

Equivalence of initial boundary value problem and integral equations obtained by regularization using potential theory

10 p1721 A69-23959

Integral representation for velocity and pressure fields produced by horizontal motion of two dimensional bodies below or on free surface of viscous liquid

11 p1866 A69-24278

Asymptotic methods for integral equations of plane mixed problems of elasticity theory for nonclassical regions

11 p1971 A69-24647

Mixed boundary value problem in theory of axisymmetric potential of three dimensional boundary layer reduced to solution of linear integral equation

11 p1918 A69-24787

Transition density function of randomly excited diffusion process and confinement probability at fixed spatial point satisfying integrodifferential equation involving functional derivatives

11 p1860 A69-25451

Excitation coefficients of waves subjected to sudden expansion in radiating waveguide using integral relations, noting convergence

11 p1855 A69-25621

Vibration eigenfrequencies of helicopter blades, discussing equation integration problems

11 p1995 A69-25673

Theorem for integral expansion applied to boundary value problems of mathematical physics and elasticity theory for single sheet hyperboloids of revolution

11 p1910 A69-25731

Bending of half strip rigidly fastened along short edge, constructing integral equation for normal stress at clamping, investigating corners singularities

11 p1996 A69-25734

Pitch angle distribution function of thermal protons in magnetosphere taking into account earth gravitational field

12 p2067 A69-26354

General theorems derived for Noether operator applied to integral equation with automorphic kernel

12 p2122 A69-26574

Cylinder buckling and other boundary value problems, applying inverse differential operators to solution of integrodifferential equations

12 p2186 A69-26841

Integral equation solved by successive approximation procedure for determining mass distribution in galaxies on radial velocity basis, applying to NGC 7331

13 p2353 A69-28325

Energy transfer by simultaneous conduction and radiation between two media in intimate contact, detailing numerical solution method for resulting coupled nonlinear integrodifferential equations

13 p2378 A69-28340

Cosmic ray propagation in interplanetary space taking into account reverse effect on solar wind, deriving integrodifferential equation

13 p2333 A69-28688

Contact problem for half plane with elastic stiffener reduced to Prandtl integrodifferential equation, determining contact stresses

14 p2531 A69-28804

Completeness theorem for integrodifferential operator to establish Schwarzschild criterion for stability of gaseous masses

14 p2470 A69-28902

Series and integral expansions of Jacobi polynomials with positive kernel, noting ultraspherical polynomials

14 p2470 A69-28905

Contact problem between elastic cylinder and rigid punch analyzed using integral equation, singularity isolation and series expansion

14 p2532 A69-28972

Integral equations for classical elasticity boundary value problems, stressing analogous Stokes flow hydrodynamic equations

14 p2535 A69-29361

Integrodifferential equation derived and solved for evolution of collisional model of asteroids and debris

14 p2526 A69-29879

Integral formulation of scattering theory extended to Coulomb interactions by expanding Green function and treating kernel singularities

14 p2489 A69-29995

Book on Bessel functions with physical applications covering solution of Bessel and associated equations, integral representations, Fourier-Bessel series, Hankel transforms, etc

15 p2643 A69-30037

Green function construction for boundary value problems of heat conduction on rectilinear segment with dynamic boundaries, using integral equations

15 p2716 A69-30075

Energy budget equations applicable to limited atmospheric region using available potential energy concept, discussing relation to global energy

15 p2648 A69-30221

Plane contact problems in elasticity theory allowing for cohesive forces solved by integral and differential equations

15 p2706 A69-30578

Optimization of control system described by linear parabolic integrodifferential equation, using dynamic programming approach

15 p2645 A69-31024

Starting weight increments in aircraft designs having various structural features and dimensions

16 p2735 A69-32144

Monograph on Navier-Stokes equations with integral relations approximate solution and application to flow around flat plate of finite length

17 p2949 A69-32993

Simultaneous integral equations numerical solution for open optical resonator mode analysis, using kernel function and Fresnel approximation

17 p2983 A69-33883

Local radiation characteristics calculation method, consisting of reducing integral equations to linear algebraic equations, applied to solve radiative heat exchange problems

18 p3229 A69-34713

Integral scalar equation describing signal attenuation by acoustically soft disk for mirror-shadow method of ultrasonic flaw detection

18 p3137 A69-35109

Radiant heat transfer integral equations solutions accuracy determined from differences between geometric and resolving angular emission factors

18 p3230 A69-35119

Regular integral equations solvability for boundary value problems in shallow shell theory, using method of potential representations and Green matrices

18 p3224 A69-35309

Thin walled shell temperature and strain fields described by integrodifferential equations based on Kirchhoff hypothesis and coupled thermoelasticity reciprocity equations

18 p3225 A69-35368

Rarefied gas flow between parallel plates using linearized Boltzmann transport equation, deriving integral equation for mass flow velocity

19 p3296 A69-35621

Krein solution method for linear integral equations of first kind and related differential equations

19 p3360 A69-35780

Engineering equations for elastic thin plate oscillations of materials with properties described by linear integral Volterra-Boltzmann operators

19 p3437 A69-35989

Distribution of moment of first passage through positive level for homogeneous process with independent increments and exponential characteristic function, constructing integral equation

19 p3360 A69-36200

Function theoretic solution of dual integral equations applied to boundary value problem of supersonic flow over infinite span thin wing

19 p3239 A69-36311

Similarity method applied to linear integrodifferential equations of neutron transport in homogeneous space

19 p3361 A69-36774

Elastic shell theory to regularize singular integrodifferential equation, investigating load transfer from reinforcing ribs to circular cylindrical shell and numerical solution correlation

19 p3443 A69-36792

Drag minimization as extremization of products integrals powers, noting application to optimum wings and fuselages

19 p3242 A69-36800

Combined heat transfer by radiation and conduction in disperse media /thermal insulation/ described by system of nonlinear integrodifferential equations

20 p3631 A69-37097

Linear nonstationary system with singular point analyzed for stability necessary and sufficient conditions using Riemann-Mellin conversion integrals and Laplace transforms

21 p3685 A69-38451

Boundary layer flow past permeable surface, generalizing integral equations for case with suction

21 p3691 A69-38573

Heat and mass transfer coefficients in binary laminar boundary layer during natural convection obtained with integral equations and Karman-Polhausen method

21 p3848 A69-38633

Natural oscillations of free surface liquid and elastic bottom of cylindrical cavity determined by integrodifferential equations based on liquid level

21 p3693 A69-38720

Radiation field several wavelengths from dipole above plane earth, simplifying rigorous integral expression for Hertz vector by method of operators

21 p3770 A69-38748

Control function ensuring minimal response time of controlled plant with motion described by integral equations system, using method of distributed moments

21 p3685 A69-38847

Saint Venant torsion problem using rederivation of integral equation by transferring external geometrical problem into internal static problem

21 p3836 A69-39003

Equivalence of initial boundary value problem and integral equations obtained by regularization using potential theory

21 p3756 A69-39150

Optimal generalized random controls using stochastic integral equation in deterministic problem

21 p3756 A69-39266

Integrals of motion for minimum fuel rocket trajectories in inverse square field calculated for constant power and constant exhaust rockets

[AIAA PAPER 69-904] 21 p3806 A69-39336

Asymptotic solution, existence and uniqueness of integral equations occurring in elasticity theory and mathematical physics

21 p3772 A69-39618

Integral relations method applied to air jet flow along cylinder with boundary layer control by suction or blowing

21 p3698 A69-39845

Nonresonant Green functions of auxiliary boundary value problems for deriving integral equations for Dirichlet and Neumann diffractions at open screens

22 p3901 A69-40949

Fredholm integral equation for source function of Greenhouse effect and finite atmospheres solved by computational algorithm

23 p4239 A69-41607

Bogoliubov method of partial averaging for nonlinear integral equations, noting application to automatic gain control theory

23 p4181 A69-41731

Nonlinear loaded integrodifferential equation analytical and formal solutions, noting role of characteristic number relation to unity

24 p4339 A69-42595

INTEGRAL FUNCTIONS

U ENTIRE FUNCTIONS

INTEGRAL TRANSFORMATIONS

NT CONVOLUTION INTEGRALS

NT FOURIER TRANSFORMATION

NT HILBERT TRANSFORMATION

NT LAPLACE TRANSFORMATION

Shock waves collision with supersonically moving axisymmetric slender bodies analyzed by integral transform method, noting application to shock-shock interaction

03 p0413 A69-13010

Operator methods in engineering sciences, discussing integral transformations, Riesz method application to Cauchy problem, etc

03 p0457 A69-13744

Generalized Riemann-Liouville fractional integrodifferential operator and application to representation of analytic and harmonic functions inside circle

04 p0622 A69-14512

One to one mappings of Fourier series of analytic almost periodic functions and Dirichlet series, discussing satisfaction of functional equation

05 p0786 A69-15882

Thermal stresses for mixed boundary conditions calculated from combined use of integral transforms and variational techniques, reducing computational labor

10 p1801 A69-23429

Integral transform solutions for Griffith cracks in brittle fracture theory, discussing disk and penny shaped cracks in cylinders and thick plates

10 p1801 A69-23688

Integral transforms in composite one dimensional space and application to boundary value problems of physics

11 p1910 A69-25574

General theorems derived for Noether operator applied to integral equation with automorphic kernel

12 p2122 A69-26574

Nonuniform flowfield from supersonic penetration of plane shock by three dimensional pointed planar wing, using integral transform method to study field perturbation pressure

13 p2199 A69-27323

Finite integral transform determination for solving circular plates forced vibrations with time dependent conditions

15 p2704 A69-30306

Galerkin-Kantorovich-Dorodnitsyn/GKD/ multimoment integral method improved reversed flow formulation for lower branch similar flows

17 p2958 A69-34054

Intensity integral inversion for Doppler core of strong solar absorption lines to obtain line source function for solar atmosphere

21 p3796 A69-38478

Integral transformation applicability to inverse problems concerning interaction potential energy between particle pairs in n-dimensional Euclidean space

23 p4182 A69-41960

INTEGRATED CIRCUITS

Microwave applications of monolithic and hybrid semiconductor circuit technologies, considering cost and performance

01 p0039 A69-10188

X band mixer with reactively terminated image, using gallium arsenide barrier diodes and microwave integrated circuit techniques

01 p0039 A69-10189

Microwave amplifier design with hybrid integrated circuits of thin film lumped elements, noting gain and efficiency of transistor circuits

01 p0039 A69-10190

Performance characteristics of microstrip ferrite devices for hybrid microwave integrated circuit systems, including meander line phasers and YIG elements

01 p0040 A69-10191

Thin ferrite use in microwave integrated circuits including phase shifters, latching circulators, isolators and phase and amplitude modulators
01 p0040 A69-10192

Hybrid integrated parametric amplifier design considerations for fabrication in microstrip transmission line
01 p0040 A69-10193

Diode structure optimization for monolithic integrated circuit for Ku-band reflective phase shifter
01 p0040 A69-10195

Gallium arsenide single crystal epitaxy with doping/concentrations into semiinsulating microwave circuits
01 p0040 A69-10196

Microstrip transmission line integrated circuits on semiinsulating GaAs substrates, showing feasibility at millimeter wave frequencies
01 p0040 A69-10197

Hybrid microstrip integrated microwave circuits, discussing substrate and conductor materials and fabrication processes
01 p0040 A69-10199

Small signal characteristics and frequency response of diode-stabilized integrated linear circuits, discussing feedback, impedance, bias-diode, etc
01 p0041 A69-10204

Integrated circuit manufacturing status, discussing raw materials, crystal imperfections, surface damage, epitaxy and diffusion techniques
01 p0045 A69-10650

Phased array radar cost improvement based on solid state devices and microwave integrated circuits application
01 p0048 A69-11039

Linear integrated circuit communication systems based on subsystem approach, showing example of IF strip and audio AGC/squelch amplifier
01 p0035 A69-11389

Integrated circuit piezoelectric systems limitations and advantages
01 p0049 A69-11413

Planar technology application to germanium electronic components and integrated circuits
02 p0214 A69-11597

Integrated circuits technology, discussing thin film, monolithic compatible and hybrid circuit techniques
02 p0216 A69-12050

Traveling high electric field domains in bulk semiconductors use in high speed integrated electronics, noting domain properties of GaAs and CdS
02 p0216 A69-12144

Large scale integration /LSI/ arrays, discussing high yield manufacturing methods based on fixed nondiscretionary connections among components
02 p0254 A69-12467

Air gap isolated microcircuit beam-lead devices fabrication, operation, electrical performance and radiation resistance
02 p0221 A69-12469

P-i-n structure isolation method for fabricating monolithic integrated circuits
02 p0222 A69-12471

Wafer chip assembling technique for high density interconnection of silicon devices in large monolithic electronic systems, noting application to MOS shift register
02 p0222 A69-12472

Circulator power splitting and isolating function in integrated microwave network
02 p0222 A69-12475

Breadboard chip for use in computer aided design and analysis of integrated circuits, describing components and application to differential amplifiers
03 p0402 A69-13008

Noise susceptibility of integrated circuits in digital systems, discussing sources and specifications
03 p0410 A69-13579

High speed modular multiplier and digital filter for LSI development
04 p0567 A69-15354

Large scale integration and batch-fabricated processing of logic and storage elements for fourth generation computer, discussing partitioning design
04 p0567 A69-15355

Device and logic/system designers and design aids interaction, emphasizing engineering trends in large scale integration area using MOS arrays
04 p0568 A69-15356

Insulated junction integrated circuit transistor operation with various terminal connections corresponding to diode switching of transistor
05 p0730 A69-16217

Medium scale integration for packaging hybrid electronic monolithic systems
05 p0735 A69-16752

Ionizing radiation effects in microcircuits, using lumped model technique to derive mathematical model from electronic characteristics and boundary values of each semiconductor
06 p0977 A69-16886

Integrated circuit interconnection patterns computerized design, discussing automatic laser mask-making control
06 p0931 A69-17199

Metal oxide semiconductor random-access memories, discussing large scale integration and static and dynamic circuits chip size
06 p0894 A69-17203

Heat transfer and IC, discussing semiconductors thermal and electrical analogs and thermal properties
06 p0894 A69-17216

Thermal management of integrated circuits design, noting dependence on circuit and component configurations and parameter variations
06 p0894 A69-17217

IC selection for minimum thermal effects, discussing speed, power dissipation, maximum operating frequency and noise threshold
06 p0894 A69-17219

Electronic controller with integrated circuits and inexpensive SCR as coupler or interface between card reader and frequency synthesizer designed for untended operation
06 p0897 A69-17704

Computer model for n-p-n transistor in integrated circuit using substrate p-n junction isolation
07 p1114 A69-18246

Balanced diode shunt bridges with electronically tunable carrier selection high-Q N-path filter from 0 to 200 kHz, using single integrated module
07 p1089 A69-18249

Large scale integration of monolithic integrated circuits as interconnected circuits on semiconductor
07 p1090 A69-18372

Ferrite microstrips substrates role in integrated circuits, noting application of hybrid technology
07 p1090 A69-18399

Integration forms suitable for fabrication of hybrid and monolithic microwave integrated circuits
07 p1096 A69-18441

MOS technique applied to fabrication of integrated monolithic miniature circuits
07 p1099 A69-18494

Substrates containing silicon regions separated by silicon dioxide or ceramic dielectrics, prepared by lamination in hot press, noting applications to integrated circuits
07 p1100 A69-18617

Dielectrics refill and decal air isolation for silicon integrated circuit components
07 p1100 A69-18618

Alternative balancing technique utilizing linear combination of two equal and opposite drift characteristics to minimize drift in integrated differential amplifiers
07 p1102 A69-18874

Precision monolithic circuits fabrication techniques, describing differential amplifier design incorporating emitter feedback and direct DC errors compensation
07 p1102 A69-18875

Monolithic operational amplifier design combining junction FET with n-p-n transistor
07 p1103 A69-18876

Multistage amplifier design with frequency compensation by eliminating stages in HF region
07 p1103 A69-18877

Monolithic planar process to fabricate DC coupled amplifiers having less than nanosecond risetime
07 p1103 A69-18878

Analog multiplier using differential transistor pairs, discussing FM/AM detection, suppressed carrier modulation and TV chroma demodulation
07 p1103 A69-18880

All-diffused process to build monolithic high power series voltage regulator with separately optimized DC and AC characteristics
07 p1103 A69-18881

Temperature sensitivity of frequency of integrated oscillators, giving design method for achieving temperature compensation
07 p1103 A69-18882

Monolithic HF circuits stability in TV and HF devices noting need for appropriate amplifiers
07 p1103 A69-18883

Integrated four transistor bridge network used for self neutralized active element in tuned RLC amplifier design
07 p1103 A69-18884

Direct coupled monolithic IF amplifier with active gain control, analyzing large signal response, stability and available gain and noise behavior
07 p1104 A69-18885

Integrated frequency selective amplifier design for radio frequencies based on feedback configurations with positive real zero in loop transmission function
07 p1104 A69-18886

Control system utilizing digital and linear integrated circuits for low power testing of Pewee I reactor core Rover program [IEEE PAPER 2B-6]
07 p1179 A69-19188

Radiation effects on integrated circuits, stressing components design for maximum tolerance
07 p1113 A69-19779

Microelectronics technology and economics, discussing semiconductor integrated, discrete component and thin film hybrid circuits and MOSFET devices [AGARDOGRAPH-114]
08 p1291 A69-20983

Microcircuits, integrated circuits and other monolithic solid state circuits failure mechanisms examined and applied to reliability methodology [AGARDOGRAPH-114]
08 p1292 A69-20987

Microelectronic equipment for aerospace application and integrated circuit production in UK [AGARDOGRAPH-114]
08 p1292 A69-20992

Integrated circuit production, development and research in Germany [AGARDOGRAPH-114]
08 p1292 A69-20994

Catastrophic failures in logic circuit and system design, considering thermal effects, complexity, statistical methods and computer use
08 p1299 A69-21107

Integrated semiconductor circuits reliability in electronics and microelectronics, discussing hybrid and monolithic circuits in thin/thick film design and on Si monocrystals
08 p1294 A69-21118

Zero sensitivity integrated RC filter circuits design, exploiting capacitors and resistors property of having same temperature coefficient
08 p1300 A69-21174

Wire, lead frame, direct bonding and beam lead techniques for interconnecting active elements into hybrid circuits
09 p1508 A69-22338

Electronic systems partitioning in preparation for MOS large scale integration for system performance and cost improvement
09 p1466 A69-22451

Optimum microcircuit analog to digital converter for aerospace environment by combining monolithic circuits and thin film resistors
10 p1636 A69-23282

High speed ten-bit analog to digital converter with medium scale integration /MSI/ elements, considering conversion accuracy and time
11 p1845 A69-24520

Large scale integration applications to avionics including self testing, self repair, cost factors, etc
11 p1845 A69-24530

Integrated tunnel diode amplifiers, discussing low noise, bandwidth, reliability, miniaturization and applications
11 p1854 A69-25611

Thin film lumped passive elements for microwave power amplifier integrated circuits, discussing distributed reactances, element size and fabrication, etc
11 p1856 A69-25654

Circuit designs using differential amplifier devices or operational amplifier integrated circuits
11 p1857 A69-25664

Operational amplifier integrated circuits applications, discussing simple and transducer amplifiers, operational circuits, wave shapers and generators and power supplies
11 p1857 A69-25665

Large scale integrated circuit accumulator chip as control element for design of digital system by design automated techniques
12 p2037 A69-25942

Integrated circuits, discussing development from transistors and vacuum tubes, operation, fabrication and applications
12 p2038 A69-26331

Tactical air navigation system redesign with integrated circuits, obtaining weight reduction and improved performance and reliability
13 p2227 A69-27389

Thin film cermet resistors for integrated circuits produced by thermal vapor deposition in vacuum, cathodic sputtering and explosive vapor deposition
13 p2268 A69-27466

Pulse frequency integral estimate devices with integrating chemotron tetraodes for automatic systems metering applications
13 p2227 A69-27522

Microwave propagation in coupled pairs of microstrip transmission lines for integrated circuit design, discussing dielectric Green function
13 p2229 A69-27672

Microstrip circulator size reduction attained by tight inductive ferrite coupling for incorporation with microwave integrated circuits
13 p2230 A69-27679

Book on integrated circuits covering fabrication techniques, basic semiconductor theory, thin film, monolithic, compatible circuits, packaging, etc
14 p2419 A69-29002

Doppler radar clearance hole packaging method for ruggedized dual in-line integrated circuits with conventional etching, tooling and double-sided printed wiring techniques
14 p2419 A69-29102

Engineering problems in IC microminiaturization, dividing devices according to suitability for microminiaturization
15 p2576 A69-30352

Linear metal oxide semiconductor integrated circuits, discussing advantages, disadvantages and use of current source load device to improve voltage gain and swing
15 p2577 A69-30594

Integrated circuit failure analysis in military and space applications utilizing type-test programs
15 p2624 A69-30820

Large scale integration /LSI/ and medium scale integration /MSI/ circuits evolution and requirements, noting onboard computers and space applications
15 p2625 A69-30825

Reliability of integrated circuits with emphasis on errors
15 p2626 A69-30831

Third generation computer reliability including preparation and test of integrated logic circuits
15 p2626 A69-30832

Production line requirements for MOS and IC, considering high reliability at minimum cost for space applications
15 p2627 A69-30841

Transistors and IC reliability for memory control evaluated by Concerto subprograms
15 p2627 A69-30842

Reliability of high resolution accelerometer composed of semiconductor integrated circuits
15 p2627 A69-30843

Disturbances simulation in instrumentation utilizing digital integrated circuits for reliability computation in complex circuits
15 p2628 A69-30848

Electron beam exposure system to photoetch integrated circuit patterns without photomasks, using electronic computer for automatic pattern generation and registration
15 p2579 A69-31039

Glass ceramic coated and bonded silicon semiconductor material in integrated circuits devices fabrication, noting matched thermal expansion
15 p2669 A69-31040

Stripline microwave integrated circuits in terms of building blocks and components, discussing hybrids, backward wave coupler, balanced modulators and mixers, etc
15 p2579 A69-31075

Approximate solution for coupled microstrip transmission lines in integrated circuits, discussing impedance, capacitance and testing
15 p2580 A69-31078

Similarity between semiconductor discrete devices and integrated circuits, considering materials, processing and failure modes
15 p2580 A69-31128

Integrated circuits screens, developing sequence of life and environmental tests to remove units of potential reliability hazards
15 p2580 A69-31130

Large scale integrated MOS devices tests for space applications, establishing quality specifications
15 p2580 A69-31131

Integrated circuits failure analysis in space program applications, describing electrical analog for notification, fact gathering, part analysis and corrective action functions
15 p2580 A69-31132

Counter for decimal counting and numeric display applications using integrated fluid logic elements
15 p2616 A69-31295

Metal oxide semiconductor integrated circuits, showing failure rates and degradation causes
16 p2759 A69-31851

Integrated circuits effect on electronic equipment design and production technology
16 p2762 A69-32578

Large scale integrated circuits reliability with emphasis on multilayer metalization, designing test vehicles for failure mechanisms
17 p2935 A69-32887

Scanning electron mirror microscope advantages over electron mirror and scanning electron microscopes for examining integrated circuits
17 p2971 A69-32891

Al interconnections discontinuities at integrated circuit contact windows observed by scanning electron microscope, noting catastrophic failure and Si presence
17 p2936 A69-32893

Test structure model for studying semiconductor-insulator interface related failure mechanisms in large scale integrated circuitry
17 p2936 A69-32894

Digital IC radiosonde system, discussing sampling, pulse width modulation, time multiplexing, follow-on subsystems, etc
17 p2937 A69-33675

NDC-1070 solid state computer design featuring TTL, MSI and hybrid circuits, offering memory capacity flexibility and rapid maintainability
17 p2933 A69-34060

Integrated nonvolatile read-write memory with addressing using variable threshold field effect transistor including cell operation, channel shielding and circuit
17 p2942 A69-34120

Integrated circuit ultrahigh speed analog to digital converter, considering interactions at high digital rates and video bandwidths
17 p2943 A69-34125

Beam lead sealed junction transistor and integrated circuits reliability, describing test conditions and failure mechanisms
18 p3145 A69-34497

Book on digital electronics for scientists covering digital circuits and instruments for measurement, control or computation
18 p3112 A69-34915

Epoxy molding compounds performance on DIP integrated circuits, determining comparative moisture protection provided by encapsulants
19 p3280 A69-35546

Integrated circuits failure analysis techniques utilizing pin-to-pin curve tracer tests and thermal measurements
19 p3282 A69-35786

Failure mechanisms and analyses of large scale integrated circuits based on bipolar and MOS transistors, describing measurement and probing techniques
19 p3282 A69-35787

Microelectronics and IC process and quality control check list including conductor screening, resistor abradings and discrete part attachment
19 p3283 A69-36020

Oscillator without reactive components for integrated circuit biotelemetry, noting transmission in AM broadcast band
19 p3261 A69-36244

Phase locked loop design of desensitized monolithic integrated circuits for FM multiplex signal filtering and demodulation, describing external tuning
19 p3273 A69-36274

Current mode gates and flip-flops with subnanosecond propagation delay for integrated logic circuits, discussing memories dimensions, LSI arrays, etc
20 p3505 A69-37342

Integrated logic circuits assembly for digital computers, considering high density, mechanical environment, reliability, accessibility and costs
20 p3505 A69-37401

Electrical properties of passive line elements of hybrid integrated circuits on insulating substrates for radio systems
21 p3684 A69-39563

Lasers as tools for integrated circuits fabrication, noting roles of various laser operating parameters
21 p3742 A69-39705

Spacecraft integration electronics modular packaging, discussing slice housing concept and design criteria including environmental resistance, reliability, performance, etc
22 p3910 A69-39949

Failure analysis on semiconductor devices and integrated circuits, discussing procedure for factual information representing present condition of device
22 p3953 A69-40032

Hybrid microwave IC assembly techniques, discussing active devices connection to substrate with thick or thin film metallizations
22 p3912 A69-40068

MSI 12 bit digital to analog converter in integrated circuit form using MOS switching circuit [AIAA PAPER 69-968]
22 p3906 A69-40349

Electromagnetic interference /EMI/ characteristics of various digital logic ICs
23 p4141 A69-42219

Active Ni centers properties in Si with emphasis on increasing and reducing minority carrier lifetime in silicon integrated circuits, discussing energy levels
24 p4360 A69-42759

Boron tribromide-oxygen reaction kinetics effects on IC base diffusion uniformity, correlating uniformity with electrical properties
24 p4360 A69-42760

Si integrated circuits single and composite layered metallization systems, comparing characteristics of various refractory and noble metals
24 p4286 A69-42761

Hybrid and monolithic integrated microcircuits application to electronic digital computer structures
24 p4284 A69-42907

Thin film field effect transistors and integrated microcircuits, investigating active and passive elements fabrication
24 p4419 A69-42908

Microwave integrated circuit applications to reflective and transmissive phased arrays, discussing radar system elements
24 p4286 A69-43109

Integrated TTL flip-flop circuits, describing functional principles of circuits with DC and capacitive coupling
24 p4287 A69-43130

INTEGRATION [REAL VARIABLES]
U MEASURE AND INTEGRATION

INTEGRATORS
NT DIGITAL INTEGRATORS

Time dependent functions integration by glow discharge tube and oscillator, discussing device for voltage measurement and applications in meteorology and geophysics
02 p0251 A69-12773

Difference schemes for heat conduction analog simulation on electric integrators
03 p0410 A69-13300

Solid state sampling circuit for low pulse repetition frequencies to improve signal to noise ratio, noting ratio of holding to learning time
11 p1849 A69-24900

Dynamic multistable analog integrator capable of prolonged retention of integration, giving differential equation of device
13 p2224 A69-27427

Analog correlator performance interpreted as output SNR dependence on input signals and integrating system characteristics, covering filters and finite time integrators
14 p2413 A69-29485

Plasma diagnostics FM phase meter circuits tests, considering raster phase indicators, phase detectors and frequency integrators
14 p2497 A69-29797

Mean drift rates of single and two rotor gyroscopic linear acceleration integrators mounted on irregularly rocking base
18 p3135 A69-34586

Mathematical modeling techniques applied to thermoelastic cooling for plate without clamping and mechanical loads, examining integrator schematic diagram
21 p3680 A69-39851

HF vibrations effect on motion of gyroscopic linear acceleration integrator, showing additional error in flight vehicle acceleration measurements
22 p3946 A69-40253

INTELSAT SATELLITES

Fucino earth station operation with Early Bird and Intelsat 2-F3 satellites receiving equipment and transmission system [UN PAPER 68-95455] 01 p0028 A69-10493

Communication satellites systems, discussing Intelsat satellite specifications and modulation methods for multiple access 03 p0383 A69-12870

Time division multiple access system for INTELSAT satellite, analyzing burst preamble and selection of frame period 03 p0388 A69-13179

Design evolution of mechanically despun antenna systems from ATS to INTELSAT, discussing RF and control systems 03 p0403 A69-13239

Intelsat application satellites, considering economy and global telecommunication 03 p0535 A69-13592

Earth station system for ground based communications with Intelsats 2 and 3 noting antennas, receivers, transmitters and power supplies 05 p0741 A69-15667

Mechanically and electronically despun spacecraft antennas, comparing designs and projected performances for spin stabilized Intelsat 3 satellite 06 p0897 A69-17590

Space communication, discussing global network of Intelsat satellites ground facilities, regional switching, RF channels, etc 06 p0890 A69-17860

Power traveling wave tubes in ground stations for INTELSAT 3 direction finding system 07 p1094 A69-18426

Economic planning of satellite earth station equipment in relation to expected traffic demand, emphasizing specifications for communication via Intelsat 2 and 3 satellites 07 p1117 A69-19347

Intelsat 2 satellite structural design for Apollo communications 08 p1408 A69-19907

INTELSAT for design, construction, launching and maintenance of global communication satellites, noting transponders 09 p1457 A69-22466

Waveguide feeder for Goonhilly Downs satellite communication antenna reducing feeder loss for use with low elevation Intelsat 3 satellite 17 p2935 A69-32849

INTELSAT program, discussing U.S. proposals regarding domestic services, separate satellite programs, etc 20 p3637 A69-37121

INTELSAT 1964 agreements consistency with multilateral international agreements, including UN General Assembly and International Telecommunication Union 20 p3638 A69-37122

Frequency assignment methods for Intelsat 2 and 3 communication satellites [AIAA PAPER 68-454] 21 p3674 A69-39226

More earth station equipment and design for satellite communication in INTELSAT network including antenna, feed and tracking, interconnect system, etc 22 p3900 A69-40679

Intelsat 3 communications satellite mechanically despun high gain directive antenna, discussing system, control electronics, design and performance 22 p3913 A69-40691

Solar cells arrays degradation in Intelsat spacecraft at synchronous altitude, noting shielding gaps and low energy proton influence 23 p4072 A69-42287

INTERACTIONS
Slot type jet interaction flow tests at free stream Mach 4 and 5, describing equipment, procedure and results 24 p4249 A69-43686

INTERATOMIC FORCES
Adiabatic elastic constants of molybdenum-rich rhenium alloys, studying concentration effects on bulk modulus, Debye temperatures and interatomic forces 04 p0613 A69-14455

Unperturbed Hamiltonian transformation applied to existing perturbation theories for exchange forces between atoms to obtain correct long range behavior 07 p1184 A69-18288

Relaxation method for configurations and energies of atoms and stress induced crack opening displacements in crystalline solids 10 p1796 A69-23067

Born-Mayer parameters simplifying computation of interatomic potential, tabulating numerical values for 104 mononuclear pairs of neutral ground state atoms 13 p2301 A69-27453

Interatomic potential between alkali ions and rare gas atoms, using model accounting for repulsive and attractive exchange forces 16 p2815 A69-32464

He II excitation spectrum for interparticle potential using pair Hamiltonian with repulsive core and attractive well 17 p3008 A69-33118

INTERCEPTION

Virtual or projected miss distance for assessment of missile homing impairment effects, deriving expression based on kinematics 04 p0629 A69-15517

Digital computer motion pictures generation for ground controlled intercept simulation 06 p0906 A69-17397

Flight times compared for intercept and pure pursuit missile trajectories 20 p3618 A69-37716

Computer program /TACTICS/ for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories [AIAA PAPER 69-890] 21 p3678 A69-39415

Automated programmed instruction /API/ for training backup interceptor control personnel to conduct air defense operations [AIAA PAPER 69-956] 22 p3905 A69-40338

Rendezvous, intercept and injection optimal control laws derived from inhomogeneous linear differential equations with quadratic performance index 23 p4224 A69-41921

INTERCEPTOR AIRCRAFT

U FIGHTER AIRCRAFT

INTERCEPTORS

Quasi-optimum proportional navigation for interceptor missiles, discussing feedback guidance law and attack geometry 24 p4348 A69-43292

INTERCONNECTION

U JOINING

INTERCONTINENTAL BALLISTIC MISSILES

NT MINUTEMAN ICBM

U.S.S.R. manned bomber role in air strategy, discussing mutual effects of U.S.-U.S.S.R. military posture developments and ICBM 14 p2392 A69-29431

INTERFACE STABILITY

Metal/alumina interfaces strength, examining correlation with wetting and bonding and martensitic transformations 03 p0447 A69-13612

Shape and stability of interface between liquids subjected to surface tension and mass force field in vessel 03 p0417 A69-13809

Fiber-matrix interfacial bond function and bond strength role in fiber composites mechanical behavior 03 p0450 A69-13881

Moving and stationary interphase boundaries segregation during phase transformation, discussing embrittlement 03 p0450 A69-13883

Kelvin-Helmholtz instability for interface between two uniform superposed fluids with constant densities and velocities in horizontal motion in oblique magnetic field 07 p1182 A69-19274

Rayleigh-Taylor instability for interface between two uniform superposed fluids under combined effect of horizontal and vertical magnetic fields 07 p1182 A69-19275

Radio signal spectrum scattered at oscillating interface calculated in Kirchhoff approximation, determining scattering factors 08 p1275 A69-20432

Interfacial charge relaxation oversteability in tangential electrical field, discussing electromechanical polarization surface waves propagation and dielectrophoretic orientation of liquids in zero gravity space 08 p1353 A69-20792

Ion Landau damping and finite Larmor radius effects on dispersion relation of Kelvin-Helmholtz instability due to shear in ion fluid velocity 08 p1367 A69-20799

Microlayer thickness in nucleate boiling, studying liquid-vapor interface motion of growing bubble near heated surface 13 p2375 A69-27789

Shock development in electrothermal shock tube with performance simulation of mechanical shock tube with hot driver but turbulent or unstable driver-shock interface 14 p2427 A69-29768

Interlaminar shear strength development for utilization of unidirectional strength and stiffness of graphite fibers, discussing epoxy resin-fiber interface improvement 15 p2642 A69-30312

Normal modes stability analysis of fluid layer adjacent to flat plate submerged in liquid, considering effects of interfacial surface tension and buoyant forces [AIAA PAPER 69-386] 15 p2590 A69-30476

Turbulent viscoelastic gas ingestion and fluid inertia analysis using stability of dynamic gas-liquid interface between rotating cylinders [ASLE FICFS PREPRINT 31] 15 p2621 A69-30496

Plane incompressible fluid interface stability in presence of transverse electric field, deriving equation of motion for perturbation amplitude 15 p2652 A69-30911

Small amplitude motions of plane interface between fluids stressed by initially perpendicular electric field, modeling fluids as ohmic conductors 16 p2811 A69-31667

Hydrostatic stability and damping characteristics of perforated plates and screens for passive propellant control schemes from drop tower tests [AIAA PAPER 69-531] 16 p2833 A69-32691

Orbital refueling techniques, discussing vapor-liquid interface stability, pressurant requirements, transfer line chilldown, propellant transfer dynamics, dielectrophoresis, suction speed estimating and system tradeoffs [AIAA PAPER 69-564] 16 p2869 A69-32733

Hele-Shaw and porous medium fuel tank systems behavior in simulated low gravity environment, studying sloshing, wetting, funneling and fuel-driver gas interface stability [AIAA PAPER 69-678] 17 p3021 A69-33444

Cylindrical bubbles stability in vertical pipes from photographs, describing wake, spacing, pressure pulsations and convection cells effects [ASME PAPER 69-HT-28] 24 p4411 A69-43540

Plasma-dynamic forces used to suppress fuel-propellant interface turbulence in coaxial jet gas core reactors 24 p4349 A69-43679

INTERFACES

NT FLUID BOUNDARIES

NT GAS-SOLID INTERFACES

NT JET BOUNDARIES

NT LIQUID-LIQUID INTERFACES

NT LIQUID-SOLID INTERFACES

NT LIQUID-VAPOR INTERFACES

NT SOLID-SOLID INTERFACES

Design of interface between Mariner Mars spacecraft and Mars planetary entry/landing capsule [AIAA PAPER 68-1162] 03 p0521 A69-13671

Physical and mechanical properties of surfaces and interfaces - Conference, Raquette Lake, New York, August 1967 03 p0448 A69-13867

Surface and interface phenomena in engineering technology, determining mechanical or electronic properties 03 p0434 A69-13868

Interfaces role in Ni-base superalloy, discussing grain boundaries and coherent/incoherent phase boundaries 03 p0449 A69-13878

Dynamic shear stresses at interface of embedded thin elastic filament and elastic matrix after subjecting filament to concentrated longitudinal line load 05 p0831 A69-15577

Interface states effects on characteristics of p-channel MOS transistors 06 p0979 A69-17117

Electronic structure of clean metallic interfaces, considering electron, ion and surface interactions for metal-vacuum interface 13 p2321 A69-28008

Energetics in solid film lubricants vacuum deposition methods, showing dependence on interfacial and film characteristics 14 p2454 A69-29001

Eccentric face seal with tangentially varying film thickness, analyzing leakage flow proportional to eccentricity and surface waviness
[ASLE FICFS PREPRINT 15B]

15 p2620 A69-30484

Attenuation of small perturbations in shape of plane shock wave propagating into uniform medium in presence of rigid or interfacial boundaries

15 p2592 A69-31145

Moving load at plane interface between two elastic media in space related to direct trirectangular trihedron with vertically descending Oz axis

16 p2870 A69-31829

Electrohydrodynamics of fluids having uniform electrical properties, emphasizing shear effects for interfacially confined electromechanical coupling

18 p3123 A69-34919

Thermal contact conductance of thermally thick specimens with thermocouples not located at interface

20 p3632 A69-37521

Dynamic equilibrium of making and breaking adhesion bonds between polymer segments and dissimilar surfaces through water, allowing thermal stresses relaxation

24 p4326 A69-43458

INTERFACIAL ENERGY

Friction coefficient dependence on interfacial potential between solids

12 p2129 A69-25982

Coating deposition theory on high temperature materials, discussing interfacial energy and wetting properties of molten metal drop on solid base material surface

20 p3560 A69-37358

Scalar waves propagation in bounded randomly fluctuating media, emphasizing interface effects on coherent wave motion

21 p3675 A69-39283

INTERFACIAL TENSION

Composite material mechanical failure due to detachment of microfiber ends from elastic matrix while under tension

01 p0171 A69-11259

Shape and stability of interface between liquids subjected to surface tension and mass force field in vessel

03 p0417 A69-13809

Equilibrium problem for fluid subjected to gravitational forces and surface tension, proposing algorithm for numerical solution

03 p0417 A69-13810

Ideal liquid small oscillations in vessel under close to weightlessness conditions, discussing surface tension, equilibrium conditions and solution by decomposing vector function space

03 p0418 A69-13811

Motion and stability of solid body with cavity containing rotor and two incompressible nonmixing liquids with surface tension

03 p0418 A69-13814

Small oscillations of viscous incompressible fluid in container with free surface under action of potential force field

04 p0587 A69-14620

Fluid support by capillary forces, fluid support by pressure with surface tension stabilization and capillary gas barriers for long life missions
[AIAA PAPER 68-465]

04 p0646 A69-15505

Physicotechnical problems of weightlessness, considering cohesive forces, surface tension and mechanical behavior of fluids and weightlessness simulation techniques

07 p1070 A69-18568

Rotating incompressible liquid drop held together by surface tension noting spheroidal and toroidal shapes, energies and case of surrounding denser medium

07 p1120 A69-19267

Stability of rotating liquid mass held together by surface tension

07 p1121 A69-19268

Sliding friction technique to determine contact area and surface microtopography between abraded metals and polymers

08 p1319 A69-19994

Inhomogeneous half planes equilibrium bonded by elastic layer, noting tangential stresses at interfaces

09 p1611 A69-21482

Mass transfer during interfacial turbulence induced by Marangoni effect in physical model

09 p1621 A69-21903

Correlation between interfacial tension in binary and ternary systems and reciprocal solubility of bulk phases, assuming concentration as function of thickness

09 p1448 A69-21909

Interfacial stress between thermally grown silicon dioxide and single crystal silicon correlated with oxide compressive strength

10 p1744 A69-23177

Interfacial pressure distribution during slip damping in clamped rectangular beams subjected to vibration

10 p1800 A69-23350

Surface-active additives effect on crystallization kinetics of silicate glasses, discussing surface tension

11 p1907 A69-25032

Natural frequencies and forms of small vibrations of ideal liquid in spherical container with weak force field, considering surface tension forces

11 p1875 A69-25484

Normal modes stability analysis of fluid layer adjacent to flat plate submerged in liquid, considering effects of interfacial surface tension and buoyant forces
[AIAA PAPER 69-386]

15 p2590 A69-30476

Surface tension gradients caused thermocapillary convection solved for spherical fluid film under weightlessness conditions

19 p3452 A69-36392

Surface tension of simple liquids consisting of interacting spherical particles, considering density variation in liquid-vapor phase transition zone

19 p3452 A69-36725

Pulmonary surfactant identification on modified Wilhelmy balances, by measurement of areas corresponding to minimum surface tension, using tracheal lavage from dogs and rats

21 p3651 A69-38387

Vacuum apparatus for measuring uniaxially loaded metal surfaces interfacial adhesion, showing surface oxide removal effectiveness influence in adhesion strength

21 p3689 A69-38594

INTERFERENCE

Two polarization light interference scattered by moving and fixed atoms, obtaining forward scattered light intensity

17 p3005 A69-33109

INTERFERENCE DRAG

Aerodynamic interference effects arising from jet efflux of V-STOL aircraft, developing vortex sheet theory for jet interference

05 p0696 A69-15566

Critical flutter behavior of variable geometry aircraft with wing of 70 degree leading edge sweep, noting wing-tail interference

11 p1991 A69-25517

Exhaust nozzle/airframe interference test evaluation for twin engine supersonic fighter
[AIAA PAPER 69-430]

16 p2733 A69-32730

Power plant installation on swept winged transport aircraft, discussing interference drag sources, high lift problems, unorthodox installations, nacelle effects, etc

17 p2898 A69-33214

INTERFERENCE GRATING

Moire fringe interpolation and multiplication by shifting master interference grating, noting increased measurement sensitivity

03 p0524 A69-13063

Electron bombardment effects on performance characteristics of UV gratings

08 p1318 A69-21097

Moire fringes, discussing fringe multiplication by filtering to obtain small strain measurement sensitivity and engraving technique for wave front reconstruction

12 p2099 A69-27164

Electromagnetic wave diffraction in vacuum by equidistant conducting grating, deriving integrodifferential equations for calculating amplitudes

17 p2930 A69-33886

Multiple interference effect introduced by nonlinear characteristics of photographic material, measuring phase variations by holographic multiple beam interferometry

17 p2977 A69-34159

Electron microprobe to produce plane grating X ray hologram based on Lloyd mirror experiment principle

17 p2977 A69-34160

Coupled Fabry-Perot interferometer for microwave spectra with improved selectivity of interference filter

22 p3947 A69-40800

INTERFERENCE LIFT

Wind tunnel wall interference effects in wind tunnel testing of STOL aircraft by inducing interference velocities
[AIAA PAPER 68-399]

17 p2947 A69-34022

NT RADIO INTERFEROMETERS

Short baseline radiating satellite interferometer concept for reducing satellite navigation systematic errors for aircraft and ships

03 p0463 A69-13208

Acoustical thermometer-interferometer to measure air temperature between 20 and 50 km

03 p0429 A69-13269

Laser interferometer gauges for machine tool accuracy, discussing operation, application, manufacture, cost and closed loop numerical control systems

04 p0606 A69-14880

Coupled cavity carbon dioxide laser interferometer with feedback for measurement of transient plasma density in theta pinch, noting sensitivity

06 p0935 A69-17706

Focused electromagnetic beam interferometers and antenna parameters for measuring electron density in plasma diagnostics

07 p1132 A69-18865

Navigation satellites system designed for ATC without requirement for onboard transmitter, discussing spectrum occupancy, satellite power, lane ambiguities and computational procedures

07 p1177 A69-19212

High quality holography with illumination possessing low degree of spatial coherence by means of interferometric arrangement with amplitude division

08 p1312 A69-20081

Optical resonator as Q meter, discussing error capability and construction

08 p1312 A69-20106

Distance measurements of several hundred feet to resolution of three millionth of inch by applying He-Ne laser interferometer

09 p1519 A69-22475

Laser frequency drift effect on operation of three mirror interferometer, noting wave reflection by two compounded mirrors

11 p1895 A69-24720

Fourier transform holograms by Fresnel zone-plate fringe interferometer, discussing source size and bandwidth

12 p2090 A69-26249

Precision optical systems tests, using two beam interferometer and CW gas laser to examine reflected or transmitted wavefront contours

12 p2092 A69-26421

Stellar diameter interferometric measurements, discussing double slit arrangement and illumination in focal plane

13 p2334 A69-27305

Acoustical thermometer-interferometer to measure air temperature between 20 and 50 km

14 p2445 A69-28777

Multifrequency interferometer for inhomogeneous plasma density soundings

14 p2497 A69-29795

Interferometer for measuring electric fields spatial correlation function at camera aperture, describing laser light coherence measurements after propagation through turbulent atmosphere

15 p2653 A69-31164

Observations of 123 southern radio sources made with two clement variable spacing interferometer, tabulating and graphing results

15 p2696 A69-31166

Interferometric displacement transducer for measuring linear displacements up to one and one-half inches

15 p2614 A69-31280

Three antenna interferometer angle measurement accuracy dependent on antenna spacing, deriving optimal spacing value

16 p2758 A69-31730

Holographic cine-interferometry, using live fringe method with Q switched pulsed ruby lasers to obtain consecutive submicrosecond interferograms

18 p3133 A69-34265

Cylindrical concave surface quality control by contactless comparison with reference surface, using interferometer with Twyman system and continuous laser

19 p3311 A69-36196

Observation time influence on interferometers resolution limits due to radio wave phase fluctuations

21 p3682 A69-39122

Fiber optics interferometers, analyzing light propagation along dielectric light pipes and wave interference

24 p4315 A69-43162

Tilted etalons to obtain tunable single mode emission from gas lasers noting fabrication simplicity, vibration insensitivity and low insertion loss resulting in high efficiency
24 p4329 A69-43752

INTERFEROMETRY NT DIFFERENTIAL INTERFEROMETRY

Streak interferometry method for measuring transient deformation data on metallic solid surfaces
01 p0078 A69-10117

Holographic phase variation distribution recording by interference between reconstructed wave fronts from separate holograms
01 p0083 A69-10984

Radio telescope for Owens Valley Radio Observatory, noting interferometer array of steerable antennas and signal wavelength influence on telescope reflector accuracy
02 p0229 A69-11974

Interferometric laser beam scanner using hollow cathode mercury ion laser output
04 p0609 A69-14288

Holographic interferometer for isopachic stress analysis, utilizing photochromic recording for real time interference
04 p0599 A69-15013

Line profile and optical interferometry in astronomy and geophysics
05 p0760 A69-15590

Plasma refractive index determination by holographic interferometry with double pulse ruby laser
05 p0761 A69-15620

Holography, discussing one beam recording, real time interferometry, pulsed laser, etc
05 p0761 A69-15774

Time averaged optical holographic interferometry of standing longitudinal acoustic waves in square cross section duct
06 p0923 A69-17150

Holographic interferometry, determining mechanical vibration amplitudes of compressor and turbine blades and airframe panel [SAE PAPER 690265]
07 p1130 A69-18313

Holography combined with laser interferometry for nondestructive testing in materials, components and assemblies
07 p1137 A69-19777

Monograph on interferometric studies of unsteady shock waves in theta pinch driven shock tube, discussing flow characteristics in helium and hydrogen
08 p1304 A69-20710

Reflection interferometry for visual evidence of surface deformation of rock and metal samples using two beam Fizeau fringe system
09 p1496 A69-22012

Laser resonator loss factor and axial mode frequency calculation by interferometry
09 p1520 A69-22679

Shearing interferometry by simultaneous reconstruction of two wavefronts on single photographic plate
10 p1690 A69-22952

Resonator interferometry of pulsed submillimeter wave lasers, analyzing mode structure, pulse shapes and molecular mechanism of laser emission
10 p1705 A69-23810

Intensity interferometry by two photon excitation of fluorescence trace for three mode laser under phase locking, free running and FM-like conditions
10 p1705 A69-23811

Conventional interferometry advances due to gas laser development, discussing basic concepts and methods of interferometers
11 p1881 A69-24599

Pulsed laser holography advantages for recording small objects in motion and holographic interferometry advantages for complex surfaces and time-separated events
11 p1883 A69-24682

Pulsed laser holography for recording interferograms of laser created plasma, discussing laser source properties, spatial and spectral coherence, double pulse mode, etc
11 p1895 A69-24683

Real time Fourier spectroscopic system for synthesis of spectrum of interferogram, noting polystyrene IR transmission spectra
11 p1884 A69-24837

Distance vs time and velocity vs time measurements for high speed model missiles by means of laser interferometry and optical Doppler shift method
11 p1886 A69-25042

Brightness temperature distributions from intensity interferometric measurements reconstructed by computation
11 p1888 A69-25256

Shadow and schlieren photography, interferometry and quantitative data treatment obtainable by high speed multiframe photographic arrangement, using laser beam
12 p2086 A69-26165

Holography theory and applications including imaging, Fourier transforms and interferometry
12 p2086 A69-26169

Repetitive Q switched laser light source for interferometry, holography and high speed photography
12 p2087 A69-26170

Quantitative interferometric analysis of shock induced wavelength variations in glass and polished steel plates using Q switched ruby laser light source
12 p2089 A69-26185

HF interferometry for statistical-numerical oscillation analysis of unsteady plane transonic flow, constructing phase planes for study of wave surfaces propagation
12 p2089 A69-26188

Coherent optical flow detection and surface microstrain measurement techniques including holographic interferometry, optical correlation and diffraction
12 p2180 A69-26305

Laser interferometer determining spatial distribution of neon metastable state in He-Ne active discharge, discussing lens effects
12 p2108 A69-26636

Lasers application to measurement techniques including alignment, direction, distance, elongation, interferometric, holographic, etc
12 p2094 A69-26903

Shadow, schlieren and interferometric methods for study of transonic, supersonic and hypersonic fields of aerodynamics, using refractivity variations in heterogeneous medium
12 p2060 A69-26934

Natural unbroken tektite surface examination by interferometry, discussing fringe patterns for pit shapes and sizes
12 p2173 A69-27175

Multichannel optical interference fluid manometer, using laser light source for fringe pattern photographic record
13 p2263 A69-28190

Pulsed laser holographic interferometry of density field created by high speed projectile motion in air [AIAA PAPER 69-347]
13 p2263 A69-28282

Optical refraction effects from refractive index gradients in stressed models as limitation on moire interferometry usefulness in Boussinesq problem and expanding pulse studies
14 p2531 A69-28883

Interferometric technique for studying fracture specimens plastic zone using laser holography
15 p2609 A69-30681

Stresses in fixed two dimensional photoelastic models analyzed by hologram interferometry, displaying isochromatic and isopachic interference patterns
15 p2611 A69-31110

Time average, multiple exposure and real time holographic interferometry based on image synthesis
15 p2611 A69-31146

Holographical interferometry with laser spark radiation containing fundamental and second harmonic wavelengths, confirming heavy particle densities decrease in plasma with time
16 p2789 A69-31771

Electron density measurement method in plasma or vacuum based on refraction index in optical frequency range using laser interferometer mismatch as criterion
16 p2798 A69-32583

Interferometric observations of radio source VRO 42 22 01 listed with antenna separations in wavelengths and with resolution direction
17 p3026 A69-32861

Multiple interference effect introduced by nonlinear characteristics of photographic material, measuring phase variations by holographic multiple beam interferometry
17 p2977 A69-34159

Shock heated argon thermal conductivity studied by optical interferograms, deriving equation for measured mean value
18 p3228 A69-34459

Vibration measurement by hologram interferometry, explaining interference fringes as linear combination of vibrating object classical modes
18 p3135 A69-34635

Thermal coefficient of optical glasses refractive index determined by interferometry, noting relation to glass chemical composition
18 p3172 A69-35013

Strains in solids of any form, using moire method combined with holographic interferometry
18 p3139 A69-35280

Holographic interferometry for nondestructive testing of aircraft materials, discussing applications to quality control
19 p3322 A69-35576

Solid state laser emission frequency control and retuning using dispersive resonators, analyzing interference methods for wavelength measurement
19 p3331 A69-35865

Plate material Poisson ratio determined by application of holographic interferometry to plate pure bending deformation contour lines
19 p3312 A69-36206

Holographic camera using Q switched laser for recording high speed interferograms in plasma diagnostics
19 p3315 A69-36726

Frequency controlled unmodulated laser for long path interferometry, noting servoloop correction of frequency relative to Lamb dip
20 p3553 A69-37303

Intensity interferometer applications comparison with Michelson interferometer, discussing sensitivities, radio and optical wavelength astronomy, space plane waves, etc
21 p3722 A69-38794

Holographic interferometry by single two wavelength laser pulse exposure, discussing variable sensitivity techniques
21 p3725 A69-39448

Wedge fringes visibility and localization in hologram interferometry during focusing on surface under examination for displacements
22 p3943 A69-40016

Spatial coherence of He-Ne laser beam studied in Young interference experiment, noting multimode light percentage attributed to weak transverse modes
22 p3960 A69-40018

Strain measurement by interferometer with gas laser source emphasizing long period measurement problem
22 p3960 A69-40189

Holography for engineering metrology, discussing interferometry, pattern interpretation, inspection techniques, etc
22 p3945 A69-40235

Laser interferometric length measurement by fringe counting, considering mechanical and optical systems limitations and design tolerances
22 p3960 A69-40238

Holographic interferometry for surface strain and vibrations visualization, describing photographic recording techniques
22 p3945 A69-40244

Holographic interferometry for measuring small static displacements of diffusely reflecting surfaces
23 p4167 A69-42185

Holographic interferometry for determining total free electrons in plasma produced by irradiating solid hydrogen foils with giant pulse ruby laser
24 p3414 A69-42980

Microcrack detection by holographic interferometry, describing experimental apparatus and test procedure and results
24 p3417 A69-43763

Three dimensional shadowgraph-like images in single exposure holograms of diffusely illuminated flame explained as time average holographic interferograms
24 p3417 A69-43764

INTERGALACTIC MEDIA

Submillimeter wavelength astronomy noting instruments, prestellar matter, interstellar and intergalactic matter state and composition, IR stars, planetary atmospheres, etc
05 p0821 A69-15843

Metastable helium abundance in interstellar and intergalactic space, inferring low energy cosmic ray concentration
06 p1010 A69-17973

Galactic and intergalactic ionic fine structure transitions effect on background microwave radiation intensity
09 p1590 A69-21445

Supplemented data to analyze intergalactic gas diffuse X ray background radiation
10 p1792 A69-24209

Thermal balance of intergalactic gas, discussing plasma energy losses due to He emission and reverse Compton electron scattering and rapid cooling effect
11 p1954 A69-24381

Nonthermal intergalactic bremsstrahlung model as isotropic X ray background due to subcosmic electron interactions with thermal ionized gas in expanding universe
11 p1947 A69-24595

Intergalactic matter capture by NGC 1614 nucleus, stellar ejection from galaxies, explosive separation of close binary and other unsteady phenomena in galaxies 12 p2169 A69-27061

Doppler effect significance in radio astronomy including galaxies relative motion and information concerning isolated hydrogen clouds between galaxies 16 p2853 A69-31565

Sky brightness temperature spectra searched for neutral intergalactic atomic hydrogen radio emission, using horn-reflector antenna 18 p3190 A69-34285

Microwave background anisotropy induced by gravitational effects interpreted using spatially flat Friedmann model for substratum 18 p3190 A69-34286

Quasars and intergalactic hydrogen density, using Schmidt law of increase in number density of quasars to construct plausible models 18 p3190 A69-34288

Thermal balance of intergalactic gas, discussing plasma energy losses due to He emission and reverse Compton electron scattering and rapid cooling effect 24 p4389 A69-43771

INTERGRANULAR CORROSION

Failure mechanism for intergranular stress corrosion cracking of vacuum annealed unalloyed Ti in alcohol iodine solutions 16 p2798 A69-31717

Precipitation hardening, microstructure and dislocation influence on intergranular stress corrosion cracking /SCC/ of high strength Al alloys examined by transmission electron microscopy 19 p3351 A69-36898

INTERIOR BALLISTICS

Solid fuel rocket engine thrust and chamber pressure development curves from charge and engine geometry, heat of explosion and kinetic characteristics 16 p2836 A69-31994

Solid propellant rocket motors ignition and igniter performance, discussing ignition interior ballistics 16 p2829 A69-31997

INTERLAYERS

NT MULTILAYER INSULATION

Interlayer slip in layered wood beams with nail joints analyzed in terms of small deflection theory 01 p0169 A69-10638

Seasonal variations in thickness of ionospheric E-F interlayer region during daylight and maximum integral ionization values 02 p0239 A69-11682

Seasonal variations in thickness of ionospheric E-F interlayer region during daylight and maximum integral ionization values 13 p2257 A69-28713

Longitudinal modulus of interlaminar slip during creep of fiberglass reinforced plastic determined by bending tests of beams under concentrated force 18 p3163 A69-35365

INTERLOCKING

U LOCKING

INTERMEDIATE FREQUENCY AMPLIFIERS

Linear integrated circuit communication systems based on subsystem approach, showing example of IF strip and audio AGC/squelch amplifier 01 p0035 A69-11389

Direct coupled monolithic IF amplifier with active gain control, analyzing large signal response, stability, available gain and noise behavior 07 p1104 A69-18885

Clutter residues of coherent MTI radar receiver, emphasizing IF stages saturation nonlinearity affecting cancelling circuits performance 13 p2220 A69-27941

Noise stability of FM receiver with automatic control of IF amplifier resonance frequency in presence of weak noise 15 p2564 A69-30144

Bandwidth requirement of single channel monopulse limiter, discussing signals conversion to IF 16 p2761 A69-32471

INTERMEDIATE RANGE BALLISTIC MISSILES

U POLARIS MISSILES

INTERMETALLICS

Irradiation influence on yield stress of Ni-Al intermetallics noting temperature dependence and electron dosage 01 p0095 A69-10608

Diffusion data in binary compound semiconductors, tabulating impurities, electrical behavior, temperature variations and diffusion coefficients 02 p0296 A69-11809

Ferromagnetic ordering effect on gadolinium dialuminide thermoelectric power, measuring temperature dependence of power and electrical resistivity 03 p0485 A69-13322

Diffusion in compounds of elements of groups III-V 04 p0641 A69-14502

Radiation effects on III-V compounds, considering damage in solar cells and luminescence, light emitting and Esaki diodes 04 p0641 A69-14504

Ti-Zr-Sn alloys phase equilibria and interaction between titanium stannide and solid solution of Ti and Zr 07 p1162 A69-18770

Microstructure relationship to tensile strength and creep resistance in Zn-Ni-Ti alloy extrusions, discussing role of finely dispersed intermetallic particles 08 p1329 A69-20002

Fatigue characteristics of unidirectionally solidified Al-intermetallic aluminum nickel eutectic alloy consisting of discontinuous Al-Ni intermetallic whiskers in Al matrix 08 p1329 A69-20006

Temperature dependence of single crystal elastic constants of nickel aluminide determined by ultrasonic wave propagation measurement 08 p1332 A69-20288

V phase structure and V and E phase lattice constants for ternary systems /Ti, Zr, Nb or Ta/-/Ni, Co or Fe/-/Si or Ge/ 10 p1708 A69-22992

Intermediate Ni-Nb intermetallic formation as decomposition product from supersaturated Ni rich Ni-Nb solid solution aged above room temperature 10 p1708 A69-22993

Unidirectionally solidified eutectic composite of Al and Cu-Al intermetallic, noting tensile properties at room and high temperatures 10 p1708 A69-22995

Electron fractography of aluminum alloy fatigue for intermetallic particles and inclusions effects on crack growth 10 p1795 A69-23065

Magnetic reversible phase holograms on thin film Mn-Bi by Curie-point writing technique 10 p1706 A69-24007

Gadolinium-cobalt system investigation by X ray diffraction thermoanalysis and metallography for intermetallic compounds, noting structure transformation and homogeneity 11 p1903 A69-24574

Intermetallic compound precipitation effects on mechanical properties of Fe-Mo alloy at high temperatures 12 p2116 A69-26925

Composition, gamma structure and mechanical properties of three unidirectionally solidified eutectics within Ni-Al-Cb, Ni-Al-Zr and Ni-Al-Ti systems 13 p2277 A69-27407

Controllable process for forming Ti-Ni intermetallic wear resistant coating on Ti alloys, discussing techniques, weight saving advantage, gear tests, etc 19 p3323 A69-35582

Ti sub 3, Rh sub 5 and Hf sub 3, Rh sub 5 existence and isomorphism confirmed by crystallographic and X ray methods 19 p3343 A69-35920

Stoichiometric NiAl slip line and dislocation structures during creep at high temperatures, considering possible creep mechanisms 19 p3343 A69-35923

Diffusion processes, composition and structure of vapor deposited Ni coatings on Nb substrate, plotting intermetallic compounds growth against temperature 20 p3560 A69-37366

INTERMODULATION

Intermodulation and cross modulation distortions in double balanced modulator 04 p0573 A69-14341

Cross modulation of amplitude modulated wave propagating in nonlinear dispersive plasma, obtaining electric vector 07 p1086 A69-19228

Spectral distribution of intermodulation noise of AM and FM transmission systems calculated by probability theory 08 p1271 A69-19916

Noise power ratio at output of wideband amplifier with angle modulated multicarrier input, obtaining intermodulation products from Bessel functions expansion 08 p1285 A69-20595

Intermodulation noise distorting arbitrary frequency-modulated multicarrier microwave signal in satellite transponder, emphasizing nonlinear energy dissipation and AM-FM conversion 11 p1841 A69-25634

Receivers EMC, discussing single parameter to evaluate susceptibility to desensitization, cross modulation and intermodulation 23 p4142 A69-42232

INTERMOLECULAR FORCES

Intermolecular interaction potentials for dissociating air components determined by calculating collision integrals for very high temperature gases 02 p0283 A69-11586

Numerical solution for excitation of oscillations in diatomic molecules during atom-molecule collisions at high temperatures, determining intermolecular interaction forces 02 p0284 A69-12485

Depolarized Rayleigh line widths measured for carbon dioxide, nitrogen and hydrogen, using measurements to calculate reorientation cross sections [IEEE PAPER B-11] 07 p1157 A69-19485

Near resonant transfer of vibrational energy from carbon dioxide nu 3 mode to N 14 and N 15 molecules in collisions 08 p1358 A69-21011

Intermolecular potential function relation to individual macroscopic properties extended to simultaneous fit of all possible pair combinations 10 p1652 A69-23391

Crack propagation through layer of viscous fibers joining orthotropic elastic half planes 10 p1803 A69-24029

London-van der Waals interaction energy of symmetric molecular pair calculated in perturbation theory second order as infinite series in negative powers of separation 12 p2131 A69-26606

Molecular beam scattering analysis by four parameter B-C intermolecular potential, plotting expansion coefficients against reduced curvature 13 p2301 A69-27206

Gas-gas interactions second virial coefficients measured at various temperatures, comparing experimental data with results calculated by Kihara potential 14 p2488 A69-29927

Valence force constants for nitric acid evaluated from fundamental mode vibration spectra by matrix method 15 p2561 A69-30467

Temperature dependence of intermolecular interaction averaged potentials with respect to vibrational states 15 p2655 A69-30982

Heated supersonic beam study of He-Ar intermolecular potential, determining total elastic collision cross section as function of velocity in scattering chamber 19 p3377 A69-36183

INTERNAL COMBUSTION ENGINES

NT BRISTOL-SIDDELEY OLYMPUS 593 ENGINE

NT DUCTED FAN ENGINES

NT GAS TURBINE ENGINES

NT HELICOPTER ENGINES

NT J-79 ENGINE

NT J-85 ENGINE

NT JET ENGINES

NT PULSEJET ENGINES

NT RAMJET ENGINES

NT SUPERSONIC COMBUSTION RAMJET ENGINES

NT T-53 ENGINE

NT TURBOFAN ENGINES

NT TURBOJET ENGINES

NT TURBOPROP ENGINES

NT WANKEL ENGINES

Rotary engines, discussing scissor, eccentric rotor, multiple rotor and revolving block types 07 p1203 A69-18910

Book on Wankel RC engine design and performance covering sealing, timing, life, lubrication, etc 11 p1942 A69-25237

Fueling process in internal combustion engines having fuel admission systems with different flow cross sections 19 p3393 A69-35824

INTERNAL ENERGY

Ideal fluid interaction with gravitational field, assuming internal energy as function of natural pressure and density 07 p1182 A69-19419

Atmospheric energy budget of latent and sensible heat and potential energy between equator and 60 degree N
12 p2066 A69-26132

Linear thermal anomaly on western margin of Mare Humorum, rejecting internal heating origin
21 p3797 A69-38535

Variational method using Hamilton principle and calculus of variations to determine elastic curve and internal forces in static or dynamic loaded beam
22 p4043 A69-40459

INTERNAL FRICTION

Internal friction measurement apparatus for non-metallic solids, noting variations of Young modulus in extremely low loss materials
03 p0428 A69-13108

Temperature dependence of internal friction in molybdenum wire in moderate and high temperatures
03 p0446 A69-13576

Relaxation mechanism of low temperature internal friction peaks in niobium quenched to room temperature
03 p0447 A69-13617

Internal friction temperature effects on amplitude dependence in niobium and molybdenum
04 p0614 A69-14635

Complex form internal friction maximum composed of interstitial atoms in molybdenum solid solution
04 p0615 A69-14640

Amplitude dependent internal friction of materials under inhomogeneous strain, giving values for torsional, free longitudinal and transverse vibration modes
08 p1331 A69-20175

Stress graphitizing and boron codposition effect on dynamic mechanical properties of pyrolytic carbon, noting increase in internal friction and dynamic modulus
10 p1716 A69-23036

Audio frequencies internal friction measurement of austenitic stainless steels subjected to heat treatment and corrosion, discussing time dependence and carbide precipitates morphology
10 p1713 A69-23819

Stability of high speed single mass rotor with internal friction on damped anisotropic supports, considering support stiffness
[ASME PAPER 69-VIBR-2]
10 p1805 A69-24160

Dissipative fluid sphere motion due to impulsive point source calculated by finite difference scheme, assuming Voigt and Maxwell type internal friction mechanisms limitations
14 p2485 A69-29026

Love wave amplitude data satisfying earth model with intrinsic internal friction at depths assumed due to single thermally activated relaxation
15 p2596 A69-30624

Clevis design for reduced friction errors associated with round hole clevis in plane strain fracture toughness measurements
15 p2612 A69-31150

Plastic expansion in metals due to alternating torsional and static tensile loading
16 p2875 A69-32291

Free-free transverse vibration damping phenomena, calculating strain amplitude dependence of internal friction at various frequencies
17 p3051 A69-32961

Forced harmonic oscillations of one dimensional mechanical girder systems allowing for nonlinear resisting forces calculated by boundary value problem reduction to Cauchy problem
17 p3064 A69-33917

Surface layer role in strengthening of iron determined from examining temperature dependence of internal friction during thermomechanical treatments
17 p2991 A69-33939

Annealing temperature effect on Ni-Ti alloys internal friction, noting peak connected with solid solution grain boundaries
18 p3158 A69-35443

High temperature anelastic effect in Mo single crystals ascribed to internal friction peak due to electronic interactions between dislocations and C interstitials
24 p4332 A69-43031

INTERNAL PRESSURE

Mixed boundary value problem of elastostatics for isotropic elastic cylinder containing strip crack opened by internal pressure, using auxiliary functions
01 p0167 A69-10317

Ductile creep rupture of thin walled membrane shell of revolution subjected to time dependent internal pressure and strain hardening
[ASME PAPER 68-WA/MET-15]
05 p0838 A69-16153

Circumferential buckling of ellipsoid of revolution due to internal pressure, assuming linear deflection and uniform thin shell
[ASME PAPER 68-WA/PVP-12]
05 p0840 A69-16190

Stress calculation for internal pressure in moment-less shell of revolution
05 p0843 A69-16690

Fatigue crack propagation in cylindrical shells under fluctuating internal pressure, considering stress intensity factor
10 p1795 A69-23066

Deformations and stresses in pressure vessel with elliptical cross section under uniform internal pressure, noting radial deflection and membrane, bending and skin stress
11 p1983 A69-25023

Orthotropic cylindrical shell stability under uniform axial compression and internal pressure, taking into account subcritical state duration
14 p2532 A69-28981

Creep strain rate and stress distribution of thick walled cylinders under internal pressure at elevated temperature, using variational principle
15 p2703 A69-30070

Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic beams along edges, analyzing local deformations effect on shell strength and stability
16 p2873 A69-32131

Plastic failure under internal pressure of aluminum spherical shells with single radial or oblique nozzle based on limit analysis theory
17 p3052 A69-32983

Longitudinal crack in cylindrical shell under internal pressure, calculating normal and bending stress singularity strengths against curvature/cracklength parameter
18 p3212 A69-34346

Plastic inhomogeneity effects on yield stress of isotropic spherical shell and long cylindrical tube under internal pressure
24 p4405 A69-43672

INTERNAL STRESS

U RESIDUAL STRESS

INTERNATIONAL COOPERATION

International experimentation with U.S. communications satellites, noting design variations with participants and restraintless information exchange
[UN PAPER 68-95421]
01 p0108 A69-10474

Legal problems in space navigation and solution through international law including air and outer space limits, regulating authority and damage liability
[UN PAPER 68-95475]
01 p0179 A69-10511

Meteorological satellite observations value to Southern Hemisphere
[UN PAPER 68-95213]
01 p0109 A69-10513

NASA programs and opportunities for international cooperation in space
[UN PAPER 68-95367]
01 p0179 A69-10516

San Marco project, discussing Italian Space Commission and NASA cooperation, equatorial range concept and development
[UN PAPER 68-95862]
01 p0180 A69-10518

International liability for damage caused by launching of objects into outer space
[UN PAPER 68-95337]
01 p0180 A69-10525

Book on Demeter-earth resources satellite system covering design, instrumentation, cost estimates, economic benefits and political considerations
01 p0163 A69-11333

Collection of papers on French space effort covering space sciences and applications, vehicles and boosters, launch sites, tracking, international cooperation, etc
02 p0315 A69-11901

Book on international law and uses of outer space covering effects of UN General Assembly Resolutions and Outer Space Treaty
02 p0356 A69-12676

International satellite system for commercial aircraft communications and air traffic control
03 p0464 A69-13238

European space research program, discussing government, science and industry in developing satellites and sounding rockets
03 p0520 A69-13584

U.S.-European cooperation in space activities, discussing implementation by COSPAR and jointly owned industrial corporations
03 p0535 A69-13586

Cooperation in developing space programs between Western Europe and U.S.
03 p0535 A69-13588

Cooperation between U.S. and Europe in space programs, discussing contracts and conditions
03 p0535 A69-13590

Cooperation between U.S. and Europe in communication satellite programs
03 p0535 A69-13591

Topics and objectives of Third Eurospace U.S.-European Conference, Munich, June 1968
03 p0535 A69-13594

U.S.-European cooperation, stressing unsatisfactory role of European industry and governments in space projects
03 p0536 A69-13595

Aerial navigation regulation and international law discussing 1944 Chicago convention for international cooperation
05 p0849 A69-15681

German Air Force Center of Aeronautical Medicine discussing organization, work projects and proposed mutual cooperation with French counterpart
05 p0850 A69-16629

French and German cooperative program Project T Symphonie to develop telecommunications satellite for radio and TV broadcasting
05 p0830 A69-16817

International problems of air traffic control, discussing legal and political basis for organization and ATC liability
06 p1042 A69-16846

German-American interplanetary vehicle to investigate interplanetary space and solar characteristics
06 p1012 A69-16970

Legal and technical aspects of international cooperation in spacecraft crew rescue operations signed by UN General Assembly
06 p1042 A69-17033

International cooperation results in field of optical tracking of satellites for solving problems of atmospheric physics, geophysics and geodesy
06 p1042 A69-17050

U.S.S.R. international cooperation in outer space exploration for peaceful purposes, stressing space meteorology, communications, biology and medicine
[UN PAPER 68-95669]
06 p1043 A69-17054

International 28-station global instrumentation ground support network for space tracking and data acquisition
[UN PAPER 68-95912]
06 p1043 A69-17059

Interamerican Experimental Network of Meteorological Investigation with Rockets/EXAMET-NET/, discussing atmospheric parameters measurement at high altitude
[UN PAPER 68-95903]
06 p0950 A69-17062

Satellite telecommunications, discussing Australian experience, ground stations location, national network and international cooperation
[UN PAPER 68-95286]
06 p0886 A69-17066

Soviet and French coordinated geophysical studies at magnetically conjugate points in northern U.S.S.R. and Indian Ocean
06 p0918 A69-17391

Concorde supersonic transport and Jaguar Military Strike/Trainer programs, discussing management and international cooperation
06 p1043 A69-17831

World satellite telecommunications network, discussing recommendations with reference to signal transmission, acoustic echoes, etc
07 p1079 A69-18942

PCM telemetry system for sounding rocket payloads flown in polar light zone within German-American project AZUR
07 p1081 A69-19099

Satellite communications history covering passive and active satellites and Communication Satellite Act, impact
07 p1085 A69-19182

Legal problems in space navigation and solution via international law including air and outer space limits, regulating authority and damage liability
07 p1244 A69-19233

Regulatory content of international agreements concerning communication satellites problems
08 p1422 A69-20584

Reliability terms for electrical apparatus, equipment and systems, indicating need for international standardization
08 p1292 A69-21108

Communication satellite systems role in world telecommunication network, discussing traffic type, volume and routing, earth stations location and capacities and orbit selection
09 p1449 A69-21271

International air traffic regulations for reciprocity and conventions between contracting states
09 p1626 A69-22092

Auroral French rocket probe in Norway, studying low energy particles, relations between electron showers and high altitude electric fields, etc
09 p1498 A69-22160

Yearbook of air and space law /1966/ covering documents on legal doctrines, treaties, regional arrangements, national bibliographies, Warsaw Convention, Hague Protocol, etc
10 p1811 A69-23986

Meteorological rocket probes in Spain for wind and temperature measurements, including stratospheric circulation data
11 p1877 A69-24519

European space research program, discussing government, science and industry in developing satellites and sounding rockets
11 p1966 A69-25102

Concorde SST industrial project in international cooperation and stage in transport history including supersonic boom, weight, fuel consumption rates and aerodynamic heating
12 p2013 A69-26356

European Space Research Organization projects including satellites and sounding rocket launchings for various missions
12 p2175 A69-26922

International space law definitions, technology, regulations, role of industry and government, etc
13 p2381 A69-27529

Airline ticket as international commodity, discussing regulations and agreements concerning appearance, loss, transferability, etc
13 p2381 A69-27530

International law governing aerospace activities /1966 to 2066/
13 p2382 A69-27829

European earth resource satellite systems technology, applications and costs
13 p2356 A69-27833

Application satellites effects on European economy
13 p2382 A69-27834

Helicopter airworthiness requirements, discussing need for international cooperation on safety regulations
13 p2202 A69-27837

Internationalized defense marketing, suggesting formation of international consortia of industrial companies to design and produce defense systems
14 p2540 A69-28933

Comets considered as natural interplanetary space probes, stressing need for international cooperation on solar system studies
15 p2679 A69-30011

Communications mission of Symphonie project and satellite communications subsystem design
15 p2562 A69-30084

Outer space law principle sources including divine law, UN and NASA contractors regulations
15 p2720 A69-31052

Mass supersonic air transport physiological problems, reporting findings of FAUSST committee concerning ozone toxicity, pressure drops, sonic booms, time zone physiology, etc
15 p2556 A69-31225

Australian space research including space flight programs in cooperation with NASA
15 p2724 A69-31450

Electrophysiological /electrosplanchnogram/ medical data transmission via satellite from France to U.S. for real time computer processing
16 p2746 A69-32070

Franco-British aeronautical cooperation and Concorde development agreement of 29 November 1962
17 p3075 A69-32840

UFOs from sociological viewpoint, stressing need for international cooperation in exobiological research
17 p3076 A69-32974

International organization and project management procedures in design and construction of Heos 1 satellite for measuring charged particles energy distribution outside geomagnetic field
17 p3050 A69-33699

German research satellite Azur design and production management
17 p3050 A69-33700

Franco-Soviet rocket probe launchings for measuring daytime/nighttime ions and neutrons
18 p3210 A69-35282

Article 8 /I/ of Carriage by Air Act, 1932 compared to Warsaw Convention Article 8 /I/, noting definition of legal liability of carrier
19 p3455 A69-36331

Airworthiness certification of civil aircraft, discussing international cooperation on inspection, accident investigation, etc
19 p3456 A69-36688

ITU space communication projects, discussing frequency registration, progress reports from member countries and committees, UN resolutions, communication satellites, etc
19 p3456 A69-36821

European cooperation in aircraft industry and application to Anglo-French helicopter program
19 p3456 A69-36849

Treaty on Outer Space interpretation regarding establishment of international space agency with sufficient authority
20 p3635 A69-37103

1967 Space Treaty Article 11, discussing provisions concerning private exploitation and supernational body authority
20 p3635 A69-37107

ESRO and legal liability in damage suits concerning satellite protection and environmental control
20 p3635 A69-37108

Space law legal liability definitions for damage caused by space objects, discussing juridical principle and procedure
20 p3636 A69-37110

1967 Space Treaty legal aspects of consultation, suggesting international permanent body setup for resolving technical and political matters
20 p3636 A69-37111

Agreement on Rescue and Return of Astronauts and Return of Objects Launched into Outer Space, discussing unintended landing
20 p3636 A69-37113

Agreement on Rescue and Return of Astronauts and Return of Objects Launched into Outer Space, noting humanitarian considerations and indemnity for services rendered
20 p3636 A69-37114

UN agreement provisions on international cooperation for rescuing astronauts and objects in case of accident, distress, emergency or unintended landing
20 p3637 A69-37116

Space vehicles registration within Treaty on Outer Space to provide protection for vehicle and third parties in cases of damage
20 p3637 A69-37117

Satellite telecommunication systems coordination, discussing transformation feasibility of consortium or international organ into international organization
20 p3637 A69-37120

INTELSAT program, discussing U.S. proposals regarding domestic services, separate satellite programs, etc
20 p3637 A69-37121

INTELSAT 1964 agreements consistency with multilateral international agreements, including UN General Assembly and International Telecommunication Union
20 p3638 A69-37122

International cooperation regarding space telecommunication systems, discussing INTELSAT and INTERSPUTNIK roles in achieving international coordination and equality
20 p3638 A69-37125

Space law history, discussing Space Treaty and UN Declaration of Legal Principles
20 p3638 A69-37128

Multiple use doctrines in space law for resource utilization, discussing formation of planning commissions and licensing agencies
20 p3639 A69-37133

Planetary resources control and use from legal and policy standpoints, discussing space treaty effects on international law
20 p3639 A69-37134

International organizations and planning for earth observation satellite program involving exploitation in communications, meteorology and aircraft
21 p3855 A69-38622

Communication satellites with regard to international arrangements for fruitful exploitation noting COSMAT, INTELSAT, European and international developments
22 p4052 A69-40276

INTERNATIONAL GEOPHYSICAL YEAR

Meridional flow, angular momentum and energy flux in atmosphere calculated from IGY data
08 p1346 A69-20312

Solar radio emission data during IGY covering solar terrestrial disturbances, broadband bursts, solar indices, etc
14 p2513 A69-29321

Sudden enhancement of atmospherics recorded during IGY, noting time lag between flare and SEA maximum
16 p2778 A69-32192

High latitude geomagnetic field quiet solar diurnal variations during magnetically quiet IGY winter days, relating type and amplitude at low and midlatitudes
17 p2964 A69-33960

Physical model for IGY radio aurora data correlated with Brice magnetospheric convection model
18 p3125 A69-34231

**INTERNATIONAL LAW
NT SPACE LAW**

Aerial navigation regulation and international law, discussing 1944 Chicago convention for international cooperation
05 p0849 A69-15681

International problems of air traffic control, discussing legal and political basis for organization and ATC liability
06 p1042 A69-16846

Legal and technical aspects of international cooperation in spacecraft crew rescue operations signed by UN General Assembly
06 p1042 A69-17033

Interpretation of term peaceful in Space Treaty and use of outer space including celestial bodies
07 p1244 A69-19234

Regulatory content of international agreements concerning communication satellites problems
08 p1422 A69-20584

International air traffic regulations for reciprocity and conventions between contracting states
09 p1626 A69-22092

Air carrier liability for nuclear weapons damage, discussing international agreements
11 p2003 A69-24260

Aircraft hijacking prevention through technical and legal means, discussing national and international air piracy laws
13 p2381 A69-27528

Airline ticket as international commodity, discussing regulations and agreements concerning appearance, loss, transferability, etc
13 p2381 A69-27530

Air piracy legal aspects as determined by Swiss law and Treaty of Tokyo
19 p3454 A69-35979

Legal liability in civil aviation, proposing international treaty
19 p3454 A69-35980

Article 8 /I/ of Carriage by Air Act, 1932 compared to Warsaw Convention Article 8 /I/, noting definition of legal liability of carrier
19 p3455 A69-36331

Space law legal liability definitions for damage caused by space objects, discussing juridical principle and procedure
20 p3636 A69-37110

1967 Space Treaty legal aspects of consultation, suggesting international permanent body setup for resolving technical and political matters
20 p3636 A69-37111

1967 Space Treaty peaceful activities definition, suggesting explicit provisions regarding treaty province, enforcement machinery and implementation
20 p3636 A69-37112

Amendments considered for international law regarding earth and space rescue services as result of contemporary U.S. manned space flight programs
20 p3637 A69-37115

Juridical norms defined by Madrid, Belgrade and Washington conferences regulating exploration and utilization of extraterrestrial bodies and space, considering satellite communications networks
20 p3638 A69-37123

Legal principles observed for international telecommunication systems establishment by means of artificial satellites regarding states interests and rights
20 p3638 A69-37124

International legal liability for personal injury or property damage caused by space activities
20 p3638 A69-37127

International space law basic ideas and future trends, considering freedom of exploration, UN proposals, space demilitarization, etc
20 p3639 A69-37131

Domestic and international law compared in connection with space program, considering legal aspects of

using satellites in discovering and exploiting earth resources

20 p3639 A69-37132

Custody, jurisdictional conflict and prosecution problems of in-flight crimes, discussing federal judicial jurisdiction and Tokyo Convention ratification

22 p4053 A69-40708

Book on law making in International Civil Aviation Organization covering membership problems, air navigation and transport safety, settling of disputes, etc

23 p4240 A69-41297

INTERNATIONAL PRACTICAL TEMPERATURE U TEMPERATURE SCALES

INTERNATIONAL QUIET SUN YEAR

Global solar radiation flux measurements over India during IQSY

02 p0307 A69-11819

Book containing 1960-1965 /including IQSY/ chronological tables of solar and geophysical events, discussing solar activity, geomagnetic, ionospheric, auroral and cosmic ray research

02 p0321 A69-12165

Ionospheric current systems for various selected very quiet and slightly disturbed international quiet days based on Northern Hemisphere observatories data

03 p0423 A69-13518

Sporadic E region HF backscatter observed during IQSY, using PPI display

09 p1489 A69-21701

Collection of articles on proton flare project /July 1966 event/ during IQSY, covering solar magnetic field, chromosphere, photosphere, solar activity, etc

10 p1760 A69-23725

Visual, photographic and spectral observations of comets during IQSY, discussing comets Tomita-herber-Honda 1964c and Ikeya-Seki 1965f

14 p2525 A69-29716

Solar activity history and morphology /1964-1965/

15 p2679 A69-30006

Cosmic ray observations on synoptic scale, discussing equipment and programs of IQSY world array of monitor stations

15 p2673 A69-30012

IQSY low energy galactic and solar cosmic ray observations made by various satellites and space probes, including hydrogen and helium energy spectra

15 p2673 A69-30014

IQSY night airglow photometric observations, summarizing zenith intensity and north/south intensity ratio data

15 p2594 A69-30019

Book on cosmic ray variations and solar activity during IQSY covering energy spectrum, outer space radiation, magnetosphere, etc

16 p2849 A69-32052

Solar radio emission during quiet sun years 1964-1965 mapped using Stanford spectroheliograph, attributing slowly varying component to electron density enhancement

18 p3188 A69-35395

Daily solar radio noise intensity at 10.7 cm with slowly varying components and quiet sun emission, revealing rise only and absorption bursts

19 p3401 A69-35758

Auroral arcs orientation curves for IQSY evaluated from all sky camera data, comparing results with IGY curves

24 p4308 A69-43009

INTERNATIONAL SATS FOR IONOSPHERIC STUDY U ISIS SATELLITES

INTERPLANETARY COMMUNICATION

Communication systems in interplanetary space covering telemetry, remote control, Doppler and distance measurements, coherent PCM/PSK/PM, demodulation, deep space network, etc

12 p2027 A69-25875

Deep space telemetry bit errors increased by reference signal phase noises and partial RF signal suppression, calculating equivalent signal to noise ratio degradation

13 p2223 A69-28609

INTERPLANETARY DUST NT ZODIACAL DUST

Micrometeorite and meteoric dust data obtained in Soviet space flights

01 p0155 A69-10939

Gaseous hydrates formation in comet nuclei, discussing stability at given temperatures and pressures and solar radiation shielding by dust sheath

03 p0515 A69-14032

Lunar libration clouds, discussing visual observation at small phase angles for estimation of dominant cloud particle size

05 p0827 A69-16527

Doppler shift in zodiacal light spectrum, noting variation of dust concentration and possible orbits

06 p1012 A69-18227

Micron and submicron particle cumulative flux upper limits in satellite micrometeoroid environment of Gemini 12

07 p1215 A69-18845

Photoelectric ejection of grain electrons by solar quanta balance with solar wind electron capture by grain for interplanetary grain equilibrium potential

09 p1593 A69-21655

Outer solar coronal IR radiance measured by ground telescope and stratosphere balloon flight, noting interplanetary dust thermal emission

09 p1600 A69-22205

Test of Velikovsky theory for dense hydrocarbon clouds and dusts surrounding Venus, using IR reflection spectra

09 p1608 A69-22566

Coronal IR observations during solar eclipse revealing thermal emission zone at predicted interplanetary dust vaporization region

10 p1789 A69-24131

Solar radiation pressure on interplanetary dust particles calculated as function of radius and density, noting asteroidal origin of dielectric and absorbing particles

11 p1956 A69-24397

Interplanetary dust and distribution study by micrometeorite analyzer and by zodiacal light observations using solar probe

15 p2694 A69-30879

Meteor showers contribution to interplanetary dust flux based on relative number of particles of various size

15 p2697 A69-31308

Cumulative flux of interplanetary and cislunar space dust particles by Mariner 4 and OGO 3 spacecraft, noting particle impact rate

15 p2699 A69-31394

Zodiacal light brightness and polarization measurements from space probes approximated by Mie scattering of interplanetary dust particles

16 p2857 A69-32092

Interplanetary dust sources investigation based on physical and orbital parameters, noting derivation from asteroids and meteorites

19 p3415 A69-36119

Zodiacal light confirmed as caused predominantly by flattened circumsolar dust cloud

20 p3597 A69-37336

Moon possible origin, discussing spin off from earth, accretion from same dust cloud or formed elsewhere and captured

20 p3603 A69-37559

Solar radiation pressure on interplanetary dust particles calculated as function of radius and density, noting asteroidal origin of dielectric and absorbing particles

24 p4390 A69-43787

INTERPLANETARY EXPLORER U EXPLORER 18 SATELLITE

INTERPLANETARY FLIGHT

Shock layer gas radiation influence on deep space missile shape, noting evaluation by flow equations

01 p0007 A69-11070

Clinical problems during interplanetary flights, stressing need for diagnostic algorithms and automated medical equipment

02 p0202 A69-12121

Voyage to planets - Conference, Washington, D.C., March 1967

02 p0323 A69-12301

Benefits accruing from swingby operation, considering space flights past Jupiter, Saturn and other planets

02 p0326 A69-12663

Space rendezvous problem as applicable to interplanetary missions, discussing steps in rendezvous maneuvers to permit final docking

03 p0511 A69-13401

Interplanetary transportation network involving numerous spacecraft on various planetary flyby trajectories, discussing integration of gravity thrust, braking and scramjet concept

03 p0511 A69-13402

Space flight launches, interplanetary transfer orbits, flyby orbits and capture orbits for solar probe with 0.3 AU perihelion and Jupiter satellite probe

04 p0657 A69-14826

NERVA rocket engine with 200,000-250,000 lb thrust to replace Saturn 5 upper stage for manned interplanetary flights, discussing Mars flight

08 p1410 A69-21029

Interplanetary low thrust mission analysis model, discussing major elements interactions

09 p1585 A69-21206

Maximum capacity estimation for one way transportation systems to moon and Mars, analyzing technical and economic aspects

09 p1586 A69-21297

Monograph on requirements for high speed interplanetary flights with nuclear engines and refueling at destination

09 p1586 A69-21298

Power requirements for tracking, telecommand and telemetry of spacecraft over interplanetary distances, considering transmission problems, equipment weight and reliability

10 p1652 A69-22984

Third phase dynamics of planetary approach of earth-Mars journey, computing approach trajectory on two body spacecraft-Mars assumption

11 p1968 A69-25725

Hardware limitations on communications, instrumentation and data handling for manned deep space missions

13 p2219 A69-27666

Thermal stresses in rotating cylindrical interplanetary body heated by solar radiation

16 p2871 A69-31901

Mission windows for single and multiple planet swingbys past Jupiter to outer planets

[AAS PAPER 68-115] 19 p3402 A69-35936

Approach navigation accuracy for planetary atmosphere braking to orbit about Mars and Venus

[AAS PAPER 68-122] 19 p3402 A69-35937

Evaluation method for straddown spacecraft guidance systems on automated interplanetary missions, using cost and system performance efficiency probability model

[AIAA PAPER 68-828] 19 p3370 A69-35953

Communications, instrumentation and data handling for manned planetary missions, discussing data rate limitations

21 p3674 A69-39018

Spacecraft guidance analysis of multiple outer planet mission utilizing gravity assist swingbys to achieve planetary flybys with single spacecraft

[AAS PAPER 68-109] 21 p3761 A69-39205

Triple planet ballistic flybys, discussing mission opportunities and launch windows

[AAS PAPER 68-114] 21 p3805 A69-39206

CircumJovian powered and free return trajectories, analyzing round trip missions and departure opportunities

[AAS PAPER 68-117] 21 p3805 A69-39207

Direct flight and Jupiter swingby heliocentric trajectory modes of elliptic capture orbits compared for unmanned missions to outer planets

[AAS PAPER 68-105] 21 p3805 A69-39221

Exploration capabilities provided by Jupiter gravity assisted trajectories compared to direct ballistic flight trajectories

[AAS PAPER 68-116] 21 p3805 A69-39224

Interplanetary periodic orbits and flyby dates for multiple Earth-Venus swingby missions, describing various iterative solutions for trajectory

[AIAA PAPER 69-931] 21 p3809 A69-39359

Targeting technique for Atlas/Centaur Mariner Mars 1969 mission, noting suitability to flyby, orbiter or landing interplanetary missions

[AIAA PAPER 69-881] 21 p3764 A69-39407

Evaluation technique for astronautics subsystems in automated spacecraft designed for interplanetary missions, considering operation times, navigation updating and midcourse correction

[AIAA PAPER 69-882] 21 p3764 A69-39408

Interplanetary midcourse velocity correction schedules optimization, discussing timing equations modifications, mission simulation and role of earth based radar

21 p3766 A69-39646

Reconnaissance missions for outer planets exploration, discussing spacecraft design constraints, multiple planet fly-by, planetary orbiter, etc

[AAS PAPER 69-291] 24 p4381 A69-42864

Meteoroid shower model for interplanetary flight hazard evaluation, suggesting shower zone defining on ecliptic plane

24 p4385 A69-43258

Interplanetary space travel medical problems during long duration missions, noting earth diagnostic and therapeutic methods adaptation, drugs selection, astronaut medical training, etc

24 p4278 A69-43396

INTERPLANETARY GAS

Formation mechanism for heterogeneous structure of interplanetary plasma based on plasma instability from temperature anisotropy

02 p0314 A69-11638

Continuity and momentum equations for cosmic ray gas particles in interplanetary region
06 p0992 A69-17379

Interplanetary plasma flow simulation around earth magnetosphere and planets not considering initial conditions influence
09 p1577 A69-21768

Compressible gas flow problem in point body gravitational field solved with reference to sun and interstellar gas
09 p1577 A69-21769

Cosmic protons interaction with interplanetary plasma, analyzing beam energy loss due to excitation of longitudinal electrostatic oscillations
10 p1760 A69-23617

Radio astronomical investigations of small scale inhomogeneity motion and dimensions in interplanetary plasma, using observations of 3C 48 scintillations in 1967
10 p1782 A69-23711

Interplanetary plasma subsequent to July 7, 1966 flare monitored by detectors on Pioneer 6 and Explorer 33
10 p1783 A69-23775

Interplanetary plasma flow directional velocity distribution from solar atmosphere active regions found inhomogeneous
12 p2149 A69-26698

Magnetic field fluctuations of interplanetary plasma, considering anisotropic temperature instabilities
14 p2517 A69-29064

Photoionizing effect of hydrogen and helium UV glow in nighttime ionosphere compared with ground based IF ionosonde and sounding rocket observations
15 p2605 A69-31436

Langmuir probe to determine space vehicle orientation in ionospheric or interplanetary plasma, discussing apparatus, accuracy and application
17 p3001 A69-33222

Hydrodynamic approximation to interplanetary gas motion influenced by solar flare caused perturbations
17 p3035 A69-33627

Comet tails orientation determination for solar wind and interplanetary plasma investigation, considering geometrical difficulties and suggesting computation procedure
20 p3599 A69-37467

Antimatter motion in solar system and earth atmosphere, discussing vaporization and annihilation energy in collisions with interplanetary gas atoms
22 p4034 A69-41100

INTERPLANETARY MAGNETIC FIELDS

Magnetometric equipment on board Luna 10 and Venera 4 space stations for studying magnetic field in interplanetary space, describing circuit and metrological characteristics
01 p0080 A69-10582

Stable fluxgate magnetometer sensor for exploration of space magnetic fields, discussing equipment specifications and performance tests
[IEEE PAPER 10.2] 01 p0081 A69-10715

Interplanetary magnetic field measurements in lunar wake, noting magnetic perturbations pattern and absence of shocks
01 p0157 A69-11228

Geomagnetic response asymmetry related to solar direction of polarity in interplanetary magnetic field
01 p0077 A69-11236

Solar cosmic rays diffusion relationship to interplanetary magnetic field power spectrum from high energy proton and electron observations
01 p0147 A69-11243

Dipole models of geomagnetism at earth surface used to calculate magnetic field in outer space
02 p0238 A69-11673

Geomagnetic and interplanetary field variation measurements from Mariners 2, 4 and 5, noting correlation between solar phenomena and geomagnetic storms
02 p0241 A69-11737

Galactic cosmic ray modulation by interplanetary magnetic fields, discussing compatibility of several models with experimental data
03 p0498 A69-12933

Cosmic ray and solar wind properties, discussing solar wind measurements, interplanetary magnetic field and solar wind sounding by cosmic rays
03 p0500 A69-13355

Charged particle dynamics in spiral interplanetary magnetic field model, discussing electric drift velocity, point of origin and distribution
03 p0503 A69-14015

Atmospheric, geomagnetic and interplanetary effects on cosmic ray flow, noting anisotropy and diurnal variation phase and amplitude averages
04 p0649 A69-14683

Interplanetary magnetic field intensities, solar and stellar fields measured by Zeeman effect, discussing fields of Jupiter, Mars, Venus and moon
04 p0657 A69-14810

Adiabatic motion of hydromagnetic fluid behind spherical fast shock wave for Parker solar wind model
04 p0660 A69-15126

Large scale pattern in solar magnetic field correlated with interplanetary magnetic field
04 p0665 A69-15532

Coronal structure predicted for September 22, 1968 solar eclipse by model constructed for large structure of coronal and interplanetary magnetic fields
05 p0818 A69-15602

Solar and interplanetary magnetic fields and plasmas, noting in situ observations by satellites and space probes of sector patterns, solar cosmic rays and wind
05 p0821 A69-15841

Interplanetary magnetic field fluctuations obtained by IMP 2
05 p0824 A69-16264

Anisotropies in Forbush decreases in March 1966, noting dependence on interplanetary magnetic field structure
06 p0990 A69-17290

Cosmic ray daily variations relationship to geomagnetic activity, sector structure of interplanetary magnetic field and sunspot activity
06 p0990 A69-17291

Lunar core electrical conductivity determination based on induced magnetic field arising from time varying interplanetary magnetic field associated with solar wind plasma
07 p1215 A69-18832

Proton flare activity dependence on Bartel active longitudes and sector structure boundaries of interplanetary magnetic field
07 p1205 A69-19248

Cosmic ray deuteron and He 3 secondary origin and determination of cosmic ray path length and residual interplanetary field modulation
08 p1378 A69-20066

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma
09 p1592 A69-21540

Sudden commencement associated discontinuities in interplanetary magnetic field observed by IMP 3 satellite, stressing shocks and tangential and rotational discontinuities
09 p1598 A69-22183

Diffusion coefficient and cosmic ray motion in solar system, using satellite data of interplanetary magnetic field
10 p1757 A69-22822

Interplanetary magnetic fields characteristics and magnetic inhomogeneities spectra from cosmic ray variation studies used to obtain scattering mean free path
10 p1757 A69-22824

Cosmic ray anisotropy and diurnal density variation, analyzing influence of interplanetary magnetic field and subsonic solar wind
10 p1757 A69-22828

Cosmic ray anisotropy relation to scattering and sectorial structure of interplanetary magnetic field using neutron monitor data
10 p1758 A69-22834

Simultaneous interplanetary magnetic field measurements by geocentric satellites Explorer 33 and IMP 3 of MHD shock wave associated with July 8, 1966 sudden storm commencement
10 p1783 A69-23773

Interplanetary magnetic field sectoral structure effect on diurnal cosmic ray intensity and geomagnetic field, noting field direction influence
10 p1769 A69-23905

Microscale fluctuations in interplanetary magnetic field, considering proton thermal energy and magnetic field energy densities
10 p1785 A69-24100

Stochastic and ergodic aspects of magnetic lines of force, discussing cosmic ray diffusion in interplanetary magnetic field
10 p1770 A69-24111

Interplanetary magnetic field near Venus, analyzing data by magnetometer onboard Venera 4
10 p1791 A69-24199

Green function solution to Maxwell equations for interplanetary and coronal magnetic fields above photosphere, considering field at source surface
11 p1958 A69-24429

Dipole models of geomagnetism at earth surface used to calculate magnetic field in outer space
13 p2257 A69-28704

Geomagnetic variability relations to interplanetary magnetic field transverse fluctuations, discussing data from Mariner flights
14 p2510 A69-28948

Correlation coefficients between radial components of interplanetary magnetic field and solar wind velocity from Mariner 5 data due to Alfvén waves
14 p2510 A69-28949

Interplanetary sector structure during rising portion of 1966-1967 sunspot cycle, giving recurrence period of interplanetary field
14 p2517 A69-28957

Cosmic ray intensity preceding Forbush effects as function of chromospheric flares solar longitude and solar wind velocity
14 p2512 A69-29044

Relativistic solar proton propagation fluctuation effects in interplanetary magnetic field during cosmic ray intensity increase
14 p2512 A69-29045

Cosmic ray angular distribution spectrum and interplanetary magnetic field properties determined from semidiurnal cosmic ray variations data
14 p2512 A69-29046

Magnetic field fluctuations of interplanetary plasma, considering anisotropic temperature instabilities
14 p2517 A69-29064

Solar cosmic rays diffusion enclosure in interplanetary space magnetic boundary suggested from balloon, satellite and ground observations of solar flare neutron component
14 p2513 A69-29067

Pc 2-4 geomagnetic pulsations abrupt disappearance on global scale ascribed to magnetosphere boundary stabilization, noting interplanetary magnetic field role
14 p2438 A69-29080

Magnetospheric plasma motion associated with Alfvén mode time fluctuations of magnetic field in solar wind
14 p2521 A69-29382

Magnetic field variations in magnetosphere and interplanetary space correlated with polar magnetic disturbances from dynamic morphology data
14 p2441 A69-29387

Solar activity and large scale magnetic field distribution in discrete latitude zones, including interplanetary magnetic field above ecliptic
14 p2528 A69-29966

Discontinuities in interplanetary magnetic field direction presented on mesoscale from Pioneer 6 observation, emphasizing distribution in time
14 p2528 A69-29970

Solar wind existence verified by direct measurements of interplanetary magnetic field and plasma, reviewing solar corona studies by satellites and space probes
15 p2679 A69-30010

Cosmic ray intensity underground measurements, discussing solar modulation processes, sidereal day variations and interplanetary magnetic field influence
15 p2673 A69-30013

Solar corpuscular radiation component from satellite and interplanetary space probe geophysical data, discussing interplanetary magnetic field geometry and corpuscular fluxes
15 p2684 A69-30516

Magnetometric equipment on board Luna 10 and Venera 4 space stations for studying magnetic field in interplanetary space, describing circuit and metrological characteristics
15 p2610 A69-30752

Lunar dynamic response to discontinuities in interplanetary magnetic field to determine electrical conductivity and internal temperature
15 p2700 A69-31442

Neutral point theory applied to solar wind and magnetospheric physics, discussing magnetic field reconstructions
16 p2846 A69-31596

Interplanetary magnetic field radial dependence from Mariner 4 measurements between earth and Mars, indicating fluctuations produced by dynamic processes in solar wind
16 p2856 A69-31964

Interplanetary magnetic fields from Explorer 33 magnetometer relationship to surface geomagnetic variations emphasizing unified view
16 p2862 A69-32309

Interplanetary medium parameters strong variations during low solar activity derived from Mariner 2 data
16 p2851 A69-32517

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma
16 p2864 A69-32535

European highly eccentric orbit satellite /HEOS/ cislunar probe to explore interplanetary space for magnetic fields, cosmic radiation, solar wind and earth shock wave

17 p3050 A69-33397

Geomagnetic storms and Forbush decreases accounted for by interplanetary solar corpuscular streams effects described by interplanetary magnetic field structure, noting independence of flares

18 p3187 A69-34937

Stream structure in interplanetary magnetic field during 1966, analyzing geomagnetic activity and solar particles and Forbush decrease anisotropy

18 p3199 A69-34938

Earth bow shock waves in far upstream interplanetary medium observed from magnetic data of Explorer 34 satellite

18 p3199 A69-34941

Interplanetary and photospheric magnetic fields polarities observed by Mariner 4 and with solar magnetograph, noting noncorrelated data along latitudinal strip

18 p3205 A69-35399

Solar cosmic ray anisotropies in terms of model with particles propagating along interplanetary magnetic field undergoing pitch-angle scattering

18 p3189 A69-35400

Power spectra of interplanetary magnetic field fluctuations determined from Pioneer 6 satellite data, relating results to galactic cosmic rays modulation

20 p3603 A69-37554

Topology of interplanetary field lines in magnetotail, using solar electrons as tracers with moon as absorber

20 p3609 A69-38078

Solar wind plasma effects on lunar wake umbral and penumbral interplanetary magnetic field anomalies, evaluating roles of electrons and ions

20 p3609 A69-38095

Venus magnetosphere induced by piling up magnetic field from solar wind due to ionospheric conductivity and collisions with planetary atmospheric particles

21 p3794 A69-38381

Homogeneous conducting moon-solar wind interactions, describing time dependent lunar magnetic and electric fields induced by interplanetary magnetic field variations

22 p4023 A69-40518

Cosmic ray flux intensity increases, discussing effects of solar wind, corpuscular flux velocity and interplanetary magnetic field

23 p4205 A69-41838

Interplanetary magnetic field role in interaction between terrestrial magnetosphere, solar plasma and solar flux energy transfer

23 p4214 A69-41865

Day-to-day changes of cosmic ray diurnal variation measured on meson and neutron components, showing relationship with interplanetary magnetic field

23 p4206 A69-42012

Critique of magnetic response model for interaction of moon and interplanetary plasma magnetic field proposed by Blank and Sill

24 p4384 A69-43190

High energy nucleons and electrons accelerated in solar flares, considering interplanetary magnetic field effect on radiation properties near earth orbit

24 p4372 A69-43617

Solar wind disturbances associated with flares

24 p4373 A69-43620

INTERPLANETARY MEDIUM NT ZODIACAL DUST

Interplanetary magnetic field measurements in lunar wake, noting magnetic perturbations pattern and absence of shocks

01 p0157 A69-11228

Solar and interplanetary magnetic fields and plasmas, noting in situ observations by satellites and space probes of sector patterns, solar cosmic rays and wind

05 p0821 A69-15841

Solar wind electron component detection by plasma experiment on Pioneer 6, particularly class 2B flare and quiet period

05 p0816 A69-16275

Cosmic dust concentration in interplanetary space near earth, noting suitability of satellite observation

06 p0999 A69-16971

Interplanetary medium parameters strong variations during low solar activity derived from Mariner 2 data

09 p1575 A69-21522

Mach number values and propagation rates of wear disturbances in interplanetary medium obtained from Mariner 2 data during low solar activity

09 p1575 A69-21523

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma

09 p1592 A69-21540

Charged particle acceleration in interplanetary medium, discussing protons and plasma oscillations interactions

09 p1575 A69-21541

Cosmic ray particle behavior in interplanetary medium, solving model equation for cosmic ray diffusion in cloud of outgoing scattering centers

09 p1575 A69-21598

Interplanetary scintillation of radio sources to determine size and motion of plasma irregularities in solar wind for fine structure

09 p1594 A69-21658

Electron content of earth-Venus interplanetary medium measured by observing relative propagation time of radar pulses to Venus

09 p1594 A69-21697

Low energy proton flux in neighborhood of Moon measured by Luna 12 satellite indicating magnetized plasma region effect on burst

09 p1577 A69-21773

Solar flare relation to interplanetary scintillation indices and power spectra

09 p1582 A69-22751

Cosmic ray variations as means of studying solar wind characteristics and interplanetary medium

10 p1755 A69-22811

Starlight extinction by interplanetary medium evidenced from confirming correlation between star brightness on ecliptic and elongation

10 p1775 A69-23198

Mariner 2 measurements of geomagnetic field and interplanetary plasma parameters for analyzing interaction between interplanetary medium and magnetosphere during decreased solar activity

10 p1769 A69-23900

Discontinuities in interplanetary magnetic field direction presented on mesoscale from Pioneer 6 observation, emphasizing distribution in time

14 p2528 A69-29970

Solar wind existence verified by direct measurements of interplanetary magnetic field and plasma, reviewing solar corona studies by satellites and space probes

15 p2679 A69-30010

Low energy solar protons and alpha particles from 28 May 1967 solar flare used as probes of interplanetary medium

16 p2847 A69-31965

Interplanetary medium parameters strong variations during low solar activity derived from Mariner 2 data

16 p2851 A69-32517

Mach number values and propagation rates of weak disturbances in interplanetary medium obtained from Mariner 2 data during low solar activity

16 p2851 A69-32518

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma

16 p2864 A69-32535

Charged particle acceleration in interplanetary medium, discussing protons and plasma oscillations interactions

16 p2851 A69-32536

Interplanetary proton and alpha particle radial gradients determined from Mariner data, considering Forbush decrease, particle solar origin, galactic cosmic radiation, etc

20 p3592 A69-38096

Charged particle acceleration in interplanetary plasma from analysis of cosmic ray intensity increases accompanied by SC magnetic storms and Forbush effects

21 p3788 A69-38587

Solar magnetic field measurements for fine structure of magnetic asymmetry at different heights and within sunspots, discussing asymmetry for corona and interplanetary space

22 p4010 A69-39990

Laboratory experiments applicability to interplanetary plasma physics, describing simulations of solar wind interactions, magnetosphere, collisionless shock waves, etc

22 p4028 A69-40689

Interplanetary shock waves structure and evolution, discussing propagation in collision free media by wave-particle interactions

23 p4222 A69-42394

INTERPLANETARY MONITORING PLATFORM U IMP

INTERPLANETARY NAVIGATION

Planetary navigation using spacecraft measurements and Doppler data from earth-based radio tracking, determining accuracy for earth-Mars trajectory

19 p3368 A69-35791

Navigational accuracy of two way Doppler tracking of interplanetary spacecraft during heliocentric and planetary encounter trajectory phases [AIAA PAPER 69-899]

21 p3761 A69-39334

INTERPLANETARY PROPULSION U ROCKET ENGINES

INTERPLANETARY SPACE

Chemical composition of upper atmosphere and interplanetary space measured by Soviet sounding balloons and rockets, discussing flask sampling technique

01 p0025 A69-10940

Parameters of solar wind responsible for geomagnetic activity, relating magnetic storm features to physical structure of interplanetary space and solar wind bubbles

02 p0240 A69-11725

Automatic bioprobe life support system for long duration interplanetary space flight, discussing blood leech as suitable research animal

02 p0199 A69-11828

Galactic cosmic rays energy modulation spectrum in interplanetary space, showing influence of solar wind velocity and diffusion coefficient dependence

03 p0501 A69-13527

Magnetopause, magnetosheath, bow shock and adjoining interplanetary domain study by IMP-1 satellite, discussing macroscopic plasma variables and fluid model for solar wind

07 p1129 A69-19374

Zodiacal dust density in interplanetary space

08 p1407 A69-20938

Cosmic ray intensity temperature dependence in stratosphere and anisotropy in interplanetary space determined from measurements over Arctic and Antarctic regions

09 p1575 A69-21542

Reflected particle acceleration at magnetospheric bow shock front attributed to interplanetary electric field

09 p1577 A69-21714

Short term variability of solar proton flux in interplanetary space during solar flare activity, using data from cosmic ray detector on Pioneer 7

09 p1582 A69-22754

Satellite data on galactic cosmic ray variations near magnetosphere and in interplanetary space, discussing Forbush decreases

10 p1756 A69-22819

Galactic and solar cosmic ray modulation in interplanetary space during different phases of 11 year solar activity cycle

10 p1758 A69-22833

Solar activity effect on interplanetary electromagnetic field according to cosmic ray modulation data, noting ineffective correlation and solar wind effects

10 p1759 A69-22841

Soviet collection of articles on cosmic physics, Number 3, Comets, sun and interplanetary space

14 p2522 A69-29703

Comet scintillations and tail characteristics studied to obtain information on interplanetary flux field, magnetic fields and planetary structures

14 p2523 A69-29704

Comets considered as natural interplanetary space probes, stressing need for international cooperation on solar system studies

15 p2679 A69-30011

Cosmic ray intensity temperature dependence in stratosphere and anisotropy in interplanetary space determined from measurements over Arctic and Antarctic regions

16 p2851 A69-32537

Optimum solar cell cover glass systems selected by studying interplanetary space environment effects of proton impact, temperature and concurrent illumination on radiation damage

19 p3253 A69-35702

Outer anisotropic galactic cosmic particle flux distortion in interplanetary space, analyzing scattering in solar wind by isotropic diffusion equations

23 p4205 A69-41837

IMP 4 satellite measurements of cosmic ray electrons in interplanetary space compared to predictions of electron intensity from interstellar proton-electron collisions

24 p4365 A69-42667

Space simulation tests in TFS /Technological Feasibility Spacecraft/ program, discussing two interplanetary cruise modes and deorbit mode selected for simulation

02 p0227 A69-11757

Product assurance role in spacecraft sterilization to maintain planetary biological environments integrity in space programs for extraterrestrial life determination

03 p0379 A69-13400

Interplanetary transportation network involving numerous spacecraft on various planetary flyby trajectories, discussing integration of gravity thrust, braking and scramjet concept

03 p0511 A69-13402

Interplanetary orbits for probe launched from earth to reencounter earth, noting relationship to three body problem

03 p0514 A69-13782

German-American interplanetary vehicle to investigate interplanetary space and solar characteristics

06 p1012 A69-16970

Solar sail structural design, discussing application as propulsion system for heliogyro interplanetary spacecraft

06 p1015 A69-17591

Multimission interplanetary probe using solar electric propulsion

06 p0984 A69-17593

Interplanetary Pioneer spacecraft development and systems engineering aspects

06 p1017 A69-17605

Radio channel circuit outlined for tracking interplanetary spacecraft and probes with signal delay time prediction

06 p0888 A69-17623

Multiple impulse orbital departure window for manned interplanetary spacecraft, discussing launch delay, space assembly, refueling and checkout, etc [AIAA PAPER 69-126]

06 p1010 A69-18065

Analytical technique for unmanned spacecraft sizing for planetary missions, considering scientific objectives, characteristics and requirements [AIAA PAPER 69-125]

06 p1018 A69-18076

Transonic dynamic stability of free flight half angle cones in wind tunnel for high drag planetary entry vehicles, discussing Mars entry trajectories [AIAA PAPER 69-105]

06 p1019 A69-18209

Pre-design and mission analysis software capability for sizing, design, fabrication and developmental testing of flight hardware for electrically propelled interplanetary spacecraft

09 p1585 A69-21210

Advanced reconnaissance electric planetary spacecraft /AREPS/ concept for repeated coverage of Mars or Venus surface, using solar-photovoltaic system [AIAA PAPER 69-253]

09 p1585 A69-21244

Solar electric propulsion mission simplification by staging concept, discussing thrust combination, weight tradeoffs, design and Jupiter flyby probe [AIAA PAPER 69-251]

09 p1586 A69-21245

Flight control system for automatic interplanetary stations /AIS/, comparing Venera series orientation and correction system to Mariner systems

10 p1792 A69-24198

Spacecraft sterilization requirements, evaluating viable organisms release probability from spacecraft as function of equipment fracturing

11 p1828 A69-25460

Deep space data return, discussing system function, design, operational interfaces and interplanetary spacecraft data compression methods

14 p2517 A69-29096

Integrated structural and dynamic testing plans for proposed large interplanetary spacecraft, discussing acoustic testing, testing environments and flight environment transformation into laboratory

15 p2588 A69-30399

Nuclear solid core rocket engine performance for interplanetary orbital launch of spacecraft by multibit injection [AIAA PAPER 69-535]

16 p2810 A69-32660

Minimal electric propulsion systems for interplanetary spacecraft, discussing payload, reduced trip time and low thrust systems for Jupiter flyby [AIAA PAPER 69-499]

16 p2844 A69-32714

Passive attitude stabilization of interplanetary probe, using conically shaped sails elastically connected to payload

17 p3047 A69-33225

Scientific findings from interplanetary spacecraft radio propagation experiments, particularly Mariner 5 data

19 p3267 A69-35940

Propulsion system performance relationship to manned planetary mission capability, discussing anticipated performance of advanced propulsion concepts

20 p3586 A69-38118

Mission and planetary vehicles characteristics affecting design of solid propellant motors and thrust vector control systems in planetary orbiters and landers [AIAA PAPER 68-815]

21 p3819 A69-39031

Navigational accuracy of two way Doppler tracking of interplanetary spacecraft during heliocentric and planetary encounter trajectory phases [AIAA PAPER 69-899]

21 p3761 A69-39334

Mathematical model for determining thrust interplanetary spacecraft orbit, considering time history of position, velocity and thrust acceleration [AIAA PAPER 69-901]

21 p3806 A69-39335

Analytical technique for unmanned spacecraft sizing for planetary missions, considering scientific objectives, characteristics and requirements [AIAA PAPER 69-125]

21 p3828 A69-39770

High efficiency boost regulator design and tests for planetary spacecraft, considering input and output voltages

23 p4075 A69-42302

INTERPLANETARY TRAJECTORIES

Planetary swingby theory mechanics and applications for optimization of interplanetary trajectories

02 p0331 A69-12818

Vehicle trajectory motion in transition region of three body problem, noting equations of motion, first order solutions, etc

03 p0505 A69-13001

Orbital trajectories about Mars or Venus, considering reentry to earth, planet perturbation effect, total mission time and orbital distance from planet

05 p0823 A69-16042

Minimum fuel control of spacecraft orbital elements for transfers between elliptical orbits by low variable thrust propulsion, noting interplanetary trajectory optimization

06 p0955 A69-17579

Low thrust interplanetary trajectories optimization, discussing hardware design considerations

09 p1585 A69-21209

Midcourse maneuvers in interplanetary guidance, considering spin stabilized spacecraft flyby for Jupiter mission

13 p2354 A69-28504

Interplanetary swingby trajectory correcting maneuvers for space vehicles return to earth after planet orbiting with emphasis on singular points

19 p3427 A69-36613

Trajectory optimization of space vehicle with continuous thrust based on regularized equations, comparing perturbation method for earth-Jupiter rendezvous transfer [AAS PAPER 68-099]

20 p3595 A69-37173

Orbital trajectories about Mars or Venus, considering reentry to earth, planet perturbation effect, total mission time and orbital distance from planet

20 p3606 A69-37951

Periodic orbits for interplanetary flight, using patched conic analysis for determining inclined elliptic free fall trajectory shuttling between earth and Venus [AAS PAPER 68-102]

21 p3804 A69-39203

Trajectory analysis of multiplanet Grand Tour mission to four large outer planets on single flight, discussing mission planning [AIAA PAPER 68-1055]

22 p4023 A69-40544

Recurrent Lagrange multipliers for optimal low thrust earth-Jupiter transfers, using three dimensional solar system model

23 p4215 A69-41896

Earth-Mars and earth-Venus economical transfers derived for optimal conditions with respect to characteristic velocity, obtaining exact numerical solution [AAS PAPER 69-241]

24 p4380 A69-42855

INTERPLANETARY TRANSFER ORBITS

Book on planetocentric, lunar and interplanetary transfer techniques covering communications and coordinate system selection, minimum fuel and time transfer and rendezvous, etc

04 p0652 A69-14458

Optimum low thrust interplanetary transfers involving swingby trajectory past intermediate planet analyzed, assuming impulsive velocity change at planet

06 p1006 A69-17572

Direct flight and Jupiter swingby heliocentric trajectory modes of elliptic capture orbits compared for unmanned missions to outer planets [AAS PAPER 68-105]

21 p3805 A69-39221

INTERPOLATION

Interpolation of deflections of vertical from horizontal gravity gradients, discussing potential applications to photogrammetry

02 p0243 A69-12012

Invariant imbedding and sequential interpolating filters for nonlinear processes [ASME PAPER 68-WA/AUT-3]

05 p0738 A69-16183

Interpolation filters with restricted transmission zeros in transmission function capable of reconstructing continuous function from equidistant sample values

05 p0735 A69-16617

Presampling filtering, discussing effects on rms interpolation error for sampled data systems

07 p1083 A69-19129

Optimal control approximate synthesis partial differential equation solution in form of interpolation polynomial for functions of many variables

08 p1299 A69-21068

Extrapolation and interpolation for data compression including polynomial concept

12 p2027 A69-25877

Parabolic interpolation method for values of function given for certain values of argument and of first derivative, including numerical examples

12 p2121 A69-26434

Subsatellite point velocity determination by interpolation method using observation data without knowledge of orbital elements

12 p2158 A69-26435

Finite elements concept cast in topological framework, presenting generalizations of Lagrange and Hermite interpolation functions

15 p2711 A69-30874

Optimal control approximate synthesis partial differential equation solution in form of interpolation polynomial for functions of many variables

16 p2765 A69-32483

Qualitative interpolation formula for phonon frequency spectrum of mass disordered alloys three dimensional systems at high concentrations

20 p3583 A69-37279

Antennas aperture radiation patterns optimal interpolation synthesis permitting confident control of main lobe shape

22 p3916 A69-40953

Optical interpolation for GZ-1 orthoprojector in storage mode, noting electronic contour plotter

22 p3951 A69-41247

Integro-interpolation difference schemes for gas dynamic equations system satisfying laws of mass, momentum, energy conservation and energy balance

23 p4151 A69-41527

Osculatory interpolation explicit method demonstration with error terms determination

24 p4341 A69-43230

INTERPOLATORS

U REPEATERS

INTERPRETATION

1967 Space Treaty peaceful activities definition, suggesting explicit provisions regarding treaty province, enforcement machinery and implementation

20 p3636 A69-37112

INTERROGATION

Centralized control with variable step interrogation of control points

08 p1298 A69-20422

INTERRUPTION

Plasma physics of electric arc transition from conducting plasma to insulating gas in electric circuit interruption, noting interrupter interaction with power system

12 p2133 A69-25905

INTERSTELLAR COMMUNICATION

Interstellar communication in search for extraterrestrial intelligence, discussing radio objects, OH emission regions and pulsating stars

17 p3028 A69-32971

INTERSTELLAR GAS

UV and X ray radiations of stars and interstellar gas of Milky Way and remote galaxies

02 p0316 A69-11906

Interstellar gas field dynamic instability, discussing enhanced ambipolar diffusion in twisted field

02 p0326 A69-12707

Spectrophotometric studies of planetary NGC 6543 gaseous nebula, measuring emission line intensities, electron density and temperature [ARL-68-0200]

02 p0327 A69-12708

Cosmic MHD, discussing mechanisms responsible for solar phenomena and dynamics of interstellar medium

02 p0293 A69-12789

Rotation and orientation of cosmic dust particles due to collisions with interstellar gas particles

03 p0511 A69-13420

Interstellar gas masers account for properties of 18 cm emission lines from OH molecules

03 p0511 A69-13465

Ammonia gas molecules in interstellar medium, discussing detection in direction of galactic center by means of microwave emission

03 p0518 A69-14258

Diminished RF intensity of neutral hydrogen line near radio source W 49 due to diminished kinetic temperature of gas

04 p0662 A69-15253

Gas accretion on neutron star surface as energy source for X ray radiation

05 p0814 A69-15847

Energy flux into earth thermosphere due to fast corpuscular neutrals arising from charge transfer collisions between solar protons and neutral interstellar H

05 p0817 A69-16654

Pulsar distance estimates based on evaluation of galactic H absorption of 21 cm radiation

06 p1012 A69-18225

Helium closed cycle cooled very low noise high gain parametric amplifier for investigating interstellar atomic hydrogen radiation

07 p1098 A69-18461

Dissociation-ionization fronts in interstellar molecular hydrogen clouds, analyzing effects of UV radiation from early stars

07 p1221 A69-19584

Astronomical unit determined by measuring Doppler shift of spectral features of galactic hydrogen

07 p1222 A69-19590

Stellar galactic orbit perturbation by irregularities in distribution of gas cloud for motion inclined to galactic plane

07 p1223 A69-19634

Gas remnant of large scale explosive event in galactic plane at 60 degree longitude, discussing resultant extension on line profile

07 p1225 A69-19717

Radiative cooling layer behind shock front from neutral interstellar hydrogen cloud collision at Mach 20, discussing molecular hydrogen abundance during cooling

08 p1381 A69-19796

Optical depth determination in absorption lines of interstellar neutral hydrogen clouds by spectral observation of variable intensity radio sources

08 p1398 A69-20774

Motion and dispersion of peculiar velocities of stars in gravitational condensing interstellar gas

09 p1589 A69-21371

Radio wavelength range observations of NO molecule lines in interstellar space

09 p1590 A69-21377

Neutral hydrogen content and distribution of late type spiral galaxy NGC 6946 from 21 cm line measurements

09 p1598 A69-22187

Steady axisymmetric gas flow from galactic center, determining supersonic to subsonic transition by equations of motion

09 p1599 A69-22189

Attractive and disruptive forces in conversion of interstellar gas into stars, discussing self gravitation, galactic magnetic field and cosmic ray pressure

09 p1599 A69-22190

Molecular hydrogen in Orion dark cloud from observed faint emission

09 p1599 A69-22191

Radio recombination lines of galactic hydrogen as sensitive test for low energy cosmic ray existence in interstellar medium

09 p1580 A69-22273

High level hydrogen populations in gaseous nebulae, noting electron density range and temperature effect

09 p1604 A69-22406

D type dissociation ionization front structure and associated shock fronts using quasi-steady flow approximation for Stromgren sphere development in interstellar molecular hydrogen cloud

10 p1772 A69-22858

Far UV stellar astronomy, concerning very hot stars and interstellar gas composition studies

10 p1772 A69-22870

Phase equilibrium and dynamics of gas volume heated by cosmic rays and cooled by radiation

10 p1760 A69-23136

Solid hydrogen mantle condensation accounting for lack of detectable alpha hydrogen in star clusters and OB associations

10 p1776 A69-23214

Mass and velocity distribution of interstellar clouds from Oort model simulated by Monte Carlo method on computer, predicting rogue cloud existence

10 p1779 A69-23608

RF spectroscopy of OH molecule, RF absorption by galactic OH and radio emission from OH in dust clouds

10 p1781 A69-23671

Interstellar molecular hydrogen and CH photodissociation, discussing molecular formation rates in interstellar medium

10 p1781 A69-23672

Ionized gas flow from globule containing atomic H in interstellar space, noting surrounding H II region and radiation at ionization front

10 p1782 A69-23682

HI cloud densities near fronts of H II regions by gasdynamic calculations based on observational data for electron density, temperature and particle velocity

10 p1782 A69-23683

Interstellar gas model based on calculations of heating by low energy cosmic rays, noting gravitational compression to form clouds

10 p1770 A69-24095

Magnetic fields in interstellar neutral hydrogen clouds in direction of radio source Cassiopeia A, noting field amplification

10 p1785 A69-24096

Radio brightness map at 22.25 MHz of galactic plane including H II regions IC 1805 and IC 1848, discussing LF absorption

10 p1787 A69-24115

Nebular abundances allowing for temperature variations in nebula along line of sight, correcting changes in electron temperature along path of observation

10 p1787 A69-24116

Hydrogenic recombination decrements in gaseous nebulae, discussing effects of Lyman line leakage, Balmer line self absorption, internal dust, optical depth, etc

10 p1787 A69-24118

Virial theorem extended to investigate star condensations in large interstellar gas clouds

10 p1787 A69-24119

High velocity neutral hydrogen cloud formation by cold condensations in hot corona, ejection from galactic nucleus, extragalactic objects and supernova envelopes

11 p1954 A69-24364

Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources

11 p1945 A69-24380

Intergalactic gas temperature and density reevaluated, considering neutral hydrogen distribution in galaxies peripheries and metagalactic background of ionizing UV radiation

11 p1946 A69-24589

Optical and radio measurements of electron temperature of H II regions obtained from brightness ratio of hydrogen line and continuum, considering isothermal model

11 p1950 A69-25110

Gravitational stability of spheroidal expansions of rotating gas masses in astronomy, noting mechanism for fragmentation in cosmology

11 p1962 A69-25112

Molecular state of hydrogen gas in high density condensations in H II regions, discussing effects of nearby stars

11 p1963 A69-25258

Theoretical models corresponding to initial phases in thermal-gravitational collapse of spherical clouds from interstellar gas for stellar formation

11 p1963 A69-25261

Correlation of stellar surface density distribution of young stars and neutral hydrogen gas in Small Magellanic Cloud

12 p2152 A69-25802

Planetary nebulae radial velocities in large and small Magellanic Clouds compared with young objects rotational pattern and interstellar gas densities and velocities

12 p2155 A69-25898

M 31 galaxy ionized gas region high resolution spectroscopy, emphasizing radial velocities in O II lines at various distances from nucleus

12 p2163 A69-27027

Successive explosions produced two gas systems observed in six Seyfert galaxy nuclei by spectrophotometry, using diffraction spectrographs

12 p2164 A69-27022

Rotation curve peculiarities of Sc type galaxy NGC 3432 ascribed to noncircular gas motions

12 p2164 A69-27031

Residual interstellar gas from protostar formation detected as high luminosity IR object

13 p2327 A69-27593

Expected IR line spectra of gaseous nebulae based on physical conditions, listing line intensities

13 p2342 A69-27595

Isothermal H II region dynamics for moving central star, integrating equations numerically using holograph transformation and Riemann invariants

13 p2347 A69-27712

Ionized hydrogen regions in NGC 4449 from H alpha photography through narrow band interference filter, obtaining radial velocities

13 p2347 A69-27714

Astronomical maps of integrated hydrogen density, dispersion and velocity of high galactic latitude neutral hydrogen concentration, discussing kinetic temperature

13 p2347 A69-27718

Neutral hydrogen cloud observed at high galactic latitude, discussing top intensity velocity, peak intensity dispersion, age, hydrogen mass and density

13 p2347 A69-27719

Radio emitting clouds properties as function of distance to parent galaxy nucleus

13 p2352 A69-27874

Rocket observations of Lyman alpha anisotropic galactic radiation, noting distribution of neutral interstellar hydrogen near sun

14 p2516 A69-28952

Interstellar gas radio and optical spectral lines of neutral H compared with Ca and neutral Na, discussing critically low velocity gas distribution

14 p2519 A69-29135

Spin temperature of interstellar neutral hydrogen calculated from 21 cm absorption spectra line profiles

15 p2681 A69-30411

Free electron concentrations and dispersion in H I regions noting ionized interstellar gas components role

15 p2681 A69-30420

Distribution model for ionized interstellar gas over galactic disk for explaining radio emission absorption and depolarization from discrete sources

15 p2695 A69-30935

Interstellar particle penetration into solar system, discussing impact ionization of earth ionosphere by interstellar neutral hydrogen and helium

15 p2699 A69-31390

Star formation in interstellar solid hydrogen clouds originating from cellular pressure created by hydrogen condensation onto interstellar grains

16 p2862 A69-32375

Origin of galactic gamma rays, discussing evidence in support of interstellar gas in galactic disk and production of neutral pions and bremsstrahlung

16 p2852 A69-32806

Pulsars distance determined using H II region data covering line of sight stars and Galaxy hydrogen distribution

17 p3026 A69-32858

Galactic X ray sources density nearly proportional to interstellar gas density squared, discussing X ray intensities estimation, galactic age, etc

17 p3030 A69-33069

Radio wave absorption in interstellar H I regions, considering mean absorption coefficient dependence on height above galactic plane, evaluating planar electron density

17 p3034 A69-33608

Interstellar H I regions and clouds heating and ionization by low energy cosmic rays from quantitative models, noting pressure equilibrium role

17 p3038 A69-33726

Interstellar neutral hydrogen in mean galactic latitudes noting two different component types

17 p3039 A69-33766

Zeeman effect measurement revealing magnetic fields in interstellar neutral H clouds

18 p3190 A69-34291

Optically thin gas surrounding X ray source, plotting electron temperature and ionization equilibrium of hydrogen, He, carbon, nitrogen, oxygen and neon
18 p3186 A69-34295

Depolarization of extragalactic radio sources at low Galactic latitudes attributed to ionized hydrogen produced by B2 star tunneling through interstellar hydrogen cloud
18 p3194 A69-34425

Motion and dispersion of peculiar velocities of stars in gravitational condensing interstellar gas
18 p3198 A69-34760

Radio wavelength range observations of NO molecule lines in interstellar space
18 p3198 A69-34765

High velocity interstellar gas in H I and H II regions, emphasizing observations of neutral atomic hydrogen in and far from galactic plane
19 p3402 A69-35962

Dynamic effects in structure of H II equilibrium region left behind expanding ionization front, showing temperature as function of distance from star
19 p3403 A69-35966

Forbidden emission lines used to study interstellar gas, discussing gas ionization, neutral hydrogen, calcium lines, etc
19 p3424 A69-36235

Interstellar hydroxyl molecular clouds as radio wave sources, using very long baseline interferometry, suggesting natural masers in space for OH emissions
19 p3427 A69-36659

Radio wave diffraction by inhomogeneities arising from ionized gas clouds in interstellar medium
19 p3428 A69-36882

NonJeans gravitational instability of stars and interstellar gas in Galaxy due to wave interaction with stars having velocity near wave phase velocity
20 p3607 A69-38037

Gas in H II regions and associated stars radial velocities correlation and systematic difference suggesting relationship between nebulae and stars
20 p3611 A69-38150

Ammonia inversion radiation in Sgr B2 region, observing distribution of density, velocity and rotational excitation
21 p3799 A69-38647

Interstellar absorption of 10 A X rays from sources in Scorpio-Sagittarius region, noting gas density between earth and Crab Nebula
21 p3788 A69-38648

Galactic gaseous disk dynamics, considering interstellar gas behavior and cosmic ray-magnetic field instability
21 p3802 A69-38824

Atlas of H II regions in 20 nearby galaxies
22 p4015 A69-40153

Possible star formation regions in Milky Way galaxy searched for compact H II regions, tabulating results
22 p4024 A69-40576

Cold neutral H cloud existence in Galaxy from measurements of 21 cm line spectra
22 p4025 A69-40644

Solar motions respecting high velocity atomic hydrogen clouds and local stellar group
22 p4035 A69-41209

Complex phenomena in theoretical astronomy including neutrino pair emission in stellar interiors, molecular H in interstellar gas, neutron stars, etc
23 p4217 A69-42316

IC 3258 emission line spectrum observations, discussing blueshift, extragalactic location, possible nature, etc
23 p4219 A69-42374

Carbon isotopes compared in interstellar formaldehyde transition for galactic nucleosynthesis, discussing spectrum analysis of radio astronomical telescope observations
23 p4220 A69-42376

High radial velocity gas cloud near Seyfert type galaxy NGC 4939 nucleus investigated spectroscopically
24 p4375 A69-42609

Positively charged diatomic hydrogen molecules in interstellar extinction and photodissociation cross section in terms of formation mechanisms
24 p4375 A69-42610

Circular arm with elliptical cross section used as magnetohydrodynamical model of helical magnetic field in spiral arms to demonstrate interstellar gas flow path
24 p4388 A69-43640

Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources
24 p4375 A69-43770

INTERSTELLAR MAGNETIC FIELDS

Interstellar gas field dynamic instability, discussing enhanced ambipolar diffusion in twisted field
02 p0326 A69-12707

Numerical calculation of trajectories of high energy cosmic rays in galactic disk, using quasi-longitudinal model of magnetic field
03 p0501 A69-13960

Ionization fronts stability, taking into account ionizing photons absorption effect in H II region and interstellar magnetic field
04 p0650 A69-14363

Galactic magnetic field estimation obtained from cosmic ray electron spectrum and radio data
05 p0828 A69-16612

Cosmic ray electron energy spectrum compared with galactic radio noise for estimating galactic magnetic field
06 p0992 A69-17377

Polarization and intensity distribution of extended supernova remnant in Centaurus, discussing remnant effect on galactic magnetic field
09 p1598 A69-22184

Solar wind and galactic magnetic field buffer layer, analyzing cosmic rays effect and space-time distribution
10 p1757 A69-22825

Cosmic ray modulation by solar wind, discussing anisotropic diffusion during propagation through interstellar magnetic field
10 p1759 A69-22842

Mean distance between magnetic clouds in space determined from measuring anisotropy coefficient of high energy radiation
10 p1760 A69-23293

Polarization to extinction ratio criterion to choose interstellar cloud model, discussing magnetic field strength requirements
10 p1781 A69-23673

Magnetic field and magnetic energy evolution in infinitely conducting homogeneous isotropic turbulent medium, applying results to galactic magnetic field model
10 p1783 A69-23793

Magnetic fields in interstellar neutral hydrogen clouds in direction of radio source Cassiopeia A, noting field amplification
10 p1785 A69-24096

Density wave theory of galactic spirals, discussing hydrogen distribution, young star distribution, stellar migration, magnetic field structure, density waves in stellar formation, etc
10 p1786 A69-24109

Stochastic model of interstellar magnetic field to account for observed cosmic ray mean life
10 p1771 A69-24112

Galactic magnetic field along Orion arm from dispersion and rotation measures of linearly polarized radiation from pulsar psr 0833-45
13 p2335 A69-27311

Shield facility and Helmholtz coil system used to investigate chronic effects on man of zero magnetic field regulated to cancel geomagnetic field variations
15 p2586 A69-30382

Galactic magnetic field structure and strength, considering cosmic ray flux, continuum radio emission, starlight polarization, star formation, etc
15 p2694 A69-30857

Interstellar cloud models, considering gas pressure, cosmic ray flux, magnetic field values, etc
16 p2853 A69-31599

Viscous and thermal generators applicability to production of spin generated galactic magnetic fields in primordial fireball
16 p2866 A69-32812

Zecman effect measurement revealing magnetic fields in interstellar neutral H clouds
18 p3190 A69-34291

Interstellar matter, considering objects size, solar wind structure, galactic parameters, magnetic fields and cosmic ray heating
21 p3802 A69-38819

Galactic radio emission and magnetic field strength and structure, using radio surveys to obtain information on cosmic rays
21 p3790 A69-38820

Galactic gaseous disk dynamics, considering interstellar gas behavior and cosmic ray-magnetic field instability
21 p3802 A69-38824

Galactic field augmentation by dynamo action from highly condensed objects, considering Crab Nebula field production by central body
22 p4035 A69-41207

Galactic magnetic field existence arguments, discussing general and optical evidences, radio emissions, Faraday rotation from extragalactic sources and from pulsars, etc
23 p4217 A69-42321

Galactic magnetic field origin from galactic turbulence, calculating individual Fourier components in random turbulent velocity
24 p4375 A69-42658

Circular arm with elliptical cross section used as magnetohydrodynamical model of helical magnetic field in spiral arms to demonstrate interstellar gas flow path
24 p4388 A69-43640

INTERSTELLAR MATTER

Neutral hydrogen content in directions of pulsars related to distance estimates
01 p0149 A69-10271

Various reaction mechanisms proposed for interstellar medium, discussing formation and destruction of interstellar molecules
04 p0653 A69-14613

Stellar spectra taken with rapid scanning Michelson interferometer, noting IR excess due to radiation from clouds surrounding stars
04 p0655 A69-14667

Comet Arend-Roland orbit, deducing interstellar origin from nongravitational orbital energy increase
04 p0660 A69-15036

Submillimeter wavelength astronomy noting instruments, prestellar matter, interstellar and intergalactic matter state and composition, IR stars, planetary atmospheres, etc
05 p0821 A69-15843

Pulsar amplitude variations due to scintillation effects arising from irregular plasma refraction by general interstellar medium between source and solar system
05 p0825 A69-16354

Cosmic ray propagation, discussing interstellar matter effect on composition and diffusion effect necessary to study radiation models
05 p0816 A69-16361

Neutral interstellar matter particle fluxes and densities for earth, noting effects on upper atmosphere gas densities
05 p0828 A69-16653

Frequency structure of pulse energy or pulsar intensity, emphasizing total energy density received per pulse
05 p0828 A69-16660

Diamond dust as major component of interstellar dust to explain observed properties
05 p0828 A69-16662

Book on diffuse matter in space covering observations of interstellar gas, grains, particle interaction and star formation
06 p0997 A69-16833

Cosmic ray propagation model, considering determination of He interstellar spectrum and amount of matter traversed at low energies
06 p0988 A69-17270

Interstellar flux of heavy and superheavy nuclei calculated, assuming nuclei injection with source spectrum similar to M nuclei
06 p0988 A69-17273

Metastable helium abundance in interstellar and intergalactic space, inferring low energy cosmic ray concentration
06 p1010 A69-17973

Time variation of velocity spheroid dispersion, axis ratio and vertex deviation in Galaxy due to star-cloud encounters
07 p1215 A69-18668

Local interstellar electron spectrum limits from measurements of cosmic ray electrons, nonthermal galactic radio emission and solar modulation effects
07 p1206 A69-19269

Early phase of Stromgren sphere development in interstellar molecular hydrogen cloud, analyzing R-type dissociation-ionization fronts using quasi-steady flow
07 p1218 A69-19281

Atomic collision processes in astrophysics noting stellar continuum spectra, Ca ion and He lines, solar corona, heat balance in H I regions and planetary nebulae
07 p1224 A69-19653

Milky Way local spiral arm 10 MHz absorption, noting interstellar absorption effect and evidence for cool electron gas
08 p1383 A69-19900

Spatial distribution of stars and obscuring matter in Milky Way field in Kapteyn Selected Area 195 in Circinus, cataloging UVB photometry of stars
08 p1389 A69-20246

Cosmic ray negatron and positron spectra using balloon-borne magnetic spectrometer, obtaining absolute solar modulation of positron flux
08 p1380 A69-20728

Chemical composition of diffuse Orion Nebula and stars compared for lighter elements, considering solar system formation from interstellar medium
08 p1402 A69-20908

Molecular line intensity requirement in line of sight for detecting interstellar water vapor cloud, assuming transparent atmosphere and ideal radio telescope
09 p1591 A69-21446

Further microwave emission lines and ammonia clouds in Sagittarius region, tabulating relevant transitions in ammonia and water
09 p1597 A69-22150

Contour maps of H II regions W12, Orion A, W43 and W51, listing flux densities and angular sizes of components
09 p1598 A69-22186

Far IR source in galactic center detected at 100 microns, noting thermal emission of interstellar dust grains as possible mechanism
09 p1603 A69-22264

Radio telescopic survey for OH emission at 1667 MHz in interstellar dust clouds for catalog compilation, tabulating results
09 p1603 A69-22267

Interstellar reddening material distribution within 2500 parsecs of sun, noting concentration in galactic plane, spiral arms and cloud complexes
10 p1773 A69-22961

Polarization to extinction ratio criterion to choose interstellar cloud model, discussing magnetic field strength requirements
10 p1781 A69-23673

Interstellar grain model consisting of elongated dielectric particles represented by infinite circular cylinders reproducing interstellar extinction in IF far UV spectra
10 p1781 A69-23674

Interstellar dust alignment mechanisms investigated by Monte Carlo model, discussing grain velocity maintenance by radiation pressure and effects of magnetic constraint on charged grain trajectory
10 p1781 A69-23675

Interstellar diffuse absorption bands due to resonance lines of impurity atoms trapped in low temperature hydrocarbon matrices
10 p1781 A69-23677

Interstellar extinction models of classical Mie particles and quantum mechanical polycyclic aromatic molecules
10 p1781 A69-23679

Diffuse galactic radiation reinterpretation by solving same transfer problem exactly for properties of interstellar particles
10 p1782 A69-23680

Interstellar dust distribution ideas to explain observed variability in starlight polarization and similar phenomena
10 p1785 A69-24050

Reddened M supergiant 119 Tauri IR spectra and IR absorption by CO and SiO molecules in stellar atmosphere and silicate mineral in interstellar grains
10 p1786 A69-24104

Interstellar formaldehyde detection in absorption against galactic and extragalactic radio sources, discussing chemical evolution
10 p1786 A69-24108

Flare stars observational and known aggregate characteristics in Coal Sack region
10 p1790 A69-24141

Photoelectric and photographic observations in UVB system of open star clusters, analyzing dispersion in two color diagrams, noting absorbing material structure
11 p1951 A69-24247

Interstellar medium density distribution as function of stellar action spherical coordinates applied to determining stellar motion forces and B stars brightness difference
11 p1955 A69-24386

Pulsar distances estimated from neutral hydrogen absorption, using observations from 140 ft telescope
12 p2156 A69-26224

Optical constants of bulk diamonds compared with interstellar extinction, calculating extinction curves for diamond particles from Mie theory
12 p2157 A69-26230

Interstellar gas and dust clouds inclination to plane of M31 galaxy spiral arms
12 p2159 A69-26664

Interacting galaxies theories, characteristics and terminology, discussing galactic radio sources and properties of matter
12 p2169 A69-27055

Interacting NGC 4485 and 4490 galaxies instability, establishing early stage of evolution from morphological and spectroscopic results of photographic observations
12 p2169 A69-27056

Lambda-doublet radiation from excited state of interstellar OH detected at 5 cm wavelength
13 p2335 A69-27312

Hydrogen atoms in interstellar grains as source of stellar flux absorption, noting crystal environment effect on atomic hydrogen Lyman alpha transition
13 p2337 A69-27518

Dielectronic recombination influence on radio recombination lines of carbon under typical nebular conditions
13 p2346 A69-27703

Cosmic rays suggested as origin of interstellar grain alignment, discussing galactic central radiation, gas collisions and isotropic bombardment
13 p2333 A69-28469

Monograph on interstellar extinction computations covering theoretical curves for spherical metal and graphite particles, albedo, optical constants, normalization, temperature dependence, etc
14 p2516 A69-28901

Extinction efficiency of graphite core interstellar grains with solid hydrogen and ice mantles, using theoretical models
14 p2486 A69-29587

Amplitude and scale of microscopic fluctuations of electron density within M8 from brightness ratios of O II lines, using multiple shell model
14 p2514 A69-29949

Emission of two photons decay from metastable 2s level of pure hydrogen gaseous nebula, noting radiative and collisional excitation
14 p2529 A69-29975

Excited hydrogen radio lines observations, analyzing neutral and excited hydrogen distribution in galaxies
15 p2682 A69-30502

Interstellar absorption and spatial distribution in northern Aquila with absence of early O-B2 stars, including luminosity function
15 p2683 A69-30513

Milky Way structure, discussing dust bridge and density of absorbing matter between spiral arms of Sagittarius and Carina Cygnus
15 p2683 A69-30514

Interstellar radio absorption influence on spatial distribution of cosmic radio emission observations with fixed multiple dipole antenna arrays
15 p2687 A69-30545

Maser emission in interstellar OH ground state produced by IR pumping, noting population inversion mechanism
15 p2691 A69-30762

Optimization techniques for stellar kinetic theory problems, discussing kinematics distribution function, cosmic gas dynamics, interstellar matter, etc
15 p2695 A69-31004

Matter traversal of high energy primary galactic cosmic ray protons from antiproton flux and energy measurements
15 p2678 A69-31491

Interstellar cloud models, considering gas pressure, cosmic ray flux, magnetic field values, etc
16 p2853 A69-31599

Pulsars properties, nature and utilization for interstellar medium study including radiation mechanisms, white dwarf stars and neutron star development
16 p2855 A69-31762

MHD of interstellar gas-dust medium, analyzing gas-dust flow and gas-dust shock waves in magnetic fields
16 p2823 A69-32590

Photoelectric method to measure galactic reflection nebulae brightness, color and polarization used to explore interstellar grains physical nature
17 p3032 A69-33104

Pulsars properties and distribution in galactic coordinates, deriving interstellar medium properties and physical nature of objects based on neutron star rotation
17 p3040 A69-33800

H II regions distribution in nearby irregular I galaxies, attributing asymmetry to localized bursts of star formation
18 p3190 A69-34289

Search for diffuse galactic light component between 2100-2800 A by rocket measurements of night sky brightness, showing low albedo of interstellar dust
18 p3202 A69-35210

Solid para hydrogen coated graphite particles expulsion into interstellar medium from star formation regions, considering mantles stability and particles extinction efficiency, albedo and phase function
20 p3601 A69-37499

Cepheus light attenuation curve explained by applying polymodal particle size distribution, obtaining interstellar dust density
20 p3608 A69-38041

Spectra of peculiar S zero galaxy NGC 7625 with irregular dust distribution, discussing central spheroidal rotation and mass
20 p3610 A69-38140

Galaxy NGC 3593 with large amounts of interstellar dust, calculating galactic mass and central density
20 p3610 A69-38142

Irregular galaxy NGC 3077 with interstellar dust measuring velocity field by spectroscopy
20 p3610 A69-38144

Interferometric photoelectric scans of interstellar Na D-lines in stellar spectra using Pepsios spectrometer
20 p3611 A69-38148

Interstellar grains formation and composition, suggesting mixture of graphite particles in carbon stars and silicates in oxygen-rich giants
20 p3615 A69-38260

Soft x ray extragalactic background flux measurements, considering correction for absorption by interstellar medium
21 p3788 A69-38541

X ray sources and diffuse background radiation observed in gamma and X ray spectral regions, considering electromagnetic waves attenuation by interstellar matter
21 p3789 A69-38817

Interstellar matter, considering objects size, solar wind structure, galactic parameters, magnetic fields and cosmic ray heating
21 p3802 A69-38819

Spectrophotometric analysis of interstellar absorption in direction of IC 1805 cluster, noting anomalies
21 p3814 A69-39576

Soviet collection of papers on nebulas and interstellar medium covering computer simulation, photometric observation results, etc
21 p3816 A69-39721

Pleiades cluster and ambient interstellar medium structure analyzed for spectral distribution based on plane-parallel scattering model
21 p3817 A69-39727

Neutrons, protons and alpha particles abundance resulting from nuclear evolution of nondegenerate matter exploding at very high temperatures
22 p3980 A69-40148

Bok globules in Orion nebula, deriving temperature and density data
22 p4022 A69-40465

Molecular collision pumping mechanism for anomalous microwave absorption by formaldehyde rotational transition in Galaxy dust cloud
22 p4029 A69-40768

High radial velocity matter of bright region near Trapezium in Orion Nebula, determining electron density lower limit and mean velocity
22 p4029 A69-40769

Polarization fluctuations of starlight indicating turbulent structure of interstellar medium, noting pulsar signal dispersion and Faraday rotation
22 p4030 A69-40771

Strong IR millimeter wave emission from galactic center due to interstellar dust grains resembling semiconductor structure
23 p4215 A69-42115

Extragalactic universe major constituents and physical properties of normal, radial and compact galaxies, discussing missing matter existence
23 p4217 A69-42317

Stellar evolutionary ages and gravitational theory relations based on initial abundance ratio U 235/U 238 and present interstellar medium heavy element content
23 p4219 A69-42329

Spiral and irregular galaxies integral properties and relations, discussing optical and 21-cm observations, hydrogen masses, statistical corrections, hydrogen line optical depths, etc
23 p4220 A69-42383

Equal velocity contour diagrams for interstellar matter emission and absorption study in Cassiopeia-Perseus region
24 p4384 A69-43050

Interstellar medium density distribution as function of stellar action spherical coordinates applied to determining stellar motion forces and B stars brightness difference
24 p4390 A69-43776

INTERSTELLAR MICROWAVE SPECTRA
U MICROWAVE SPECTRA

INTERSTELLAR RADIATION

- Ammonia gas molecules in interstellar medium, discussing detection in direction of galactic center by means of microwave emission
03 p0518 A69-14258
- Radio spectra of supernova remnants Cygnus Loop and IC443, noting possible radiation from shell source
06 p1003 A69-17322
- Interstellar light absorption in Milky Way region of Cepheus analyzed by excess color technique
07 p1216 A69-18855
- Cosmic ray astrophysics, discussing chemical composition, energy spectrum and galactic sources
07 p1205 A69-18909
- Diffuse interstellar absorption bands and doublet line, noting large intensities of forbidden transitions
08 p1395 A69-20639
- RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Casiopeia A source
09 p1586 A69-21295
- Contour maps of supernova remnants HB 9, Simeis 147 and IC 443, noting spectra showing radiation nonthermal
09 p1604 A69-22408
- Mean distance between magnetic clouds in space determined from measuring anisotropy coefficient of high energy radiation
10 p1760 A69-23293
- Asymmetrical profiles of 4430 A interstellar absorption band, discussing stellar and electronographic spectra
10 p1781 A69-23676
- Image tube spectra observations of interstellar absorption band at 4430 A, noting emission band at 4400 A
11 p1965 A69-25658
- Molecular dissociation by line radiation absorption, applying results to hydrogen molecules in H I region dissociated by photons of mean interstellar UV radiation field
15 p2693 A69-30783
- Interstellar hydromagnetic waves due to streaming cosmic rays indicated by pulsar scintillations studies
15 p2676 A69-30889
- Atomic H Lyman-alpha interstellar absorption line in theta Orionis spectrum, showing equivalent width relations to H column density and spin temperature
15 p2695 A69-30890
- RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Casiopeia A source
15 p2697 A69-31226
- Supernovae spectra observation suggesting tracing as broad band interstellar absorption rather than emission features on continuum
15 p2701 A69-31534
- BCD classification for cepheids, discussing /sigma/ surface definition, locus of normal stars of population I and interstellar reddening
17 p3038 A69-33725
- Sodium D line profiles in interstellar clouds, determining absorbers velocity distributions
20 p3611 A69-38149
- Invalidity of Pagel method for intrinsic and interstellar reddening for peculiar objects, discussing excitation mechanism for forbidden lines of ionized Fe for Eta Carinae
21 p3815 A69-39616
- Soviet collection of papers on nebulae and interstellar medium covering computer simulation, photometric observation results, etc
21 p3816 A69-39721
- Catalog of reflection nebulae with known dimensions and flux characteristics noting spectrum characteristics
21 p3816 A69-39722
- Interstellar extinction in UV from zeta and epsilon Persei spectra obtained with scanner attached to telescope mounted in pointed Aerobee rocket
22 p4030 A69-40772

INTERSTELLAR SPACE

- Cosmic radiation propagation in interstellar space, discussing differential kinetic energy spectra of protons, He, C and O nuclei and Fe
06 p0988 A69-17269
- Physical conditions of intergalactic space in Local Group using virial theorem and assuming energy equipartition, discussing temperature, ionized hydrogen density, turbulent motions, etc
08 p1381 A69-19795
- Water in interstellar regions detected by microwave emission from 6 sub 16 to 5 sub 23 rotational transition
08 p1383 A69-19896

Spacecraft motion parameters and physical characteristics of space determined from statistical analysis of measurement data

09 p1495 A69-21764

Galactic discontinuity near longitude 140 degrees attributed to stars deficiency in anticenter quadrant or interstellar cloud obscuration

10 p1776 A69-23215

Mean distance between magnetic clouds in space determined from measuring anisotropy coefficient of high energy radiation

10 p1760 A69-23293

Pulsars distance determined using H II region data covering line of sight stars and Galaxy hydrogen distribution

17 p3026 A69-32858

Grains with high defect concentration in circumstellar and interstellar space from energetic particles and photons bombardment, discussing lifetime and optical properties

22 p4023 A69-40472

INTERSTELLAR TRAVEL

Bibliography of interstellar travel and communication

03 p0510 A69-13397

Advanced propulsion systems propulsive capabilities in connection with interstellar flights, considering rocket and ramjet propulsion, energy requirements and stellar plasma

06 p0984 A69-17631

Interstellar minimum fuel and time optimal trajectories for acceleration limited rockets determined by applying Pontryagin maximum principle to relativistic rocket equations of motion

20 p3602 A69-37530

Reduced flight time interstellar round trip propulsion system with relativistic velocity capabilities, discussing vehicle with solar sail and magnetic course reversal [AAS PAPER 69-388]

24 p4363 A69-42829

INTERSTITIALS

Interstitial impurity effects on mechanical properties of molybdenum single crystals, considering temperature dependence of flow stress in bcc metals

01 p0095 A69-10609

Vacancies and interstitials in metals - Conference, Julich, West Germany, September 1968

02 p0267 A69-12185

Elastic constants of point defects for bcc and fcc crystals with vacancies and interstitials calculated by Born-Huang method for nonprimitive lattices

02 p0267 A69-12186

Complex form internal friction maximum composed of interstitial atoms in molybdenum solid solution

04 p0615 A69-14640

Work hardening characteristics of Ta and Ta-base alloy single crystals as function of temperature and interstitial concentration

05 p0778 A69-15758

Whiskerized graphite fiber in resin matrix composites, analyzing interstitial growth characteristics, resin infiltration, layup and compaction

09 p1511 A69-22360

Order-disorder in alloys with several phase transition temperatures, discussing crystal lattices, interstitial alloys, atomic and magnetic ordering

11 p1936 A69-24702

Transition metal interstitial compounds thin film preparation and superconducting properties, emphasizing high critical temperature, rock salt structure and NbN base

13 p2321 A69-28009

Internal friction, Young modulus and resistivity measurements for stage I interstitials in electron irradiated tungsten

13 p2284 A69-28682

Strain aging of polycrystalline Nb containing interstitial impurities as function of temperature, discussing interstitial role in recovery substages

15 p2636 A69-30194

Refractory metals fracture, discussing interstitial impurity addition effects in Group 5a and 6a metals

17 p2989 A69-33556

Thermal isolation characteristics of low conductance interstitial materials determined, using test apparatus of axially loaded radiation shielded cylindrical column in vacuum [AIAA PAPER 68-31]

23 p4239 A69-41889

INTESTINES

NT RECTUM

Rats on casein, soybean and Chlorella diets for protein source noting soybean diet produced no appreciable changes in intestinal flora

02 p0197 A69-11490

Protein free diets effects on rat intestinal microflora, noting decrease in lactic acid bacteria and increase in spore forming bacteria

05 p0709 A69-16516

Protein free diets effects on rat intestinal microflora, noting decrease in lactic acid bacteria and increase in spore forming bacteria

18 p3096 A69-34735

Fire hazard in closed chamber associated with interstitial hydrogen and methane formed by space diets, comparing Gemini-type and bland diets

20 p3482 A69-37622

INTOXICATION

Alcoholic hangover effects on human balance system from flying demands viewpoint, discussing ocular-vestibular system disturbances

23 p4089 A69-41817

INTRACRANIAL PRESSURE

Blood circulation in brain during acceleration analyzed by tensometric sensors and electroplethysmography, noting intracranial sensitivity to gravitational changes

06 p0874 A69-17646

INTRAMOLECULAR STRUCTURES

Rotational spectrum of ethylene episulfide to determine molecular structure, particularly orientation of C sub 2 S ring

08 p1268 A69-20535

INTRAOCULAR PRESSURE

Glaucoma in commercial airline pilots noting value and safety of routine tonometry

03 p0376 A69-14078

Responsiveness of cortex and visual pathway during transient hypotension induced by increased gravitational stress, discussing intraocular pressure of cat

22 p3878 A69-40779

Indentation tonometry for occult pathology and glaucoma in commercial pilots

23 p4088 A69-41805

INTRUDER AIRCRAFT

U A-6 AIRCRAFT

INVALIDITY

U ERRORS

INVARIANCE

NT GAUGE INVARIANCE

Group invariant solutions of differential equation systems applied to quasi-linear partial differential equations of motion of air masses

02 p0274 A69-11444

Lorentz invariant theories of gravitation compared with Einstein general relativity tests with respect to one body motion observations

02 p0318 A69-12094

Invariance principle application in gyroscopical systems, noting effect of external disturbances and system noise

04 p0597 A69-14603

Invariant subspaces, controllability and observability of linear dynamic systems

05 p0740 A69-16597

Analysis and synthesis of optimal linear time invariant systems with uncertain or unknown parameters, considering mean square error

06 p0902 A69-17405

Linear noisy two port preceded by nonreciprocal lossless network analyzed, showing existence of associated quantity invariant under lossless transformation

07 p1104 A69-18891

Mathematical formulas for rigidity distribution of inhomogeneous multilayer shells, discussing invariance property

07 p1232 A69-19011

Plane symmetric perfect fluid cosmological model derived from class I considerations, evaluating scalar invariants for line element

07 p1222 A69-19586

Maxwellian field and second order invariant system in vacuum in three dimensional Riemannian space with positive-definite metric, discussing Lorentz invariant equations

09 p1541 A69-22392

Functional equations of physical systems in strong coupling solved by quantum theory model of anharmonic oscillator, discussing relativistic invariant field theories

09 p1541 A69-22393

Variational method for necessary and sufficient conditions of terminal state invariance of dynamic control system

10 p1718 A69-23206

Canonical invariance of Hamiltonians noting nature of solutions of differential equations, existence of

- periodic solutions and application to three body problem
10 p1721 A69-23987
- Degree of knottedness of tangled vortex lines, discussing vorticity distribution for inviscid flow and MHD invariants
11 p1872 A69-25126
- Multidimensional self adjusting systems design by achieving parametric invariance, using sensitivity theory
11 p1861 A69-25711
- Newtonian invariant mechanics, giving inertial interpretation of gravitation and Hubble expansion of universe
15 p2654 A69-31214
- Time dependent collimated light diffuse reflection and transmission by finite inhomogeneous atmosphere, using principle of invariance
18 p3132 A69-35345
- Second rank Dirac spinors with invariant components relative to Lorentz group transformations
19 p3361 A69-36817
- Variational method for necessary and sufficient conditions of terminal state invariance of dynamic control system
21 p3756 A69-39147
- Invariance theory in automatic dynamic systems
23 p4145 A69-42368
- Absolute invariance of perturbations affecting dynamic plant achievable by inertial measurement of highest derivatives
23 p4145 A69-42369
- Invariance conditions for steady and unsteady systems by differential method compared to variational approach
23 p4145 A69-42371
- Absolute invariance conditions for closed isolated subsystem of nonlinear differential equations of Cauchy normal form
23 p4183 A69-42372
- ### INVARIANT IMBEDDINGS
- Initial value method applied to Fredholm integral equation for radiative transfer, neutron transport and multiple scattering, verifying invariant imbedding method
01 p0103 A69-10002
- Invariant imbedding and sequential interpolating filters for nonlinear processes
[ASME PAPER 68-WA/AUT-3]
05 p0738 A69-16183
- Invariant imbedding and multipoint boundary value problems in control theory and identification of systems
05 p0787 A69-16478
- Iterative methods for composite layer slabs transport models, using invariant imbedding approach to transport theory
08 p1343 A69-20353
- Cauchy problem of invariant imbedding satisfying nonlinear boundary value problem, discussing optimal control and radiative transfer applications
09 p1531 A69-21413
- Dynamic programming determining optimal feedback control policies for optimal trajectories based on invariant imbedding
11 p1910 A69-25410
- Invariants method and applications in classical and relativistic physics emphasizing theory of relativity, physical and mathematical theories relations and group theory applications
14 p2484 A69-28860
- Suboptimal closed loop control of nonlinear systems subject to quadratic performance indices by invariant imbedding concepts and maximum principle
18 p3111 A69-34678
- ### INVENTIONS
- Untutilized ideas in university laboratories, showing generation and implementation enhancement by marketing experience and product development background
15 p2720 A69-30596
- ### INVENTORY CONTROLS
- Stationary inventory problems analysis, discussing inventory policy, recursive and or limiting procedures, stationary point processes, stock delivery time instants, etc
12 p2192 A69-26750
- Remote sensing technology application to improving range resource inventories, discussing aerial photography, descent, IR and radar scanning, etc
12 p2098 A69-26992
- ### INVERSIONS
- NT CENTRIFUGING STRESS
NT INTERFACIAL TENSION
- NT POPULATION INVERSION
NT STRUCTURAL STRAIN
NT TEMPERATURE INVERSIONS
NT VOLUMETRIC STRAIN
- Oblique matrix pseudoinverse concept extended, discussing elementary properties and applications
01 p0104 A69-10315
- Continued fraction inversion to rational fraction of two polynomials based on state space formulation and Routh algorithm
16 p2805 A69-32470
- Second harmonic generation in laser with center of inversion following deformation by media beam or static pressure
19 p3332 A69-35872
- ### INVERTEBRATES
- NT BEETLES
NT CRABS
NT DROSOPHILA
NT FLAGELLATA
NT FLATWORMS
NT INSECTS
NT MICROSPORES
NT PARAMECIA
NT PROTOZOA
NT PUPA
NT SPORES
NT WORMS
- Pyridine nucleotide-linked D-lactate dehydrogenase stereospecificity in various species of invertebrates
01 p0018 A69-11198
- Invertebrates resistance to explosive decompression and low end pressure, noting hypoxia and freezing as cause of death
07 p1059 A69-18537
- Invertebrate endoskeletal cartilage and cartilage-like tissues occurrence and nature, discussing cellular tissues and origin
15 p2555 A69-30412
- ### INVERTERS
- NT STATIC INVERTERS
- Wideband inverter operational amplifier frequency response, open and closed loop transfer functions, beta, settling time and slew rate limits, discussing HF performance prediction
11 p1857 A69-25666
- Electromagnetic processes analysis in autonomous inverters simplified by linear graph method to derive characteristic equation
24 p4255 A69-42571
- ### INVESTIGATION
- U ACCIDENT INVESTIGATION
U AIRCRAFT ACCIDENT INVESTIGATION
- ### INVESTMENT CASTING
- Heat resistant nickel alloys for castings, tabulating chemical composition, mechanical properties, heat treatment, weldability, etc
09 p1522 A69-21608
- Cast high temperature alloys for gas turbine components, discussing production, temperature capability, composition, oxidation, hot corrosion and weldability
[IME PAPER 10]
12 p2147 A69-25795
- Nondestructive thermal method of measuring wall thickness and channel blockage in investment castings used in aircraft parts production
24 p4312 A69-42754
- Ti and Ti alloys investment castings mechanical properties, dimensional control and corrosion resistance in aircraft and aerospace structural application
24 p4324 A69-43433
- ### INVISCID FLOW
- NT STAGNATION FLOW
- Potential flow of stream interaction with two dimensional thin jet, discussing jet penetration depth
01 p0007 A69-11019
- Nonlinear weak shock wave diffraction around convex angled corners in polytropic inviscid thermally nonconducting gas
03 p0412 A69-12848
- Cylindrical jet stability of perfectly conducting, incompressible and inviscid fluid in presence of axial magnetic field
03 p0474 A69-13142
- Inviscid cavity and wake flows behind submerged bodies, analyzing mathematical and theoretical models
04 p0587 A69-14608
- Surface geometry of three dimensional inviscid hypersonic flows, developing tensor equations for geodesic, steepest descent and pressure approximations
04 p0542 A69-14718
- Inviscid hypersonic flow of uniform equilibrium gas past axisymmetric blunt body
04 p0542 A69-14723
- Irrotational almost uniform plane flow of two immiscible inviscid liquids on horizontal bottom in channel noting permanent gravity waves
04 p0590 A69-15099
- Two dimensional unsteady flow of inviscid polytropic gas using analysis of similarity solutions in homogeneous flow
04 p0590 A69-15154
- Flow pattern induced by oscillatory point source in rotating inviscid liquid
04 p0591 A69-15277
- Inviscid incompressible fluid flow stability against helical disturbances in circular cylinder
06 p0910 A69-17333
- Stream function approximation for plane axisymmetric vortex free transonic inviscid gas flow
06 p0910 A69-17333
- Pressure distribution determined from laminar viscous-inviscid interactions in supersonic flow, including flows with heat transfer
[AIAA PAPER 69-7]
06 p0913 A69-18099
- Large amplitude waves in inviscid flows of stably stratified fluids over barriers with constant density upstream constructed from vortex pairs and doublets
08 p1346 A69-20313
- One strip method of integral relations applied to inviscid supersonic blunt body problem
09 p1430 A69-21972
- Mach wave and anisentropic supersonic flow interaction, considering constant entropy along streamlines and layer of entropy discontinuities/interfaces
10 p1631 A69-22906
- Large amplitude symmetric and asymmetric irrotational motion of inviscid incompressible fluid with liquid-vapor interface in accelerating cylindrical container of revolution
11 p1871 A69-25124
- Hamilton principle for inviscid compressible fluid in Euler coordinates, analyzing shortcomings found in variational principles and model in Lagrangian coordinates
11 p1875 A69-25483
- Inviscid reacting flow free of molecular transport analyzed locally near stagnation point, using Lighthill-Freeman gas model
11 p1876 A69-25560
- Diffusion-stabilized difference schemes for inviscid compressible flow equations in conservation form for arbitrary number of space dimensions
12 p2062 A69-26624
- Heat transfer for incompressible inviscid fluid flow in cone, expressing solution in terms of dimensionless numbers
13 p2375 A69-27788
- Inviscid supersonic flow in right angle corner of varied angular intersecting wedges with bow waves and remaining planar up to intersection line
13 p2200 A69-28251
- Flow stability of one dimensional Cartesian and cylindrical incompressible inviscid flows with no body forces and interfaces
14 p2429 A69-29013
- Spoiler effect on aerodynamic characteristics of airfoil with hinged flap in inviscid fluid plane flow
15 p2549 A69-31223
- Cylindrical viscous jet transition points from stable to unstable modes of oscillation found same as for inviscid jet
16 p2773 A69-32570
- Supersonic and hypersonic flow of inviscid ideal gas over conical delta wings using three dimensional method of characteristics
[AIAA PAPER 69-646]
17 p2893 A69-33486
- Conservation theorems for energy and mean circulation in inviscid rotating fluid, noting inertial wave spectrum continuity
18 p3121 A69-34550
- Aerodynamic characteristics of two dimensional nonexpandable flexible sail in hypersonic inviscid flow, discussing roles of sail length and chord and angle of attack
19 p3237 A69-35814
- Nonuniform supersonic flow of ideal inviscid gas impinging on plane obstacle, discussing flowfields and shock wave production in impact
19 p3239 A69-36397
- Stratified fluid flow past obstacle, considering steady inviscid flow with nonlinear convection and vertical acceleration
19 p3240 A69-36474
- Supersonic inviscid flow past wing-body configuration, determining pressure distribution
20 p3458 A69-37099

Second circle theorem for two dimensional irrotational flow of incompressible inviscid fluid in z plane
20 p3518 A69-38316

Linear hydrodynamic equations describing inviscid fluid flow past thin elastic cylindrical shells in circle with motions described by shallow shell equations
21 p3834 A69-38719

Spectral equation for decaying isotropic turbulence of incompressible inviscid flow at large Reynolds number, using spectral cascading
21 p3694 A69-38835

Differential rotation of incompressible inviscid fluid of infinite electrical conductivity in spherical shell, noting toroidal magnetic field for sun
22 p4027 A69-40658

Strong interaction between hypersonic boundary layer over flat plate and associated inviscid flow, discussing heating and vorticity effects, boundary layer edge, etc
22 p3860 A69-40896

Semianalytic solution for axisymmetrical supersonic inviscid flow near stagnation region of spherically blunted body with detached shock waves
22 p3861 A69-41178

Boundary value problem solution for inviscid fluid flow past compliant body with analytical behavior of flow discontinued at points
23 p4151 A69-41525

Airfoils and cascades design for incompressible flow by numerical methods
23 p4058 A69-41610

Numerical methods for radiation transport for inviscid stagnation flows, detailing spectral nature of radiation emission and absorption
[AIAA PAPER 68-664] 23 p4059 A69-41890

Inviscid transonic flow past circular arc bodies of revolution, applying Hosokawa technique to pressure distribution solution
23 p4059 A69-41899

Two dimensional incompressible inviscid fluid flow problems solution by conducting-paper analog with electrical equipotentials tracing, based on Laplace equation applicability
24 p4299 A69-43024

Inviscid hypersonic flow over oscillating slender wedge, defining equivalent phase shift
24 p4248 A69-43582

Electron temperature and density of inviscid free molecular nozzle flow of shock tunnel measured with thin wire Langmuir probes
24 p4317 A69-43648

Similarity solutions to massive blowing problem, discussing inviscid flow model compatible with no-slip condition
24 p4305 A69-43658

INVISIBILITY
U VISIBILITY

INVOLUNTARINESS
U INVOLUNTARY ACTIONS

INVOLUNTARY ACTIONS
Eye movement control mechanisms during binocular fixation used to determine corrective roles of flicks and drifts
22 p3883 A69-40876

Human response to visual beat phenomena by combining intermittent stimuli, considering brightness estimation
22 p3884 A69-40889

IODIDES
NT CESIUM IODIDES
NT SILVER IODIDES

HI and DI reaction into HD and $2I$, noting need for rotational or vibrational excitation in addition to translational energy of collision
01 p0123 A69-10686

Phase diagram of BiTeI degenerate semiconductor crystals synthesized by heat treatment, discussing crystallization methods and physical properties
02 p0294 A69-11540

Photolysis of t -butyl iodide at low temperatures as source of t -butyl peroxy radicals for synthesis of peroxides
07 p1073 A69-18375

IODINE
Steel corrosion by iodine noting effects of water and oxygen
03 p0444 A69-13310

Iodine IR laser, discussing CW emission obtained at various wavelengths and attributed to electronic transitions in atom
[IEEE PAPER T-5] 07 p1154 A69-19082

Iodine fluorescence spectra excited by krypton ion laser, analyzing spectral series and vibrational rotational levels
07 p1156 A69-19304

Failure mechanism for intergranular stress corrosion cracking of vacuum annealed unalloyed Ti in alcohol iodine solutions
16 p2798 A69-31717

Pure quadrupole resonance spectrum of iodine-127 in solid stannic iodide measured in specific temperature range at atmospheric pressure
22 p3986 A69-40726

IODINE COMPOUNDS
NT CESIUM IODIDES
NT IODIDES
NT SILVER IODIDES

Laser action from atomic bromine produced by flash photolysis of gaseous iodine monobromide, discussing pulsed output, optical gain, chemical reversibility and atomic excitation
19 p3337 A69-36444

IODINE ISOTOPES
Iodine 123 decay via gamma ray emission, noting energies of several transitions
03 p0470 A69-13099

ION ATOM INTERACTIONS
Spectroscopy of fast atoms resulting from fast ion impact with gas targets and electron capture into excited state
03 p0471 A69-13162

Frictional forces and collision frequencies for ions moving in neutral gases
03 p0421 A69-13328

Parametric or impact parameter treatment for describing ion-atom collision at low or high impact velocities, reexamining approximate treatments
05 p0797 A69-16697

Atomic excitation and ionization involving inner shell electrons during collisions between atoms and ions, examining photoabsorption by inner shell electrons
07 p1187 A69-19659

Atomic and electronic collisions experimental study techniques, noting three data logging systems
07 p1187 A69-19662

Forward scattering of metastable and ground state argon atoms after argon ion-atom charge transferring collisions, discussing excitation resonances
08 p1354 A69-19809

Drift measurements of rate constants for charge transfer in ion-molecule processes
08 p1355 A69-20210

Li atoms and O interactions with electron radiation produced defects in Si studied by IR spectroscopy
09 p1554 A69-21337

Interatomic potential between alkali ions and rare gas atoms, using model accounting for repulsive and attractive exchange forces
16 p2815 A69-32464

ION BEAMS
High current electron bombardment ion source for production of low energy ion beams without metastable contamination
03 p0428 A69-13106

Beam-foil spectroscopy problems noting light collection, spectrograph design, broadening of spectral lines by Doppler effect and other complications
03 p0470 A69-13161

Beam-foil spectroscopy above 5.5 Mev for multiply ionized atoms, noting use of Tandem accelerator, spectral resolution, beam intensity and Doppler effect
03 p0471 A69-13163

Intensity of visible and UV light from beam of positive deuterium molecular ions excited by passage through thin C foil
03 p0471 A69-13166

Crossed beam studies of ion-molecule reaction mechanisms, crossing approximately monoenergetic ion beam with thermal molecular beam
03 p0382 A69-13460

Pulsed arc source using plasma jet to obtain intense hydrogen ion beam
03 p0412 A69-13842

Ion beam interaction with plasma in presence of charge exchange and zero external magnetic field, studying stability of system
03 p0481 A69-14200

Mean life measurement of excited ions electronic levels using beam foil light source, emphasizing beam particle monitoring and theoretical equations
04 p0595 A69-14278

Static beam deflection in beam foil spectroscopy for determining parent ionization stage of emitting ions
04 p0595 A69-14279

RF sputter etching of microcircuits and components
04 p0606 A69-14874

Charge transfer cross sections for slow ion production in nitrogen molecular ion beams incident on hydrogen and deuterium
05 p0796 A69-15914

Molecular jets obtained by charge exchange of triatomic ion beams consisting of hydrogen, deuterium and nitrogen, noting formation, energy level, etc
05 p0797 A69-16339

Ion accelerators design for Kaufman thrusters in terms of beam optics and grid lifetime, using digital computer and electrolytic tank analog
[AIAA PAPER 69-261] 09 p1567 A69-21261

Equilibration potentials between dense thrust beam and dilute space plasma measured in wind tunnel
[AIAA PAPER 69-263] 09 p1568 A69-21728

Crossed beam apparatus with mass selected variable energy primary beam for study of angular and velocity spectra of ion-molecule reactions
12 p2092 A69-26477

Plasma ion oscillations excited in plasma consisting of ion beam and thermal electrons produced by back diffusion sources
13 p2304 A69-27301

Beam-foil technique for measuring radiative lifetimes of excited electronic states in ionic species of O, including transition probabilities
13 p2301 A69-27452

Plasma lens device for focusing ion or plasma beams with closed electron drift
13 p2307 A69-27658

Synthesized plasma from neutralized mercury ion beam ejected from electron bombardment source, analyzing temperature, plasma sheath and stability
14 p2502 A69-29956

Charge transfer cross section between mercury ion and Cs assessed, considering ion engine positive ion beam neutralization
16 p2835 A69-31895

Oscillations excitation between ion cyclotron and electron plasma frequency in He ion beam generated plasma
17 p3014 A69-33830

Beam foil technique to measure energy transition levels radiative lifetime for nitrogen ions
17 p3009 A69-34154

Lunar based optical workshop and repair facility, using ion beam technique to polish and repair optical element surfaces
18 p3113 A69-34243

Ion beam sputtering, evaporation and electrical degradation of Al contacted Si solar cells observed in high temperature cyclic tests
19 p3250 A69-35686

Charge exchange cross sections and electron losses in hydrogen ion beam impacting on water vapor molecules
19 p3378 A69-36190

Excited states lifetime of carbon dioxide and nitrous oxide ions deduced from spontaneous radiative deexcitation in vacuum after passage through gaseous target
22 p3985 A69-40715

Bipolar HF p -type Si transistors preparation by B and P ion beams and planar technology masking technique, obtaining p - n - p structure
22 p3916 A69-40960

Crossed beam apparatus /evatron/ for studying energy spectra of crossed positive ethylene ion beams and neutral ethylene molecule beams
24 p4280 A69-43813

ION CHAMBERS
U IONIZATION CHAMBERS

ION CHARGE
Charge and degree of ionization of nickel alloyed with molybdenum analyzed by electrolytic ion migration method
07 p1159 A69-18535

Instability in pyrolytic silicon dioxide films on Ge substrate under bias at room temperature consisting of positively charged ion motion
07 p1200 A69-19010

Unsuccessful attempt to observe high charge ion lines generated by dielectronic recombination in solar corona at 5-cm wavelength
15 p2689 A69-30568

Thermal diffusion coefficient for fully ionized plasma containing mixture of arbitrary charge ions in topside ionosphere
16 p2775 A69-32084

ION CONCENTRATION
Field strength, electron temperature and ion concentration fluctuations in axial direction determined from

measurements between homogeneous and stratified plasma columns
05 p0800 A69-15736

Nondegenerate dense plasma thermodynamic stability by nonclassical methods, discussing atomic concentration dependence on ionic concentration
05 p0802 A69-15892

Negative ion-molecule reactions in nitrous oxide using mass spectrometer, noting negative ion concentration pressure dependence
06 p0960 A69-17106

Positive ion concentration in subsonic high velocity laminar flames determined by interpreting kinetic and diffusion factors of adding cesium to flame
13 p2380 A69-28463

OGO 5 spectrometric studies of topside ionospheric ion concentrations, noting difference between nighttime and sunlit pass
15 p2599 A69-31345

Plasmasphere hydrogen and He ion concentration models, using diffusive equilibrium theory for plasmasphere parameters
15 p2677 A69-31447

Ion collecting cylindrical electrostatic probes as flow field tracing instruments in low density slightly ionized flows
19 p3291 A69-35718

OGO 5 ion spectrometer for measuring oxygen, He and hydrogen ion concentration, noting functions as energetic particle analyzer and proton energy distribution measurement capability
19 p3314 A69-36679

Plasma ion and electron concentration perturbations in wake of body moving at high velocity in collisionless plasma under steady magnetic field
20 p3459 A69-37659

Fuel cells ionic concentration changes across porous matrix during operation, measuring voltage losses due to pH changes and liquid junction potentials
[ECS PAPER 335] 20 p3466 A69-38069

Fluorescence properties of nucleotides, polynucleotides and phosphorylated derivatives as function of temperature, pH and ionic strength
22 p3898 A69-41078

ION CURRENTS

Noiseproof ionization manometer with ion current dual modulation for ultrahigh vacuum measurement in magnetic field with extraneous charged particles interference
03 p0429 A69-13263

Plasma rotation in current layer of pulsed inductive accelerator
[AIAA PAPER 68-86] 04 p0635 A69-14702

Ion and electron contaminating currents removal in vacuum evaporating devices, using biased field plates
04 p0577 A69-14875

Cesium contact ion microthruster experiment on-board ATS 4, measuring emission currents and spacecraft potentials
[AIAA PAPER 69-297] 09 p1561 A69-21218

Side wall currents in unignited hardware type thermionic energy converters, discussing work function and heat choke
09 p1439 A69-21822

Predicting electrode geometry effect on saturation ion currents in diode exposed to ionizable vapor in equilibrium with liquid Ce
09 p1440 A69-21832

Tangential drag measurements at electrodes of arc in plasma accelerator, ion current partitioning at cathode and electrode damage
[AIAA PAPER 67-657] 13 p2312 A69-28219

Surface type airborne electrostatic probes in ambipolar diffusion flux, measuring ion saturation current, discussing electrode contamination and temperature and ablation tests
[AIAA PAPER 69-700] 17 p2974 A69-33443

Cesium contact ion microthruster experiment on-board ATS 4, measuring emission currents and spacecraft potentials
[AIAA PAPER 69-297] 24 p4365 A69-43238

ION CYCLOTRON RADIATION

Ion cyclotron drift loss cone instability for cases of steep particle density gradients, magnetic field gradients and finite plasma dimensions
02 p0288 A69-12169

Ion cyclotron wave generation in RF self sustained mode improved by installing grid structures in plasma near magnetic mirrors
03 p0474 A69-13113

Wave fields and coupling of RF power to ion cyclotron waves in finite length thermal collisional plasma column
03 p0474 A69-13114

Harmonic ion cyclotron waves shown to possess stop and passband characteristics, supporting quasi-static ion cyclotron mode theory
06 p0970 A69-17953

Electrons resonant heating in beam plasma discharge, discussing ion cyclotron wave excitation in hot electron plasma produced by electron beam
09 p1549 A69-22016

Plasma ions turbulent heating during electron-acoustic instability in field of circularly polarized electromagnetic wave at ion cyclotron frequency
10 p1728 A69-23137

Ion-molecule reaction kinetics in nitrogen-hydrogen mixtures using ion cyclotron resonance
12 p2131 A69-25985

Oscillations excitation between ion cyclotron and electron plasma frequency in He ion beam generated plasma
17 p3014 A69-33830

Acetonitrile ion-molecule chemistry using ion cyclotron resonance, discussing reaction of vibrationally excited methyl ions from electron impact
19 p3265 A69-36290

Propagation, damping, power coupling and plasma heating characteristics of harmonic ion cyclotron waves, noting temperature effects
21 p3777 A69-39455

ION DENSITY [CONCENTRATION]

NT IONOSPHERIC ION DENSITY

NT MAGNETOSPHERIC PROTON DENSITY

NT PROTON DENSITY [CONCENTRATION]

Exosphere diurnal and latitudinal variations in electron and proton content, ion composition, and electron, proton and positive O ion densities
01 p0063 A69-10422

Ion concentrations and temperature measurements by magnetic trap on Cosmos 5 between 1000-1200 km
02 p0306 A69-11656

Solar coronal ion abundance analyses from extreme UV emission lines
02 p0327 A69-12719

Electron and positive ion density measurements during nighttime auroral absorption event
03 p0421 A69-13327

Discontinuities in plasma situated in magnetic field, noting drift of quasi-neutral inhomogeneities of electron and ion density
04 p0634 A69-14431

Theoretical analysis of fixed stratification, taking into account nonlinear effects and variation in charged particle concentration along plasma column
04 p0636 A69-14783

Potential gradient, small ion density and space charge density measurements for atmosphere on Atlantic Ocean during 1965
04 p0594 A69-15159

Mars lower ionosphere ionization from spectroscopic and Mariner 4 occultation data, discussing various ionization sources
07 p1213 A69-18607

Nitrogen ion number density time dependence by mass spectrometric probing of decaying nitrogen plasmas, noting molecular ion production by colliding metastable nitrogen molecules
07 p1184 A69-19141

Ion number densities time dependence in pink afterglow of N measured with quadrupole mass spectrometer
08 p1308 A69-20292

Emissive probes for measuring plasma potentials over different ion density ranges on SERT spacecraft, detailing calibration and mechanical and electronic configurations
[AIAA PAPER 69-272] 09 p1492 A69-21217

Surface ion behavior on planar semiconductor devices determined by measuring effect of time, humidity, temperature, voltage and previous testing history
10 p1743 A69-23173

Two dimensional flow of unipolar medium in electrodynamic power generation channel, discussing stationary model, electric field and ion density distributions
10 p1638 A69-23486

Monograph on method and results of measurements of mobilities spectrum ion density and conductivity in upper troposphere and stratosphere
11 p1877 A69-24636

Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations
11 p1879 A69-25157

Free electron density upper limits in plasma attributed to negative ion formation, noting effect on

ionization equilibrium calculations for stellar atmospheres
11 p1928 A69-25255

Ion-acoustic wave experiments for disturbance travels in plasma sheath, obtaining ion number density
11 p1929 A69-25272

Nonlinear algebraic equation system describing populations of excited atoms of low pressure nonequilibrium cesium plasma, determining ionization coefficient and molecular ion concentration
11 p1934 A69-25567

Population densities, pumping rates, lifetimes, etc., of singly ionized krypton ion laser
12 p2109 A69-26638

NGC 4151 bright lines intensity, electron density, temperature and ions quantity evaluation from spectrograms with 140 A/mm dispersion
12 p2164 A69-27021

Ion concentrations and temperature measurements by magnetic trap on Cosmos 5 between 1000-1200 km
13 p2333 A69-28687

Time and altitude induced variations in daytime NO and molecular and atomic oxygen ions
14 p2435 A69-29050

Ionization mechanisms in ignited mode cesium thermionic converter, discussing positive ions production for electron space charge neutralization and ion density calculations
14 p2404 A69-29258

Three component fast neutral beam for hydrogen plasma ion density and electron temperature determination, improving accuracy and reliability
14 p2452 A69-29812

Electron and ion density distributions in propagating current sheet in Z pinch discharge in argon obtained by microwave reflection interferometer
16 p2816 A69-31639

Temperature gradients effect on ion flute mode in low beta plasma having density gradients in x direction, obtaining instability condition
16 p2819 A69-31689

Atmospheric ion concentration increment by electrostatic lens to facilitate electrical properties measurements of charged particles in submicroscopic range
17 p2971 A69-32928

Ion energy distribution function and density profile in strong implosion wave generated by theta pinch discharge, investigating compression wave in deuterium
17 p3013 A69-33821

Gas ionization relaxation times from ion density profiles in shock tubes at low Mach numbers, discussing influence of impurities on ionization process
18 p3116 A69-34451

Atmospheric aerosols influence on ion density profile in stratosphere obtained from numerical solution of equilibrium ionization equation
18 p3129 A69-34962

Ion density, electrical conductivity and weighted mean mobility deduced from Gardien capacitor I-V characteristics used in balloon sounding of stratosphere
18 p3130 A69-34970

Ion and electron fluxes and drag force dependence on electrostatic charge and velocity of interstellar dust particle
19 p3425 A69-36562

Ion density, electric field and electron temperature responses to gas density perturbation calculated for acoustic wave propagation in gas discharge using hydrodynamic equations
20 p3578 A69-38243

Negative ion concentrations in plasma by flash photodissociation, using Q switched laser for irradiation
21 p3778 A69-39574

Ionization formula linking nitrogen ion charge density ratio to plasma temperature
22 p3990 A69-40714

Mass spectrometric analysis of lunar material from soil vaporization products ion component by electron beam
22 p4034 A69-41107

Air electrical conductivity reduction in fog ascribed to small ions concentration, increase in droplets capture efficiency and particle concentration
24 p4347 A69-43509

ION DISTRIBUTION

Nighttime sporadic E layer occurrence due to ionization redistribution established, noting concurrent F region electron concentration decrease
03 p0423 A69-13536

Charge carrier concentration determination by double probe in plasma with Druyvesteyn distribution of incident electron flow
05 p0800 A69-15737

Dominant ionic species in cesium plasma through mass spectrometer analysis, measuring total ion and electron currents

09 p1544 A69-21335

Earth thermal plasmasphere contraction subsequent to solar flare obtained from ion mass spectrometers on OGO satellites

10 p1683 A69-23777

Ionospheric molecular ion concentration vertical profile analysis for verifying neutral gas temperature maxima in connection with two ion production maxima

10 p1688 A69-23930

Models for emission line region of 3C 273, considering ionization distributions for estimation of relative abundances

10 p1790 A69-24137

Nighttime distribution of nitrogen ion and lambda 5755 emission in ionosphere with incidence of aurora

12 p2066 A69-26110

Ionized gas height scale changes in polar ionosphere obtained, assuming Chapman type ionization distribution

14 p2436 A69-29052

Hydrogen and He ion distribution measurements, noting seasonal and local magnetic time variability

15 p2599 A69-31326

E region ionization redistribution by neutral winds, comparing calculated vertical drift velocities to observed electron density profiles

15 p2677 A69-31395

Ion and electron distributions in chemical nonequilibrium boundary layer flow over hypersonic reentry vehicle, discussing plasma sheath and boundary layer thickness relations

16 p2769 A69-31874

Ion, electron and neutral temperatures from ion composition distribution, assuming no change in vertical distribution within horizontal distance between upleg and downleg measurements

16 p2849 A69-31990

Relationship between sporadic E and 5577 A nightglow emission attributable to ionization redistribution in E region due to dynamic processes

16 p2788 A69-32782

Geomagnetic control of geographic distribution of F 2 layer midday ionization based on data from ionospheric vertical sounding stations

17 p2966 A69-33982

Ionization stratification and chemical abundances in planetary nebula NGC 7662, discussing density fluctuations effect on N II and O II lines

18 p3191 A69-34294

Franco-Soviet rocket probe launchings for measuring daytime/nighttime ions and neutrons

18 p3210 A69-35282

Steady state vertical distribution of small ions in ground layer assuming atmospheric dynamic and thermal sublayers, calculating air resistance and electric field potential

21 p3715 A69-38836

ION EMISSION

Spacecraft attitude ion sensor using charged thermal ions of earth atmosphere as reference, stressing reliability, economy and response

01 p0079 A69-10293

Spherical and cylindrical probes emitting electrons and ions in unbounded plasma, deriving I-V characteristics equations

02 p0247 A69-11569

Static beam deflection in beam foil spectroscopy for determining parent ionization stage of emitting ions

04 p0595 A69-14279

Emission continuum intensity of negative nitrogen ion in nitrogen and air plasmas

04 p0639 A69-15370

Ion formation and ion secondary emission during sputtering, discussing Saha-Langmuir equation, probability theory, simultaneous processes, mass spectroscopic analyses, etc

08 p1355 A69-20616

Cesium contact ion microthruster experiment on-board ATS 4, measuring emission currents and spacecraft potentials

09 p1561 A69-21218

Longitudinal inhomogeneities in plasma of Q machines caused by ion emission from hot plate at different radial positions

14 p2502 A69-29959

Emission continuum intensity of negative nitrogen ion in nitrogen and air plasmas

16 p2822 A69-32117

Ion production in K/diatom Br system by high energy K beam, obtaining total ionization cross section as function of energy

19 p3378 A69-36187

Ruby laser-ultrahigh vacuum device for studying electron and ion emissions and light absorption of materials, noting influence of adsorbed gas layers

20 p3553 A69-37406

Oxygen pressure effect on oxide layer composition on W surface by secondary ion-ion emission

21 p3746 A69-39071

Cesium contact ion microthruster experiment on-board ATS 4, measuring emission currents and spacecraft potentials

[AIAA PAPER 69-297] 24 p4365 A69-43238

Proton ejection as hydrogen ion clusters by low energy electron bombardment of solid hydrogen

24 p4389 A69-43747

ION ENGINES

NT CESIUM ENGINES

Mercury ion thrusters and facilities automatic controls durability testing, discussing vacuum chamber systems, unattended operation and control

[AIAA PAPER 68-576] 02 p0229 A69-12385

Alkali metal ion sources noting cesium ion engine development for space propulsion

[ECS PAPER 170B] 03 p0478 A69-13859

Telemetered data obtained by lantar 1 automatic ionospheric laboratory, detailing argon-ion plasma engine performance

05 p0830 A69-16056

High voltage mercury electron bombardment ion thruster power efficiency

[ECS PAPER 170D] 05 p0812 A69-16233

Multimission interplanetary probe using solar electric propulsion

06 p0984 A69-17593

Electric propulsion research in Japan, considering cesium ion thruster, plasma acceleration and thrust by electric explosion of fine wires

06 p0984 A69-17629

Electron bombardment mercury ion thruster plasma properties and performance, computing ion beam current, discharge losses and propellant utilization efficiency

[AIAA PAPER 69-256] 09 p1560 A69-21214

Cesium contact ion microthruster experiment on-board ATS 4, measuring emission currents and spacecraft potentials

[AIAA PAPER 69-297] 09 p1561 A69-21218

Space charge sheath electric thruster principles, construction and performance using laboratory test model

[AIAA PAPER 69-282] 09 p1563 A69-21235

Extraction and acceleration mechanism in RF ion motors, fixing plasma potential with extraction anode

[AIAA PAPER 69-284] 09 p1564 A69-21237

Digital computer simulation and analysis of control loops for ion thruster control

[AIAA PAPER 69-239] 09 p1564 A69-21240

RF ion thrusters using self sustaining electrodeless discharge

[AIAA PAPER 69-285] 09 p1565 A69-21247

West German activity in field of electrostatic propulsion, discussing ion thrusters, colloid thruster development and mission analysis

[AIAA PAPER 69-288] 09 p1565 A69-21248

Ion thrusters and various microthrusters/electron bombardment ion and pulsed plasma/ for proposed European missions

[AIAA PAPER 69-274] 09 p1565 A69-21250

30 cm diameter mercury bombardment low impulse thruster development for potential space applications, discussing performance and control

[AIAA PAPER 69-238] 09 p1566 A69-21256

Research and development program in annular slit colloid thruster technology, proving thruster feasibility by performance tests

[AIAA PAPER 69-287] 09 p1566 A69-21257

Ion accelerators design for Kaufman thrusters in terms of beam optics and grid lifetime, using digital computer and electrolytic tank analog

[AIAA PAPER 69-261] 09 p1567 A69-21261

Electrostatic electron bombardment ion thruster with magneto-electrostatically contained plasma

[AIAA PAPER 69-260] 09 p1567 A69-21262

Electrostatic thrusters using RF ion sources to optimize payload ratios, terminal velocities, propellants, life span and efficiencies

09 p1568 A69-21489

Electron bombardment thrusters for low specific impulse operation, discussing electrode structures fabrication by bonding alumina disk to metal electrode

[AIAA PAPER 69-301] 09 p1568 A69-21730

Thermionic space power reactor design, detailing Critical Experiment problems

09 p1441 A69-21835

Out-of-core thermionic reactor power increase by using central heat pipe in coaxial cavity

09 p1441 A69-21836

Stability analysis including delayed collector and structure coefficients, showing thermionic reactor instability with all negative reactivity coefficients

09 p1442 A69-21841

Liquid mercury cathode electron bombardment thrusters applicability to electric propulsion missions

[AIAA PAPER 69-302] 09 p1569 A69-21876

Kaufman thruster with predominant radial field, noting electron mobility across ion extraction screen and advantages of uniform plasma distribution

[AIAA PAPER 69-259] 09 p1569 A69-21877

Thrust vectoring system using accelerator displacement to reduce alignment errors in multiaperture electron bombardment ion engines

[AIAA PAPER 68-543] 09 p1570 A69-21985

Porous structures, using spherical tungsten powders, discussing metallurgy, sintering, temperature effects and performance characteristics in ion engines

10 p1710 A69-23166

Causes and magnitudes of thrust misalignment of Kaufman type electron bombardment ion thruster

[AIAA PAPER 69-303] 10 p1753 A69-23362

Ionic propulsion application to geostationary satellite attitude correction

10 p1753 A69-23841

Nuclear type cylindrical thermionic converter with porous adsorbent structure and liquid cesium tank

14 p2397 A69-29174

Fast and thermal thermionic reactor systems characteristics including fissile material, components mass, power output and flattening and design features

14 p2480 A69-29182

Thermionic reactor systems, discussing hybrid nuclear rocket/nuclear electric Mars mission, design features, performance and electric power characteristics

14 p2480 A69-29183

Thermionic reactor design for electric propulsion with emphasis on reactor power and fuel energy and fast neutron flux

14 p2509 A69-29184

Thermionic converter with external fuel surrounding inner emitter annulus for use in in-core reactors

14 p2480 A69-29185

Out-of-core thermionic reactor concept for space power supply using lithium heat pipes in crossed layers

14 p2480 A69-29187

In-core thermionic reactor space power plants stability and control criteria, comparing linear and nonlinear models

14 p2481 A69-29189

Deposition and interdiffusion of W layers on Mo emitter of in-core thermionic reactor, investigating microstructure of transition zone

14 p2462 A69-29210

Thermionic reactors U.S.S.R. space and other programs, considering power output, heat exchange and losses, neutron physics and design parameters

14 p2404 A69-29277

Nuclear energy systems, discussing U.S. reactor concepts with emphasis on thermionic systems and space applications

14 p2404 A69-29278

Charge transfer cross section between mercury ion and Cs assessed, considering ion engine positive ion beam neutralization

16 p2835 A69-31895

Electric propulsion, discussing plasma research, MPD thruster and arcs, ion thruster research and spacecraft integration

[AIAA PAPER 69-497] 16 p2838 A69-32655

Discharge chamber plasma processes in electron bombardment ion thrusters, considering factors affecting thruster performance

[AIAA PAPER 69-494] 16 p2845 A69-32735

RF ion thrusters using electrodeless self sustaining mercury discharge, describing basic theory, component design, performance optimization and test results

17 p3018 A69-33326

Hall ion thruster prime propulsion system, considering low and high voltage mode in plasma source I-V characteristics

17 p3019 A69-33338

Development and applications of ion propulsion covering electrostatic acceleration of particles, Cs contact and electron bombardment ion thrusters, space missions, etc

17 p3020 A69-33354

Kaufman ion thruster ESKA 18 operation principles and design compared to RIT 10 and SERT 2, discussing discharge and focusing characteristics and propulsion parameters

17 p3022 A69-33605

Electric propulsion systems for manned planetary exploration flights, discussing arc jet, ion and plasma engines 18 p3185 A69-35108

Telemetered data obtained by Iantar 1 automatic ionospheric laboratory, detailing argon-ion plasma engine performance 20 p3618 A69-37966

Laboratory prototype of RF ion engines for space test, discussing components optimization 22 p3998 A69-39904

HF ion engine RIT 10, Kaufman ion engine ESKA, Hall effect ion engine HIT and MPD engine compared for state of development [DGLR-69-021] 23 p4202 A69-41928

Optimization of RF ion thruster cluster engines for ascending trajectory, discussing unfolding mechanism of solar cell panels [DGLR-69-022] 23 p4203 A69-41933

Kaufman ionic thruster /ESKA 18/ principles, design, electrical circuit, working and experimental characteristics, compared with RIT 10 and SERT II 23 p4203 A69-41934

Thermionic reactor concepts and development in U.S., comparing strengths and weaknesses 23 p4186 A69-42245

Thermionic reactors for auxiliary space power and electric propulsion applications, discussing converter development regarding nuclear fuel elements 23 p4186 A69-42246

West German research in thermionic diodes and reactors, describing terrestrial version of thermal in-core thermionic reactor project 23 p4188 A69-42258

Power conditioner for use with SERT II mercury ion thruster, describing electrical and mechanical design and operation 23 p4075 A69-42301

Cesium contact ion microthruster experiment on-board ATS 4, measuring emission currents and spacecraft potentials [AIAA PAPER 69-297] 24 p4365 A69-43238

ION EXCHANGE MEMBRANE ELECTROLYTES

ABEPAC fuel cell with ion exchange membrane electrolyte impregnated with sulfuric acid solution, describing electrodes and bipolar collectors 08 p1259 A69-21040

Ion exchange fuel cells for emitter-receiver on atmospheric constant ceiling balloon, stressing pressure effect on operation and fuel storage 08 p1260 A69-21042

Manned spacecraft fuel cell selection and design, discussing Gemini ion exchange membrane and Apollo Bacon cell systems 16 p2737 A69-32406

Power source with electrolyte consisting of ion exchange membrane in aqueous solution of sulfuric acid 16 p2738 A69-32411

Fuel cells with solid membranes with ion conductivity, discussing proton electrolyte 16 p2740 A69-32424

ION EXCHANGE RESINS

Activated carbons and ion exchange resins bactericidal action as function of silver coating techniques 13 p2216 A69-28621

Sequence preparation of protected peptide polymer bond with anion exchange resin using solid phase transesterification 24 p4279 A69-42713

Transesterification of amino acid peptide alkyl and fatty acid esters by treatment with anion-exchange resin 24 p4280 A69-43513

ION EXCHANGING

Electron temperature and concentration and solar UV absorption data from sounding rockets, estimating ion exchange rate, recombination coefficient and heat flux 03 p0422 A69-13508

X ray study of scandium containing ferrites, establishing lattice stresses due to ion replacement in octahedral interstices 03 p0491 A69-14053

Purines, pyrimidines and nucleosides absorption by Li-, Na-, Mg- and Ca-montmorillonite in aqueous solutions over range pH 2-12 by cation exchange 05 p0716 A69-15973

Absorption of nucleosides, purine and pyrimidine derivatives by Co-, Cu- and Ni-montmorillonite taking place by cation exchange process 05 p0716 A69-15974

Effective cross section of resonant cesium ions charge exchange determined by retarding field method, considering dependence on ion velocity 06 p0959 A69-16908

Potassium ion resonant charge exchange, determining relation between effective cross section and ion velocity, using retarding field method 06 p0959 A69-16909

Hydrogen-oxygen ion exchange membrane fuel cells for sounding balloons, discussing flight duration and power requirements, gas supply pressure effects, etc 16 p2738 A69-32413

Free lysine and dinitrophenyl /DNP/ derivatives determined quantitatively by ion exchange chromatography 17 p2917 A69-33651

X ray study of scandium containing ferrites, establishing lattice stresses due to ion replacement in octahedral interstices 18 p3182 A69-35046

ION EXTRACTION

Wall space charge layer effect on ion extraction from weakly ionized plasma, using quadrupole mass spectrometer 07 p1188 A69-18276

Kaufman thruster performance dependence on transmission of ion extraction optics and magnetic field shape [AIAA PAPER 69-257] 09 p1569 A69-21878

Shock ionization by ion impact against triatomic H molecules gas target, showing positive ion production dependence on extraction voltage, collision chamber pressure, etc 19 p3378 A69-36188

Electrodialysis method for depleting positive Na, K, Ca and Mg ions from Anabaena flos-aquae A-37, noting algae survival rate 23 p4079 A69-41387

ION GAGES

U IONIZATION GAGES

ION-GAS INTERACTIONS

U GAS-ION INTERACTIONS

ION IMPACT

Spectroscopy of fast atoms resulting from fast ion impact with gas targets and electron capture into excited state 03 p0471 A69-13162

Impact ionization and tunneling effect during electroluminescence of zinc sulfides 06 p0980 A69-17261

Plasma spectral line shifting and broadening under ion and electron impact 07 p1187 A69-19720

Electron emission of probe caused by impinging ions and photons, discussing model for low plasma densities 08 p1361 A69-20232

Si planar IMPATT diodes anomalous mode continuous wave UHF oscillations, noting DC density and DC/RF power conversion efficiency 17 p2934 A69-32846

Shock ionization by ion impact against triatomic H molecules gas target, showing positive ion production dependence on extraction voltage, collision chamber pressure, etc 19 p3378 A69-36188

Charge exchange cross sections and electron losses in hydrogen ion beam impacting on water vapor molecules 19 p3378 A69-36190

Townsend discharge formation time determination, taking into account impact ionization in positive ion cloud moving from anode to cathode 19 p3381 A69-36603

Spectral line broadening and shift due to electron and ion shocks in impact theory 20 p3580 A69-37828

ION INJECTION

Nonmagnetic plasma deceleration in quasi-stationary magnetic field with coaxial injector and barrier field 03 p0481 A69-14212

MOSFET fabrication by ion implantation using gate metal as mask, noting source and drain alignment with gate and low feedback capacitance 05 p0734 A69-16563

Properties of ion implanted GaAs diodes fabricated at room temperature, analyzing light emission, resistance and breakdown voltage [ECS PAPER 172] 08 p1284 A69-20369

Fast Ba ion filament cloud injection into ionosphere using explosive shaped charge technique, noting application to ionospheric electric field measurement 09 p1539 A69-21752

Hot electron plasma formation by injecting megaelectron volt ion beams followed by Lorentz trapping, noting advantages of DC operation 15 p2661 A69-30929

ION IRRADIATION

NT DEUTERON IRRADIATION
NT PROTON IRRADIATION

Numerical solution method for equation of electric field affected by permanent flux of ionic currents 01 p0128 A69-10364

Inactivation by heavy ions of esterase activity of dried trypsin as function of temperature during irradiation 03 p0372 A69-13488

Free radicals produced in ribonuclease, lysozyme and trypsin during exposure in vacuum and various temperatures to electron and heavy ion irradiation 03 p0372 A69-13484

Genetic effects in yeast induced by heavy ion radiation, studying lethality, mitotic segregation, allelic recombination and reverse mutation 03 p0373 A69-13491

Mammalian cell survival, chromosome abnormalities and recovery from heavy ion and X ray irradiation 03 p0373 A69-13492

Angular distribution of particles sputtered from GaAs and GaP single crystals, bombarding faces with Ar ions at low energy 04 p0640 A69-14452

P-n junctions and device structures formed by ion implantation, using Hall effect and channeling techniques to evaluate implanted layer nature 06 p0974 A69-16862

Kinetics of homogeneous and heterogeneous growth of centers of new phase of semiconductor during ion bombardment as function of radiation dose 06 p0978 A69-16985

Metal atom production by bombarding metal with positive ions from microwave discharge, obtaining isolation in inert gas matrix and UV spectra 06 p0957 A69-17113

Gaussian summation for ion implantation profile control in semiconductors, describing computer program selecting optimum energies to fit predetermined profiles 11 p1857 A69-24546

Excited levels in Li I produced by Li 7 ion passage through carbon foil, measuring excitation mean lives by beam foil technique 13 p2301 A69-27454

Radiation damage in yeast cells irradiated by high energy C 12 ions evaluated from survival rate study 14 p2406 A69-28915

Activation energy of annealing of lattice defects in Au films deposited under irradiation with Au ions 18 p3182 A69-34349

Plasma electron beam for welding, deriving beam current from secondary emission by ion bombardment, discussing gas pressure, equipment and applications 19 p3320 A69-35555

ION MICROSCOPES

Field ion microscope study of imaging solute atoms of dilute Pt-based W, Pd, Co, Ni and Au alloys 01 p0092 A69-10055

Metals study using field ion microscope for detecting dislocations, crystal boundaries and growth surfaces and surface diffusion energies 06 p0943 A69-17376

Grain boundaries structure in tungsten wire using auto ion microscope, showing misorientation corresponds to high density coincidence site lattices 08 p1329 A69-19943

ION MOTION

HF plasma ionic composition dependence on discharge conditions and ions translational energy 01 p0129 A69-10682

Ion-ion velocity space instability due to difference between ion temperatures perpendicular and parallel to magnetic field 03 p0475 A69-13154

Gas segregation in positive column of DC discharge due to axial ion motion analyzed using conservation equation 08 p1361 A69-20145

Diffusion coefficient, velocity distribution function and velocity averages for gaseous ions moving in strong electric fields, considering ion-gas molecule charge transfer collisions 08 p1355 A69-20209

Magnetospheric gusts of streaming positive ions in equatorial plane detected by ATS 1 synchronous satellite 09 p1574 A69-21309

Linear ion accelerators noting particle motion, RF cavity design, RF power sources, injection and applications
09 p1553 A69-22697

Surface ion behavior on planar semiconductor devices determined by measuring effect of time, humidity, temperature, voltage and previous testing history
10 p1743 A69-23173

Early disturbances in active migration of potassium 42 ions in irradiated erythrocytes in rats, showing relation between influx and energy exchange in cells
10 p1647 A69-23966

Finite ion Larmor radius effect on gravitational instability of two superposed fluids in uniform rotation, analyzing interchange perturbations and vortex sheet
12 p2062 A69-26461

Vertical ionization drift in F region as function of electron density, ionization coefficient and recombination coefficient
12 p2070 A69-26584

Ion cloud ambipolar diffusion and motion dependence on initial configuration and close magnetic field alignment above 95 km, discussing observations of meteor trains
12 p2074 A69-26961

MHD generator analysis, formulating boundary value problem for ion diffusion and Fourier series solution for end effect of electrodes pair
13 p2208 A69-27613

Electron and ion mobility in multiple cusp magnetic fields related to Polytron experiment
14 p2499 A69-29852

Structural formula of slowly cooled Mg and Al-Mg microwave ferrites, noting ion mobility during cooling
15 p2670 A69-31184

Ion-neutral air motion in F region under time dependent electric and constant magnetic field effect, using partial differential equations
16 p2777 A69-32181

Pressure gradients and moving ions driven neutral-air winds in F region, using asymmetric pressure model
16 p2779 A69-32302

Kinesonde radio sounding system for three dimensional ground observations of E region microstructure and vertical motion of neutral air and ions
18 p3125 A69-34250

Electric field variations in vicinity of auroral forms from motions of Ba vapor clouds released from Nike-Tomahawk rockets
18 p3128 A69-34935

Townsend discharge formation time determination, taking into account impact ionization in positive ion cloud moving from anode to cathode
19 p3381 A69-36603

Wind velocity components calculation at F-sphere maximum level, taking into account electrodynamic drift of ionospheric plasma and ion motion
20 p3519 A69-36972

Kinetic equation describing dynamics of inhomogeneous cloud of fast electrons and ions trapped in earth magnetic field
20 p3520 A69-37029

Plasma microinstabilities due to ion and electron anisotropic velocity distributions, considering frequencies near harmonics of ion cyclotron frequency
24 p4355 A69-42686

ION OSCILLATION
U PLASMA OSCILLATIONS

ION PROBES

Positive ion beam probe for approximate static electric field distribution in low pressure RF discharges, analyzing deflection data for potential distributions
02 p0287 A69-11838

Expansion anisotropy in angular distribution of laser produced plasmas in terms of drifting and expanding sphere model, discussing particle velocities, currents and time integrated counts
05 p0804 A69-16460

D region ionizable constituent density /presumably nitric oxide/ measured, using blunt probe to detect changes in conductivity produced by Lyman alpha ionizing radiation
15 p2598 A69-31316

Multiple electrode probe characteristics in rarefied plasma flow created by ion source, noting electrode potential role
19 p3314 A69-36622

Molecular ion concentrations determined using flat probe collector trap on Cosmos 5 satellite at 200-300 km
20 p3519 A69-37021

Langmuir plate and spherical ion probe experiments aboard Explorer 31, measuring concentrations and temperatures of thermal electrons and ions
20 p3545 A69-37881

Spacecraft pitch and yaw angles measurement using environmental positive ion probes, discussing Gemini flight tests and attitude control systems
24 p4315 A69-43241

ION PRODUCTION RATES

Ion formation rate in F 2 layer in southern polar cap, noting effect of season, latitude and solar activity
02 p0238 A69-11679

Pulsed arc source using plasma jet to obtain intense hydrogen ion beam
03 p0412 A69-13842

Charge multiplication in crystals, analyzing ionization rate, avalanche breakdown in p-n junctions, pair production and impact of impurities
04 p0641 A69-14503

Charge transfer cross sections for slow ion production in nitrogen molecular ion beams incident on hydrogen and deuterium
05 p0796 A69-15914

Photoelectric absorption studies on molecular nitrogen indicate predissociation contributing to atomic nitrogen production in upper atmosphere
05 p0756 A69-16282

Ion current output vs gas component partial pressure determined to measure ion source efficiency employing electron impact ionization
06 p0960 A69-16919

Nitrogen ion number density time dependence by mass spectrometric probing of decaying nitrogen plasmas, noting molecular ion production by colliding metastable nitrogen molecules
07 p1184 A69-19141

Ion formation and ion secondary emission during sputtering, discussing Saha-Langmuir equation, probability theory, simultaneous processes, mass spectroscopic analyses, etc
08 p1355 A69-20616

Ionospheric molecular ion concentration vertical profile analysis for verifying neutral gas temperature maxima in connection with two ion production maxima
10 p1688 A69-23930

Oxygen and NO ions yields produced by dissociative attachment of electrons to nitrogen dioxide as function of electron energy, considering electron affinities lower limits
13 p2301 A69-27363

Ion formation rate in F 2 layer in southern polar cap noting effect of season, latitude and solar activity
13 p2257 A69-28710

Metastable ions formation and detection in double focusing mass spectrometer, calculating location of decomposition in electrostatic analyzer and doubly charged ions transition
15 p2561 A69-30021

Lyman alpha radiation ionization rate in lower ionosphere, noting various charged particle concentration parameters
15 p2605 A69-31438

Nocturnal D region conductivity enhancement relation to X radiation from Scorpius XR-1 and other sources, calculating ion production rate
17 p3024 A69-33378

Effective rate coefficients of ion-molecular processes, dissipative recombination and ion production in F 2 layer at midlatitudes
17 p2966 A69-33979

Shock ionization by ion impact against triatomic H molecules gas target, showing positive ion production dependence on extraction voltage, collision chamber pressure, etc
19 p3378 A69-36188

Ion production rates vertical distribution and temporal changes at midlatitudes during solar activity minimum and maximum above F 2 layer
20 p3525 A69-37656

Attachment coefficients for negative oxygen ion formation in low energy electron swarms over various voltage/pressure ratios
21 p3774 A69-39238

Low energy galactic cosmic ray spectrum determined from ionization rate per hydrogen atom, correlating peak intensity with stellar particle emission high energy portion
24 p4365 A69-42608

ION PROPULSION

Electromagnetic ion acceleration in steady electric and magnetic fields chosen to match fields of Alkali Plasma Hall Accelerator /ALPHA/
[AIAA PAPER 69-111] 06 p0985 A69-18175

MPD plasma acceleration in West Germany, discussing Hall acceleration, electrodeless plasma acceleration by electromagnetic waves and space charge neutralized Hall ion thruster
[AIAA PAPER 69-279] 09 p1564 A69-21238

Ion spacecraft propulsion systems, discussing components and characteristics of reaction type rocket engines and electrical thrust devices
11 p1944 A69-25593

Electric and chemical rocket propulsion systems
13 p2325 A69-28255

Ion propulsion applied to geostationary satellites attitude control, discussing thrust levels, cesium ionization, colloidal propulsion, etc
16 p2837 A69-32068

RF ion thrusters using electrodeless self sustaining mercury discharge, describing basic theory, component design, performance optimization and test results
17 p3018 A69-33326

Kaufman ion thruster ESKA 18 operation principles and design compared to RIT 10 and SERT 2, discussing discharge and focusing characteristics and propulsion parameters
17 p3022 A69-33605

Cs contact ion microthruster system design, fabrication and flight qualification, noting control logic/power conditioning unit and electronic packaging
[AIAA PAPER 68-552] 21 p3785 A69-39212

Asteroid exploration by solar photovoltaic powered ion propelled probe, discussing spacecraft design, mission and 1975 Mariner utilization
[AAS PAPER 69-322] 24 p4381 A69-42868

ION PUMPS

Ultrahigh vacuum electron microscope using differential sputter ion pumps to obtain low contamination environment
04 p0599 A69-15016

Differential ion pumping for vacuum deposition of thin films
06 p0907 A69-17709

Tritium contamination reduction in small ion accelerators for neutron production, discussing pumping problems and vacuum systems
12 p2059 A69-26499

MHD mercury flow in rotating torus with little friction investigated for Reynolds numbers, considering induction pump forces and magnetic field influences
14 p2500 A69-29907

ION RECOMBINATION

Alpha recombination coefficient of molecular helium ions measured in helium afterglow plasmas as function of electron density and gas temperature
02 p0283 A69-11834

Low density limit to three body ionic recombination coefficients in various gases
04 p0632 A69-14679

Combination rate constants for H-F-O reactions, discussing expressions and relative efficiencies with Argon as third body
04 p0646 A69-14743

Effective gradient method modification for analyzing three body ionic recombination compared with diffusion method
05 p0795 A69-15661

Atomic flux from Cs and K ion recombination on hot end plates of Q machine measured, noting contribution to total plasma end loss rate
08 p1358 A69-19810

Three body ionic recombination coefficient for moderate and high gas densities, taking into account variability in mean free path and trapping radii
09 p1542 A69-21624

Unidentified cometary spectra line emission possible interpretations, examining atomic hydrogen abundance in cometary atmosphere and ionic hydrogen recombination
15 p2685 A69-30523

Lower auroral ionosphere rocket measurements of electrons, positive ions and energy particles, deriving height variation of ion pair production and ion-ion recombination
16 p2778 A69-32187

Preferential ion recombination in gases under high pressure, noting no dependence of recombination on average energy
17 p2949 A69-32999

Effective rate coefficients of ion-molecular processes, dissipative recombination and ion production in F 2 layer at midlatitudes
17 p2966 A69-33979

Radiative recombination of atomic oxygen ions in nighttime F region UV radiation detected by polar-orbiting OGO 4 satellite
18 p3129 A69-34957

Dielectric recombination in plasma, considering role in populating highly excited levels
20 p3580 A69-38016

Ionic excited states statistical equilibrium populations calculated for various electron densities and temperatures including effects of dielectronic, radiative and three body recombinations
22 p3985 A69-40666

ION SCATTERING

Electron detachment cross sections for negative atomic and molecular O ions with incident energies between 3 and 100 ev
09 p1542 A69-21625

Exospheric temperature variations by Thomson scattering related to solar and geomagnetic activity, discussing seasonal effect on thermospheric variables
15 p2604 A69-31409

Alpha-scattering experiments by Surveyor missions, studying hypothesis regarding lunar origin of eucrites and howardites
20 p3597 A69-37341

Elastic differential Li ion scattering cross sections on helium, nitrogen and oxygen
24 p4354 A69-43817

ION SHEATHS

Space charge sheath electric thruster principles, construction and performance using laboratory test model [AIAA PAPER 69-282]
09 p1563 A69-21235

Dynamic growth of positive ion sheath on plane electrode in mercury plasma, measuring sheath thickness and current
12 p2134 A69-26099

ION SOURCES

NT DUOPLASMATRONS
NT PLASMATRONS

Electrode geometry for mass spectrometer ion source to measure electron ionization cross section of low vapor pressure materials
01 p0080 A69-10605

Ion formation rate in F 2 layer in southern polar cap, noting effect of season, latitude and solar activity
02 p0238 A69-11679

Positive Ar ion energy distribution for beam extracted from nonmagnetic hot cathode gas discharge ion source under various source conditions
03 p0427 A69-13102

High current electron bombardment ion source for production of low energy ion beams without metastable contamination
03 p0428 A69-13106

Alkali metal ion sources noting cesium ion engine development for space propulsion [ECS PAPER 170B]
03 p0478 A69-13859

Ion velocity distribution for high vacuum ion source, noting factors influencing dispersion
06 p0959 A69-16916

Ion current output vs gas component partial pressure determined to measure ion source efficiency employing electron impact ionization
06 p0960 A69-16919

Ion formation rate in F 2 layer in southern polar cap noting effect of season, latitude and solar activity
13 p2257 A69-28710

Semiautomatic recording device to determine gas discharge ion and electron sources operation modes optimum parameters
15 p2658 A69-30237

Plasma three electrode source ion-optical characteristics, noting beam angular divergence dependence on spacing between discharge cavity and intermediate electrode
15 p2658 A69-30240

Electron impact field ionization source for mass measurement of molecular ions, noting organic geochemistry applications
15 p2608 A69-30428

ION TEMPERATURE

Excitation heating energy pumping mechanism for explaining dynamic equilibrium in C rich arc plasmas with high ion temperature/electron temperature ratio
01 p0126 A69-10276

Spacecraft ionospheric probe for simultaneous measurement of electron temperature and density, plasma space potential, ion composition, etc
01 p0081 A69-10760

Neutral gas temperature variations effect on electron ion temperature height profile in tidally generated sporadic E layer with wind shear of gravity wave origin
01 p0073 A69-11176

Ion concentrations and temperature measurements by magnetic trap on Cosmos 5 between 1000-1200 km
02 p0306 A69-11656

Ion-ion velocity space instability due to difference between ion temperatures perpendicular and parallel to magnetic field
03 p0475 A69-13154

Electron, ion and neutral particle temperatures of upper atmosphere
04 p0592 A69-14975

Particles nonlinear motion in plasma in magnetic field with arbitrary electron velocity distribution, discussing wave discontinuity patterns
05 p0804 A69-16370

Ion temperature diurnal variations at 250-475 km obtained from Thomson scatter spectra
05 p0757 A69-16407

Ion composition and charged particle temperatures at 300-600 km from sounding rocket and topside sounder Alouette 2 measurements
07 p1124 A69-18839

Plasma mixed ion heating by small scale HF turbulent electron sound pulsations
09 p1548 A69-21673

Nonlinear longitudinal oscillations in nonisothermal electron plasma with Maxwellian distribution in velocity space and different temperatures of electrons and ions
09 p1550 A69-22025

Ionospheric measurements of electron density, electron and ion temperature profiles from strength of incoherent radio wave scattering
10 p1686 A69-23910

Electron-ion temperature relaxation near interface of two semiinfinite nonmagnetized different temperature plasmas brought into thermal contact
11 p1923 A69-24296

Ion and electron temperature and density measurement by Thomson scattering with low resolution monochromator for Salpeter parameter near unity
11 p1925 A69-24310

Reversible ion heating by atmospheric tides, noting radar Thomson scatter observations of E region ion temperature height profiles
11 p1879 A69-25159

Wave damping in plasma, developing Boltzmann analysis of electron mode dispersion relations involving momentum transfer and relaxations of electron-ion temperature and anisotropy
13 p2305 A69-27377

Global coverage of positive ion composition and temperature, and electron density and temperature measurements during AURORA mission of ESRO 1 satellite
13 p2253 A69-27753

Ion concentrations and temperature measurements by magnetic trap on Cosmos 5 between 1000-1200 km
13 p2333 A69-28687

Ionospheric electron and ion temperatures correlated with electron concentration profile as measured by rockets and satellites
14 p2510 A69-28942

Two fluid continuum theory of incoherent scattering extended to include unequal electron and ion temperatures, considering backscatter power dependency on collision frequencies
14 p2510 A69-28946

Electron and ion temperatures height variations in sporadic E layers, noting effects of neutral gas temperature changes
14 p2440 A69-29127

Plasma ion temperature measurement based on integral neutron yield, noting density determination
14 p2498 A69-29808

Turbulent diffusion and ion heating in plasmas in presence of current instability
15 p2662 A69-30959

Magnetic field lines curvature effect on plasma instabilities due to ion temperature gradient, noting frictional gravitation field simulation
16 p2816 A69-31636

Ion, electron and neutral temperatures from ion composition distribution, assuming no change in vertical distribution within horizontal distance between upleg and downleg measurements
16 p2849 A69-31990

Intensity and rotational temperature seasonal variations of hydroxyl emission at different latitudes in upper atmosphere
16 p2775 A69-32081

Ionization density, velocity and temperatures oscillations revealed by Thomson scatter observations of gravity waves in F regions
16 p2779 A69-32198

Ion energy distribution function and density profile in strong implosion wave generated by theta pinch

discharge, investigating compression wave in deuterium
17 p3013 A69-33821

Lower ionosphere electron concentration confirmed as function of electron and ion temperature by satellite and probe data
17 p2966 A69-33981

Solar wind temperature, using distribution function, for solar wind ions in anisotropic Maxwell distribution form
19 p3396 A69-36631

Rarefied nonmagnetic plasma in wake of body moving at higher than electron and ion thermal velocities
20 p3525 A69-37661

Ionospheric parameters of ion and electron density and temperature and ionic species compared by direct measurement probes on Explorer 31 satellite
20 p3531 A69-37882

Ionospheric electron and ion concentration and temperature by Langmuir plate and spherical ion probe on Explorer 31 and ionosonde on Alouette 2
20 p3531 A69-37883

Ionic composition determined by combining Alouette topside sounder electron density profiles with electron and ion temperatures measured by ground based Thomson scatter sounder
20 p3532 A69-37898

Homogeneous magnetoactive plasma longitudinal oscillations stability with fast monoenergetic ions addition, noting ion temperature increase stabilizing effect
22 p3990 A69-40789

Ion temperature measurement in rarefied multicomponent plasma by temperature relation to ion beam divergence rate, comparing results to pyrometric measurements
23 p4196 A69-41839

ION TRAPS (INSTRUMENTATION)

Ion concentrations and temperature measurements by magnetic trap on Cosmos 5 between 1000-1200 km
02 p0306 A69-11656

Deep trapping levels caused by ion implantation doping, discussing level effects on electrical characteristics of zinc implanted GaAs diodes
05 p0808 A69-16287

Rotating plasma behavior in magnetic mirror trap, using radial electric field
10 p1740 A69-23716

Ion concentrations and temperature measurements by magnetic trap on Cosmos 5 between 1000-1200 km
13 p2333 A69-28687

Electron trap behavior on charged spacecraft, obtaining expressions for current to aperture and internal retarding electrodes for all apertures and spacecraft potentials
16 p2849 A69-31976

Planar thermal ion and electron trap experiments on Explorer 31 satellite, measuring ion and electron density and temperature and ionic composition
20 p3544 A69-37878

Solar wind sample collection, describing experiment to determine ion flux capture efficiency for various metal foils
23 p4205 A69-41539

IONIC COLLISIONS

Spectrum and yield of emitted electrons resulting from passage of heavy ions through metal films
03 p0471 A69-13161

Low collision energy charge transfer and dissociative charge transfer between rare gas ions and molecular nitrogen, measuring nitrogen ion kinetic energy distributions
05 p0796 A69-15909

Ion-molecule collisions of Ar-Co and N-No pairs, discussing charge exchange reaction rates and spiraling nature
05 p0797 A69-16428

ELF radio waves reflection coefficients calculated from two layer ionospheric model, noting ion collision frequency effect in Schumann resonance frequency band
07 p1124 A69-18820

Electron collisional excitation cross section calculations for atoms and ions using modified Born approximation taking into account three physical effects
07 p1187 A69-19658

Electron-ion collisions during forbidden lines excitation in gaseous nebulae, using Hartree-Fock functions and variational principles
08 p1391 A69-20530

Charge exchange collisions in ground state and ionic hydrogen incident on cesium vapor, measuring beam components after passage through target
08 p1356 A69-20737

Vibrational excitation in He, H and N ion- molecule collisions on nitrogen first negative system, studying relative band intensities
08 p1356 A69-20739

Electron detachment cross sections for negative atomic and molecular O ions with incident energies between 3 and 100 ev
09 p1542 A69-21625

Quantum mechanical description of ionizing reactions of highly charged positive ions in solar corona, obtaining approximate sum and selection rules
09 p1596 A69-22054

Ionization instability in low temperature magnetized plasma, analyzing electron concentration perturbation caused by Joule heating during electron-ion collisions
10 p1741 A69-23962

Crossed beam apparatus with mass selected variable energy primary beam for study of angular and velocity spectra of ion-molecule reactions
12 p2092 A69-26477

Slow charged products of charge exchange collisions by ions in molecular gases, comparing kinetic energies during various reactions
13 p2301 A69-27455

Charge transfer and vibrational excitations in hydrogen molecular ion-hydrogen gas collisions
13 p2302 A69-28196

Ion drag effects on acoustic gravity waves propagation in isothermal F region, discussing indicated wave damping
14 p2434 A69-28944

Conductivity tensor of collisional plasma in magnetic field, basing method on iterative procedure
14 p2503 A69-29999

Electrical conductivity tensor of many component collisional relativistic plasma in magnetic field and near equilibrium, expressing collisional part as momentum integral
14 p2503 A69-30000

Mode-mode coupling calculation for finite amplitude collisional drift waves demonstrating inherently nonlinear phenomena
15 p2660 A69-30916

Magnetic field lines curvature effect on plasma instabilities due to ion temperature gradient, noting frictional gravitation field simulation
16 p2816 A69-31636

Spatial ion wave echoes emphasizing echo line shape analysis and effects of ion-neutral and ion-ion collisions
16 p2818 A69-31676

Electrostatic probes in nonequilibrium collision dominated ionized gas flow ballistic ranges
19 p3291 A69-35716

Ion cyclotron double resonance technique to identify collision-induced ion fragmentation pathways illustrated with p-chloroethylbenzene
19 p3265 A69-36292

Parameters of DC discharge between concentric cylinders calculated for plasma probes by pressure theory, noting ion neutral collisions and magnetic field effects
21 p3776 A69-38712

Collision processes in gaseous nitrogen leading to production of positive triatomic, diatomic and monatomic nitrogen ions
22 p3986 A69-40722

Recombination and ionization coefficients for quasi-steady state homogenous H and hydrogenic ion plasmas based on collisional-radiative model
22 p3988 A69-41153

Atoms and ions collision strengths and photoionization cross sections for nitrogen, oxygen and neon fitted to interpolation formulas for temperature and frequency effects
22 p3988 A69-41244

Computer made movies and time history plots for ion-dipole collisions involving polar molecules /CO, HCL and acetonitrile/
24 p4352 A69-43124

ION CONDUCTIVITY
U ION CURRENTS

ION CRYSTALS
Multiphonon orbit-lattice relaxation of excited states of rare earth ions in crystals, measuring fluorescence lifetimes, quantum efficiencies and transition rates
01 p0134 A69-10011

Proton energy distributions for passage through NaCl, KCl, KBr, Si and Ge single crystals at various angles relative to /100/ and /110/ crystallographic planes
01 p0140 A69-11109

Raman effect in potassium dichromate single crystal, discussing symmetrical and antisymmetrical internal vibrations of free ions
12 p2105 A69-26285

Ba titanate modifiers, classifying cations replacing Ti and Ba ions
22 p3996 A69-41161

IR lattice spectra of rare earth Al, Ga and Fe garnets, discussing oxygen anion, translational rare earth cation and crystal lattice external motions
24 p4360 A69-42974

IONIC DIFFUSION
Plasma wave conversion into electromagnetic waves in strong magnetic field, studying nonlinear coalescence and scattering on thermal and epithermal ions
11 p1922 A69-24245

Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations
11 p1879 A69-25157

Diffusion of ion-electron pairs produced by photoionization upstream of strong shock waves to shock tube walls based on particle flux and Poisson equations
11 p1866 A69-25275

Ionic diffusion in topside ionosphere analyzed using multiple gas mixture diffusion formula, noting Coulomb ionic collision role
14 p2441 A69-29381

Applicability and limitations of diffusive equilibrium in topside ionosphere, noting plasma density distribution along magnetic field line
20 p3531 A69-37887

Drift velocity and lateral diffusion of positive hydronium, hydrogen and K ions in hydrogen with zero field mobilities
20 p3580 A69-38026

Cerebral and retinal capillary permeability to ions in rats analyzed by electron microscope using Prussian blue reaction
23 p4081 A69-41433

IONIC MOBILITY
Oxygen ions motion in oxygen, measuring drift velocities in glow discharge
05 p0795 A69-15662

Charge and degree of ionization of nickel alloyed with molybdenum analyzed by electrolytic ion migration method
07 p1159 A69-18535

Magnetoactive plasma containing fast monoenergetic ions noting stability at drift frequencies and in terms of Alfvén wave buildup
09 p1546 A69-21566

Cs and K ions drift velocity calculations in vapors of own atoms under various electric field strengths effect
11 p1922 A69-24226

Monograph on method and results of measurements of mobilities spectrum ion density and conductivity in upper troposphere and stratosphere
11 p1877 A69-24636

Drift velocity and longitudinal and transverse diffusion coefficient for low energy N ions in N gas in mass spectrometer at room temperature
13 p2302 A69-27458

Maximum likelihood methods applied to device performing ion swarm experiments, measuring positive ion mobility in hydrogen
16 p2788 A69-31670

IONIC PROPELLANTS
U ION ENGINES

IONIC REACTIONS
Enhanced 6300 angstrom emission from F region auroral latitudes in terms of reaction between oxygen ions and atoms
01 p0062 A69-10137

Ion reactions with neutral molecules, discussing analogies with conventional chemical systems
01 p0124 A69-10859

Metal ionic reactions with weak chemical bond breaking and three body reactions forming molecular ions without bond breaking, discussing sporadic E deionization
01 p0071 A69-11168

Carbon monoxide ion dynamics in envelopes of comets exhibiting fountain behavior, discussing electron-collisional ionization within envelopes as main plasma production mechanism
02 p0310 A69-11423

Crossed beam studies of ion-molecule reaction mechanisms, crossing approximately monoenergetic ion beam with thermal molecular beam
03 p0382 A69-13460

Negative ion-molecule reactions in nitrous oxide using mass spectrometer, noting negative ion concentration pressure dependence
06 p0960 A69-17106

Reaction rates coefficients of oxygen ions with molecular oxygen and nitrogen in nighttime F region over Moscow based on loss coefficient estimate
06 p0919 A69-17724

Two body rate coefficients for charge transfer reactions of nitrogen, oxygen and NO positive ions to Na atoms measured using flowing afterglow system
07 p1185 A69-19303

Ion-molecule reactions constants studied directly in ionosphere, using air injection from geophysical probe and airborne RF mass spectrometer
08 p1311 A69-21159

Ionic and biradical mechanisms in thermal and photo cis-trans isomerizations elucidated by planar and twisted configurations of polyenes
13 p2216 A69-27618

Vapor phase reaction sequence to explain water cluster ions in D region
14 p2434 A69-28940

Escherichia coli B/r cells plasmolyzed in sucrose observed under phase contrast, noting plasmolysis reduction in ions presence
19 p3257 A69-35973

Ion structure of keto and enol and McLafferty rearrangements determined by ion cyclotron resonance spectroscopy
19 p3265 A69-36288

Acetonitrile ion-molecule chemistry using ion cyclotron resonance, discussing reaction of vibrationally excited methyl ions from electron impact
19 p3265 A69-36290

Reactions determining ion composition in E region, discussing neutral composition variations from day to night and during solar activity cycles
20 p3520 A69-37031

Absorption and fluorescent spectra, relaxation times and quantum efficiencies measured for glasses doped with trivalent erbium, reviewing spectroscopic parameters involved with laser effect
22 p3962 A69-40476

Formation mechanism of positive ethyl ion and hydrogen molecule during interaction between positive methyl ion and methane molecule
24 p4280 A69-43814

IONIC WAVES
Asymptotic method for analyzing small long wave perturbations in plasma, showing instability with respect to perturbations propagating at angles to ion-acoustic wave
01 p0131 A69-10788

Ion acoustic wave dispersion in highly ionized Ar plasma in longitudinal magnetic field, noting effects of several phenomena
01 p0133 A69-11216

Plasma ion oscillation suppression by intensified electron plasma oscillations
02 p0287 A69-11934

Standing ion-acoustic wave excitation in weakly ionized plasma, noting isothermal compression of electron gas
02 p0292 A69-12555

Electron fluid compression coefficient from simultaneous measurement and correlation of absolute magnitudes of ion acoustic wave potential and accompanying plasma density perturbation
03 p0475 A69-13148

Decay stability of large amplitude neutral wave into two ion acoustic waves in weakly ionized plasma
03 p0475 A69-13158

Electron plasma oscillations diffusion due to scattering by large amplitude ion wave background, noting electron wave spectrum evolution
03 p0483 A69-14256

Two fluid MHD equations in form of nonlinear ion waves with magnetic vector
04 p0662 A69-15244

Similarity/law for ionization waves noting relations for frequency, wavelengths, amplification, propagation velocities and phase shifts
05 p0799 A69-15633

Equations describing chemical kinetics and conservation law derived for ionization relaxation processes behind shock wave front in air
05 p0746 A69-15891

Longitudinal acoustic waves propagation in partially ionized gas in external electric field, taking into account ionic collisions with electrons and neutral particles
06 p0963 A69-17079

Ion-acoustic wave excitation in plasma layer affected by incident p-polarized magnetic wave, deriving expressions for reflection, transmission and energy absorption coefficients
08 p1370 A69-21025

Plasma oscillation intensities at combination frequencies under assumption of plasma wave and ion acoustic wave propagating along z axis
09 p1550 A69-22024

Asymptotic method for analyzing small long wave perturbations in plasma, showing instability with respect to perturbations propagating at angles to ion-acoustic wave
10 p1653 A69-23107

Combination backscattering on ionic sound waves assumed responsible for unexpected features of radio signals reflected from sun
10 p1776 A69-23219

Ion-acoustic wave experiments for disturbance travel in plasma sheath, obtaining ion number density
11 p1929 A69-25272

Unstable ion sound wave propagation across magnetic field in collisionless shock waves, noting drift instability
11 p1930 A69-25273

Electrical DC conductivity of turbulent plasma decreased in presence of ion waves
13 p2305 A69-27302

Moving striations relations to ion acoustic waves in DC discharge in neon at various pressures, discharge currents and measurement excitation modes
14 p2494 A69-29695

Standing ion-acoustic wave excitation in weakly ionized plasma, noting isothermal compression of electron gas
15 p2658 A69-30252

Steady oscillations of active nonlinear system of nonisothermal plasma and charged particle flux, noting steady ion-acoustic waves
15 p2662 A69-30947

Spatial ion wave echoes emphasizing echo line shape analysis and effects of ion-neutral and ion-ion collisions
16 p2818 A69-31676

Nonlinear mixing of Ar plasma ion wave and externally applied electromagnetic wave
16 p2820 A69-31769

Solar corona heating ascribed to Landau damping of ionacoustic waves generated in motion of photospheric granules
17 p3030 A69-33060

Signal wave scattering and transmission by ionized medium disturbed by high power pumping wave, studying wave interactions with Born approximation for bounded medium
17 p2928 A69-33871

VLF wave propagation phase velocity prediction for airborne Omega computer, using scatter model based on abnormal ionosphere
17 p3002 A69-34077

Atmospheric whistlers and ion acoustic waves interaction in nonisothermal plasma, determining damping frequencies, decrements and wave polarization
18 p3180 A69-35024

Waves in auroral ionosphere due to particle precipitation, indicating ionospheric plasma instabilities
18 p3130 A69-35187

Asymptotic method for analyzing small long wave perturbations in plasma, showing instability with respect to perturbations propagating at angles to ion-acoustic wave
20 p3582 A69-38005

Parametric excitation theory involving Langmuir and ion-acoustic waves for homogeneous plasma slab with specular particle reflection at slab walls
20 p3582 A69-38245

Collisionless damping of large amplitude ion acoustic waves excited externally in thermally ionized Cs plasma
22 p3991 A69-41008

Acoustic wave propagation in plasma, analyzing ionic and electron sound caused by oscillation and relaxation processes using Landau and Vlasov kinetic equations
23 p4196 A69-41726

Tubular light beam waveguide properties, studying changes related to heating and ionization of medium
02 p0258 A69-12644

Similarity law for ionization waves noting relations for frequency, wavelengths, amplification, propagation velocities and phase shifts
05 p0799 A69-15633

Gas velocity variations in ionizing shock wave propagating along magnetic field applied to conducting piston motion
05 p0801 A69-15787

Large signal model for analysis of RF output and efficiency of IMPATT diode oscillator, noting frequency tuning
05 p0733 A69-16555

Atomic excitation and ionization involving inner shell electrons during collisions between atoms and ions, examining photoabsorption by inner shell electrons
07 p1187 A69-19659

Atomic collision theory, discussing cross section calculations by Gryzinski classical method, variational methods and Faddeev equations for three particles
07 p1187 A69-19661

Electron collision excitation of positive ions, calculating collision cross sections for transitions between levels of P term
07 p1187 A69-19714

Quantum mechanical description of ionizing reactions of highly charged positive ions in solar corona, obtaining approximate sum and selection rules
09 p1596 A69-22054

O, Ne, Si and Fe ionization equilibria in low density plasma, including dielectronic recombination and autoionization processes in calculations
09 p1543 A69-22404

Plasma ionization instability linear growth problem analyzed in bounded region
10 p1735 A69-23461

Radar and photographic studies of meteors from Leonid and Perseid showers, presenting velocities, luminescence and ionization
10 p1783 A69-23895

Ionization equilibrium for ions of solar abundant elements between C and Ni calculated as function of electron temperature
11 p1928 A69-25262

Current-voltage characteristics and ionization equilibrium of low voltage arc plasma in narrow gap of thermionic converter at high current density
11 p1933 A69-25554

Ionization instability in plasma enclosed by two infinitely segmented and ideally emitting electrode walls and two insulator walls
12 p2134 A69-26095

Electromagnetic wave phase characteristics after free space passage through statistical medium with wave disturbance producing density and ionization fluctuations
14 p2435 A69-29049

Ionization and recombination in low temperature plasmas, noting fast electron distribution function deviation from Maxwellian form and calculation for Cs plasma
15 p2658 A69-30256

Unsteady nonadiabatic shock waves in stellar gas dynamics, analyzing energy losses due to ionization at shock fronts by extended Chiznell-Wisem method
15 p2682 A69-30508

Fuel cell oxygen electrode problems, noting oxygen ionization reaction and disk electrodes role
16 p2739 A69-32416

Gas velocity variations in ionizing shock wave propagating along magnetic field applied to conducting piston motion
18 p3181 A69-35038

Forbidden lines in solar corona, discussing ionization equilibrium and excitation of levels in highly ionized atoms
19 p3422 A69-36216

Shock wave interaction and bow shock wave establishment near sphere in presence of ionization relaxation, using time resolved schlieren photography
19 p3450 A69-36361

Shock wave effect on ionization of detonation waves in propane-O mixtures producing stable high velocity plasma, measured by double probe method
21 p3853 A69-39745

IONIZATION CHAMBERS

NT BUBBLE CHAMBERS
NT CLOUD CHAMBERS
NT GEIGER COUNTERS
NT PROPORTIONAL COUNTERS
NT SPARK CHAMBERS

Nuclear active cosmic ray component particle energy spectrum and nuclear cascade avalanches curves, using ionization calorimeter with Pb absorber
13 p2303 A69-28399

High energy mu-mesons component of atmospheric cosmic ray showers by particle impact penetration using multiple underground ionization chambers
13 p2332 A69-28409

Electron and proton components contribution to reverse current production after particle shower through upper Cu wall of ionization chamber with lower Pb wall
13 p2304 A69-28417

IONIZATION COEFFICIENTS

Avalanche multiplication in abrupt silicon p-n junctions analyzed using ionization coefficient measurements for holes and electrons
01 p0135 A69-10038

Initial ionization rates and collision cross sections in shock heated argon in low pressure shock tube, using double electrostatic probes
01 p0132 A69-11206

Drift and diffusion of electron pulse advancing through gas, providing physical basis for Townsend ionization coefficient
04 p0633 A69-15443

Cloud chamber for measuring specific ionization in relativistic region by muons in gases, using drop counting method
06 p0925 A69-17303

Ionization index, electron formation and effective recombination coefficient in E 2 layer, noting solar activity effect
06 p0920 A69-17725

Two fluid approximation of one dimensional steady state flow of inviscid plasma with thermal gradients, considering ionization and recombination processes
07 p1189 A69-18691

Collisional excitation and ionization rates comparison in statistical equilibrium model atmosphere calculations
08 p1385 A69-20065

Ionization and attachment coefficients in oxygen at low pressures, noting Paschen curves near minimum sparking potential and secondary ionization coefficient
08 p1354 A69-20099

Rational approximation for coefficients used in calculating hydrogenic photoionization Gaunt factors
08 p1354 A69-20153

Nonlinear algebraic equation system describing populations of excited atoms of low pressure nonequilibrium cesium plasma, determining ionization coefficient and molecular ion concentration
11 p1934 A69-25567

Prebreakdown currents measurement in H and N for deducing ionization coefficients via Townsend and Lucas equations respectively, noting validity by digital computer technique
16 p2815 A69-32574

Effective rate coefficients of ion-molecular processes, dissipative recombination and ion production in F 2 layer at midlatitudes
17 p2966 A69-33979

Recombination and ionization coefficients for quasi-steady state homogeneous H and hydrogenic ion plasmas based on collisional-radiative model
22 p3988 A69-41153

Collisional radiative recombination and ionization coefficients for weakly ionized H plasmas using rate equations
22 p3988 A69-41154

IONIZATION COUNTERS

U RADIATION COUNTERS

IONIZATION CROSS SECTIONS

Ionization cross sections of excited states of hydrogen atoms and hydrogenoids calculated by Monte Carlo method
01 p0122 A69-10040

Electron impact ionization cross section in cesium vapor measured with Tate-Smith apparatus
01 p0137 A69-10285

Electrode geometry for mass spectrometer ion source to measure electron ionization cross section of low vapor pressure materials
01 p0080 A69-10605

Electron impact ionization cross sections and rate coefficients from ground state given for free atoms and ions from hydrogen to calcium
01 p0125 A69-10992

Multiphoton ionization cross section of atom via perturbed Green function, considering light wave electromagnetic field perturbing effects on atomic levels
02 p0283 A69-11539

Multiphoton ionization of molecular hydrogen and rare gases using Q switched Nd laser apparatus 02 p0283 A69-11701

Slow proton irradiation of ribonucleic thin layers, determining differential inactivation cross section for various proton energies 03 p0371 A69-13482

Collisional ionization cross section for Fe ions evaluated to estimate solar corona temperature 04 p0651 A69-14365

Emission continuum intensity of negative nitrogen ion in nitrogen and air plasmas 04 p0639 A69-15370

Emission cross sections of first negative band system of nitrogen under electron impact excitation 05 p0795 A69-15617

Three energy dependent quantities examined for gases, describing relation between ionization yields, cross section and loss functions 05 p0795 A69-15660

Atomic Li photoionization cross sections calculated with Brueckner-Goldstone many body perturbation theory 06 p0961 A69-17134

Electron impact excitation cross sections for emission from first negative bands of positive N molecule ion 06 p0961 A69-17135

Electron impact ionization cross sections for second quantum level of atomic H, using Born exchange approximation and Vainshtein approximation 06 p0961 A69-17138

Hydrogen molecule spectroscopy in vicinity of ionization limit, determining absorption and ionization cross sections and fluorescence 07 p1184 A69-18490

Photoionization cross section measurements for sodium line by analyzing electron-ion recombination radiation from sodium seeded plasma, determining electron temperatures and concentrations 07 p1184 A69-19164

Cross section calculations for elastic and inelastic electron collisions with atoms, ions and molecules and ionization of atomic systems by electrons and photons 07 p1187 A69-19660

Highly ionized low density plasmas production by strong UV radiation 08 p1360 A69-20080

Cross sections computed for excitation and ionization of atoms and ions by electrons, using peaking approximation to evaluate Coulomb-Born matrix approximation 08 p1355 A69-20206

Hydrogenic atoms ionization by high energy electrons, discussing cross sections for ejected electrons and total energy 08 p1356 A69-20738

Total ionization cross section for symmetric collisions measured as function of energy by using neutral atomic beams of neon and krypton 08 p1356 A69-20740

Electron impact cross sections for diatomic molecule ionization and excitation from modified Gryzinski theory, discussing results from molecular models 09 p1542 A69-22249

Complex trajectory method for describing tunnel effect during atom ionization in strong light wave field, using quasi-classical approximation 09 p1543 A69-22658

Polarized Hartree-Fock model computing photoionization cross sections for Li isoelectronic sequence, listing phase shifts for partial waves of scattered electrons 11 p1922 A69-25260

Cross section for ionization of atoms by positive ion bombardment near threshold 11 p1922 A69-25322

Optical cross section measurements for electron excitation from ground state of nitrogen 12 p2132 A69-26246

Average ionization cross sections of atomic and molecular H and He beams ionized by plasma electrons with Maxwellian velocity distribution 12 p2138 A69-26542

Ionization of rare gases /H and N/ by nitrogen ions, determining cross sections of formation of slow ions and electrons 13 p2304 A69-28440

Efficiency parameter beta for ion and electron production by meteoric processes, noting importance to nighttime sporadic E ionization 14 p2520 A69-29372

Binary encounter model for ionization by charged particle impact modified to evaluate cross section for ionization of positive ions by electron impact 14 p2489 A69-29996

Ionization within intersecting alkali atomic and slow electron beams, observing ionization cross sections increment near ionization threshold 15 p2655 A69-30726

Elementary processes cross sections in charged states changes during proton-hydrogen molecule interactions 15 p2655 A69-30963

Initial ionization processes in strong shock wave in hydrogen, determining ionization relaxation length and cross section of atom-atom excitation collisions 16 p2815 A69-31590

Emission continuum intensity of negative nitrogen ion in nitrogen and air plasmas 16 p2822 A69-32117

Energy spectrum of secondary electrons and fluorescent efficiency in 3914 Å band, obtaining ionization cross section 16 p2850 A69-32315

Cross sections threshold behavior for Cs II resonance lines excitation due to Cs ion-He collision 17 p3008 A69-33388

Differential cross sections for secondary electron production in atomic ionization by charged particle impact, using classical binary encounter approximation 17 p3009 A69-34189

Chemical reactions activation energy at high temperature, noting cross section shape role for deducing activation energy from rate data 18 p3099 A69-34443

Atomic excitation and ionization by thermal electrons, using Monte Carlo trajectories to determine adiabatic collisions effects on energy transfer near dissociation limit 18 p3176 A69-34790

Ground and metastable state photoionization cross sections of BaI to explain artificial Ba clouds, using many channel quantum defect method 18 p3177 A69-35238

Ion production in K/diatomic Br system by high energy K beam, obtaining total ionization cross section as function of energy 19 p3378 A69-36187

Atom-atom collisional excitation cross sections obtained from ionization cross sections, noting Thomson classical theory 20 p3580 A69-37500

Atoms and ions collision strengths and photoionization cross sections for nitrogen, oxygen and neon fitted to interpolation formulas for temperature and frequency effects 22 p3988 A69-41244

Cs ionization by bromine, measuring relative cross section velocity dependence by crossed molecular beam technique 23 p4194 A69-42208

Lyman alpha radiation from electron collisions with simple H-containing molecules, finding dissociative excitation cross section role 24 p4351 A69-43033

Ionization and light emission cross sections for collisions of protons and hydrogen atoms with atmospheric nitrogen used to analyze auroral events 24 p4368 A69-43177

IONIZATION FREQUENCIES

Electron impact ionization cross sections and rate coefficients from ground state given for free atoms and ions from hydrogen to calcium 01 p0125 A69-10992

Fast type r moving striations in plasmas and dependence of ionization frequency on electron mean energy 03 p0477 A69-13801

Nonequilibrium ionization rate in arc discharge, studying perturbations effect in near cathode Langmuir layer 04 p0635 A69-14763

Numerical decile value maps of sporadic E layer ionization critical frequency for each month of solar cycle minimum and maximum year 10 p1682 A69-23418

High latitude ionization spikes observed by POGO spacecraft, noting frequency correlation with magnetic disturbances and development by high energy electron injections 14 p2511 A69-28950

Photoionization rates temperature dependence in upper atmosphere for O atoms and molecules and N molecules from computer calculations, allowing for earth sphericity 23 p4157 A69-41857

IONIZATION GAGES

NT BAYARD-ALPERT IONIZATION GAGES

Magnetron ionization gauge in helium for low pressure measurement, discussing striking characteristics and time lags 01 p0012 A69-10606

Noiseproof ionization manometer with ion current dual modulation for ultrahigh vacuum measurement in magnetic field with extraneous charged particles interference 03 p0429 A69-13263

Nonmagnetic quadrupole ionization gauge, discussing systems design and electron oscillations 13 p2262 A69-28020

Ionization sensors and detectors classification and dynamic calibration for pressure measurement 13 p2262 A69-28083

Nonmagnetic ionization gage consisting of quadrupole lens systems excited at HF, discussing electron focusing during operation 13 p2263 A69-28084

Atmospheric density measurements by triaxial accelerometer system, ionization gauges and orbital decay of OV1-15 satellite 15 p2602 A69-31384

Buried collector ionization gage for measurements in 100 billion torr pressure range using shielded collector to lower X ray current 16 p2791 A69-32324

Bent beam ionization gage linearity from calibrated nude Modulated Bayard-Alpert /MBA/ gage, discussing buried collector and tabulated magnetron gages 22 p3950 A69-41216

IONIZATION POTENTIALS

Ionization losses of Ge 72 atoms stopping in Ge, noting no cut-off indicative of energy gap effects 01 p0140 A69-11245

Electrons relaxation caused by ionization and recombination in nonequilibrium plasma, using Kerrenbrock model 03 p0477 A69-13609

Cadmium ionization energy in InAs using heat treatment in hydrogen to eliminate anomalies 06 p0979 A69-16998

Plasma ionization enhancement by laser line radiation matched to specific atomic transitions [AIAA PAPER 69-47] 06 p0972 A69-18186

Partial reflections from ionosphere, analyzing electron number densities, noting relation between D region ionization increases and small solar proton events 07 p1205 A69-18956

Ion-molecule reactions constants studied directly in ionosphere, using air injection from geophysical probe and airborne RF mass spectrometer 08 p1311 A69-21159

Nighttime electric fields and vertical ionospheric drifts near magnetic equator concurrent measurements 09 p1489 A69-21705

Thermodynamic stability of dense plasma consisting of electrons and charged ions, plotting ionization potential as function of electron density and temperature 11 p1922 A69-24232

Chain mechanism of arc discharge development in crossed electric and magnetic fields explained by direct ionization of neutral particles by ions 11 p1932 A69-25540

Ionization fraction as independent variable in plasma transport correlation, noting role in pressure effect increase 13 p2313 A69-28241

High energy ionization bursts in cosmic ray showers electron photon component, obtaining bursts power spectrum and component energy dependence 13 p2332 A69-28404

Cesium ions decay time in thermionic converter operating in gas kinetic mode by pulse ionization, noting dependence on interelectrode potential distribution 14 p2403 A69-29252

MHD channel flow calculations by quasi one dimensional approximation, considering potential drops at electrodes 14 p2500 A69-29904

Approximate ionization potentials for high ionization stages of elements with atomic numbers 31 to 92 obtained by binding energy calculations 14 p2488 A69-29923

Ion nitride hardening of Mo-Ti alloy at 1300 degrees C in cathode glow discharge tube 15 p2637 A69-30212

Microwave induced ionization wave propagation in rare gases, noting rapid electron density increase at wave front and subsequent slow plasma decay
16 p2818 A69-31671

Stripping and low-energy collisions of H atoms on O and N molecules, showing target ionization to projectile stripping ratio dependence on ionization potential
16 p2814 A69-31773

MH-alpha 328-116 /V 1016 Cyg/ star spectrum, indicating object evolution toward higher ionization states
19 p3424 A69-36234

Absorption spectrum of NO molecule, analyzing f complexes electron structure, ionization potential and quadrupole moment
22 p3984 A69-40477

Dissociation energy and ionization potential measured for gaseous SiO and GeO
22 p3896 A69-40725

Ionization wavefronts nonlinear analysis including energy effects and ionization wave structure, discussing Joule heating due to transverse electric field
22 p3990 A69-40758

Ionization rate limiting processes behind strong shock waves in pure N, plotting electron density profile diagrams
24 p4302 A69-43367

IONIZED GASES

NT STELLAR WINDS
NT THERMAL PLASMAS
NT TOROIDAL PLASMAS

High temperature, fully ionized plasma equation of state, using quantum statistical theory of low density electron-ion plasma in thermal equilibrium
01 p0128 A69-10346

Double probe characteristics in flame with electronegative gas injection interpreted in terms of conduction of ions in ionized medium
01 p0176 A69-10385

Faraday rotation of plane polarized microwave beam for measuring precursor ionization from exploding wire discharge in various gases
01 p0129 A69-10663

Statistical analysis of polarization of two component nonisothermal electron-ion Coulomb gas plasma containing microfluctuations
02 p0286 A69-11707

Scaling laws for RF discharge experiments in ionized environments, considering proper limit variables for simulation of electron density
02 p0283 A69-12241

Free fluid hydrodynamics equations applied to weakly ionized plasma stability, considering drift oscillations excitation
02 p0291 A69-12553

Automatic recording of neutral atom temperature and free electron density of partially ionized gas by Fabry-Perot interferometer
03 p0428 A69-13111

Decay stability of large amplitude neutral wave into two ion acoustic waves in weakly ionized plasma
03 p0475 A69-13158

Frictional forces and collision frequencies for ions moving in neutral gases
03 p0421 A69-13328

Tradeoffs among beam divergence, power output and mirror alignment tolerances of high power argon ion lasers operating in various low order transverse modes
03 p0440 A69-13549

Constants in formulas describing temperature and pressure dependence of thermodynamic characteristics of high temperature monatomic ionized gases for positive ions
03 p0473 A69-14156

Ionization fronts stability, taking into account ionizing photons absorption effect in H II region and interstellar magnetic field
04 p0650 A69-14363

Ionized medium effect on polarization of synchrotron radiation from monoenergetic distribution of electrons
04 p0648 A69-14420

Nonlinear and second order thermal diffusion of electrons in ionized gas
04 p0636 A69-14878

Partially ionized hydrogen transport coefficients, using expressions containing collision integrals for charged particles
04 p0637 A69-15051

Boltzmann equation for weakly ionized gas electron component, solved by transformation to integral equation, applied to Lorentz gas in alternating electric field
05 p0795 A69-15619

Continuous UV noble gas ion lasers, noting small signal gain and power output limit at various current densities for strong lines
05 p0775 A69-16321

Collision induced instability of partially ionized gases having large Ramsauer effect in external magnetic field, analyzing nonlinear characteristics
05 p0804 A69-16441

Electron distribution function for homogeneous weakly ionized gas in presence of alternating electric field, discussing solution of Boltzmann equations
05 p0797 A69-16604

Spatial and temporal characteristics of two component electron-ion nonisothermal plasma and penetration of external LF electric field into plasma
05 p0806 A69-16745

Longitudinal acoustic waves propagation in partially ionized gas in external electric field, taking into account ionic collisions with electrons and neutral particles
06 p0963 A69-17079

Stagnation point electrostatic probe measurements of flowing partially ionized high density monatomic gases
06 p0964 A69-17196

Ionized plasma electrical conductivity in magnetic field calculated by supplementing BGK collision terms with Vlasov equation
06 p0965 A69-17482

Weakly ionized wakes study in free quasi-molecular regime of supersonic flow, using Langmuir probe in wind tunnels, discussing ion density distribution
06 p0966 A69-17639

Weakly ionized gas flow past discontinuous wall potential used to study edge effects and interaction problems for single and multiple flush electrostatic probes
06 p0972 A69-18191

High efficiency ion lasers without additional axial magnetic field
06 p0938 A69-18221

Wall space charge layer effect on ion extraction from weakly ionized plasma, using quadrupole mass spectrometer
07 p1188 A69-18276

Stabilized frequency single mode ionized argon laser, discussing intensity of electric field in cavity and mode selector
07 p1145 A69-18475

Highly ionized plasma acceleration by intrinsic radiation achieved by deep cooling of free electrons
07 p1195 A69-19595

Electron collisional excitation cross sections for upper states in Ar ion lasers
07 p1157 A69-19656

Vacuum UV perturbation spectroscopy compatibility with resonance transitions in Ar ion laser
08 p1324 A69-20161

High Q capacitance loaded coaxial cavity resonator for study of electric susceptibility of ionized gas
08 p1313 A69-20214

Ambipolar diffusion in electron concentration inhomogeneities of weakly ionized plasma in magnetic field analyzed by linearized quasi-hydrodynamic equations
08 p1362 A69-20426

Collisional theory of longitudinal wave propagation for two fluid viscous ionized plasmas formulated from coupled Maxwell and Boltzmann equations
08 p1367 A69-20796

Partially ionized argon plasma stagnation flow past blunt body using multifluid theory, obtaining flow profiles
08 p1369 A69-20817

Partially ionized plasma oscillations in crossed magnetic and electric fields, noting role of LF particle collisions
08 p1370 A69-21079

Electrical conductivity of partially ionized plasma, noting nonapplicability of Enskog-Chapman method and use of Lorentzian gas model
09 p1546 A69-21584

High time resolution electrical conductivity measurement of ionized plasma gas flow, using changes in Q of circuit
09 p1546 A69-21588

Partially ionized Kr and Xe transport coefficients for various pressures and at high temperatures computed on basis of charged particle cross sections
09 p1548 A69-21935

Conductivity probe design for tenuous plasmas and ionized gases, discussing experimental confirmation of theoretical behavior
09 p1496 A69-21936

Temperature stability of slightly ionized gas for arbitrary collision cross sections, discussing electron temperature variation as function of electric field strength
09 p1551 A69-22039

Gas lasers, discussing amplification, resonance, internal and external mirror lasers, outputs, and He-Ne, carbon dioxide and ion lasers
09 p1517 A69-22121

Weak discontinuities in wave propagation, studying ionized gas nonsteady flow having electrical conductivity in magnetic field
10 p1727 A69-22916

Effect of degree of expansion of ionized gas in nozzle on specific power of MHD generator
10 p1636 A69-23103

Noble gas additives for triggering stability of pulsed argon ion lasers, discussing repetition rate and power loss
10 p1702 A69-23341

Unstabilizing effect of inhomogeneities on magnetoacoustic waves in slightly ionized gases with current perpendicular to magnetic field
10 p1734 A69-23459

Effective Ohm law for inhomogeneous weakly ionized gas and Hartmann flow analysis, noting electron density fluctuation effect on conductivity
10 p1735 A69-23462

Pulse and CW breakdown criteria for plasmas subject to spatially nonuniform electric fields, using variational formulation
10 p1739 A69-23650

Ionized gas flow from globule containing atomic H in interstellar space, noting surrounding H II region and radiation at ionization front
10 p1782 A69-23682

Neon discharges, discussing similarities in type p plasma ionization waves generated by pulsing
10 p1740 A69-23721

Transport and balance coefficients in ionized neon and helium plasmas in homogeneous electric field, calculating electron mobility, diffusion coefficient, energy and collision parameters
10 p1740 A69-23722

High temperature gas mixture plasmas thermodynamical properties, emphasizing Debye electrostatic interactions and electron states
10 p1810 A69-23794

Single mode generation and Lamb dip in argon ion gas laser obtained by thin quartz plate inserted near plane mirror of resonator
10 p1706 A69-24080

Electrical conductivity of partially ionized noble gases Ar, He, Xe and Kr, considering electron temperature and electron-electron interactions
11 p1923 A69-24295

Explosive and reversible onset of helical instability in weakly ionized discharge plasmas, noting ambient noise level role
11 p1924 A69-24299

Electron number density LF oscillations for ionized gas identified with periodic solutions to neutral and charged particle plasma continuity equations
11 p1925 A69-24315

Weakly ionized gas in crossed electromagnetic fields, formulating Ohm law from Ginzburg equations
11 p1925 A69-24319

Single frequency Ar ion laser for deep field holography noting thermal compensation, servo stabilization, operating mode, high power and high coherence
11 p1895 A69-24685

Low order transverse modes in Ar ion lasers, analyzing beam divergence, output, mirror alignment and cavity configurations
11 p1896 A69-24841

Nonlinear HF conductivity of fully ionized plasma considering applied electromagnetic field frequency close to electron plasma frequency
11 p1929 A69-25271

Ionosphere temperature profiles, discussing heating and cooling of electron gas and ion gases and thermal balance

12 p2063 A69-25903

Acoustic wave generation in neutral particle component of weakly ionized gas by variation of electron temperature with low power RF signal

12 p2134 A69-26096

Boundary layer parameters behind shock wave front in ionized gas calculated with allowance for charged particle diffusion

12 p2139 A69-26713

Joint probability distributions of electric microfield in hot ionized plasma consisting of noninteracting particles

12 p2139 A69-26871

M 31 galaxy ionized gas region high resolution spectroscopy, emphasizing radial velocities in O II lines at various distances from nucleus

12 p2163 A69-27020

Ionized gas cloud eruption from galactic nucleus deduced from observed hydrogen line at 5.1 cm

12 p2171 A69-27068

Soviet monograph on plasma diagnostics by lasers, describing interferometry, optical field visualization, schlieren and shadow photography

12 p2139 A69-27075

Infinitely long journal bearing using ionized gas lubricant with magnetic field applied axially and electric field applied transversely to fluid film [ASME PAPER 68-LUBS-30]

13 p2267 A69-27287

Plasma ion oscillations excited in plasma consisting of ion beam and thermal electrons produced by back diffusion sources

13 p2304 A69-27301

Transport equation describing drift, diffusion and reaction of iron swarm influenced by electric field in gas

13 p2306 A69-27457

Refractory ceramic materials thermal stability in high temperature subsonic ionized gas flow products, emphasizing zirconia and magnesia

13 p2285 A69-27472

Optical maser induced electrical breakdown interaction with superhigh pressure ionized gases, using optical interferometry and holography

13 p2273 A69-28464

Time and altitude induced variations in daytime NO and molecular and atomic oxygen ions

14 p2435 A69-29050

Ionized gas height scale changes in polar ionosphere obtained, assuming Chapman type ionization distribution

14 p2436 A69-29052

Partially ionized multicomponent gas mixture kinetics in strong electromagnetic field, determining magnetic field, stress tensors and transfer coefficients

14 p2492 A69-29610

Time averaged stress tensor for ionized plasma in HF electromagnetic field, considering collisions

14 p2493 A69-29649

Electrical conductivity ratio of weakly ionized turbulent gas to quiescent gas as function of electron temperature

14 p2502 A69-29991

Intrinsic quantum-mechanical behavior of fully ionized gas at high temperature and low density, defining classical limit

14 p2502 A69-29992

Free fluid hydrodynamics equations applied to weakly ionized plasma stability, considering drift oscillations excitation

15 p2658 A69-30250

Free electron concentrations and dispersion in H I regions noting ionized interstellar gas components role

15 p2681 A69-30420

Flush electrostatic probe edge effect, considering Couette flow of weakly ionized compressible gas past discontinuous wall potential

15 p2653 A69-30912

Distribution model for ionized interstellar gas over galactic disk for explaining radio emission absorption and depolarization from discrete sources

15 p2695 A69-30935

Ion-acoustic oscillations effect on weakly ionized plasma electrical conductivity, using BGK collision integral model

15 p2662 A69-30970

Mode competition of 5861 and 6470 A lines in ionized Kr laser attributed to electronic level excitation processes

15 p2635 A69-31106

Weakly ionized plasma electron heating by interaction with HF electromagnetic field calculated using Boltzmann transport equation

15 p2665 A69-31480

Disturbance currents from penetration of acoustic waves in weakly ionized gas, analyzing wave interaction with DC glow discharge

15 p2665 A69-31547

Electron concentration and mass density behind reflected shock in ionizing argon, using time resolved two wavelength interferometry

16 p2771 A69-31918

Boltzmann kinetic equation describing rarefied neutral or weakly ionized gas state evolution, showing solution existence, uniqueness and successive approximation convergence

16 p2814 A69-31958

Thermal diffusion coefficient for fully ionized plasma containing mixture of arbitrary charge ions in topside ionosphere

16 p2775 A69-32084

Ion momentum transfer through charge exchange in mixture of ion gases and parent neutral gases under thermal nonequilibrium, noting role of Boltzmann equation

16 p2822 A69-32108

Flow field of highly ionized arc heated supersonic free jet, using continuous flow test facility [AIAA PAPER 68-135]

16 p2772 A69-32153

Nonequilibrium ionized gas flow past insulated wall with corners under magnetic field, discussing flow characteristics

17 p3010 A69-32865

Preferential ion recombination in gases under high pressure, noting no dependence of recombination on average energy

17 p2949 A69-32999

Interferometric study of electron concentration and mass density profiles through ionized argon thermal end-wall layer formed in shock tube [AIAA PAPER 69-694]

17 p3074 A69-33477

Current distribution and scattering cross section of missile with plume/ionized trail/of tapered conductivity due to plane wave electromagnetic excitation

17 p2921 A69-33671

HF electromagnetic waves penetration into slightly ionized plasma analyzed by Maxwell and kinetic equations, giving penetrating electric field by WKB formula

17 p2932 A69-34220

Lorentz gas approximation to Boltzmann collision operator generalized for heavy molecule nonMaxwellian gas distribution function, obtaining equilibrium distribution applicable to ionized gas

18 p3179 A69-34438

Positive ion concentration in D region, using spherical stationary electrostatic probe in weakly ionized collision dominated gas

18 p3128 A69-34804

Ion collecting cylindrical electrostatic probes as flow field tracing instruments in low density slightly ionized flows

19 p3291 A69-35718

Plasma density and potential distributions along circular cylinder surface in weakly ionized high speed low pressure gas flow, noting boundary layer separation point

19 p3380 A69-35839

Forbidden lines emitted by gaseous nebulae, emphasizing relative intensities of O II and O III lines

19 p3422 A69-36220

Hypervelocity ionized gas flow analysis, allowing for finiteness of energy exchange duration between electrons and ions

19 p3379 A69-36383

Equilibrium Couette flow of ionized multicomponent ideal gas between moving catalytic plates, obtaining thermal flow formulas and thermal conductivity coefficient

19 p3240 A69-36403

Radio wave diffraction by inhomogeneities arising from ionized gas clouds in interstellar medium

19 p3428 A69-36882

Similarity rule in hydrodynamically transcritical regime in ionized multifluid gas

20 p3515 A69-37594

Electron-ion gas ambipolar diffusion effect on F 2 layer electron density vertical distribution variations

20 p3525 A69-37655

Low energy plasma escape flow from polar region (polar wind), examining H, He and O ions participation in expansion

21 p3713 A69-38528

Negative ion influence on electrical conductivity of partially ionized multicomponent gas mixtures, basing analysis on thermodynamic calculations of composition

21 p3774 A69-38867

Self similar solution to one dimensional isothermal ionized gas outflow from ionization front in half space filled with neutral gas exposed to quanta flux

21 p3771 A69-38997

Electron temperature profile across shock wave in weakly ionized nonequilibrium argon by numerical integration of energy conservation equation, noting three body recombination

21 p3698 A69-39791

Boltzmann equation analysis used to study near surface electron temperature for weakly ionized plasmas, showing nonequilibrium absorption layer governing electron temperature profile

22 p3989 A69-40528

Atmospheric small gaseous ions nature and properties, discussing solid elastic and composite interaction, complex, cluster, intermediate and Langevin ions, etc

22 p3940 A69-40538

Mars upper atmosphere ionized carbon dioxide and CO emission spectra in 1900-4300 A region measured by Mariner 6, observing atomic hydrogen and oxygen lines

22 p4023 A69-40568

Ionized plasma motion under plane piston action by self similar solution of Navier-Stokes equations

22 p3991 A69-41021

Electron transport coefficients determined for weakly and fully ionized gases under various conditions

23 p4195 A69-41517

Moving striations as plasma oscillations arising from transit time delays of neutral and charged particles moving through ionized gas, using continuity equation

24 p4356 A69-43122

Convective thermal flux at stagnation point in multicomponent partially ionized gas injected flow past body, considering effective ambipolar diffusion coefficient

24 p4246 A69-43485

IONIZED PLASMAS

U PLASMAS (PHYSICS)

IONIZING RADIATION

NT ALPHA PARTICLES

NT BETA PARTICLES

NT COSMIC RAY SHOWERS

NT COSMIC RAYS

NT FAR ULTRAVIOLET RADIATION

NT GAMMA RAY BEAMS

NT GAMMA RAYS

NT LYMAN ALPHA RADIATION

NT LYMAN BETA RADIATION

NT SOLAR COSMIC RAYS

NT SOLAR X-RAYS

NT ULTRAVIOLET RADIATION

NT X RAYS

Meteorological rocket measurement of ionizing radiation flux in upper atmosphere, noting flux decrease with increasing electron energy

01 p0144 A69-10586

Gas chromatography technique for separation and purification of chemical compounds for ionizing radiation detectors

02 p0249 A69-12011

Information theory application to study of biologically stimulating effects of low ionizing radiation doses, thermal energy and other environmental factors

03 p0369 A69-13434

Accelerated helium and carbon ions effects on mutation-induction and nuclear inactivation in Neurospora crassa compared with X rays, discussing relative biological effectiveness (RBE)

03 p0373 A69-13490

Ionizing action of radiation due to heating substance in laser beam focus, discussing highly ionized plasma production

03 p0479 A69-13998

Radiation processed wood-plastic materials produced by impregnating natural wood with liquid monomer followed by ionizing radiation induced polymerization

04 p0605 A69-14582

Solar X ray source identification using D layer ionization behavior during eclipse

04 p0650 A69-15533

Microorganisms and viruses susceptibility to sterilization by ionizing radiation, heat and combination of radiation and heat, considering space materials damage elimination

05 p0713 A69-15947

Space flight factors, ionizing radiation and combined effects on vitamin C content in onion bulbs
05 p0708 A69-16510

Large area X ray collector, matrix detector for ionizing radiation and inflatable gas counter, considering application to X ray optics and astronomy
05 p0794 A69-16587

Prediction technique for surface effect causing Si bipolar transistors gain degradation under ionizing radiation
06 p0976 A69-16879

Ionizing radiation effects in microcircuits, using lumped model technique to derive mathematical model from electronic characteristics and boundary values of each semiconductor
06 p0977 A69-16886

Ionizing radiation-initiated degradation of deoxyribonucleic acid in bacteria, noting role of defective prophage
07 p1068 A69-19494

Linville model for describing elementary phenomena of electronic equipment in terms of physical data applied to irradiated semiconductor diode and transistor
08 p1280 A69-19974

Synergistic effects of prolonged heat exposure and whole body irradiation with ionizing radiation on survival time in hamsters
08 p1263 A69-20174

Ionizing radiation effects on space charge of MOS devices, showing electron-hole pairs within oxide and electron injection from cathode
08 p1373 A69-20864

Corpuscular radiation contributions to D layer ionization determined from intensity measurements
09 p1577 A69-21770

Space electric fields research by artificial clouds of vaporized barium launched by rockets, noting neutral atmosphere and ionospheric results
09 p1492 A69-22800

Chemical and biological means of safeguarding body of astronaut against ionizing radiation and vibration
10 p1648 A69-23297

Ionospheric disturbances after July 7, 1966 proton flare noting flare ionizing radiation, high energy solar proton effects and low energy solar plasma
10 p1684 A69-23784

Drift and tunnel effect of MOS transistors under ionizing electron and X ray irradiation, considering fabrication, electrical characteristics and D-2 satellite tests
11 p1848 A69-24873

Planar transistor gain degradation under weak ionizing radiation, considering operating voltage and temperature conditions
11 p1848 A69-24874

Ionizing radiation effects on combustion of ammonium perchlorate compacts with and without fuel addition, considering X ray, electron and plasma radiation
11 p1941 A69-25194

Soviet book on quality control of materials and machine parts by ionizing radiation covering radiation hazards and protection
13 p2268 A69-27935

Sublethal ionizing radiation doses effect on hemolytic immunocompetent spleen cells in mice upon using chemical radiation protectors
13 p2210 A69-28334

Solar ionizing radiation sources, discussing activity at sunspot minimum, temperature, density and solar wind effects, X ray and UV spectra, etc
15 p2673 A69-30007

Meteorological rocket measurement of ionizing radiation flux in upper atmosphere, noting flux decrease with increasing electron energy
15 p2675 A69-30756

Planar bipolar transistors degradation under thermal and ionizing radiation stresses, analyzing surface recombination currents of silica films and silica-silicon interfaces
15 p2625 A69-30826

Passive components reliability subjected to ionizing radiation for families, types, batches and individuals
15 p2627 A69-30838

Diurnal variations in radiation sensitivity of mice and rats to irradiation with median lethal doses, noting sine curve survival function
15 p2557 A69-31458

Myocardial changes in rabbits after general chronic ionizing irradiation attributed to lower cardiac activity, hypertrophy and dystrophy
17 p2906 A69-32929

Cosmic ionizing radiation effects on electronic elements operation based on radiation and matter interaction principles
17 p2937 A69-33583

Auroral absorption bays from 1963 to 1964, noting effect of ionization agent intensity changes on absorption diurnal variations
17 p2965 A69-33965

X ray absorption in surrounding gas sphere as function of continuous absorption, electron scattering and diffuse ionizing radiation, using radiative transfer theory
18 p3186 A69-34296

Space flight factors, ionizing radiation and combined effects on vitamin C content in onion bulbs
18 p3095 A69-34729

Biological effects of radioactivity and X rays irradiation of whole body and cells, considering DNA degradation
19 p3257 A69-35978

Solar ionizing radiation increase during flares of 21 and 23 May 1967 determined from ionospheric electron density concentrations
20 p3590 A69-37558

Collection of papers on mechanisms of biological action of ionizing radiation covering radiation sickness dynamics, radiation damage, X ray effects, etc
21 p3656 A69-39049

Nervous system reactions and resistance to ionizing radiation noting role of functional, morphological and physicochemical changes in nerve tissues
21 p3659 A69-39061

Ionizing radiation histological and neurohistological effects in rabbits esophagus, stomach and ileocecal region intramural plexes
21 p3659 A69-39063

S-4 human blood experiment during Gemini 2 flight, studying spaceflight ionizing radiation interaction effects on single and multiple break chromosome aberrations
23 p4085 A69-41600

IONOGRAMS

Ducted echoes on topside ionograms and whistler diffuseness at midlatitudes, noting common occurrence of phenomena
01 p0029 A69-10551

Ionospheric perturbations involving stratifications at various heights move toward LF and HF sections of ionograms
03 p0423 A69-13538

Criticism of overlay analysis method for F 1 region ionograms
05 p0757 A69-16403

Ray tracing of Z-mode in tilted layer ionosphere to explain Z-mode echoes in ionograms
05 p0758 A69-16412

Sporadic E layers compared with model of electron concentration profile, using rocket measured profile data for computing ionogram
06 p0922 A69-17750

Formulas for ray paths in ionized layers with application to oblique ionograms and duct modes
07 p1078 A69-18913

Single polynomial analysis of ionograms, determining electron density profiles from small number of measured heights
07 p1125 A69-18915

Synthesis of oblique incidence ionograms for quasi-linear ionospheric model with spherical earth-ionosphere geometry neglecting geomagnetic field
08 p1274 A69-20044

Electron density profile from oblique ionogram calculated by iteration, assuming concentric spherically stratified ionosphere
10 p1684 A69-23826

E region radio waves triple splitting observed in probe ionograms, analyzing diurnal and seasonal variations in Z component reflections occurrence
12 p2031 A69-26686

Ionograms in vertical depletion duct in horizontally stratified isotropically refractive plasma, considering vertical propagation and ray paths traces dependence on electron concentration
14 p2434 A69-28945

Ionograms for nonmonotonic vertical distribution of electron concentration in ionosphere from rocket and ground sounding
14 p2437 A69-29071

ISIS A satellite fixed and sweep frequency ionograms indicating electron density variations, ionospheric resonances and Cerenkov radiation
15 p2604 A69-31416

High latitude stations vertical ionograms in absence of ionospheric reflections due to low solar activity periods, discussing interpretation methods
20 p3529 A69-37690

Ionogram processing procedure, discussing presence of vertically moving ionospheric disturbances
20 p3529 A69-37691

Data acquisition and processing ionograms from Alouette satellites telemetered sweep frequency topside sounding data
20 p3503 A69-37866

Receiving and display telemetry system for obtaining direct ionospheric topside ionograms from Alouette satellite, discussing video data tape recording cost
20 p3507 A69-37868

Real time pulse frequency modulation telemetry receiving system for direct readout of ionograms from topside sounders, using off-shelf components
20 p3508 A69-37866

Alouette 1 and 2 topside sounder ionograms analyzed with emphasis on low electron density, spread F and field aligned propagation
20 p3529 A69-37866

Electron density profiles from topside ionogram compared to ground based sounding results, discussing error corrections
20 p3495 A69-37866

Computer aided data interpretation system converting ionograms to vertical electron density profiles
20 p3504 A69-37866

Alouette 2 ionograms secondary resonances data indicating day-night effect in relative frequency of occurrence
20 p3496 A69-37889

Two-hop signals observed on high latitude Alouette 2 topside ionograms found propagating in field aligned cylindrical ionospheric ducts
20 p3531 A69-37896

Sideband structure of transmitted frequency spectrum exhibited by plasma wave features on topside ionograms, noting harmonic resonances
20 p3496 A69-37899

Propagation characteristic model study of kinked Z trace observed on topside ionograms and explained by magnetoionic theory
20 p3531 A69-37899

Alouette topside ionograms of ionospheric storms at midlatitudes indicating critical frequencies difference between F 1 and F 2 layers
20 p3532 A69-37899

Proton cyclotron echoes on ionograms obtained from topside ionosphere by Alouette 2 satellite
24 p4310 A69-43181

IONOSONDES

Phase ionosonde cost, possibilities and errors
01 p0071 A69-11161

Graphs of ionospheric measurements by vertical incidence sounding during Antarctic expedition, describing instrumentation and sounding techniques
10 p1681 A69-23311

Ionospheric data acquisition and utilization for improved radio communications, considering contact between engineers and physicists, ionosondes, data reliability for prediction, etc
17 p2961 A69-33401

Ionosonde electric circuit modified to permit radio wave absorption measurements over wide frequency range, calculating electron collision frequencies in ionosphere
17 p2968 A69-33999

Kinesonde radio sounding system for three dimensional ground observations of E region microstructure and vertical motion of neutral air and ions
18 p3125 A69-34250

IONOSPHERE

NT D REGION
NT E-2 LAYER
NT E REGION
NT F REGION
NT F 1 REGION
NT F 2 REGION
NT LOWER IONOSPHERE
NT SPORADIC E LAYER
NT UPPER IONOSPHERE

Ionospheric plasma electrostatic resonances from Alouette satellite signal observations
01 p0067 A69-10989

Midlatitude ionospheric wind profiles noting seasonal and time differences in circulation patterns, speed, shear, wavelength, energy content and dissipation
01 p0072 A69-11171

Electrostatic plasma wave instabilities in ionosphere along auroral field lines, noting critical electron flux and subsequent acceleration of electrons
01 p0075 A69-11222

Free atmospheric turbulence theory extended to include ionosphere, deriving equations for horizontal ionospheric wind together with turbulence coefficient
02 p0274 A69-11671

- Charged particle motion caused by ELF electromagnetic waves in presence of constant magnetic field, noting earth ionosphere application
02 p0240 A69-11712
- Mariner 4 Martian ionospheric data interpreted in terms of E, F1 and F2 regions
02 p0320 A69-12113
- Mariner 4 ionospheric densities to deduce Martian atmospheric modes, discussing validity of using ionospheric properties to discriminate between models
02 p0320 A69-12114
- Gain from communications operation at maximum usable frequency estimated on basis of long range ionospheric prediction technique adapted to computer
03 p0421 A69-13377
- Earth ionosphere resonator natural frequencies, considering diurnal variation and geomagnetic field eccentricity
03 p0422 A69-13512
- Portable amplitude and frequency recording system for studying ionosphere by radio signals from artificial satellites
04 p0597 A69-14748
- Ionosphere structure, properties and research techniques
04 p0594 A69-15166
- Curvilinear plasma motions in ionosphere same as cyclones and anticyclones in troposphere, solving ionospheric unstable wind as function of pressure gradients
06 p0919 A69-17722
- Planetary distribution of ionospheric parameters analyzed, using geographic longitude and magnetic inclination as longitudinal and latitudinal coordinates
06 p0921 A69-17745
- Synthesis of oblique incidence ionograms for quasi-linear ionospheric model with spherical earth-ionosphere geometry neglecting geomagnetic field
08 p1274 A69-20044
- Ion-molecule reactions constants studied directly in ionosphere, using air injection from geophysical probe and airborne RF mass spectrometer
08 p1311 A69-21159
- Solar quiet day variations studied by annual amplitude dependence on number of sunspots, considering E layer ionization
09 p1575 A69-21550
- Daily observational results of solar phenomena, cosmic rays, geomagnetic variations, ionosphere, radio wave propagation and airglow arranged according to solar rotation number
10 p1771 A69-22808
- Weakly attenuated components of VLF mode spectrum associated with propagation below anisotropic ionospheres as function of frequency and azimuth
10 p1655 A69-23417
- Low energy particles during solar proton flare and effects on magnetosphere, cosmic ray intensity, ionosphere and geomagnetic activity
10 p1768 A69-23786
- Reflection coefficient of electromagnetic wave reflected from thin ionization layer, using frequency dependence of amplitude to estimate ionospheric layer thickness
10 p1686 A69-23912
- Electron flux parameters determination from ionograms and reflected signal amplitudes between 120-130 km, considering electron collision frequencies
10 p1688 A69-23931
- Ionosphere temperature profiles, discussing heating and cooling of electron gas and ion gases and thermal balance
12 p2063 A69-25903
- Production source of ionization due to low energy electron influx and inclusion in ionospheric continuity equation, noting quiet ionosphere
12 p2066 A69-26112
- Nightglow intensity variations at sunspot minimum from measurements in South West Africa, considering relationship to ionospheric vertical movements and density variations
12 p2066 A69-26133
- Sea tides and ionospheric effects on lunar variation of geomagnetic field vertical component
12 p2161 A69-26957
- Free atmospheric turbulence theory extended to include ionosphere, deriving equations for horizontal ionospheric wind and turbulence coefficient
13 p2295 A69-28709
- Gain from communications operation at maximum usable frequency estimated on basis of long range ionospheric prediction technique adapted to computer
14 p2433 A69-28827
- I-V characteristics of electron emitting satellite in ionosphere, analyzing spherical Langmuir probe in collisionless plasma in magnetic field
14 p2511 A69-28956
- Suprathermal electrons energy distributions as function of magnetic latitude in polar ionosphere obtained by Explorer 31 satellite observation
14 p2512 A69-28963
- Correlation function of auroral reflection radio signals with allowance for polar ionospheric scattering and pulse signal transmission and reception
14 p2436 A69-29055
- Electron flux-atmosphere interaction solved by numerical integration on computer, discussing auroral ionosphere
14 p2513 A69-29069
- Ion chemistry of D and E regions to be studied during years of solar maximum in framework of IQSY/IUCSTP
14 p2439 A69-29111
- Daytime ionospheric screening effect on low latitude geomagnetic micropulsations estimated using ionosphere model
14 p2441 A69-29380
- Soviet collection of papers on ionosphere covering polarization state of reflected radio waves, ionospheric models, inhomogeneities
14 p2443 A69-29861
- Ion-molecular reactions measurements in ionosphere by VV type device and RF mass spectrometer
15 p2603 A69-31407
- Radar Thomson scatter from nonthermal steady state level of plasma waves in ionosphere measured, studying role of angle between wave vector and magnetic field
16 p2818 A69-31678
- Atmospheric density at 130-160 km measured from satellite 1968-59B orbit, noting agreement with CIRA 1965
16 p2776 A69-32095
- Solar quiet day variations studied by annual amplitude dependence on number of sunspots, considering E layer ionization
16 p2851 A69-32545
- Earth core conductivity effects on ionospheric shielding against geomagnetic changes from external sources, noting earth-ionosphere coupling
17 p2959 A69-32925
- Geomagnetic field effects on microwave noise spectrum in earth-ionosphere resonator, calculating field energy spectrum near resonance maximum, discussing excitation by lightning
17 p2918 A69-33034
- Langmuir probe to determine space vehicle orientation in ionospheric or interplanetary plasma, discussing apparatus, accuracy and application
17 p3001 A69-33222
- Steady state plasma wind tunnel for flow around ionospheric satellites, studying wakes of cylinders and spheres
17 p2893 A69-33488
- [AIAA PAPER 69-673]
Ionospheric studies - Conference, Alma-Ata, U.S.S.R., September 1965
17 p2965 A69-33977
- Soviet book on ionospheric processes summarizing published studies covering neutral atmosphere structure, ionizing solar radiation component composition and intensity, etc
18 p3126 A69-34358
- Near and antipodal fields in earth-ionosphere waveguide using mode theory, ray theory, zonal harmonics series and method of images to derive field representations
19 p3283 A69-35931
- Radio wave sphericity influence on scattering at moving body wake in ionosphere, determining scattering cross section principal maximum
20 p3486 A69-37024
- Cold plasma approximation of whistler excitation of lower hybrid resonance at wake of body moving through ionosphere, comparing results with Alouette satellite observations
20 p3519 A69-37025
- Earth ionosphere and magnetosphere electrodynamics state analyzed as function of neutral gas small scale motions, considering magnetic disturbances and ionospheric discontinuities
20 p3519 A69-37026
- Solar activity effect on short term meteorological processes and dynamic state of mesosphere and ionosphere, emphasizing relationship to entire atmosphere dynamics
20 p3590 A69-37684
- Retarding potential analyzers determining ionospheric structure, noting linearization of analysis
22 p3940 A69-40523
- LF hydromagnetic waves propagation along geomagnetic field lines in gyrotropic ionosphere model taking Hall effect into account
23 p4157 A69-41864
- IONOSPHERE EXPLORER A**
U EXPLORER 20 SATELLITE
IONOSPHERIC ABSORPTION
U ELECTROMAGNETIC ABSORPTION
IONOSPHERIC BLACKOUT
U BLACKOUT [PROPAGATION]
IONOSPHERIC COMPOSITION
D region composition at and shortly after sunrise, noting negative ion factor changes, ionization source and quasi-equilibrium conditions
01 p0066 A69-10597
- Ionic composition and temperature of nighttime topside ionosphere from analysis of incoherent backscatter spectra, discussing solar activity effects
01 p0076 A69-11233
- Rocket sounding for studying positive ions nighttime composition in E layer after magnetic storm at midlatitudes
02 p0239 A69-11686
- Algorithm for N/h ionospheric profiles calculations using both x and o magnetoionic components, taking into account interlayer and underlying ionization influence
02 p0239 A69-11687
- Plasmapause and relation to ion composition in topside ionosphere, using Bohm coefficient for turbulent diffusion
02 p0246 A69-12741
- Dissociative velocity rates of oxygen and ozone in ionosphere obtained by exponential approximation for molecular concentration distribution
02 p0246 A69-12769
- High power radar for investigating ionosphere by incoherent scatter technique
03 p0398 A69-13768
- Ion cut-off whistlers observed during VLF experiment aboard OGO 2 and OGO 4, noting possible application to relative ionospheric proton concentration determination
03 p0426 A69-14029
- Total ionospheric electron content determination from measurement of phase differences of satellite transmission, discussing data processing and differential Doppler effect measurements
04 p0592 A69-14766
- Ionosphere structure, properties and research techniques
04 p0594 A69-15166
- Ionospheric plasma flute instability considered as possible cause of occurrence of elongated small scale inhomogeneities in F2 layer
08 p1309 A69-20425
- Radio waves polarization scattered at ionospheric discontinuities analyzed for vertical incidence, determining modulus distributions and polarization factor argument
09 p1453 A69-21527
- Ions and electrons in ionosphere diffusion tensor components and ambipolar diffusion coefficient expressions derived for nonisothermal plasma
12 p2071 A69-26700
- Horizontal gradients below satellite orbit effect on reduced and minimum difference in Doppler frequency shifts of coherent radio waves from satellite in inhomogeneous ionosphere
13 p2219 A69-27701
- Rocket sounding for studying positive ions nighttime composition in E layer after magnetic storm at midlatitudes
13 p2258 A69-28717
- Algorithm for N/h ionospheric profiles calculations using both x and o magnetoionic components, taking into account interlayer and underlying ionization influence
13 p2258 A69-28718
- OGO 5 spectrometric studies of topside ionospheric ion concentrations, noting difference between nighttime and sunlit pass
15 p2599 A69-31345
- Diurnal variations of atmospheric ion composition at 100-200 km from rocket experiments
15 p2603 A69-31401
- Ionospheric ion composition at 130-155 km during meteor shower Orionides activity from geophysical rocket-borne RF mass spectrometer data
15 p2603 A69-31406
- Nighttime, twilight and daytime rocket experiments for ion composition of polar ionosphere at 100-180 km
15 p2604 A69-31414

Simultaneous solution of continuity and heat conduction equations for ionospheric plasma consisting of electrons, atomic O ions and neutral gas species, discussing varying solar flux effects
16 p2849 A69-32082

Simultaneous solution of continuity and heat conduction equations for ionospheric electrons, ions and neutral species for studying F region magnetic storm behavior
16 p2775 A69-32083

Radio waves polarization scattered at ionospheric discontinuities analyzed for vertical incidence, determining modulus distributions and polarization factor argument
16 p2754 A69-32522

Vertical ionospheric perturbations shown responsible for Z component in F region
17 p2969 A69-34000

Simultaneous ionospheric ion and electron measurements by various radiophysical methods, relating results to period of flight of vertical space probe
20 p3486 A69-37028

Reactions determining ion composition in E region, discussing neutral composition variations from day to night and during solar activity cycles
20 p3520 A69-37031

Soviet collection of papers on ionospheric studies covering ionospheric composition, propagation, disturbances, sounding, etc
20 p3523 A69-37654

High latitude ionosphere data from Alouette-ISIS program, describing various F, E and D regions parameters
20 p3530 A69-37868

Ionospheric parameters of ion and electron density and temperature and ionic species compared by direct measurement probes on Explorer 31 satellite
20 p3531 A69-37882

Ionic composition determined by combining Alouette topside sounder electron density profiles with electron and ion temperatures measured by ground based Thomson scatter sounder
20 p3532 A69-37898

F region vertical density profiles for positive ions and neutral molecules of various gases determined from rocket-borne mass spectrometer data
21 p3702 A69-38354

Ionosphere characteristics in terms of airglow, describing daytime F/D layers formation model provided by photoionization, loss processes and ambipolar diffusion
21 p3712 A69-38517

Daytime electron and ion composition model for height range from 150 to 1500 km at moderate latitudes and minimum solar activity
21 p3714 A69-38555

Nighttime F region nonlinear recombination and variable drift effects, suggesting empirical model
21 p3715 A69-38559

Rocket measurements of diurnal variations of F region concentrations and temperature of molecular N and O, showing disagreement with satellite drag data
22 p3939 A69-40515

Nighttime F region time-altitude variations in aeronomic parameters calculated under conditions close to solar activity maximum
23 p4156 A69-41844

RF impedance probe used for ionospheric composition measurements, describing antenna operation in ion-electron cyclotron frequency range
24 p4308 A69-43008

IONOSPHERIC CONDUCTIVITY

Solar eclipse effects on ionospheric conductivity and geomagnetic field at and near dip equator observed at Huancayo, Peru
02 p0241 A69-11728

Diurnal variation in horizontal magnetic component of South American stations close to electrojet during IGY
02 p0246 A69-12771

Conductivity and permittivity for ion and electron resonance region of ionospheric plasma model calculated in quasi-hydrodynamic approximation
10 p1686 A69-23908

Geomagnetic field directed hydromagnetic waves propagation in lower ionosphere, noting inhomogeneous conductivity, Hall effect and lines of forces role
10 p1687 A69-23926

D region ionizable constituent density/presumably nitric oxide/ measured, using blunt probe to detect changes in conductivity produced by Lyman alpha ionizing radiation
15 p2598 A69-31316

Ionosphere D region low field conductivity in presence of high field disturbing signal, assuming inelastic electron-neutral particle collisions
16 p2850 A69-32190

Faraday rotation measurements in ionosphere by geostationary satellite ATS-3 as evidence of considerable nighttime electron transport
17 p2959 A69-32926

Nocturnal D region conductivity enhancement relation to X radiation from Scorpius XR-1 and other sources, calculating ion production rate
17 p3024 A69-33378

Venus magnetosphere induced by piling up magnetic field from solar wind due to ionospheric conductivity and collisions with planetary atmospheric particles
21 p3794 A69-38381

Sharply bounded homogeneous ionospheric model to solve modal equation, discussing lower ionospheric conductivity from VLF transmission sudden enhancements of strength /SES/
21 p3714 A69-38554

IONOSPHERIC CROSS MODULATION

Ground based partial reflection and cross modulation or wave interaction techniques compared for studying D region electron densities
15 p2606 A69-31537

IONOSPHERIC CURRENTS

NT AURORAL ELECTROJETS

NT EQUATORIAL ELECTROJET

Magnetic field data fromOGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetosphere inflation and detection of polar ionospheric currents
01 p0069 A69-11125

Ionospheric current systems for various selected very quiet and slightly disturbed international quiet days based on Northern Hemisphere observatories data
03 p0423 A69-13518

Geomagnetic field quiet day solar variations current system calculated, using 2000 LT as zero level basis
03 p0424 A69-13541

Nighttime E layer mean variations noting critical frequencies, electron density and seasonal and solar activity effects at sunset, midnight and sunrise
03 p0398 A69-13899

Field aligned Birkeland currents generation at auroral latitudes
05 p0755 A69-16266

Energy transfer through ionospheric electrons, discussing degradation of fast electrons and role of neutral gas motion in ionospheric currents
07 p1128 A69-19369

Average geomagnetic storm ranges as function of latitude, noting disturbances caused by ring and ionospheric currents
09 p1489 A69-21715

Ionospheric movements from sampling radio diffraction pattern at 89 points and conversion into visible pattern
09 p1492 A69-22756

Toroidal magnetic fields in ionosphere associated with solar quiet daily variations producing electric current and equatorial auroral electrojets
10 p1681 A69-22805

Dynamo action produced magnetospheric currents in ionosphere computable without knowing real horizontal ionospheric current system
10 p1685 A69-23836

Electrical phenomena in upper atmosphere and solar wind may control geomagnetic disturbances and aurorae
10 p1686 A69-23903

Rocket sounding data on ionospheric currents at mid and low latitudes, showing absence in D and above E region
10 p1686 A69-23909

Solar quiet currents in three dimensional ionosphere, considering ionospheric conductivity and horizontal layer equations
12 p2074 A69-26955

Computer program for worldwide analysis of mean hourly values of field components into constituent fields and associated ionospheric current systems
12 p2074 A69-26958

Tangential solar wind discontinuity observed by Vela 2A satellite, producing ground magnetic disturbances conjunctively with magnetospheric, ground and ionospheric currents
14 p2512 A69-29041

Surface impedance of spherical earth isolated by nonconducting atmosphere from ionospheric currents producing alternating electromagnetic field
14 p2438 A69-29082

Strong vertical wind in low ionosphere due to short period reflected gravity waves, obtaining standing wave system
15 p2606 A69-31444

Wind effects on ionospheric electric currents, using equivalent circuits to study tidal modes and current patterns
16 p2775 A69-32083

U shaped polar auroras development, examining relation with magnetic activity and current system configuration in lower ionosphere
17 p2963 A69-33923

Electric field variations in vicinity of auroral form from motions of Ba vapor clouds released from Nike Tomahawk rockets
18 p3128 A69-34923

Ionospheric electric current systems dynamics in polar latitude in relation to 1966 geomagnetic storms
18 p3130 A69-35188

Rocket-released magnetometer probe for upper atmospheric measurements, discussing construction, flight, sensitivity and ionosphere current detection
19 p3309 A69-35992

Lower ionosphere electric fields and currents vertical profiles above geomagnetic equator under quiet geomagnetic conditions from rocket data
20 p3521 A69-37053

High latitude magnetospheric convection patterns determined from ionospheric current distribution using magnetic disturbance plots
21 p3709 A69-38503

Field-aligned currents effect on ionosphere and precipitation of auroral primary particles, analyzing with mathematical model of ionospheric density height distribution
21 p3710 A69-38506

Ionospheric currents geophysical DC electric fields measurement from sounding rockets, indicating anticorrelation with auroral luminosity
21 p3710 A69-38508

Ionospheric perturbations generation by time variable alternating electrical currents at polar latitudes, constructing radiation patterns for gravitational waves
23 p4155 A69-41842

IONOSPHERIC DISTURBANCES

NT SUDDEN IONOSPHERIC DISTURBANCES

Ionospheric irregularities height measurement using spaced receivers for recording satellite signals
01 p0064 A69-10428

Sporadic E layer boundary frequencies disturbances at midlatitudes, noting solar activity effects, diurnal variations and effect of meteor fluxes
01 p0066 A69-10600

Linearized perturbation treatment developed for photochemical and dynamical effects in gravity wave production of E-region ionospheric irregularities, including ion convergence
01 p0073 A69-11175

Cross field plasma instability resulting in charge density irregularities shown to meet requirements for ionospheric irregularities model
01 p0073 A69-11178

Equatorial and auroral electrojets, discussing origin theories and ionospheric irregularities
02 p0236 A69-11433

Space diversity reception as applied to radio astronomical investigation of large scale ionospheric inhomogeneities
02 p0237 A69-11665

Effective temperature values of ozone used to determine onset time and disturbance height in ionosphere
02 p0238 A69-11670

Anomalous radio wave absorption in polar aurora region ionosphere, discussing disturbance characteristics
02 p0207 A69-11688

F layer disturbance showing pronounced difference in corpuscular flux effect on day and nighttime ionosphere
03 p0512 A69-13517

Ionospheric perturbations involving stratifications at various heights move toward LF and HF sections of ionograms
03 p0423 A69-13538

Sporadic E irregularities in producing amplitude variations in radio star observations and satellite transmission
04 p0594 A69-15125

Antarctic spread F irregularities, examining models and performing ray tracing
04 p0595 A69-15439

Sudden VHF phase anomalies produced by solar flare induced ionospheric disturbances during July 1968
05 p0719 A69-15980

Lower ionospheric diurnal variations in electron density observed by beacon satellite, noting effect on high power VHF forward scatter circuits
05 p0757 A69-16405

Satellite scintillation at high latitudes and possible relation to soft particle precipitation
05 p0757 A69-16406

Ionospheric irregularities movement theories
05 p1125 A69-16416

Spatial distribution of vertically moving ionized formations in ionosphere suggests acoustic gravity waves excited in polar regions as cause
06 p0922 A69-17749

Coherent frequencies method for irregular component of satellite signal phase lead due to ionospheric inhomogeneities between satellite and ground station
06 p0890 A69-17799

Period fluctuations in ionospheric plasma resonance amplitude, proposing hypothesis in terms of quasi-electrostatic surface waves guided by antenna wire
07 p1125 A69-18847

Magnetospheric and high latitude ionospheric disturbances, bulk motion /convective/ flow pattern and electric field distribution
07 p1128 A69-19370

Ionospheric and tropospheric effects on microwave propagation including Faraday rotation, atmospheric refraction, attenuation and noise
08 p1272 A69-19958

Ionospheric plasma flute instability considered as possible cause of occurrence of elongated small scale inhomogeneities in F 2 layer
08 p1309 A69-20425

Lower ionosphere effect on LF electromagnetic disturbances, comparing propagation and damping of clockwise and counterclockwise polarized waves
09 p1487 A69-21637

Model of auroral backscatter from E region including ionospheric refraction, comparing computations to experimental HF auroral backscatter data for aspect sensitivity
09 p1488 A69-21700

Regular disturbance in topside ionosphere on summer nights from continuous records of ionospheric electron content, discussing magnetic activity and sunspot number effects
09 p1489 A69-21703

Irregular regions in Antarctic ionosphere from Polar Ionosphere Beacon Satellite S-66 recordings, obtaining irregularities density from nulls clarity
09 p1490 A69-21716

Ionospheric disturbances after July 7, 1966 proton flare noting flare ionizing radiation, high energy solar proton effects and low energy solar plasma
10 p1684 A69-23784

Subauroral traveling ionospheric disturbances and fading due to diffraction observed by geostationary satellites
10 p1685 A69-23831

Ionospheric discontinuities drift velocities from diversity reception data indicating no dependence on solar activity
10 p1686 A69-23911

Hourly N/h/ profiles of F region calculated from nomograms by normal integral method during magnetic disturbance, measuring region temperature
10 p1687 A69-23928

Diurnal variations in sporadic E layer and wind in ionosphere during equinox and solstice periods, noting wind shear mechanism and ambient electron density
10 p1688 A69-23932

Midlatitude ionospheric disturbances accompanied by auroral type radio absorption observed by radio astronomy and probes during May 26, 1967 storm
10 p1688 A69-23935

Acoustic waves in ionosphere relation to electron content fluctuations detected from beacon satellite BE-B signals
[AFCR-69-0291] 12 p2065 A69-26104

Space diversity reception as applied to radio astronomical investigation of large scale ionospheric inhomogeneities
13 p2257 A69-28696

Effective temperature values of ozone used to determine onset time and disturbance height in ionosphere
13 p2257 A69-28701

Anomalous radio wave absorption in polar aurora region ionosphere, discussing disturbance characteristics
13 p2224 A69-28719

Large scale ionospheric inhomogeneities anisotropy, dimensions and drift velocities from simultaneously measured irregular refraction
14 p2436 A69-29053

Radio astronomical observations of shape and drift velocity of focusing ionospheric discontinuities
14 p2436 A69-29054

Radio waves propagation along polar auroras region, obtaining ionospheric parameters for magnetic disturbances based on penetration probability
14 p2436 A69-29058

Oscillations intervals with diminishing period observed during magnetic storms, noting relationship to midlatitude disturbances in F region
14 p2436 A69-29060

Linearized perturbation for photochemical and dynamical effects in internal atmospheric gravity wave production of E region ionospheric irregularities
14 p2440 A69-29128

Multiple ground based geophysical sensors for detecting ionospheric phenomena, discussing continuous magnetic tape data recording, common time base and station operation
14 p2448 A69-29526

Zonal drift influence on morning ionization anomaly in F region, noting shifts to West with increasing height and electron production rate
14 p2442 A69-29732

Inhomogeneities effect on polarization of radio waves reflected from ionosphere, based on permittivity tensor
14 p2417 A69-29862

Ionospheric inhomogeneity model for motion of infinite elliptical cylinder of cold plasma in neutral particle flow and ambient electrostatic and magnetostatic fields
14 p2500 A69-29864

Ionospheric inhomogeneities models for plasma motions, considering electron-ion collisions
14 p2443 A69-29865

Radio equipment for studying ionospheric inhomogeneities using space diversity reception, presenting vertical component of drift velocities of small scale inhomogeneities
14 p2453 A69-29876

Fresnel irregularities calculated from radio wave partial reflection from lower ionosphere measured by rocket probes
15 p2604 A69-31420

Faraday rotation measurements of signals from Explorer 22 analyzed to determine scintillation boundary in auroral ionosphere
15 p2605 A69-31443

Charge density irregularities of midlatitude ionospheric E region related to cross field plasma instability noting turbulence
16 p2773 A69-31972

Ionization troughs below F 2 layer maximum due to ionospheric disturbances detected by Antarctica ionograms direction of arrival data
16 p2775 A69-32080

Satellite radio signal scintillation variations association with sporadic E and spread F and dependence on magnetic activity in Southern Hemisphere during sunspot minimum
16 p2780 A69-32307

Ionospheric winter anomaly duration in height range of mesopause region based on zenith angle dependence of absorption at LF
16 p2782 A69-32456

Synoptic observations of F 2 region in magnetically conjugate regions of Kerguelen and Archangel, comparing critical frequencies during magnetic and ionospheric disturbances
16 p2784 A69-32612

Horizontal drifts and anisotropy of irregularities in ionospheric F 2 region by pulse fading drift records
17 p2960 A69-33164

Ionosphere depression influence on VLF signals phase and amplitude calculated by mode theory and integral equations system representing aperture fields
17 p2920 A69-33418

Daytime magnetoionospheric disturbances in auroral zone, discussing time lag of perturbations for absorption and geomagnetic field bays
17 p2964 A69-33962

Traveling ionospheric disturbances in form of large scale electron concentration discontinuities created by propagating internal gravitational waves
17 p2966 A69-33980

Ionospheric electron concentration variation during positive perturbation based on N/h/ profiles
17 p2967 A69-33986

Vertical ionization displacements in F region as trace distortions on ionograms observed at low, mid and high altitudes during daytime
17 p2969 A69-33998

Vertical ionospheric perturbations shown responsible for Z component in F region
17 p2969 A69-34000

Radio echo from south showing origin from irregularities in F but not E region, discussing propagation modes for particular record
18 p3125 A69-34252

ELF and VLF wave propagation examined for heavy ions and lower ionospheric disturbance effects using numerical integration, noting standing wave field role for interpretation
18 p3125 A69-34254

Scattering of electromagnetic waves obliquely incident on inhomogeneous plasma column of parabolic radial density distribution, noting applications to ionospheric irregularities
18 p3102 A69-34963

Ionospheric radio propagation, considering D and F region theory and ionospheric disturbances
19 p3303 A69-36428

Nighttime F 2 region temperature distribution under geomagnetically calm and disturbed conditions calculated from Alouette 1 satellite data
19 p3304 A69-36623

Ionosphere disturbances due to high altitude thermonuclear explosions, discussing experimental proof by Cosmos satellites short wave transmitter radio signal scintillation statistical evaluation
19 p3304 A69-36624

Earth ionosphere and magnetosphere electrodynamic state analyzed as function of neutral gas small scale motions, considering magnetic disturbances and ionospheric discontinuities
20 p3519 A69-37026

Perturbed ionospheric regions acting as radio wave focusing lens, discussing frequency, power and pattern selection
20 p3486 A69-37048

Positive and negative correlations in F 2 layer perturbations observed by network of paired conjugate ionospheric stations at low latitude
20 p3521 A69-37050

Atmospheric phenomena effects on terrain imaging radar systems performance, discussing tropospheric turbulence and ionospheric irregularities
20 p3490 A69-37647

F zero layer occurrence relation to solar, magnetic and ionospheric activity levels variations from Ashkhabad observations /1958- 1964/
20 p3527 A69-37671

Ionospheric and magnetic disturbances at midlatitudes related, noting individual and simultaneous disturbances
20 p3527 A69-37673

F 2 layer midlatitude positive disturbances observed during IGY on quiet and disturbed days, noting positive to negative transition latitudes
20 p3527 A69-37674

Small scale inhomogeneities motions in E and sporadic E layers, processing data with method of full correlation analysis and statistical method
20 p3528 A69-37683

Vertically moving disturbances relationship to behavior of E and F layers over Tiflis, noting sporadic E layers formation
20 p3528 A69-37685

Vertically moving ionospheric disturbances altitude estimated from geomagnetic pulsations in earth electromagnetic field
20 p3528 A69-37686

Correlation analysis accuracy using Fischer transformation in processing recorded data of small scale ionospheric inhomogeneities
20 p3503 A69-37688

Ionogram processing procedure, discussing presence of vertically moving ionospheric disturbances
20 p3529 A69-37691

Ground station equipment for studying motions and structure of ionospheric inhomogeneities by combined space-frequency diversity reception, noting altitude dependence of ionospheric parameters
20 p3510 A69-37693

Topside equatorial ionosphere structure and behavior, describing anomaly development and decay
20 p3530 A69-37869

Ionospheric electron density irregularities observed by topside sounders showing shape, dimensions across magnetic field and variation percent, discussing resulting radio echoes
20 p3530 A69-37870

Doppler observations of ionospheric motions associated with magnetic micropulsations, noting hydromagnetic and neutral gas waves
20 p3535 A69-38194

Particle trapping and plasma oscillations in satellite disturbed ionosphere observed from Ariel and Alouette

measurements, discussing frequency and wavelength relation 21 p3787 A69-38357

Simulation and display for radar ground-backscatter signatures by computer ray tracing, using model ionosphere containing realistic traveling disturbances 21 p3717 A69-39280

Latitude variation of radio satellite scintillation related to small scale ionospheric irregularities 22 p3899 A69-39972

Fluctuations of polarization induced fading periods in short wave transmissions of Soviet earth satellites, showing relation to ionospheric inhomogeneities 22 p3942 A69-41095

Thermonuclear explosion Operation Starfish effect on ionospheric state from recording in Central Kazakhstan, studying frequency characteristics 22 p3942 A69-41097

Ionospheric perturbations generation by time variable alternating electrical currents at polar latitudes, constructing radiation patterns for gravitational waves 23 p4155 A69-41842

Ionization irregularities in equatorial E region observed in various scale sized by rocket-borne Langmuir and plasma-noise probes 23 p4160 A69-42430

Ionospheric irregularities effect on accurate satellite position determination in near real time 23 p4132 A69-42549

Solar X-ray spectrum as function of sunspot group type based on Solrad satellites flux data, discussing relationship to lower ionosphere characteristics variations 24 p4372 A69-43615

IONOSPHERIC DRIFT

North-south ionospheric drift velocities near magnetic equator, noting marked seasonal characteristics and diurnal variations 01 p0062 A69-10138

Electrostatic polarization field formation by acoustic wave propagation through ionosphere, calculating effect on ionization drift velocity 01 p0068 A69-11110

Phase path variations at three closely spaced points, measuring horizontal drifts at E region level, investigating time shift variability in spaced fading records 03 p0421 A69-13329

Horizontal drifts at E region level measured in India by spaced phase path technique 03 p0421 A69-13330

Plasma drift global distribution due to neutral gas motion in F 2 region, noting effect on electron concentration distributions 03 p0422 A69-13513

Nighttime variations of F region electron density profiles at Puerto Rico, discussing seasonal and solar cycle variations in temperature and vertical drift velocity 03 p0503 A69-14017

Drift periodic echoes in outer zone electron flux due to magnetospheric disturbance 05 p0815 A69-16259

Ionospheric drift measurements made on adjacent antenna arrays during IQSY 05 p0757 A69-16409

Solar cycle influence on winds in lower ionosphere 05 p0759 A69-16421

Day and night reversals in NmF2 north-south asymmetry related to neutral wind direction 06 p0918 A69-17384

Energy transfer through ionospheric electrons, discussing degradation of fast electrons and role of neutral gas motion in ionospheric currents 07 p1128 A69-19369

Nighttime electric fields and vertical ionospheric drifts near magnetic equator concurrent measurements 09 p1489 A69-21705

Nonequilibrium ionization in central regions of low temperature plasma, describing charged particle drift by using diffusion time concept 10 p1732 A69-23440

F 2 layer drift relation to current systems of dynamo region confirmed at middle and high latitudes 10 p1682 A69-23611

Ionospheric discontinuities drift velocities from diversity reception data indicating no dependence on solar activity 10 p1686 A69-23911

Ionospheric irregularities drift and anisotropy parameters variation with true reflection height during magnetically disturbed conditions 10 p1659 A69-24062

Vertical ionization drift in F region as function of electron density, ionization coefficient and recombination coefficient 12 p2070 A69-26584

Diurnal and seasonal variations in drift velocity vector of small scale inhomogeneities in F 2 region 12 p2070 A69-26688

Vertical drift velocity of ionospheric F region during eclipse and on control day based on chemical reaction coefficients models, discussing electron density distribution 12 p2077 A69-27109

Position stability of ionospheric sporadic E layer 14 p2435 A69-29038

Large scale ionospheric inhomogeneities anisotropy, dimensions and drift velocities from simultaneously measured irregular refraction 14 p2436 A69-29053

Radio astronomical observations of shape and drift velocity of focusing ionospheric discontinuities 14 p2436 A69-29054

Zonal drift influence on morning ionization anomaly in F region, noting shifts to West with increasing height and electron production rate 14 p2442 A69-29732

Drift of F 2 layer inhomogeneities compared for IGY and IQSY 14 p2443 A69-29866

Similarity and correlation methods for drift of ionospheric inhomogeneities in Antarctica 14 p2444 A69-29867

F 2 region small scale inhomogeneities drift observations showing seasonal and diurnal velocity and direction changes 14 p2444 A69-29868

Ionospheric sporadic E layer inhomogeneities drift, discussing altitude dependence of velocity and direction 14 p2444 A69-29869

Random motions velocity of ionospheric inhomogeneities by extreme lines delineation of diffraction pattern during amplitude recording of reflected signal 14 p2444 A69-29872

Frequency diversity reception system for drift of small scale ionospheric inhomogeneities, noting circuit diagrams 14 p2452 A69-29875

E region ionization redistribution by neutral winds, comparing calculated vertical drift velocities to observed electron density profiles 15 p2677 A69-31395

Correlation between F region electrons vertical motion velocity variations and E region electrons horizontal motions in equatorial ionosphere 16 p2779 A69-32193

Combined midlatitude neutral air wind and equatorial electrodynamic drift effect on F 2 layer diurnal variations 16 p2781 A69-32316

Horizontal drifts and anisotropy of irregularities in ionospheric F 2 region by pulse fading drift records 17 p2960 A69-33164

E region horizontal drift measurements at Ahmedabad from 1956 to 1966, noting solar activity and seasonal influences 17 p2962 A69-33678

E layer inhomogeneities analysis concerning drift, chaotic processes, statistical parameters and reliability of data processing 17 p2962 A69-33896

Vertical distribution of ionospheric drift velocity in auroral zone, evaluating role and intensity of electric field formed in dynamo region 17 p2964 A69-33964

Magnetic declination effect on F 2 layer critical frequency diurnal variations attributed to vertical ionospheric drift due to neutral air winds 18 p3126 A69-34256

Wind velocity components calculation at F-sphere maximum level, taking into account electrodynamic drift of ionospheric plasma and ion motion 20 p3519 A69-36972

Upper ionosphere Thomson scatter, electron number density measurements and topside sounding results during geomagnetic storms using electrodynamic drift theory 20 p3530 A69-37872

Causal and semiphenomenological theories concerning equatorial F 2 region, discussing electrodynamic drift theory and transequatorial winds 20 p3531 A69-37888

Ionosphere drift measurements in LF range, noting relationship between correlation and similar-fade analyses for velocity data 21 p3714 A69-38557

Nighttime F region nonlinear recombination and variable drift effects, suggesting empirical model 21 p3715 A69-38559

Magnetic activity effects on horizontal drifts, anisotropy and random change characteristics of E region ionization irregularities 21 p3715 A69-38561

Daytime drift velocities and signal fading characteristics of equatorial and blanketing sporadic E layer irregularities, noting independence of electrojet intensity 23 p4160 A69-42429

IONOSPHERIC ELECTRON DENSITY

Night ionosphere electron content changes in Southern Hemisphere, discussing diffusion from exosphere and corpuscular radiation as sources of ionization 01 p0063 A69-10423

Electron production rate and density created by galactic and solar cosmic rays in lower D region, considering ionization for PCA 01 p0063 A69-10426

Topside ionosphere average height distributions of electron density and geomagnetic field intensity from Alouette 2 data over Japan, noting ionic composition 01 p0065 A69-10548

Electron density and temperature, ion density, composition and temperature and plasma space potential relative to space vehicle potential measured by spherical probe assembly 01 p0065 A69-10549

Radio waves incoherent scattering to measure electron concentration profiles at mean latitudes, allowing for collisions 01 p0065 A69-10575

Ionization, neutralization and charge exchange processes in ionosphere, detailing dependence of photodissociation and collision detachment of negative ions 01 p0066 A69-10598

Spacecraft ionospheric probe for simultaneous measurement of electron temperature and density, plasma space potential, ion composition, etc 01 p0081 A69-10760

Soviet studies of ionospheric electron densities by means of geophysical rockets and satellites 01 p0067 A69-10944

Amplitude scintillations of satellite radio signals during sunrise due to ionospheric turbulence induced electron content variations 01 p0067 A69-10980

Nighttime sporadic E rocket measurements, discussing descending layer thickness and electron density and lower boundary 01 p0071 A69-11165

Vertical wind profiles and electron density profiles in E region, determining time dependence and ionization drift velocity 01 p0072 A69-11172

Electron concentration in ionospheric outer regions determined from coherent frequencies recorded on-board OGO-A 01 p0147 A69-11323

Ionospheric electron content, slab thickness and scintillation occurrence measurements at low latitude stations 02 p0235 A69-11427

Ionospheric electron density determined from Faraday effect, using ATS-3 radio signals 02 p0237 A69-11660

Seasonal variations in thickness of ionospheric E-F interlayer region during daylight and maximum integral ionization values 02 p0239 A69-11682

E region electron concentration measurements during large solar zenith angles, noting anomalous behavior during low solar activity periods 02 p0239 A69-11683

Ionosphere studies in France noting lower ionosphere dynamics, ionospheric winds, plasma electron densities, electron and ion temperature and ion-neutron collision frequency 02 p0242 A69-11903

Middle ionosphere temperature diurnal variations analyzed on basis of rocket experiments and electron density asymmetry 02 p0246 A69-12768

Electron and positive ion density measurements during nighttime auroral absorption event 03 p0421 A69-13327

Plasma drift global distribution due to neutral gas motion in F 2 region, noting effect on electron concentration distributions

03 p0422 A69-13513

Electron concentration profile change in ionospheric F region in auroral zone during negative magnetic bay disturbances

03 p0423 A69-13530

Electron concentration in lower ionosphere based on measurement of Faraday rotation of polarization plane of radio waves scattered by meteor trail

03 p0423 A69-13535

Nocturnal electron concentrations and temperature at Manitoba measured by rocket-borne Langmuir probe, compared with F 1 region

03 p0502 A69-14008

Nighttime variations of F region electron density profiles at Puerto Rico, discussing seasonal and solar cycle variations in temperature and vertical drift velocity

03 p0503 A69-14017

Midlatitude nighttime total ionospheric electron content during magnetically disturbed periods from geostationary satellites Canary Bird and ATS 3

03 p0426 A69-14030

Total ionospheric electron content determination from measurement of phase differences of satellite transmission, discussing data processing and differential Doppler effect measurements

04 p0592 A69-14766

Bearing deviation in model HF transionospheric propagation with three dimensional electron density variation and no magnetic field

04 p0559 A69-15209

Mechanism for noon electron concentration maximum in F region at midlatitudes found to be recombination process

05 p0753 A69-16031

Error introduced into total electron content data by changes in ionospheric layer height

05 p0816 A69-16281

Lunar tide effect on height distribution and velocity of ionospheric electron density daily variations near magnetic equator

05 p0756 A69-16401

Internal atmospheric gravity waves in F region observed with electron density profiles deduced from vertical incidence ionograms, obtaining phase velocities

05 p0756 A69-16402

Lower ionospheric diurnal variations in electron density observed by beacon satellite, noting effect on high power VHF forward scatter circuits

05 p0757 A69-16405

Simultaneous rocket measurements of D region temperatures and electron densities on anomalous winter day

05 p0758 A69-16411

Ionospheric electron content and slab thickness changes during magnetic storm in June 1965 using Faraday rotation and critical frequencies

05 p0759 A69-16420

Electron formation in lower ionosphere due to cosmic ray-atmosphere interaction, analyzing ionization of subrelativistic and relativistic solar and galactic cosmic rays

06 p0920 A69-17726

Ionospheric D layer electron concentration profile from radio wave absorption frequency dependence

06 p0920 A69-17729

Sporadic E layers compared with model of electron concentration profile, using rocket measured profile data for computing ionogram

06 p0922 A69-17750

Formation dynamics of thin sporadic layers of E region, determining maximum ionization and electron concentration and electron-neutral atoms collision frequency

06 p0922 A69-17751

Electron density distribution stationary with respect to sun determined by Alouette 1 measurements over winter pole, noting relation to high density plasma

06 p0922 A69-18224

Approximation formulas of Appleton-Hartree equations for nighttime medium wave frequency absorption in E region of ionosphere, discussing electron density

07 p1122 A69-18295

Solar eclipse variations of E layer critical frequency explained by quasi-equilibrium between electron density and ionizing soft X ray radiation

07 p1204 A69-18823

Single polynomial analysis of ionograms, determining electron density profiles from small number of measured heights

07 p1125 A69-18915

Partial reflections from ionosphere, analyzing electron number densities, noting relation between D region ionization increases and small solar proton events

07 p1205 A69-18956

Faraday rotation measurements using incoherent scatter to obtain ionospheric electron density profiles

07 p1085 A69-19223

D region electron density vertical profiles measured using partially reflected echoes from lower ionosphere

08 p1307 A69-20189

D region electron concentrations and collision frequencies obtained from high power wave interactions experiment, presenting average winter collision frequency model

09 p1489 A69-21702

Regular disturbance in topside ionosphere on summer nights from continuous records of ionospheric electron content, discussing magnetic activity and sunspot number effects

09 p1489 A69-21703

Diurnal variation of D region electron production rates, discussing Lyman alpha ionization of nitric oxide

09 p1577 A69-21717

Electron production rates variations in lower ionosphere cosmic layer related to meteorological, geomagnetic and cosmic conditions

10 p1759 A69-22839

Cosmic ray absorption and modulation in lower ionosphere at midlatitudes, considering 11 year variations, Forbush effects and solar radiation on electron concentration

10 p1759 A69-22840

Ionospheric conditions following solar proton flare observed with topside sounders of Alouette satellites, showing electron density depletion and hydromagnetic wave relationship

10 p1684 A69-23781

Incoherent scatter measurements of F region electron concentrations at solar activity minimum

10 p1684 A69-23825

Electron density profile from oblique ionogram calculated by iteration, assuming concentric spherically stratified ionosphere

10 p1684 A69-23826

Nonlinear charge exchange and dissociative recombination effects on night F region decay compared with linear theory

10 p1685 A69-23832

Topside ionospheric electron density profiles compared for magnetically quiet and disturbed periods surrounding December 17, 1962 magnetic storm

10 p1685 A69-23835

Ionospheric measurements of electron density, electron and ion temperature profiles from strength of incoherent radio wave scattering

10 p1686 A69-23910

Ionospheric slopes and range frequency characteristics obtained from oblique incidence sounding of horizontally nonuniform ionosphere

10 p1686 A69-23914

Hourly N/h profiles of F region calculated from nomograms by normal integral method during magnetic disturbance, measuring region temperature

10 p1687 A69-23928

Molecular reaction rates and ion/electron vertical profile and concentrations in equatorial ionosphere, applying computer simulation to numerical solution of continuity equations

10 p1688 A69-23929

Diurnal variations in sporadic E layer and wind in ionosphere during equinox and solstice periods, noting wind shear mechanism and ambient electron density

10 p1688 A69-23932

Ionospheric electron content gradients from Faraday rotation observations of radio beacon satellites for direction finding of HF radio waves

11 p1837 A69-25004

Nighttime maxima anomaly in electron concentration of ionospheric F layer at midlatitudes, considering diffusion and recombination

12 p2064 A69-26007

Acoustic waves in ionosphere relation to electron content fluctuations detected from beacon satellite BE-B signals

[AFCLR-69-0291]

12 p2065 A69-26104

Vertical ionization drift in F region as function of electron density, ionization coefficient and recombination coefficient

12 p2070 A69-26584

Electron concentration fluctuation in ionospheric inhomogeneities estimated from Cassiopeia A radio emission

12 p2070 A69-26687

Electron concentration in polar ionosphere measured by coherent scattering method

12 p2071 A69-26703

Lower ionosphere electron densities measured during solar eclipse by Nike-Apache rockets

12 p2073 A69-26861

Vertical drift velocity of ionospheric F region during eclipse and on control day based on chemical reaction coefficients models, discussing electron density distribution

12 p2077 A69-27109

Global coverage of positive ion composition and temperature, and electron density and temperature measurements during AURORAE mission of ESRO 1 satellite

13 p2253 A69-27753

Ionospheric electron density determined from Faraday effect, using ATS-3 radio signals

13 p2256 A69-28691

Seasonal variations in thickness of ionospheric E-F interlayer region during daylight and maximum integral ionization values

13 p2257 A69-28713

E region electron concentration measurements during large solar zenith angles, noting anomalous behavior during low solar activity periods

13 p2258 A69-28714

Magnetic storm time variations of electron concentrations in upper ionosphere near north geomagnetic pole, discussing magnetic time, altitude and latitude dependence

14 p2510 A69-28939

Ionospheric electron and ion temperatures correlated with electron concentration profile as measured by rockets and satellites

14 p2510 A69-28942

Ionograms in vertical depletion duct in horizontally stratified isotropically refractive plasma, considering vertical propagation and ray paths traces dependence on electron concentration

14 p2434 A69-28945

Ionospheric horizontal discontinuities of electron density distribution parameters effect on penetration frequency, skip distances and arrival angles

14 p2436 A69-29057

Ionograms for nonmonotonic vertical distribution of electron concentration in ionosphere from rocket and ground sounding

14 p2437 A69-29071

Radio wave absorption coefficient in lower ionosphere related to total radiation absorption and electron concentration profile

14 p2411 A69-29075

Electron density profiles in outer ionosphere and integral of electron density measured with coherent radio waves emitted from Electron satellite

14 p2438 A69-29106

Seasonal variations of electron density profiles in lower ionosphere measured by differential absorption using partial reflections

14 p2438 A69-29109

Noon electron densities between 65-90 km from measurements of differential absorption of partial reflections, discussing seasonal variations at midlatitudes

14 p2439 A69-29110

British and Soviet D region electron density distributions from same VLF and LF propagation data

14 p2439 A69-29112

Rocket sounding measurements of ionospheric D region electron density profile during 20 May 1966 solar eclipse, discussing D region ionization source

14 p2439 A69-29116

Rocket measured electron densities of nighttime auroral E region over Canada at different magnetic activity levels, noting frequency and plasma density relations

14 p2439 A69-29117

Polar cap absorption riometer recorded during 2-6 September 1966 event compared to satellite measurements of solar protons, discussing diurnal variations and oxygen role in associative detachment reactions

14 p2440 A69-29126

Radio wave reflections from edge of large scale depressions of ionospheric electron density observed by topside sounding satellites, discussing ionogram recordings

14 p2415 A69-29521

Sporadic E layer frequency characteristics dependence on reflected signal fading, showing fine structure influence and maximum value of mean electron concentration

14 p2442 A69-29733

Radio signals F region scattering related to electron density fluctuations in ionosphere

14 p2444 A69-29870

Radio waves incoherent scattering to measure electron concentration profiles at mean latitudes, allowing for collisions

15 p2597 A69-30745

Sporadic E layer nighttime electron density profiles obtained by Langmuir probe equipped sounding rockets

15 p2603 A69-31398

Electron temperature observation in daytime ionosphere, considering energy loss to ions and neutral particles

15 p2603 A69-31402
